Administration

A Special Edition of the Federal Register

## U.S. GOVERNMENT OFFICIAL EDITION NOTICE

### Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA's official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist's designee. Any person using NARA's official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

### Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0-16 ISBN prefix is for U.S. Government Printing Office Official Editions only. The Superintendent of Documents of the U.S. Government Printing Office requests that any reprinted edition clearly be labeled as a copy of the authentic work with a new ISBN.

*To cite the regulations in  
this volume use title,  
part and section num-  
ber. Thus, 43 CFR  
1601.0-1 refers to title  
43, part 1600, section 0-  
1.*

---

## Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

### LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

### HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, October 1, 2008), consult the "List of CFR Sections Affected (LSA)," which is issued monthly, and the "Cumulative List of Parts Affected," which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

### EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

### OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

#### OBSOLETE PROVISIONS

Provisions that become obsolete before the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on a given date in the past by using the appropriate numerical list of sections affected. For the period before January 1, 1986, consult either the List of CFR Sections Affected, 1949-1963, 1964-1972, or 1973-1985, published in seven separate volumes. For the period beginning January 1, 1986, a "List of CFR Sections Affected" is published at the end of each CFR volume.

#### INCORPORATION BY REFERENCE

*What is incorporation by reference?* Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

*What is a proper incorporation by reference?* The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

- (a) The incorporation will substantially reduce the volume of material published in the Federal Register.
- (b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.
- (c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

Properly approved incorporations by reference in this volume are listed in the Finding Aids at the end of this volume.

*What if the material incorporated by reference cannot be found?* If you have any problem locating or obtaining a copy of material listed in the Finding Aids of this volume as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, Washington DC 20408, or call 202-741-6010.

#### CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Statutory Authorities and Agency Rules (Table I). A list of CFR titles, chapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of "Title 3—The President" is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the "Contents" entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

## REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

## INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency's name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408 or e-mail [fedreg.info@nara.gov](mailto:fedreg.info@nara.gov).

## SALES

The Government Printing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2250, 24 hours a day. For payment by check, write to: US Government Printing Office - New Orders, P.O. Box 979050, St. Louis, MO 63197-9000. For GPO Customer Service call 202-512-1803.

## ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers, Weekly Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format at [www.gpoaccess.gov/nara](http://www.gpoaccess.gov/nara) ("GPO Access"). For more information, contact Electronic Information Dissemination Services, U.S. Government Printing Office. Phone 202-512-1530, or 888-293-6498 (toll-free). E-mail, [gpoaccess@gpo.gov](mailto:gpoaccess@gpo.gov).

The Office of the Federal Register also offers a free service on the National Archives and Records Administration's (NARA) World Wide Web site for public law numbers, Federal Register finding aids, and related information. Connect to NARA's web site at [www.archives.gov/federal-register](http://www.archives.gov/federal-register). The NARA site also contains links to GPO Access.

## THIS TITLE

Title 43—PUBLIC LANDS: INTERIOR is composed of two volumes. Volume one (parts 1–999) contains all current regulations issued under subtitle A—Office of the Secretary of the Interior and chapter I—Bureau of Reclamation, Department of the Interior. Volume two (part 1000 to End) includes all regulations issued under chapter II—Bureau of Land Management, Department of the Interior, and Chapter III—Utah Reclamation Mitigation and Conservation Commission. The contents of these volumes represent all current regulations codified under this title of the CFR as of October 1, 2008.

In the second volume, containing chapter II—Bureau of Land Management, Department of the Interior, the OMB control numbers appear in a “Note” immediately below the “Group” headings throughout the chapter, if applicable. An index to chapter II appears in the Finding Aids section of the second volume.

For this volume, Michele Bugenhagen was Chief Editor. The Code of Federal Regulations publication program is under the direction of Michael L. White, assisted by Ann Worley.

## SUBCHAPTER A—GENERAL MANAGEMENT (1000)

### PARTS 1000–1599 [RESERVED]

### PART 1600—PLANNING, PROGRAMMING, BUDGETING

#### Subpart 1601—Planning

- Sec.
- 1601.0–1 Purpose.
  - 1601.0–2 Objective.
  - 1601.0–3 Authority.
  - 1601.0–4 Responsibilities.
  - 1601.0–5 Definitions.
  - 1601.0–6 Environmental impact statement policy.
  - 1601.0–7 Scope.
  - 1601.0–8 Principles.

#### Subpart 1610—Resource Management Planning

- 1610.01 Resource management planning guidance.
- 1610.2 Public participation.
- 1610.3 Coordination with other Federal agencies, State and local governments, and Indian tribes.
  - 1610.3–1 Coordination of planning efforts.
  - 1610.3–2 Consistency requirements.
- 1610.4 Resource management planning process.
  - 1610.4–1 Identification of issues.
  - 1610.4–2 Development of planning criteria.
  - 1610.4–3 Inventory data and information collection.
  - 1610.4–4 Analysis of the management situation.
  - 1610.4–5 Formulation of alternatives.
  - 1610.4–6 Estimation of effects of alternatives.
  - 1610.4–7 Selection of preferred alternatives.
  - 1610.4–8 Selection of resource management plan.
  - 1610.4–9 Monitoring and evaluation.
- 1610.5 Resource management plan approval, use and modification.
  - 1610.5–1 Resource management plan approval and administrative review.
  - 1610.5–2 Protest procedures.
  - 1610.5–3 Conformity and implementation.
  - 1610.5–4 Maintenance.
  - 1610.5–5 Amendment.
  - 1610.5–6 Revision.
  - 1610.5–7 Situations where action can be taken based on another agency's plan, or a land use analysis.
- 1610.6 Management decision review by Congress.
- 1610.7 Designation of areas.
  - 1610.7–1 Designation of areas unsuitable for surface mining.

1610.7–2 Designation of areas of critical environmental concern.

1610.8 Transition period.

AUTHORITY: 43 U.S.C. 1711–1712.

SOURCE: 48 FR 20368, May 5, 1983, unless otherwise noted.

#### Subpart 1601—Planning

##### § 1601.0–1 Purpose.

The purpose of this subpart is to establish in regulations a process for the development, approval, maintenance, amendment and revision of resource management plans, and the use of existing plans for public lands administered by the Bureau of Land Management.

##### § 1601.0–2 Objective.

The objective of resource management planning by the Bureau of Land Management is to maximize resource values for the public through a rational, consistently applied set of regulations and procedures which promote the concept of multiple use management and ensure participation by the public, state and local governments, Indian tribes and appropriate Federal agencies. Resource management plans are designed to guide and control future management actions and the development of subsequent, more detailed and limited scope plans for resources and uses.

##### § 1601.0–3 Authority.

These regulations are issued under the authority of sections 201 and 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1711–1712); the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901); section 3 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(a)); sections 522, 601, and 714 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*); and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

##### § 1601.0–4 Responsibilities.

(a) National level policy and procedure guidance for planning shall be

## § 1601.0-5

## 43 CFR Ch. II (10-1-08 Edition)

provided by the Secretary and the Director.

(b) State Directors will provide quality control and supervisory review, including plan approval, for plans and related environmental impact statements and provide additional guidance, as necessary, for use by Field Managers. State Directors will file draft and final environmental impact statements associated with resource management plans and amendments.

(c) Field Managers will prepare resource management plans, amendments, revisions and related environmental impact statements. State Directors must approve these documents.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14565, Mar. 23, 2005]

### § 1601.0-5 Definitions.

As used in this part, the term:

(a) *Areas of Critical Environmental Concern* or *ACEC* means areas within the public lands where special management attention is required (when such areas are developed or used or where no development is required) to protect and prevent irreparable damage to important historic, cultural, or scenic values, fish and wildlife resources, or other natural systems or processes, or to protect life and safety from natural hazards. The identification of a potential ACEC shall not, of itself, change or prevent change of the management or use of public lands.

(b) *Conformity or conformance* means that a resource management action shall be specifically provided for in the plan, or if not specifically mentioned, shall be clearly consistent with the terms, conditions, and decisions of the approved plan or plan amendment.

(c) *Consistent* means that the Bureau of Land Management plans will adhere to the terms, conditions, and decisions of officially approved and adopted resource related plans, or in their absence, with policies and programs, subject to the qualifications in §1615.2 of this title.

(d) *Eligible cooperating agency* means:

(1) A Federal agency other than a lead agency that is qualified to participate in the development of environmental impact statements as provided in 40 CFR 1501.6 and 1508.5 or, as necessary, other environmental documents

that BLM prepares, by virtue of its jurisdiction by law as defined in 40 CFR 1508.15, or special expertise as defined in 40 CFR 1508.26; or

(2) A federally recognized Indian tribe, a state agency, or a local government agency with similar qualifications.

(e) *Cooperating agency* means an eligible governmental entity that has entered into a written agreement with the BLM establishing cooperating agency status in the planning and NEPA processes. BLM and the cooperating agency will work together under the terms of the agreement. Cooperating agencies will participate in the various steps of BLM's planning process as feasible, given the constraints of their resources and expertise.

(f) *Field Manager* means a BLM employee with the title "Field Manager" or "District Manager."

(g) *Guidance* means any type of written communication or instruction that transmits objectives, goals, constraints, or any other direction that helps the Field Managers and staff know how to prepare a specific resource management plan.

(h) *Local government* means any political subdivision of the State and any general purpose unit of local government with resource planning, resource management, zoning, or land use regulation authority.

(i) *Multiple use* means the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people; making the most judicious use of the lands for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some lands for less than all of the resources; a combination of balanced and diverse resource uses that takes into account the long term needs of future generations for renewable and non-renewable resources, including, but not limited to, recreation, range, timber, minerals, watershed, wildlife and fish, and natural scenic, scientific and historical values; and harmonious and coordinated management of the various

## Bureau of Land Management, Interior

## § 1601.0-8

resources without permanent impairment of the productivity of the lands and the quality of the environment with consideration being given to the relative values of the resources and not necessarily to the combination of uses that will give the greatest economic return or the greatest unit output.

(j) *Officially approved and adopted resource related plans* means plans, policies, programs and processes prepared and approved pursuant to and in accordance with authorization provided by Federal, State or local constitutions, legislation, or charters which have the force and effect of State law.

(k) *Public* means affected or interested individuals, including consumer organizations, public land resource users, corporations and other business entities, environmental organizations and other special interest groups and officials of State, local, and Indian tribal governments.

(l) *Public lands* means any lands or interest in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management, except lands located on the Outer Continental Shelf and lands held for the benefit of Indians, Aleuts and Eskimos.

(m) *Resource area or field office* means a geographic portion of a Bureau of Land Management district. It is the administrative subdivision whose manager has primary responsibility for day-to-day resource management activities and resource use allocations and is, in most instances, the area for which resource management plans are prepared and maintained.

(n) *Resource management plan* means a land use plan as described by the Federal Land Policy and Management Act. The resource management plan generally establishes in a written document:

(1) Land areas for limited, restricted or exclusive use; designation, including ACEC designation; and transfer from Bureau of Land Management Administration;

(2) Allowable resource uses (either singly or in combination) and related levels of production or use to be maintained;

(3) Resource condition goals and objectives to be attained;

(4) Program constraints and general management practices needed to achieve the above items;

(5) Need for an area to be covered by more detailed and specific plans;

(6) Support action, including such measures as resource protection, access development, realty action, cadastral survey, etc., as necessary to achieve the above;

(7) General implementation sequences, where carrying out a planned action is dependent upon prior accomplishment of another planned action; and

(8) Intervals and standards for monitoring and evaluating the plan to determine the effectiveness of the plan and the need for amendment or revision.

It is not a final implementation decision on actions which require further specific plans, process steps, or decisions under specific provisions of law and regulations.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14565, 14567, Mar. 23, 2005]

### § 1601.0-6 Environmental impact statement policy.

Approval of a resource management plan is considered a major Federal action significantly affecting the quality of the human environment. The environmental analysis of alternatives and the proposed plan shall be accomplished as part of the resource management planning process and, wherever possible, the proposed plan and related environmental impact statement shall be published in a single document.

### § 1601.0-7 Scope.

(a) These regulations apply to all public lands.

(b) These regulations also govern the preparation of resource management plans when the only public land interest is the mineral estate.

### § 1601.0-8 Principles.

The development, approval, maintenance, amendment and revision of resource management plans will provide for public involvement and shall be consistent with the principles described in section 202 of the Federal Land Policy and Management Act of 1976. Additionally, the impact on local

## **§ 1610.1**

economies and uses of adjacent or nearby non-Federal lands and on non-public land surface over federally-owned mineral interests shall be considered.

### **Subpart 1610—Resource Management Planning**

#### **§ 1610.1 Resource management planning guidance.**

(a) Guidance for preparation and amendment of resource management plans may be provided by the Director and State Director, as needed, to help the Field Manager and staff prepare a specific plan. Such guidance may include the following:

(1) National level policy which has been established through legislation, regulations, executive orders or other Presidential, Secretarial or Director approved documents. This policy may include appropriately developed resource management commitments, such as a right-of-way corridor crossing several resource or field office areas, which are not required to be re-examined as part of the planning process.

(2) Analysis requirements, planning procedures and other written information and instructions required to be considered in the planning process.

(3) Guidance developed at the State Director level, with necessary and appropriate governmental coordination as prescribed by §1610.3 of this title. Such guidance shall be reconsidered by the State Director at any time during the planning process that the State Director level guidance is found, through public involvement or other means, to be inappropriate when applied to a specific area being planned.

(b) A resource management plan shall be prepared and maintained on a resource or field office area basis, unless the State Director authorizes a more appropriate area.

(c) An interdisciplinary approach shall be used in the preparation, amendment and revision of resource management plans as provided in 40 CFR 1502.6. The disciplines of the preparers shall be appropriate to the values involved and the issues identified during the issue identification and environmental impact statement scoping stage of the planning process. The

## **43 CFR Ch. II (10–1–08 Edition)**

Field Manager may use any necessary combination of Bureau of Land Management staff, consultants, contractors, other governmental personnel, and advisors to achieve an interdisciplinary approach.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, 14567, Mar. 23, 2005; 70 FR 29208, May 20, 2005]

#### **§ 1610.2 Public participation.**

(a) The public shall be provided opportunities to meaningfully participate in and comment on the preparation of plans, amendments and related guidance and be given early notice of planning activities. Public involvement in the resource management planning process shall conform to the requirements of the National Environmental Policy Act and associated implementing regulations.

(b) The Director shall, early in each fiscal year, publish a planning schedule advising the public of the status of each plan in process of preparation or to be started during that fiscal year, the major action on each plan during that fiscal year and projected new planning starts for the 3 succeeding fiscal years. The notice shall call for public comments on projected new planning starts so that such comments can be considered in refining priorities for those years.

(c) When BLM starts to prepare, amend, or revise resource management plans we will begin the process by publishing a notice in the FEDERAL REGISTER and appropriate local media, including newspapers of general circulation in the state and field office area. The Field Manager may also decide if it is appropriate to publish a notice in media in adjoining States. This notice may also constitute the scoping notice required by regulation for the National Environmental Policy Act (40 CFR 1501.7). This notice shall include the following:

(1) Description of the proposed planning action;

(2) Identification of the geographic area for which the plan is to be prepared;

(3) The general types of issues anticipated;

(4) The disciplines to be represented and used to prepare the plan;

## Bureau of Land Management, Interior

## § 1610.2

(5) The kind and extent of public participation opportunities to be provided;

(6) The times, dates and locations scheduled or anticipated for any public meetings, hearings, conferences or other gatherings, as known at the time;

(7) The name, title, address and telephone number of the Bureau of Land Management official who may be contacted for further information; and

(8) The location and availability of documents relevant to the planning process.

(d) A list of individuals and groups known to be interested in or affected by a resource management plan shall be maintained by the Field Manager and those on the list shall be notified of public participation activities. Individuals or groups may ask to be placed on this list. Public participation activities conducted by the Bureau of Land Management shall be documented by a record or summary of the principal issues discussed and comments made.

The documentation together with a list of attendees shall be available to the public and open for 30 days to any participant who wishes to clarify the views he/she expressed.

(e) At least 15 days' public notice shall be given for public participation activities where the public is invited to attend. Any notice requesting written comments shall provide for at least 30 calendar days for response. Ninety days shall be provided for review of the draft plan and draft environmental impact statement. The 90-day period shall begin when the Environmental Protection Agency publishes a notice of the filing of the draft environmental impact statement in the FEDERAL REGISTER.

(f) Public notice and opportunity for participation in resource management plan preparation shall be appropriate to the areas and people involved and shall be provided at the following specific points in the planning process:

(1) General notice at the outset of the process inviting participation in the identification of issues (See §§ 1610.2(c) and 1610.4-1);

(2) Review of the proposed planning criteria (See § 1610.4-2);

(3) Publication of the draft resource management plan and draft environmental impact statement (See § 1610.4-7);

(4) Publication of the proposed resource management plan and final environmental impact statement which triggers the opportunity for protest (See §§ 1610.4-8 and 1610.5-1(b)); and

(5) Public notice and comment on any significant change made to the plan as a result of action on a protest (See § 1610.5-1(b)).

(g) BLM will make copies of an approved resource management plan and amendments reasonably available for public review. Upon request, we will make single copies available to the public during the public participation process. After BLM approves a plan, amendment, or revision we may charge a fee for additional copies. We will also have copies available for public review at the:

(1) State Office that has jurisdiction over the lands,

(2) Field Office that prepared the plan; and

(3) District Office, if any, having jurisdiction over the Field Office that prepared the plan.

(h) Supporting documents to a resource management plan shall be available for public review at the office where the plan was prepared.

(i) Fees for reproducing requested documents beyond those used as part of the public participation activities and other than single copies of the printed plan amendment or revision may be charged according to the Department of the Interior schedule for Freedom of Information Act requests in 43 CFR part 2.

(j) When resource management plans involve areas of potential mining for coal by means other than underground mining, and the surface is privately owned, the Bureau of Land Management shall consult with all surface owners who meet the criteria in § 3400.0-5 of this title. Contact shall be made in accordance with subpart 3427 of this title and shall provide time to fully consider surface owner views. This contact may be made by mail or in person by the Field Manager or his/her appropriate representative. A period of at least 30 days from the time of

### § 1610.3

contact shall be provided for surface owners to convey their preference to the Field Manager.

(k) If the plan involves potential for coal leasing, a public hearing shall be provided prior to the approval of the plan, if requested by any person having an interest which is, or may be, adversely affected by implementation of such plan. The hearing shall be conducted as prescribed in § 3420.1-5 of this title and may be combined with a regularly scheduled public meeting. The authorized officer conducting the hearing shall:

(1) Publish a notice of the hearing in a newspaper of general circulation in the affected geographical area at least once a week for 2 consecutive weeks;

(2) Provide an opportunity for testimony by anyone who so desires; and

(3) Prepare a record of the proceedings of the hearing.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, 14567, Mar. 23, 2005; 70 FR 29208, May 20, 2005]

### **§ 1610.3 Coordination with other Federal agencies, State and local governments, and Indian tribes.**

#### **§ 1610.3-1 Coordination of planning efforts.**

(a) In addition to the public involvement prescribed by § 1610.2, the following coordination is to be accomplished with other Federal agencies, state and local governments, and federally recognized Indian tribes. The objectives of the coordination are for the State Directors and Field Managers to:

(1) Keep apprised of non-Bureau of Land Management plans;

(2) Assure that BLM considers those plans that are germane in the development of resource management plans for public lands;

(3) Assist in resolving, to the extent practicable, inconsistencies between Federal and non-Federal government plans;

(4) Provide for meaningful public involvement of other Federal agencies, State and local government officials, both elected and appointed, and federally recognized Indian tribes, in the development of resource management plans, including early public notice of

### **43 CFR Ch. II (10-1-08 Edition)**

final decisions that may have a significant impact on non-Federal lands; and

(5) Where possible and appropriate, develop resource management plans collaboratively with cooperating agencies.

(b) When developing or revising resource management plans, BLM State Directors and Field Managers will invite eligible Federal agencies, state and local governments, and federally recognized Indian tribes to participate as cooperating agencies. The same requirement applies when BLM amends resource management plans through an environmental impact statement. State Directors and Field Managers will consider any requests of other Federal agencies, state and local governments, and federally recognized Indian tribes for cooperating agency status. Field Managers who deny such requests will inform the State Director of the denial. The State Director will determine if the denial is appropriate.

(c) State Directors and Field Managers shall provide other Federal agencies, State and local governments, and Indian tribes opportunity for review, advice, and suggestion on issues and topics which may affect or influence other agency or other government programs. To facilitate coordination with State governments, State Directors should seek the policy advice of the Governor(s) on the timing, scope and coordination of plan components; definition of planning areas; scheduling of public involvement activities; and the multiple use opportunities and constraints on public lands. State Directors may seek written agreements with Governors or their designated representatives on processes and procedural topics such as exchanging information, providing advice and participation, and timeframes for receiving State government participation and review in a timely fashion. If an agreement is not reached, the State Director shall provide opportunity for Governor and State agency review, advice and suggestions on issues and topics that the State Director has reason to believe could affect or influence State government programs.

(d) In developing guidance to Field Manager, in compliance with section

## Bureau of Land Management, Interior

## § 1610.3-2

1611 of this title, the State Director shall:

(1) Ensure that it is as consistent as possible with existing officially adopted and approved resource related plans, policies or programs of other Federal agencies, State agencies, Indian tribes and local governments that may be affected, as prescribed by § 1610.3-2 of this title;

(2) Identify areas where the proposed guidance is inconsistent with such policies, plans or programs and provide reasons why the inconsistencies exist and cannot be remedied; and

(3) Notify the other Federal agencies, State agencies, Indian tribes or local governments with whom consistency is not achieved and indicate any appropriate methods, procedures, actions and/or programs which the State Director believes may lead to resolution of such inconsistencies.

(e) A notice of intent to prepare, amend, or revise a resource management plan shall be submitted, consistent with State procedures for coordination of Federal activities, for circulation among State agencies. This notice shall also be submitted to Federal agencies, the heads of county boards, other local government units and Tribal Chairmen or Alaska Native Leaders that have requested such notices or that the responsible line manager has reason to believe would be concerned with the plan or amendment. These notices shall be issued simultaneously with the public notices required under § 1610.2(b) of this title.

(f) Federal agencies, State and local governments and Indian tribes shall have the time period prescribed under § 1610.2 of this title for review and comment on resource management plan proposals. Should they notify the Field Manager, in writing, of what they believe to be specific inconsistencies between the Bureau of Land Management resource management plan and their officially approved and adopted resources related plans, the resource management plan documentation shall show how those inconsistencies were addressed and, if possible, resolved.

(g) When an advisory council has been formed under section 309 of the Federal Land Policy and Management Act of 1976 for the area addressed in a

resource management plan or plan amendment, BLM will inform that council, seek its views, and consider them throughout the planning process.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, 14567, Mar. 23, 2005; 70 FR 29208, May 20, 2005]

### § 1610.3-2 Consistency requirements.

(a) Guidance and resource management plans and amendments to management framework plans shall be consistent with officially approved or adopted resource related plans, and the policies and programs contained therein, of other Federal agencies, State and local governments and Indian tribes, so long as the guidance and resource management plans are also consistent with the purposes, policies and programs of Federal laws and regulations applicable to public lands, including Federal and State pollution control laws as implemented by applicable Federal and State air, water, noise, and other pollution standards or implementation plans.

(b) In the absence of officially approved or adopted resource-related plans of other Federal agencies, State and local governments and Indian tribes, guidance and resource management plans shall, to the maximum extent practical, be consistent with officially approved and adopted resource related policies and programs of other Federal agencies, State and local governments and Indian tribes. Such consistency will be accomplished so long as the guidance and resource management plans are consistent with the policies, programs and provisions of Federal laws and regulations applicable to public lands, including, but not limited to, Federal and State pollution control laws as implemented by applicable Federal and State air, water, noise and other pollution standards or implementation plans.

(c) State Directors and Field Managers shall, to the extent practicable, keep apprised of State and local governmental and Indian tribal policies, plans, and programs, but they shall not be accountable for ensuring consistency if they have not been notified, in writing, by State and local governments or Indian tribes of an apparent inconsistency.

## § 1610.4

## 43 CFR Ch. II (10–1–08 Edition)

(d) Where State and local government policies, plans, and programs differ, those of the higher authority will normally be followed.

(e) Prior to the approval of a proposed resource management plan, or amendment to a management framework plan or resource management plan, the State Director shall submit to the Governor of the State(s) involved, the proposed plan or amendment and shall identify any known inconsistencies with State or local plans, policies or programs. The Governor(s) shall have 60 days in which to identify inconsistencies and provide recommendations in writing to the State Director. If the Governor(s) does not respond within the 60-day period, the plan or amendment shall be presumed to be consistent. If the written recommendation(s) of the Governor(s) recommend changes in the proposed plan or amendment which were not raised during the public participation process on that plan or amendment, the State Director shall provide the public with an opportunity to comment on the recommendation(s). If the State Director does not accept the recommendations of the Governor(s), The State Director shall notify the Governor(s) and the Governor(s) shall have 30 days in which to submit a written appeal to the Director of the Bureau of Land Management. The Director shall accept the recommendations of the Governor(s) if he/she determines that they provide for a reasonable balance between the national interest and the State's interest. The Director shall communicate to the Governor(s) in writing and publish in the FEDERAL REGISTER the reasons for his/her determination to accept or reject such Governor's recommendations.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### § 1610.4 Resource management planning process.

#### § 1610.4–1 Identification of issues.

At the outset of the planning process, the public, other Federal agencies, State and local governments and Indian tribes shall be given an opportunity to suggest concerns, needs, and resource use, development and protection opportunities for consideration in

the preparation of the resource management plan. The Field Manager, in collaboration with any cooperating agencies, will analyze those suggestions and other available data, such as records of resource conditions, trends, needs, and problems, and select topics and determine the issues to be addressed during the planning process. Issues may be modified during the planning process to incorporate new information. The identification of issues shall also comply with the scoping process required by regulations implementing the National Environmental Policy Act (40 CFR 1501.7).

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, Mar. 23, 2005]

#### § 1610.4–2 Development of planning criteria.

(a) The Field Manager will prepare criteria to guide development of the resource management plan or revision, to ensure:

(1) It is tailored to the issues previously identified; and

(2) That BLM avoids unnecessary data collection and analyses.

(b) Planning criteria will generally be based upon applicable law, Director and State Director guidance, the results of public participation, and coordination with any cooperating agencies and other Federal agencies, State and local governments, and federally recognized Indian tribes.

(c) BLM will make proposed planning criteria, including any significant changes, available for public comment prior to being approved by the Field Manager for use in the planning process.

(d) BLM may change planning criteria as planning proceeds if we determine that public suggestions or study and assessment findings make such changes desirable.

[70 FR 14566, Mar. 23, 2005]

#### § 1610.4–3 Inventory data and information collection.

The Field Manager, in collaboration with any cooperating agencies, will arrange for resource, environmental, social, economic and institutional data

## Bureau of Land Management, Interior

## § 1610.4-6

and information to be collected, or assembled if already available. New information and inventory data collection will emphasize significant issues and decisions with the greatest potential impact. Inventory data and information shall be collected in a manner that aids application in the planning process, including subsequent monitoring requirements.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, Mar. 23, 2005]

### § 1610.4-4 Analysis of the management situation.

The Field Manager, in collaboration with any cooperating agencies, will analyze the inventory data and other information available to determine the ability of the resource area to respond to identified issues and opportunities. The analysis of the management situation shall provide, consistent with multiple use principles, the basis for formulating reasonable alternatives, including the types of resources for development or protection. Factors to be considered may include, but are not limited to:

(a) The types of resource use and protection authorized by the Federal Land Policy and Management Act and other relevant legislation;

(b) Opportunities to meet goals and objectives defined in national and State Director guidance;

(c) Resource demand forecasts and analyses relevant to the resource area;

(d) The estimated sustained levels of the various goods, services and uses that may be attained under existing biological and physical conditions and under differing management practices and degrees of management intensity which are economically viable under benefit cost or cost effectiveness standards prescribed in national or State Director guidance;

(e) Specific requirements and constraints to achieve consistency with policies, plans and programs of other Federal agencies, State and local government agencies and Indian tribes;

(f) Opportunities to resolve public issues and management concerns;

(g) Degree of local dependence on resources from public lands;

(h) The extent of coal lands which may be further considered under provisions of § 3420.2-3(a) of this title; and

(i) Critical threshold levels which should be considered in the formulation of planned alternatives.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14566, Mar. 23, 2005]

### § 1610.4-5 Formulation of alternatives.

At the direction of the Field Manager, in collaboration with any cooperating agencies, BLM will consider all reasonable resource management alternatives and develop several complete alternatives for detailed study. Nonetheless, the decision to designate alternatives for further development and analysis remains the exclusive responsibility of the BLM. The alternatives developed shall reflect the variety of issues and guidance applicable to the resource uses. In order to limit the total number of alternatives analyzed in detail to a manageable number for presentation and analysis, all reasonable variations shall be treated as sub-alternatives. One alternative shall be for no action, which means continuation of present level or systems of resource use. The plan shall note any alternatives identified and eliminated from detailed study and shall briefly discuss the reasons for their elimination.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### § 1610.4-6 Estimation of effects of alternatives.

The Field Manager, in collaboration with any cooperating agencies, will estimate and display the physical, biological, economic, and social effects of implementing each alternative considered in detail. The estimation of effects shall be guided by the planning criteria and procedures implementing the National Environmental Policy Act. The estimate may be stated in terms of probable ranges where effects cannot be precisely determined.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

## **§ 1610.4-7**

### **§ 1610.4-7 Selection of preferred alternatives.**

The Field Manager, in collaboration with any cooperating agencies, will evaluate the alternatives, estimate their effects according to the planning criteria, and identify a preferred alternative that best meets Director and State Director guidance. Nonetheless, the decision to select a preferred alternative remains the exclusive responsibility of the BLM. The resulting draft resource management plan and draft environmental impact statement shall be forwarded to the State Director for approval, publication, and filing with the Environmental Protection Agency. This draft plan and environmental impact statement shall be provided for comment to the Governor of the State involved, and to officials of other Federal agencies, State and local governments and Indian tribes that the State Director has reason to believe would be concerned. This action shall constitute compliance with the requirements of § 3420.1-7 of this title.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### **§ 1610.4-8 Selection of resource management plan.**

After publication of the draft resource management plan and draft environmental impact statement, the Field Manager shall evaluate the comments received and select and recommend to the State Director, for supervisory review and publication, a proposed resource management plan and final environmental impact statement. After supervisory review of the proposed resource management plan, the State Director shall publish the plan and file the related environmental impact statement.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### **§ 1610.4-9 Monitoring and evaluation.**

The proposed plan shall establish intervals and standards, as appropriate, for monitoring and evaluation of the plan. Such intervals and standards shall be based on the sensitivity of the resource to the decisions involved and shall provide for evaluation to determine whether mitigation measures are

## **43 CFR Ch. II (10-1-08 Edition)**

satisfactory, whether there has been significant change in the related plans of other Federal agencies, State or local governments, or Indian tribes, or whether there is new data of significance to the plan. The Field Manager shall be responsible for monitoring and evaluating the plan in accordance with the established intervals and standards and at other times as appropriate to determine whether there is sufficient cause to warrant amendment or revision of the plan.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### **§ 1610.5 Resource management plan approval, use and modification.**

#### **§ 1610.5-1 Resource management plan approval and administrative review.**

(a) The proposed resource management plan or revision shall be submitted by the Field Manager to the State Director for supervisory review and approval. When the review is completed the State Director shall either publish the proposed plan and file the related environmental impact statement or return the plan to the Field Manager with a written statement of the problems to be resolved before the proposed plan can be published.

(b) No earlier than 30 days after the Environmental Protection Agency publishes a notice of the filing of the final environmental impact statement in the FEDERAL REGISTER, and pending final action on any protest that may be filed, the State Director shall approve the plan. Approval shall be withheld on any portion of a plan or amendment being protested until final action has been completed on such protest. Before such approval is given, there shall be public notice and opportunity for public comment on any significant change made to the proposed plan. The approval shall be documented in a concise public record of the decision, meeting the requirements of regulations for the National Environmental Policy Act of 1969 (40 CFR 1505.2).

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

## Bureau of Land Management, Interior

## § 1610.5-4

### § 1610.5-2 Protest procedures.

(a) Any person who participated in the planning process and has an interest which is or may be adversely affected by the approval or amendment of a resource management plan may protest such approval or amendment. A protest may raise only those issues which were submitted for the record during the planning process.

(1) The protest shall be in writing and shall be filed with the Director. The protest shall be filed within 30 days of the date the Environmental Protection Agency published the notice of receipt of the final environmental impact statement containing the plan or amendment in the FEDERAL REGISTER. For an amendment not requiring the preparation of an environmental impact statement, the protest shall be filed within 30 days of the publication of the notice of its effective date.

(2) The protest shall contain:

(i) The name, mailing address, telephone number and interest of the person filing the protest;

(ii) A statement of the issue or issues being protested;

(iii) A statement of the part or parts of the plan or amendment being protested;

(iv) A copy of all documents addressing the issue or issues that were submitted during the planning process by the protesting party or an indication of the date the issue or issues were discussed for the record; and

(v) A concise statement explaining why the State Director's decision is believed to be wrong.

(3) The Director shall promptly render a decision on the protest. The decision shall be in writing and shall set forth the reasons for the decision. The decision shall be sent to the protesting party by certified mail, return receipt requested.

(b) The decision of the Director shall be the final decision of the Department of the Interior.

### § 1610.5-3 Conformity and implementation.

(a) All future resource management authorizations and actions, as well as budget or other action proposals to higher levels in the Bureau of Land Management and Department, and sub-

sequent more detailed or specific planning, shall conform to the approved plan.

(b) After a plan is approved or amended, and if otherwise authorized by law, regulation, contract, permit, cooperative agreement or other instrument of occupancy and use, the Field Manager shall take appropriate measures, subject to valid existing rights, to make operations and activities under existing permits, contracts, cooperative agreements or other instruments for occupancy and use, conform to the approved plan or amendment within a reasonable period of time. Any person adversely affected by a specific action being proposed to implement some portion of a resource management plan or amendment may appeal such action pursuant to 43 CFR 4.400 at the time the action is proposed for implementation.

(c) If a proposed action is not in conformance, and warrants further consideration before a plan revision is scheduled, such consideration shall be through a plan amendment in accordance with the provisions of § 1610.5-5 of this title.

(d) More detailed and site specific plans for coal, oil shale and tar sand resources shall be prepared in accordance with specific regulations for those resources: Group 3400 of this title for coal; Group 3900 of this title for oil shale; and part 3140 of this title for tar sand. These activity plans shall be in conformance with land use plans prepared and approved under the provisions of this part.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### § 1610.5-4 Maintenance.

Resource management plans and supporting components shall be maintained as necessary to reflect minor changes in data. Such maintenance is limited to further refining or documenting a previously approved decision incorporated in the plan. Maintenance shall not result in expansion in the scope of resource uses or restrictions, or change the terms, conditions, and decisions of the approved plan. Maintenance is not considered a plan amendment and shall not require the formal

#### § 1610.5-5

public involvement and interagency coordination process described under §§1610.2 and 1610.3 of this title or the preparation of an environmental assessment or environmental impact statement. Maintenance shall be documented in plans and supporting records.

#### § 1610.5-5 Amendment.

A resource management plan may be changed through amendment. An amendment shall be initiated by the need to consider monitoring and evaluation findings, new data, new or revised policy, a change in circumstances or a proposed action that may result in a change in the scope of resource uses or a change in the terms, conditions and decisions of the approved plan. An amendment shall be made through an environmental assessment of the proposed change, or an environmental impact statement, if necessary, public involvement as prescribed in §1610.2 of this title, interagency coordination and consistency determination as prescribed in §1610.3 of this title and any other data or analysis that may be appropriate. In all cases, the effect of the amendment on the plan shall be evaluated. If the amendment is being considered in response to a specific proposal, the analysis required for the proposal and for the amendment may occur simultaneously.

(a) If the environmental assessment does not disclose significant impact, a finding of no significant impact may be made by the Field Manager. The Field Manager shall then make a recommendation on the amendment to the State Director for approval, and upon approval, the Field Manager shall issue a public notice of the action taken on the amendment. If the amendment is approved, it may be implemented 30 days after such notice.

(b) If a decision is made to prepare an environmental impact statement, the amending process shall follow the same procedure required for the preparation and approval of the plan, but consideration shall be limited to that portion of the plan being considered for amendment. If several plans are being amended simultaneously, a single environ-

#### 43 CFR Ch. II (10-1-08 Edition)

mental impact statement may be prepared to cover all amendments.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

#### § 1610.5-6 Revision.

A resource management plan shall be revised as necessary, based on monitoring and evaluation findings (§1610.4-9), new data, new or revised policy and changes in circumstances affecting the entire plan or major portions of the plan. Revisions shall comply with all of the requirements of these regulations for preparing and approving an original resource management plan.

#### § 1610.5-7 Situations where action can be taken based on another agency's plan, or a land use analysis.

These regulations authorize the preparation of a resource management plan for whatever public land interests exist in a given land area. There are situations of mixed ownership where the public land estate is under non-Federal surface, or administration of the land is shared by the Bureau of Land Management with another Federal agency. The Field Manager may use the plans or the land use analysis of other agencies when split or shared estate conditions exist in any of the following situations:

(a) Another agency's plan (Federal, State, or local) may be used as a basis for an action only if it is comprehensive and has considered the public land interest involved in a way comparable to the manner in which it would have been considered in a resource management plan, including the opportunity for public participation.

(b) After evaluation and review, the Bureau of Land Management may adopt another agency's plan for continued use as a resource management plan if an agreement is reached between the Bureau of Land Management and the other agency to provide for maintenance and amendment of the plan, as necessary, to comply with law and policy applicable to public lands.

(c) A land use analysis may be used to consider a coal lease when there is no Federal ownership interest in the surface or when coal resources are insufficient to justify plan preparation costs. The land use analysis process, as

## Bureau of Land Management, Interior

## § 1610.7-2

authorized by the Federal Coal Leasing Amendments Act, consists of an environmental assessment or impact statement, public participation as required by § 1610.2 of this title, the consultation and consistency determinations required by § 1610.3 of this title, the protest procedure prescribed by § 1610.5-2 of this title and a decision on the coal lease proposal. A land use analysis meets the planning requirements of section 202 of the Federal Land Policy and Management Act. The decision to approve the land use analysis and to lease coal is made by the Departmental official who has been delegated the authority to issue coal leases.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

### § 1610.6 Management decision review by Congress.

The Federal Land Policy and Management Act requires that any Bureau of Land Management management decision or action pursuant to a management decision which totally eliminates one or more principal or major uses for 2 or more years with respect to a tract of 100,000 acres or more, shall be reported by the Secretary to Congress before it can be implemented. This report shall not be required prior to approval of a resource management plan which, if fully or partially implemented, would result in such an elimination. The required report shall be submitted as the first action step in implementing that portion of a resource management plan which would require elimination of such a use.

### § 1610.7 Designation of areas.

#### § 1610.7-1 Designation of areas unsuitable for surface mining.

(a)(1) The planning process is the chief process by which public land is reviewed to assess whether there are areas unsuitable for all or certain types of surface coal mining operations under section 522(b) of the Surface Mining Control and Reclamation Act. The unsuitability criteria to be applied during the planning process are found in § 3461.1 of this title.

(2) When petitions to designate land unsuitable under section 522(c) of the Surface Mining Control and Reclamation

Act are referred to the Bureau of Land Management for comment, the resource management plan, or plan amendment if available, shall be the basis for review.

(3) After a resource management plan or plan amendment is approved in which lands are assessed as unsuitable, the Field Manager shall take all necessary steps to implement the results of the unsuitability review as it applies to all or certain types of coal mining.

(b)(1) The resource management planning process is the chief process by which public lands are reviewed for designation as unsuitable for entry or leasing for mining operations for minerals and materials other than coal under section 601 of the Surface Mining Control and Reclamation Act.

(2) When petitions to designate lands unsuitable under section 601 of the Surface Mining Control and Reclamation Act are received by the Bureau of Land Management, the resource management plan, if available, shall be the basis for determinations for designation.

(3) After a resource management plan or plan amendment in which lands are designated unsuitable is approved, the Field Manager shall take all necessary steps to implement the results of the unsuitability review as it applies to minerals or materials other than coal.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

#### § 1610.7-2 Designation of areas of critical environmental concern.

Areas having potential for Areas of Critical Environmental Concern (ACEC) designation and protection management shall be identified and considered throughout the resource management planning process (see §§ 1610.4-1 through 1610.4-9).

(a) The inventory data shall be analyzed to determine whether there are areas containing resources, values, systems or processes or hazards eligible for further consideration for designation as an ACEC. In order to be a potential ACEC, both of the following criteria shall be met:

(1) *Relevance.* There shall be present a significant historic, cultural, or scenic value; a fish or wildlife resource or

## § 1610.8

other natural system or process; or natural hazard.

(2) *Importance.* The above described value, resource, system, process, or hazard shall have substantial significance and values. This generally requires qualities of more than local significance and special worth, consequence, meaning, distinctiveness, or cause for concern. A natural hazard can be important if it is a significant threat to human life or property.

(b) The State Director, upon approval of a draft resource management plan, plan revision, or plan amendment involving ACECs, shall publish a notice in the FEDERAL REGISTER listing each ACEC proposed and specifying the resource use limitations, if any, which would occur if it were formally designated. The notice shall provide a 60-day period for public comment on the proposed ACEC designation. The approval of a resource management plan, plan revision, or plan amendment constitutes formal designation of any ACEC involved. The approved plan shall include the general management practices and uses, including mitigating measures, identified to protect designated ACEC.

### § 1610.8 Transition period.

(a) Until superseded by resource management plans, management framework plans may be the basis for considering proposed actions as follows:

(1) The management framework plan shall be in compliance with the principle of multiple use and sustained yield and shall have been developed with public participation and governmental coordination, but not necessarily precisely as prescribed in §§ 1610.2 and 1610.3 of this title.

(2) No sooner than 30 days after the Environmental Protection Agency publishes a notice of the filing of a final court-ordered environmental impact statement—which is based on a management framework plan—proposed actions may be initiated without any further analysis or processes included in this subpart.

(3) For proposed actions other than those described in paragraph (a)(2) of this section, determination shall be made by the Field Manager whether the proposed action is in conformance

## 43 CFR Ch. II (10–1–08 Edition)

with the management framework plan. Such determination shall be in writing and shall explain the reasons for the determination.

(i) If the proposed action is in conformance, it may be further considered for decision under procedures applicable to that type of action, including requirements of regulations for implementing the procedural provisions of the National Environmental Policy Act in 40 CFR parts 1500–1508.

(ii) If the proposed action is not in conformance with the management framework plan, and if the proposed action warrants further favorable consideration before a resource management plan is scheduled for preparation, such consideration shall be through a management framework plan amendment using the provisions of § 1610.5–5 of this title.

(b)(1) If an action is proposed where public lands are not covered by a management framework plan or a resource management plan, an environmental assessment and an environmental impact statement, if necessary, plus any other data and analysis necessary to make an informed decision, shall be used to assess the impacts of the proposal and to provide a basis for a decision on the proposal.

(2) A land disposal action may be considered before a resource management plan is scheduled for preparation, through a planning analysis, using the process described in § 1610.5–5 of this title for amending a plan.

### Subpart 1784—Advisory Committees

#### § 1784.0-1 Purpose.

This subpart contains standards and procedures for the creation, operation and termination of advisory committees to advise the Secretary of the Interior and Bureau of Land Management on matters relating to public lands and resources under the administrative jurisdiction of the Bureau of Land Management.

#### § 1784.0-2 Objectives.

The objective of advisory committees established under these regulations is to make available to the Department of the Interior and Bureau of Land Management the expert counsel of concerned, knowledgeable citizens and public officials regarding both the formulation of operating guidelines and the preparation and execution of plans and programs for the use and management of public lands, their natural and cultural resources, and the environment.

#### § 1784.0-3 Authority.

(a) The Federal Advisory Committee Act (5 U.S.C. Appendix 1) requires establishment of a system governing advisory committees in the Executive Branch of the Federal Government and

specifies policies, procedures, and responsibilities for committee creation, management and termination.

(b) The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), as amended by the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 *et seq.*), requires establishment of advisory councils representative of major citizen interests concerned with resource management planning or the management of public lands.

(c) Section 2 of the Reorganization Plan No. 3 of 1950 (5 U.S.C. Appendix, as amended; 64 Stat. 1262), authorizes the Secretary of the Interior to make provisions deemed appropriate authorizing the performance by any other officer, or by any agency or employee or the Department of the Interior of any Departmental function. The establishment of advisory committees is deemed an appropriate action.

[45 FR 8177, Feb. 6, 1980, as amended at 51 FR 39529, Oct. 29, 1986]

#### § 1784.0-4 [Reserved]

#### § 1784.0-5 Definitions.

As used in this subpart, the term:

(a) *Advisory committee* means any committee, council, or board established or utilized for purposes of obtaining advice or recommendations.

(b) *Secretary* means Secretary of the Interior.

(c) *Director* means the Director of the Bureau of Land Management.

(d) *Designated Federal officer* means the Federal officer or employee designated by an advisory committee charter who approves meeting agendas and attends all meetings of the committee and its subcommittees, if any.

(e) *Public lands* means any lands and interest in lands owned by the United States administered by the Secretary of the Interior through the Bureau of Land Management, except:

(1) Lands located on the Outer Continental Shelf; and

(2) Lands held for the benefit of Indians, Aleuts, and Eskimos.

[45 FR 8177, Feb. 6, 1980, as amended at 60 FR 9958, Feb. 22, 1995]

## **§ 1784.0-6**

### **§ 1784.0-6 Policy.**

As part of the Department's program for public participation, it is the policy of the Secretary to establish and employ committees representative of major citizens' interests, or where required by law, of special citizen interests, to advise the Secretary and Director regarding policy formulation, program planning, decisionmaking, attainment of program objectives, and achievement of improved program coordination and economies in the management of public lands and resources; to regularly ensure that such committees are being optimally employed; and to limit the number of advisory committees to that essential to the conduct of the public's business.

### **§ 1784.1 Establishment, duration, termination, and renewal.**

#### **§ 1784.1-1 Establishment.**

(a) An advisory committee required by statute is established or renewed upon the filing of a charter, signed by the Secretary, with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives.

(b) An advisory committee not specifically required by statute shall be established only when the Secretary has—

(1) Determined as a matter of formal record, after consultation with the General Services Administration, that establishment of the committee is in the public interest in connection with duties required of the Department of the Interior by law;

(2) Signed and filed the committee charter; and

(3) Published in the FEDERAL REGISTER a notice of his determination and of the establishment of the committee.

(c) An advisory committee shall not meet or take any action until the Committee's charter has been signed by the Secretary and copies filed with the appropriate committees of the Senate and House of Representatives and the Library of Congress.

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 1784.1-2 Duration, termination, and renewal.**

(a) An advisory committee not mandated by statute, i.e., established at the discretion of the Secretary, shall terminate not later than 2 years after its establishment unless, prior to that time, it is rechartered by the Secretary and copies of the new charter are filed with the appropriate committees of the Senate and House of Representatives. Any committee so renewed shall continue for not more than 2 additional years unless, prior to expiration of such period, it is again rechartered.

(b) Any advisory committee mandated by statute shall terminate not later than 2 years after the date of its establishment unless its duration is otherwise provided by law. Upon the expiration of each successive two-year period following date of establishment, a new charter shall be prepared and, after Secretarial approval, filed with the appropriate committees of the Senate and House of Representatives for any statutory advisory committee being continued.

### **§ 1784.2 Composition, avoidance of conflict of interest.**

#### **§ 1784.2-1 Composition.**

(a) Each advisory committee shall be structured to provide fair membership balance, both geographic and interest-specific, in terms of the functions to be performed and points of view to be represented, as prescribed by its charter. Each shall be formed with the objective of providing representative counsel and advice about public land and resource planning, retention, management and disposal. No person is to be denied an opportunity to serve because of race, age, sex, religion or national origin.

(b) Individuals shall qualify to serve on an advisory committee because their education, training, or experience enables them to give informed and objective advice regarding an industry, discipline, or interest specified in the committee's charter; they have demonstrated experience or knowledge of the geographical area under the purview of the advisory committee; and they have demonstrated a commitment

## Bureau of Land Management, Interior

## § 1784.3

to collaborate in seeking solutions to resource management issues.

[45 FR 8177, Feb. 6, 1980, as amended at 60 FR 9958, Feb. 22, 1995]

### § 1784.2-2 Avoidance of conflict of interest.

(a) Persons or employees of organizations who hold leases, licenses, permits, contracts or claims which involve lands or resources administered by the Bureau of Land Management normally shall not serve on advisory committees except—

(1) Holders of grazing permits and leases may serve on advisory committees, including resource advisory councils, and may serve on subgroups of such advisory councils;

(2) That the lack of candidates make them the only available candidates; or

(3) When they have special knowledge or experience which is needed to accomplish the committee functions to be performed.

(b) No advisory committee members, including members of resource advisory councils, and no members of subgroups of such advisory committees, shall participate in any matter in which the members have a direct interest.

(c) Members of advisory committees shall be required to disclose their direct or indirect interest in leases, licenses, permits, contracts, or claims and related litigation which involve lands or resources administered by the Bureau of Land Management. For the purposes of this paragraph, indirect interest includes holdings of a spouse or a dependent child.

[45 FR 8177, Feb. 6, 1980, as amended at 60 FR 9958, Feb. 22, 1995]

### § 1784.3 Member service.

(a) Appointments to advisory committees shall be for 2-year terms unless otherwise specified in the charter or the appointing document. Terms of service normally coincide with duration of the committee charter. Members may be appointed to additional terms at the discretion of the authorized appointing official.

(1) The term of the member of a council who has been appointed on the basis of his status as an elected official

of general purpose government serving the people of the geographical area for which the council is established shall end upon that person's departure from such elective office if such departure occurs before his or her term of appointment or reappointment to the council would otherwise expire. However, the Secretary, in his discretion, may permit the member to complete the term in another vacant position on the council, provided that the member is qualified to represent one of the other categories of major citizens' interests set forth in the charter of the council;

(2) A vacancy occurring by reason of removal, resignation, death, or departure from elective office shall be filled for the balance of the vacating member's term using the same method by which the original appointment was made;

(b) Committee members advise and report only to the official(s) specified in the charter. Service as an advisor, however, does not limit the rights of a member acting as a private citizen or as a member or official of another organization.

(c) The Secretary or the designated Federal officer may, after written notice, terminate the service of an advisor if, in the judgment of the Secretary or the designated Federal officer, such removal is in the public interest, or if the advisor—

(1) No longer meets the requirements under which elected or appointed;

(2) Fails or is unable to participate regularly in committee work; or

(3) Has violated Federal law or the regulations of the Secretary.

(d) For purposes of compensation, members of advisory committees shall be reimbursed for travel and per diem expenses when on advisory committee business, as authorized by 5 U.S.C. 5703. No reimbursement shall be made for expenses incurred by members of subgroups selected by established committees, except that the designated Federal officer may reimburse travel and

#### **§ 1784.4**

per diem expenses to members of subgroups who are also members of the parent committee.

[45 FR 8177, Feb. 6, 1980, as amended at 47 FR 6429, Feb. 12, 1982; 47 FR 34389, Aug. 9, 1982; 51 FR 39529, Oct. 29, 1986; 52 FR 5284, Feb. 20, 1987; 60 FR 9958, Feb. 22, 1995]

#### **§ 1784.4 Public participation.**

##### **§ 1784.4-1 Calls for nominations.**

Except where otherwise provided, candidates for appointment to advisory committees are sought through public calls for public nominations. Such calls shall be published in the FEDERAL REGISTER and are made through media releases and systematic contacts with individuals and organizations interested in the use and management of public lands and resources.

##### **§ 1784.4-2 Notice of meetings.**

(a) Notices of meetings of advisory committees and any subcommittees that may be formed shall be published in the FEDERAL REGISTER and distributed to the media 30 days in advance of a meeting. However, if urgent matters arise, notices of meetings of advisory committees and any subcommittees shall be published in the FEDERAL REGISTER and distributed to the media at least 15 days in advance of a meeting.

(b) Notices shall set forth meeting locations, topics or issues to be discussed, and times and places for the public to be heard.

##### **§ 1784.4-3 Open meetings.**

(a) All advisory committee and subcommittee meetings and associated field examinations shall be open to the public and news media.

(b) Anyone may appear before or file a statement with a committee or subcommittee regarding matters on a meeting agenda.

(c) The scheduling of meetings and the preparation of agendas shall be done in a manner that will encourage and facilitate public attendance and participation. The amount of time scheduled for public presentations and meeting times may be extended when the authorized representative considers it necessary to accommodate all who seek to be heard regarding matters on the agenda.

#### **43 CFR Ch. II (10-1-08 Edition)**

#### **§ 1784.5 Operating procedures.**

##### **§ 1784.5-1 Functions.**

The function of an advisory committee is solely advisory, and recommendations shall be made only to the authorized representative specified in its charter. Determinations of actions to be taken on the reports and recommendations of a committee shall be made only by the Secretary or the designated Federal officer.

[45 FR 8177, Feb. 6, 1980, as amended at 60 FR 9958, Feb. 22, 1995]

##### **§ 1784.5-2 Meetings.**

(a) Advisory committees shall meet only at the call of the Secretary or the designated Federal officer.

(b) No meeting shall be held in the absence of the Secretary or the designated Federal officer.

(c) Each meeting shall be conducted with close adherence to an agenda which has been approved in advance by the authorized representative.

(d) The authorized representative may adjourn an advisory committee meeting at any time when—

(1) Continuance would be inconsistent with either the purpose for which the meeting was called or the established rules for its conduct; or

(2) Adjournment is determined to be in the public interest.

[45 FR 8177, Feb. 6, 1980, as amended at 60 FR 9958, Feb. 22, 1995]

##### **§ 1784.5-3 Records.**

(a) Detailed records shall be kept of each meeting of an advisory committee and any subcommittees that may be formed. These records shall include as a minimum—

(1) The time and place of the meeting;

(2) Copies of the FEDERAL REGISTER and other public notices announcing the meeting;

(3) A list of advisors and Department or Bureau employees present;

(4) A list of members of the public present and who each represented;

(5) The meeting agenda;

(6) A complete and accurate summary description of matters discussed and conclusions reached;

## Bureau of Land Management, Interior

## § 1784.6-1

(7) A list of recommendations made by the advisory committee;

(8) Copies of all reports received, issued, or approved by the Committee or subcommittee; and

(9) A description of the nature of public participation. The Chairperson of the advisory committee shall certify to the accuracy of meeting records.

(b) All records, reports, transcripts, minutes, recommendations, studies, working papers, and other documents prepared by or submitted to an advisory committee shall be available for public inspection and copying in the Bureau of Land Management office responsible for support of that committee. Upon request, copies shall be provided at the cost of duplication as established by the regulations in 43 CFR part 2 (Appendix A).

### **§ 1784.6 Membership and functions of resource advisory councils and subgroups.**

#### **§ 1784.6-1 Resource advisory councils—requirements.**

(a) Resource advisory councils shall be established to cover all lands administered by the Bureau of Land Management, except where—

(1) There is insufficient interest in participation to ensure that membership can be fairly balanced in terms of the points of view represented and the functions to be performed; or

(2) The location of the public lands with respect to the population of users and other interested parties precludes effective participation.

(b) A resource advisory council advises the Bureau of Land Management official to whom it reports regarding the preparation, amendment and implementation of land use plans for public lands and resources within its area. Except for the purposes of long-range planning and the establishment of resource management priorities, a resource advisory council shall not provide advice on the allocation and expenditure of funds. A resource advisory council shall not provide advice regarding personnel actions.

(c) The Secretary shall appoint the members of each resource advisory council. The Secretary shall appoint at least 1 elected official of general purpose government serving the people of

the area to each council. An individual may not serve concurrently on more than 1 resource advisory council. Council members and members of a range-land resource team or other local general purpose subgroup must reside in 1 of the States within the geographic jurisdiction of the council or subgroup, respectively. Council members and members of general purpose subgroups shall be representative of the interests of the following 3 general groups:

(1) Persons who—

(i) Hold Federal grazing permits or leases within the area for which the council is organized;

(ii) Represent interests associated with transportation or rights-of-way;

(iii) Represent developed outdoor recreation, off-highway vehicle users, or commercial recreation activities;

(iv) Represent the commercial timber industry; or

(v) Represent energy and mineral development.

(2) Persons representing—

(i) Nationally or regionally recognized environmental organizations;

(ii) Dispersed recreational activities;

(iii) Archeological and historical interests; or

(iv) Nationally or regionally recognized wild horse and burro interest groups.

(3) Persons who—

(i) Hold State, county or local elected office;

(ii) Are employed by a State agency responsible for management of natural resources, land, or water;

(iii) Represent Indian tribes within or adjacent to the area for which the council is organized;

(iv) Are employed as academicians in natural resource management or the natural sciences; or

(v) Represent the affected public-at-large.

(d) In appointing members of a resource advisory council from the 3 categories set forth in paragraphs (c)(1), (c)(2), and (c)(3) of this section, the Secretary shall provide for balanced and broad representation from within each category.

(e) In making appointments to resource advisory councils the Secretary shall consider nominations made by

the Governor of the State or States affected and nominations received in response to public calls for nominations pursuant to §1784.4-1. Persons interested in serving on resource advisory councils may nominate themselves. All nominations shall be accompanied by letters of reference from interests or organizations to be represented.

(f) Persons appointed to resource advisory councils shall attend a course of instruction in the management of rangeland ecosystems that has been approved by the Bureau of Land Management State Director.

(g) A resource advisory council shall meet at the call of the designated Federal officer and elect its own officers. The designated Federal officer shall attend all meetings of the council.

(h) Council charters must include rules defining a quorum and establishing procedures for sending recommendations forward to BLM. A quorum of council members must be present to constitute an official meeting of the council. Formal recommendations shall require agreement of at least a majority of each of the 3 categories of interest from which appointments are made.

(i) Where the resource advisory council becomes concerned that its advice is being arbitrarily disregarded, the council may request that the Secretary respond directly to such concerns within 60 days of receipt. Such a request can be made only upon the agreement of all council members. The Secretary's response shall not constitute a decision on the merits of any issue that is or might become the subject of an administrative appeal, and shall not be appealable.

(j) Administrative support for a resource advisory council shall be provided by the office of the designated Federal officer.

[60 FR 9958, Feb. 22, 1995]

**§ 1784.6-2 Resource advisory councils—optional features.**

(a) Resource advisory councils must be established consistent with any 1 of the 3 models in paragraphs (a)(1), (a)(2), and (a)(3) of this section. The model type and boundaries for resource advisory councils shall be established by the BLM State Director(s) in consulta-

tion with the Governors of the affected States and other interested parties.

*(1) Model A*

(i) *Council jurisdiction.* The geographic jurisdiction of a council shall coincide with BLM District or ecoregion boundaries. The Governor of the affected States or existing resource advisory councils may petition the Secretary to establish a resource advisory council for a specified Bureau of Land Management resource area. The councils will provide advice to the Bureau of Land Management official to whom they report regarding the preparation, amendment and implementation of land use plans. The councils will also assist in establishing other long-range plans and resource management priorities in an advisory capacity, including providing advice on the development of plans for range improvement or development programs.

(ii) *Membership.* Each council shall have 15 members, distributed equally among the 3 interest groups specified in §1784.6-1(c).

(iii) *Quorum and voting requirements.* At least 3 council members from each of the 3 categories of interest from which appointments are made pursuant to §1784.6-1(c) must be present to constitute an official meeting of the council. Formal recommendations shall require agreement of at least 3 council members from each of the 3 categories of interest from which appointments are made.

(iv) *Subgroups.* Local rangeland resource teams may be formed within the geographical area for which a resource advisory council provides advice, down to the level of a single allotment. These teams may be formed by a resource advisory council on its own motion or in response to a petition by local citizens. Rangeland resource teams will be formed for the purpose of providing local level input to the resource advisory council regarding issues pertaining to the administration of grazing on public land within the area for which the rangeland resource team is formed.

(A) Rangeland resource teams will consist of 5 members selected by the resource advisory council. Membership will include 2 persons holding Federal

grazing permits or leases. Additional members will include 1 person representing the public-at-large, 1 person representing a nationally or regionally recognized environmental organization, and 1 person representing national, regional, or local wildlife or recreation interests. Persons selected by the council to represent the public-at-large, environmental, and wildlife or recreation interests may not hold Federal grazing permits or leases. At least 1 member must be selected from the membership of the resource advisory council.

(B) The resource advisory council will be required to select rangeland resource team members from nominees who qualify by virtue of their knowledge or experience of the lands, resources, and communities that fall within the area for which the team is formed. All nominations must be accompanied by letters of recommendation from the groups or interests to be represented.

(C) All members of rangeland resource teams will attend a course of instruction in the management of rangeland ecosystems that has been approved by the BLM State Director. Rangeland resource teams will have opportunities to raise any matter of concern with the resource advisory council and to request that BLM form a technical review team, as described below, to provide information and options to the council for their consideration.

(D) Technical review teams can be formed by the BLM authorized officer on the motion of BLM or in response to a request by the resource advisory council or a rangeland resource team. The purpose of such teams is to gather and analyze data and develop recommendations to aid the decision-making process, and functions will be limited to tasks assigned by the authorized officer. Membership will be limited to Federal employees and paid consultants. Members will be selected based upon their knowledge of resource management or their familiarity with the specific issues for which the technical review team has been formed. Technical review teams will terminate upon completion of the assigned task.

(2) *Model B*

(i) *Council jurisdiction.* The jurisdiction of the council shall be Statewide, or on an ecoregion basis. The purpose of the council is to promote federal, state, and local cooperation in the management of natural resources on public lands, and to coordinate the development of sound resource management plans and activities with other states. It will provide an opportunity for meaningful public participation in land management decisions at the state level and will foster conflict resolution through open dialogue and collaboration.

(ii) *Membership.* The council shall have 15 members, distributed equally among the 3 interest groups specified in § 1784.6-1(c), and will include at least one representative from wildlife interest groups, grazing interests, minerals and energy interests, and established environmental/conservation interests. The Governor shall chair the council.

(iii) *Quorum and voting requirements.* The charter of the council shall specify that 80% or 12 members must be present to constitute a quorum and conduct official business, and that 80% or 12 members of the council must vote affirmatively to refer an issue to BLM Federal officer.

(iv) *Subgroups.* Local rangeland resource teams may be formed by the Statewide council, down to the level of a 4th order watershed. Rangeland resource teams will be formed for the purpose of providing local level input to the resource advisory council. They will meet at least quarterly and will promote a decentralized administrative approach, encourage good stewardship, emphasize coordination and cooperation among agencies, permittees and the interested public, develop proposed solutions and management plans for local resources on public lands, promote renewable rangeland resource values, develop proposed standards to address sustainable resource uses and rangeland health, address renewable rangeland resource values, propose and participate in the development of area-specific National Environmental Policy Act documents, and develop range and wildlife education and training programs. As with the resource advisory council, an 80% affirmative vote

will be required to send a recommendation to the resource advisory council.

(A) Rangeland resource teams will not exceed 10 members and will include at least 2 persons from environmental or wildlife groups, 2 grazing permittees, 1 elected official, 1 game and fish district representative, 2 members of the public or other interest groups, and a Federal officer from BLM. Members will be appointed for 2 year terms by the resource advisory council and may be reappointed. No member may serve on more than 1 rangeland resource team.

(B) Technical review teams can be formed by the BLM authorized officer on the motion of BLM or in response to a request by the resource advisory council or a rangeland resource team. The purpose of such teams is to gather and analyze data and develop recommendations to aid the decision-making process, and functions will be limited to tasks assigned by the authorized officer. Membership will be limited to Federal employees and paid consultants. Members will be selected based upon their knowledge of resource management or their familiarity with the specific issues for which the technical review team has been formed. Technical review teams will terminate upon completion of the assigned task.

(3) *Model C*

(i) *Council jurisdiction.* The jurisdiction of the council shall be on the basis of ecoregion, State, or BLM district boundaries.

(ii) *Membership.* Membership of the council shall be 10 to 15 members, distributed in a balanced fashion among the 3 interest groups defined in §1784.6–1(c).

(iii) *Quorum and voting requirements.* The charter of each council shall specify that a majority of each interest group must be present to constitute a quorum and conduct official business, and that a majority of each interest group must vote affirmatively to refer an issue to BLM Federal officer.

(iv) *Subgroups.* Resource advisory councils may form more local teams to provide general local level input to the resource advisory council on issues necessary to the successful functioning of the council. Such subgroups can be

formed in response to a petition from local citizens or on the motion of the resource advisory council. Membership in any subgroup formed for the purpose of providing general input to the resource advisory council on grazing administration should be constituted in accordance with provisions for membership in §1784.6–1(c).

(A) Technical review teams can be formed by the BLM authorized officer on the motion of BLM or in response to a request by the resource advisory council or a local team. The purpose of such technical review teams is to gather and analyze data and develop recommendations to aid the decision-making process, and functions will be limited to tasks assigned by the authorized officer. Membership will be limited to Federal employees and paid consultants. Members will be selected based upon their knowledge of resource management or their familiarity with the specific issues for which the technical review team has been formed. Technical review teams will terminate upon completion of the assigned task.

(B) [Reserved]

## Group 1800—Public Administrative Procedures

### PART 1810—INTRODUCTION AND GENERAL GUIDANCE

#### Subpart 1810—General Rules

Sec.

1810.1 Rules of construction; words and phrases.

1810.2 Communications by mail; when mailing requirements are met.

1810.3 Effect of laches; authority to bind government.

1810.4 Information required by forms.

#### Subpart 1812—Qualifications of Practitioners

1812.1 General.

1812.1–1 Regulations governing practice before the Department.

1812.1–2 Inquiries.

#### Subpart 1815—Disaster Relief

1815.0–3 Authority.

1815.0–5 Definitions.

1815.1 Timber sale contracts.

## Bureau of Land Management, Interior

## § 1810.4

1815.1-1 Relief granted.  
1815.1-2 Applications.

AUTHORITY: 43 U.S.C. 1740.

### Subpart 1810—General Rules

SOURCE: 35 FR 9513, June 13, 1970, unless otherwise noted.

#### § 1810.1 Rules of construction; words and phrases.

Except where the context of the regulation or of the Act of the Congress on which it is based, indicates otherwise, when used in the regulations of this chapter:

(a) Words importing the singular include and apply to the plural also;

(b) Words importing the plural include the singular;

(c) Words importing the masculine gender include the feminine as well;

(d) Words used in the present tense include the future as well as the present;

(e) The words *person* and *whoever* include corporations, companies, associations, firms, partnerships, societies, and joint stock companies, as well as individuals;

(f) *Officer* and *authorized officer* include any person authorized by law or by lawful delegation of authority to perform the duties described;

(g) *Signature* or *subscription* includes a mark when the person making the same intended it as such;

(h) *Oath* includes *affirmation*, and *sworn* includes *affirmed*;

(i) *Writing* includes printing and type-writing as well as holographs, and *copies* include all types of reproductions on paper, including photographs, multigraphs, mimeographs and manifolds;

(j) The word *company* or *association*, when used in reference to a corporation, shall be deemed to embrace the words *successors and assigns of such company or association*, in like manner as if these last-named words, or words of similar import, were expressed.

#### § 1810.2 Communications by mail; when mailing requirements are met.

(a) Where the regulations in this chapter provide for communication by mail by the authorized officer, the re-

quirement for mailing is met when the communication, addressed to the addressee at his last address of record in the appropriate office of the Bureau of Land Management, is deposited in the mail.

(b) Where the authorized officer uses the mails to send a notice or other communication to any person entitled to such a communication under the regulations of this chapter, that person will be deemed to have received the communication if it was delivered to his last address of record in the appropriate office of the Bureau of Land Management, regardless of whether it was in fact received by him. An offer of delivery which cannot be consummated at such last address of record because the addressee had moved therefrom without leaving a forwarding address or because delivery was refused or because no such address exists will meet the requirements of this section where the attempt to deliver is substantiated by post office authorities.

#### § 1810.3 Effect of laches; authority to bind government.

(a) The authority of the United States to enforce a public right or protect a public interest is not vitiated or lost by acquiescence of its officers or agents, or by their laches, neglect of duty, failure to act, or delays in the performance of their duties.

(b) The United States is not bound or estopped by the acts of its officers or agents when they enter into an arrangement or agreement to do or cause to be done what the law does not sanction or permit.

(c) Reliance upon information or opinion of any officer, agent or employee or on records maintained by land offices cannot operate to vest any right not authorized by law.

#### § 1810.4 Information required by forms.

Whenever a regulation in this chapter requires a form approved or prescribed by the Director of the Bureau of Land Management, the Director may in that form require the submission of any information which he considers to be necessary for the effective administration of that regulation.

## § 1812.1

### Subpart 1812—Qualifications of Practitioners

#### § 1812.1 General.

##### § 1812.1-1 Regulations governing practice before the Department.

Every individual who wishes to practice before the Department of the Interior, including the Bureau, must comply with the requirements of part 1 of this title.

[35 FR 9513, June 13, 1970]

##### § 1812.1-2 Inquiries.

No person other than officers or employees of the Department of the Interior shall direct any inquiry to any employee of the Bureau with respect to any matter pending before it other than to the head of the unit in which the matter is pending, to a superior officer, or to an employee of the unit authorized by the unit head to answer inquiries.

[35 FR 9513, June 13, 1970]

### Subpart 1815—Disaster Relief

AUTHORITY: Sec. 242 (a), (b), Disaster Relief Act of 1970, 84 Stat. 1744.

SOURCE: 36 FR 15534, Aug. 17, 1971, unless otherwise noted.

#### § 1815.0-3 Authority.

Disaster Relief Act of 1970 (84 Stat. 1744).

#### § 1815.0-5 Definitions.

*Major disaster* means any hurricane, tornado, storm, flood, high water, winddriven water, tidal wave, earthquake, drought, fire, or other catastrophe in any part of the United States, which, in the determination of the President, is or threatens to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government to supplement the efforts and available resources of States, local governments, and relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby, and with respect to which the Governor of any State in which such catastrophe occurs or threatens to occur certifies the need for Federal disaster assistance

## 43 CFR Ch. II (10-1-08 Edition)

and gives assurance of the expenditure of a reasonable amount of the funds of such State, its local governments, or other agencies for alleviating the damage, loss, hardship or suffering resulting from such catastrophe.

#### § 1815.1 Timber sale contracts.

##### § 1815.1-1 Relief granted.

(a) Where an existing timber sale contract does not provide relief to the timber purchaser from major physical change, not due to negligence of the purchaser, prior to approval of construction of any section of specified road or other specified development facility and, as a result of a major disaster, a major physical change results in additional construction work in connection therewith, the United States will bear a share of the increased construction costs. The United States' share will be determined by the authorized officer as follows:

(1) For sales of less than 1 million board feet, costs over \$1,000;

(2) For sales of from 1 to 3 million board feet, costs over the sum of \$1 per thousand board feet;

(3) For sales of over 3 million board feet, costs over \$3,000.

(b) Where the authorized officer determines that the damages caused by such major physical change are so great that restoration, reconstruction, or construction is not practical under this cost-sharing arrangement, he may cancel the timber sale contract notwithstanding any provisions thereof.

##### § 1815.1-2 Applications.

(a) *Place of filing.* The application for relief shall be filed in the office which issued the contract.

(b) *Form of application.* No special form of application is necessary.

(c) *Contents of application.* (1) The date of issuance of the contract and any identification number.

(2) The particular disaster and its effect upon contract performance.

(3) An estimate of the damages suffered.

(4) A statement of the relief requested.

(5) An estimate of time which will be needed to overcome the delay in performance caused by the disaster.

## Bureau of Land Management, Interior

## § 1821.10

### PART 1820—APPLICATION PROCEDURES

#### Subpart 1821—General Information

Sec.

1821.10 Where are BLM offices located?

1821.11 During what hours may I file an application?

1821.12 Are these the only regulations that will apply to my application or other required document?

1821.13 What if the specific program regulations conflict with these regulations?

#### Subpart 1822—Filing a Document with BLM

1822.10 How should my name appear on applications and other required documents that I submit to BLM?

1822.11 What must I do to make an official filing with BLM?

1822.12 Where do I file my application or other required documents?

1822.13 May I file electronically?

1822.14 What if I try to file a required document on the last day of the stated period for filing, but the BLM office where it is to be filed is officially closed all day?

1822.15 If I miss filing a required document or payment within the specified period, can BLM consider it timely filed anyway?

1822.16 Where do I file an application that involves lands under the jurisdiction of more than one BLM State Office?

1822.17 When are documents considered filed simultaneously?

1822.18 How does BLM decide in which order to accept documents that are simultaneously filed?

#### Subpart 1823—Payments and Refunds

1823.10 How may I make my payments to BLM?

1823.11 What is the authority for BLM issuing a refund of a payment?

1823.12 When and how may I obtain a refund?

1823.13 Is additional documentation needed when a third party requests a refund?

#### Subpart 1824—Publication and Posting of Notices

1824.10 What is a publication?

1824.11 How does BLM choose a newspaper in which to publish a notice?

1824.12 How many times must BLM publish a notice?

1824.13 Who pays for publication?

1824.14 Does the claimant or applicant pay for an error by the printer of the paper in which the notice appears?

1824.15 What does it mean to post a notice?

1824.16 Why must I post a notice?

1824.17 If I must post a notice on the land, what are the requirements?

#### Subpart 1825—Relinquishments

1825.10 If I relinquish my interest (such as a claim or lease) in public lands, am I relieved of all further responsibility associated with that interest?

1825.11 When are relinquishments effective?

1825.12 When does relinquished land become available again for other application or appropriation?

AUTHORITY: 5 U.S.C. 552, 43 U.S.C. 2, 1201, 1733, and 1740.

SOURCE: 64 FR 53215, Oct. 1, 1999, unless otherwise noted.

### Subpart 1821—General Information

#### § 1821.10 Where are BLM offices located?

(a) In addition to the Headquarters Office in Washington, D.C. and seven national level support and service centers, BLM operates 12 State Offices each having several subsidiary offices called Field Offices. The addresses of the State Offices and their respective geographical areas of jurisdiction are as follows:

##### STATE OFFICES AND AREAS OF JURISDICTION

Alaska State Office, 222 West 7th Avenue, #13, Anchorage, Alaska 99513-7599—Alaska.

Arizona State Office, One North Central Avenue, Phoenix, Arizona 85004-2203—Arizona.

California State Office, 2800 Cottage Way, Room W-1834, Sacramento, California 95825-1886—California.

Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215-7093—Colorado.

Eastern States Office, 7450 Boston Boulevard, Springfield, Virginia 22153—Arkansas, Iowa, Louisiana, Minnesota, Missouri, and States east of the Mississippi River.

Idaho State Office, 1387 South Vinnell Way, Boise, Idaho 83709-1657—Idaho.

Montana State Office, 5001 Southgate Drive, Billings, Montana 59101-4669—Montana, North Dakota and South Dakota.

Nevada State Office, 1340 Financial Boulevard, Reno, Nevada 89502-7147, P.O. Box 12000, Reno, Nevada 89520-0006—Nevada.

New Mexico State Office, 1474 Rodeo Road, Santa Fe, New Mexico 87505, P.O. Box 27115, Santa Fe, New Mexico 87502-0115—Kansas, New Mexico, Oklahoma, and Texas.

Oregon State Office, 333 Southwest 1st Avenue, Portland, Oregon 97204, P.O. Box 2965,

**§ 1821.11**

Portland, Oregon 92708–3420—Oregon and Washington.  
 Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101–1345.  
 Wyoming State Office, 5353 Yellowstone Road, Cheyenne, Wyoming 82009, P.O. Box 1828, Cheyenne, Wyoming 82003—Wyoming and Nebraska.

(b) A list of the names, addresses, and geographical areas of jurisdiction of all Field Offices of the Bureau of Land Management can be obtained at the above addresses or any office of the Bureau of Land Management, including the Washington Office, Bureau of Land Management, 1849 C Street, NW, Washington, DC 20240.

[64 FR 53215, Oct. 1, 1999, as amended at 66 FR 28672, May 24, 2001; 67 FR 30329, May 6, 2002; 68 FR 18554, Apr. 16, 2003; 70 FR 45313, Aug. 5, 2005; 70 FR 69688, Nov. 17, 2005; 71 FR 10846, Mar. 3, 2006; 72 FR 6480, Feb. 12, 2007]

**§ 1821.11 During what hours may I file an application?**

You may file applications or other documents or inspect official records during BLM office hours. Each BLM office will prominently display a notice of the hours during which that particular office will be open. Except for offices which are open periodically, for example, every Wednesday or the 3rd Wednesday of the month, all offices will be open Monday through Friday, excluding Federal holidays, at least from 9 a.m. to 3 p.m., local time.

**§ 1821.12 Are these the only regulations that will apply to my application or other required document?**

No. These general regulations are supplemented by specific program regulations. You should consult the regulations applying to the specific program.

**§ 1821.13 What if the specific program regulations conflict with these regulations?**

If there is a conflict, the specific program regulations will govern and the conflicting portion of these regulations will not apply.

**Subpart 1822—Filing a Document with BLM****§ 1822.10 How should my name appear on applications and other required documents that I submit to BLM?**

Your legal name and current address should appear on your application and other required documents.

**§ 1822.11 What must I do to make an official filing with BLM?**

You must file your application and any other required documents during regular office hours at the appropriate BLM office having jurisdiction over the lands or records involved. You must file any document with BLM through personal delivery or by mailing via the United States Postal Service or other delivery service, except for those applications that may be filed electronically under § 1822.13, unless a more specific regulation or law specifies the mode of delivery. The date of mailing is not the date of filing.

**§ 1822.12 Where do I file my application or other required documents?**

You should file your application or other required documents at the BLM office having jurisdiction over the lands or records involved. The specific BLM office where you are to file your application is usually referenced in the BLM regulations which pertain to the filing you are making. If the regulations do not name the specific office, or if you have questions as to where you should file your application or other required documents, contact your local BLM office for information and we will tell you which BLM office to file your application.

**§ 1822.13 May I file electronically?**

For certain types of applications, BLM will accept your electronic filing if an original signature is not required. If BLM requires your signature, you must file your application or document by delivery or by mailing. If you have any questions regarding which types of applications can be electronically filed, you should check with the BLM office where you intend to file your application. When you file an application electronically, it will not be considered filed until BLM receives it.

## Bureau of Land Management, Interior

## § 1823.13

### **§ 1822.14 What if I try to file a required document on the last day of the stated period for filing, but the BLM office where it is to be filed is officially closed all day?**

BLM considers the document timely filed if we receive it in the office on the next day it is officially open.

### **§ 1822.15 If I miss filing a required document or payment within the specified period, can BLM consider it timely filed anyway?**

BLM may consider it timely filed if:

- (a) The law does not prohibit BLM from doing so;
- (b) No other BLM regulation prohibits doing so; and
- (c) No intervening third party interests or rights have been created or established during the intervening period.

### **§ 1822.16 Where do I file an application that involves lands under the jurisdiction of more than one BLM State Office?**

You may file your application with any BLM State Office having jurisdiction over the subject lands. You should consult the regulations of the particular BLM resource program involved for more specific information.

### **§ 1822.17 When are documents considered filed simultaneously?**

(a) BLM considers two or more documents simultaneously filed when:

- (1) They are received at the appropriate BLM office on the same day and time; or
- (2) They are filed in conjunction with an order that specifies that documents received by the appropriate office during a specified period of time will be considered as simultaneously filed.

(b) An application or document that arrives at the BLM office where it is to be filed when the office is closed for the entire day will be considered as filed on the day and hour the office next officially opens.

(c) Nothing in this provision will deny any preference right granted by applicable law or regulation or validate a document which is invalid under applicable law or regulation.

### **§ 1822.18 How does BLM decide in which order to accept documents that are simultaneously filed?**

BLM makes this decision by a drawing open to the public.

## **Subpart 1823—Payments and Refunds**

### **§ 1823.10 How may I make my payments to BLM?**

Unless specific regulations provide otherwise, you may pay by:

- (a) United States currency; or
- (b) Checks, money orders, or bank drafts made payable to the Bureau of Land Management; or
- (c) Visa or Master Card credit charge, except as specified by pertinent regulation(s).

### **§ 1823.11 What is the authority for BLM issuing a refund of a payment?**

BLM can issue you a refund under the authority of section 304(c) of the Federal Land Policy and Management Act, 43 U.S.C. 1734.

### **§ 1823.12 When and how may I obtain a refund?**

(a) In making a payment to BLM, if the funds or fees you submitted to BLM exceed the amount required or if the regulations provide that fees submitted to BLM must be returned in certain situations, you may be entitled to a full or partial refund.

(b) If you believe you are due a refund, you may request it from the BLM office where you previously submitted your payment. You should state the reasons you believe you are entitled to a refund and include a copy of the appropriate receipt, canceled check, or other relevant documents.

### **§ 1823.13 Is additional documentation needed when a third party requests a refund?**

Yes. When refund requests are made by heirs, executors, administrators, assignees, or mortgagees, BLM may require additional documentation sufficient to establish your entitlement to a refund. If you are an heir, executor, administrator, assignee or mortgagee, you should contact the BLM office

## **§ 1824.10**

where you will file your refund application for information regarding appropriate documentation.

### **Subpart 1824—Publication and posting of notices**

#### **§ 1824.10 What is publication?**

Publication means publishing a notice announcing an event or a proposed action in the FEDERAL REGISTER, a local newspaper of established character and general circulation in the vicinity of the land affected or other appropriate periodical. BLM's purpose in publishing or requiring the publication of such information is to advise you and other interested parties that some action will occur and that the public is invited either to participate or to comment.

#### **§ 1824.11 How does BLM choose a newspaper in which to publish a notice?**

BLM bases its choice of newspapers on their reputation and frequency and level of circulation in the vicinity of the public or private lands involved.

#### **§ 1824.12 How many times must BLM publish a notice?**

The number of times that BLM will publish or cause to be published a notice depends on the publication requirements for the particular action involved. You should see the applicable law and the regulations governing specific BLM resource programs for information on the requirements for publication for a particular action.

#### **§ 1824.13 Who pays for publication?**

The cost of publication is the responsibility of the claimant or applicant.

#### **§ 1824.14 Does the claimant or applicant pay for an error by the printer of the paper in which the notice appears?**

No. The claimant or applicant is not responsible for costs involved in correcting an error by the printer.

#### **§ 1824.15 What does it mean to post a notice?**

Posting a notice is similar to publishing a notice except that the notice is displayed at the appropriate BLM of-

## **43 CFR Ch. II (10–1–08 Edition)**

fice, local courthouse or similar prominent local government building or on a prominent fixture such as a building, tree or post located on the particular public lands involved.

#### **§ 1824.16 Why must I post a notice?**

The posting of a notice informs those persons who may be interested in the lands or resources described, who have relevant information to provide, or who may wish to oppose the proposal.

#### **§ 1824.17 If I must post a notice on the land, what are the requirements?**

The posted notice must be visible throughout the time period for posting specified in the regulations governing the relevant program. BLM or its regulations may require additional posting, such as in a post office or city hall. For any additional posting requirements, you should see applicable Federal and State law, the regulations of the particular BLM resource program and any additional BLM requirements associated with your application.

### **Subpart 1825—Relinquishments**

#### **§ 1825.10 If I relinquish my interest (such as a claim or lease) in public lands, am I relieved of all further responsibility associated with that interest?**

No. You are still responsible for fulfilling any regulatory, statutory, lease, permit and other contractual obligations that apply, such as performance of reclamation and payment of rentals accruing before the time of relinquishment. You should see the regulations relating to the specific BLM resource program involved for more detailed information.

#### **§ 1825.11 When are relinquishments effective?**

Generally, BLM considers a relinquishment to be effective when it is received, along with any required fee, in the BLM office having jurisdiction of the lands being relinquished. However, the specific program regulations govern effectiveness of relinquishments.

## Bureau of Land Management, Interior

Pt. 1860

### **§ 1825.12 When does relinquished land become available again for other application or appropriation?**

Relinquished land may not again become available until BLM notes the filed relinquishment of an interest on the land records maintained by the BLM office having jurisdiction over the lands involved. If you have any questions regarding the availability of a particular tract of land, you should contact the BLM office having jurisdiction over the lands or records.

## **PART 1840—APPEALS PROCEDURES**

AUTHORITY: R.S. 2478, as amended; 43 U.S.C. 1201.

### **§ 1840.1 Cross reference.**

For special procedural rules applicable to appeals from decisions of Bureau of Land Management officers or of administrative law judges, within the jurisdiction of the Board of Land Appeals, Office of Hearings and Appeals, see subpart E of part 4 of this title. Subpart A of part 4 and all of the general rules in subpart B of part 4 of this title not inconsistent with the special rules in subpart E of part 4 of this title are also applicable to such appeals procedures.

[36 FR 15119, Aug. 13, 1971]

## **PART 1850—HEARINGS PROCEDURES**

### **Subpart 1850—Hearing Procedures; General**

AUTHORITY: R.S. 2478, as amended; 43 U.S.C. 1201.

### **§ 1850.1 Cross reference.**

For special procedural rules applicable to hearings in public lands cases, including hearings under the Federal Range Code for Grazing Districts and hearings in both Government and private contest proceedings, within the jurisdiction of the Board of Land Appeals, Office of Hearings and Appeals, see subpart E of part 4 of this title. Subpart A of part 4 and all of the general rules in subpart B of part 4 of this title not inconsistent with the special

rules in subpart E of part 4 of this title are also applicable to such hearings, contest, and protest procedures.

[36 FR 15119, Aug. 13, 1971]

## § 1863.5

## 43 CFR Ch. II (10–1–08 Edition)

### § 1863.5 Title transfer to the Government.

#### § 1863.5–1 Evidence of title.

Evidence of title, when required by the regulations, must be submitted in such form and by such abstractor or company as may be satisfactory to the Bureau of Land Management. A policy of title insurance, or a certificate of title, may be accepted in lieu of an abstract, in proper cases, when issued by a title company. A policy of title insurance when furnished must be free from conditions and stipulations not acceptable to the Department of the Interior. A certificate of title will be accepted only where the certificate is made to the Government, or expressly for its benefit and where the interests of the Government will be sufficiently protected thereby.

[35 FR 9533, June 13, 1970]

CROSS REFERENCE: For evidence of title in mining cases, see § 3862.1–3 of this chapter.

### Subpart 1864—Recordable Disclaimers of Interest in Land

SOURCE: 49 FR 35297, Sept. 6, 1984, unless otherwise noted.

AUTHORITY: 43 U.S.C. 1201, 1740, and 1745.

#### § 1864.0–1 Purpose.

The Secretary of the Interior has been granted discretionary authority by section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745) to issue recordable disclaimers of interests in lands. In general, a disclaimer may be issued if the disclaimer will help remove a cloud on the title to lands and there is a determination that such lands are not lands of the United States or that the United States does not hold a valid interest in the lands. These regulations implement this statutory authority of the Secretary.

#### § 1864.0–2 Objectives.

(a) The objective of the disclaimer is to eliminate the necessity for court action or private legislation in those instances where the United States asserts no ownership or record interest, based upon a determination by the Sec-

retary of the Interior that there is a cloud on the title to the lands, attributable to the United States, and that:

(1) A record interest of the United States in lands has terminated by operation of law or is otherwise invalid; or

(2) The lands lying between the meander line shown on a plat of survey approved by the Bureau of Land Management or its predecessors and the actual shoreline of a body of water are not lands of the United States; or

(3) Accreted, relicted, or avulsed lands are not lands of the United States.

(b) A disclaimer has the same effect as a quitclaim deed in that it operates to estop the United States from asserting a claim to an interest in or the ownership of lands that are being disclaimed. However, a disclaimer does not grant, convey, transfer, remise, quitclaim, release or renounce any title or interest in lands, nor does it operate to release or discharge any tax, judgement or other lien, or any other mortgage, deed or trust or other security interest in lands that are held by or for the benefit of the United States or any instrumentality of the United States.

(c) The regulations in this subpart do not apply to any disclaimer, release, quitclaim or other similar instrument or declaration, that may be issued pursuant to any provision of law other than section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745).

#### § 1864.0–3 Authority.

Section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745), authorizes the Secretary of the Interior to issue a recordable disclaimer, where the disclaimer will help remove a cloud on the title of such lands, if certain determinations are made and conditions are met.

#### § 1864.0–5 Definitions.

As used in this subpart, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this subpart.

(b) *Accreted lands* have the meaning imparted to them by applicable law. In

## Bureau of Land Management, Interior

## § 1864.1-2

general, they are lands that have been gradually and imperceptibly formed along the banks of a body of water by deposition of water-borne soil.

(c) *Avulsed lands* have the meaning imparted to them by applicable law. In general, they are lands that have been uncovered by a relatively sudden change in alignment of the channel of a river, or by a comparable change in some other body of water, or that remain as uplands following such a change, or that are located in the bed of the new channel.

(d) *Actual shoreline* means the line which is washed by the water wherever it covers the bed of a body of water at its mean high water level.

(e) *Lands* means lands and interests in lands now or formerly forming a part of the reserved or unreserved public lands of the contiguous 48 States and Alaska and as to any coastal State, includes submerged lands inside of the seaward boundary of the State.

(f) *Meander line* means a survey line established for the purpose of representing the location of the actual shoreline of a permanent natural body of water, without showing all the details of its windings and irregularities. A meander line rarely runs straight for any substantial distance. It is established not as a boundary line but in order to permit calculation of the quantity of lands in the fractional sections remaining after segregation of the water area.

(g) *Relicted lands* have the meaning imparted that term by applicable law. In general, they are lands gradually uncovered when water recedes permanently.

(h) *State* means "the state and any of its creations including any governmental instrumentality within a state, including cities, counties, or other official local governmental entities."

[49 FR 35299, Sept. 6, 1984, as amended at 68 FR 502, Jan. 6, 2003]

### § 1864.1 Application for issuance of a document of disclaimer.

#### § 1864.1-1 Filing of application.

(a) Any entity claiming title to lands may file an application to have a disclaimer of interest issued if there is reason to believe that a cloud exists on

the title to the lands as a result of a claim or potential claim of the United States and that such lands are not subject to any valid claim of the United States.

(b) Before you actually file an application you should meet with BLM to determine if the regulations in this subpart apply to you.

(c) You must file your application for a disclaimer of interest with the proper BLM office as listed in § 1821.10 of this title.

[68 FR 502, Jan. 6, 2003]

### § 1864.1-2 Form of application.

(a) No specific form of application is required.

(b) A nonrefundable fee of \$100 shall accompany the application.

(c) Each application shall include:

(1) A legal description of the lands for which a disclaimer is sought. The legal description shall be based on either an official United States public land survey or, in the absence of or inappropriateness (irregularly shaped tracts) of an official public land survey, a metes and bounds survey (whenever practicable, tied to the nearest corner of an official public land survey), duly certified in accordance with State law, by the licensed civil engineer or surveyor who executed or supervised the execution of the metes and bounds survey. A true copy of the field notes and plat of survey shall be attached to and made a part of the application. If reliance is placed in whole or in part on an official United States public land survey, such survey shall be adequately identified for record retrieval purposes;

(2) The applicant's name, mailing address, and telephone number and the names addresses and telephone numbers of others known or believed to have or claim an interest in the lands;

(3) All documents which show to the satisfaction of the authorized officer the applicant's title to the lands;

(4) As complete a statement as possible concerning:

(i) The nature and extent of the cloud on the title, and

(ii) The reasons the applicant believes:

(A) The record title interest of the United States in the lands included in

### § 1864.1-3

the application has terminated by operation of law or is otherwise invalid, including a copy or legal citation of relevant provisions of law; or

(B) The lands between the meander line shown on the plat of survey approved by the Bureau of Land Management or its predecessors and the actual shoreline of a body of water are not lands of the United States, including as documentation an official plat of survey or a reference to a date of filing or approval and, if the applicant elects, any non-Federal survey plats related to the issue; or

(C) The lands are accreted, relicted or avulsed and are no longer lands of the United States, including submission for the uplands portion of the body of water affected a copy of an official plat of survey or a reference to it by date of filing or approval and, if the applicant elects, any non-Federal survey plats related to the issue;

(5) Any available documents or title evidence, such as historical and current maps, photographs, and water movement data, that support the application;

(6) The name, mailing address, and telephone number of any known adverse claimant or occupant of the lands included in the application;

(7) Any request the applicant may have that the disclaimer be issued in a particular form suitable for use in the jurisdiction in which it will be recorded; and

(d) Based on prior discussions with the applicant, the authorized officer may waive any or all of the aforementioned items if in his/her opinion they are not needed to properly adjudicate that application.

### § 1864.1-3 Action on application.

(a) BLM will not approve an application, except for applications filed by a state, if more than 12 years have elapsed since the applicant knew, or should have known, of the claim of the United States.

(b) BLM will not approve an application if:

(1) The application pertains to a security interest or water rights; or

(2) The application pertains to trust or restricted Indian lands.

### 43 CFR Ch. II (10-1-08 Edition)

(c) BLM will, if the application meets the requirements for further processing, determine the amount of deposit we need to cover the administrative costs of processing the application and issuing a disclaimer.

(d) The applicant must submit a deposit in the amount BLM determines.

(e) If the application includes what may be omitted lands, BLM will process it in accordance with the applicable provisions of part 9180 of this title. If BLM determines the application involves omitted lands, BLM will notify the applicant in writing.

[68 FR 502, Jan. 6, 2003]

### § 1864.1-4 Consultation with other Federal agencies.

BLM will not issue a recordable disclaimer of interest over the valid objection of another land managing agency having administrative jurisdiction over the affected lands. A valid objection must present a sustainable rationale that the objecting agency claims United States title to the lands for which a recordable disclaimer is sought.

[68 FR 503, Jan. 6, 2003]

### § 1864.2 Decision on application.

(a) The authorized officer shall notify the applicant and any party adverse to the application, in writing, on the determination of the authorized officer on whether or not to issue a disclaimer. Prior to such notification, the authorized officer shall issue to the applicant a billing that includes a full and complete statement of the cost incurred in reaching such determination, including any sum due the United States or that may be unexpended from the deposit made by the applicant. If the administrative costs exceed the amount of the deposit required of the applicant under this subpart, the applicant shall be informed that a payment is required for the difference between the actual costs and the deposit. The notification shall also require that payment be made within 120 days from the date of mailing of the notice. If the deposit exceeds the administrative costs of issuing the disclaimer, the applicant shall be informed that a credit for or a refund of the excess will be

made. Failure to pay the required amount within the allotted time shall constitute grounds for rejection of the application. Before the authorized officer makes a determination to issue a disclaimer, he/she shall publish notice of the application, including the grounds supporting it, in the FEDERAL REGISTER. Publication in the FEDERAL REGISTER shall be made at least 90 days preceding the issuance of a decision on the disclaimer. Notice shall be published in a newspaper located in the vicinity of the lands covered by the application once a week for 3 consecutive weeks during the 90-day period set out herein. Neither publication shall be made until the applicant has paid the administrative costs.

#### § 1864.3 Issuance of document of disclaimer.

Upon receipt of the payment required by §§ 1864.1-2(b), 1864.1-3(c) and 1864.2 of this title and following, by not less than 90 days, the publication required by § 1864.2 of this title, the authorized officer shall make a decision upon the application, and if the application is allowed, shall issued to the applicant an instrument of disclaimer.

#### § 1864.4 Appeals.

An applicant or claimant adversely affected by a written decision of the authorized officer made pursuant to the provisions of this subpart shall have a right of appeal pursuant to 43 CFR part 4.

### Subpart 1865—Correction of Conveyancing Documents

SOURCE: 49 FR 35299, Sept. 6, 1984, unless otherwise noted.

#### § 1865.0-1 Purpose.

The purpose of these regulations is to implement section 316 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1746), which affords to the Secretary of the Interior discretionary authority to correct errors in patents and other documents of conveyance pertaining to the disposal of the public lands of the United States under laws administered through the Bureau of Land Management or its predecessors.

#### § 1865.0-2 Objective.

The objective of a correction document is to eliminate from the chain of title errors in patents or other documents of conveyance that have been issued by the United States under laws administered by the Bureau of Land Management or its predecessors and that pertain to the disposal of the public lands or of an interest therein.

#### § 1865.0-3 Authority.

Section 316 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1746) authorizes the Secretary of the Interior to correct patents and other documents of conveyance issued at any time pursuant to the laws relating to the disposal of the public lands where the Secretary of the Interior deems it necessary or appropriate to do so in order to eliminate errors.

#### § 1865.0-5 Definitions.

As used in this subpart, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this subpart.

(b) *Error* means the inclusion of erroneous descriptions, terms, conditions, covenants, reservations, provisions and names or the omission of requisite descriptions, terms, conditions, covenants, reservations, provisions and names either in their entirety or in part, in a patent or document of conveyance as a result of factual error. This term is limited to mistakes of fact and not of law.

(c) *Patents or other documents of conveyance* means a land patent, a deed or some other similar instrument in the chain of title to realty that has been issued by the United States under laws administered by the Bureau of Land Management or its predecessors pertaining to the disposal of the public lands of the United States or of an interest therein. It also includes interim conveyances issued under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and approvals and tentative approvals issued under the Act of July 7, 1958, as amended (72 Stat. 339).

(d) *Lands* mean lands or interest in lands.

## **§ 1865.1**

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 1865.1 Application for correction of conveyancing documents.**

#### **§ 1865.1–1 Filing of application.**

(a) Any claimant asserting ownership of lands described in and based upon a patent or other document of conveyance containing an alleged error may file an application to correct the alleged error.

(b) An application shall be filed in writing with the proper Bureau of Land Management office as listed in § 1821.2–1(d) of this title.

#### **§ 1865.1–2 Form of application.**

(a) No specific form of application is required.

(b) A non-refundable fee of \$100 shall accompany the application.

(c) Each application shall include:

(1) The name, mailing address, and telephone number of the applicant and any others known to the applicant that hold or purport to hold any title or other interest in, lien on or claim to the lands described in the patent or other document of conveyance containing the alleged error as to which the corrective action is requested, and if the error involves a misdescription, the land that would be affected by the corrective action requested;

(2) All documents which show the applicant's title to the lands included in the application;

(3) A certified copy of any patent or other document conveying any lands included in the application to the applicant or predecessor(s) in interest; and

(4) As complete a statement as possible concerning:

(i) The nature and extent of the error;

(ii) The manner in which the error can be corrected or eliminated; and

(iii) The form in which it is recommended the corrected patent or document of conveyance be issued.

#### **§ 1865.1–3 Action on application.**

The authorized officer, upon review of the factual data and information submitted with the application, and upon a finding that an error was made in the patent or document of conveyance and that the requested relief is warranted and appropriate, shall give

written notification to the applicant and make a reasonable effort to give written notification to any others known to have or believed to have or claim an interest in the lands that a corrected patent or document of conveyance shall be issued. The notification shall include a description of how the error is to be corrected or eliminated in the patent or document of conveyance. The notice shall require the applicant to surrender the original patent or other document of conveyance to be corrected. Where such original document is unavailable, a statement setting forth the reasons for its unavailability shall be submitted in lieu of the original document. The notice may include a requirement for quitclaiming to the United States the lands erroneously included, and shall specify any terms and conditions required for the quitclaim.

### **§ 1865.2 Issuance of corrected patent or document of conveyance.**

Upon the authorized officer's determination that all of the requirements of the Act for issuance of a corrected patent or document of conveyance have been met, the authorized officer shall issue a corrected patent or document of conveyance.

### **§ 1865.3 Issuance of patent or document of conveyance on motion of authorized officer.**

The authorized officer may initiate and make corrections in patents or other documents of conveyance on his/her own motion, if all existing owners agree.

### **§ 1865.4 Appeals.**

An applicant or claimant adversely affected by a decision of the authorized officer made pursuant to the provisions of this subpart shall have a right of appeal pursuant to 43 CFR part 4.

SOURCE: 35 FR 9533, June 13, 1970, unless otherwise noted.

### Subpart 1871—Principles

#### § 1871.0–3 Authority.

The Act of September 20, 1922 (42 Stat. 857; 43 U.S.C. 1161–1163), as modified by section 403 of Reorganization Plan No. 3 of 1946 (60 Stat. 1100), reads as follows:

SEC. 1161. The Secretary of the Interior, or such officer as he may designate, is authorized to decide upon principles of equity and justice, as recognized in courts of equity, and in accordance with regulations to be approved by the Secretary of the Interior, consistently with such principles, all cases of suspended entries of public lands and of suspended preemption land claims, and to adjudicate in what cases patents shall issue upon the same.

SEC. 1162. Every such adjudication shall be approved by the Secretary of the Interior and shall operate only to divest the United States of the title to the land embraced thereby, without prejudice to the rights of conflicting claimants.

SEC. 1163. Where patents have been already issued on entries which are approved by the Secretary of the Interior, the Secretary of the Interior, or such officer as he may designate, upon the canceling of the outstanding patent, is authorized to issue a new patent, on such approval, to the person who made the entry, his heirs or assigns.

#### § 1871.1 Equitable adjudication.

##### § 1871.1–1 Cases subject to equitable adjudication.

The cases subject to equitable adjudication by the Director, Bureau of Land Management, cover the following:

(a) *Substantial compliance*: All classes of entries in connection with which the law has been substantially complied with and legal notice given, but the necessary citizenship status not acquired, sufficient proof not submitted, or full compliance with law not effected within the period authorized by law, or where the final proof testimony, or affidavits of the entryman or claimant were executed before an officer duly authorized to administer oaths but outside the county or land district, in which the land is situated, and special cases deemed proper by the Director, Bureau of Land Management, where the error or informality is satis-

## § 1882.0–2

factorily explained as being the result of ignorance, mistake, or some obstacle over which the party had no control, or any other sufficient reason not indicating bad faith there being no lawful adverse claim.

- 1882.5–7 Nondiscrimination.
- 1882.5–8 Additional terms and conditions.
- 1882.6 Loan renegotiation.
- 1882.7 Inspection and audit.

### Subpart 1882—Mineral Development Impact Relief Loans

AUTHORITY: Sec. 317(c), Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1740) (90 Stat. 2767).

SOURCE: 43 FR 57887, Dec. 11, 1978, unless otherwise noted.

#### § 1882.0–1 Purpose.

The purpose of this subpart is to establish procedures to be followed in the implementation of a program under section 317 of the Federal Land Policy and Management Act to make loans to qualified States and their political subdivisions.

#### § 1882.0–2 Objective.

The objective of the program is to provide financial relief through loans to those States and their political subdivisions that are experiencing adverse social and economic impacts as a result of the development of Federal

### § 1882.0-3

mineral deposits leased under the provisions of the Act of February 25, 1920, as amended.

#### § 1882.0-3 Authority.

Section 317(c) of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1744), authorizes the Secretary of the Interior to make loans to States and their political subdivisions to relieve social or economic impacts resulting from the development of Federal minerals leased under the Act of February 25, 1920 (30 U.S.C. 181 *et seq.*).

#### § 1882.0-5 Definitions.

As used in this subpart, the term:

- (a) *Secretary* means the Secretary of the Interior.
- (b) *Director* means the Director, Bureau of Land Management.
- (c) *Act* means the Act of February 25, 1920, as amended (30 U.S.C. 181).

#### § 1882.1 Loan fund, general.

Funds appropriated by Congress for loans for relief of adverse social and economic impacts resulting from the development of Federal mineral deposits leased and developed under the Act may be loaned to those States and their political subdivisions who qualify under this subpart. Such loans may be used for: (a) Planning, (b) construction and maintenance of public facilities, and (c) provisions for public services.

#### § 1882.2 Qualifications.

(a) Any State receiving payments from the Federal Government under the provisions of section 35 of the Act or any political subdivision of such a State that can document to the satisfaction of the Director that it has suffered or will suffer adverse social and economic impacts as a result of the leasing and development of Federal mineral deposits under the provisions of the Act shall be considered qualified to receive loans made under this subpart.

(b) A loan to a qualified political subdivision of a State receiving payment from the Federal Government under the provisions of section 35 of the Act shall be conditioned upon a showing of proof, satisfactory to the Director, by the political subdivision that it has

### 43 CFR Ch. II (10-1-08 Edition)

legal authority to pledge funds payable to the State under section 35 of the Act in sufficient amounts to secure the payment of the loan.

#### § 1882.3 Application procedures.

No later than October 1 of the fiscal year in which a loan is to be made, the State or its political subdivision shall submit to the Director a letter signed by the authorized agent requesting a loan. The authorized agent shall furnish proof of authority to act for the State or political subdivision with the application. Such letter shall constitute a formal application for a loan under this subpart and shall contain the following:

- (a) The name of the State or political subdivision requesting the loan.
- (b) The amount of the loan requested.
- (c) The name, address, and position of the person in the State or political subdivision who is to serve as contact on all matters concerning the loan.
- (d) A description and documentation of the adverse social and economic impacts suffered as a result of the leasing and development of Federal mineral deposits.
- (e) An analysis and documentation of the additional expenses generated as a result of the leasing and development of Federal minerals.
- (f) Proposed uses of the funds derived from the loan.
- (g) Evidence that the loan and repayment provisions are authorized by State law.
- (h) The Director may request any additional information from the applicant that is needed to properly act on the loan application. The applicant shall furnish such additional information in any form acceptable to the applicant and the Director. No loan shall be granted unless such additional information is timely received by the Director.

#### § 1882.4 Allocation of funds.

If applications for loans exceed the funds appropriated for such purpose, loans shall be allocated among the States and their political subdivisions in a fair and equitable manner, after consultation with the Governors of the affected States, giving priority to those States and political subdivisions

## **Bureau of Land Management, Interior**

## **§ 1882.7**

suffering the most severe social and economic impacts. The allocation of funds under this section shall be the final action of the Department of the Interior.

### **§ 1882.5 Terms and conditions.**

#### **§ 1882.5-1 Tenure of loan.**

Loans shall be for a period not to exceed 10 years. Loan documents shall include a schedule of repayment showing the amount of the principal and interest due on each installment.

#### **§ 1882.5-2 Interest rate.**

Loans shall bear interest at a rate equivalent to the lowest interest rate paid on an issue of at least \$1 million of bonds exempt from Federal taxes of the applicant State or any agency thereof within the calendar year immediately preceding the year of the loan. Proof of each rate shall be furnished by an applicant with its application.

#### **§ 1882.5-3 Limitation on amount of loans.**

Total outstanding loans under this program for qualified States or their political subdivisions shall not exceed the total amount of the qualified State's projected mineral revenues under the Act for the 10 years following. The total outstanding loans shall be the sum of the unpaid balance on all such loans made to a qualified State and all of its qualified political subdivisions.

#### **§ 1882.5-4 Loan repayment.**

Loan repayment shall be by withholding mineral revenues payable to the qualified State for itself or its political subdivisions under the Act until the full amount of the loan and interest have been recovered.

#### **§ 1882.5-5 Security for a loan.**

The only security for loans made under this subpart shall be the mineral revenues received by a qualified State or its political subdivisions under the Act. Loans made under this subpart shall not constitute an obligation upon the general property or taxing authority of the qualified recipient.

#### **§ 1882.5-6 Use of loan.**

A loan made under this subpart may be used for the non-Federal share of the aggregate cost of any project or program otherwise funded by the Federal Government which requires a non-Federal share for such project or program and which provides planning or public facilities otherwise eligible for assistance under the Act.

#### **§ 1882.5-7 Nondiscrimination.**

No person shall, on the grounds of race, color, religion, national origin or sex be excluded from participation in, be denied the benefits of or be subjected to discrimination under any program or activity funded in whole or part with funds made available under this subpart.

#### **§ 1882.5-8 Additional terms and conditions.**

The Director may impose any terms and conditions that he determines necessary to assure the achievement of the purpose of the loans made under this subsection.

#### **§ 1882.6 Loan renegotiation.**

The Secretary may, upon application of a qualified State or one of its qualified political subdivisions, take any steps he determines necessary and justified by the failure of anticipated mineral development or related revenues to materialize as expected when the loan was made under this subpart to renegotiate the loan, including restructuring of the loan. All applications submitted under this section shall set forth in detail the basis for the renegotiation of the loan. The renegotiated loan shall meet the requirements of this subpart to the extent possible.

#### **§ 1882.7 Inspection and audit.**

Upon receipt of a loan under this subpart, the grantee of the loan shall establish accounts and related records necessary to record the transactions relating to receipt and disposition of such loan. These accounts and related records shall be sufficiently detailed to provide an adequate inspection and audit by the Secretary and the Comptroller General of the United States.

**§ 1882.7**

**43 CFR Ch. II (10–1–08 Edition)**

The loan funds shall not be commingled with other funds of the recipient.

##### Subpart 2091—Segregation and Opening of Lands

SOURCE: 52 FR 12175, Apr. 15, 1987, unless otherwise noted.

###### § 2091.0-1 Purpose.

The purpose of this subpart is to provide a general restatement of the regulatory provisions in title 43 of the Code of Federal Regulations dealing with the segregation and opening of public lands administered by the Secretary of the Interior through the Bureau of Land Management and summarize the existing procedures covering opening and closing of lands as they relate to the filing of applications. The provisions of this subpart do not replace or supersede any provisions of title 43 covering opening and closing of public lands.

###### § 2091.0-3 Authority.

Section 2478 of the Revised Statutes (43 U.S.C. 1201), sections 2275 and 2276 of the Revised Statutes (43 U.S.C. 851, 852), the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*), section 4 of the Act of August 18, 1894, as amended (43 U.S.C. 641 *et seq.*), the Act of March 3, 1877 (43 U.S.C. 321-323), as amended by the Act of March 3, 1891 (43 U.S.C. 231, 321, 323, 325, 327-329), section 4 of the General Allotment Act of February 8, 1887 (25 U.S.C. 334), as amended by the Act of February 28, 1891 (26 Stat. 794) and section 17 of the Act of June 25 1910 (25 U.S.C. 336), the Act of March 20, 1922, as amended (16 U.S.C. 485), the Act of July 7, 1958 (72 Stat. 339-340), the Act of January 21, 1929, as supplemented (43 U.S.C. 852 Note), section 24 of the Federal Power

Act, as amended (16 U.S.C. 818), section 7 of the Act of June 28, 1934, as amended (43 U.S.C. 315f), the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 *et seq.*) and the Federal Land Policy and Management Act of 1976, as amended, (43 U.S.C. 1701 *et seq.*).

[52 FR 12175, Apr. 15, 1987, as amended at 58 FR 60917, Nov. 18, 1993]

**§ 2091.0-5 Definitions.**

As used in this subpart, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this subpart.

(b) *Segregation* means the removal for a limited period, subject to valid existing rights, of a specified area of the public lands from the operation of some or all of the public land laws, including the mineral laws, pursuant to the exercise by the Secretary of regulatory authority for the orderly administration of the public lands.

(c) *Land* or *public lands* means any lands or interest in lands owned by the United States within the several States and administered by the Secretary of the Interior through the Bureau of Land Management, without regard to how the United States acquired ownership, except: (1) Lands located on the Outer Continental Shelf; and (2) lands held for the benefit of Indians, Aleuts and Eskimos.

(d) *Mineral laws* means those laws applicable to the mineral resources administered by the Bureau of Land Management. They include, but are not limited to, the mining laws, the mineral leasing laws, the material disposal laws and the Geothermal Steam Act.

(e) *Public lands records* means the Tract Books, Master Title Plats and Historical Indices maintained by the Bureau of Land Management, or automated representation of these books, plats and indices on which are recorded information relating to the status and availability of the public lands. The recorded information may include, but is not limited to, withdrawals, restorations, reservations, openings, classifications applications, segregations, leases, permits and disposals.

(f) *Opening* means the restoration of a specified area of public lands to operation of the public land laws, including the mining laws, and, if appropriate, the mineral leasing laws, the material disposal laws and the Geothermal Steam Act, subject to valid existing rights and the terms and provisions of existing withdrawals, reservations, classifications, and management decisions. Depending on the language in the opening order, an opening may restore the lands to the operation of all or some of the public land laws.

(g) *Opening order* means an order issued by the Secretary or the authorized officer and published in the FEDERAL REGISTER that describes the lands, the extent to which they are restored to operation of the public land laws and the mineral laws, and the date and time they are available for application, selection, sale, location, entry, claim or settlement under those laws.

(h) *Public land laws* means that body of laws dealing with the administration, use and disposition of the public lands, but does not include the mineral laws.

(i) *Revocation* means the cancellation of a Public Land Order, but does not restore public lands to operation of the public land laws.

(j) *Secretary* means the Secretary of the Interior or a secretarial officer subordinate to the Secretary who has been appointed by the President with the advice and consent of the Senate, and to whom has been delegated the authority of the Secretary to perform the duties described in this part as being performed by the *Secretary*.

**§ 2091.07 Principles.**

(a) Generally, segregated lands are not available for application, selection, sale, location, entry, claim or settlement under the public land laws, including the mining laws, but may be open to the operation of the discretionary mineral leasing laws, the material disposal laws and the Geothermal Steam Act, if so specified in the document that segregates the lands. The segregation is subject to valid existing

## Bureau of Land Management, Interior

## § 2091.2-2

rights and is, in most cases, for a limited period which is specified in regulations or in the document that segregates the lands. Where there is an administrative appeal or review action on an application pursuant to part 4 or other subparts of this title, the segregative period continues in effect until publication of an opening order.

(b) Opening orders may be issued at any time but are required when the opening date is not specified in the document creating the segregation, or when an action is taken to terminate the segregative effect and open the lands prior to the specified opening date.

### § 2091.1 Action on applications and mining claims.

(a) Except where the law and regulations provide otherwise, all applications shall be accepted for filing. However, applications which are accepted for filing shall be rejected and cannot be held pending possible future availability of the lands or interests in lands, except those that apply to selections made by the State of Alaska under section 906(e) of the Alaska National Interest Land Conservation Act and selections made by Alaska Native Corporations under section 3(e) of the Alaska Native Claims Settlement Act, when approval of the application is prevented by:

(1) A withdrawal, reservation, classification, or management decision applicable to the lands;

(2) An allowed entry or selection of lands;

(3) A lease which grants the lessee exclusive use of the lands;

(4) Classifications existing under appropriate law;

(5) Segregation due to an application previously filed under appropriate law and regulations;

(6) Segregation resulting from a notice of realty action previously published in the FEDERAL REGISTER under appropriate regulations; and

(7) The fact that, for any reason, the lands have not been made subject to, restored or opened to operation of the public land laws, including the mineral laws.

(b) Lands may not be appropriated under the mining laws prior to the date

and time of restoration and opening. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, vests no rights against the United States. Actions required to establish a mining claim location and to initiate a right of possession are governed by State laws where those laws are not in conflict with Federal law. The Bureau of Land Management does not intervene in disputes between rival locators over possessory rights because Congress has provided for the resolution of these matters in local courts.

### § 2091.2 Segregation and opening resulting from publication of a Notice of Realty Action.

#### § 2091.2-1 Segregation.

The publication of a Notice of Realty Action in the FEDERAL REGISTER segregates lands that are available for disposal under:

(a) The Recreation and Public Purposes Act, as amended (43 U.S.C. 869-4), for a period of 18 months (See part 2740 and subpart 2912);

(b) The sales provisions of section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713) for a period of 270 days (See part 2710). The sales provisions of section 43 CFR 2711.1-2(d) provide for a segregation period, not to exceed two years unless, on a case-by-case basis, the BLM State Director determines that the extension is necessary and documents, in writing, why the extension is needed. Such an extension will not be renewable and cannot be extended beyond the additional two years.

[52 FR 12175, Apr. 15, 1987, as amended at 58 FR 60917, Nov. 18, 1993; 71 FR 67068, Nov. 20, 2006]

#### § 2091.2-2 Opening.

(a) The segregative effect of a Notice of Realty Action automatically terminates either:

(1) At the end of the periods set out in § 2091.2-1 of this title (See part 2740); or

(2) As of the date specified in an opening order published in the FEDERAL REGISTER; or

### § 2091.3

(3) Upon issuance of a patent or other document of conveyance; whichever occurs first.

(b) [Reserved]

[52 FR 12175, Apr. 15, 1987, as amended at 58 FR 60917, Nov. 18, 1993; 65 FR 70112, Nov. 21, 2000]

#### **§ 2091.3 Segregation and opening resulting from a proposal or application.**

##### **§ 2091.3-1 Segregation.**

(a) If a proposal is made to exchange public lands administered by the Bureau of Land Management or lands reserved from the public domain for National Forest System purposes, such lands may be segregated by a notation on the public land records for a period not to exceed 5 years from the date of notation (See 43 CFR 2201.1-2 and 36 CFR 254.6).

(b) The filing of an application for lands for selection by a State (exclusive of Alaska) segregates the lands included in the application for a period of 2 years from the date the application is filed. (See subparts 2621 and 2622)

(c) The filing of an application and publication of the notice of the filing of an application in the FEDERAL REGISTER for the purchase of Federally-owned mineral interests under section 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719) segregates the lands for a period of 2 years from the date of the publication of the notice of filing of the application with the authorized officer. (See part 2720)

(d) The filing of an application for an airport lease under the Act of May 24, 1928, as amended (49 U.S.C. Appendix 211-213), or the filing of a request for an airport conveyance under the Airport and Airway Improvement Act of 1982 (49 U.S.C. 2215), segregates the lands as of the date of filing with the authorized officer. (See part 2640 and subpart 2911)

[52 FR 12175, Apr. 15, 1987; 52 FR 13563, Apr. 23, 1987, as amended at 58 FR 60917, Nov. 18, 1993]

##### **§ 2091.3-2 Opening.**

(a) If a proposal or an application described in § 2091.3-1 of this part is not denied, modified, or otherwise terminated prior to the end of the segrega-

### 43 CFR Ch. II (10-1-08 Edition)

tive periods set out in § 2091.3-1 of this part, the segregative effect of the proposal or application automatically terminates upon the occurrence of either of the following events, whichever occurs first:

(1) Issuance of a patent or other document of conveyance to the affected lands; or

(2) The expiration of the applicable segregation period set out in § 2091.3-1 of this part.

(b) If the proposal or application described in § 2091.3-1 of this part is denied, modified, or otherwise terminated prior to the end of the segregation periods, the lands shall be opened promptly by publication in the FEDERAL REGISTER of an opening order specifying the date and time of opening.

(c) Subject to valid existing rights, non-Federal lands acquired through exchange by the United States shall be segregated automatically from appropriation under the public land laws and mineral laws for 90 days after acceptance of title by the United States, and the public land records shall be noted accordingly. Except to the extent otherwise provided by law, the lands shall be open to the operation of the public land laws and mineral laws at midnight 90 days after the day title was accepted unless otherwise segregated pursuant to part 2300 of this title. (See 43 CFR 2201.9(b))

[58 FR 60917, Nov. 18, 1993, as amended at 65 FR 70112, Nov. 21, 2000]

#### **§ 2091.4 Segregation and opening resulting from the allowance of entries, leases, grants or contracts.**

##### **§ 2091.4-1 Segregation and opening: Desert-land entries and Indian allotments.**

(a) Lands covered by an application for a desert land entry or Indian allotment become segregated on the date of allowance or approval of entry or allotment by the authorized officer. (See parts 2520 and 2530).

(b) If an entry or allotment is cancelled or relinquished, the lands become open to the operation of the public land laws by publication in the FEDERAL REGISTER of an opening order

## Bureau of Land Management, Interior

## § 2091.5-2

which specifies the date and time of opening. (See parts 2520 and 2530).

### **§ 2091.4-2 Segregation and opening: Airport leases and grants.**

(a) The issuance of a lease for airport purposes under the authority of the Act of May 24, 1928 or a patent or document of conveyance for airport and airway purposes under the authority of the Act of September 3, 1982, as amended (49 U.S.C. 2215), continues to segregate the lands. (See part 2640 and subpart 2911)

(b) If an airport lease is terminated, the lands are opened by publication in the FEDERAL REGISTER of an opening order which specifies the date and time of opening.

(c) The lands covered by an airport lease or grant remain open to the operation of the mineral leasing laws, the material disposal laws and the Geothermal Steam Act, but are segregated from the operation of the mining laws pending the issuance of such regulations as the Secretary may prescribe (See part 2640 and subpart 2911).

### **§ 2091.4-3 Segregation and opening: Carey Act.**

(a) For lands covered by a Carey Act grant, publication of a notice in the FEDERAL REGISTER that a contract has been signed segregates the lands described in the contract, as of the date of publication of a 10 year period, from operation of the public land laws and the mineral laws as described in the notice. (See part 2610).

(b) If the contract under the Carey Act is terminated, the lands are opened by publication in the FEDERAL REGISTER of an opening order which specifies the date and time of opening. Preference right of entry to Carey Act entrymen may be provided in accordance with the provisions of subpart 2613 of this title.

## **§ 2091.5 Withdrawals.**

### **§ 2091.5-1 Segregation of lands resulting from withdrawal applications filed on or after October 21, 1976.**

(a) Publication in the FEDERAL REGISTER of a notice of an application or proposal for withdrawal, as provided in subpart 2310 of this title, segregates the lands described in the withdrawal

application or proposal to the extent specified in the notice. The segregative effect becomes effective on the date of publication and extends for a period of 2 years unless sooner terminated as set out below.

(b) Segregations resulting from applications and proposals filed on or after October 21, 1976, terminate:

(1) Automatically upon the expiration of a 2 year period from the date of publication in the FEDERAL REGISTER of the notice of the filing of an application or proposal for withdrawal;

(2) Upon the publication in the FEDERAL REGISTER of a Public Land Order effecting the withdrawal in whole or in part;

(3) Upon the publication in the FEDERAL REGISTER of a notice denying the withdrawal application or proposal, in whole or in part, giving the date and time the lands shall be open; or

(4) Publication in the FEDERAL REGISTER of a notice of request for cancellation of a withdrawal application or proposal, in whole or in part, giving the date and time the lands are open.

### **§ 2091.5-2 Segregation of lands resulting from withdrawal applications filed prior to October 21, 1976.**

(a)(1) Lands covered by a withdrawal application or withdrawal proposal filed prior to October 21, 1976, were segregated on the date the application was properly filed and remain segregated through October 20, 1991, to the extent specified in notices published in the FEDERAL REGISTER, unless the segregative effect is terminated prior to that date in accordance with procedures in § 2091.5-1 of this title.

(2) Any amendment made to a withdrawal application filed prior to October 21, 1976, for the purpose of adding lands modifies the term of segregation for all lands covered by the amended application to conform with the provision of § 2091.5-1 of this title.

(b) Segregations resulting from applications filed under this section terminate in accordance with procedures in § 2091.5-1 of this title.

### § 2091.5-3

#### **§ 2091.5-3 Segregative effect and opening: Emergency withdrawals.**

(a) When the Secretary determines that an emergency exists and extraordinary measures need to be taken to preserve values that would otherwise be lost, a withdrawal is made immediately in accordance with § 2310.5 of this title. Emergency withdrawals are effective on the date the Public Land Order making the withdrawal is signed, and cannot exceed 3 years in duration and may not be extended.

(b) The lands covered by an emergency withdrawal are opened automatically on the date of expiration of the withdrawal unless segregation is effected by the publication in the FEDERAL REGISTER of a notice of a withdrawal application or proposal.

#### **§ 2091.5-4 Segregative effect and opening: Water power withdrawals.**

(a) Lands covered by powersite reserves, powersite classifications, and powersite designations are considered withdrawn and are segregated from operation of the public land laws, but are not withdrawn and segregated from the operation of the mineral laws.

(b) These lands may be opened to operation of the public land laws after a revocation or cancellation order issued by the Department of the Interior or after a determination to open the lands is made by the Federal Energy Regulatory Commission under section 24 of the Federal Power Act. (See subpart 2320) Mining claims may be located on such lands under procedures in subpart 3730 of this title. These lands are opened by publication in the FEDERAL REGISTER of an opening order specifying the extent, date and time of opening.

#### **§ 2091.5-5 Segregative effect and opening: Federal Power Act withdrawals.**

(a)(1) The filing of an application for a power project with the Federal Energy Regulatory Commission withdraws the lands covered by the application from the operation of the public land laws; however, the lands remain open to the location, lease or disposal of the mineral estate.

(2) The issuance of a permit or license for a project by the Federal En-

### 43 CFR Ch. II (10-1-08 Edition)

ergy Regulatory Commission withdraws the lands from the operation of the mining laws. (See part 3730).

(b) Lands withdrawn under section 24 of the Federal Power Act remain withdrawn until the withdrawal is vacated and the lands opened by proper authority.

(c) After a withdrawal has been vacated, the lands are opened to the operation of the public land laws by notation of the lands records to that effect.

#### **§ 2091.5-6 Congressional withdrawals and opening of lands.**

(a) Congressional withdrawals become effective and are terminated as specified in the statute making the withdrawal. If the statute does not specify the date, duration and extent of segregation, the Secretary shall publish in the FEDERAL REGISTER a Public Land Order so specifying.

(b) If the statute does not specify when and to what extent the lands are to be opened, the Secretary publishes in the FEDERAL REGISTER an opening order so specifying.

#### **§ 2091.6 Opening of withdrawn lands: General.**

The term of a withdrawal ends upon expiration under its own terms, or upon revocation or termination by the Secretary by publication in the FEDERAL REGISTER of a Public Land Order. Lands included in a withdrawal that is revoked, terminates or expires do not automatically become open, but are opened through publication in the FEDERAL REGISTER of an opening order. An opening order may be incorporated in a Public Land Order that revokes or terminates a withdrawal or may be published in the FEDERAL REGISTER as a separate document. In each case, the opening order specifies the time, date and specific conditions under which the lands are opened. (See subpart 2310.)

#### **§ 2091.7 Segregation and opening of lands classified for a specific use.**

##### **§ 2091.7-1 Segregative effect and opening: Classifications.**

(a)(1) Lands classified under the authority of the Recreation and the Public Purposes Act, as amended (43 U.S.C. 869-4), and the Small Tract Act (43

## Bureau of Land Management, Interior

## § 2091.9-3

U.S.C. 682a) are segregated from the operation of the public land laws, including the mining laws, but not the mineral leasing laws, the material disposal laws, and the Geothermal Steam Act, except as provided in the notice of realty action.

(2) Lands classified under the authority of the Classification and Multiple Use Act (43 U.S.C. 1411-18) are segregated to the extent described in the notice of classification.

(b) The segregative effect of the classification described in § 2091.7-1 of this title terminates and the lands are opened under the following procedures:

(1) Recreation and Public Purposes Act classifications; (i) Made after the effective date of these regulations terminate and the lands automatically become open at the end of the 18-month period of segregation specified in part 2740 of this title, unless an application is filed; (ii) made prior to the effective date of these regulations where the 18-month period of segregation specified in part 2740 of this title is in effect on the effective date of these regulations, expire and the lands automatically become open at the end of the 18-month period of segregation unless an application is filed; (iii) made prior to the effective date on these regulations where the 18-month period of segregation has expired prior to the effective date of these regulations, terminate by publication in the FEDERAL REGISTER of an opening order specifying the date and time of opening.

(2) Small Tract Act classifications terminate by publication in the FEDERAL REGISTER of an opening order specifying the date and time of opening.

(3) Classification and Multiple Use Act classification shall be terminated by publication in the FEDERAL REGISTER of an opening order specifying the date and time of opening.

[52 FR 12175, Apr. 15, 1987; 52 FR 36575, Sept. 30, 1987]

### § 2091.7-2 Segregative effect and opening: Taylor Grazing Act.

Lands classified under section 7 of the Act of June 28, 1934, as amended (43 U.S.C. 315f), are segregated to the extent described in the classification notice. The segregative effect for Desert

Land entries, Indian allotments, State selections (exclusive of Alaska) and Carey Act grants made after the effective date of these regulations remains in effect until terminated by publication in the FEDERAL REGISTER of an opening order specifying the date and time of opening or upon issuance of a patent or other document of conveyance,

### § 2091.8 Status of gift lands.

Upon acceptance by the United States, through the Secretary of the Interior, of a deed of conveyance as a gift, the lands or interests so conveyed will become property of the United States but will not become subject to applicable land and mineral laws of this title unless and until an order to that effect is issued by BLM.

[62 FR 52036, Oct. 6, 1997]

### § 2091.9 Segregation and opening resulting from laws specific to Alaska.

#### § 2091.9-1 Alaska Native selections.

The segregation and opening of lands authorized for selection and selected by Alaska Natives under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), are covered by part 2650 of this title.

#### § 2091.9-2 Selections by the State of Alaska.

The segregation and opening of lands authorized for selection and selected by the State of Alaska under the various statutes granting lands to the State of Alaska are covered by subpart 2627 of this title.

#### § 2091.9-3 Lands in Alaska under grazing lease.

The segregation and opening of lands covered by the Act of March 4, 1927 (43 U.S.C. 316, 316a-316o) are covered by part 4200 of this title.

## Subpart 2094—Special Resource Values; Shore Space

AUTHORITY: R.S. 2478, secs. 4, 5, 69 Stat. 444; 43 U.S.C. 1201, 48 U.S.C. 462 note.

SOURCE: 35 FR 9540, June 13, 1970, unless otherwise noted.

### § 2094.0-3

### 43 CFR Ch. II (10-1-08 Edition)

#### § 2094.0-3 Authority.

Section 1 of the Act of May 14, 1898 (30 Stat. 409) as amended by the Acts of March 3, 1903 (32 Stat. 1028) and August 3, 1955 (69 Stat. 444; 48 U.S.C. 371) provides that no entry shall be allowed extending more than 160 rods along the shore of any navigable water. Section 10 of the Act of May 14, 1898, as amended by the Acts of March 3, 1927 (44 Stat. 1364), May 26, 1934 (48 Stat. 809), and August 3, 1955 (69 Stat. 444), provides that trade and manufacturing sites, rights-of-way for terminals and junction points, and homesites and headquarters sites may not extend more than 80 rods along the shores of any navigable water.

#### § 2094.0-5 Definitions.

The term *navigable waters* is defined in section 2 of the Act of May 14, 1898 (30 Stat. 409; 48 U.S.C. 411), to include all tidal waters up to the line of ordinary high tide and all nontidal waters navigable in fact up to the line of ordinary highwater mark.

#### § 2094.1 Methods of measuring; restrictions.

(a) In the consideration of applications to enter lands shown upon plats of public surveys in Alaska, as abutting upon navigable waters, the restriction as to length of claims shall be determined as follows: The length of the water front of a subdivision will be considered as represented by the longest straight-line distance between the shore corners of the tract, measured along lines parallel to the boundaries of the subdivision; and the sum of the distances of each subdivision of the application abutting on the water, so determined, shall be considered as the total shore length of the application. Where, so measured, the excess of shore length is greater than the deficiency would be if an end tract or tracts were eliminated, such tract or tracts shall be excluded, otherwise the application may be allowed if in other respects proper.

(b) The same method of measuring shore space will be used in the case of special surveys, where legal subdivisions of the public lands are not involved.

(c) The following sketch shows the method of measuring the length of shore space, the length of line *A* or line *B*, whichever is the longer, representing the length of shore space which is chargeable to the tract:

#### § 2094.2 Waiver of 160-rod limitation.

(a) The Act of June 5, 1920 (41 Stat. 1059; 48 U.S.C. 372) provides that the Secretary of the Interior in his discretion, may upon application to enter or otherwise, waive the restriction that no entry shall be allowed extending more than 160 rods along the shore of any navigable waters as to such lands as he shall determine are not necessary for harborage, landing, and wharf purposes. The act does not authorize the waiver of the 80-rod restriction, mentioned in § 2094.0-3.

(b) Except as to trade and manufacturing sites, and home and headquarters sites, any applications to enter and notices of settlement which cover lands extending more than 160 rods along the shore of any navigable water will be considered as a petition for waiver of the 160-rod limitation mentioned in paragraph (a) of this section, provided that it is accompanied by a showing that the lands are not necessary for harborage, landing and wharf purposes and that the public interests will not be injured by waiver of the limitation.

### Subpart 2200—Exchanges—General

SOURCE: 58 FR 60918, Nov. 18, 1993, unless otherwise noted.

#### § 2200.0-2 Objective.

The objective is to encourage and expedite the exchange of Federal lands for non-Federal lands, found to be in the public interest, in accordance with applicable statutory policies, standards and requirements.

#### § 2200.0-4 Responsibilities.

The Director of the Bureau of Land Management has the responsibility of

carrying out the functions of the Secretary of the Interior under these regulations.

#### § 2200.0-5 Definitions.

As used in this part:

(a) *Adjustment to relative values* means compensation for exchange-related costs, or other responsibilities or requirements assumed by one party, which ordinarily would be borne by the other party. These adjustments do not alter the agreed upon value of the lands involved in an exchange.

(b) *Agreement to initiate* means a written, nonbinding statement of present intent to initiate and pursue an exchange, which is signed by the parties and which may be amended by the written consent of the parties or terminated at any time upon written notice by any party.

(c) *Appraisal or Appraisal report* means a written statement independently and impartially prepared by a qualified appraiser setting forth an opinion as to the market value of the lands or interests in lands as of a specific date(s), supported by the presentation and analysis of relevant market information.

(d) *Approximately equal value* determination means a decision that the lands involved in an exchange have readily apparent and substantially similar elements of value, such as location, size, use, physical characteristics, and other amenities.

(e) *Arbitration* means a process to resolve a disagreement among the parties as to appraised value, performed by an arbitrator appointed by the Secretary from a list recommended by the American Arbitration Association.

(f) *Assembled land exchange* means the consolidation of multiple parcels of Federal and/or non-Federal lands for purposes of one or more exchange transactions over a period of time.

(g) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority and responsibility to make decisions and perform the duties described in this part.

(h) *Bargaining* means a process, other than arbitration, by which parties attempt to resolve a dispute concerning

the appraised value of the lands involved in an exchange.

(i) *Federal lands* means any lands or interests in lands, such as mineral or timber interests, that are owned by the United States and administered by the Secretary of the Interior through the Director of the Bureau of Land Management, without regard to how the United States acquired ownership, except: (1) Lands located on the Outer Continental Shelf; and (2) lands held for the benefit of Indians, Aleuts and Eskimos.

(j) *Hazardous substances* means those substances designated under Environmental Protection Agency regulations at 40 CFR part 302.

(k) *Highest and best use* means the most probable legal use of a property, based on market evidence as of the date of valuation, expressed in an appraiser's supported opinion.

(l) *Lands* means any land and/or interests in land.

(m) *Ledger account* means an accounting mechanism that tracks the differential in dollar value of lands conveyed throughout a series of transactions. A ledger reports each transaction by date, value of Federal land, value of non-Federal land, the difference between these values upon completion of each transaction, and a cumulative balance and differential.

(n) *Market value* means the most probable price in cash, or terms equivalent to cash, that lands or interests in lands should bring in a competitive and open market under all conditions requisite to a fair sale, where the buyer and seller each acts prudently and knowledgeably, and the price is not affected by undue influence.

(o) *Mineral laws* means the mining laws, mineral leasing laws, and the Geothermal Steam Act, but not the Materials Sales Act, administered by the Secretary of the Interior through the Bureau of Land Management.

(p) *Outstanding interests* means rights or interests in property held by an entity other than a party to an exchange.

(q) *Party* means the United States or any person, State or local government who enters into an agreement to initiate an exchange.

(r) *Person* means any individual, corporation, or other legal entity legally

capable to hold title to and convey land. An individual must be a citizen of the United States and a corporation must be subject to the laws of the United States or of the State where the land is located or the corporation is incorporated.

(s) *Public land laws* means that body of general land laws administered by the Secretary of the Interior through the Bureau of Land Management, excepting, however, the mineral laws.

(t) *Reserved interest* means an interest in real property retained by a party from a conveyance of the title to that property.

(u) *Resource values* means any of the various commodity values (e.g., timber or minerals) or non-commodity values (e.g., wildlife habitat or scenic vistas), indigenous to particular land areas, surface and subsurface.

(v) *Secretary* means the Secretary of the Interior or the individual to whom the authority and responsibilities of that official, as to matters considered in this part, have been delegated.

(w) *Segregation* means the removal for a limited period, subject to valid existing rights, of a specified area of the Federal lands from appropriation under the public land laws and mineral laws, pursuant to the authority of the Secretary of the Interior to allow for the orderly administration of the Federal lands.

(x) *Statement of value* means a written report prepared by a qualified appraiser that states the appraiser's conclusion(s) of value.

#### § 2200.0-6 Policy.

(a) *Discretionary nature of exchanges.* The Secretary is not required to exchange any Federal lands. Land exchanges are discretionary, voluntary real estate transactions between the Federal and non-Federal parties. Unless and until the parties enter into a binding exchange agreement, any party may withdraw from and terminate an exchange proposal or an agreement to initiate an exchange at any time during the exchange process, without any obligation to reimburse, or incur any liability to, any party, person or other entity.

(b) *Determination of public interest.* The authorized officer may complete

an exchange only after a determination is made that the public interest will be well served. When considering the public interest, the authorized officer shall give full consideration to the opportunity to achieve better management of Federal lands, to meet the needs of State and local residents and their economies, and to secure important objectives, including but not limited to: Protection of fish and wildlife habitats, cultural resources, watersheds, wilderness and aesthetic values; enhancement of recreation opportunities and public access; consolidation of lands and/or interests in lands, such as mineral and timber interests, for more logical and efficient management and development; consolidation of split estates; expansion of communities; accommodation of land use authorizations; promotion of multiple-use values; and fulfillment of public needs. In making this determination, the authorized officer must find that:

(1) The resource values and the public objectives that the Federal lands or interests to be conveyed may serve if retained in Federal ownership are not more than the resource values of the non-Federal lands or interests and the public objectives they could serve if acquired, and

(2) The intended use of the conveyed Federal lands will not, in the determination of the authorized officer, significantly conflict with established management objectives on adjacent Federal lands and Indian trust lands. Such finding and the supporting rationale shall be made part of the administrative record.

(c) *Equal value exchanges.* Except as provided in § 2201.5 of this part, lands or interests to be exchanged shall be of equal value or equalized in accordance with the methods set forth in § 2201.6 of this part. An exchange of lands or interests shall be based on market value as determined by the Secretary through appraisal(s), through bargaining based on appraisal(s), or through arbitration.

(d) *Same-State exchanges.* The Federal and non-Federal lands involved in an exchange authorized pursuant to the Federal Land Policy and Management Act of 1976, as amended, shall be located within the same State.

(e) *O and C land exchanges.* Non-Federal lands acquired in exchange for re-vested Oregon and California Railroad Company Grant lands or reconveyed Coos Bay Wagon Road Grant lands are required to be located within any one of the 18 counties in which the original grants were made, and, upon acquisition by the United States, automatically shall assume the same status as the lands for which they were exchanged.

(f) *Congressional designations.* Upon acceptance of title by the United States, lands acquired by an exchange that are within the boundaries of any unit of the National Forest System, National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, or any other system established by Act of Congress; the California Desert Conservation Area; or any national conservation or national recreation area established by Act of Congress, immediately are reserved for and become part of the unit or area within which they are located, without further action by the Secretary, and thereafter shall be managed in accordance with all laws, rules, regulations, and land use plans applicable to such unit or area.

(g) *Land and resource management planning.* The authorized officer shall consider only those exchange proposals that are in conformance with land use plans or plan amendments, where applicable. Lands acquired by an exchange within a Bureau of Land Management district shall automatically become public lands as defined in 43 U.S.C. 1702 and shall become part of that district. The acquired lands shall be managed in accordance with existing regulations and provisions of applicable land use plans and plan amendments. Lands acquired by an exchange that are located within the boundaries of areas of critical environmental concern or any other area having an administrative designation established through the land use planning process shall automatically become part of the unit or area within which they are located, without further action by the Bureau of Land Management, and shall be managed in accordance with all

laws, rules, regulations, and land use plans applicable to such unit or area.

(h) *Environmental analysis.* After an agreement to initiate an exchange is signed, an environmental analysis shall be conducted by the authorized officer in accordance with the National Environmental Policy Act of 1969 (42 U.S.C. 4371), the Council on Environmental Quality regulations (40 CFR parts 1500-1508), and the environmental policies and procedures of the Department of the Interior and the Bureau of Land Management. In making this analysis, the authorized officer shall consider timely written comments received in response to the published exchange notice, pursuant to § 2201.2 of this part.

(i) *Reservations or restrictions in the public interest.* In any exchange, the authorized officer shall reserve such rights or retain such interests as are needed to protect the public interest or shall otherwise restrict the use of Federal lands to be exchanged, as appropriate. The use or development of lands conveyed out of Federal ownership are subject to any restrictions imposed by the conveyance documents and all laws, regulations, and zoning authorities of State and local governing bodies.

(j) *Hazardous substances—(1) Federal lands.* The authorized officer shall determine whether hazardous substances may be present on the Federal lands involved in an exchange and shall provide notice of known storage, release, or disposal of hazardous substances on the Federal lands to the other parties in accordance with the provisions of 40 CFR part 373. The authorized officer shall provide this notice in the exchange agreement. The authorized officer shall also provide such notice, to the extent information is readily available, in the agreement to initiate an exchange. Unless the non-Federal party is a potentially responsible party under 42 U.S.C. 9607(a), the conveyance document from the United States shall contain a covenant in accordance with 42 U.S.C. 9620(h)(3). Where the non-Federal party is a potentially responsible party with respect to the property, it may be appropriate to enter into an agreement, as referenced in 42 U.S.C. 9607(e), whereby that party would indemnify the United States and hold the

United States harmless against any loss or cleanup costs after conveyance.

(2) *Non-Federal lands.* The non-Federal party shall notify the authorized officer of any known, suspected and/or reasonably ascertainable storage, release, or disposal of hazardous substances on the non-Federal land pursuant to § 2201.1 of this part. Notwithstanding such notice, the authorized officer shall determine whether hazardous substances are known to be present on the non-Federal land involved in an exchange. If hazardous substances are known or believed to be present on the non-Federal land, the authorized officer shall reach an agreement with the non-Federal party regarding the responsibility for appropriate response action concerning the hazardous substances before completing the exchange. The terms of this agreement and any appropriate “hold harmless” agreement shall be included in an exchange agreement, pursuant to § 2201.7-2 of this part.

(k) *Legal description of properties.* All lands subject to an exchange shall be properly described on the basis of either a survey executed in accordance with the Public Land Survey System laws and standards of the United States or, if those laws and standards cannot be applied, the lands shall be properly described and clearly locatable by other means as may be prescribed or allowed by law.

(l) *Unsurveyed school sections.* For purposes of exchange only, unsurveyed school sections, which would become State lands upon survey by the Secretary, are considered as “non-Federal” lands and may be used by the State in an exchange with the United States. However, minerals shall not be reserved by the State when unsurveyed sections are used in an exchange. As a condition of the exchange, the State shall have waived, in writing, all rights to unsurveyed sections used in the exchange.

(m) *Coordination with State and local governments.* At least 60 days prior to the conveyance of and upon issuance of the deed or patent for Federal lands, the authorized officer will notify the Governor of the State within which the Federal lands covered by the notice are located and the head of the governing

## Bureau of Land Management, Interior

## § 2200.0-9

body of any political subdivision having zoning or other land use regulatory authority in the geographical area within which the Federal lands are located.

(n) *Fee coal exchanges.* As part of the consideration of whether public interest would be served by the acquisition of fee coal through exchange, the provisions of subpart 3461 of this title shall be applied and shall be evaluated as a factor and basis for the exchange.

### § 2200.0-7 Scope.

(a) These rules set forth the procedures for conducting exchanges of Federal lands. The procedures in these rules are supplemented by the Bureau of Land Management Manuals and Handbooks 2200 and 9310. The contents of these supplemental materials are not considered to be a part of these rules.

(b) The rules contained in this part apply to all land exchanges, made under the authority of the Secretary, involving Federal lands, as defined in 43 CFR 2200.0-5(i). Apart from the Federal Land Policy and Management Act of 1976 (FLPMA), as amended, 43 U.S.C. 1701 *et seq.*, there are a variety of statutes, administered by the Secretary, that authorize land trades which may include Federal lands, as for example, certain National Wildlife Refuge System and National Park System exchange acts. The procedures and requirements associated with or imposed by any one of these other statutes may not be entirely consistent with the rules in this part, as the rules in this part are intended primarily to implement the FLPMA land exchange provisions. If there is any such inconsistency, and if Federal lands are involved, the inconsistent procedures or statutory requirements will prevail. Otherwise, the regulations in this part will be followed. The rules in this part also apply to the exchange of interests in either Federal or non-Federal lands including, but not limited to, minerals, water rights, and timber.

(c) The application of these rules to exchanges made under the authority of the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1621) or the Alaska National Interest Lands Conservation Act (16 U.S.C. 3192), shall be

limited to those provisions that do not conflict with the provisions of these Acts.

(d) Pending exchanges initiated prior to December 17, 1993 shall proceed in accordance with this rule unless:

(1) In the judgment of the authorized officer, it would be more expeditious to continue following the procedures in effect prior to December 17, 1993; or

(2) A binding agreement to exchange was in effect prior to December 17, 1993; and

(3) To proceed as provided in paragraphs (d) (1) or (2) of this section would not be inconsistent with applicable law.

(e) Exchanges proposed by persons holding fee title to coal deposits that qualify for exchanges under the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1260(b)(5)) and as provided in subpart 3436 of this title shall be processed in accordance with this part, except as otherwise provided in subpart 3436 of this title.

[46 FR 1638, Jan. 6, 1981, as amended at 63 FR 52617, Oct. 1, 1998]

### § 2200.0-9 Information collection.

(a) The collection of information contained in part 2200 of Group 2200 has been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0056. The information will be used to initiate and complete land exchanges with the Bureau of Land Management. Responses are required to obtain benefits in accordance with the Federal Land Policy and Management Act of 1976, as amended.

(b) Public reporting burden for this information is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, should be sent to the Division of Information Resources Management (870), Bureau of Land Management, 1849 C Street, NW., Washington, DC 20240; and the Paperwork Reduction Project

## § 2201.1

## 43 CFR Ch. II (10–1–08 Edition)

(1004–0056), Office of Management and Budget, Washington, DC 20503.

### Subpart 2201—Exchanges— Specific Requirements

#### § 2201.1 Agreement to initiate an exchange.

(a) Exchanges may be proposed by the Bureau of Land Management or by any person, State, or local government. Initial exchange proposals should be directed to the authorized officer responsible for the management of Federal lands involved in an exchange.

(b) To assess the feasibility of an exchange proposal, the prospective parties may agree to obtain a preliminary estimate of the values of the lands involved in the proposal. The preliminary estimate is generally not an appraisal but shall be prepared by a qualified appraiser.

(c) If the authorized officer agrees to proceed with an exchange proposal, a nonbinding agreement to initiate an exchange shall be executed by all prospective parties. At a minimum, the agreement shall include:

(1) The identity of the parties involved in the proposed exchange and the status of their ownership or ability to provide title to the land;

(2) A description of the lands or interest in lands being considered for exchange;

(3) A statement by each party, other than the United States and State and local governments, certifying that the party is a citizen of the United States or a corporation or other legal entity subject to the laws of the United States or a State thereof;

(4) A description of the appurtenant rights proposed to be exchanged or reserved; any authorized uses including grants, permits, easements, or leases; and any known unauthorized uses, outstanding interests, exceptions, adverse claims, covenants, restrictions, title defects or encumbrances;

(5) A time schedule for completing the proposed exchange;

(6) An assignment of responsibility for performance of required functions and for costs associated with processing the exchange;

(7) A statement specifying whether compensation for costs assumed will be

allowed pursuant to the provisions of § 2201.1–3 of this part;

(8) Notice of any known release, storage, or disposal of hazardous substances on involved Federal or non-Federal lands, and any commitments regarding responsibility for removal or other remedial actions concerning such substances on involved non-Federal lands. All such terms and conditions regarding non-Federal lands shall be included in a land exchange agreement pursuant to § 2201.7–2 of this part;

(9) A grant of permission by each party to conduct a physical examination of the lands offered by the other party;

(10) The terms of any assembled land exchange arrangement, pursuant to § 2201.1–1 of this part;

(11) A statement as to any arrangements for relocation of any tenants occupying non-Federal land, pursuant to § 2201.8 (c)(1)(iv) of this part;

(12) A notice to an owner-occupant of the voluntary basis for the acquisition of the non-Federal lands, pursuant to § 2201.8 (c)(1)(iv) of this part; and

(13) A statement as to the manner in which documents of conveyance will be exchanged, should the exchange proposal be successfully completed.

(d) Unless the parties agree to some other schedule, no later than 90 days from the date of the executed agreement to initiate an exchange, the parties shall arrange for appraisals, which are to be completed within timeframes and under such terms as are negotiated. In the absence of current market information reliably supporting value, the parties may agree to use other acceptable and commonly recognized methods to estimate value.

(e) An agreement to initiate an exchange may be amended by written consent of the parties or terminated at any time upon written notice by any party.

(f) Entering into an agreement to initiate an exchange does not legally bind any party to proceed with processing or to consummate a proposed exchange, or to reimburse or pay damages to any party to a proposed exchange that is delayed or is not consummated or to anyone assisting in any way, or doing business with, any such party.

## Bureau of Land Management, Interior

## § 2201.1-2

(g) The withdrawal from, and termination of, an exchange proposal, or an agreement to initiate an exchange, by the authorized officer at any time prior to the notice of decision, pursuant to § 2201.7-1 of this part, is not protestable or appealable under 43 CFR part 4.

### § 2201.1-1 Assembled land exchanges.

(a) Whenever the authorized officer determines it to be practicable, an assembled land exchange arrangement may be used to facilitate exchanges and reduce costs.

(b) The parties to an exchange may agree to such an arrangement where multiple parcels of Federal and/or non-Federal lands are consolidated into a package for the purpose of completing one or more exchange transactions over a period of time.

(c) An assembled land exchange arrangement shall be documented in the agreement to initiate an exchange, pursuant to § 2201.1 of this part.

(d) Values of the Federal and non-Federal lands involved in an assembled exchange arrangement shall be estimated pursuant to § 2201.3 of this part.

(e) If more than one transaction is necessary to complete the exchange package, the parties shall establish a ledger account under which the Federal and non-Federal lands can be exchanged. When a ledger account is used, the authorized officer shall:

(1) Assure that the value difference between the Federal and non-Federal lands does not exceed 25 percent of the total value of the Federal lands conveyed in the assembled land exchange up to and including the current transaction;

(2) Assure that the values of the Federal and non-Federal lands conveyed are balanced with land and/or money at least every 3 years pursuant to § 2201.6 of this part; and

(3) If necessary, require from the non-Federal party a deposit of cash, bond or other approved surety in an amount equal to any outstanding value differential.

(4) Assembled land exchanges are subject to the value equalization and cash equalization waiver provisions of § 2201.6 of this part. Cash equalization waiver shall only be used in conjunction with the final transaction of the

assembled land exchange and the termination of any ledger account used.

(f) The assembled exchange arrangement may be terminated unilaterally at any time upon written notice by any party or upon depletion of the Federal or non-Federal lands assembled. Prior to termination, values shall be equalized pursuant to § 2201.6 of this part.

### § 2201.1-2 Segregative effect.

(a) If a proposal is made to exchange Federal lands, the authorized officer may direct the appropriate State Office of the Bureau of Land Management to segregate the Federal lands by a notation on the public land records. Subject to valid existing rights, the Federal lands shall be segregated from appropriation under the public land laws and mineral laws for a period not to exceed 5 years from the date of record notation.

(b) Any interests of the United States in the non-Federal lands that are covered by the exchange proposal may be segregated from appropriation under the mineral laws for a period not to exceed 5 years from the date of notation by noting the public land status records.

(c) The segregative effect shall terminate upon the occurrence of any of the following events, whichever occurs first:

(1) Automatically, upon issuance of a patent or other document of conveyance to the affected lands;

(2) On the date and time specified in an opening order, such order to be promptly issued and published by the appropriate State Office of the Bureau of Land Management in the FEDERAL REGISTER, if a decision is made not to proceed with the exchange or upon removal of any lands from an exchange proposal; or

(3) Automatically, at the end of the segregation period not to exceed 5 years from the date of notation of the public land records.

(d) The provisions of this section apply equally to proposals to exchange National Forest System lands under the authority and provisions of the Act of March 20, 1922, 42 Stat. 465, as amended, 16 U.S.C. 485, and the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 *et seq.*, except that if

### § 2201.1-3

a proposal is made to exchange National Forest System lands, which proposal shall be filed in compliance with 36 CFR part 254, the authorized officer may request that the appropriate BLM State Office segregate such lands by a notation on the public land records.

[46 FR 1638, Jan. 6, 1981, as amended at 63 FR 23681, Apr. 30, 1998; 65 FR 70112, Nov. 21, 2000]

#### § 2201.1-3 Assumption of costs.

(a) Generally, parties to an exchange will bear their own costs of the exchange. However, if the authorized officer finds it is in the public interest, subject to the conditions and limitations specified in paragraphs (b) and (c) of this section, an agreement to initiate an exchange may provide that:

(1) One or more of the parties may assume, without compensation, all or part of the costs or other responsibilities or requirements that the authorized officer determines would ordinarily be borne by the other parties; or

(2) The parties may agree to make adjustments to the relative values involved in an exchange transaction in order to compensate parties for assuming costs or other responsibilities or requirements that the authorized officer determines would ordinarily be borne by the other parties. These costs or services may include but are not limited to: Land surveys, appraisals, mineral examinations, timber cruises, title searches, title curative actions, cultural resource surveys and mitigation, hazardous substance surveys and controls, removal of encumbrances, arbitration including all fees, bargaining, cure of deficiencies preventing highest and best use of the land, conduct of public hearings, assemblage of non-Federal parcels from multiple ownerships, expenses of complying with laws, regulations, and policies applicable to exchange transactions, and expenses that are necessary to bring the Federal and non-Federal lands involved in the exchange to their highest and best use for appraisal and exchange purposes.

(b) The authorized officer may agree to assume without compensation costs ordinarily borne under local custom or practice by the non-Federal party or to compensate the non-Federal party for costs ordinarily borne under local custom or practice by the United States

### 43 CFR Ch. II (10-1-08 Edition)

but incurred by the non-Federal party, but only when it is clearly in the public interest and the authorized officer determines and documents that each of the following circumstances exist:

(1) The amount of the cost assumed or compensation is reasonable and accurately reflects the value of the goods and services received;

(2) The proposed exchange is a high priority of the agency;

(3) The land exchange must be expedited to protect important Federal resource values, such as congressionally designated areas or endangered species habitat;

(4) Cash equalization funds are available for compensating the non-Federal party; and

(5) There are no other practicable means available to the authorized officer of meeting Federal exchange processing costs, responsibilities, or requirements.

(c) The total amount of adjustment agreed to as compensation for costs incurred pursuant to this section shall not exceed the limitations set forth in § 2201.6 of this part.

#### § 2201.2 Notice of exchange proposal.

(a) Upon entering into an agreement to initiate an exchange, the authorized officer shall publish a notice once a week for 4 consecutive weeks in newspapers of general circulation in the counties in which the Federal and non-Federal lands or interests proposed for exchange are located. The authorized officer shall notify authorized users, jurisdictional State and local governments, and the congressional delegation, and shall make other distribution of the notice as appropriate. At a minimum, the notice shall include:

(1) The identity of the parties involved in the proposed exchange;

(2) A description of the Federal and non-Federal lands being considered for exchange;

(3) A statement as to the effect of segregation from appropriation under the public land laws and mineral laws, if applicable;

(4) An invitation to the public to submit in writing any comments on or concerns about the exchange proposal, including advising the authorized officer as to any liens, encumbrances, or

## Bureau of Land Management, Interior

## § 2201.3-3

other claims relating to the lands being considered for exchange; and

(5) The deadline by which comments must be received, and the name, title, and address of the official to whom comments must be sent.

(b) To be assured of consideration in the environmental analysis of the proposed exchange, all comments shall be made in writing to the authorized officer and postmarked or delivered within 45 days after the initial date of publication.

(c) The authorized officer is not required to republish descriptions of any lands excluded from the final exchange transaction, provided such lands were identified in the notice of exchange proposal. In addition, minor corrections of land descriptions and other insignificant changes do not require republication.

### § 2201.3 Appraisals.

The Federal and non-Federal parties to an exchange shall comply with the appraisal standards set forth in §§ 2201.3-1 through 2201.3-4 of this part and, to the extent appropriate, with the Department of Justice "Uniform Appraisal Standards for Federal Land Acquisitions" when appraising the values of the Federal and non-Federal lands involved in an exchange.

#### § 2201.3-1 Appraiser qualifications.

(a) A qualified appraiser(s) shall provide to the authorized officer appraisals estimating the market value of Federal and non-Federal properties involved in an exchange. A qualified appraiser may be an employee or a contractor to the Federal or non-Federal exchange parties. At a minimum, a qualified appraiser shall be an individual, approved by the authorized officer, who is competent, reputable, impartial, and has training and experience in appraising property similar to the property involved in the appraisal assignment.

(b) Qualified appraisers shall possess qualifications consistent with State regulatory requirements that meet the intent of title XI of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) (12 U.S.C. 3331). In the event a State does not have approved policies, practices and

procedures regulating the activities of appraisers, the Bureau of Land Management may establish appraisal qualification standards commensurate with those adopted by other States meeting the requirements of FIRREA.

#### § 2201.3-2 Market value.

(a) In estimating market value, the appraiser shall:

(1) Determine the highest and best use of the property to be appraised;

(2) Estimate the value of the lands and interests as if in private ownership and available for sale in the open market;

(3) Include historic, wildlife, recreation, wilderness, scenic, cultural, or other resource values or amenities that are reflected in prices paid for similar properties in the competitive market;

(4) Consider the contributory value of any interest in land such as minerals, water rights, or timber to the extent they are consistent with the highest and best use of the property; and

(5) Estimate separately, if stipulated in the agreement to initiate in accordance with § 2201.1 of this part, the value of each property optioned or acquired from multiple ownerships by the non-Federal party for purposes of exchange, pursuant to § 2201.1-1 of this part. In this case, the appraiser shall estimate the value of the Federal and non-Federal properties in a similar manner.

(b) In estimating market value, the appraiser may not independently add the separate values of the fractional interests to be conveyed, unless market evidence indicates the following:

(1) The various interests contribute their full value (pro rata) to the value of the whole; and

(2) The valuation is compatible with the highest and best use of the property.

(c) In the absence of current market information reliably supporting value, the authorized officer may use other acceptable and commonly recognized methods to determine market value.

#### § 2201.3-3 Appraisal report standards.

Appraisals prepared for exchange purposes shall contain, at a minimum, the following information:

(a) A summary of facts and conclusions;

#### § 2201.3-4

#### 43 CFR Ch. II (10-1-08 Edition)

(b) The purpose and/or the function of the appraisal, a definition of the estate being appraised, and a statement of the assumptions and limiting conditions affecting the appraisal assignment, if any;

(c) An explanation of the extent of the appraiser's research and actions taken to collect and confirm information relied upon in estimating value;

(d) An adequate description of the physical characteristics of the lands being appraised; a statement of all encumbrances; title information, location, zoning, and present use; an analysis of highest and best use; and at least a 5-year sales history of the property;

(e) A disclosure of any condition that is observed during the inspection of the property or becomes known to the appraiser through normal research that would lead the appraiser to believe that hazardous substances may be present on the property being appraised;

(f) A comparative market analysis and, if more than one method of valuation is used, an analysis and reconciliation of the methods used to support the appraiser's estimate of value;

(g) A description of comparable sales, including a description of all relevant physical, legal, and economic factors such as parties to the transaction, source and method of financing, effect of any favorable financing on sale price, and verification by a party involved in the transaction;

(h) An estimate of market value;

(i) The effective date of valuation, date of appraisal, signature, and certification of the appraiser;

(j) A certification by the appraiser signing the report to the following:

(1) The appraiser personally contacted the property owner or designated representative and offered the owner an opportunity to be present during inspection of the property;

(2) The appraiser personally examined the subject property and all comparable sale properties relied upon in the report;

(3) The appraiser has no present or prospective interest in the appraised property; and

(4) The appraiser has not, and will not, receive compensation that was

contingent on the analysis, opinions, or conclusions contained in the appraisal report; and

(k) Copies of relevant written reports, studies, or summary conclusions prepared by others in association with the appraisal assignment that were relied upon by the appraiser to estimate value, which may include but is not limited to current title reports, mineral reports, or timber cruises prepared by qualified specialists.

#### § 2201.3-4 Appraisal review.

(a) Appraisal reports shall be reviewed by a qualified review appraiser meeting the qualifications set forth in § 2201.3-1 of this part. Statements of value prepared by agency appraisers are not subject to this review.

(b) The review appraiser shall determine whether the appraisal report:

(1) Is complete, logical, consistent, and supported by a market analysis;

(2) Complies with the standards prescribed in § 2201.3-3 of this part; and

(3) Reasonably estimates the probable market value of the lands appraised.

(c) The review appraiser shall prepare a written review report, containing at a minimum:

(1) A description of the review process used;

(2) An explanation of the adequacy, relevance, and reasonableness of the data and methods used by the appraiser to estimate value;

(3) The reviewing appraiser's statement of conclusions regarding the appraiser's estimate of market value; and

(4) A certification by the review appraiser to the following:

(i) The review appraiser has no present or prospective interest in the property that is the subject of the review report; and

(ii) The review appraiser has not, and will not, receive compensation that was contingent on the approval of the appraisal report.

#### § 2201.4 Bargaining; arbitration.

(a) Unless the parties to an exchange agree in writing to suspend or modify the deadlines contained in paragraphs (a)(1) through (a)(4) of this section, the parties shall adhere to the following schedule:

## Bureau of Land Management, Interior

## § 2201.5

(1) Within 180 days from the date of receipt of the appraisal(s) for review and approval by the authorized officer, the parties to an exchange may agree on the appraised values of the lands involved in an exchange. If the parties cannot agree on the appraised values, they may agree to initiate a process of bargaining or some other process to resolve the dispute over values. Bargaining or any other process shall be based on an objective analysis of the valuation in the appraisal report(s) and shall be a means of reconciling differences in such reports. Bargaining or another process to determine values may involve one or more of the following actions:

- (i) Submission of the disputed appraisal(s) to another qualified appraiser for review;
- (ii) Request for additional appraisals;
- (iii) Involvement of an impartial third party to facilitate resolution of the value disputes; or
- (iv) Use of some other acceptable and commonly recognized practice for resolving value disputes.

Any agreement based upon bargaining shall be in writing and made part of the administrative record of the exchange. Such agreement shall contain a reference to all relevant appraisal information and state how the parties reconciled or compromised appraisal information to arrive at an agreement based on market value.

(2) If within 180 days from the date of receipt of the appraisal(s) for review and approval by the authorized officer, the parties to an exchange cannot agree on values but wish to continue with the land exchange, the appraisal(s) may, at the option of either party, be submitted to arbitration unless, in lieu of arbitration, the parties have employed a process of bargaining or some other process to determine values. If arbitration occurs, it shall be conducted in accordance with the real estate valuation arbitration rules of the American Arbitration Association. The Secretary or an official to whom such authority has been delegated shall appoint an arbitrator from a list provided by the American Arbitration Association.

(3) Within 30 days after completion of arbitration, the parties involved in the

exchange shall determine whether to proceed with the exchange, modify the exchange to reflect the findings of the arbitration or any other factors, or withdraw from the exchange. A decision to withdraw from the exchange may be made upon written notice by either party at this time or at any other time prior to entering into a binding exchange agreement.

(4) If the parties agree to proceed with an exchange after arbitration, the values established by arbitration are binding upon all parties for a period not to exceed 2 years from the date of the arbitration decision.

(b) Arbitration is limited to the disputed valuation of the lands involved in a proposed exchange, and an arbitrator's award decision shall be limited to the value estimate(s) of the contested appraisal(s). An award decision shall not include recommendations regarding the terms of a proposed exchange, nor shall an award decision infringe upon the authority of the Secretary to make all decisions regarding management of Federal lands and to make public interest determinations.

### § 2201.5 Exchanges at approximately equal value.

(a) The authorized officer may exchange lands that are of approximately equal value when it is determined that:

(1) The exchange is in the public interest and the consummation of the proposed exchange will be expedited;

(2) The value of the lands to be conveyed out of Federal ownership is not more than \$150,000 as based upon a statement of value prepared by a qualified appraiser and approved by the authorized officer;

(3) The Federal and non-Federal lands are substantially similar in location, acreage, use, and physical attributes; and

(4) There are no significant elements of value requiring complex analysis.

(b) The authorized officer shall determine that the Federal and non-Federal lands are approximately equal in value and shall document how the determination was made.

## **§ 2201.6**

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 2201.6 Value equalization; cash equalization waiver.**

(a) To equalize the agreed upon values of the Federal and non-Federal lands involved in an exchange, either with or without adjustments of relative values as compensation for various costs, the parties to an exchange may agree:

(1) To modify the exchange proposal by adding or excluding lands; and/or

(2) To use cash equalization after making all reasonable efforts to equalize values by adding or excluding lands.

(b) The combined amount of any cash equalization payment and/or the amount of adjustments agreed to as compensation for costs under § 2201.1-3 of this part may not exceed 25 percent of the value of the Federal lands to be conveyed.

(c) The parties may agree to waive a cash equalization payment if the amount to be waived does not exceed 3 percent of the value of the lands being exchanged out of Federal ownership or \$15,000, whichever is less. This provision shall not be applied to exchanges where the value differential is in excess of \$15,000.

(d) A cash equalization payment may be waived only after the authorized officer determines in writing how the waiver will expedite the exchange and why the public interest will be better served by the waiver.

### **§ 2201.7 Approval of exchanges.**

#### **§ 2201.7-1 Notice of decision.**

(a) Upon completion of all environmental analyses and appropriate documentation, appraisals, and all other supporting studies and requirements to determine if a proposed exchange is in the public interest and in compliance with applicable law and regulations, the authorized officer shall decide whether to approve an exchange proposal.

(1) When a decision to approve or disapprove an exchange is made, the authorized officer shall publish a notice of the availability of the decision in newspapers of general circulation. A notice also may be published in the FEDERAL REGISTER at the discretion of the authorized officer. At a minimum, the notice shall include:

- (i) The date of decision;
- (ii) A concise description of the decision;
- (iii) The name and title of the deciding official;
- (iv) Directions for obtaining a copy of the decision; and
- (v) The date of the beginning of the protest period.

(2) The authorized officer shall distribute notices to State and local governmental subdivisions having authority in the geographical area within which the lands covered by the notice are located pursuant to § 2200.0-6(m) of this part, the non-Federal exchange parties, authorized users of involved Federal lands, the congressional delegation, individuals who requested notification or filed written objections, and others as appropriate.

(b) For a period of 45 days after the date of publication of a notice of the availability of a decision to approve or disapprove an exchange proposal, such decision shall be subject to protest.

(c) A right of appeal from a protest decision of the authorized officer may be pursued in accordance with the applicable appeal procedures of 43 CFR part 4.

#### **§ 2201.7-2 Exchange agreement.**

(a) The parties to a proposed exchange may enter into an exchange agreement subsequent to a decision by the authorized officer to approve the exchange, pursuant to § 2201.7-1 of this part. Such an agreement is required if hazardous substances are present on the non-Federal lands. An exchange agreement shall contain the following:

(1) Identification of the parties, a description of the lands and interests to be exchanged, identification of all reserved and outstanding interests, the amount of any necessary cash equalization, and all other terms and conditions necessary to complete the exchange;

(2) The terms regarding responsibility for removal, indemnification ("hold harmless" agreement), or other remedial actions concerning any hazardous substances on the involved non-Federal lands;

(3) A description of the goods and services and their corresponding costs for which the noncomplying party is

## Bureau of Land Management, Interior

## § 2201.8

liable in the event of failure to perform or to comply with the terms of the exchange agreement; and

(4) The agreed upon values of the involved lands.

(b) An exchange agreement, as described in paragraph (a) of this section, is legally binding on all parties, subject to the terms and conditions thereof, provided:

(1) Acceptable title can be conveyed;

(2) No substantial loss or damage occurs to either property from any cause;

(3) No undisclosed hazardous substances are found on the involved Federal or non-Federal lands prior to conveyance;

(4) In the event of a protest, or of an appeal from a protest decision under 43 CFR part 4, a decision to approve an exchange pursuant to § 2201.7-1 is upheld; and

(5) The agreement is not terminated by mutual consent or upon such terms as may be provided in the agreement.

(c) Absent an executed legally binding exchange agreement, any action taken by one or more of the parties, or a failure of one or more of the parties to take any action, prior to consummation of an exchange does not create any legal obligation or right enforceable against or enjoyed by any party.

### § 2201.8 Title standards.

(a) *Title evidence.* (1) Unless otherwise specified by the Office of the Solicitor of the Department of the Interior, evidence of title for the non-Federal lands being conveyed to the United States shall be in conformance with the Department of Justice regulations and "Standards for the Preparation of Title Evidence in Land Acquisitions by the United States" in effect at the time of conveyance.

(2) The United States is not required to furnish title evidence for the Federal lands being exchanged.

(b) *Conveyance documents.* (1) Unless otherwise specified by the Office of the Solicitor of the Department of the Interior, all conveyances to the United States shall be prepared, executed, and acknowledged in recordable form and in accordance with the Department of Justice regulations and "Standards for the Preparation of Title Evidence in Land Acquisition by the United

States" in effect at the time of conveyance.

(2) Conveyances of lands from the United States shall be by patent, quitclaim deed, or deed without express or implied warranties, except as to hazardous substances pursuant to § 2200.0-6(j)(1) of this title.

(c) *Title encumbrances—(1) Non-Federal lands.* (i) Title to the non-Federal lands must be acceptable to the United States. For example, encumbrances such as taxes, judgment liens, mortgages, and other objections or title defects shall be eliminated, released, or waived in accordance with requirements of the preliminary title opinion of the Office of the Solicitor of the Department of the Interior or the Department of Justice, as appropriate.

(ii) The United States shall not accept lands in which there are reserved or outstanding interests that would interfere with the use and management of land by the United States or would otherwise be inconsistent with the authority under which, or the purpose for which, the lands are to be acquired. Reserved interests of the non-Federal landowner are subject to agreed upon covenants or conditions included in the conveyance documents.

(iii) Any personal property owned by the non-Federal party that is not a part of the exchange proposal should be removed by the non-Federal party prior to acceptance of title by the United States, unless the authorized officer and the non-Federal party to the exchange previously agree upon a specified period to remove the personal property. If the personal property is not removed prior to acceptance of title or within the otherwise prescribed time, it shall be deemed abandoned and shall become vested in the United States.

(iv) The exchange parties must reach agreement on the arrangements for the relocation of any tenants. Qualified tenants occupying non-Federal lands affected by a land exchange may be entitled to benefits under 49 CFR 24.2. Unless otherwise provided by law or regulation (49 CFR 24.101(a)(1)), relocation benefits are not applicable to owner-occupants involved in exchanges with the United States provided the owner-occupants are notified in writing

## § 2201.9

that the non-Federal lands are being acquired by the United States on a voluntary basis.

(2) *Federal lands.* If Federal lands proposed for exchange are occupied under grant, permit, easement, or non-mineral lease by a third party who is not a party to the exchange, the third party holder of such authorization and the non-Federal party to the exchange may reach agreement as to the disposition of the existing use(s) authorized under the terms of the grant, permit, easement, or lease. The non-Federal exchange party shall submit documented proof of such agreement prior to issuance of a decision to approve the land exchange, as instructed by the authorized officer. If an agreement cannot be reached, the authorized officer shall consider other alternatives to accommodate the authorized use or shall determine whether the public interest will be best served by terminating such use in accordance with the terms and provisions of the instrument authorizing the use.

### § 2201.9 Case closing.

(a) *Title transfers.* Unless otherwise agreed, and notwithstanding the decision in *United States v. Schurz*, 102 U.S. 378 (1880), or any other law or ruling to the contrary, title to both the non-Federal and Federal lands simultaneously shall pass and be deemed accepted by the United States and the non-Federal landowner, respectively, when the documents of conveyance are recorded in the county clerk's or other local recorder's office. Before recordation, all instructions, requirements, and conditions set forth by the United States and the non-Federal landowner shall be met. The requirements and conditions necessary for recordation at a minimum will include the following, as appropriate:

(1) The determination by the authorized officer that the United States will receive possession, acceptable to it, of such lands; and

(2) The issuance of title evidence as of the date and time of recordation, which conforms to the instructions and requirements of the Office of the Solicitor's preliminary title opinion.

(b) *Automatic segregation of lands.* Subject to valid existing rights, non-

## 43 CFR Ch. II (10–1–08 Edition)

Federal lands acquired through exchange by the United States automatically shall be segregated from appropriation under the public land laws and mineral laws until midnight of the 90th day after acceptance of title by the United States, and the public land records shall be noted accordingly. Except to the extent otherwise provided by law, the lands shall be open to the operation of the public land laws and mineral laws at midnight 90 days after the day title was accepted unless otherwise segregated pursuant to part 2300 of this title.

(c) *Notice to State and local governments.* Following the transfer of title to the Federal lands involved in an exchange, notice will be given to State and local officials as prescribed in § 2200.0–6(m) of this part.

## Subpart 2203—Exchanges Involving Fee Federal Coal Deposits

SOURCE: 51 FR 12612, Apr. 14, 1986, unless otherwise noted.

### § 2203.0–6 Policy.

When determining whether a fee exchange of the Federal coal deposits is in the public interest, it is the policy of the Department of the Interior to consider whether the exchange will create or maintain a situation inconsistent with the Federal anti-trust laws. The Bureau of Land Management, in making the determination of public interest, shall consider the advice of the Attorney General of the United States concerning whether the exchange will create or maintain a situation inconsistent with the Federal antitrust laws.

### § 2203.0–9 Cross references.

The authorized officer shall implement a fee exchange of Federal coal deposits in compliance with the requirements of subparts 2200 and 2201 on this title.

### § 2203.1 Opportunity for public comment and public meeting on exchange proposal.

Upon acceptance of a proposal for a fee exchange of Federal coal deposits, the authorized officer shall publish and

## Bureau of Land Management, Interior

## § 2203.4

distribute a notice of exchange proposal as set forth in §2201.2 of this title.

[51 FR 12612, Apr. 1986, as amended at 58 FR 60926, Nov. 18, 1993]

### § 2203.2 Submission of information concerning proposed exchange.

(a) Any person submitting a proposal for a fee exchange of Federal coal deposits shall submit information concerning the coal reserves presently held in each geographic area involved in the exchange along with a description of the reserves that would be added or eliminated by the proposed exchange. In addition, the person filing a proposed exchange under this section shall furnish any additional information requested by the authorized officer in connection with the consideration of the antitrust consequences of the proposed exchange.

(b) The authorized officer shall transmit a copy of the information required by paragraph (a) of this section to the Attorney General upon its receipt.

(c) All non-proprietary information submitted under paragraph (a) of this section shall be made a part of the public record on each proposed exchange. With respect to proprietary information submitted under paragraph (a) of this section, only a description of the type of information submitted shall be included in the public record.

(d) Where the entity proposing a fee coal exchange has previously submitted information, a reference to the date of submission and to the serial number of the record in which it is filed, together with a statement of any and all changes in holdings since the date of the previous submission, shall be accepted.

[51 FR 12612, Apr. 14, 1986, as amended 58 FR 60926, Nov. 18, 1993]

### § 2203.3 Public meeting.

Upon completion of an environmental analysis, but prior to the issuance of a notice of decision, the authorized officer shall publish a notice in the FEDERAL REGISTER setting a time and place where a public meeting will be held to receive public comment on the public interest factors of the proposed exchange. Such notice shall

be distributed in accordance with §2201.7-1 of this title. The public meeting shall:

(a) Follow procedures established by the authorized officer, which shall be announced prior to the meeting; and

(b) Be recorded and a transcript prepared, with the transcript and all written submissions being made a part of the public record of the proposed exchange.

[51 FR 12612, Apr. 14, 1986, as amended at 58 FR 60926, Nov. 18, 1993]

### § 2203.4 Consultation with the Attorney General.

(a) The authorized officer shall, at the conclusion of the comment period and public meeting provided for in §2203.3 of this title, forward to the Attorney General copies of the comments received in response to the request for public comments and the transcript and copies of the written comments received at the public meeting.

(b) The authorized officer shall allow the Attorney General 90 days within which the Attorney General may advise, in writing, on the anti-trust consequences of the proposed exchange.

(c) If the Attorney General requests additional information concerning the proposed exchange, the authorized officer shall request, in writing, such information from the person proposing the exchange, allowing a maximum period of 30 days for the submission of the requested information. The 90-day period provided in paragraph (b) of this section shall be extended for the period required to obtain and submit the requested information, or 30 days, whichever is sooner.

(d) If the Attorney General notifies the authorized officer, in writing, that additional time is needed to review the anti-trust consequences of the proposed exchange, the time provided in paragraph (b) of this section, including any additional time provided under paragraph (c) of this section, shall be extended for the period requested by the Attorney General. If the Attorney General has not responded to the request for anti-trust review within the time granted for such review, including any extensions thereof, the authorized officer may proceed with the exchange

## § 2203.5

without the advice of the Attorney General.

### § 2203.5 Action on advice of the Attorney General.

(a) The authorized officer shall make any advice received from the Attorney General a part of the public record on the proposed exchange.

(b) Except as provided in § 2203.4(d) of this title, the authorized officer shall not make a final decision on the proposed exchange and whether it is in the public interest until the advice of the Attorney General has been considered. The authorized officer shall, in the record of decision on the proposed exchange, discuss the consideration given any advice received from the Attorney General in reaching the final decision on the proposed exchange.

SOURCE: 46 FR 5796, Jan. 19, 1981, unless otherwise noted.

### Subpart 2300—Withdrawals, General

#### § 2300.0-1 Purpose.

(a) These regulations set forth procedures implementing the Secretary of the Interior's authority to process Federal land withdrawal applications and, where appropriate, to make, modify or extend Federal land withdrawals. Procedures for making emergency withdrawals are also included.

(b) The regulations do not apply to withdrawals that are made by the Secretary of the Interior pursuant to an act of Congress which directs the issuance of an order by the Secretary. Likewise, procedures applicable to withdrawals authorized under the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272(b); 1281), and procedures relating to the Secretary's authority to establish Indian reservations or to add lands to the reservations pursuant to special legislation or in accordance with section 7 of the Act of June 18, 1934 (25 U.S.C. 467), as supplemented by section 1 of the Act of May 1, 1936 (25 U.S.C. 473a), are not included in these regulations.

(c) General procedures relating to the processing of revocation of withdrawals and relating to the relinquishment of reserved Federal land areas are not included in this part.

#### § 2300.0-3 Authority.

(a)(1) Section 204 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1714) gives the Secretary of the Interior general authority to make, modify, extend or revoke withdrawals,

but only in accordance with the provisions and limitations of that section. Among other limitations, the Federal Land Policy and Management Act of 1976 provides that the Secretary of the Interior does not have authority to:

(i) Make, modify or revoke any withdrawal created by an Act of Congress;

(ii) Make a withdrawal which can be made only by an Act of Congress;

(iii) Modify or revoke any withdrawal creating national monuments under the Act of June 8, 1906 (16 U.S.C. 431-433), sometimes referred to as the Antiquities Act;

(iv) Modify or revoke any withdrawal which added lands to the National Wildlife Refuge System prior to October 21, 1976, the date of approval of the Federal Land Policy and Management Act of 1976 or which thereafter adds lands to that System under the terms of that Act. In this connection, nothing in the Federal Land Policy and Management Act of 1976 is intended to modify or change any provision of the Act of February 27, 1976 (16 U.S.C. 668 dd(a)).

(2) Executive Order 10355 of May 26, 1952 (17 FR 4831), confers on the Secretary of the Interior all of the delegable authority of the President to make, modify and revoke withdrawals and reservations with respect to lands of the public domain and other lands owned and controlled by the United States in the continental United States or Alaska.

(3) The Act of February 28, 1958 (43 U.S.C. 155-158), sometimes referred to as the Engle Act, places on the Secretary of the Interior the responsibility to process Department of Defense applications for national defense withdrawals, reservations or restrictions aggregating 5,000 acres or more for any one project or facility. These withdrawals, reservations or restrictions may only be made by an act of Congress, except in time of war or national emergency declared by the President or the Congress and except as otherwise expressly provided in the Act of February 28, 1958.

(4) Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)) authorizes the Secretary of the Interior to regulate the management of the public lands as defined in

the Act through instruments, such as memorandum of understanding, which the Secretary deems appropriate.

(5) Section 1326(a) of the Alaska National Interest Lands Conservation Act (Pub. L. 96-487), authorizes the President and the Secretary to make withdrawals exceeding 5,000 acres, in the aggregate, in the State of Alaska subject to the provisions that such withdrawals shall not become effective until notice is provided in the FEDERAL REGISTER and to both Houses of the Congress and such withdrawals shall terminate unless Congress passes a Joint Resolution of approval within one year after the notice of withdrawal has been submitted to the Congress.

(b) The following references do not afford either withdrawal application processing or withdrawal authority but are provided as background information.

(1) Executive Order 6910 of November 26, 1934, and E.O. 6964 of February 5, 1935, as modified, withdrew sizable portions of the public lands for classification and conservation. These lands and the grazing districts established under the Taylor Grazing Act of 1934, as amended, are subject to the classification and opening procedures of section 7 of the Taylor Grazing Act of June 28, 1934, as amended (43 U.S.C. 315f); however, they are not closed to the operation of the mining or mineral leasing laws unless separately withdrawn or reserved, classified for retention from disposal, or precluded from mineral leasing or mining location under other authority.

(2) The Classification and Multiple Use Act of September 19, 1964 (43 U.S.C. 1411-1418), authorized the Secretary of the Interior through the Bureau of Land Management for retention or disposal under Federal ownership and management. Numerous classification decisions based upon this statutory authority were made by the Secretary of the Interior. For the effect of these classification with regard to the disposal and leasing laws of the United States, see subparts 2440 and 2461 of this title.

(3) Section 202 of the Federal Land Policy and Management Act of 1976 (43

U.S.C. 1712) provides for land use planning and resultant management decisions which may operate to totally eliminate a particular land use, including one or more *principal or major uses*, as defined in the Act. Withdrawals made pursuant to section 204 of the Federal Land Policy and Management Act of 1976 may be used in appropriate cases, to carry out management decisions, except that *public lands*, as defined in the Act, can be removed from or restored to the operation of the Mining Law of 1872, as amended, or transferred to another department, agency or office, only by withdrawal action pursuant to section 204 of the Federal Land Policy and Management Act of 1976 or other action pursuant to applicable law.

(4) The first proviso of section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)) provides, in part, that unless otherwise provided for by law, the Secretary of the Interior may permit Federal departments and agencies to use, occupy and develop public lands *only* through rights-of-way under section 507 of the Act (43 U.S.C. 1767); withdrawals under section 204 of the Act (43 U.S.C. 1714); and, where the proposed use and development are similar or closely related to the programs of the Secretary for the public lands involved, cooperative agreements under section 307(b) of the Act (43 U.S.C. 1737(b)).

(5) Section 701(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 note) provides that all withdrawals, reservations, classifications and designations in effect on October 21, 1976, the effective date of the Act, shall remain in full force and effect until modified under the provisions of the Act or other applicable law.

**§ 2300.0-5 Definitions.**

As used in this part, the term:

(a) *Secretary* means the Secretary of the Interior or a secretarial officer subordinate to the Secretary who has been appointed by the President by and with the advice and consent of the Senate and to whom has been delegated the authority of the Secretary to perform the duties described in this part to be performed by the *Secretary*.

(b) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this part to be performed by the *authorized officer*.

(c) *Act* means the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1701 *et seq.*), unless otherwise specified.

(d) *Lands* includes both upland and submerged land areas and any right or interest in such areas. To the extent provided in section 1 of the Act of February 28, 1958 (43 U.S.C. 155), the term also includes offshore waters.

(e) *Cultural resources* means those fragile and nonrenewable physical remains of human activity found in districts, sites, structures, burial mounds, petroglyphs, artifacts, objects, ruins, works of art, architecture or natural settings or features which were important to prehistoric, historic or other land and resource use events.

(f) *Archeological areas/resources* means sites or areas containing important evidence or the physical remains of former but now extinct cultural groups, their skeletons, settlements, implements, artifacts, monuments and inscriptions.

(g) *Resource use* means a land use having as its primary objective the preservation, conservation, enhancement or development of:

(1) Any renewable or nonrenewable natural resource indigenous to a particular land area, including, but not limited to, mineral, timber, forage, water, fish or wildlife resources, or

(2) Any resource value associated with a particular land area, including, but not limited to, watershed, power, scenic, wilderness, clean air or recreational values. The term does not include military or other governmental activities requiring land sites only as an incidental means to achieving an end not related primarily to the preservation, conservation, enhancement or development of natural resources or resource values indigenous to or associated with a particular land area.

(h) *Withdrawal* means withholding an area of Federal land from settlement, sale, location, or entry under some or all of the general land laws, for the purpose of limiting activities under

those laws in order to maintain other public values in the area or reserving the area for a particular public purpose or program; or transferring jurisdiction over an area of Federal land, other than *property* governed by the Federal Property and Administrative Services Act (40 U.S.C. 472), from one department, bureau or agency to another department, bureau or agency.

(i) *Department* means a unit of the Executive branch of the Federal Government which is headed by a member of the President's Cabinet.

(j) *Agency* means a unit of the Executive branch of the Federal Government which is not within a Department.

(k) *Office* means an office or bureau of the Department of the Interior.

(l) *Applicant* means any Federal department, agency or office.

(m) *Segregation* means the removal for a limited period, subject to valid existing rights, of a specified area of the public lands from the operation of the public land laws, including the mining laws, pursuant to the exercise by the Secretary of regulatory authority to allow for the orderly administration of the public lands.

(n) *Legal description* means a written land description based upon either an approved and filed Federal land survey executed as a part of the United States Public Land Survey System or, where specifically authorized under Federal law, upon a protraction diagram. In the absence of the foregoing, the term means a written description, approved by the authorized officer, which defines the exterior boundaries of a tract of land by reference to a metes and bounds survey or natural or other monuments.

(o) *Modify* or *modification* does not include, for the purposes of section 204 of the Act (43 U.S.C. 1714), the addition of lands to an existing withdrawal or the partial revocation of a withdrawal.

(p) *Withdrawal petition* means a request, originated within the Department of the Interior and submitted to the Secretary, to file an application for withdrawal.

(q) *Withdrawal proposal* means a withdrawal petition approved by the Secretary.

## Subpart 2310—Withdrawals, General: Procedure

### § 2310.1 Procedures: General.

(a) The basic steps leading up to the making, modification or extension of a withdrawal, except emergency withdrawals, are:

(1) Preapplication consultation;  
(2) Obtaining Secretarial approval of a withdrawal petition in appropriate cases;

(3) Submission for filing of an application for a requested withdrawal action;

(4) Publication in the FEDERAL REGISTER of a notice stating that a withdrawal proposal has been made or that an application has been submitted for filing.

(5) Negotiations between the applicant and the authorized officer as well as the accomplishment of investigations, studies and analyses which may be required to process an application.

(6) Preparation of the case file to be considered by the Secretary, including the authorized officer's findings and recommendations;

(7) Transmittal of the case file to the Director, Bureau of Land Management, for the Director's review and decision regarding the findings and recommendations of the authorized officer;

(8) Transmittal of the case file to the Secretary.

(9) Publication of a public land order or a notice of denial signed by the Secretary. If the application seeks a national defense withdrawal that may only be made by an Act of Congress, the Secretary will transmit to the Congress proposed legislation along with the Secretary's recommendations, and documentation relating thereto.

### § 2310.1-1 Preapplication consultation.

A potential applicant should contact the appropriate State office of the Bureau of Land Management well in advance of the anticipated submission date of an application. Early consultation can familiarize the potential applicant with the responsibilities of an applicant, the authorized officer and the Secretary. Early consultation also will assist in determining the need for

## § 2310.1-2

## 43 CFR Ch. II (10-1-08 Edition)

a withdrawal, taking possible alternatives into account, increase the likelihood that the applicant's needs will be considered in ongoing land use planning, assist in determining the extent to which any public lands that may be involved would have to be segregated if an application is submitted; and result in preliminary determinations regarding the scheduling of various investigations, studies, analyses, public meetings and negotiations that may be required for a withdrawal. Studies and analyses should be programmed to ensure their completion in sufficient time to allow the Secretary or the Congress adequate time to act on the application before the expiration of the segregation period.

### § 2310.1-2 Submission of applications.

(a) Applications for the making, modification or extension of a withdrawal shall be submitted for filing, in duplicate, in the proper Bureau of Land Management office, as set forth in § 1821.2-1 of this title, except for emergency withdrawal requests and applications that are classified for national security reasons. Requests for emergency withdrawals and applications that are classified for national security reasons shall be submitted, in duplicate, in the Office of the Secretary, Department of the Interior, Washington, D.C. 20240.

(b) Before the authorized officer can take action on a withdrawal proposal, a withdrawal application in support thereof shall be submitted. The application may be submitted simultaneously with the making of a withdrawal proposal, in which case only the notice required by § 2310.3-1(a) of this title, referencing both the application and the withdrawal proposal, shall be published.

(c) No specific form is required, but, except as otherwise provided in § 2310.3-6(b) of this title, the application shall contain at least the following information:

(1) The name and address of the applicant. Where the organization intending to use the lands is different from the applicant, the name and address of such using agency shall also be included.

(2) If the applicant is a department or agency other than the Department of

the Interior or an office thereof, a statement of the delegation or delegations of authority of the official acting on behalf of the department or agency submitting the application, substantiating that the official is empowered to act on behalf of the head of the department or agency in connection with all matters pertaining to the application.

(3) If the lands which are subject to an application are wholly or partially under the administration of any department or agency other than the Department of the Interior, the Secretary shall make or modify a withdrawal only with the consent of the head of the department or agency concerned, except in the case of an emergency withdrawal. In such case, a copy of the written consent shall accompany the application. The requirements of section (e) of E.O. 10355 (17 FR 4831), shall be complied with in those instances where the Order applies.

(4) The type of withdrawal action that is being requested (See § 2300.0-5(h) of this title) and whether the application pertains to the making, extension or modification of a withdrawal.

(5) A description of the lands involved in the application, which shall consist of the following:

(i) A legal description of the entire land area that falls within the exterior boundaries of the affected area and the total acreage of such lands;

(ii) A legal description of the lands, Federal or otherwise, within the exterior boundaries that are to be excepted from the requested action, and after deducting the total acreage of all the excepted lands, the net remaining acreage of all Federal lands (as well as all non-Federal lands which, if they should be returned to or should pass to Federal ownership, would become subject to the withdrawal) within the exterior boundaries of the affected land areas;

(iii) In the case of a national defense withdrawal which can only be made by an Act of Congress, sections 3(2) and 3(3) of the Act of February 28, 1958 (43 U.S.C. 157 (2), (3)) shall be complied with in lieu of paragraphs (c)(5) (i) and (ii) of this section.

(6) If the application is for a withdrawal that would overlap, or that

## Bureau of Land Management, Interior

## § 2310.1-3

would add lands to one or more existing withdrawals, the application shall also contain:

(i) An identification of each of the existing withdrawals, including the project name, if any, the date of the withdrawal order, the number and type of order, if known, or, in lieu of the foregoing, a copy of the order;

(ii) As to each existing withdrawal that would be overlapped by the requested withdrawal, the total area and a legal description of the area that would be overlapped; and

(iii) The total acreage, Federal or otherwise, that would be added to the existing withdrawal, if the new application is allowed.

(7) The public purpose or statutory program for which the lands would be withdrawn. If the purpose or program for which the lands would be withdrawn is classified for national security reasons, a statement to that effect shall be included; but, if at all possible, a general description of the use to which the lands would be devoted, if the requested withdrawal is allowed, should be included. In the case of applications that are not classified for national security reasons, an analysis of the manner in which the lands as well as their natural resources and resource values would be used to implement the purpose or program shall be provided.

(8) The extent to which the lands embraced in the application are requested to be withheld from settlement, sale, location or entry under the public land laws, including the mining laws, together with the extent to which, and the time during which, the lands involved in the application would be temporarily segregated in accordance with § 2310.2 of this subpart.

(9) The type of temporary land use that, at the discretion of the authorized officer, may be permitted or allowed during the segregation period, in accordance with § 2310.2 of this subpart.

(10) An analysis and explanation of why neither a right-of-way under section 507 of the Act (43 U.S.C. 1767), nor a cooperative agreement under sections 302(b) (43 U.S.C. 1732(b)) and 307(b) (43 U.S.C. 1737(b)) of the act would adequately provide for the proposed use.

(11) The duration of the withdrawal, with a statement in justification there-

of (see § 2310.3-4 of this title). Where an extension of an existing withdrawal is requested, its duration may not exceed the duration of the existing withdrawal.

(12) A statement as to whether any suitable alternative sites are available for the proposed use or for uses which the requested withdrawal action would displace. The statement shall include a study comparing the projected costs of obtaining each alternative site in suitable condition for the intended use, as well as the projected costs of obtaining and developing each alternative site for uses that the requested withdrawal action would displace.

(13) A statement as to whether water will or will not be needed to fulfill the purpose of the requested withdrawal action.

(14) The place where records relating to the application can be examined by interested persons.

(d) Except in the case of an emergency withdrawal, if the preceding application requirements have not been met, or if an application seeks an action that is not within the scope of the Secretary's authority, the application may be rejected by the authorized officer as a defective application.

### § 2310.1-3 Submission of withdrawal petitions.

(a) Withdrawal petitions shall be submitted to the Director, Bureau of Land Management, for transmittal to the Secretary.

(b) No specific form is required, but the petition shall contain at least the following information:

(1) The office originating the petition;

(2) The type and purpose of the proposed withdrawal action (See § 2300.0-5(h) of this title) and whether the petition pertains to the making, extension or modification of a withdrawal;

(3) A legal description of the entire land area that falls within the exterior boundaries affected by the petition, together with the total acreage of such lands, and a map of the area;

(4) The extent to which and the time during which any public lands that may be involved in the petition would

#### § 2310.1-4

#### 43 CFR Ch. II (10-1-08 Edition)

be temporarily segregated and the temporary land uses that may be permitted during the segregation period, in accordance with § 2310.2 of this title; and

(5) A preliminary identification of the mineral resources in the area.

(c) Except in the case of petitions seeking emergency withdrawals, if a petition is submitted simultaneously with a withdrawal application, the information requirements pertaining to withdrawal applications (See § 2310.1-2 of this title), shall supersede the requirements of this section.

(d) If a petition seeks an emergency withdrawal under the provisions of section 204(e) of the act, the petition shall be filed simultaneously with an application for withdrawal. In such instances, the petition/application shall provide as much of the information required by §§ 2310.1-2(c) and 2310.3-2(b) of this title as is available to the petitioner when the petition is submitted.

(e) Upon the approval by the Secretary of a petition for withdrawal, the petition shall be considered as a Secretarial proposal for withdrawal, and notice of the withdrawal proposal shall be published immediately in the FEDERAL REGISTER in accordance with § 2310.3-1(a) of this title. If a petition which seeks an emergency withdrawal is approved by the Secretary, the publication and notice provisions pertaining to emergency withdrawals shall be applicable. (See § 2310.5 of this title.)

#### § 2310.1-4 Cancellation of withdrawal applications or withdrawal proposals and denial of applications.

(a) Withdrawal or extension applications and proposals shall be amended promptly to cancel the application or proposal, in whole or in part, with respect to any lands which the applicant, in the case of applications, or the office, in the case of proposals, determines are no longer needed in connection with a requested or proposed action. The filing of a cancellation notice in each such case shall result in the termination of the segregation of the public lands that are to be eliminated from the withdrawal application or withdrawal proposal. (See § 2310.2-1 of this title)

(b) The Secretary may deny an application if the costs (as defined in section 304(b) of the Act (43 U.S.C. 1734(b)) estimated to be incurred by the Department of the Interior would, in the judgment of the Secretary, be excessive in relation to available funds appropriated for processing applications requesting a discretionary withdrawal, or a modification or extension of a withdrawal.

#### § 2310.2 Segregative effect of withdrawal applications or withdrawal proposals.

The following provisions apply only to applications or proposals to withdraw lands and not to applications or proposals seeking to modify or extend withdrawals.

(a) *Withdrawal applications or withdrawal proposals submitted on or after October 21, 1976.* Within 30 days of the submission for filing of a withdrawal application, or whenever a withdrawal proposal is made, a notice stating that the application has been submitted or that the proposal has been made, shall be published in the FEDERAL REGISTER by the authorized officer. Publication of the notice in the FEDERAL REGISTER shall segregate the lands described in the application or proposal from settlement, sale, location or entry under the public land laws, including the mining laws, to the extent specified in the notice, for 2 years from the date of publication of the notice unless the segregative effect is terminated sooner in accordance with the provisions of this part. The notices published pursuant to the provisions of this section shall be the same notices required by § 2310.3-1 of this title. Publication of a notice of a withdrawal application that is based on a prior withdrawal proposal, notice of which was published in the FEDERAL REGISTER, shall not operate to extend the segregation period which commenced upon the publication of the prior withdrawal proposal.

(b) *Withdrawal applications submitted before October 21, 1976.* The public lands described in a withdrawal application filed before October 21, 1976, shall remain segregated through October 20, 1991, from settlement, sale, location or entry under the public land laws, including the mining laws, to the extent

specified in the FEDERAL REGISTER notice or notices that pertain to the application, unless the segregative effect of the application is terminated sooner in accordance with other provisions of this part. Any amendment made on or after October 21, 1976, of a withdrawal application submitted before October 21, 1976, for the purpose of adding Federal lands to the lands described in a previous application, shall require the publication in the FEDERAL REGISTER, within 30 days of receipt of the amended application, of a notice of the amendment of the withdrawal application. All of the lands described in the amended application which includes those lands described in the original application shall be segregated for 2 years from the date of publication of the notice of the amended application in the FEDERAL REGISTER.

(c) Applications for licenses, permits, cooperative agreements or other discretionary land use authorizations of a temporary nature that are filed on or after October 21, 1976, regarding lands involved in a withdrawal application or a withdrawal proposal and that are listed in the notices required by § 2310.3-2 of this title as permissible during the segregation period, may be approved by the authorized officer while the lands remain segregated.

(d) Except as provided in paragraph (c) of this section, applications for the use of lands involved in a withdrawal application or a withdrawal proposal, the allowance of which is discretionary, shall be denied.

(e) The temporary segregation of lands in connection with a withdrawal application or a withdrawal proposal shall not affect in any respect Federal agency administrative jurisdiction of the lands, and the segregation shall not have the effect of authorizing or permitting any use of the lands by the applicant or using agency.

**§ 2310.2-1 Termination of the segregative effect of withdrawal applications or withdrawal proposals.**

(a) The publication in the FEDERAL REGISTER of an order allowing a withdrawal application, in whole or in part, shall terminate the segregative effect of the application as to those lands withdrawn by the order.

(b) The denial of a withdrawal application, in whole or in part, shall result in the termination of the segregative effect of the application or proposal as to those lands where the withdrawal is disallowed. Within 30 days following the decision to disallow the application or proposal, in whole or in part, the authorized officer shall publish a notice in the FEDERAL REGISTER specifying the reasons for the denial and the date that the segregative period terminated. The termination date of the segregation period shall be noted promptly on the public land status records on or before the termination date.

(c) The cancellation, in whole or in part, of a withdrawal application or a withdrawal proposal shall result in the termination of the segregative effect of the application or proposal, as to those lands deleted from the application or proposal. The authorized officer shall publish a notice in the FEDERAL REGISTER, within 30 days following the date of receipt of the cancellation, specifying the date that the segregation terminated. The termination date of the segregation shall be noted promptly on the public land status records. If the cancellation applies to only a portion of the public lands that are described in the withdrawal application or withdrawal proposal, then the lands that are not affected by the cancellation shall remain segregated.

(d) The segregative effect resulting from the publication on or after October 21, 1976, of a FEDERAL REGISTER notice of the submission of a withdrawal application or the making of a withdrawal proposal shall terminate 2 years after the publication date of the FEDERAL REGISTER notice unless the segregation is terminated sooner by other provisions of this section. A notice specifying the date and time of termination shall be published in the FEDERAL REGISTER by the authorized officer 30 days in advance of the termination date. The public land status records shall be noted as to the termination date of the segregation period on or before the termination date. Such a termination shall not affect the processing of the withdrawal application.

(e) The segregative effect resulting from the submission of a withdrawal

### § 2310.3

### 43 CFR Ch. II (10–1–08 Edition)

application or withdrawal proposal before October 21, 1976, shall terminate on October 20, 1991, unless the segregation is terminated sooner by other provisions of this part. A notice specifying the date and time of termination shall be published in the FEDERAL REGISTER by the authorized officer 30 days in advance of October 20, 1991. The public land status records shall be noted as to the termination date of the segregation period on or before October 20, 1991.

#### **§ 2310.3 Action on withdrawal applications and withdrawal proposals, except for emergency withdrawals.**

##### **§ 2310.3–1 Publication and public meeting requirements.**

(a) When a withdrawal proposal is made, a notice to that effect shall be published immediately in the FEDERAL REGISTER. The notice shall contain the information required by § 2310.1–3 of this title. In the event a withdrawal petition, which subsequently becomes a withdrawal proposal, is submitted simultaneously with a withdrawal application, the information requirements for notices pertaining to withdrawal applications (See paragraph (b) of this section) shall supersede the information requirements of this paragraph. However, in such instances, the notice required by paragraph (b) of this section shall be published immediately without regard to the 30-day period allowed for the filing for publication in the FEDERAL REGISTER of withdrawal application notices.

(b)(1) Except for emergency withdrawals and except as otherwise provided in paragraph (a) of this section, within 30 days of the submission for filing of a withdrawal, extension or modification application, the authorized officer shall publish in the FEDERAL REGISTER a notice to that effect. The authorized officer also shall publish the same notice in at least one newspaper having a general circulation in the vicinity of the lands involved and, with the cooperation and assistance of the applicant, when appropriate, shall provide sufficient publicity to inform the interested public of the requested action.

(2) The notice shall contain, in summary form, the information required by § 2310.1–2 of this title, except that

the authorized officer may exclude the information required by § 2310.1–2(c)(2) of this title, and as much of the descriptive information required by § 2310.1–2(c) (5) and (6) of this title as the authorized officer considers appropriate. The notice shall:

(i) Provide a legal description of the lands affected by the application, together with the total acreage of such lands;

(ii) Specify the extent to which and the time during which any lands that may be involved may be segregated in accordance with § 2310.2 of this title;

(iii) Identify the temporary land uses that may be permitted or allowed during the segregation period as provided for in § 2310.2(c) of this title;

(iv) Provide for a suitable period of at least 90 days after publication of the notice, for public comment on the requested action;

(v) Solicit written comments from the public as to the requested action and provide for one or more public meetings in relation to requested actions involving 5,000 or more acres in the aggregate and, as to requested actions involving less than 5,000 acres, solicit and evaluate the written comments of the public as to the requested action and as to the need for public meetings;

(vi) State, in the case of a national defense withdrawal which can only be made by an Act of Congress, that if the withdrawal is to be made, it will be made by an Act of Congress;

(vii) Provide the address of the Bureau of Land Management office in which the application and the case file pertaining to it are available for public inspection and to which the written comments of the public should be sent;

(viii) State that the application will be processed in accordance with the regulations set forth in part 2300 of this title;

(ix) Reference, if appropriate, the FEDERAL REGISTER in which the notice of a withdrawal proposal, if any, pertaining to the application was published previously;

(x) Provide such additional information as the authorized officer deems necessary or appropriate.

(c)(1) In determining whether a public meeting will be held on applications

## Bureau of Land Management, Interior

## §2310.3-2

involving less than 5,000 acres of land, the authorized officer shall consider whether or not:

(i) A large number of persons have expressed objections to or suggestions regarding the requested action;

(ii) The objections or suggestions expressed appear to have merit without regard to the number of persons responding;

(iii) A public meeting can effectively develop information which would otherwise be difficult or costly to accumulate;

(iv) The requested action, because of the amount of acreage involved, the location of the affected lands or other relevant factors, would have an important effect on the public, as for example, the national or regional economy;

(v) There is an appreciable public interest in the lands or their use, as indicated by the records of the Bureau of Land Management;

(vi) There is prevailing public opinion in the area that favors public meetings or shows particular concern over withdrawal actions; and

(vii) The applicant has requested a public meeting.

(2) A public meeting, whether required or determined by the authorized officer to be necessary, shall be held at a time and place convenient to the interested public, the applicant and the authorized officer. A notice stating the time and place of the meeting, shall be published in the FEDERAL REGISTER and in at least one newspaper having a general circulation in the vicinity of lands involved in the requested action, at least 30 days before the scheduled date of the meeting.

### **§2310.3-2 Development and processing of the case file for submission to the Secretary.**

(a) Except as otherwise provided in §2310.3-6(b) of this title, the information, studies, analyses and reports identified in this paragraph that are required by applicable statutes, or which the authorized officer determines to be required for the Secretary or the Congress to make a decision or recommendation on a requested withdrawal, shall be provided by the applicant. The authorized officer shall assist the applicant to the extent the author-

ized officer considers it necessary or appropriate to do so. The qualifications of all specialists utilized by either the authorized officer or the applicant to prepare the information, studies, analyses and reports shall be provided.

(b) The information, studies, analyses and reports which, as appropriate, shall be provided by the applicant shall include:

(1) A report identifying the present users of the lands involved, explaining how the users will be affected by the proposed use and analyzing the manner in which existing and potential resource uses are incompatible with or conflict with the proposed use of the lands and resources that would be affected by the requested action. The report shall also specify the provisions that are to be made for, and an economic analysis of, the continuation, alteration or termination of existing uses. If the provisions of §2310.3-5 of this title are applicable to the proposed withdrawal, the applicant shall also furnish a certification that the requirements of that section shall be satisfied promptly if the withdrawal is allowed or authorized.

(2) If the application states that the use of water in any State will be necessary to fulfill the purposes of the requested withdrawal, extension or modification, a report specifying that the applicant or using agency has acquired, or proposes to acquire, rights to the use of the water in conformity with applicable State laws and procedures relating to the control, appropriation, use and distribution of water, or whether the withdrawal is intended to reserve, pursuant to Federal law, sufficient unappropriated water to fulfill the purposes of the withdrawal. Water shall be reserved pursuant to Federal law for use in carrying out the purposes of the withdrawal only if specifically so stated in the relevant withdrawal order, as provided in §2310.3-3(b) of this title and only to the extent needed for the purpose or purposes of the withdrawal as expressed in the withdrawal order. The applicant shall also provide proof of notification of the involved State's department of water resources when a land use needed to carry out the purposes of the requested withdrawal will involve utilization of

the water resources in a State. As a condition to the allowance of an order reserving water, the applicant shall certify to the Secretary that it shall quantify the amount of water to be reserved by the order.

(3) An environmental assessment, an environmental impact statement or any other documents as are needed to meet the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), and the regulations applicable thereto. The authorized officer shall participate in the development of environmental assessments or impact statements. The applicant shall designate the Bureau of Land Management as a cooperating agency and shall comply with the requirements of the regulations of the Council on Environmental Quality. The Bureau of Land Management shall, at a minimum, independently evaluate and review the final product. The following items shall either be included in the assessment or impact statement, or they may be submitted separately, with appropriate cross references.

(i) A report on the identification of cultural resources prepared in accordance with the requirements of 36 CFR part 800, and other applicable regulations.

(ii) An identification of the roadless areas or roadless islands having wilderness characteristics, as described in the Wilderness Act of 1964 (16 U.S.C. 1131, *et seq.*), which exist within the area covered by the requested withdrawal action.

(iii) A mineral resource analysis prepared by a qualified mining engineer, engineering geologist or geologist which shall include, but shall not be limited to, information on: General geology, known mineral deposits, past and present mineral production, mining claims, mineral leases, evaluation of future mineral potential and present and potential market demands.

(iv) A biological assessment of any listed or proposed endangered or threatened species, and their critical habitat, which may occur on or in the vicinity of the involved lands, prepared in accordance with the provisions of section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1536), and regulations applicable thereto, if

the Secretary determines that assessment is required by law.

(v) An analysis of the economic impact of the proposed uses and changes in use associated with the requested action on individuals, local communities, State and local government interests, the regional economy and the Nation as a whole.

(vi) A statement as to the extent and manner in which the public participated in the environmental review process.

(4) A statement with specific supporting data, as to:

(i) Whether the lands involved are floodplains or are considered wetlands; and

(ii) Whether the existing and proposed uses would affect or be affected by such floodplains or wetlands and, if so, to what degree and in what manner. The statement shall indicate whether, if the requested action is allowed, it will comply with the provisions of Executive Orders 11988 and 11990 of May 24, 1977 (42 FR 26951; 26961).

(5) A statement of the consultation which has been or will be conducted with other Federal departments or agencies; with regional, State and local Government bodies; and with individuals and nongovernmental groups regarding the requested action.

(c) Prior to final action being taken in connection with an application, the applicant shall prepare, with the guidance and participation of the authorized officer, and subject to the approval of the authorized officer, the Secretary and other affected departments, agencies or offices, a resource management plan and implementation program regarding the use and management of any public lands with their related resources uses. Consideration shall be given to the impact of the proposed reservation on access to and the use of the land areas that are located in the vicinity of the lands proposed to be withdrawn. Where appropriate, the plan and program will be implemented by means of a memorandum of understanding between the affected agencies. Any allocation of jurisdiction between the agencies shall be effected in the public land order or legislation. In those cases where the Secretary, acting

## Bureau of Land Management, Interior

## §2310.3-3

through the Bureau of Land Management, would continue to exercise partial jurisdiction, resource management of withdrawn areas may be governed by the issuance of management decisions by the Bureau of Land Management to implement land use plans developed or revised under the land use planning requirements of section 202 of the Act (43 U.S.C. 1712).

(d) In regard to national defense withdrawals that can only be made by an Act of Congress, and to the extent that they are not otherwise satisfied by the information, studies, analyses and reports provided in accordance with the provisions of this section, the provisions of section 3(7) of the Act of February 28, 1958 (43 U.S.C. 157(7)), shall be complied with.

(e) The authorized officer shall develop preliminary findings and recommendations to be submitted to the Secretary, advise the applicant of the findings and recommendations, and provide the applicant an opportunity to discuss any objections thereto which the applicant may have.

(f) Following the discussion process, or in the absence thereof, the authorized officer shall prepare the findings, keyed specifically to the relevant portions of the case file, and the recommendations to the Secretary in connection with the application. The authorized officer also shall prepare, for consideration by the Secretary, a proposed order or notice of denial. In the case of a national defense withdrawal which can only be made by an Act of Congress, the authorized officer shall prepare, with the cooperation of the applicant, a draft legislative proposal to implement the applicant's withdrawal request, together with proposed recommendations for submission by the Secretary to the Congress. The findings and recommendations of the authorized officer, and the other documents previously specified in this section to be prepared by the authorized officer shall be made a part of the case file. The case file shall then be sent to the Director, Bureau of Land Management. At the same time, a copy of the findings and recommendations of the authorized officer shall be sent to the applicant.

(1) If the applicant objects to the authorized officer's findings and recommendations to the Secretary, the applicant may, within 30 days of the receipt by the applicant of notification thereof, state its objections in writing and request the Director to review the authorized officer's findings and recommendations. The applicant shall be advised of the Director's decision within 30 days of receipt of the applicant's statement of objections in the Bureau of Land Management's Washington office. The applicant's statement of objections and the Director's decision shall be made a part of the case file and thereafter the case file shall be submitted to the Secretary.

(2) If the applicant disagrees with the decision of the Director, Bureau of Land Management, the applicant may, within 30 days of receipt by the applicant of the Director's decision, submit to the Secretary a statement of reasons for disagreement. The statement shall be considered by the Secretary together with the findings and recommendations of the authorized officer, the applicant's statement of objections, the decision of the Director, the balance of the case file and such additional information as the Secretary may request.

### **§2310.3-3 Action by the Secretary: Public land orders and notices of denial.**

(a) Except for national defense withdrawals which can only be made by an Act of Congress, and except as may be otherwise provided in section 1(d) of Executive Order 10355 (17 FR 4833), for applications that are subject to that order, the allowance or denial, in whole or in part, of a withdrawal, modification or extension application, may only be made by the Secretary.

(b)(1) Before the allowance of an application, in whole or in part, the Secretary shall first approve all applicable memoranda of understanding and the applicant shall make all certifications required in this part. When an application has been finally allowed, in whole or in part, by the Secretary, an order to that effect shall be published promptly in the FEDERAL REGISTER. Each order shall be designated as, and shall be signed by the Secretary and

issued in the form of, a *public land order*. Water shall be reserved pursuant to Federal law for use in carrying out the purposes of the withdrawal only if specifically so stated in the relevant public land order. In appropriate cases, the public land order also shall refer to the memorandum of understanding discussed in § 2310.3-2(c) of this title and shall be drawn to comply with § 2310.3-6 of this title.

(2) On the same day an order withdrawing 5,000 or more acres in the aggregate is signed, the Secretary shall advise, in writing, each House of the Congress, or in the case of an emergency withdrawal, the appropriate Committee of each House, of the withdrawal action taken. Pursuant to the Secretary's authority under the act, the notices that are sent to the Congress shall be accompanied by the information required by section 204(c)(2) of the Act (43 U.S.C. 1714(c)(2)), except in the case of an emergency withdrawal, transmittal of the required information may be delayed as provided in § 2310.5(c) of this title.

(c) When the action sought in an application involves the exercise by the Secretary of authority delegated by Executive Order 10355 (17 FR 4831) and the Secretary denies the application in whole or in part, the applicant shall be notified of the reasons for the Secretary's decision. The decision shall be subject to further consideration only if the applicant informs the Secretary, in writing, within 15 days of the receipt by the applicant of the Secretary's decision, that the applicant has submitted the matter to the Office of Management and Budget for consideration and adjustment, as provided for in section 1(d) of the Executive Order.

(d) A withdrawal application shall be denied, if, in the opinion of the Secretary, the applicant is attempting to circumvent the Congressional review provisions of section 204(c)(1) of the Act (43 U.S.C. 1714(c)(1)) concerning withdrawals of 5,000 or more acres in the aggregate.

(e) When an application is denied in its entirety by the Secretary, a notice to that effect, signed by the Secretary, shall be published promptly in the FEDERAL REGISTER.

(f) In the case of a national defense withdrawal that may only be made by an Act of Congress, the Secretary shall transmit to the Congress proposed legislation effecting the withdrawal requested, together with the recommendations of the Secretary which may or may not support the proposed legislation in whole or in part. The proposed legislation shall contain such provisions for continued operation of the public land laws as to the public land areas included in the requested withdrawal as shall be determined by the Secretary to be compatible with the intended military use.

#### § 2310.3-4 Duration of withdrawals.

(a) An order initially withdrawing 5,000 or more acres of land in the aggregate, on the basis of the Secretary's authority under section 204 of the Act (43 U.S.C. 1714), may be made for a period not to exceed 20 years from the date the order is signed, except that withdrawals exceeding 5,000 acres in the State of Alaska shall not become effective until notice is provided in the FEDERAL REGISTER and to both Houses of Congress. All orders withdrawing 5,000 or more acres in the aggregate shall be subject to the Congressional review provision of section 204(c) of the Act (43 U.S.C. 1714(c)), except as follows:

(1) A National Wildlife Refuge System withdrawal may not be terminated as provided in section 204(c)(1) of the Act (43 U.S.C. 1714(c)(1)) other than by an Act of Congress; or

(2) A withdrawal exceeding 5,000 acres in the State of Alaska shall terminate unless Congress passes a Joint Resolution of approval within 1 year after the notice of such withdrawal has been submitted to the Congress.

(b) An order initially withdrawing less than 5,000 acres of land, in the aggregate, on the basis of the Secretary's authority under section 204 of the Act (43 U.S.C. 1714), may be made:

(1) For such time as the Secretary determines desirable for a resource use;

(2) For not more than 20 years for any other use, including, but not limited to, the use of lands for non-resource uses, related administrative sites and facilities or for other proprietary purposes; or

## Bureau of Land Management, Interior

## § 2310.5

(3) For not more than 5 years to preserve the lands for a specific use then under consideration by either House of Congress.

(c) An order withdrawing lands on the basis of an emergency as provided for in section 204(e) of the Act (43 U.S.C. 1714(e)) may be made for not more than 3 years.

(d) Except for emergency withdrawals, withdrawals of specific duration may be extended, as provided for in § 2310.4 of this title.

### § 2310.3-5 Compensation for improvements.

(a) When an application is allowed, the applicant shall compensate the holder of record of each permit, license or lease lawfully terminated or revoked after the allowance of an application, for all authorized improvements placed on the lands under the terms and conditions of the permit, license or lease, before the lands were segregated or withdrawn. The amount of such compensation shall be determined by an appraisal as of the date of revocation or termination of the permit, license or lease, but shall not exceed fair market value. To the extent such improvements were constructed with Federal funds, they shall not be compensable unless the United States has been reimbursed for such funds prior to the allowance of the application and then only to the extent of the sum that the United States has received.

(b) When an application is allowed that affects public lands which are subject to permits or leases for the grazing of domestic livestock and that is required to be terminated, the applicant shall comply with the cancellation notice and compensation requirements of section 402(g) of the Act (43 U.S.C. 1752(g)), to the extent applicable.

### § 2310.3-6 Transfer of jurisdiction.

A public land order that reserves lands for a department, agency or office, shall specify the extent to which jurisdiction over the lands and their related resource uses will be exercised by that department, agency or office. (See § 2310.3-2(c) of this title).

### § 2310.4 Review and extensions of withdrawals.

(a) Discretionary withdrawals of specific duration, whether made prior to or after October 21, 1976, shall be reviewed by the Secretary commencing at least 2 years before the expiration date of the withdrawal. When requested, the department, agency or office benefitting from the withdrawal shall promptly provide the Secretary with the information required by § 2310.1-2(c) of this title, and the information required by § 2310.3-2(b) of this title, in the form of a withdrawal extension application with supplemental information. If the concerned department, agency or office is delinquent in responding to such request, the delinquency shall constitute a ground for not extending the withdrawal. Such withdrawals may be extended or further extended only upon compliance with these regulations, and only if the Secretary determines that the purpose for which the withdrawal was first made requires the extension, and then only for a period that shall not exceed the duration of the original withdrawal period. In allowing an extension, the Secretary shall comply with the provisions of section 204(c) of the Act (43 U.S.C. 1714(c)), or section 204(d) of the Act (43 U.S.C. 1714(d)), whichever is applicable; and, whether or not an extension is allowed, the Secretary shall report promptly on the decision for each pending extension to the Congressional Committees that are specified in section 204(f) of the Act (43 U.S.C. 1714(f)).

(b) Notwithstanding the provisions of this section, if the Secretary determines that a National Wildlife Refuge System withdrawal of specific duration shall not be extended, the Secretary shall nevertheless extend or reextend the withdrawal until such time as the withdrawal is terminated by an Act of Congress.

### § 2310.5 Special action on emergency withdrawals.

(a) When the Secretary determines, or when either one of the two Committees of the Congress that are specified in section 204(e) of the Act (43 U.S.C. 1714(e)) notifies the Secretary, that an emergency exists and that extraordinary measures need to be taken to

protect natural resources or resource values that otherwise would be lost, the Secretary shall immediately make a withdrawal which shall be limited in its scope and duration to the emergency. An emergency withdrawal shall be effective when signed, shall not exceed 3 years in duration and may not be extended by the Secretary. If it is determined that the lands involved in an emergency withdrawal should continue to be withdrawn, a withdrawal application should be submitted to the Bureau of Land Management in keeping with the normal procedures for processing a withdrawal as provided for in this subpart. Such applications will be subject to the provisions of section 204(c) of the Act (43 U.S.C. 1714(c)), or section 204(d) of the Act (43 U.S.C. 1714(d)), whichever is applicable, as well as section 204(b)(1) of the Act (43 U.S.C. 1714(b)(1)).

(b) When an emergency withdrawal is signed, the Secretary shall on the same day, send a notice of the withdrawal to the two Committees of the Congress that are specified for that purpose in section 204(e) of the Act (43 U.S.C. 1714(e)).

(c) The Secretary shall forward a report to each of the aforementioned committees within 90 days after filing with them the notice of emergency withdrawal. Reports for all such withdrawals, regardless of the amount of acreage withdrawn, shall contain the information specified in section 204(c)(2) of the Act (43 U.S.C. 1714(c)(2)).

### **Subpart 2320—Federal Energy Regulatory Commission Withdrawals**

#### **§ 2320.0-3 Authority.**

(a) Section 24 of the Federal Power Act of June 10, 1920, as amended (16 U.S.C. 818), provides that any lands of the United States included in an application for power development under that Act shall, from the date of filing of an application therefor, be reserved from entry, location or other disposal under the laws of the United States until otherwise directed by the Federal Energy Regulatory Commission or by Congress. This statute also provides that whenever the Commission shall determine that the value of any lands

of the United States withdrawn or classified for power purposes shall not be injured or destroyed for such purposes by location, entry or selection under the public land laws, the Secretary of the Interior shall declare such lands open to location, entry or selection for such purposes under such restrictions as the Commission may determine are necessary, and subject to and with a reservation of the right of the United States or its permittees or licensees to enter upon, occupy and use any and all of the lands for power purposes. Before any lands are declared open to location, entry or selection, the Secretary shall give notice of his intention to make this declaration to the Governor of the State within which such lands are located, and the State shall have a preference for a period of 90 days from the date of this notice to file under any applicable law or regulation an application of the State, or any political subdivision thereof, for any lands required as a right-of-way for a public highway or as a source of materials for the construction and maintenance of such highways. The 90-day preference does not apply to lands which remain withdrawn for national forest or other purposes.

(b) The Mining Claims Rights Restoration Act of 1955 (30 U.S.C. 621 *et seq.*), opened public lands which were then, or thereafter, withdrawn or classified for power purposes, with specified exceptions, to mineral location and development under certain circumstances.

#### **§ 2320.1 Lands considered withdrawn or classified for power purposes.**

The following classes of lands of the United States are considered as withdrawn or classified for the purposes of section 24 of the Federal Power Act (16 U.S.C. 818): Lands withdrawn for powersite reserves under sections 1 and 2 of the Act of June 25, 1910, as amended (43 U.S.C. 141-148); lands included in an application for power development under the Federal Power Act (16 U.S.C. 818); lands classified for powersite purposes under the Act of March 3, 1879 (43 U.S.C. 31); lands designated as valuable for power purposes under the Act of June 25, 1910, as amended (43 U.S.C. 148); the Act of June 9, 1916 (39 Stat.

## Bureau of Land Management, Interior

## § 2361.0-2

218, 219), and the Act of February 26, 1919 (40 Stat. 1178, 1180); lands within final hydroelectric power permits under the Act of February 15, 1901 (43 U.S.C. 959); and lands within transmission line permits or approved rights-of-way under the aforementioned Act of February 15, 1901, or the Act of March 4, 1911 (43 U.S.C. 961).

### § 2320.2 General determinations under the Federal Power Act.

(a) On April 22, 1922, the Federal Power Commission (as predecessor to the Federal Energy Regulatory Commission) made a general determination "that where lands of the United States have heretofore been or hereafter may be reserved or classified as powersites, such reservation or classification being made solely because such lands are either occupied by power transmission lines or their occupancy and use for such purposes have been applied for or authorized under appropriate laws of the United States, and such lands have otherwise no value for power purposes, and are not occupied in trespass, the Commission determines that the value of such lands so reserved or classified or so applied for or authorized, shall not be injured or destroyed for the purposes of power development by location, entry or selection under the public land laws, subject to the reservation of section 24 of the Federal Power Act."

(b) The regulations governing mining locations on lands withdrawn or classified for power purposes, including lands that have been restored and opened to mining locations under section 24 of the Federal Power Act, are contained in subpart 3730 and in Group 3800 of this title.

### § 2320.3 Applications for restoration.

(a) Other than with respect to national forest lands, applications for restoration and opening of lands withdrawn or classified for power purposes under the provisions of section 24 of the Federal Power Act shall be filed, in duplicate, in the proper office of the Bureau of Land Management as set forth in § 2321.2-1 of this title. No particular form of application is required, but it shall be typewritten or in legible handwriting, and it shall contain the

information required by 18 CFR 25.1. Each application shall be accompanied by a service charge of \$10 which is not returnable.

(b) Favorable action upon an application for restoration shall not give the applicant any preference right when the lands are opened.

## PART 2360—NATIONAL PETROLEUM RESERVE IN ALASKA

### Subpart 2361—Management and Protection of the National Petroleum Reserve in Alaska

#### Sec.

- 2361.0-1 Purpose.
- 2361.0-2 Objectives.
- 2361.0-3 Authority.
- 2361.0-4 Responsibility.
- 2361.0-5 Definitions.
- 2361.0-6 [Reserved]
- 2361.0-7 Effect of law.
- 2361.1 Protection of the environment.
- 2361.2 Use authorizations.
- 2361.3 Unauthorized use and occupancy.

### Subpart 2361—Management and Protection of the National Petroleum Reserve in Alaska

SOURCE: 42 FR 28721, June 3, 1977, unless otherwise noted.

#### § 2361.0-1 Purpose.

The purpose of the regulations in this subpart is to provide procedures for the protection and control of environmental, fish and wildlife, and historical or scenic values in the National Petroleum Reserve in Alaska pursuant to the provisions of the Naval Petroleum Reserves Production Act of 1976 (90 Stat. 303; 42 U.S.C. 6501 *et seq.*).

#### § 2361.0-2 Objectives.

The objective of this subpart is to provide for the protection of the environmental, fish and wildlife, and historical or scenic values of the Reserve so that activities which are or might be detrimental to such values will be carefully controlled to the extent consistent with the requirements of the Act for petroleum exploration of the reserve.

### § 2361.0-3

#### § 2361.0-3 Authority.

The Naval Petroleum Reserve Production Act of 1976 (90 Stat. 303, 42 U.S.C. 6501, *et seq.*) is the statutory authority for these regulations.

#### § 2361.0-4 Responsibility.

(a) The Bureau of Land Management (BLM) is responsible for the surface management of the reserve and protection of the surface values from environmental degradation, and to prepare rules and regulations necessary to carry out surface management and protection duties.

(b) The U.S. Geological Survey is responsible for management of the continuing exploration program during the interim between the transfer of jurisdiction from the U.S. Navy to the U.S. Department of the Interior and the effective date of any legislation for a permanent development and production program to enforce regulations and stipulations which relate to the exploration of petroleum resources of the Reserve, and to operate the South Barrow gas field or such other fields as may be necessary to supply gas at reasonable and equitable rates to the Native village of Barrow and other communities and installations at or near Point Barrow, Alaska, and to installations of the Department of Defense and other agencies of the U.S. located at or near Point Barrow, Alaska.

#### § 2361.0-5 Definitions.

As used in this subpart, the following terms shall have the following meanings:

(a) *Act* means the Naval Petroleum Reserves Production Act of 1976 (90 Stat. 303, 42 U.S.C. 6501, *et seq.*).

(b) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties of this subpart.

(c) *Exploration* means activities conducted on the Reserve for the purpose of evaluating petroleum resources which include crude oil, gases of all kinds (natural gas, hydrogen, carbon dioxide, helium, and any others), natural gasoline, and related hydrocarbons (tar sands, asphalt, propane butane, etc.), oil shale and the products of such resources.

### 43 CFR Ch. II (10-1-08 Edition)

(d) *Reserve* means those lands within the National Petroleum Reserve in Alaska (prior to June 1, 1977, designated Naval Petroleum Reserve No. 4) which was established by Executive order of the President, dated February 27, 1923, except for tract Numbered 1 as described in Public Land Order 2344 (the Naval Arctic Research Laboratory—surface estate only) dated April 24, 1961.

(e) *Secretary* means the Secretary of the Interior.

(f) *Special areas* means areas within the reserve identified by the Secretary of the Interior as having significant subsistence, recreational, fish and wildlife, or historical or scenic value and, therefore, warranting maximum protection of such values to the extent consistent with the requirements of the Act for the exploration of the Reserve.

(g) *Use authorization* means a written approval of a request for use of land or resources.

#### § 2361.0-6 [Reserved]

#### § 2361.0-7 Effect of law.

(a) Subject to valid existing rights, all lands within the exterior boundaries of the Reserve are reserved and withdrawn from all forms of entry and disposition under the public land laws, including the mining and mineral leasing laws, and all other Acts.

(b) Notwithstanding the provisions of paragraph (a) of this section, the Secretary is authorized to:

(1) Make dispositions of mineral materials pursuant to the Act of July 31, 1947 (61 Stat. 681), as amended (30 U.S.C. 601), for appropriate use by Alaska Natives.

(2) Make such dispositions of mineral materials and grant such rights-of-way, licenses, and permits as may be necessary to carry out his responsibilities under the Act.

(3) Convey the surface of lands properly selected on or before December 18, 1975, by Native village corporations pursuant to the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601, *et seq.*).

(c) All other provisions of law heretofore enacted and actions heretofore

## Bureau of Land Management, Interior

## § 2361.2

taken reserving such lands as a Reserve shall remain in full force and effect to the extent not inconsistent with the Act.

(d) To the extent not inconsistent with the Act, all other public land laws are applicable.

### § 2361.1 Protection of the environment.

(a) The authorized officer shall take such action, including monitoring, as he deems necessary to mitigate or avoid unnecessary surface damage and to minimize ecological disturbance throughout the reserve to the extent consistent with the requirements of the Act for the exploration of the reserve.

(b) The Cooperative Procedures of January 18, 1977, for National Petroleum Reserve in Alaska between the Bureau of Land Management (BLM) and the U.S. Geological Survey (GS) (42 FR 4542, January 25, 1977) provides the procedures for the mutual cooperation and interface of authority and responsibility between GS and BLM concerning petroleum exploration activities (i.e., geophysical and drilling operations), the protection of the environment during such activities in the Reserve, and other related activities.

(c) Maximum protection measures shall be taken on all actions within the Utikok River Uplands, Colville River, and Teshekpuk Lake special areas, and any other special areas identified by the Secretary as having significant subsistence, recreational, fish and wildlife, or historical or scenic value. The boundaries of these areas and any other special areas identified by the Secretary shall be identified on maps and be available for public inspection in the Fairbanks District Office. In addition, the legal description of the three special areas designated herein and any new areas identified hereafter will be published in the FEDERAL REGISTER and appropriate local newspapers. Maximum protection may include, but is not limited to, requirements for:

(1) Rescheduling activities and use of alternative routes, (2) types of vehicles and loadings, (3) limiting types of aircraft in combination with minimum flight altitudes and distances from

identified places, and (4) special fuel handling procedures.

(d) Recommendations for additional special areas may be submitted at any time to the authorized officer. Each recommendation shall contain a description of the values which make the area special, the size and location of the area on appropriate USGS quadrangle maps, and any other pertinent information. The authorized officer shall seek comments on the recommendation(s) from interested public agencies, groups, and persons. These comments shall be submitted along with his recommendation to the Secretary. Pursuant to section 104(b) of the Act, the Secretary may designate that area(s) which he determines to have special values requiring maximum protection. Any such designated area shall be identified in accordance with the provision of § 2361.1(c) of this subpart.

(e)(1) To the extent consistent with the requirements of the Act and after consultation with appropriate Federal, State, and local agencies and Native organizations, the authorized officer may limit, restrict, or prohibit use of and access to lands within the Reserve, including special areas. On proper notice as determined by the authorized officer, such actions may be taken to protect fish and wildlife breeding, nesting, spawning, lambing or calving activity, major migrations of fish and wildlife, and other environmental, scenic, or historic values.

(2) The consultation requirement in § 2361.1(e)(1) of this subpart is not required when the authorized officer determines that emergency measures are required.

(f) No site, structure, object, or other values of historical archaeological, cultural, or paleontological character, including but not limited to historic and prehistoric remains, fossils, and artifacts, shall be injured, altered, destroyed, or collected without a current Federal Antiquities permit.

### § 2361.2 Use authorizations.

(a) Except for petroleum exploration which has been authorized by the Act, use authorizations must be obtained from the authorized officer prior to any use within the Reserve. Only those uses

### § 2361.3

which are consistent with the purposes and objectives of the Act will be authorized.

(b) Except as may be limited, restricted, or prohibited by the authorized officer pursuant to §2361.1 of this subpart or otherwise, use authorizations are not required for (1) subsistence uses (e.g., hunting, fishing, and berry picking) and (2) recreational uses (e.g., hunting, fishing, backpacking, and wildlife observation).

(c) Applications for use authorizations shall be filed in accordance with applicable regulations in this chapter. In the absence of such regulation, the authorized officer may make such dispositions in the absence of such regulations, the author of mineral materials and grant such rights-of-way, licenses, and permits as may be necessary to carry out his responsibilities under the Act.

(d) In addition to other statutory or regulatory requirements, approval of applications for use authorizations shall be subject to such terms and conditions which the authorized officer determines to be necessary to protect the environmental, fish and wildlife, and historical or scenic values of the Reserve.

### § 2361.3 Unauthorized use and occupancy.

Any person who violates or fails to comply with regulations of this subpart is subject to prosecution, including trespass and liability for damages, pursuant to the appropriate laws.

### Subpart 2370—Restorations and Revocations; General

#### § 2370.0-1 Purpose.

The regulations of this part 2370 apply to lands and interests in lands withdrawn or reserved from the public domain, except lands reserved or dedicated for national forest or national park purposes, which are no longer needed by the agency for which the lands are withdrawn or reserved.

[35 FR 9558, June 13, 1970]

#### § 2370.0-3 Authority.

The Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, governs the disposal of surplus Federal lands or interests in lands. Section 3 of that Act (40 U.S.C. 472), as amended, February 28, 1958 (72 Stat. 29), excepts from its provisions the following:

(a) The public domain.

(b) Lands reserved or dedicated for national forest or national park purposes.

(c) Minerals in lands or portions of lands withdrawn or reserved from the public domain which the Secretary of the Interior determines are suitable for disposition under the public land mining and mineral leasing laws.

(d) Lands withdrawn or reserved from the public domain, but not including lands or portions of lands so withdrawn or reserved which the Secretary of the Interior, with the concurrence of the Administrator of the General Services Administration, determines are not suitable for return to the public domain for disposition under the general public-land laws, because such lands are substantially changed in character by improvements or otherwise.

## Bureau of Land Management, Interior

## § 2374.1

### Subpart 2372—Procedures

SOURCE: 35 FR 9558, June 13, 1970, unless otherwise noted.

#### § 2372.1 Notice of intention to relinquish action by holding agency.

(a) Agencies holding withdrawn or reserved lands which they no longer need will file, in duplicate, a notice of intention to relinquish such lands in the proper office (see § 1821.2-1 of this chapter).

(b) No specific form of notice is required, but all notices must contain the following information:

(1) Name and address of the holding agency.

(2) Citation of the order which withdrew or reserved the lands for the holding agency.

(3) Legal description and acreage of the lands, except where reference to the order of withdrawal or reservation is sufficient to identify them.

(4) Description of the improvements existing on the lands.

(5) The extent to which the lands are contaminated and the nature of the contamination.

(6) The extent to which the lands have been decontaminated or the measures taken to protect the public from the contamination and the proposals of the holding agency to maintain protective measures.

(7) The extent to which the lands have been changed in character other than by construction of improvements.

(8) The extent to which the lands or resources thereon have been disturbed and the measures taken or proposed to be taken to recondition the property.

(9) If improvements on the lands have been abandoned, a certification that the holding agency has exhausted General Services Administration procedures for their disposal and that the improvements are without value.

(10) A description of the easements or other rights and privileges which the holding agency or its predecessors have granted covering the lands.

(11) A list of the terms and conditions, if any, which the holding agency deems necessary to be incorporated in any further disposition of the lands in order to protect the public interest.

(12) Any information relating to the interest of other agencies or individuals in acquiring use of or title to the property or any portion of it.

(13) Recommendations as to the further disposition of the lands, including where appropriate, disposition by the General Services Administration.

#### § 2372.2 Report to General Services Administration.

The holding agency will send one copy of its report on unneeded lands to the appropriate regional office of the General Services Administration for its information.

#### § 2372.3 Return of lands to the public domain; conditions.

(a) When the authorized officer of the Bureau of Land Management determines the holding agency has complied with the regulations of this part, including the conditions specified in § 2374.2 of this subpart, and that the lands or interests in lands are suitable for return to the public domain for disposition under the general public land laws, he will notify the holding agency that the Department of the Interior accepts accountability and responsibility for the property, sending a copy of this notice to the appropriate regional office of the General Services Administration.

(b) [Reserved]

### Subpart 2374—Acceptance of Jurisdiction by BLM

#### § 2374.1 Property determinations.

(a) When the authorized officer of the Bureau of Land Management determines that the holding agency has complied with the regulations of this part and that the lands or interests in lands other than minerals are not suitable for return to the public domain for disposition under the general public land laws, because the lands are substantially changed in character by improvements or otherwise, he will request the appropriate officer of the General Services Administration, or its delegate, to concur in his determination.

(b) When the authorized officer of the Bureau of Land Management determines that minerals in lands subject to

## § 2374.2

the provisions of paragraph (a) of this section are not suitable for disposition under the public land mining or mineral leasing laws, he will notify the appropriate officer of the General Services Administration or its delegate of this determination.

(c) Upon receipt of the concurrence specified in paragraph (a) of this section, the authorized officer of the Bureau of Land Management will notify the holding agency to report as excess property the lands and improvements therein, or interests in lands to the General Services Administration pursuant to the regulations of that Administration. The authorized officer of the Bureau of Land Management will request the holding agency to include minerals in its report to the General Services Administration only when the provisions of paragraph (b) of this section apply. He will also submit to the holding agency, for transmittal with its report to the General Services Administration, information of record in the Bureau of Land Management on the claims, if any, by agencies other than the holding agency of primary, joint, or secondary jurisdiction over the lands and on any encumbrances under the public land laws.

[35 FR 9559, June 13, 1970]

### § 2374.2 Conditions of acceptance by BLM.

Agencies will not be discharged of their accountability and responsibility under this section unless and until:

(a) The lands have been decontaminated of all dangerous materials and have been restored to suitable condition or, if it is uneconomical to decontaminate or restore them, the holding agency posts them and installs protective devices and agrees to maintain the notices and devices.

(b) To the extent deemed necessary by the authorized officer of the Bureau of Land Management, the holding agency has undertaken or agrees to undertake or to have undertaken appropriate land treatment measures correcting, arresting, or preventing deterioration of the land and resources thereof which has resulted or may result from the agency's use or possession of the lands.

## 43 CFR Ch. II (10–1–08 Edition)

(c) The holding agency, in respect to improvements which are of no value, has exhausted General Services Administration's procedures for their disposal and certifies that they are of no value.

(d) The holding agency has resolved, through a final grant or denial, all commitments to third parties relative to rights and privileges in and to the lands or interests therein.

(e) The holding agency has submitted to the appropriate office mentioned in paragraph (a) of § 2372.1 a copy of, or the case file on, easements, leases, or other encumbrances with which the holding agency or its predecessors have burdened the lands or interests therein.

### Group 2400—Land Classification

#### PART 2400—LAND CLASSIFICATION

##### Subpart 2400—Land Classification; General

Sec.

2400.0–2 Objectives.

2400.0–3 Authority.

2400.0–4 Responsibility.

2400.0–5 Definitions.

SOURCE: 35 FR 9559, June 13, 1970, unless otherwise noted.

##### Subpart 2400—Land Classification; General

###### § 2400.0–2 Objectives.

The statutes cited in § 2400.0–3 authorize the Secretary of the Interior to classify or otherwise take appropriate steps looking to the disposition of public lands, and on an interim basis, to classify public lands for retention and management, subject to requirements of the applicable statutes. In addition to any requirements of law, it is the policy of the Secretary (a) to specify those criteria which will be considered in the exercise of his authority and (b) to establish procedures which will permit the prompt and efficient exercise of his authority with, as far as is practicable, the knowledge and participation of the interested parties, including the general public. Nothing in these regulations is meant to affect applicable State laws governing the appropriation and use of water, regulation of

hunting and fishing or exercise of any police power of the State.

**§ 2400.0-3 Authority.**

(a) All vacant public lands, except those in Alaska, have been, with certain exceptions, withdrawn from entry, selection, and location under the non-mineral land laws by Executive Order 6910, of November 26, 1934, and Executive Order 6964 of February 5, 1935, and amendments thereto, and by the establishment of grazing districts under section 1 of the Act of June 28, 1934 (48 Stat. 1269), as amended (43 U.S.C. 315). Section 7 of the Act of June 28, 1934 (48 Stat. 1272), as amended (43 U.S.C. 315f), authorizes the Secretary of the Interior in his discretion to examine and classify and open to entry, selection, or location under applicable law any lands withdrawn or reserved by Executive Order 6910 of November 26, 1934, or Executive Order 6964 of February 5, 1935, and amendments thereto, or within a grazing district established under that act which he finds are more valuable or suitable for the production of agricultural crops than for the production of native grasses and forage plants, or more valuable or suitable for any other use than for the use provided for under said act, or proper for acquisition in satisfaction of any outstanding lieu, exchange, or scrip rights or land grant. Classification under section 7 is a prerequisite to the approval of all entries, selections, or locations under the following subparts of this chapter, except as they apply to Alaska and with certain other exceptions: Original, Additional, Second, and Adjoining Farm Homesteads—subparts 2511, 2512, and 2513; Enlarged Homestead—subpart 2514; Indian Allotments—part 2530; Desert Land Entries—part 2520; Recreation and Public Purposes Act—part 2740 and subpart 2912; State Grants for Educational, Institutional, and Park Purposes—part 2620; Scrip Selections—part 2610 and Exchanges for the Consolidation or Extension of National Forests, Indian Reservations or Indian Holdings—Group 2200.

(b) Section 8(b) of the Act of June 28, 1934 (48 Stat. 1272), as amended (43 U.S.C. 315g), authorizes the Secretary of the Interior, when public interests will be benefited thereby, to accept on

behalf of the United States title to any privately owned lands within or without the boundaries of a grazing district established under that act and in exchange therefor to issue patent for not to exceed an equal value of surveyed grazing district land or of unreserved surveyed public land in the same State or within a distance of not more than 50 miles within the adjoining State nearest the base lands. The regulations governing such exchanges are contained in Group 2200 of this chapter.

(c) Section 2455 of the Revised Statutes, as amended (43 U.S.C. 1171), authorizes the Secretary of the Interior in his discretion to order into market and sell at public auction isolated or disconnected tracts of public land not exceeding 1,520 acres, and tracts not exceeding 760 acres the greater part of which are mountainous or too rough for cultivation. The regulations governing such sales are contained in part 2710 of this chapter.

(d) Section 3 of the Act of August 28, 1937 (50 Stat. 875, 43 U.S.C. 1181c), authorizes the Secretary of the Interior to classify, either on application or otherwise, and restore to homestead entry, or purchase under the provisions of section 2455 of the Revised Statutes, as amended, any of the revested Oregon and California Railroad or reconveyed Coos Bay Wagon Road grant land which, in his judgment, is more suitable for agricultural use than for afforestation, reforestation, stream-flow protection, recreation, or other public purposes. The regulations governing disposal under this act are contained in part 2710 of this chapter.

(e) The Small Tract Act of June 1, 1938 (52 Stat. 609), as amended (43 U.S.C. 682a-e), authorizes the Secretary of the Interior, in his discretion, to lease or sell certain classes of public lands which he classifies as chiefly valuable for residence, recreation, business or community site purposes. The regulations governing leases and sales under this act are contained in part 2730 and subpart 2913 of this chapter.

(f) The Recreation and Public Purposes Act of June 14, 1926 (44 Stat. 741), as amended (43 U.S.C. 869-869-4), requires the Secretary of the Interior, in the exercise of his discretion to make a determination that land is to be used

for an established or definitely proposed project, and in the case of Alaska authorizes him to classify certain classes of public lands for lease or sale for recreation or other public purposes. The regulations governing lease and sale of land under this act are contained in part 2740 and subpart 2912 of this chapter.

(g) The Act of July 31, 1939 (53 Stat. 1144), authorizes and empowers the Secretary of the Interior, in the administration of the Act of August 28, 1937 (supra), in his discretion, to exchange any land formerly granted to the Oregon & California Railroad Co., title to which was revested in the United States pursuant to the provisions of the Act of June 9, 1916 (39 Stat. 218), and any land granted to the State of Oregon, title to which was reconveyed to the United States by the Southern Oregon Co. pursuant to the provisions of the Act of February 26, 1919 (40 Stat. 1179), for lands of approximately equal aggregate value held in private, State, or county ownership, either within or contiguous to the former limits of such grants, when by such action the Secretary of the Interior will be enabled to consolidate advantageously the holdings of lands of the United States. The regulations governing exchanges under this act are contained in part 2260 of this chapter.

(h) The Alaska Public Sales Act of August 30, 1949 (63 Stat. 679), as amended (48 U.S.C. 364a-f), authorizes the Secretary of the Interior in his discretion to classify certain classes of public lands in Alaska for public sale for industrial or commercial purposes. The regulations governing sales of land under this act are contained in part 2770 of this chapter.

(i) The Public Land Sale Act of September 19, 1964 (78 Stat. 988, 43 U.S.C. 1421-27), authorizes and directs the Secretary of the Interior to sell public lands in tracts not exceeding 5,120 acres, that have been classified for sale in accordance with a determination that (1) the lands are required for the orderly growth and development of a community or (2) the lands are chiefly valuable for residential, commercial, agricultural (which does not include lands chiefly valuable for grazing or raising forage crops), industrial, or

public uses or development. The regulations governing such sales are contained in part 2720 of this chapter.

(j) The Classification and Multiple Use Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1411-18), authorizes the Secretary of the Interior to determine which of the public lands (and other Federal lands), including those situated in the State of Alaska exclusively administered by him through the Bureau of Land Management shall be (1) sold because they are (i) required for the orderly growth and development of a community or (ii) are chiefly valuable for residential, commercial, agricultural (which does not include lands chiefly valuable for grazing or raising forage crops), industrial, or public uses or development or (2) retained, at least for the time being, in Federal ownership and managed for (i) domestic livestock grazing, (ii) fish and wildlife development and utilization, (iii) industrial development, (iv) mineral production, (v) occupancy, (vi) outdoor recreation, (vii) timber production, (viii) watershed protection, (ix) wilderness preservation, or (x) preservation of public values that would be lost if the land passed from Federal ownership.

#### § 2400.0-4 Responsibility.

(a) Except where specified to the contrary in this group, the authority of the Secretary of the Interior to classify lands and make other determinations in accordance with the regulations of this part has been delegated to persons authorized to act in his name; to the Director, Bureau of Land Management and persons authorized to act in his name; to State Directors of the Bureau of Land Management and to any person authorized to act in the name of a State Director.

(b) Classifications and other determinations in accordance with the regulations of this group may be made by the authorized officer whether or not applications or petitions have been filed for the lands.

#### § 2400.0-5 Definitions.

As used in the regulations of this group—

(a) *Residential* refers to single or multi-family dwellings or combinations thereof, and related community

## Bureau of Land Management, Interior

## § 2410.1

facilities, both seasonal and year-round.

(b) *Commercial* refers to the sale, exchange, or distribution of goods and services.

(c) *Industrial* refers to the manufacture, processing, and testing of goods and materials, including the production of power. It does not refer to the growing of agricultural crops, or the raising of livestock, or the extraction or severance of raw materials from the land being classified, but it does include activities incidental thereto.

(d) *Agricultural* refers to the growing of cultivated crops.

(e) *Community* refers to a village, town or city, or similar subdivision of a State, whether or not incorporated.

(f) *Domestic livestock* refers to cattle, horses, sheep, goats and other grazing animals owned by livestock operators, provided such operators meet the qualification set forth in §4111.1-1 or §4131.1-3 of this chapter. This definition includes animals raised for commercial purposes and also *domestic livestock* within the meaning of §4111.3-1(d)(1) of this chapter.

(g) *Fish and wildlife* refers to game, fish and other wild animals native or adaptable to the public lands and waters.

(h) *Mineral* refers to any substance that (1) is recognized as mineral, according to its chemical composition, by the standard authorities on the subject, or (2) is classified as mineral product in trade or commerce, or (3) possesses economic value for use in trade, manufacture, the sciences, or in the mechanical or ornamental arts.

(i) *Occupancy* refers to use of lands as a site for any type of useful structure whatsoever.

(j) *Outdoor recreation* includes, but is not limited to, hunting, fishing, trapping, photography, horseback riding, picnicking, hiking, camping, swimming, boating, rock and mineral collecting, sightseeing, mountain climbing, and skiing.

(k) *Timber production* refers to the growth of trees in forests and woodlands.

(l) *Watershed protection* refers to maintenance of the stability of soil and soil cover and the control of the natural flow of water.

(m) *Wilderness* refers to areas in a native condition or reverted to a native condition, substantially free of man-made structures and human habitation.

(n) *Public value* refers to an asset held by, or a service performed for, or a benefit accruing to the people at large.

(o) *Multiple use* means the management of the various surface and subsurface resources so that they are utilized in the combination that will best meet the present and future needs of the American people; the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some land for less than all of the resources; and harmonious and coordinated management of the various resources, each with the other, without impairment of the productivity of the land, with consideration being given to the relative values of the various resources, and not necessarily the combination of uses that will give the greatest dollar return or the greatest unit output.

(p) *Sustained yield of the several products and services* means the achievement and maintenance of a high-level annual or regular periodic output of the various renewable resources of land without impairment of the productivity of the land.

### PART 2410—CRITERIA FOR ALL LAND CLASSIFICATIONS

#### Subpart 2410—General Criteria

Sec.

2410.1 All classifications.

2410.2 Relative value, disposal or retention.

SOURCE: 35 FR 9560, June 13, 1970, unless otherwise noted.

#### Subpart 2410—General Criteria

##### § 2410.1 All classifications.

All classifications under the regulations of this part will give due consideration to ecology, priorities of use, and the relative values of the various resources in particular areas. They must be consistent with all the following criteria:

## § 2410.2

(a) The lands must be physically suitable or adaptable to the uses or purposes for which they are classified. In addition, they must have such physical and other characteristics as the law may require them to have to qualify for a particular classification.

(b) All present and potential uses and users of the lands will be taken into consideration. All other things being equal, land classifications will attempt to achieve maximum future uses and minimum disturbance to or dislocation of existing users.

(c) All land classifications must be consistent with State and local government programs, plans, zoning, and regulations applicable to the area in which the lands to be classified are located, to the extent such State and local programs, plans, zoning, and regulations are not inconsistent with Federal programs, policies, and uses, and will not lead to inequities among private individuals.

(d) All land classifications must be consistent with Federal programs and policies, to the extent that those programs and policies affect the use or disposal of the public lands.

[35 FR 9560, June 13, 1970]

## § 2410.2 Relative value, disposal or retention.

When, under the criteria of this part, a tract of land has potential for either retention for multiple use management or for some form of disposal, or for more than one form of disposal, the relative scarcity of the values involved and the availability of alternative means and sites for realization of those values will be considered. Long-term public benefits will be weighed against more immediate or local benefits. The tract will then be classified in a manner which will best promote the public interests.

[35 FR 9560, June 13, 1970]

## PART 2420—MULTIPLE-USE MANAGEMENT CLASSIFICATIONS

### Subpart 2420—Criteria for Multiple-Use Management Classifications

Sec.

2420.1 Use of criteria.

2420.2 Criteria.

## 43 CFR Ch. II (10–1–08 Edition)

SOURCE: 35 FR 9561, June 13, 1970, unless otherwise noted.

### Subpart 2420—Criteria for Multiple-Use Management Classifications

#### § 2420.1 Use of criteria.

In addition to the general criteria in subpart 2410, the following criteria will be used to determine whether public lands will be retained, in Federal ownership and managed for domestic livestock grazing, fish and wildlife development and utilization, industrial development, mineral production, occupancy, outdoor recreation, timber production, watershed protection, wilderness preservation, or preservation of public values that would be lost if the land passed from Federal ownership.

[35 FR 9561, June 13, 1970]

#### § 2420.2 Criteria.

Lands may be classified for retention under the Classification and Multiple Use Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1411–18), if they are not suitable for disposal under the criteria set forth in part 2430 and such classification will do one or more of the following:

(a) Assist in effective and economical administration of the public lands in furtherance of the several objectives of such administration as expressed in the various public land laws.

(b) Further the objectives of Federal natural resource legislation directed, among other things towards:

(1) Stabilization and development of the livestock industry dependent upon Federal lands, such as sections 1 and 15 of the Taylor Grazing Act (43 U.S.C. 315 and 315m), and the Alaska Grazing Act (48 U.S.C. 471–471o).

(2) Provision or preservation of adequate areas of public hunting and fishing grounds and public access thereto, and maintenance of habitat and food supplies for the fish and wildlife dependent upon the public lands and maintained under Federal and State programs, such as section 9 of the Taylor Grazing Act (43 U.S.C. 315h) and the Fish and Wildlife Coordination Act (16 U.S.C. 661–666c).

## Bureau of Land Management, Interior

## § 2430.1

(3) Fostering the economy of the nation by industrial and mineral development, such as through the materials sales and mineral leasing laws (Group 3000 of this chapter) and the rights-of-way laws (Group 2800 of this chapter).

(4) Realization of the beneficial utilization of the public lands through occupancy leases, such as under the Recreation and Public Purposes Act (43 U.S.C. 869–869-4) and the Small Tract Act (43 U.S.C. 682a–682e).

(5) Provision of needed recreation, conservation, and scenic areas and open space (42 U.S.C. 1500–1500e) and assurance of adequate outdoor recreation resources for present and future generations of Americans (16 U.S.C. 460–1 *et seq.*).

(6) Stabilization of the timber industry and dependent communities and sustained-yield production of timber and other forest products, such as the Materials Sales Act (30 U.S.C. 601–604), and, in connection with management of other Federal lands, the O and C Act (43 U.S.C. 1181a–1181f, 1181g–1181j).

(7) Protection of frail lands, conservation of productive soils and water supplies, and prevention of damage and loss due to excessive runoff, flooding, salination, and siltation, such as the Soil and Moisture Conservation Act (16 U.S.C. 590a *et seq.*) and section 2 of the Taylor Grazing Act (43 U.S.C. 315a).

(c) Preservation of public values that would be lost if the land passed from Federal ownership (43 U.S.C. 1411–1418) such as where

(1) The lands are needed to protect or enhance established Federal programs, by such means as provision of buffer zones, control of access, maintenance of water supplies, reduction and prevention of water pollution, exclusion of nonconforming inholdings, maintenance of efficient management areas, provision of research areas, and maintenance of military areas or sites for other government activities.

(2) The lands should be retained in Federal ownership pending enactment of Federal legislation, which would affect them.

(3) The lands should be retained in Federal ownership pending their acquisition by a State or local government.

(4) The lands are best suited for multiple use management and require

management for a mixture of uses in order to best benefit the general public and such management could not be achieved if the lands were in private ownership.

(5) The lands contain scientific, scenic, historic, or wilderness values which would be lost to the general public if they were transferred out of Federal ownership.

(6) Transfer of the lands would be inconsistent with national objectives for the preservation of natural beauty of the country and the proper utilization of open space.

[35 FR 9561, June 13, 1970]

### PART 2430—DISPOSAL CLASSIFICATIONS

#### Subpart 2430—Criteria for Disposal Classifications

Sec.

2430.1 Use of criteria.

2430.2 General criteria for disposal classification.

2430.3 Additional criteria for classification of lands needed for urban or suburban purposes.

2430.4 Additional criteria for classification of lands valuable for public purposes.

2430.5 Additional criteria for classification of lands valuable for residential, commercial, agricultural, or industrial purposes.

2430.6 Additional criteria for lands valuable for other purposes.

SOURCE: 35 FR 9561, June 13, 1970, unless otherwise noted.

#### Subpart 2430—Criteria for Disposal Classifications

##### § 2430.1 Use of criteria.

In addition to the general criteria in subpart 2410 the following criteria will govern classifications under the authorities listed in § 2400.0–3 for sale, selection, grant or other disposal under the Public Land Sale Act (78 Stat. 988, 43 U.S.C. 1421–1427) and other laws authorizing the Secretary of the Interior to dispose of public lands. The criteria are set forth in terms of land use classes. Where appropriate, the applicability of specific disposal laws to lands in each use class is discussed.

## § 2430.2

### § 2430.2 General criteria for disposal classification.

The general approach to determine the act under which lands are to be classified and disposed of is as follows:

(a) Consideration under criteria listed in this part will first be given to whether the lands can be classified for retention for multiple use management, for disposal, or for both. If, under these criteria, they could be classified for both, the principles of § 2410.2 will be applied.

(b) If the lands are found to be suitable for disposal, consideration under the criteria of this part will be given to whether the lands are needed for urban or suburban purposes or whether they are chiefly valuable for other purposes. Lands found to be valuable for public purposes will be considered chiefly valuable for public purposes, except in situations where alternate sites are available to meet the public needs involved.

### § 2430.3 Additional criteria for classification of lands needed for urban or suburban purposes.

(a) To be needed for urban or suburban purposes it must be anticipated that a community will embrace the lands within 15 years.

(b) Lands determined to be needed for urban or suburban purposes may be classified for sale pursuant to the Public Land Sale Act as being required for the orderly growth and development of a community, if (1) adequate zoning regulations are in effect and (2) adequate local governmental comprehensive plans have been adopted.

(c) Lands determined to be needed for urban or suburban purposes may be classified for disposal under any appropriate law other than the Public Land Sale Act, if disposal under such other authority would be consistent with local comprehensive plans, or in the absence of such plans, with the views of local governmental authorities.

(d) Where more than one form of disposal is possible, the authorized officer will select that course of action which will best promote development of the land for urban or suburban purposes.

## 43 CFR Ch. II (10–1–08 Edition)

### § 2430.4 Additional criteria for classification of lands valuable for public purposes.

(a) To be valuable for public purposes, lands must be suitable for use by a State or local governmental entity or agency for some noncommercial and nonindustrial governmental program or suitable for transfer to a non-Federal interest in a transaction which will benefit a Federal, State, or local governmental program.

(b) Lands found to be valuable for public purposes may be classified for sale pursuant to the Public Land Sale Act as chiefly valuable for public uses or development or for transfer in satisfaction of a State land grant, or for transfer to a State or local governmental agency in exchange for other property, or for transfer to a governmental agency under any applicable act of Congress other than the Recreation and Public Purposes Act (44 Stat. 741), as amended (43 U.S.C. 869–869–4), if (1) the proposed use includes profit activities or if the interested, qualified governmental agency and the authorized officer agree that there is no need for the perpetual dedication of the lands to public uses required by the Recreation and Public Purposes Act, and (2) in the case of sales under the Public Land Sale Act, adequate zoning regulations exist in the area in which the lands are located.

(c) Lands found to be valuable for public purposes will ordinarily be classified for sale or lease under the Recreation and Public Purposes Act (see part 2740 and subpart 2912 of this chapter) if the proposed use involves nonprofit activities and if it is determined by the authorized officer that the provisions of that Act are required to insure the continued dedication of the lands to such uses, or otherwise to carry out the purposes of the Act.

(d) Lands may be classified for exchange under appropriate authority where they are found to be chiefly valuable for public purposes because they have special values, arising from the interest of exchange proponents, for exchange for other lands which are needed for the support of a Federal program.

## Bureau of Land Management, Interior

## § 2440.1

### § 2430.5 Additional criteria for classification of lands valuable for residential, commercial, agricultural, or industrial purposes.

(a) Lands which have value for residential, commercial, agricultural, or industrial purposes, or for more than one of such purposes, will be considered chiefly valuable for that purpose which represents the *highest and best use* of the lands, i.e., their most profitable legal use in private ownership.

(b) Lands may be classified for sale pursuant to the Public Land Sale Act as being chiefly valuable for residential, commercial, agricultural, or industrial uses or development (other than grazing use or use for raising native forage crops), if (1) adequate zoning regulations are in effect, and, where the lands also are needed for urban or suburban development, (2) adequate local governmental comprehensive plans have been adopted.

(c) Lands determined to be valuable for residential, commercial, agricultural, or industrial purposes may be classified for disposal under any appropriate authority other than the Public Land Sale Act if (1) disposal under such other authority would be consistent with local governmental comprehensive plans, or (2) in the absence of such plans, with the views of local governmental authorities.

(d) Lands outside of Alaska may be classified as suitable for homestead entry under part 2510 of this chapter if they are (1) chiefly valuable for agricultural purposes, and (2) suitable for development as a home and farm for a man and his family, and (3) the anticipated return from agricultural use of the land would support the residents. If it is determined that the irrigation of land otherwise suitable for homestead entry would endanger the supply of adequate water for existing users or cause the dissipation of water reserves, such land will not be classified for entry. Land may be classified for homestead entry only if rainfall is adequate, or if under State law, there is available to the land sufficient irrigation water, to permit agricultural development of its cultivable portions.

(e) Lands may be classified as suitable for desert land entry under part 2520 of this chapter if (1) the lands are

chiefly valuable for agricultural purposes, and (2) all provisions concerning irrigation water set forth in § 2430.5(d) are met.

(f) Lands outside of Alaska may be classified as suitable for Indian allotment under part 2530 of this chapter if (1) the lands are valuable for agricultural purposes, and (2) the lands are on the whole suitable for a home for an Indian and his family, and (3) the anticipated return from agricultural use of the land would support the residents, and (4) the requirements for water supplies set forth in § 2430.5(d) are met.

(g) Lands determined to be valuable for purposes other than public purposes may be determined to be suitable for exchange if the acquisition of the offered lands, the disposition of the public lands, and the anticipated costs of consummating the exchange will not disrupt governmental operations.

### § 2430.6 Additional criteria for lands valuable for other purposes.

Lands may be classified for disposal under any applicable authority where they are found to be chiefly valuable for purposes other than those described in §§ 2430.2–2430.5 of this section and to be not suitable for retention for multiple use management.

## PART 2440—SEGREGATION BY CLASSIFICATION

### Subpart 2440—Criteria for Segregation

Sec.

2440.1 Use of criteria.

2440.2 General criterion.

2440.3 Specific criteria for segregative effect of classification for retention.

2440.4 Specific criteria for segregative effect of classification for disposal.

SOURCE: 35 FR 9562, June 13, 1970, unless otherwise noted.

### Subpart 2440—Criteria for Segregation

#### § 2440.1 Use of criteria.

The following criteria will govern the determination of the extent to which classifications and proposed classifications will segregate the affected lands

## § 2440.2

from settlement, location, sale, selection, entry, lease, or other forms of disposal under the public land laws, including the mining and mineral leasing laws. The segregative effect of each classification or proposed classification will be governed by applicable laws and regulations, and will be stated in the classification notice or decision.

### § 2440.2 General criterion.

The public lands classified or proposed to be classified under the regulations of this part will be kept open to (i.e., not segregated from) as many forms of disposal as possible consistent with the purposes of the classification and the resource values of the lands.

### § 2440.3 Specific criteria for segregative effect of classification for retention.

(a) Public lands classified or proposed to be classified for retention for multiple-use management will be segregated from those forms of disposal which, if the lands remain open thereto, could:

(1) Interfere significantly with the management of the lands under principles of multiple use and sustained yield, or

(2) Impair or prevent, to an appreciable extent, realization of public values in the lands, or

(3) Impair or prevent, to an appreciable extent, realization of the objectives of retention and management set forth in part 2420, or

(4) Lead to unnecessary expenditures of public or private funds arising out of individual efforts to acquire public lands under laws, which are in fact not applicable, because of the nature of the resources of the lands.

(b) In applying the criteria in paragraph (b)(1) of this section, land shall not be closed to mining location unless the nonmineral uses would be inconsistent with and of greater importance to the public interest than the continued search for a deposit of valuable minerals.

### § 2440.4 Specific criteria for segregative effect of classification for disposal.

Public lands classified or proposed to be classified for disposal will be seg-

## 43 CFR Ch. II (10–1–08 Edition)

regated from those forms of disposal which, if the lands remained open thereto, could interfere with the orderly disposal of the lands pursuant to appropriate law. Public lands classified or proposed to be classified for sale under the Public Land Sale Act (78 Stat. 988, 43 U.S.C. 1411–18) will be segregated from all forms of disposal under the mining and mineral leasing laws.

Sec.

2450.1 Filing of petition.

2450.2 Preliminary determination.

2450.3 Proposed classification decision.

2450.4 Protests: Initial classification decision.

2450.5 Administrative review.

2450.6 Effect of final order.

2450.7 Right to occupy or settle.

2450.8 Preference right of petitioner-applicant.

SOURCE: 35 FR 9563, June 13, 1970, unless otherwise noted.

### Subpart 2450—Petition-Application Procedures

#### § 2450.1 Filing of petition.

(a) When (1) land must be classified or designated pursuant to the authorities cited in § 2400.0–3 before an application may be approved and (2) the filing of applications is permitted prior to classification, the application together with a petition for classification on a form approved by the Director (hereinafter referred to collectively as a *petition-application*) must be filed in accordance with the provisions of § 1821.2 of this chapter. Lists indicating the proper office for filing of applications may be obtained from the Director or any other officer of the Bureau of Land Management. Copies of the petition for classification form and the application forms may be obtained from the proper offices or from the Bureau of Land Management, Washington, DC 20240.

#### § 2450.2 Preliminary determination.

Upon the filing of a petition-application, the authorized officer shall make

## Bureau of Land Management, Interior

## § 2450.5

a preliminary determination as to whether it is regular upon its face and, where there is no apparent defect, shall proceed to investigate and classify the land for which it has been filed. No further consideration will be given to the merits of an application or the qualifications of an applicant unless or until the land has been classified for the purpose for which the petition-application has been filed.

### § 2450.3 Proposed classification decision.

(a) The State Director shall make and issue a proposed classification decision which shall contain a statement of reasons in support thereof. Such decisions shall be served upon (1) each petitioner-applicant for the land, (2) any grazing permittee, licensee, or lessee on the land, or his representative, (3) the District Advisory Board, (4) the local governing board, planning commission, State coordinating committee, or other official or quasi-official body having jurisdiction over zoning in the geographic area within which the lands are located, and (5) any governmental officials or agencies from whom the record discloses comments on the classification have been received. If the decision affects more than 2,560 acres and would lead to the disposal of the lands, the decision will also be published in accordance with the provisions of subpart 2462.

(b) When there are multiple petition-applications for the same land, the proposed classification decision shall state which petition-application, if any, will be entitled to preference under applicable law; or where no petition-application has been filed for the purpose for which the land is proposed to be classified, the decision shall so state.

(1) When multiple petition-applications have been filed for the same land, the one first filed for the purpose for which the land is classified will be entitled to preference under applicable law.

(2) When two or more petition-applications have been simultaneously filed for the purpose for which the land is classified, the petition-application entitled to preference will be the first to be selected by drawing.

(3) If no petition-application has been filed for the purpose for which it is proposed to classify the land, the proposed decision shall state that the land will be opened to application by all qualified individuals on an equal-opportunity basis after public notice.

### § 2450.4 Protests: Initial classification decision.

(a) For a period of 30 days after the proposed classification decision has been served upon the parties listed in § 2450.3(a), protests thereto may be filed by an interested party with the State Director. No particular form of protest is required under this subparagraph, it being the intent of this procedure to afford the State Director the opportunity to review the proposed classification decision in the light of such protests.

(b) If no protests are filed within the time allowed, the proposed classification action shall be issued as the initial classification decision of the State Director, and shall be served on the petitioner-applicants and upon grazing permittees, licensees, or lessees.

(c) If protests are timely filed, they shall be reviewed by the State Director, who may require statements or affidavits, take testimony, or conduct further field investigations as are deemed necessary to establish the facts. At the conclusion of such review, the State Director shall issue an initial classification decision, either revised or as originally proposed, which shall be served on all interested parties.

### § 2450.5 Administrative review.

(a) For a period of 30 days after service thereof upon all parties in interest, the initial classification decision of the State Director shall be subject to the exercise of supervisory authority by the Secretary of the Interior for the purpose of administrative review.

(b) If, 30 days from receipt by parties in interest of the initial decision of the State Director, the Secretary has not either on his own motion, or motion of any protestant, petitioner-applicant, or the State Director, exercised supervisory authority for review, the initial classification decision shall become the final order of the Secretary.

## **§ 2450.6**

(c) The exercise of supervisory authority by the Secretary shall automatically vacate the initial classification decision and the final Departmental decision shall be issued by the Secretary of the Interior and served upon all parties in interest.

(d) No petitioner-applicant or protestant to a proposed classification decision of a State Director to whom the provisions of this section are applicable shall be entitled to any administrative review other than that provided by this section or to appeal under provisions of parts 1840 and 1850 of this chapter.

### **§ 2450.6 Effect of final order.**

(a) A final order of the Secretary shall continue in full force and effect so long as the lands remain subject to classification under the authorities cited in subpart 2400 until an authorized officer revokes or modifies it. Until it is so revoked or modified, all applications and petition-applications for the lands not consistent with the classification of the lands will not be allowed. Any payments submitted therewith will be returned. If the order is revoked or modified, the land will be opened to entry on an equal-opportunity basis after public notice in accordance with applicable regulations for the purpose for which it may be classified.

(b) Nothing in this section, however, shall prevent the Secretary of the Interior, personally and not through a delegate, from vacating or modifying a final order of the Secretary. In the event that the Secretary vacates or modifies a final order within sixty days of the date it became final, any preference right of a petitioner-applicant will be restored.

### **§ 2450.7 Right to occupy or settle.**

The filing of a petition-application gives no right to occupy or settle upon the land. A person shall be entitled to the possession and use of land only after his entry, selection, or location has been allowed, or a lease has been issued. Settlement on the land prior to that time constitutes a trespass.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 2450.8 Preference right of petitioner-applicant.**

Where public land is classified for entry under section 7 of the Taylor Grazing Act or under the Small Tract Act pursuant to a petition-application filed under this part, the petitioner-applicant is entitled to a preference right of entry, if qualified. If, however, it should be necessary thereafter for any reason to reject the application of the preference right claimant, the next petitioner-applicant in order of filing shall succeed to the preference right. If there is no other petitioner-applicant the land may be opened to application by all qualified individuals on an equal-opportunity basis after public notice or the classification may be revoked by the authorized officer.

2461.4 Changing classifications.

2461.5 Segregative effect.

### **Subpart 2462—Disposal Classification Procedure: Over 2,560 Acres**

2462.0–3 Authority.

2462.1 Publication of notice of, and public hearings on, proposed classification.

2462.2 Publication of notice of classification.

2462.3 Administrative review.

2462.4 Segregative effect of publication.

### **Subpart 2461—Multiple-Use Classification Procedures**

SOURCE: 35 FR 9564, June 13, 1970, unless otherwise noted.

#### **§ 2461.0–1 Purpose.**

Formal action to classify land for retention for multiple use management will be governed by the following procedures

## Bureau of Land Management, Interior

## § 2461.5

### § 2461.1 Proposed classifications.

(a) Proposed classifications will be clearly set forth on a map by the authorized officer, and on the Land Office records.

(1) Notice of proposed classifications involving more than 2,560 acres will be, and those involving 2,560 acres or less may be, published in the FEDERAL REGISTER and an announcement in a newspaper having general circulation in the area or areas in the vicinity of the affected lands.

(2) Notice of the proposals will be sent to authorized users, licensees, lessees, and permittees, or their selected representatives, the head of the governing body of the political subdivision of the State, if any, having jurisdiction over zoning in the geographic area in which the lands are located, the governor of that State, the BLM multiple use advisory board in that State, and the District advisory board and to any other parties indicating interest in such classifications.

(3) The notice will indicate where and when the map and Land Office records may be examined. The notice will specify the general location of the lands, the acreage involved, and the extent to which the land is proposed to be segregated from settlement, location, sale, selection, entry, lease, or other form of disposal under the public land laws, including the mining and mineral leasing laws. The notice of proposed classification will specify the period during which comments will be received, which will not be less than 60 days from date of publication of the notice.

(4) The authorized officer will hold a public hearing on the proposal if (i) the proposed classification will affect more than 25,000 acres or (ii) he determines that sufficient public interest exists to warrant the time and expense of a hearing.

### § 2461.2 Classifications.

Not less than 60 days after publication of the proposed classification, a classification will be made by the authorized officer, and a notice of classification published in the FEDERAL REGISTER and recorded in the Land Office records and on a map which will be filed in the local BLM District Office.

Such map will be available for public inspection.

### § 2461.3 Administrative review.

For a period of 30 days after publication of the classification in the FEDERAL REGISTER, the classification shall be subject to the exercise of administrative review and modification by the Secretary of the Interior.

### § 2461.4 Changing classifications.

Classifications may be changed, using the procedures specified in this subpart.

### § 2461.5 Segregative effect.

Segregative effect of classifications and proposed classifications:

(a) Publication in the FEDERAL REGISTER of a notice of proposed classification pursuant to § 2461.1(a) or of a notice of classification pursuant to § 2461.2 will segregate the affected land to the extent indicated in the notice.

(b) The segregative effect of a proposed classification will terminate in one of the following ways:

(1) Classification of the lands within 2 years of publication of the notice of proposed classification in the FEDERAL REGISTER;

(2) Publication in the FEDERAL REGISTER of a notice of termination of the proposed classification;

(3) An Act of Congress;

(4) Expiration of a 2-year period from the date of publication of the notice of proposed classification without continuance as prescribed by the Classification and Multiple Use Act, or expiration of an additional period, not exceeding 2 years, if the required notice of proposed continuance is given.

(c) The segregative effect of a classification for retention will terminate in one of the following ways:

(1) Reclassification of the lands for some form of disposal;

(2) Publication in the FEDERAL REGISTER of a notice of termination of the classification;

(3) An Act of Congress;

(4) Expiration of the classification.

**Subpart 2462—Disposal Classification Procedure: Over 2,560 Acres**

SOURCE: 35 FR 9564, June 13, 1970, unless otherwise noted.

**§ 2462.0-3 Authority.**

Section 2 of the Classification and Multiple Use Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1412), requires the Secretary of the Interior to take certain actions when he proposes the classification for sale or other disposal under any statute of a tract of land in excess of 2,560 acres.

**§ 2462.1 Publication of notice of, and public hearings on, proposed classification.**

The authorized officer shall publish a notice of his proposed classification in the FEDERAL REGISTER and an announcement in a newspaper having general circulation in the area or areas in the vicinity of the affected land. The notice shall include the legal description of the affected land, the law or laws under which the lands would be disposed of together with such other information as the authorized officer deems pertinent. Copies of the notice will be sent to the head of the governing body of the political subdivision of the State, if any, having jurisdiction over zoning in the geographic area within which the affected lands are located, the governor of that State and the BLM multiple use advisory board in that State, the land-use planning officer and land-use planning committees, if any, of the county, in which the affected lands are located, the authorized user or users of the lands or their selected representatives, all petitioner-applicants involved, and any other party the authorized officer determines to have an interest in the proper use of the lands. The authorized officer will hold a public hearing on the proposal if (a) the proposed classification will affect more than 25,000 acres or (b) he determines that sufficient public interest exists to warrant the time and expense of a hearing.

**§ 2462.2 Publication of notice of classification.**

After having considered the comments received as the result of publication, the authorized officer may classify the lands any time after the expiration of 60 days following the publication of the proposed classification in the FEDERAL REGISTER. The authorized officer shall publicize the classification in the same manner as the proposed classification was publicized, indicating in the notice the differences, if any, between the proposed classification and the classification.

**§ 2462.3 Administrative review.**

For a period of 30 days after publication in the FEDERAL REGISTER of a notice of classification for disposal, the classification shall be subject to the exercise of supervisory authority by the Secretary of the Interior for the purpose of administrative review. If, 30 days from date of publication, the Secretary has neither on his own motion, on motion of any protestant or the State Director exercised supervisory authority for review, the classification shall become the final order of the Secretary. The exercise of supervisory authority by the Secretary shall automatically vacate the classification and reinstate the proposed classification together with its segregative effect. In this event the final departmental decision shall be issued by the Secretary and published in the FEDERAL REGISTER.

**§ 2462.4 Segregative effect of publication.**

(a) Publication in the FEDERAL REGISTER of a notice of proposed classification pursuant to § 2462.1 or of a notice of classification pursuant to § 2462.2 will segregate the affected land from all forms of disposal under the public land laws, including the mining laws except the form or forms of disposal for which it is proposed to classify the lands. However, publication will not alter the applicability of the public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral and vegetative resources, other than under the mining laws.

## Bureau of Land Management, Interior

## Pt. 2520

(b) The segregative effect of a proposed classification will terminate in one of the following ways:

(1) Classification of the lands within 2 years of publication of the notice of proposed classification in the FEDERAL REGISTER;

(2) Publication in the FEDERAL REGISTER of a notice of termination of the proposed classification;

(3) An Act of Congress;

(4) Expiration of a 2-year period from the date of publication of the notice of proposed classification without continuance as prescribed by the Classification and Multiple Use Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1411-18), or expiration of an additional period, not exceeding 2 years, if the required notice of proposed continuance is given.

(c) The segregative effect of a classification for sale or other disposal will terminate in one of the following ways:

(1) Disposal of the lands;

(2) Publication in the FEDERAL REGISTER of a notice of termination of the classification;

(3) An Act of Congress;

(4) Expiration of 2 years from the date of publication of the proposed classification without disposal of the land and without the notice of proposed continuance as prescribed by the Classification and Multiple Use Act; or

(5) Expiration of an additional period, not exceeding 2 years, if the required notice of proposed continuance is given.

### PART 2470—POSTCLASSIFICATION ACTIONS

#### Subpart 2470—Opening and Allowance

Sec.

2470.1 Opening of lands to disposal.

2470.2 Allowance and entry.

SOURCE: 35 FR 9565, June 13, 1970, unless otherwise noted.

#### Subpart 2470—Opening and Allowance

##### § 2470.1 Opening of lands to disposal.

After lands have been classified for disposal, the authorized officer shall, at the appropriate time, open the lands

to those forms of disposal consistent with the classification.

[35 FR 9565 June 13, 1970]

##### § 2470.2 Allowance and entry.

(a) After lands are classified pursuant to the regulations of this part, and opened for entry or other disposal, all the laws and regulations governing the particular kind of entry, location, selection, or other disposal must be complied with in order for title to vest or other interests to pass.

(b) After lands are classified for disposal under the regulations of this subpart, the lands shall be offered for sale or other disposal consistent with the classification. If a petitioner-applicant does not have a preference right under § 2450.8, the lands shall be opened on an equal-opportunity basis.

[35 FR 9565 June 13, 1970]

### Group 2500—Disposition; Occupancy and Use

NOTE: The information collection requirements contained in parts 2520, 2530, 2540 and 2560 of Group 2500 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0004, 1004-1010, 1004-0011, 1004-0023, 1004-0026, 1004-0028, 1004-0029 and 1004-0069. The information is being collected to permit the authorized officer to determine whether certain petitions or applications for use and occupancy of the public lands should be granted. The information will be used to make that determination. A response is required to obtain a benefit.

### Subpart 2520—Desert-Land Entries: General

AUTHORITY: R.S. 2478; 43 U.S.C. 1201.

SOURCE: 35 FR 9581, June 13, 1970, unless otherwise noted.

#### § 2520.0-1 Purpose.

(a) It is the purpose of the statutes governing desert-land entries to encourage and promote the reclamation, by irrigation, of the arid and semiarid public lands of the Western States through individual effort and private capital, it being assumed that settlement and occupation will naturally follow when the lands have thus been rendered more productive and habitable.

## 43 CFR Ch. II (10-1-08 Edition)

#### § 2520.0-3 Authority.

The Act of March 3, 1877 (19 Stat. 377; 43 U.S.C. 321-323) as amended by the Act of March 3, 1891 (26 Stat. 1096; 43 U.S.C. 231, 323, 325, 327-329), provides for the making of desert-land entries in the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

#### § 2520.0-5 Definitions.

(a) As used in the desert-land laws and the regulations of this subpart:

(1) *Reclamation* requires conducting water in adequate amounts and quality to the land so as to render it available for distribution when needed for irrigation and cultivation.

(2) *Cultivation* requires the operation, practice, or act of tillage or preparation of land for seed, and keeping the ground in a state favorable for the growth of crops.

(3) *Irrigation* requires the application of water to land for the purpose of growing crops.

(4) *Crop* includes any agricultural product to which the land under consideration is generally adapted and which would return a fair reward for the expense of producing it.

(5) *Water supply*, to be adequate, must be sufficient to irrigate successfully and to reclaim all of the irrigable land embraced in an entry.

(6) *Water right* means the authority, whether by prior ownership, contract, purchase, or appropriation in accordance with state law, to use water on the land to be irrigated.

#### § 2520.0-7 Cross references.

(a) For assignment of desert-land entries within Government reclamation projects, see § 2524.5(a).

(b) For provisions under Appeals and Hearings see parts 1840 and 1850 of this chapter.

(c) For relinquishments, in general, see subpart 1825 of this chapter.

(d) For residence and cultivation requirements under the homestead laws, see § 2511.4-2(a).

#### § 2520.0-8 Land subject to disposition.

(a) *Land that may be entered as desert land.* (1) As the desert-land law requires

the artificial irrigation of any land entered thereunder, lands which are not susceptible of irrigation by practicable means are not deemed subject to entry as desert lands. The question as to whether any particular tract sought to be entered as desert land is in fact irrigable from the source proposed by the applicant will be investigated and determined before the application for entry is allowed. In order to be subject to entry under the desert-land law, public lands must be not only irrigable but also surveyed, unreserved, unappropriated, non-mineral (except lands withdrawn, classified, or valuable for coal, phosphate, nitrate, potash, sodium, sulphur, oil, gas or asphaltic minerals, which may be entered with a reservation of such mineral deposits, as explained in subpart 2093, nontimbered, and such as will not, without artificial irrigation, produce any reasonably remunerative agricultural crop by the usual means or methods of cultivation. In this latter class are those lands which, one year with another for a series of years, will not without irrigation produce paying crops, but on which crops can be successfully grown in alternate years by means of the so-called dry-farming system. (37 L.D. 522 and 42 L.D. 524.)

(2) Applications to make desert-land entries of lands embraced in applications, permits, or leases under the Act of February 25, 1920 (41 Stat. 437), if in all other respects complete, will be treated in accordance with §§ 2093.0-3 to 2093.0-7. Applications to make desert-land entries of lands within a naval petroleum reserve must be rejected, as no desert-land entry may be allowed for such lands.

(3) Land that has been effectually reclaimed is not subject to desert land entry.

(b) *Quantity of lands that may be entered.* An entry of lands under the Act of March 3, 1877, is limited to 320 acres, subject to the following additional limitations:

(1) An entry of lands within an irrigation district which the Secretary of the Interior or his delegate has approved under the Act of August 11, 1916 (39 Stat. 506; 43 U.S.C. 621-630), is limited to 160 acres.

(2) An entryman may have a desert-land entry for such a quantity of land as, taken together with all land acquired and claimed by him under the other agricultural land laws since August 30, 1890, does not exceed 320 acres in the aggregate, or 480 acres if he shall have made an enlarged homestead entry of 320 acres (Acts of August 30, 1890; 26 Stat. 391; 43 U.S.C. 212; and of February 27, 1917; 39 Stat. 946; 43 U.S.C. 330).

(c) *Entries restricted to surveyed lands.* Unsurveyed public land withdrawn by Executive Orders 6910 and 6964 of November 26, 1934, and February 5, 1935, respectively, is not subject to appropriation, under the desert-land laws, until such appropriation has been authorized by classification. (See parts 2410, 2420, and 2430.)

(d) *Economic unit requirements, compactness.* (1) One or more tracts of public lands may be included in a desert land entry and the tracts so entered need not be contiguous. All the tracts entered, however, shall be sufficiently close to each other to be managed satisfactorily as an economic unit. In addition, the lands in the entry must be in as compact a form as possible taking into consideration the character of available public lands and the effect of allowance of the entry on the remaining public lands in the area.

(2) In addition to the other requirements of the regulations in this part, applicants for desert land entry must submit with their applications information showing that the tracts applied for are sufficiently close to each other to be managed satisfactorily as an economic unit and that the lands in the application are as compact as possible in the circumstances.

(3) In determining whether an entry can be allowed in the form sought, the authorized officer of the Bureau of Land Management will take into consideration such factors as the topography of the applied for and adjoining lands, the availability of public lands near the lands sought, the private lands farmed by the applicant, the farming systems and practices common to the locality and the character of the lands sought, and the practicability of farming the lands as an economically feasible operating unit.

### Subpart 2521—Procedures

SOURCE: 35 FR 9582, June 13, 1970, unless otherwise noted.

#### § 2521.1 Who may make desert-land entry.

(a) *Citizenship.* (1) Any citizen of the United States 21 years of age, or any person of that age who has declared his intention of becoming a citizen of the United States, and who can truthfully make the statements specified in §§ 2520.0–8(c) and 2521.2(a) can make a desert-land entry. Thus, a woman, whether married or single, who possesses the necessary qualifications, can make a desert-land entry, and, if married, without taking into consideration any entries her husband may have made.

(2) At the time of making final proof claimants of alien birth must have been admitted to citizenship, but evidence of naturalization need not be furnished if it has already been filed in connection with the original declaration or with the proof of an assignment of the entry.

(b) *Second and additional entries.* A person's right of entry under the desert-land law is exhausted either by filing an allowable application and withdrawing it prior to its allowance or by making an entry or by taking an assignment of an entry, in whole or in part, except under the conditions described in paragraphs (b)(1) and (2) of this section.

(1) Under the Act of September 5, 1914 (38 Stat. 712; 43 U.S.C. 182), if a person, otherwise duly qualified to make a desert-land entry, has previously filed an allowable application, or made such entry or entries and through no fault of his own has lost, forfeited, or abandoned the same, such person may make another entry. In such case, however, it must be shown that the prior application, entry, or entries were made in good faith, and were lost, forfeited, or abandoned because of matters beyond the applicant's control, and that the applicant has not speculated in his right, nor committed a fraud or attempted fraud in connection with such prior entry or entries. As the assignment of an entry involves no loss, forfeiture, or abandonment thereof, but

carries a benefit to the assignor, it is held to exhaust his right of entry under the desert-land law. Hence, no person who has assigned such entry, in whole or in part, will be permitted to make another entry or to take one or any part thereof by assignment except where paragraph (b)(2) of this section applies.

(2) The Act of June 16, 1955 (69 Stat. 138) authorizes any person who prior to June 16, 1955, made a valid desert-land entry on lands subject to the Acts of June 22, 1910 (36 Stat. 583; 30 U.S.C. 33–85), or of July 17, 1914 (38 Stat. 509; 30 U.S.C. 121–123), if otherwise qualified to enter as a personal privilege not assignable, an additional tract of desert land, providing such additional tract shall not, together with the original entry, exceed 320 acres. Applicants and entrymen under the Act of June 16, 1955, are subject to, and must comply with, all the regulations of this part, including the acreage limitations of § 2520.0–8(b).

#### § 2521.2 Petitions and applications.

(a) *Filing and fees.* (1) A person who desires to enter public lands under the desert land laws must file an application together with a petition on forms approved by the Director, properly executed. However, if the lands described in the application have been already classified and opened for disposition under the desert land laws, no petition is required. The documents must be filed in the proper office (see § 1821.2–1 of this chapter).

(2) All applications must be accompanied by an application service fee of \$15 which is not returnable, and the payment of 25 cents per acre for the lands therein described as required by law.

(b) *Post-office addresses of applicants and witnesses.* Applicants and witnesses must in all cases state their places of actual residence, their business or occupation, and their post-office addresses. It is not sufficient to name only the county or State in which a person lives, but the town or city must be named also; and where the residence is in a city the street and number must be given. It is especially important to claimants that upon changing their

post-office addresses they promptly notify the authorizing officer of such change, for in case of failure to do so their entries may be canceled upon notice sent to the address of record but not received by them.

(c) *Execution of applications and proofs; time for filing of applications.* (1) Applications and proofs, except final proofs required by R.S. 2294 (43 U.S.C. 254), must be signed by the applicants but need not be under oath. Final proofs may be executed before any officer authorized to administer oaths in public land cases, as explained by § 1821.3-2 of this chapter.

(2) An application to make desert-land entry is not acceptable if dated more than 10 days before its filing at the land office.

(d) *Evidence of water rights required with application.* No desert-land application will be allowed unless accompanied by evidence satisfactorily showing either that the intending entryman has already acquired by appropriation, purchase, or contract a right to the permanent use of sufficient water to irrigate and reclaim all of the irrigable portion of the land sought, or that he has initiated and prosecuted, as far as then possible, appropriate steps looking to the acquisition of such a right, or, in States where no permit or right to appropriate water is granted until the land embraced within the application is classified as suitable for desert-land entry or the entry is allowed, a showing that the applicant is otherwise qualified under State law to secure such permit or right. If applicant intends to procure water from an irrigation district, corporation, or association, but is unable to obtain a contract for the water in advance of the allowance of his entry, then he must furnish, in lieu of the contract, some written assurance from the responsible officials of such district, corporation, or association that, if his entry be allowed, applicant will be able to obtain from that source the necessary water. The authorizing officer will examine the evidence submitted in such applications and either reject defective applications or require additional evidence.

#### § 2521.3 Assignment.

(a) *Lands which may be assigned.* While by the Act of March 3, 1891 (26 Stat. 1096; 43 U.S.C. 329), assignments of desert-land entries were recognized, the Department of the Interior, largely for administrative reasons, held that a desert-land entry might be assigned as a whole or in its entirety, but refused to recognize the assignment of only a portion of an entry. The Act of March 28, 1908, however, provides for an assignment of such entries, in whole or in part, but this does not mean that less than a legal subdivision may be assigned. Therefore no assignment, otherwise than by legal subdivisions, will be recognized. The legal subdivisions assigned must be contiguous.

(b) *Qualifications of assignees.* (1) The Act of March 28, 1908, also provides that no person may take a desert-land entry by assignment unless he is qualified to enter the tract so assigned to him. Therefore, if a person is not at least 21 years of age and, excepting Nevada, a resident citizen of the State wherein the land involved is located; or if he is not a citizen of the United States, or a person who has declared his intention to become a citizen thereof; or, if he has made a desert-land entry in his own right and is not entitled under § 2521.1 to make a second or an additional entry, he cannot take such an entry by assignment. The language of the act indicates that the taking of an entry by assignment is equivalent to the making of an entry, and this being so, no person is allowed to take more than one entry by assignment, unless it be done as the exercise of a right of second or additional entry.

(2) A person who has the right to make a second or additional desert-land entry may exercise that right by taking an assignment of a desert-land entry, or part of such entry, if he is otherwise qualified to make a desert-land entry for the particular tract assigned.

(3) The Act of March 28, 1908, also provides that no assignment to or for the benefit of any corporation shall be authorized or recognized.

(c) *Showing required of assignees; recognition of assignments.* (1) As evidence of the assignment there should be transmitted to the authorizing officer

the original deed of assignment or a certified copy thereof. Where the deed of assignment is recorded a certified copy may be made by the officer who has custody of the record. Where the original deed is presented to an officer qualified to take proof in desert-land cases, a copy certified by such officer will be accepted.

(2) An assignee must file with his deed of assignment, a statement on a form approved by the Director, showing his qualifications to take the entry assigned to him. He must show what applications or entries, if any, have been made by him or what entries assigned to him under the agricultural public land laws, and he must also show his qualifications as a citizen of the United States; that he is 21 years of age or over; and also that he is a resident citizen of the State in which the land assigned to him is situated, except in the State of Nevada, where citizenship of the United States only is required. If the assignee is not a native-born citizen of the United States, he should also furnish a statement as to his citizenship status in accordance with subpart 1811 of this chapter. If the assignee is a woman, she should in all cases state whether she is married, and if so, she must make the showing required by subpart 1811 of this chapter. Desert-land entries are initiated by the payment of 25 cents per acre, and no assignable right is acquired by the application prior to such payment. (6 L.D. 541, 33 L.D. 152.) An assignment made on the day of such payment, or soon thereafter, is treated as suggesting fraud, and such cases will be carefully scrutinized. The provisions of law authorizing the assignment of desert entries, in whole or in part, furnish no authority to a claimant under said law to make an executory contract to convey the land after the issuance of patent and thereafter to proceed with the submission of final proof in furtherance of such contract. (34 L.D. 383.) The sale of land embraced in an entry at any time before final payment is made must be regarded as an assignment of the entry, and in such cases the person buying the land must show that he possesses all the qualifications required of an assignee. (29 L.D. 453.) The assignor of a desert-land

entry may execute the assignment before any officer authorized to take acknowledgements of deeds. The assignee must furnish a statement on a form approved by the Director as to his qualifications.

(3) No assignments of desert-land entries or parts of entries are conclusive until examined in the proper office and found satisfactory and the assignment recognized. When recognized, however, the assignee takes the place of the assignor as effectively as though he had made the entry, and is subject to any requirement that may be made relative thereto. The assignment of a desert-land entry to one disqualified to acquire title under the desert-land law, and to whom, therefore, recognition of the assignment is refused by the authorizing officer, does not of itself render the entry fraudulent, but leaves the right thereto in the assignor. In such connection, however, see 42 L.D. 90 and 48 L.D. 519.

(4) All applications for recognition of assignment of desert-land entries must be accompanied by an application service fee of \$10 which will not be returnable.

**§ 2521.4 When lands may be sold, taxed, or mortgaged.**

(a) After final proof and payment have been made the land may be sold and conveyed to another person without the approval of the Bureau of Land Management, but all such conveyances are nevertheless subject to the superior rights of the United States, and the title so contained would fall if it should be finally determined that the entry was illegal or that the entryman had failed to comply with the law.

(b) Lands embraced in unperfected desert-land entries are not subject to taxation by the State authorities, nor to levy and sale under execution to satisfy judgments against the entrymen, except as hereinafter set forth in this section.

(c) Lands embraced in desert-land entries within an irrigation district which the Secretary of the Interior has approved under the Act of August 11, 1916 (39 Stat. 506; 43 U.S.C. 621-630), may be taxed and otherwise dealt with as provided by said act, and lands in desert-land entries within irrigation

## Bureau of Land Management, Interior

## § 2521.5

projects constructed under the Reclamation Act may be taxed as provided for by the Act of June 13, 1930 (46 Stat. 581; 43 U.S.C. 455, 455a-455c).

(d) A desert-land entryman may, however, mortgage his interest in the entered land if, by the laws of the State in which the land is situated, a mortgage of land is regarded as merely creating a lien thereon and not as a conveyance thereof. The purchaser at a sale had for the foreclosure of such mortgage may be recognized as assignee upon furnishing proof of his qualifications to take a desert-land entry by assignment. Transferees, after final proof, mortgagees, or other encumbrancers may file in the proper office written notice stating the nature of their claims, and they will thereupon become entitled to receive notice of any action taken by the Bureau of Land Management with reference to the entry.

(e) The filing of all notices of recordination of claim by transferees, mortgagees or other encumbrancer under this section must be accompanied by a service charge of \$10 which will not be returnable.

### § 2521.5 Annual proof.

(a) *Showing required.* (1) In order to test the sincerity and good faith of claimants under the desert-land laws and to prevent the segregation for a number of years of public lands in the interest of persons who have no intention to reclaim them, Congress, in the Act of March 3, 1891 (26 Stat. 1096; 43 U.S.C. 327, 328) made the requirement that a map be filed at the initiation of the entry showing the mode of contemplated irrigation and the proposed source of water supply, and that there be expended yearly for 3 years from the date of the entry not less than \$1 for each acre of the tract entered, making a total of not less than \$3 per acre, in the necessary irrigation, reclamation, and cultivation of the land, in permanent improvements thereon, and in the purchase of water rights for the irrigation thereof, and that at the expiration of the third year a map or plan be filed showing the character and extent of the improvements placed on the claim. Said act, however, authorizes the submission of final proof at an earlier date

than 4 years from the time the entry is made in cases wherein reclamation has been effected and expenditures of not less than \$3 per acre have been made.

(2) Yearly or annual proof of expenditures must consist of the statements of *two or more credible witnesses*, each of whom must have general knowledge that the expenditures were made for the purpose stated in the proof. Annual proofs must contain itemized statements showing the manner in which expenditures were made.

(b) *Acceptable expenditures.* (1) Expenditures for the construction and maintenance of storage reservoirs, dams, canals, ditches, and laterals to be used by claimant for irrigating his land; for roads where they are necessary; for erecting stables, corrals, etc.; for digging wells, where the water therefrom is to be used for irrigating the land; for stock or interest in an approved irrigation company, or for taxes paid to an approved irrigation district through which water is to be secured to irrigate the land; and for leveling and bordering land proposed to be irrigated, will be accepted. Expenditures for fencing all or a portion of the claim, for surveying for the purpose of ascertaining the levels for canals, ditches, etc., and for the first breaking or clearing of the soil are also acceptable.

(2) The value to be attached to, and the credit to be given for, an expenditure for works or improvements is the reasonable value of the work done or improvement placed upon the land, according to the market price therefor, or for similar work or improvements prevailing in the vicinity, and not the amount alleged by a claimant to have been expended nor the mere proof of expenditures, as exhibited by checks or other vouchers. (*Bradley v. Vasold*, 36 L.D. 106.)

(c) *Expenditures not acceptable.* (1) Expenditures for cultivation after the soil has been first prepared may not be accepted, because the claimant is supposed to be compensated for such work by the crops to be reaped as a result of cultivation. Expenditures for surveying the claim in order to locate the corners of same may not be accepted. The cost of tools, implements, wagons, and repairs to same, used in construction

work, may not be computed in cost of construction. Expenditures for material of any kind will not be allowed unless such material has actually been installed or employed in and for the purpose for which it was purchased. For instances, if credit is asked for posts and wire for fences or for pump or other well machinery, it must be shown that the fence has been actually constructed or the well machinery actually put in place. No expenditures can be credited on annual proofs upon a desert-land entry unless made on account of that particular entry, and expenditures once credited can not be again applied. This rule applies to second entries as well as to original entries, and a claimant who relinquishes his entry and makes second entry of the same land under the Act of September 5, 1914, cannot receive credit on annual proofs upon the second entry for expenditures made on account of the former entry. (41 L.D. 601 and 42 L.D. 523.)

(2) Expenditures for the clearing of the land will not receive credit in cases where the vegetation or brush claimed to have been cleared away has not been actually removed by the roots. Therefore, expenditures for clearing, where as a matter of fact there has been only crushing, or rolling, or what is known in some localities as ralling the land will not be accepted.

(3) No expenditures for stock or interest in an irrigation company, through which water is to be secured for irrigating the land, will be accepted as satisfactory annual expenditure until a field examiner, or other authorized officer, has submitted a report as to the resources and reliability of the company, including its actual water right, and such report has been favorably acted upon by the Bureau of Land Management. The stock purchased must carry the right to water, and it must be shown that payment in cash has been made at least to the extent of the amount claimed as expenditure for the purchase of such stock in connection with the annual proof submitted, and such stock must be actually owned by the claimants at the time of the submission of final proof.

(d) *Procedure where proof is not made when due.* Authorizing officers will ex-

amine their records frequently for the purpose of ascertaining whether all annual proofs due on pending desert-land entries have been made, and in every case where the claimant is in default in that respect they will send him notice and allow him 60 days in which to submit such proof. If the proof is not furnished as required the entry will be canceled. During the pendency of a Government proceeding initiated by such notice the entry will be protected against a private contest charging failure to make the required expenditures, and such contest will neither defeat the claimant's right to equitably perfect the entry as to the matter of expenditures during the 60 days allowed in the notice nor secure to the contestant a preference right in event the entry be canceled for default under said notice.

(e) *Desert land entry in more than one district.* When a desert-land entry embraces land in more than one district, the required annual proofs may be filed in either district, provided proper reference is made to the portion of the entry in the adjoining district, and the entryman must notify the authorized officer of the adjoining district by letter of the date when the annual proof is filed.

(f) *Extensions of time.* (1) The law makes no provision for extensions of time in which to file annual proof becoming due subsequent to December 31, 1936, on desert-land entries not embraced within the exterior boundaries of any withdrawal or irrigation project under the Reclamation Act of June 17, 1902 (32 Stat. 388), and extensions for said purpose cannot therefore be granted. However, where a township is suspended from entry for the purpose of resurvey thereof the time between the date of suspension and the filing in the local office of the new plat of survey will be excluded from the period accorded by law for the reclamation of land under a desert entry within such township and the statutory life of the entry extended accordingly (40 L.D. 223). During the continuance of the extension the claimant may, at his option, defer the making of annual expenditures and proof thereof.

(2) Extensions of time for making desert-land proofs were authorized by

the Acts of June 16, 1933 (48 Stat. 274; 43 U.S.C. 256a), July 26, 1935 (49 Stat. 504; 43 U.S.C. 256a), and June 16, 1937 (50 Stat. 303; 43 U.S.C. 256a). Such acts affect only proofs becoming due on or before December 31, 1936. For that reason, the regulations which were issued thereunder have not been included in this chapter.

(g) *Submission of proof before due date.* Nothing in the statutes or regulations should be construed to mean that the entryman must wait until the end of the year to submit his annual proof because the proof may be properly submitted as soon as the expenditures have been made. Proof sufficient for the 3 years may be offered whenever the amount of \$3 an acre has been expended in reclaiming and improving the land, and thereafter annual proof will not be required.

#### § 2521.6 Final proof.

(a) *General requirements.* The entryman, his assigns, or, in case of death, his heirs or devisees, are allowed 4 years from date of the entry within which to comply with the requirements of the law as to reclamation and cultivation of the land and to submit final proof, but final proof may be made and patent thereon issued as soon as there has been expended the sum of \$3 per acre in improving, reclaiming, and irrigating the land, and one-eighth of the entire area entered has been properly cultivated and irrigated, and when the requirements of the desert-land laws as to water rights and the construction of the necessary reservoirs, ditches, dams, etc., have been fully complied with.

(1) Where the proof establishes that the entryman cannot effect timely compliance with the law, the entry must be canceled unless statutory authority permits the granting of an extension of time or other relief.

(b) *Notice of intention to make final proof.* When an entryman has reclaimed the land and is ready to make final proof, he should apply to the authorizing officer for a notice of intention to make such proof. This notice must contain a complete description of the land, give the number of the entry and name of the claimant, and must bear an endorsement specifically indicating the source of his water supply. If the proof

is made by an assignee, his name, as well as that of the original entryman, should be stated. It must also show when, where and before whom the proof is to be made. Four witnesses may be named in this notice, two of whom must be used in making proof. Care should be exercised to select as witnesses persons who are familiar, from personal observation, with the land in question, and with what has been done by the claimant toward reclaiming and improving it. Care should also be taken to ascertain definitely the names and addresses of the proposed witnesses, so that they may correctly appear in the notice.

(c) *Publication of final-proof notice.* The authorizing officer will issue the usual notice for publication. This notice must be published once a week for five successive weeks in a newspaper of established character and general circulation published nearest the lands (see 38 L.D. 131; 43 L.D. 216). The claimant must pay the cost of the publication but it is the duty of authorizing officers to procure the publication of proper final-proof notices. The date fixed for the taking of the proof must be at least 30 days after the date of first publication. Proof of publication must be made by the statement of the publisher of the newspaper or by someone authorized to act for him.

(d) *Submission of final proof.* On the day set in the notice (or, in the case of accident or unavoidable delay, within 10 days thereafter), and at the place and before the officer designated, the claimant will appear with two of the witnesses named in the notice and make proof of the reclamation, cultivation, and improvement of the land. The testimony of each claimant should be taken separately and apart from and not within the hearing of either of his witnesses, and the testimony of each witness should be taken separately and apart from and not within the hearing of either the applicant or of any other witness, and both the applicant and each of the witnesses should be required to state, in and as a part of the final-proof testimony given by them, that they have given such testimony without any actual knowledge of any statement made in the testimony of either of the others. In every instance

where, for any reason whatever, final proof is not submitted within the 4 years prescribed by law, or within the period of an extension granted for submitting such proof, a statement should be filed by claimant, with the proof, explaining the cause of delay.

The final proof may be made before any officer authorized to administer oaths in public land cases, as explained in § 1821.3-2 of this chapter.

(e) *Showing as to irrigation system.* The final proof must show specifically the source and volume of the water supply and how it was acquired and how it is maintained. The number, length, and carrying capacity of all ditches, canals, conduits, and other means to conduct water to and on each of the legal subdivisions must also be shown. The claimant and the witnesses must each state in full all that has been done in the matter of reclamation and improvements of the land, and must answer fully, of their own personal knowledge, all of the questions contained in the final-proof blanks. They must state plainly whether at any time they saw the land effectually irrigated, and the different dates on which they saw it irrigated should be specifically stated.

(f) *Showing as to lands irrigated and reclaimed.* While it is not required that all of the land shall have been actually irrigated at the time final proof is made, it is necessary that the one-eighth portion which is required to be cultivated shall also have been irrigated in a manner calculated to produce profitable results, considering the character of the land, the climate, and the kind of crops being grown. (Alonzo B. Cole, 38 L.D. 420.) The cultivation and irrigation of the one-eighth portion of the entire area entered may be had in a body on one legal subdivision or may be distributed over several subdivisions. The final proof must clearly show that all of the permanent main and lateral ditches, canals, conduits, and other means to conduct water necessary for the irrigation of all the irrigable land in the entry have been constructed so that water can be actually applied to the land as soon as it is ready for cultivation. If pumping be relied upon as the means of irrigation, the plant installed for that

purpose must be of sufficient capacity to render available enough water for all the irrigable land. If there are any high points or any portions of the land which for any reason it is not practicable to irrigate, the nature, extent, and situation of such areas in each legal subdivision must be fully stated. If less than one-eighth of a smallest legal subdivision is practically susceptible of irrigation from claimant's source of water supply and no portion thereof is used as a necessary part of his irrigation scheme, such subdivision must be relinquished. (43 L.D. 269.)

(g) *Showing as to tillage of land.* As a rule, actual tillage of one-eighth of the land must be shown. It is not sufficient to show only that there has been a marked increase in the growth of grass or that grass sufficient to support stock has been produced on the land as a result of irrigation. If, however, on account of some peculiar climatic or soil conditions, no crops except grass can be successfully produced, or if actual tillage will destroy or injure the productive quality of the soil, the actual production of a crop of hay of merchantable value will be accepted as sufficient compliance with the requirements as to cultivation. (32 L.D. 456.) In such cases, however, the facts must be stated and the extent and value of the crop of hay must be shown, and, as before stated, that same was produced as a result of actual irrigation.

(h) *Showing as to water right.* (1) In every case where the claimant's water right is founded upon contract or purchase the final proof must embrace evidence which clearly establishes the fact and legal sufficiency of that right. If claimant's ownership of such right has already been evidenced in connection with the original entry or some later proceeding, then the final proof must show his continued possession thereof. If the water right relied on is obtained under claimant's appropriation, the final proof, considered together with any evidence previously submitted in the matter, must show that the claimant has made such preliminary filings as are required by the laws of the State in which the land is located, and that he has also taken all other steps necessary under said laws to secure and perfect the claimed water

right. In all cases the water right, however it be acquired, must entitle the claimant to the use of a sufficient supply of water to irrigate successfully all the irrigable land embraced in his entry, notwithstanding that the final proof need only show the actual irrigation of one-eighth of that area.

(2) In those States where entrymen have made applications for water rights and have been granted permits but where no final adjudication of the water right can be secured from the State authorities owing to delay in the adjudication of the watercourses or other delay for which the entrymen are in no way responsible, proof that the entrymen have done all that is required of them by the laws of the State, together with proof of actual irrigation of one-eighth of the land embraced in their entries, may be accepted. This modification of the rule that the claimant must furnish evidence of an absolute water right will apply only in those States where under the local laws it is impossible for the entryman to secure final evidence of title to his water right within the time allowed him to submit final proof on his entry, and in such cases the best evidence obtainable must be furnished. (35 L.D. 305.)

(3) It is a well-settled principle of law in all of the States in which the desert land acts are operative that actual application to a beneficial use of water appropriated from public streams measures the extent of the right to the water, and that failure to proceed with reasonable diligence to make such application to beneficial use within a reasonable time constitutes an abandonment of the right. (Wiel's Water Rights in the Western States, sec. 172.) The final proof, therefore, must show that the claimant has exercised such diligence as will, if continued, under the operation of this rule result in his definitely securing a perfect right to the use of sufficient water for the permanent irrigation and reclamation of all of the irrigable land in his entry. To this end the proof must at least show that water which is being diverted from its natural course and claimed for the specific purpose of irrigating the lands embraced in claimant's entry, under a legal right acquired by virtue

of his own or his grantor's compliance with the requirements of the State laws governing the appropriation of public waters, has actually been conducted through claimant's main ditches to and upon the land; that one-eighth of the land embraced in the entry has been actually irrigated and cultivated; that water has been brought to such a point on the land as to readily demonstrate that the entire irrigable area may be irrigated from the system; and that claimant is prepared to distribute the water so claimed over all of the irrigable land in each smallest legal subdivision in quantity sufficient for practical irrigation as soon as the land shall have been cleared or otherwise prepared for cultivation. The nature of the work necessary to be performed in and for the preparation for cultivation of such part of the land as has not been irrigated should be carefully indicated, and it should be shown that the said work of preparation is being prosecuted with such diligence as will permit of beneficial application of appropriated water within a reasonable time.

(4) Desert-land claimants should bear in mind that a water right and a water supply are not the same thing and that the two are not always or necessarily found together. Strictly speaking, a perfect and complete water right for irrigation purposes is confined to and limited by the area of land that has been irrigated with the water provided thereunder. Under the various State laws, however, an inchoate or incomplete right may be obtained which is capable of ripening into a perfect right if the water is applied to beneficial use with reasonable diligence. A person may have an apparent right of this kind for land which he has not irrigated, and which, moreover, he never can irrigate because of the lack of available water to satisfy his apparent right. Such an imperfect right, of course, cannot be viewed as meeting the requirements of the desert-land law which contemplates the eventual reclamation of all the irrigable land in the entry. Therefore, and with special reference to that portion of the irrigable land of an entry not required to be irrigated and cultivated before final proof, an incomplete (though real) water

right will not be acceptable if its completion appears to be impossible because there is no actual supply of water available under the appropriation in question.

(i) *Showing where water supply is derived from irrigation project.* (1) Where the water right claimed in any final proof is derived from an irrigation project it must be shown that the entryman owns such an interest therein as entitles him to receive from the irrigation works of the project a supply of water sufficient for the proper irrigation of the land embraced in his entry. Investigations by field examiners as to the resources and reliability, including particularly the source and volume of the water supply, of all irrigation companies associations, and districts through which desert-land entrymen seek to acquire water rights for the reclamation of their lands are made, and it is the purpose of the Bureau of Land Management to accept no annual or final proofs based upon such a water right until an investigation of the company in question has been made and report thereon approved. The information so acquired will be regarded as determining, at least tentatively, the amount of stock or interest which is necessary to give the entryman a right to a sufficient supply of water; but the entryman will be permitted to challenge the correctness of the report as to the facts alleged and the validity of its conclusions and to offer either with his final proof or subsequently such evidence as he can tending to support his contentions.

(2) Entrymen applying to make final proof are required to state the source of their water supply, and if water is to be obtained from the works of an irrigation company, association, or district the authorizing officer will endorse the name and address of the project upon the copy of the notice to be forwarded to the State Director. If the report on the company has been acted upon by the Bureau of Land Management and the proof submitted by claimant does not show that he owns the amount of stock or interest in the company found necessary for the area of land to be reclaimed, the authorizing officer will suspend the proof, advise

the claimant of the requirements made by the Bureau of Land Management in connection with the report, and allow him 30 days within which to comply therewith or to make an affirmative showing in duplicate and apply for a hearing. In default of any action by him within the specified time the authorizing officer will reject the proof, subject to the usual right of appeal.

(j) *Final-proof expiration notice.* (1) Where final proof is not made within the period of 4 years, or within the period for which an extension of time has been granted, the claimant will be allowed 90 days in which to submit final proof. (44 L.D. 364.)

(2) Should no action be taken within the time allowed, the entry will be canceled. The 90 days provided for in this section must not be construed as an extension of time or as relieving the claimant from the necessity of explaining why the proof was not made within the statutory period or within such extensions of that period as have been specifically granted.

(k) *Requirements where township is suspended for resurvey.* No claimant will be required to submit final proof while the township embracing his entry is under suspension for the purpose of resurvey. (40 L.D. 223.) This also applies to annual proof. In computing the time when final proof on an entry so affected will become due the period between the date of suspension and the filing in the local office of the new plat of survey will be excluded. However, if the claimant so elects, he may submit final proof on such entry notwithstanding the suspension of the township.

#### § 2521.7 Amendments.

(a) *To enlarge area of desert-land entry.* Amendment for the purpose of enlarging the area of a desert-land entry will be granted under and in the conditions and circumstances now to be stated.

(1) In any case where it is satisfactorily disclosed that entry was not made to embrace the full area which might lawfully have been included therein because of existing appropriations of all contiguous lands then appearing to be susceptible of irrigation through and by means of entryman's water supply, or of all such lands which

## Bureau of Land Management, Interior

## § 2522.1

seemed to be worthy of the expenditure requisite for that purpose, said lands having since been released from such appropriations.

(2) Where contiguous tracts have been omitted from entry because of entryman's belief, after a reasonably careful investigation, that they could not be reclaimed by means of the water supply available for use in that behalf, it having been subsequently discovered that reclamation thereof can be effectively accomplished by means of a changed plan or method of conserving or distributing such water supply.

(3) Where, at the time of entry, the entryman announced, in his declaration, his purpose to procure the cancellation, through contest or relinquishment, of an entry embracing lands contiguous to those entered by him, and thereafter to seek amendment of his entry in such manner as to embrace all or some portion of the lands so discharged from entry.

(b) *Conditions governing amendments in exercise of equitable powers; amendments involving homestead and desert-land entries of adjoining lands.* Applications for amendment presented pursuant to § 1821.6-5(a) of this chapter will not be granted, except where at least one legal subdivision of the lands originally entered is retained in the amended entry, and any such application must be submitted within 1 year next after discovery by the entryman of the existence of the conditions relied upon as entitling him to the relief he seeks, or within 1 year succeeding the date on which, by the exercise of reasonable diligence, the existence of such conditions might have been discovered: *Provided, nevertheless,* That where an applicant for amendment has made both homestead and desert land entries for contiguous lands, amendment may be granted whereby to transfer the desert-land entry, in its entirety, to the land covered by the homestead entry, and the homestead entry, in its entirety, to the land covered by the desert-land entry, or whereby to enlarge the desert-land entry in such manner as that it will include the whole or some portion of the lands embraced in the homestead entry, sufficient equitable reason for such enlargement being exhibited, and the area of the enlarged

entry in no case exceeding 320 acres. Applications for such amendments may be made under §§ 1821.6-1 to 1821.6-5 of this chapter and on the prescribed form, in so far as the same are applicable. A supplemental statement should also be furnished, if necessary, to show the facts.

(c) *Evidence of water-right to accompany application to amend desert-land entry.* Application to amend desert-land entries by the addition of a new and enlarged area or by transferring the entry to lands not originally selected for entry must be accompanied by evidence of applicant's right to the use of water sufficient for the adequate irrigation of said enlarged area or of the lands to which entry is to be transferred. Such evidence must be in the form prescribed by § 2521.2.

### § 2521.8 Contests.

(a) Contests may be initiated by any person seeking to acquire title to or claiming an interest in the land involved against a party to any desert-land entry because of priority of claim or for any sufficient cause affecting the legality or validity of the claim not shown by the records of the Bureau of Land Management.

(b) Successful contestants will be allowed a preference right of entry for 30 days after notice of the cancellation of the contested entry, in the same manner as in homestead cases, and the authorizing officer will give the same notice and is entitled to the same fee for notice as in other cases.

### § 2521.9 Relinquishments.

A desert-land entry may be relinquished at any time by the party owning the same. Conditional relinquishments will not be accepted.

## Subpart 2522—Extensions of Time To Make Final Proof

SOURCE: 35 FR 9587, June 13, 1970, unless otherwise noted.

### § 2522.1 General acts authorizing extensions of time.

(a) There are five general Acts of Congress which authorize the allowance, under certain conditions, of an extension of time for the submission of

final proof by a desert-land claimant. Said Acts are the following: June 27, 1906 (Sec. 5, 34 Stat. 520; 43 U.S.C. 448); March 28, 1908 (Sec. 3, 35 Stat. 52; 43 U.S.C. 333); April 30, 1912 (37 Stat. 106; 43 U.S.C. 334); March 4, 1915 (Sec. 5, 38 Stat. 1161; 43 U.S.C. 335); and February 25, 1925 (43 Stat. 982; 43 U.S.C. 336). The Act of June 27, 1906, is applicable only to entries embraced within the exterior limits of some withdrawal or irrigation project under the Reclamation Act of June 17, 1902 (32 Stat. 388).

(b) In addition to the Acts cited in this section, extensions of time for making desert-land proofs were authorized by the Acts of June 16, 1933 (48 Stat. 274; 43 U.S.C. 256a), July 26, 1935 (49 Stat. 504; 43 U.S.C. 256a), and June 16, 1937 (50 Stat. 303; 43 U.S.C. 256a). Such Acts affect only proofs becoming due on or before December 31, 1936. For that reason, the regulations which were issued thereunder have not been included in this chapter.

**§ 2522.2 Procedure on applications for extensions of time, where contest is pending.**

(a) A pending contest against a desert-land entry will not prevent the allowance of an application for extension of time, where the contest affidavit does not charge facts tending to overcome the prima facie showing of right to such extension (41 L.D. 603).

(b) Consideration of an application for extension of time will not be deferred because of the pendency of a contest against the entry in question unless the contest charges be sufficient, if proven, to negative the right of the entryman to an extension of time for making final proof. If the contest charges be insufficient, the application for extension, where regular in all respects, will be allowed and the contest dismissed subject to the right of appeal, but without prejudice to the contestant's right to amend his charges.

**§ 2522.3 Act of March 28, 1908.**

Under the provisions of the Act of March 28, 1908 (35 Stat. 52; 43 U.S.C. 333), the period of 4 years may be extended, in the discretion of the authorizing officer, for an additional period not exceeding 3 years, if, by reason of

some unavoidable delay in the construction of the irrigating works intended to convey water to the land, the entryman is unable to make proof of reclamation and cultivation required within the 4 years. This does not mean that the period within which proof may be made will be extended as a matter of course for 3 years. Applications for extension under said act will not be granted unless it be clearly shown that the failure to reclaim and cultivate the land within the regular period of 4 years was due to no fault on the part of the entryman but to some unavoidable delay in the construction of the irrigation works for which he was not responsible and could not have readily foreseen (37 L.D. 332). It must also appear that he has complied with the law as to annual expenditures and proof thereof.

**§ 2522.4 Act of April 30, 1912.**

(a) Under the provisions of the Act of April 30, 1912 (37 Stat. 106; 43 U.S.C. 334), a further extension of time may be granted for submitting final proof, not exceeding 3 years, where it is shown that, because of some unavoidable delay in the construction of irrigation works intended to convey water to the land embraced in his entry, the claimant is, without fault on his part, unable to make proof of the reclamation and cultivation of said lands within the time limited therefor, but such further extension cannot be granted for a period of more than 3 years nor affect contests initiated for a valid existing reason.

(b) An entryman who has complied with the law as to annual expenditures and proof thereof and who desires to make application for extension of time under the provisions of the Act of March 28, 1908, should file with the authorizing officer a statement setting forth fully the facts, showing how and why he has been prevented from making final proof of reclamation and cultivation within the regular period. This statement must be corroborated by two witnesses who have personal knowledge of the facts.

**§ 2522.5 Act of February 25, 1925.**

Applications for further extension of time under the Act of April 30, 1912,

## Bureau of Land Management, Interior

## § 2524.1

and February 25, 1925 (43 Stat. 982; 43 U.S.C. 336), may be made in the same manner, and the same procedure will be followed with respect to such applications as under the Act of March 28, 1908, and the Act of March 4, 1915 (38 Stat. 1161; 43 U.S.C. 335), as amended.

### § 2522.6 Service fees.

All applications for extension of time made under the Acts of March 28, 1908, April 30, 1912, or February 25, 1925, must be accompanied by an application service fee of \$10 which will not be returnable.

## Subpart 2523—Payments

### § 2523.1 Collection of purchase money and fees; issuance of final certificate.

(a) At the time of making final proof the claimant must pay to the authorizing officer the sum of \$1 per acre for each acre of land upon which proof is made. This, together with the 25 cents per acre paid at the time of making the original entry, will amount to \$1.25 per acre, which is the price to be paid for all lands entered under the desert land law.

(b) If the entryman is dead and proof is made by anyone for the heirs, no will being suggested in the record, the final certificate should issue to the heirs generally, without naming them; if by anyone for the heirs or devisees, final certificate should issue in like manner to the heirs or devisees.

(c) When final proof is made on an entry made prior to the Act of March 28, 1908 (35 Stat. 52; 43 U.S.C. 324, 326, 333), for unsurveyed land, if the land is still unsurveyed and such proof is satisfactory, the authorizing officer will approve same without collecting the final payment of \$1 an acre and without issuing final certificate. Fees for reducing the final-proof testimony to writing should be collected and receipt issued therefor if the proof is taken before the authorizing officer. As soon as the plat or plats of any township or townships previously unsurveyed are filed in the proper office the authorizing office will examine his records for the purpose of determining, if possible, whether or not, prior to the passage of the Act of March 28, 1908, any desert-

land entry of unsurveyed land was allowed in the locality covered by the said plats; and if any such entries are found intact, he will call upon the claimants thereof to file a statement of adjustment, corroborated by two witnesses, giving the correct description, in accordance with the survey of the lands embraced in their respective entries.

(d) If the final proof has been made upon any desert-land entry so adjusted and the records show that such proof has been found satisfactory and no conflicts or other objections are apparent, the manager will allow claimant 60 days within which to make final payment for the land.

[35 FR 9588, June 13, 1970]

### § 2523.2 Amounts to be paid.

No fees or commissions are required of persons making entry under the desert land laws except such fees as are paid to the officers for taking the affidavits and proofs. Unless the entry be perfected under the Act of February 14, 1934 (48 Stat. 349; 43 U.S.C. 339), the only payments made to the Government are the original payment of 25 cents an acre at the time of making the application and the final payment of \$1 an acre, to be paid at the time of making the final proof. On all final proofs made before the authorizing officer, the claimant must pay to the authorizing officer the costs of reducing the testimony to writing, as determined by the authorizing officer. No proof shall be accepted or approved until all charges have been paid.

[35 FR 9588, June 13, 1970]

## Subpart 2524—Desert-Land Entries Within a Reclamation Project

AUTHORITY: Sec. 10, 32 Stat. 390; as amended; 43 U.S.C. 373.

SOURCE: 35 FR 9588, June 13, 1970, unless otherwise noted.

### § 2524.1 Conditions excusing entrymen from compliance with the desert-land laws.

(a) By section 5 of the Act of June 27, 1906 (34 Stat. 520, 43 U.S.C. 448), it is provided that any desert-land

## § 2524.2

entryman who has been or may be directly or indirectly hindered or prevented from making improvements on or from reclaiming the lands embraced in his entry, by reason of the fact that such lands have been embraced within the exterior limits of any withdrawal under the Reclamation Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 372 *et seq.*) will be excused during the continuance of such hindrance from complying with the provisions of the desert-land laws.

(b) *Persons excused from compliance with the desert-land laws.* Section 5 of the Act of June 27, 1906, applies only to persons who have been, directly or indirectly, delayed or prevented, by the creation of any reclamation project, or by any withdrawal of public lands under the reclamation law, from improving or reclaiming the lands covered by their entries.

(c) *Statement required to warrant excuse.* No entryman will be excused under this act from a compliance with all of the requirements of the desert-land law until he has filed in the proper office for the district in which his lands are situated a statement showing in detail all of the facts upon which he claims the right to be excused. This statement must show when the hindrance began, the nature, character, and extent of the same, and it must be corroborated by two disinterested persons, who can testify from their own personal knowledge.

## § 2524.2 Annual proof.

(a) *Extension of time.* Inasmuch as entrymen are allowed 1 year after entry in which to submit the first annual proof of expenditures for the purpose of improving and reclaiming the land entered by them, the privileges of the Act of June 27, 1906, are not necessary in connection with annual proofs until the expiration of the years in which such proofs are due. Therefore, if at the time that annual proof is due it can not be made, on account of hindrance or delay occasioned by a withdrawal of the land for the purpose indicated in the act, the applicant will file his statement explaining the delay. As a rule, however, annual proofs may be made, notwithstanding the withdrawal of the land, because expenditures for various kinds of improve-

## 43 CFR Ch. II (10-1-08 Edition)

ments are allowed as satisfactory annual proofs. Therefore an extension of time for making annual proof will not be granted unless it is made clearly to appear that the entryman has been delayed or prevented by the withdrawal from making the required improvements; and, unless he has been so hindered or prevented from making the required improvements, no application for extension of time for making final proof will be granted until after all the yearly proofs have been made.

(b) *When application for extension of time should be filed.* An entryman will not need to invoke the privileges of the Act of June 27, 1906, in connection with final proof until such final proof is due, and if at that time he is unable to make the final proof of reclamation and cultivation, as required by law, and such inability is due, directly or indirectly, to the withdrawal of the land on account of a reclamation project, the statement explaining the hindrance and delay should be filed in order that the entryman may be excused for such failure.

## § 2524.3 Time extended to make final proof.

When the time for submitting final proof has arrived and the entryman is unable, by reason of the withdrawal of the land, to make such proof, upon proper showing, he will be excused and the time during which it is shown that he has been hindered or delayed on account of the withdrawal of the land will not be computed in determining the time within which final proof must be made.

## § 2524.4 Beginning of period for compliance with the law.

If, after investigation the irrigation project has been or may be abandoned by the Government, the time for compliance with the law by the entryman shall begin to run from the date of notice of such abandonment of the project and of the restoration to the public domain of the lands which had been withdrawn in connection with the project. If, however, the reclamation project is carried to completion by the Government and a water supply has been made available for the land embraced in such desert-land entry, the

## Bureau of Land Management, Interior

## § 2524.8

entryman must, if he depends on the Government's project for his water supply, comply with all provisions of the reclamation law, and must under the Act of June 6, 1930 (46 Stat. 502; 43 U.S.C. 448), relinquish or assign in not less than 2 years after notice all the land embraced in his entry in excess of one farm unit, and upon making final proof and complying with the regulations of the Department applicable to the remainder of the irrigable land of the project and with the terms of payment prescribed in the reclamation law, he shall be entitled to patent as to such retained farm unit, and final water-right certificate containing lien as provided for by the Act of August 9, 1912 (37 Stat. 265; 43 U.S.C. 541-546), Act of August 26, 1912 (37 Stat. 610; 43 U.S.C. 547), and the Act of February 15, 1917 (39 Stat. 920; 43 U.S.C. 541), or to patent without a lien if provision therefor shall have been made as provided for by the Act of May 15, 1922 (42 Stat. 541; 43 U.S.C. 511-513).

### **§ 2524.5 Assignment of desert-land entries in whole or in part.**

(a) *Act of July 24, 1912.* Under the Act of July 24, 1912 (37 Stat. 200; 43 U.S.C. 449), desert-land entries covering lands within the exterior limits of a Government reclamation project may be assigned in whole or in part, even though water-right application has been filed for the land in connection with the Government reclamation project, or application for an extension of time in which to submit proof on the entry has been submitted, under the Act of June 27, 1906 (34 Stat. 520; 43 U.S.C. 448), as amended by the Act of June 6, 1930 (46 Stat. 502; 43 U.S.C. 448), requiring reduction of the area of the entry to one farm unit.

(b) *Amendment of farm-unit plat after partial assignment.* Where it is desired to assign part of a desert-land entry which has been designated as a farm unit, application for the amendment of the farm-unit plat should be filed with the official in charge of the project, as in the case of assignments of homestead entries. (See § 2515.5 (a)(3) to (5).) The same disposition of amendatory diagrams will be made and the same procedure followed as provided for assignments of homestead entries.

### **§ 2524.6 Desert-land entryman may proceed independently of Government irrigation.**

Special attention is called to the fact that nothing contained in the Act of June 27, 1906 (34 Stat. 520; 43 U.S.C. 448), shall be construed to mean that a desert-land entryman who owns a water right and reclaims the land embraced in his entry must accept the conditions of the reclamation law, but he may proceed independently of the Government's plan of irrigation and acquire title to the land embraced in his desert-land entry by means of his own system of irrigation.

### **§ 2524.7 Disposal of lands in excess of 160 acres.**

Desert-land entrymen within exterior boundaries of a reclamation project who expect to secure water from the Government must relinquish or assign all of the lands embraced in their entries in excess of one farm unit in not less than 2 years after notice through the land office, must reclaim one-half of the irrigable area covered by their water right in the same manner as private owners of land irrigated under a reclamation project, and also comply with the regulations of the Department applicable to the remainder of the irrigable land of the project.

### **§ 2524.8 Cancellation of entries for nonpayment of water-right charges.**

All homestead and desert-land entrymen holding land under the reclamation law must, in addition to paying the water-right charges, reclaim the land as required by the reclamation law. Homestead entrymen must reside upon, cultivate, and improve the lands embraced in their entries for not less than the period required by the homestead laws. Desert-land entrymen must comply with the provisions of the desert-land laws as amended by the reclamation law. Failure to make payment of any water-right charges due for more than 1 year, will render the entry subject to cancellation and the money paid subject to forfeiture, whether water-right application has been made or not.

**§ 2530.0–3 Authority.**

(a) *General Allotment Act of February 8, 1887.* Section 4 of the General Allotment Act of February 8, 1887 (24 Stat. 389; 25 U.S.C. 334), as amended by the Act of February 28, 1891 (26 Stat. 794), and section 17 of the Act of June 25, 1910 (36 Stat. 859; 25 U.S.C. 336), provides that where any Indian entitled to allotment under existing laws shall make settlement upon any surveyed or unsurveyed lands of the United States not otherwise appropriated, he or she shall be entitled, upon application to the proper office for the district in which the lands are located, to have the same allotted to him or her and to his or her children in manner as provided by law for allotments to Indians residing upon reservations, and that such allotments to Indians on the public domain shall not exceed 40 acres of irrigable land, or 80 acres of nonirrigable agricultural land or 160 acres of nonirrigable grazing land to any one Indian.

(b) *Act of March 1, 1933.* The Act of March 1, 1933 (47 Stat. 1418; 43 U.S.C.

190a) provides that no further allotments of lands to Indians on the public domain shall be made in San Juan County, Utah.

(c) *Executive Orders 6910 and 6964, Taylor Grazing Act of June 28, 1934.* Public land withdrawn by Executive Orders 6910 and 6964 of November 26, 1934, and February 5, 1935, respectively, and land within grazing districts established under section 1 of the Taylor Grazing Act of June 28, 1934 (43 U.S.C. 315), is not subject to settlement under section 4 of the General Allotment Act of February 8, 1887, as amended, until such settlement has been authorized by classification. See parts 2410, 2420, and 2430 of this chapter.

[35 FR 9589, June 13, 1970, as amended at 37 FR 23184, Oct. 31, 1972]

**§ 2530.0–7 Cross reference.**

For native allotments in Alaska see subpart 2561 of this chapter.

[35 FR 9589, June 13, 1970]

**§ 2530.0–8 Land subject to allotment.**

(a) *General.* (1) The law provides that allotments may include not to exceed 40 acres of irrigable land, 80 acres of nonirrigable agricultural land, or 160 acres of nonirrigable grazing land.

(2) Irrigable lands are those susceptible of successful irrigation at a reasonable cost from any known source of water supply; nonirrigable agricultural lands are those upon which agricultural crops can be profitably raised without irrigation; grazing lands are those which can not be profitably devoted to any agricultural use other than grazing.

(3) An allotment may be allowed for coal and oil and gas lands, with reservation of the mineral contents to the United States.

[35 FR 9589, June 13, 1970]

**Subpart 2531—Applications, Generally****§ 2531.1 Qualifications of applicants.**

(a) *General.* An applicant for allotment under the fourth section of the Act of February 8, 1887, as amended, is required to show that he is a recognized member of an Indian tribe or is

entitled to be so recognized. Such qualifications may be shown by the laws and usages of the tribe. The mere fact, however, that an Indian is a descendant of one whose name was at one time borne upon the rolls and who was recognized as a member of the tribe does not of itself make such Indian a member of the tribe. The possession of Indian blood, not accompanied by tribal affiliation or relationship, does not entitle a person to an allotment on the public domain. Tribal membership, even though once existing and recognized, may be abandoned in respect to the benefits of the fourth section.

(b) *Certificate that applicant is Indian and eligible for allotment.* Any person desiring to file application for an allotment of land on the public domain under this act must first obtain from the Commissioner of Indian Affairs a certificate showing that he or she is an Indian and eligible for such allotment, which certificate must be attached to the allotment application. Application for the certificate must be made on the proper form, and must contain information as to the applicant's identity, such as thumb print, age, sex, height, approximate weight, married or single, name of the Indian tribe in which membership is claimed, etc., sufficient to establish his or her identity with that of the applicant for allotment. Each certificate must bear a serial number, record thereof to be kept in the Indian Office. The required forms may be obtained as stated in § 2531.2(b).

(c) *Heirs of Indian settlers and applicants.* (1) Allotments are allowable only to living persons or those in being at the date of application. Where an Indian dies after settlement and filing of application, but prior to approval, the allotment will upon final approval be confirmed to the heirs of the deceased allottee.

(2) In disposing of pending applications in which the death of the applicant has been reported, the heirs of an applicant who was otherwise qualified at the date of application should be notified that they will be allowed 90 days from receipt of notice within which to submit proof that the applicant personally settled on the land applied for during his or her lifetime, and while the land was open to settlement, and upon

failure to submit such proof within the time allowed the application will be finally rejected.

(3) When it is sufficiently shown that an applicant was at the time of death occupying in good faith the land settled on, patent will be issued to his or her heirs without further use or occupancy on the part of such heirs being shown.

(d) *Minor children.* An Indian settler on public lands under the fourth section of the Act of February 8, 1887, as amended, is also eligible upon application for allotments made thereunder to his minor children, stepchildren, or other children to whom he stands in loco parentis, provided the natural children are in being at the date of the parent's application, or the other relationship referred to exist at such date. The law only permits one eligible himself under the fourth section to take allotments thereunder on behalf of his minor children or of those to whom he stands in loco parentis. Orphan children (those who have lost both parents) are not eligible for allotments on the public domain unless they come within the last-mentioned class. No actual settlement is required in case of allotments to minor children under the fourth section, but the actual settlement of the parent or of a person standing in loco parentis on his own public-land allotment will be regarded as the settlement of the minor children.

(e) *Indian wives.* (1) Where an Indian woman is married to non-Indian not eligible for an allotment under the fourth section of the Act of February 8, 1887, as amended, and not a settler or entryman under the general homestead law, her right, and that of the minor children born of such marriage, to allotments on the public domain will be determined without reference to the quantum of Indian blood possessed by such women and her children but solely with reference as to whether they are recognized members of an Indian tribe or are entitled to such membership.

(2) An Indian woman married to an Indian man who has himself received an allotment on the public domain or is entitled to one, or has earned the equitable right to patent on any form of homestead or small holding claim, is

## § 2531.2

not thereby deprived of the right to file an application for herself, provided she is otherwise eligible, and also for her minor children where her husband is for any reason disqualified.

(3) An Indian woman who is separated from her husband who has not received an allotment under the fourth section will be regarded as the head of a family and may file applications for herself and for the minor children under her care.

(4) In every case where an Indian woman files applications for her minor children it must appear that she has not only applied for herself under the fourth section but has used the land in her own application in some beneficial manner.

(f) *Citizenship.* (1) Under section 6 of the Act of February 8, 1887 (24 Stat. 390; 25 U.S.C. 349), every Indian born within the territorial limits of the United States, to whom allotments were made under that Act, and every Indian who voluntarily takes up his residence separate and apart from any tribe of Indians and adopts the habits of civilized life is declared to be a citizen of the United States.

(2) The Act of May 8, 1906 (34 Stat. 182; 8 U.S.C. 3), changed the time when an Indian became a citizen by virtue of the allotment made to him to the time when patent in fee should be issued on such an allotment.

(3) The Act of June 2, 1924 (43 Stat. 253, 8 U.S.C. 3), conferred citizenship on all noncitizen Indians born within the Territorial limits of the United States, but expressly reserved to them all rights to tribal or other property. These rights include that of allotment on the public land, if qualified.

[35 FR 9589, June 13, 1970, as amended at 37 FR 23185, Oct. 31, 1972]

## § 2531.2 Petition and applications.

(a) Any person desiring to receive an Indian allotment (other than those seeking allotments in national forests, for which see subpart 2533 of this part) must file with the authorized officer, an application, together with a petition on forms approved by the Director, properly executed, together with a certificate from the authorized officer of the Bureau of Indian Affairs that the person is Indian and eligible for allot-

## 43 CFR Ch. II (10–1–08 Edition)

ment, as specified in § 2531.1(b). However, if the lands described in the application have been already classified and opened for disposition under the provisions of this part, no petition is required. The documents must be filed in accordance with the provisions of § 1821.2 of this chapter.

The petition and the statement attached to the application for certificate must be signed by the applicant.

(b) Blank forms for petitions and applications may be had from any office of the Bureau of Indian Affairs, or from land offices of the Bureau of Land Management.

[35 FR 9590, June 13, 1970]

## § 2531.3 Effect of application.

(a) Where an allotment application under the fourth section of the Act of February 8, 1887, as amended, 25 U.S.C. 334 (is not accompanied by the requisite certificate from the Bureau of Indian Affairs showing the applicant to be eligible for an allotment, and the applicant is given time to furnish such certificate, the application does not segregate the land, and other applications therefor may be received and held to await final action on the allotment application.

(b) Where an allotment application is approved by the authorized officer, it operates as a segregation of the land, and subsequent application for the same land will be rejected.

[37 FR 23185, Oct. 31, 1972]

## Subpart 2532—Allotments

### § 2532.1 Certificate of allotment.

(a) When the authorizing officer approves an application for allotment, he will issue to the applicant a *certificate of allotment*, on a prescribed form, showing the name in full of the applicant, post office address, name of the tribe in which membership is claimed, serial number of the certificate issued by the Commissioner of Indian Affairs, and a description of the land allotted.

(b) Where the application under investigation is that of a single person over 21 years of age, or of the head of a family, report will also be made as to

the character of the applicant's settlement and improvements. A similar report will be made on applications filed in behalf of minor children as to the character of the settlement and improvements made by the parent, or the person standing in loco parentis, on his or her own allotment under the fourth section.

[35 FR 9591, June 13, 1970]

#### **§ 2532.2 Trust patent.**

(a) To enable an Indian allottee to demonstrate his good faith and intention, the issuance of trust patent will be suspended for a period of 2 years from date of settlement; but in those cases where that period has already elapsed at the time of adjudicating the allotment application, and when the evidence either by the record or upon further investigation in the field, shows the allottee's good faith and intention in the matter of his settlement, trust patents will issue in regular course. Trust patents in the suspended class, when issued will run from the date of suspension.

(b) In the matter of fourth-section applications filed prior to the regulations in this part, where, by the record or upon further investigation in the field, it appears that such settlement has not been made as is contemplated by the regulations, such applications will not be immediately rejected, but the applicant will be informed that 2 years will be allowed within which to perfect his settlement and to furnish proof thereof, whereupon his application will be adjudicated as in other cases.

[35 FR 9591, June 13, 1970]

### **Subpart 2533—Allotments Within National Forests**

SOURCE: 35 FR 9591, June 13, 1970, unless otherwise noted.

#### **§ 2533.0-3 Authority.**

By the terms of section 31 of the Act of June 25, 1910 (36 Stat. 863; 25 U.S.C. 337), allotments under the fourth section of the Act of February 8, 1887, as amended, may be made within national forests.

#### **§ 2533.0-8 Land subject to allotment.**

An allotment under this section may be made for lands containing coal and oil and gas with reservation of the mineral contents to the United States, but not for lands valuable for metalliferous minerals. The rules governing the conduct of fourth-section applications under the Act of February 8, 1887 as amended, apply equally to applications under said section 31.

#### **§ 2533.1 Application.**

An Indian who desires to apply for an allotment within a national forest under this act must submit the application to the supervisor of the particular forest affected, by whom it will be forwarded with appropriate report, through the district forester and Chief, Forest Service, to the Secretary of Agriculture, in order that he may determine whether the land applied for is more valuable for agriculture or grazing than for the timber found thereon.

#### **§ 2533.2 Approval.**

(a) Should the Secretary of Agriculture decide that the land applied for, or any part of it, is chiefly valuable for the timber found thereon, he will transmit the application to the Secretary of the Interior and inform him of his decision in the matter. The Secretary of the Interior will cause the applicant to be informed of the action of the Secretary of Agriculture.

(b) In case the land is found to be chiefly valuable for agriculture or grazing, the Secretary of Agriculture will note that fact on the application and forward it to the Commissioner of Indian Affairs.

(c) If the Commissioner of Indian Affairs approves the application, he will transmit it to the Bureau of Land Management for issuance of a trust patent.

[35 FR 9591, June 13, 1970, as amended at 41 FR 29122, July 15, 1976]

## 43 CFR Ch. II (10–1–08 Edition)

### Subpart 2540—Color-of-Title: Authority and Definitions

#### § 2540.0–3 Authority.

(a) *Act of December 22, 1928.* The Act of December 22, 1928 (45 Stat. 1069), as amended by the Act of July 28, 1953 (67 Stat. 227; 43 U.S.C. 1068, 1068a), authorizes the issuance of patent for not to exceed 160 acres of public lands held under claim or color of title of either of the two classes described in § 2540.0–5(b) upon payment of the sale price of the land.

(b) *Act of February 23, 1932.* The Act of February 23, 1932 (47 Stat. 53; 43 U.S.C. 178), authorizes the Secretary of the Interior in his discretion to issue patents, upon the payment of \$1.25 per acre, for not more than 160 acres of public land, where such land is contiguous to a Spanish or Mexican land grant, and where such land has been held in good faith and in peaceful, adverse possession by a citizen of the United States, his ancestors or grantors, for more than 20 years under claim or color of title and where valuable improvements have been placed on such land, or some part thereof has been reduced to cultivation. The act further provides that where the land is in excess of 160 acres, the Secretary may determine the 160 acres to be patented under the Act. Under the said act the coal and all other minerals in the land are reserved to the United States and shall be subject to sale or disposal under applicable leasing and mineral land laws of the United States.

(c) *Act of September 21, 1922.* The Act of September 21, 1922 (42 Stat. 992; 43 U.S.C. 992), authorizes the Secretary of the Interior in his judgment and discretion to sell at an appraised price, any of those public lands situated in Arkansas, which were originally erroneously meandered and shown upon the official plats as water-covered areas, and which are not lawfully appropriated by a qualified settler or entryman claiming under the public land laws, to any citizen who in good faith under color of title or claiming as a riparian owner, has prior to September 21, 1922, placed valuable improvements on such land or reduced some part thereof to cultivation.

(d) *Act of February 19, 1925.* The Act of February 19, 1925 (43 Stat. 951; 43 U.S.C. 993), authorizes the Secretary of the Interior in his judgment and discretion to sell at an appraised price, any of those public lands situated in Louisiana, which were originally erroneously meandered and shown upon the official plats as water-covered areas and which are not lawfully appropriated by a qualified settler or entryman claiming under the public land laws, to any citizen who or whose ancestors in title in good faith under color of title or claiming as a riparian owner, has prior to February 19, 1925, placed valuable improvements upon or reduced to cultivation any of such lands. The coal, oil, gas, and other minerals in such lands are reserved to the United States.

(e) *Act of August 24, 1954.* The Act of August 24, 1954 (68 Stat. 789), directs the Secretary of the Interior to issue patents for public lands which lie between the meander line of an inland lake or river in Wisconsin as originally surveyed and the meander line of that lake or river as subsequently resurveyed, under certain terms and conditions. The Act of February 27, 1925 (43 Stat. 1013 43 U.S.C. 994), authorized the Secretary of the Interior to sell such public lands under certain other terms and conditions. These Acts are cited as *the Act of 1954* and *the Act of 1925*, respectively, in §§ 2545.1 to 2545.4.

(f) *Act of May 31, 1962.* (1) The Act of May 31, 1962 (76 Stat. 89), hereafter referred to as *the Act*, authorizes the Secretary of the Interior, in his discretion, to sell at not less than their fair market value any of those lands in the State of Idaho, in the vicinity of the Snake River or any of its tributaries, which have been, or may be, found upon survey to be omitted public lands of the United States, and which are not within the boundaries of a national forest or other Federal reservation and are not lawfully appropriated by a qualified settler or entryman claiming under the public land laws, or are not used and occupied by Indians claiming by reason of aboriginal rights or are not used and occupied by Indians who are eligible for an allotment under the laws pertaining to allotments on the public domain.

(2) The Act provides that in all patents issued under the Act, The Secretary of the Interior (i) shall include a reservation to the United States of all the coal, oil, gas, oil shale, phosphate, potash, sodium, native asphalt, solid and semisolid bitumen, and bitumen rock (including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit is mined or quarried), together with the right to prospect for, mine, and remove the same; and (ii) may reserve the right of access to the public through the lands and such other reservations as he may deem appropriate and consonant with the public interest in preserving public recreational values in the lands.

(3) The Act further provides that the Secretary of the Interior shall determine the fair market value of the lands by appraisal, taking into consideration any reservations specified pursuant to paragraph (f)(2) of this section and excluding, when sales are made to preference-right claimants under section 2 of the Act, any increased values resulting from the development or improvement thereof for agricultural or other purposes by the claimant or his predecessors in interest.

(4) The Act grants a preference right to purchase lands which are offered by the Secretary of the Interior for sale under the Act to any citizen of the United States (which term includes corporations, partnerships, firms, and other legal entities having authority to hold title to lands in the State of Idaho) who, in good faith under color of title or claiming as a riparian owner has, prior to March 30, 1961, placed valuable improvements upon, reduced to cultivation or occupied any of the lands so offered for sale, or whose ancestors or predecessors in title have taken such action.

(g) The Federal Land Policy and Management Act of 1976.

(1) Section 211 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1721), authorizes the Secretary of the Interior in his discretion to sell at not less than fair market value to the occupant thereof any omitted lands which, after survey, are found to have been occupied and developed for a 5-year period prior to January 1, 1975.

## § 2540.0-5

(2) The Act provides that all such conveyances under the Act must be in the public interest and will serve objectives which outweigh all public objectives and values served by retaining such lands in Federal ownership.

(3) Section 208 of the Act (43 U.S.C. 1718) further provides that the Secretary of the Interior shall issue patents subject to such terms, covenants, conditions, and reservations as deemed necessary to insure proper land use and protection of the public interest.

(4) Section 209 of the Act (43 U.S.C. 1719) provides that all patents issued under the Act shall reserve to the United States all minerals in the lands, together with the right to prospect for, mine, and remove the minerals under applicable law and such regulations as the Secretary may prescribe, except as provided by section 209(b) of the Act.

[35 FR 9591, June 13, 1970, as amended at 44 FR 41793, July 18, 1979]

### § 2540.0-5 Definition.

(a) *The act*, when used in this section means the Act of December 22, 1928 (45 Stat. 1069; 43 U.S.C. 1068, 1068a), as amended by the Act of July 28, 1953 (67 Stat. 227, 43 U.S.C. 1068a).

(b) The claims recognized by the Act will be referred to in this part as claims of class 1, and claim of class 2. A claim of class 1 is one which has been held in good faith and in peaceful adverse possession by a claimant, his ancestors or grantors, under claim or color of title for more than 20 years, on which valuable improvements have been placed, or on which some part of the land has been reduced to cultivation. A claim of class 2 is one which has been held in good faith and in peaceful, adverse possession by a claimant, his ancestors or grantors, under claim or color of title for the period commencing not later than January 1, 1901, to the date of application, during which time they have paid taxes levied on the land by State and local governmental units. A claim is not held in good faith where held with knowledge that the land is owned by the United States. A claim is not held in peaceful, adverse possession where it

## 43 CFR Ch. II (10-1-08 Edition)

was initiated while the land was withdrawn or reserved for Federal purposes.

[35 FR 9592, June 13, 1970]

### Subpart 2541—Color-of-Title Act

SOURCE: 35 FR 9592, June 13, 1970, unless otherwise noted.

#### § 2541.1 Who may apply.

Any individual, group, or corporation authorized to hold title to land in the State and who believes he has a valid claim under color of title may make application.

#### § 2541.2 Procedures.

(a) *Application.* (1) An application for a claim of class 1 or of class 2 must be filed in duplicate on a form approved by the Director. It must be filed in accordance with the provisions of § 1821.2 of this chapter.

(2) Every application must be accompanied by a filing fee of \$10, which will be nonreturnable.

(3) The application must be in type-written form, or in legible handwriting, and it must be completely executed and signed by the applicant.

(4) Every applicant must furnish information required in the application form concerning improvements, cultivation, conveyances of title, taxes, and related matters.

(b) *Description of lands applied for.* Application under the act may be made for surveyed or unsurveyed lands. If unsurveyed, the description must be sufficiently complete to identify the location, boundary, and area of the land and, if possible, the approximate description or location of the land by section, township, and range. If unsurveyed land is claimed, final action will be suspended until the plat of survey has been officially filed.

(c) *Presentation and verification of factual statements.* (1) Information relating to all record and nonrecord conveyances, or to nonrecord claims of title, affecting the land shall be itemized on a form approved by the Director. The statements of record conveyances must be certified by the proper county official or by an abstractor. The applicant may be called upon to submit documentary or other evidence relating to

## Bureau of Land Management, Interior

## § 2542.1

conveyances or claims. Abstracts of title or other documents which are so requested will be returned to the applicant.

(2) Applicants for claims of class 2 must itemize all information relating to tax levies and payments on the land on a form approved by the Director which must be certified by the proper county official or by an abstractor.

### § 2541.3 Patents.

(a) Any applicant who satisfied all requirements for a claim of class 1 or class 2 commencing not later than January 1, 1901, to the date of application and who so requests in the application will receive a patent conveying title to all other minerals except:

(1) Any minerals which, at the time of approval of the application, are embraced by an outstanding mineral lease or

(2) Any minerals for which the lands have been placed in a mineral withdrawal.

All other patents will reserve all minerals to the United States.

(b) All mineral reservations will include the right to prospect for, mine, and remove the same in accordance with applicable law.

(c) The maximum area for which patent may be issued for any claim under the act is 160 acres. Where an area held under a claim or color of title is in excess of 160 acres, the Secretary has authority under the act to determine what particular subdivisions not exceeding 160 acres, may be patented.

### § 2541.4 Price of land; payment.

(a) *Price of land.* The land applied for will be appraised on the basis of its fair market value at the time of appraisal. However, in determination of the price payable by the applicant, value resulting from improvements or development by the applicant or his predecessors in interest will be deducted from the appraised price, and consideration will be given to the equities of the applicant. In no case will the land be sold for less than \$1.25 per acre.

(b) *Payment.* Applicant will be required to make payment of the sale price of the land within the time stated in the request for payment.

### § 2541.5 Publication; protests.

(a) The applicant will be required to publish once a week for four consecutive weeks in accordance with § 1824.3 of this chapter, at his expense, in a designated newspaper and in a designated form, a notice allowing all persons claiming the land adversely to file in the office specified in § 2541.1-2(a) their objections to the issuance of patent under the application. A protestant must serve on the applicant a copy of the objections and furnish evidence of such service.

(b) The applicant must file a statement of the publisher, accompanied by a copy of the notice published, showing that publication has been had for the required time.

## Subpart 2542—Color-of-Title Claims: New Mexico, Contiguous to Spanish or Mexican Grants

SOURCE: 35 FR 9593, June 13, 1970 unless otherwise noted.

### § 2542.1 Application.

(a) *Where filed; purchase price required.* Applications under the Act of February 23, 1932 must be filed with the authorizing officer of the proper office at Santa Fe, New Mexico, and should be accompanied by payment of the purchase price of the land applied for at the rate of \$1.25 per acre.

(b) *Form.* No special form of application is provided. The application should be in typewritten form or in legible handwriting and must be corroborated by at least two disinterested persons having actual knowledge of the facts alleged therein.

(c) *Contents of application.* Applicants desiring to take advantage of the benefits of the Act of February 23, 1932, must show the following matters in their applications:

(1) Full name and post-office address of the applicant and whether married or single.

(2) Description of the land for which patent is desired. If surveyed, the land should be described by legal subdivision, section, township, and range. If unsurveyed, the land should be described by metes and bounds.

§ 2542.2

43 CFR Ch. II (10–1–08 Edition)

(3) That the land applied for is contiguous to a Spanish or Mexican land grant. The grant should be identified by name, number, patentee or description of land involved. The points or places at which the land applied for is contiguous to the Spanish or Mexican land grant, must be clearly shown.

(4) That possession of the lands applied for has been maintained for more than 20 years under claim or color of title. If the applicant is claiming as a record owner, he or she will be required to file an abstract of title, certified to by a competent abstractor, showing the record of all conveyances of the land up to the date of the filing of the application. If the applicant is not a record owner and no abstract of title can be furnished, statements must be filed, setting forth the names of all mesne possessors of the land, the periods held by each, giving the dates and manner of acquiring possession of the land, and the acts of dominion exercised over the land by each possessor.

(5) That the lands have been held in good faith and in peaceful, adverse possession. The applicant should show whether or not he and his predecessors in interest have paid taxes on the lands and for what periods of time, and whether any consideration was paid for any conveyances of the land. It should further be shown whether there is any person who is claiming the land adversely to the applicant, and if there be such, the name and address of such adverse claimant should be furnished.

(6) Whether or not valuable improvements have been erected upon the land applied for and whether or not any part of such land has been reduced to cultivation. If improvements have been made, the nature, the value, the exact location, and the time of erection thereof, should be fully disclosed together with the identity of the one who was responsible for erecting such improvements. If any of the land has been reduced to cultivation, the subdivision so claimed to have been reduced must be identified and the amount and nature of the cultivation must be set forth, together with the dates thereof.

§ 2542.2 Evidence required.

(a) *Citizenship.* The applicant must furnish a statement showing whether

such applicant is a native-born or naturalized citizen of the United States. In the event an applicant is a naturalized citizen, the statement should show the date of the alleged naturalization or declaration of intention, the title and location of the court in which instituted, and when available, the number of the document in question, if the proceeding has been had since September 26, 1906. In addition, in cases of naturalization prior to September 27, 1906, there should be given the date and place of the applicant's birth and the foreign country of which the applicant was a citizen or subject. In case the applicant is a corporation, a certified copy of the articles of incorporation should be filed.

(b) *Acreage claimed.* The applicant in the statement required under paragraph (a) of this section must show that the land claimed is not a part of a claim which embraced more than 160 acres on February 23, 1932. If the land claimed is part of a claim containing more than 160 acres, a full disclosure of all facts concerning the larger claim must be furnished.

§ 2542.3 Publication and posting of notice.

(a) If upon consideration of the application it is determined that the applicant is entitled to purchase the land applied for, the applicant will be required to publish notice of the application in a newspaper of general circulation in the county wherein the land applied for is situated. Notice for publication shall be issued in the following form:

Land Office,  
Santa Fe, New Mexico.

(Manager)

(b) The notice shall be published at the expense of the applicant and such publication shall be made once each week for a period of five consecutive weeks. A copy of the notice will be posted in the proper office during the entire period of publication. The applicant must file evidence showing that publication has been had for the required time, which evidence must consist of the statement of the publisher, accompanied by a copy of the notice as published.

### § 2542.4 Patent.

(a) Upon submission of satisfactory proof of publication and the expiration of the time allowed for the filing of objections against the application, if there be no protest, contest or other objection against the application, patent will then be issued by the authorizing officer.

(b) There will be incorporated in patents issued on applications under the above Act, the following:

Excepting and reserving, however, to the United States, the coal and all other minerals in the land so patented, together with the right of the United States or its permittees, lessees, or grantees, to enter upon said lands for the purpose of prospecting for and mining such deposits as provided for under the Act of February 23, 1932 (47 Stat. 53).

## Subpart 2543—Erroneously Meandered Lands: Arkansas

SOURCE: 35 FR 9593, June 13, 1970, unless otherwise noted.

### § 2543.1 Applications.

(a) Applications to purchase under the Act of September 21, 1922, must be signed by the applicant in the State of Arkansas. Such applications had to be filed within 90 days from the date of the passage of this Act, if the lands had been surveyed and plats filed, otherwise they must be filed within 90 days from the filing of such plats. The appli-

cant must show that he is either a native-born or naturalized citizen of the United States, and, if naturalized, file record evidence thereof; must describe the land which he desires to purchase, together with the land claimed as the basis of his preference right to the lands applied for if he applies as a riparian owner, or if claiming otherwise, under what color of title his claim is based, and that the applied-for lands are not lawfully appropriated by a qualified settler or entryman under the public land laws, nor in the legal possession of any adverse applicant; the kind, character, and value of the improvements on the land covered by the application; when they were placed thereon; the extent of the cultivation had, if any, and how long continued. This application must be supported by the statements of two persons having personal knowledge of the facts alleged in the application.

(b) All applications to purchase under the act must be accompanied by an application service fee of \$10 which will not be returnable.

### § 2543.2 Appraisal of land.

When an application is received it will be assigned for investigation and appraisal of the land in accordance with the provisions of the Act of September 21, 1922.

### § 2543.3 Purchase price required.

If upon consideration of the application it shall be determined that the applicant is entitled to purchase the lands applied for, the applicant will be notified by registered mail that he must within 30 days from service of notice deposit the appraised price, or thereafter, and without further notice, forfeit all rights under his application.

### § 2543.4 Publication and posting.

Upon payment of the appraised price a notice of publication will be issued. Such notice shall be published at the expense of the applicant in a designated newspaper of general circulation in the vicinity of the lands once a week for five consecutive weeks immediately prior to the date of sale, but a sufficient time should elapse between the date of last publication and date of sale to enable the statement of the

#### **§ 2543.5**

publisher to be filed. The notice will advise all persons claiming adversely to the applicant that they should file any objections or protests against the allowance of the application within the period of publication, otherwise the application may be allowed. Any objections or protests must be corroborated, and a copy thereof served upon the applicant. The Bureau of Land Management will cause a notice similar to the notice for publication to be posted in such office, during the entire period of publication. The publisher of the newspaper must file in the Bureau of Land Management prior to the date fixed by the sale evidence that publication has been had for the required period, which evidence must consist of the statement of the publisher, accompanied by a copy of the notice published.

#### **§ 2543.5 Patent.**

Upon submission of satisfactory proof, if no protest or contest is pending, patent will be issued.

### **Subpart 2544—Erroneously Meandered Lands: Louisiana**

SOURCE: 35 FR 9594, June 13, 1970, unless otherwise noted.

#### **§ 2544.1 Applications.**

(a) Applications to purchase under the Act of February 19, 1925, must be signed by the applicant in the State of Louisiana. Such applications had to be filed within 90 days from the passage of this act, if the lands had been surveyed and plats filed, otherwise they must be filed within 90 days from the filing of such plat. The applicant must show that he is either a native-born or a naturalized citizen of the United States, and, if naturalized, file record evidence thereof; must describe the land which he desires to purchase, together with the land claimed as the basis of his preference right to the lands applied for if he applies as a riparian owner, or if claiming otherwise, under what color of the title his claim is based; in other words, a complete history of the claim, and that the lands applied for are not lawfully appropriated by a qualified settler or entryman under the public land laws, nor in the legal possession of any adverse applicant; the kind, char-

#### **43 CFR Ch. II (10–1–08 Edition)**

acter, and value of the improvements on the land covered by the application; when they were placed thereon; the extent of the cultivation, if any, and how long continued. Such application must be supported by the statement of at least two persons having personal knowledge of the facts alleged in the application.

(b) All applications to purchase under the act must be accompanied by an application service fee of \$10 which will not be returnable.

#### **§ 2544.2 Appraisal of land.**

When an application is received it will be assigned for investigation and appraisal of the land in accordance with the provisions of the act.

#### **§ 2544.3 Notice to deposit purchase price.**

If, upon consideration of the application, it shall be determined that the applicant is entitled to purchase the lands applied for, the applicant will be notified, by registered mail, that he must within 6 months from receipt of notice deposit the appraised price of the land or else forfeit all his rights under his application.

#### **§ 2544.4 Publication and posting.**

Upon payment of the appraised price of the land the Bureau will issue notice of publication. Such notice shall be published at the expense of the applicant in a designated newspaper of general circulation in the vicinity of the lands, once a week for five consecutive weeks. In accordance with § 1824.3 of this chapter, immediately prior to the date of sale, but a sufficient time shall elapse between the date of the last publication and the date of sale to enable the statement of the publisher to be filed. The notice will advise all persons claiming adversely to the applicant that they should file any objections or protests against the allowance of the application within the period of publication, otherwise the application may be allowed. Any objections or protests must be corroborated, and a copy thereof served upon the applicant. The Bureau will also cause a copy of such notice of publication to be posted in such office during the entire period of publication. The applicant must file in

## Bureau of Land Management, Interior

## § 2545.2

the Bureau prior to the date fixed for the sale evidence that publication has been had for the required period, which evidence must consist of the statement of the publisher accompanied by a copy of the notice so published.

### § 2544.5 Patent.

Upon the submission of satisfactory proof, the Bureau will, if no protest or contest is pending, issue patent, such patent to contain a stipulation that all the minerals in the lands described in the application are reserved to the United States with the right to prospect for, mine and remove same.

### Subpart 2545—Erroneously Meandered Lands: Wisconsin

SOURCE: 35 FR 9594, June 13, 1970, unless otherwise noted.

### § 2545.1 Qualifications of applicants.

(a) To qualify under the Act of 1954, a person, or his predecessors in interest, (1) must have been issued, prior to January 21, 1953, a patent for lands lying along the meander line as originally determined, and (2) must have held in good faith and in peaceful, adverse possession since the date of issuance of said patent adjoining public lands lying between the original meander line and the resurveyed meander line.

(b) To qualify under the Act of 1925, a person must either (1) be the owner in good faith of land, acquired prior to February 27, 1925, shown by the official public land surveys to be bounded in whole or in part by such public lands or (2) be a citizen of the United States who, in good faith under color of title or claiming as a riparian owner, had, prior to February 27, 1925, placed valuable improvements upon or reduced to cultivation any of such public lands.

### § 2545.2 Applications.

(a) Claimants under the Act of 1925 have a preferred right of application for a period of 90 days from the date of filing of the plat of survey of lands claimed by them. Applications for public lands under the Act of 1954 must be filed within 1 year after August 24, 1954, or 1 year from the date of the official plat or resurvey, whichever is later. All

applications must be filed in the proper office (see § 1821.2-1 of this chapter).

(b) Every application must be accompanied by a filing fee of \$10, which is not returnable.

(c) No particular form is required but the applications must be typewritten or in legible handwriting and must contain the following information:

(1) The name and post office address of the applicant.

(2) The legal description and acreage of the public lands claimed or desired.

(3) The legal description of the lands owned by the applicant, if any, adjoining the public lands claimed or desired. If the claim is based on ownership of such adjoining lands, the application must be accompanied by a certificate from the proper county official or by an abstractor, showing the date of acquisition of the lands by the applicant and that the applicant owns the lands in fee simple as of the date of application.

(4) If the applicant is a color-of-title applicant under the Act of 1925, a statement whether or not the applicant is a citizen of the United States.

(5) If the application is based on color of title or riparian claim under the Act of 1925, a statement fully disclosing the facts of the matter; or if the application is based on peaceful, adverse possession under the Act of 1954, a similar statement showing peaceful, adverse possession by the applicant, or his predecessors in interest, since the issuance of the patent to the lands adjoining the claimed lands.

(6) A statement showing the improvements, if any, placed on the public lands applied for including their location, nature, present value, date of installation, and the names of the person or persons who installed them.

(7) A statement showing the cultivation, if any, of the lands applied for, including the nature, location, and dates of such cultivation.

(8) The names and post office addresses of any adverse claimants, settlers, or occupants of the public lands applied for or claimed.

(9) The names and post office addresses of at least two disinterested persons having knowledge of the facts relating to the applicant's claim.

### § 2545.3

(10) A citation of the act under which the application is made.

#### § 2545.3 Publication and protests.

(a) The applicant will be required to publish once a week for five consecutive weeks in accordance with § 1824.3 of this chapter, at his expense, in a designated newspaper and in a designated form, a notice allowing all persons claiming the land adversely to file with the Bureau of Land Management, Washington, DC, their objections to issuance of patent under the application. A protestant must serve on the applicant a copy of the objections and furnish evidence of such service.

(b) The applicant must file a statement of the publisher, accompanied by a copy of the notice published, showing that publication has been had for the required time.

#### § 2545.4 Price of land; other conditions.

(a) Persons entitled to a patent under the Act of 1954 must, within 30 days after request therefor, pay, under the same terms and conditions, the same price per acre as was paid for the land included in their original patent.

(b) Persons entitled to a patent under the Act of 1925, within 30 days after request therefor, must pay the appraised price of the lands, which price will be the value of the lands as of the date of appraisal, exclusive of any increased value resulting from the development or improvement of the lands for agricultural purposes by the applicant or his predecessors in interest but inclusive of the stumpage value of any timber cut or removed by them.

### Subpart 2546—Snake River, Idaho: Omitted Lands

SOURCE: 35 FR 9595, June 13, 1970, unless otherwise noted.

#### § 2546.1 Offers of lands for sale.

Before any lands may be sold under the Act, the authorized officer of the Bureau of Land Management shall publish in the FEDERAL REGISTER and in at least one newspaper of general circulation within the State of Idaho a notice that the lands will be offered for sale, which notice shall specify a period of

### 43 CFR Ch. II (10–1–08 Edition)

time not less than 30 days in duration during which citizens may file with the proper office at Boise, Idaho, a notice of their intention to apply to purchase all or part of the lands as qualified preference-right claimants.

#### § 2546.2 Applications for purchase.

(a) All citizens who file a notice of intention in accordance with § 2546.1 within the time period specified in the published notice or any amendment thereof will be granted by the authorized officer a period of time not less than 30 days in duration in which to file, in duplicate with the Authorizing officer of the Boise State Office, their applications to purchase lands as preference-right claimants.

(b) Every application must be accompanied by a filing fee of \$10, which is not returnable.

(c) No particular form is required but the applications must be typewritten or in legible handwriting and must contain the following information:

(1) The name and post office address of the claimant.

(2) The description and acreage of the public lands claimed or desired.

(3) The description of the lands owned by the applicant, if any, adjoining the public lands claimed or desired accompanied by a certificate from the proper county official or by an abstractor or by an attorney showing the date of acquisition of the lands by the applicant and that the applicant owns the lands in fee simple as of the date of application.

(4) A statement showing that the claimant is a citizen of the United States, as defined in paragraph (4) of § 2540.0-3(f).

(5) A statement giving the basis for color of title or claim of riparian ownership.

(6) A statement showing the improvements, if any, placed on the public lands applied for including their location, nature, present value, date of installation, and the names of the person or persons who installed them.

(7) A statement showing the cultivation and occupancy, if any, of the lands applied for, including the nature, location, and date of such cultivation and occupancy.

## Bureau of Land Management, Interior

## § 2547.2

(8) The names and post office addresses of any adverse claimants, settlers, or occupants of the public lands claimed.

(9) The names and addresses of at least two disinterested persons having knowledge of the facts relating to the applicant's claim.

(10) A citation of the Act under which the application is made.

### § 2546.3 Payment and publication.

(a) Before lands may be sold to a qualified preference-right claimant, the claimant will be required to pay the purchase price of the lands and will be required to publish once a week for four consecutive weeks, at his expense, in a designated newspaper and in a designated form, a notice allowing all persons having objections to file with the Authorizing officer of the State Office at Boise, Idaho, their objections to issuance of patent to the claimant. A protestant must serve on the claimant a copy of the objections and must furnish the Authorizing officer with evidence of such service.

(b) Among other things, the notice will describe the lands to be patented, state the purchase price for the lands and the reservations, if any, to be included in the patent to preserve public recreational values in the lands.

(c) The claimant must file a statement of the publisher, accompanied by a copy of the notice published, showing that publication has been had for the required time.

### § 2546.4 Public auctions.

(a) The authorized officer may sell under the Act at public auction any lands for which preference-claimants do not qualify for patents under the regulations of § 2540.0-3(f) and subpart 2546.

(b) Lands will be sold under this section at not less than their appraised fair market value at the time and place and in the manner specified by the authorized officer in a public notice of the sale.

(c) Bids may be made by the principal or his agent, either personally at the sale or by mail.

(d) A bid sent by mail must be received at the place and within the time specified in the public notice. Each

such bid must clearly state (1) the name and address of the bidder and (2) the specified tract, as described in the notice for which the bid is made. The envelope must be noted as required by the notice.

(e) Each bid by mail must be accompanied by certified or cashier's check, post office money order or bank draft for the amount of the bid.

(f) The person who submits the highest bid for each tract at the close of bidding, but not less than the minimum price, will be declared the purchaser.

## Subpart 2547—Omitted Lands: General

AUTHORITY: Secs. 211 and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1721 and 1740).

SOURCE: 44 FR 41793, July 18, 1979, unless otherwise noted.

### § 2547.1 Qualifications of applicants.

(a) Any person authorized to hold title to land in the State may make application under section 211 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1721). For regulations on conveyances of omitted lands and unsurveyed islands to State and local governments see subpart 2742 of this title.

(b) The applicant shall be a citizen of the United States, or in the case of corporation, shall be organized under the laws of the United States or any State thereof.

(c) The applicant shall have occupied and developed the lands for a 5-year period prior to January 1, 1975.

[44 FR 41793, July 18, 1979; 44 FR 55876, Sept. 28, 1979]

### § 2547.2 Procedures; applications.

(a) The description of the omitted lands applied for shall be sufficiently complete to identify the location, boundary, and area of the land, including, if possible, the legal description of the land by section or fractional section, township, range, meridian and State.

(b) Each application shall be accompanied by a filing fee of \$50 that is non-returnable. The application shall be

### **§ 2547.3**

filed in accordance with the provisions of § 1821.2 of this title.

(c) No special form of application is required. The application shall be type-written or in legible handwriting and shall contain the following information:

(1) The full name and legal mailing address of the applicant.

(2) The description and acreage of the public lands claimed.

(3) A statement showing that the applicant is qualified or authorized to hold title to land in the State, is a citizen of the United States, and in the case of a corporation, is organized under the laws of the United States or any State thereof.

(4) A statement describing how the applicant has satisfied the requirements of the statute.

(5) A statement describing the nature and extent of any developments made to the lands applied for and describing the period and type of any occupancy of the land.

(6) The names and legal mailing addresses of any known adverse claimants or occupants of the applied for lands.

(7) A citation of the Act under which the application is being made.

### **§ 2547.3 Price of land; payment.**

(a) The land applied for shall be appraised for fair market value at the time of appraisal. However, in determination of the price payable by the applicant, value resulting from development and occupation by the applicant or his predecessors in interest shall be deducted from the appraised price.

(b) The applicant shall also be required to pay administrative costs, including:

(1) The cost of making the survey,

(2) The cost of appraisal, and

(3) The cost of making the conveyance.

(c) The applicant shall be required to make payment of the sale price and administrative costs within the time stated in the requests for payment or any extensions granted thereto by the authorized officer.

### **43 CFR Ch. II (10–1–08 Edition)**

### **§ 2547.4 Publication and protests.**

(a) The applicant shall be required to publish a notice of the application once a week for five consecutive weeks in accordance with § 1824.3 of this title, in a designated newspaper and in a designated form. All persons claiming the land adversely may file with the State Office of the Bureau of Land Management in which the lands are located, their objections to issuance of patent under the application. A protestant shall serve on the applicant a copy of the objections and furnish evidence of such service.

(b) The applicant shall file at the appropriate BLM office a statement of the publisher, accompanied by a copy of the notice published, showing that the publication has been made for the required time.

### **§ 2547.5 Disposal considerations.**

(a) Disposal under this provision shall not be made until:

(1) It has been determined by the authorized officer that such conveyance is in the public interest and will serve objectives which outweigh all public objectives and values which would be served by retaining such lands in Federal ownership.

(2) The relevant State government, local government, and areawide planning agency designated under section 204 of the Demonstration Cities and Metropolitan Act of 1966 (80 Stat. 1255, 1262), and/or Title IV of the Intergovernmental Cooperation Act of 1968 (82 Stat. 1098, 1103–4) have notified the authorized officer as to the consistency of such conveyance with applicable State and local government land use plans and programs.

(3) The plat of survey has been officially filed.

### **§ 2547.6 Lands not subject to disposal under this subpart.**

This subpart shall not apply to any lands within the National Forest System, defined in the Act of August 17, 1974 (16 U.S.C. 1601), the National Park System, the National Wildlife Refuge System, and the National Wild and Scenic Rivers System.

## Bureau of Land Management, Interior

## Pt. 2560

### § 2547.7 Coordination with State and local governments.

At least 60 days prior to offering land for sale, the authorized officer shall notify the Governor of the State within which the lands are located and the head of the governing body of any political subdivision of the State having zoning or other land use regulatory jurisdiction in the geographical area within which the lands are located that the lands are being offered for sale. The authorized officer shall also promptly notify such public officials of the issuance of the patent for such lands.

### Subpart 2568—Alaska Native Allotments for Certain Veterans

#### PURPOSE

- 2568.10 What Alaska Native allotment benefits are available to certain Alaska Native veterans?

#### REGULATORY AUTHORITY

- 2568.20 What is the legal authority for these allotments?
- 2568.21 Do other regulations directly apply to these regulations?

#### DEFINITIONS

- 2568.30 What terms do I need to know to understand these regulations?

#### INFORMATION COLLECTION

- 2568.40 Does BLM have the authority to ask me for the information required in these regulations?

#### WHO IS QUALIFIED FOR AN ALLOTMENT

- 2568.50 What qualifications do I need to be eligible for an allotment?

#### PERSONAL REPRESENTATIVES

- 2568.60 May the personal representatives of eligible deceased veterans apply on their behalf?

**Pt. 2560**

**43 CFR Ch. II (10–1–08 Edition)**

- 2568.61 What are the requirements for a personal representative?
- 2568.62 Under what circumstances does BLM accept the appointment of a personal representative?
- 2568.63 Under what circumstances does BLM reject the appointment of a personal representative?
- 2568.64 Are there different requirements for giving an allotment to the estate of a deceased veteran?

**APPLYING FOR AN ALLOTMENT**

- 2568.70 If I am qualified for an allotment, when can I apply?
- 2568.71 Where do I file my application?
- 2568.72 When does BLM consider my application to be filed too late?
- 2568.73 Do I need to fill out a special application form?
- 2568.74 What else must I file with my application?
- 2568.75 Must I include a Certificate of Indian Blood as well as a Department of Defense verification of qualifying military service when I file my application with BLM?
- 2568.76 Do I need to pay any fees when I file my application?
- 2568.77 [Reserved]
- 2568.78 Will my application segregate the land for which I am applying from other applications or land actions?
- 2568.79 Are there any rules about the number and size of parcels?
- 2568.80 Does the parcel have to be surveyed before I can receive title to it?
- 2568.81 If BLM finds errors in my application, will BLM give me a chance to correct them?
- 2568.82 If BLM decides that I have not submitted enough information to show qualifying use and occupancy, will it reject my application or give me a chance to submit more information?

**AVAILABLE LANDS—GENERAL**

- 2568.90 If I qualify for an allotment, what land may BLM convey to me?
- 2568.91 Is there land owned by the Federal government that BLM cannot convey to me even if I qualify?
- 2568.92 [Reserved]
- 2568.93 Is there a limit to how much water frontage my allotment can include?
- 2568.94 Can I receive an allotment of land that is valuable for minerals?
- 2568.95 Will BLM try to reacquire land that has been conveyed out of Federal ownership so it can convey that land to a Native veteran?

**AVAILABLE LANDS—CONSERVATION SYSTEM UNITS (CSU)**

- 2568.100 What is a CSU?

- 2568.101 If the land I used and occupied is within a CSU other than a National Wilderness or any part of a National Forest, can I receive a title to it?
- 2568.102 Is the process by which the managing agency decides whether my allotment is not inconsistent with the CSU the same as other such determination processes?
- 2568.103 By what process does the managing agency of a CSU decide if my allotment would be consistent with the CSU?
- 2568.104 How will a CSU manager determine if my allotment is consistent with the CSU?
- 2568.105 In what situations could a CSU manager likely find an allotment to be consistent with the CSU?
- 2568.106 In what situations could a CSU manager generally find an allotment to be inconsistent with the purposes of a CSU?

**ALTERNATIVE ALLOTMENTS**

- 2568.110 If I qualify for Federal land in one of the categories BLM cannot convey, is there any other way for me to receive an allotment?
- 2568.111 What if BLM decides that I qualify for land that is in the category of Federal land that BLM cannot convey?
- 2568.112 What do I do if BLM notifies me that I am eligible to choose an alternative allotment?
- 2568.113 Do I have to prove that I used and occupied the land I've chosen as an alternative allotment?
- 2568.114 How do I apply for an alternative allotment if the CSU manager determines my application is inconsistent with a CSU?
- 2568.115 When must I apply for an alternative allotment if the CSU manager determines my application is inconsistent with a CSU?

**APPEALS**

- 2568.120 What can I do if I disagree with any of the decisions that are made about my allotment application?
- 2568.121 If an agency determines my allotment is inconsistent with the purposes of a CSU, what can I do if I disagree?
- 2568.122 What then does the CSU manager do with my request for reconsideration?
- 2568.123 Can I appeal the CSU Manager's reconsidered decision if I disagree with it?

AUTHORITY: 43 U.S.C. 1629g(e).

## § 2561.1

### § 2561.0-2 Objectives.

It is the program of the Secretary of the Interior to enable individual natives of Alaska to acquire title to the lands they use and occupy and to protect the lands from the encroachment of others.

### § 2561.0-3 Authority.

The Act of May 17, 1906 (34 Stat. 197), as amended August 2, 1956 (70 Stat. 954; 43 U.S.C. 270-1 to 270-3), authorizes the Secretary of the Interior to allot not to exceed 160 acres of vacant, unappropriated, and unreserved nonmineral land in Alaska or, subject to the provisions of the Act of March 8, 1922 (42 Stat. 415; 48 U.S.C. 376-377), of vacant, unappropriated, and unreserved public land in Alaska that may be valuable for coal, oil, or gas deposits, or, under certain conditions, of national forest lands in Alaska, to any Indian, Aleut or Eskimo of full or mixed blood who resides in and is a native of Alaska, and who is the head of a family, or is twenty-one years of age.

### § 2561.0-5 Definitions.

As used in the regulations in this section.

(a) The term *substantially continuous use and occupancy* contemplates the customary seasonality of use and occupancy by the applicant of any land used by him for his livelihood and well-being and that of his family. Such use and occupancy must be substantial actual possession and use of the land, at least potentially exclusive of others, and not merely intermittent use.

(b) *Allotment* is an allocation to a Native of land of which he has made substantially continuous use and occupancy for a period of five years and which shall be deemed the *homestead* of the allottee and his heirs in perpetuity, and shall be inalienable and nontaxable except as otherwise provided by the Congress.

(c) *Allotment Act* means the Act of May 17, 1906 (34 Stat. 197), as amended (48 U.S.C. 357, 357a, 357b).

### § 2561.0-8 Lands subject to allotment.

(a) A Native may be granted a single allotment of not to exceed 160 acres of land. All the lands in an allotment

need not be contiguous but each separate tract of the allotment should be in reasonably compact form.

(b) In areas where the rectangular survey pattern is appropriate, an allotment may be in terms of 40-acre legal subdivisions and survey lots on the basis that substantially continuous use and occupancy of a significant portion of such smallest legal subdivision shall normally entitle the applicant to the full subdivision, absent conflicting claims.

(c) Allotments may be made in national forests if founded on occupancy of the land prior to the establishment of the particular forest or if an authorized officer of the Department of Agriculture certifies that the land in the application for allotment is chiefly valuable for agricultural or grazing purposes.

(d) Lands in applications for allotment and allotments that may be valuable for coal, oil, or gas deposits are subject to the regulations of § 2093.4 of this chapter.

### § 2561.1 Applications.

(a) Applications for allotment properly and completely executed on a form approved by the Director, Bureau of Land Management, must be filed in the proper office which has jurisdiction over the lands.

(b) Any application for allotment of lands which extend more than 160 rods along the shore of any navigable waters shall be considered a request for waiver of the 160-rod limitation (see part 2094 of this chapter).

(c) If surveyed, the land must be described in the application according to legal subdivisions and must conform to the plat of survey when possible. If unsurveyed, it must be described as accurately as possible by metes and bounds and tied to natural objects. On unsurveyed lands, the application should be accompanied by a map or approved protracted survey diagram showing approximately the lands included in the application.

(d) An application for allotment shall be rejected unless the authorized officer of the Bureau of Indian Affairs certifies that the applicant is a native qualified to make application under the Allotment Act, that the applicant

## § 2561.2

has occupied and posted the lands as stated in the application, and that the claim of the applicant does not infringe on other native claims or area of native community use.

(e) The filing of an acceptable application for a Native allotment will segregate the lands. Thereafter, subsequent conflicting applications for such lands shall be rejected, except when the conflicting application is made for the conveyance of lands pursuant to any provision of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*).

(f) By the filing of an application for allotment the applicant acquires no rights except as provided in paragraph (e) of this section. If the applicant does not submit the required proof within six years of the filing of his application in the proper office, his application for allotment will terminate without affecting the rights he gained by virtue of his occupancy of the land or his right to make another application.

[35 FR 9597, June 13, 1970, as amended at 39 FR 34542, Sept. 26, 1974]

### § 2561.2 Proof of use and occupancy.

(a) An allotment will not be made until the lands are surveyed by the Bureau of Land Management, and until the applicant or the authorized officer of the Bureau of Indian Affairs has made satisfactory proof of substantially continuous use and occupancy of the land for a period of five years by the applicant. Such proof shall be made on a form approved by the Director, Bureau of Land Management, and filed in the proper land office. If made by the applicant, it must be signed by him, but if he is unable to write his name, his mark or thumb print shall be impressed on the statement and witnessed by two persons. This proof may be submitted with the application for allotment if the applicant has then used and occupied the land for five years, or may be made at any time within six years after the filing of the application when the requirements have been met.

(b) [Reserved]

### § 2561.3 Effect of allotment.

(a) Land allotted under the Act is the property of the allottee and his heirs in perpetuity, and is inalienable and non-

## 43 CFR Ch. II (10–1–08 Edition)

taxable. However, a native of Alaska who received an allotment under the Act, or his heirs, may with the approval of the Secretary of the Interior or his authorized representative, convey the complete title to the allotted land by deed. The allotment shall thereafter be free of any restrictions against alienation and taxation unless the purchaser is a native of Alaska who the Secretary determines is unable to manage the land without the protection of the United States and the conveyance provides for a continuance of such restrictions.

(b) Application by an allottee or his heirs for approval to convey title to land allotted under the Allotment Act shall be filed with the appropriate officer of the Bureau of Indian Affairs.

### Subpart 2562—Trade and Manufacturing Sites

AUTHORITY: R.S. 2478; 43 U.S.C. 1201.

SOURCE: 35 FR 9598, June 13, 1970, unless otherwise noted.

### § 2562.0–3 Authority.

Section 10 of the Act of May 14, 1898 (30 Stat. 413, as amended August 23, 1958 (72 Stat. 730; 43 U.S.C. 687a), authorizes the sale at the rate of \$2.50 per acre of not exceeding 80 acres of land in Alaska possessed and occupied in good faith as a trade and manufacturing site. The lands must be nonmineral in character, except that lands that may be valuable for coal, oil, or gas deposits are subject to disposition under the Act of March 8, 1922 (42 Stat. 415; 48 U.S.C. 376–377), as amended, and the regulations of § 2093.4 of this chapter.

### § 2562.1 Initiation of claim.

(a) *Notice.* Any qualified person, association, or corporation initiating a claim on or after April 29, 1950, under section 10 of the Act of May 14, 1898, by the occupation of vacant and unreserved public land in Alaska for the purposes of trade, manufacture, or other productive industry, must file notice of the claim for recordation in the proper office for the district in which the land is situated, within 90 days after such initiation. Where on April 29, 1950, such a claim was held by

## Bureau of Land Management, Interior

## § 2562.3

a qualified person, association, or corporation, the claimant must file notice of the claim in the proper office, within 90 days from that date.

(b) *Form of notice.* The notice must be filed on a form approved by the Director in triplicate if the land is unsurveyed, or in duplicate if surveyed, and shall contain:

(1) The name and address of the claimant, (2) age and citizenship, (3) date of occupancy, and (4) the description of the land by legal subdivisions, section, township and range, if surveyed, or, if unsurveyed, by metes and bounds with reference to some natural object or permanent monument, giving, if desired, the approximate latitude and longitude. The notice must designate the kind of trade, manufacture, or other productive industry in connection with which the site is maintained or desired.

(c) *Failure to file notice.* Unless a notice of the claim is filed within the time prescribed in paragraph (a) of this section no credit shall be given for occupancy of the site prior to filing of notice in the proper office, or application to purchase, whichever is earlier.

(d) *Recording fee.* The notice of the claim must be accompanied by a remittance of \$10.00, which will be earned and applied as a service charge for recording the notice, and will not be returnable, except in cases where the notice is not acceptable to the proper office for recording, because the land is not subject to the form of disposition specified in the notice.

### § 2562.2 Qualifications of applicant.

An application must show that the applicant is a citizen of the United States and 21 years of age, and that he has not theretofore applied for land as a trade and manufacturing site. If such site has been applied for and the application not completed, the facts must be shown. If the application is made for an association of citizens or a corporation, the qualifications of each member of the organization must be shown. In the case of a corporation, proof of incorporation must be established by the certificate of the officer having custody of the records of incorporation at the place of its formation and it must

be shown that the corporation is authorized to hold land in Alaska.

### § 2562.3 Applications.

(a) *Execution.* Application for a trade and manufacturing site should be executed in duplicate and should be filed in the proper office. It need not be sworn to, but it must be signed by the applicant and must be corroborated by the statements of two persons.

(b) *Fees.* All applications must be accompanied by an application service fee of \$10 which will not be returnable.

(c) *Time for filing.* Application to purchase a claim, along with the required proof or showing, must be filed within 5 years after the filing of notice of the claim.

(d) *Contents.* The application to enter must show:

(1) That the land is actually used and occupied for the purpose of trade, manufacture or other productive industry when it was first so occupied, the character and value of the improvements thereon and the nature of the trade, business or productive industry conducted thereon and that it embraces the applicant's improvements and is needed in the prosecution of the enterprise. A site for a prospective business cannot be acquired under section 10 of the Act of May 14, 1898 (30 Stat. 413; 43 U.S.C. 687a).

(2) That no portion of the land is occupied or reserved for any purpose by the United States or occupied or claimed by natives of Alaska; that the land is unoccupied, unimproved, and unappropriated by any person claiming the same other than the applicant.

(3) That the land does not abut more than 80 rods of navigable water.

(4) That the land is not included within an area which is reserved because of springs thereon. All facts relative to medicinal or other springs must be stated, in accordance with §2311.2(a) of this chapter.

(5) That no part of the land is valuable for mineral deposits other than coal, oil, or gas, and that at the date of location no part of the land was claimed under the mining laws.

(e) *Description of land.* If the land be surveyed, it must be described in the application according to legal subdivisions of the public-land surveys. If it be

#### § 2562.4

unsurveyed, the application must describe it by approximate latitude and longitude and otherwise with as much certainty as possible without survey.

#### § 2562.4 Survey.

(a) If the land applied for be unsurveyed and no objection to its survey is known to the authorizing officer, he will furnish the applicant with a certificate stating the facts, and, after receiving such certificate, the applicant may make application to the State Director for the survey of the land. Upon receipt of an application, the State Director will, if conditions make such procedure practicable and no objection is shown by his records, furnish the applicant with an estimate of the cost of field and office work, and upon receipt of the deposit required will issue appropriate instructions for the survey of the claim, such survey to be made not later than the next surveying season. The sum so deposited by the applicant for survey will be deemed an appropriation thereof and will be held to be expended in the payment of the cost of the survey, including field and office work, and upon the acceptance of the survey any excess over the cost shall be repaid to the depositor or his legal representative.

(b) In case it is decided that by reason of the inaccessibility of the locality embraced in an application for the survey, or by reason of other conditions, it will result to the advantage of the Government or claimant to have the survey executed by a deputy surveyor, the State Director will deliver an order to the applicant for such survey, which will be sufficient authority for any deputy surveyor to make a survey of the claim.

(c) In the latter contingency the survey must be made at the expense of the applicant, and no right will be recognized as initiated by such application unless actual work on the survey is begun and carried to completion without unnecessary delay.

#### § 2562.5 Publication and posting.

The instructions given in subpart 1824 of this chapter, relative to publication and posting.

#### 43 CFR Ch. II (10–1–08 Edition)

#### § 2562.6 Form of entry.

Claims initiated by occupancy after survey must conform thereto in occupation and application, but if the public surveys are extended over the lands after occupancy and prior to application, the claim may be presented in conformity with such surveys, or, at the election of the applicant, a special survey may be had.

#### § 2562.7 Patent.

The application and proofs filed therewith will be carefully examined and, if all be found regular, the application will be allowed and patent issued upon payment for the land at the rate of \$2.50 per acre, and in the absence of objections shown by his records.

### Subpart 2563—Homesites or Headquarters

SOURCE: 35 FR 9599, June 13, 1970, unless otherwise noted.

#### § 2563.0–2 Purpose.

(a) *Act of March 3, 1927.* The purpose of this statute is to enable fishermen, trappers, traders, manufacturers, or others engaged in productive industry in Alaska to purchase small tracts of unreserved land in the State, not exceeding 5 acres, as homesteads or headquarters.

(b) [Reserved]

#### § 2563.0–3 Authority.

(a) The Act of March 3, 1927 (44 Stat. 1364; 43 U.S.C. 687a), as amended, authorizes the sale as a homestead or headquarters of not to exceed five acres of unreserved public lands in Alaska at the rate of \$2.50 per acre, to any citizen of the United States 21 years of age employed by citizens of the United States, association of such citizens, or by corporations organized under the laws of the United States, or of any State or Territory, whose employer is engaged in trade, manufacture, or other productive industry in Alaska, and to any such person who is himself engaged in trade, manufacture or other productive industry in Alaska. The lands must be nonmineral in character except that lands that may be valuable for coal,

## Bureau of Land Management, Interior

## § 2563.1-1

oil, or gas deposits are subject to disposition under the provisions of the Act of March 8, 1922 (42 Stat. 415, 43 U.S.C. 270-11, 270-12), as amended.

(b) The Act of May 26, 1934 (48 Stat. 809; 43 U.S.C. 687a) amended section 10 of the Act of May 14, 1898 (30 Stat. 413), as amended by the Act of March 3, 1927 (44 Stat. 1364), so as to provide that any citizen, after occupying land of the character described in said section of a homestead or headquarters, in a habitable house not less than 5 months each year for 3 years, may purchase such tract, not exceeding 5 acres, in a reasonably compact form, without a showing as to his employment or business, upon the payment of \$2.50 per acre, the minimum payment for any one tract to be \$10.

### § 2563.0-7 Cross references.

See the following parts in this subchapter: for Indian and Eskimo allotments, part 2530; for mining claims, subpart 3826; for school indemnity selections, subpart 2627; for shore space, subpart 2094 for trade and manufacturing sites, subpart 2562.

### § 2563.1 Purchase of tracts not exceeding 5 acres, on showing as to employment or business (Act of March 3, 1927).

(a) *Notice of initiation of claim.* A notice of the initiation of a claim under the Act of March 3, 1927, must designate the kind of trade, manufacture, or other productive industry in connection with which the claim is maintained or desired, and identify its ownership. The procedure as to notices will be governed in other respects by the provisions of § 2563.2-1(a) to (d).

(b) [Reserved]

### § 2563.1-1 Application.

(a) *Form and contents of applications.* Applications under the Act of March 3, 1927, must be filed in duplicate in the proper office for the district in which the land is situated, and the claim must be in reasonably compact form. An application need not be under oath but must be signed by the applicant and corroborated by the statements of two persons and must show the following facts:

(1) The age and citizenship of applicant.

(2) The actual use and occupancy of the land for which application is made for a homestead or headquarters.

(3) The date when the land was first occupied as a homestead or headquarters.

(4) The nature of the trade, business, or productive industry in which applicant or his employer, whether a citizen, an association of citizens, or a corporation is engaged.

(5) The location of the tract applied for with respect to the place of business and other facts demonstrating its adaptability to the purpose of a homestead or headquarters.

(6) That no portion of the tract applied for is occupied or reserved for any purpose by the United States, or occupied or claimed by any natives of Alaska, or occupied as a town site or missionary station or reserved from sale, and that the tract does not include improvements made by or in possession of another person, association, or corporation.

(7) That the land is not included within an area which is reserved because of springs thereon. All facts as to medicinal or other springs must be stated, in accordance with § 2311.2(a).

(8) That no part of the land is valuable for mineral deposits other than coal, oil or gas, and that at the date of location no part of the land was claimed under the mining laws.

(9) If the land desired for purchase is surveyed, the application must include a description of the tract by aliquot parts of legal subdivisions, not exceeding 5 acres. If the tract is situated in the fractional portion of a sectional lotting, the lot may be subdivided; where such subdivision, however, would result in narrow strips or other areas containing less than 2½ acres, not suitable for disposal as separate units, such adjoining excess areas, in the discretion of the authorized officer and with the consent of the applicant, may be included with the tract applied for, without subdividing and the application will be amended accordingly. Where a supplemental plat is required, to provide a proper description, it will be prepared at the time of approval of the application.

(10) If the land is unsurveyed, the application must be accompanied by a petition for survey, describing the tract applied for with as much certainty as possible, without actual survey, not exceeding 5 acres, and giving the approximate latitude and longitude of one corner of the claim.

(b) *Filing fee.* All applications must be accompanied by an application service fee of \$10 which will not be returnable.

(c) *Time for filing application.* Application to purchase a claim, along with the required proof or showing, must be filed within 5 years after the filing of notice of the claim.

**§ 2563.1-2 Approval.**

Care will be taken in all cases before patent issues to see that the lands applied for are used for the purposes contemplated by the said Act of March 3, 1927, and that they are not used for any purpose inconsistent therewith.

**§ 2563.2 Purchase of tracts not exceeding 5 acres, without showing as to employment or business (Act of May 26, 1934).**

**§ 2563.2-1 Procedures for initiating claim.**

(a) *Who must file.* Any qualified person initiating a claim under the Act of May 26, 1934, must file notice of the claim for recordation in the proper office for the district in which the land is situated, within 90 days after such initiation.

(b) *Form of notice.* The notice must be filed on a form approved by the Director in triplicate if the land is unsurveyed, or in duplicate if surveyed, and shall contain: (1) The name and address of the claimant, (2) age and citizenship, (3) date of settlement and occupancy, and (4) the description of the land by legal subdivisions, section, township and range, if surveyed, or, if unsurveyed, by metes and bounds with reference to some natural object or permanent monument, giving, if desired, the approximate latitude and longitude.

(c) *Failure to file notice.* Unless a notice of the claim is filed within the time prescribed in paragraph (a) of this section no credit shall be given for occupancy of the site prior to filing of no-

tice in the proper office, or application to purchase, whichever is earlier.

(d) *Recording fee.* The notice of the claim must be accompanied by a remittance of \$10.00, which will be applied as a service charge for recording the notice, and will not be returnable, except in cases where the notice is not acceptable to the proper office for recording because the land is not subject to the form of disposition specified in the notice.

(e) *Form and contents of application.* Applications under the Act of May 26, 1934, must be filed in duplicate, if for surveyed land, and in triplicate, if for unsurveyed land, in the proper office for the district within which the land is situated.

An application need not be under oath but must be signed by the applicant and corroborated by the statements of two persons and must show the following facts:

(1) Full name, post office address and age of applicant.

(2) Whether the applicant is a native-born or naturalized citizen of the United States, and if naturalized, evidence of such naturalization must be furnished.

(3) A description of the habitable house on the land, the date when it was placed on the land, and the dates each year from which and to which the applicant has resided in such house.

(4) That no portion of the tract applied for is occupied or reserved for any purpose by the United States, or occupied or claimed by any native of Alaska, or occupied as a townsite, or missionary station, or reserved from sale, and that the tract does not include improvements made by or in the possession of any other person, association, or corporation.

(5) That the land is not included within an area which is reserved because of hot, medicinal or other springs, as explained in §2311.2(a) of this chapter. If there be any such springs upon or adjacent to the land, on account of which the land is reserved, the facts relative thereto must be set forth in full.

(6) That no part of the land is valuable for mineral deposits other than coal, oil or gas, and that at the date of

## Bureau of Land Management, Interior

## § 2564.3

location no part of the land was claimed under the mining laws.

(7) That the applicant has not theretofore applied for land under said act, or if he has previously purchased a tract he should make a full showing as to the former purchase and the necessity for the second application.

(8) An application for surveyed land must describe the land by aliquot parts of legal subdivisions, not exceeding 5 acres. If the tract is situated in the fractional portion of a sectional lotting, the lot may be subdivided; where such subdivision, however, would result in narrow strips or other areas containing less than 2½ acres, not suitable for disposal as separate units, such adjoining excess areas, in the discretion of the authorized officer and with the consent of the applicant, may be included with the tract applied for, without subdividing, and the application will be amended accordingly. Where a supplemental plat is required to provide a proper description, it will be prepared at the time of approval of the application.

(9) All applications for unsurveyed land must be accompanied by a petition for survey, describing the land applied for with as much certainty as possible, without actual survey, not exceeding 5 acres, and giving the approximate latitude and longitude of one corner of the claim.

(f) *Filing fee.* All applications must be accompanied by an application service fee of \$10 which will not be returnable.

(Sec. 10, 30 Stat. 413, as amended; 48 U.S.C. 461)

### Subpart 2564—Native Townsites

SOURCE: 35 FR 9601, June 13, 1970, unless otherwise noted.

#### § 2564.0-3 Authority.

The Act of May 25, 1926, (44 Stat. 629; 43 U.S.C. 733-736) provides for the townsite survey and disposition of public lands set apart or reserved for the benefit of Indian or Eskimo occupants in trustee townsites in Alaska and for the survey and disposal of the lands occupied as native towns or villages. The Act of February 26, 1948 (62 Stat. 35; 43 U.S.C. 737), provides for the issuance of

an unrestricted deed to any competent native for a tract of land claimed and occupied by him within any such trustee townsite.

#### § 2564.0-4 Responsibility.

(a) *Administration of Indian possessions in trustee towns.* As to Indian possessions in trustee townsites in Alaska established under authority of section 11 of the Act of March 3, 1891 (26 Stat. 1009; 43 U.S.C. 732), and for which the townsite trustee has closed his accounts and been discharged as trustee, and as to such possessions in other trustee townsites in Alaska, such person as may be designated by the Secretary of the Interior will perform all necessary acts and administer the necessary trusts in connection with the Act of May 25, 1926.

(b) *Administration of native towns.* The trustee for any and all native towns in Alaska which may be established and surveyed under authority of section 3 of the said Act of May 25, 1926 (44 Stat. 630; 43 U.S.C. 735), will take such action as may be necessary to accomplish the objects sought to be accomplished by that section.

#### § 2564.1 Application for restricted deed.

A native Indian or Eskimo of Alaska who occupies and claims a tract of land in a trustee townsite and who desires to obtain a restricted deed for such tract should file application therefor on a form approved by the Director, with the townsite trustee.

#### § 2564.2 No payment, publication or proof required on entry for native towns.

In connection with the entry of lands as a native town or village under section 3 of the said Act of May 25, 1926, no payment need be made as purchase money or as fees, and the publication and proof which are ordinarily required in connection with trustee townsites will not be required.

#### § 2564.3 Native towns occupied partly by white occupants.

Native towns which are occupied partly by white lot occupants will be surveyed and disposed of under the provisions of both the Act of March 3, 1891

#### **§ 2564.4**

(26 Stat. 1095, 1099), and the Act of May 25, 1926 (44 Stat. 629).

#### **§ 2564.4 Provisions to be inserted in restricted deeds.**

The townsite trustee will note a proper reference to the Act of May 25, 1926, on each deed which is issued under authority of that act and each such deed shall provide that the title conveyed is inalienable except upon approval of the Secretary of the Interior or his authorized representative, and that the issuance of the restricted deed does not subject the tract to taxation, to levy and sale in satisfaction of the debts, contracts or liabilities of the transferee, or to any claims of adverse occupancy or law of prescription; also, if the established streets and alleys of the townsite have been extended upon and across the tract, that there is reserved to the townsite the area covered by such streets and alleys as extended. The deed shall further provide that the approval by the Secretary of the Interior or his authorized representative of a sale by the Indian or Eskimo transferee shall vest in the purchaser a complete and unrestricted title from the date of such approval.

#### **§ 2564.5 Sale of land for which restricted deed was issued.**

When a native possessing a restricted deed for land in a trustee townsite issued under authority of the Act of May 25, 1926 (44 Stat. 629; 43 U.S.C. 733-736), desires to sell the land, he should execute a deed on a form approved by the Director, prepared for the approval of the Secretary of the Interior, or his authorized representative, and send it to the townsite trustee in Alaska. The townsite trustee will forward the deed to the Area Director of the Bureau of Indian Affairs who will determine whether it should be approved. Where the deed is approved it shall be returned by the Area Director, Bureau of Indian Affairs, through the townsite trustee to the vendor. In the event the Area Director determines that the deed shall not be approved, he shall so inform the native possessing the restricted deed, who shall have a right of appeal from such finding or decision to the Commissioner of Indian Affairs within sixty days from the date of noti-

#### **43 CFR Ch. II (10-1-08 Edition)**

fication of such finding or decision. The appeal shall be filed with the Area Director. Should the Commissioner uphold the decision of the Area Director, he shall notify the applicant of such action, informing him of his right of appeal to the Secretary of the Interior.

#### **§ 2564.6 Application for unrestricted deed.**

Any Alaska native who claims and occupies a tract of land in a trustee townsite and is the owner of land under a restricted deed issued under the Act of May 25, 1926 (44 Stat. 629; 43 U.S.C. 732-737) may file an application for an unrestricted deed pursuant to the Act of February 26, 1948 (62 Stat. 35; 43 U.S.C. 732-737), with the townsite trustee. The application must be in writing and must contain a description of the land claimed and information regarding the competency of the applicant. It must also contain evidence substantiating the claim and occupancy of the applicant, except when the applicant has been issued a restricted deed for the land. A duplicate copy of the application must be submitted by the applicant to the Area Director of the Bureau of Indian Affairs.

#### **§ 2564.7 Determination of competency or noncompetency; issuance of unrestricted deed.**

(a) Upon a determination by the Bureau of Indian Affairs that the applicant is competent to manage his own affairs, and in the absence of any conflict or other valid objection, the townsite trustee will issue an unrestricted deed to the applicant. Thereafter all restrictions as to sale, encumbrance, or taxation of the land applied for shall be removed, but the said land shall not be liable to the satisfaction of any debt, except obligations owed to the Federal Government, contracted prior to the issuance of such deed. Any adverse action under this section by the townsite trustee shall be subject to appeal to the Board of Land Appeals, Office of the Secretary, in accordance with part 4 of 43 CFR Subtitle A.

(b) In the event the Area Director determines that the applicant is not competent to manage his own affairs, he shall so inform the applicant, and such applicant shall have a right of appeal

## Bureau of Land Management, Interior

## § 2565.2

from such finding or decision to the Commissioner of Indian Affairs, within 60 days from the date of notification of such finding or decision. The appeal shall be filed with the Area Director. Should the Commissioner uphold the decision of the Area Director, he shall notify the applicant of such action, informing him of his right of appeal to the Secretary of the Interior.

(c) Except as provided in this section, the townsite trustee shall not issue other than restricted deeds to Indian or other Alaska natives.

(43 U.S.C. 733-735, 737)

[35 FR 9601, June 13, 1970, as amended at 41 FR 29122, July 15, 1976]

### Subpart 2565—Non-native Townsites

SOURCE: 35 FR 9601, June 13, 1970, unless otherwise noted.

#### § 2565.0-3 Authority.

The entry of public lands in Alaska for townsite purposes, by such trustee or trustees as may be named by the Secretary of the Interior for that purpose, is authorized by section 11 of the Act of March 3, 1891 (sec. 11, 26 Stat. 1099; 43 U.S.C. 732).

#### § 2565.0-7 Cross reference.

Townsites in Alaska may be reserved by the President and sold as provided for in sections 2380 and 2381 of the Revised Statutes; 43 U.S.C. 711, 712. The regulations governing these townsites are contained in §§ 2760.0-3 and 2761.3.

#### § 2565.1 General requirements.

(a) *Survey of exterior lines; exclusions from townsite survey.* If the land is unsurveyed the occupants must by application to the State Director, obtain a survey of the exterior lines of the townsite which will be made at Government expense. There must be excluded from the tract to be surveyed and entered for the townsite any lands set aside by the district court under section 31 of the Act of June 6, 1900 (31 Stat. 332; 48 U.S.C. 40), for use as jail and courthouse sites, also all lands needed for Government purposes or use, together with any existing valid claim initiated under Russian rule.

(b) *Petition for trustee and for survey of lands into lots, blocks, etc.* When the survey of the exterior lines has been approved, or if the townsite is on surveyed land, a petition, signed by a majority of occupants of the land, will be filed in the proper office requesting the appointment of trustee and the survey of the townsite into lots, blocks, and municipal reservations for public use, the expense thereof to be paid from assessments upon the lots, as provided in § 2565.3(b) of this part.

(c) *Designation of trustee; payment required; area enterable.* If the petition be found sufficient, the Secretary of the Interior will designate a trustee to make entry of the townsite, payment for which must be made at the rate of \$1.25 per acre. If there are less than 100 inhabitants the area of the townsite is limited to 160 acres; if 100 and less than 200, to 320 acres; if more than 200, to 640 acres, this being the maximum area allowed by the statute.

#### § 2565.2 Application; fees; contests and protests.

(a) *Filing of application; publication and posting; submission of proof.* The trustee will file his application and notice of intention to make proof, and thereupon the authorizing officer will issue the usual notice of making proof, to be posted and published at the trustee's expense, for the time and in the manner as in other cases provided, and proof must be made showing occupancy of the tract, number of inhabitants thereon, character of the land, extent, value, and character of improvements, and that the townsite does not contain any land occupied by the United States for school or other purposes or land occupied under any existing valid claim initiated under Russian rule.

(b) *Application service fee.* The trustee's application shall be accompanied by \$10 application service fee which shall not be returnable.

(c) *Expense money to be advanced by lot occupants.* The occupants will advance a sufficient amount of money to pay for the land and the expenses incident to the entry to be refunded to them when realized from lot assessments.

### § 2565.3

(d) *Contests and protests.* Applications for entry will be subject to contest or protest as in other cases.

#### § 2565.3 Subdivision.

(a) *Subdivision of land and payment therefore.* After the entry is made, the townsite will be subdivided by the United States into blocks, lots, streets, alleys, and municipal public reservations. The expense of such survey will be paid from the appropriation for surveys in Alaska reimbursable from the lot assessments collected.

(b) *Lot assessments.* The trustee will assess against each lot, according to area, its share of the cost of the subdivisional survey. The trustee will make a valuation of each occupied or improved lot in the townsite and assess upon such lots, according to their value, such rate and sum in addition to the cost of their share of the survey as will be necessary to pay all other expenses incident to the execution of his trust which have accrued up to the time of such levy. More than one assessment may be made if necessary to effect the purpose of the Act of March 3, 1891, and this section.

(c) *Award and disposition of lots after subdivisional survey.* On the acceptance of the plat by the Bureau of Land Management, the trustee will publish a notice that he will, at the end of 30 days from the date thereof, proceed to award the lots applied for, and that all lots for which no applications are filed within 120 days from the date of said notice will be subject to disposition to the highest bidder at public sale. Only those who were occupants of lots or entitled to such occupancy at the date of the approval of final subdivisional townsite survey or their assigns thereafter, are entitled to the allotments herein provided. Minority and coverture are not disabilities.

#### § 2565.4 Deeds.

(a) *Applications for deeds.* Claimants should file their applications for deeds, setting forth the grounds of their claims for each lot applied for, which should be corroborated by two witnesses.

(b) *Issuance of deeds; procedure on conflicting applications.* (1) Upon receipt of the patent and payment of the assess-

### 43 CFR Ch. II (10–1–08 Edition)

ments the trustee will issue deeds for the lots. The deeds will be acknowledged before an officer duly authorized to take acknowledgements of deeds at the cost of the grantee. In case of conflicting applications for lots, the trustee, if he considers it necessary, may order a hearing to be conducted in accordance with the part 1850 of this chapter.

(2) No deed will be issued for any lot involved in a contest until the case has been finally closed. Appeals from any decision of the trustee or from decisions of the Bureau of Land Management may be taken in the manner provided by part 1840 of this chapter.

#### § 2565.5 Sale of the land.

(a) *Public sale of unclaimed lots.* After deeds have been issued to the parties entitled thereto the trustee will publish or post notice that he will sell, at a designated place in the town and at a time named, to be not less than 30 days from date, at public outcry, for cash, to the highest bidder, all lots and tracts remaining unoccupied and unclaimed at the date of the approval of final subdivisional townsite survey, and all lots and tracts claimed and awarded on which the assessments have not been paid at the date of such sale. The notice shall contain a description of the lots and tracts to be sold, made in two separate lists, one containing the lots and tracts unclaimed at the date of the approval of final subdivisional townsite survey and the other the lots and tracts claimed and awarded on which the assessments have not been paid. Should any delinquent allottee, prior to the sale of the lot claimed by him, pay the assessments thereon, together with the pro rata cost of the publication and the cost of acknowledging deed, a deed will be issued to him for such lot, and the lot will not be offered at public sale. Where notice by publication is deemed advisable the notice will be published once a week for 5 consecutive weeks in accordance with §1824.3 of this chapter prior to the date of sale, and in any event copies of such notice shall be posted in three conspicuous places within the townsite. Each lot

must be sold at a fair price, to be determined by the trustee, and he is authorized to reject any and all bids. Lots remaining unsold at the close of the public sale in an unincorporated town may again be offered at a fair price if a sufficient demand appears therefor.

(b) *Sales to Federal, State and local governmental agencies.* (1) Any lot or tract in the townsite which is subject to sale to the highest bidder by the trustee pursuant to this section may in lieu of disposition at public sale be sold by the trustee at a fair value to be fixed by him to any Federal or State agency or instrumentality or to any local governmental agency or instrumentality of the State for use for public purposes.

(2) All conveyances under this section shall be subject to such conditions, limitations, or stipulations as the trustee shall determine are necessary or appropriate in the circumstances, including, where he deems proper, a provision for reversion of title to the trustee or his successor in interest. Any such provision for reversion of title, however, shall by its terms cease to be in effect 25 years after the conveyance.

(3) Conveyances under this section for lands within any incorporated city, town, village, or municipality may be made only after the proposed conveyance has received the approval of the city, town, or village council, or of the local official designated by such council. Such conveyances for lands within any unincorporated city, town, village or municipality may be made only after notice of the proposed conveyance, together with the opportunity to be heard, has been given by the proposed grantee to the residents or occupants thereof in accordance with the requirements for such notice in the case of the public sale of unclaimed lots in a trustee townsite. Any decision of the trustee which is adverse to a protest will be subject to the right of appeal under part 1840 of this chapter. Upon filing of an appeal pursuant to that part, action by the trustee on the conveyance will be suspended pending final decision on the appeal.

#### § 2565.6 Rights-of-way.

(a) Notwithstanding any other provisions of this part, the trustee is authorized to grant rights-of-way for public purposes across any unentered lands within the townsite. This authority is expressly limited to grants of rights-of-way to cities, towns, villages, and municipalities, and to school, utility, and other types of improvement districts, and to persons, associations, companies, and corporations engaged in furnishing utility services to the general public, and to the United States, any Federal or State agency or instrumentality for use for public purposes.

(b) The trustee may in his discretion fix a reasonable charge for any grant under this authority to private persons, associations, companies and corporations, and to Federal and State agencies and instrumentalities, which charge shall be a lump sum. All grants shall be subject to such conditions, limitations, or stipulations as the trustee shall determine are necessary or appropriate in the circumstances. No grants of rights-of-way under this authority shall be made across or upon lands on which prior rights of occupancy or entry have vested under the law.

(c) Grants of rights-of-way under this section to Federal and State agencies and instrumentalities to private persons, associations, companies, or corporations affecting lands within any incorporated city, town, village, or municipality, may be made only after the proposed grant has received the approval of the city, town, or village council, or, where applicable, the municipal board or commission having authority under state law to approve rights-of-way for local public utility purposes. Grants of such rights-of-way to Federal and State agencies and instrumentalities and to private persons, associations, companies, or corporations within unincorporated cities, towns, villages, or municipalities may be made only after notice of the proposed grant, together with the opportunity to be heard, has been given by the proposed grantee to the residents or occupants thereof in accordance with the requirements for such notice in the case of the public sale of unclaimed lots in a trustee townsite. Any

#### § 2565.7

decision by the trustee which is adverse to a protest will be subject to the right of appeal under part 1840 of this chapter. Upon the filing of an appeal, action by the trustee on the application for right-of-way will be suspended pending final decision on the appeal.

#### § 2565.7 Final report of trustee; disposition of unexpended moneys and unsold lots.

After the disposal of a sufficient number of lots to pay all expenses incident to the execution of the trust, including the cost of the subdivisional survey, the trustee will make and transmit to the Bureau of Land Management his final report of his trusteeship, showing all amounts received and paid out and the balance remaining on hand derived from assessments upon the lots and from the public sale. The proceeds derived from such sources, after deducting all expenses, may be used by the trustee on direction of the Secretary of the Interior, where the town is unincorporated, in making public improvements, or, if the town is incorporated such remaining proceeds may be turned over to the municipality for the use and benefit thereof. After the public sale and upon proof of the incorporation of the town, all lots then remaining unsold will be deeded to the municipality, and all municipal public reserves will, by a separate deed, be conveyed to the municipality in trust for the public purposes for which they were reserved.

#### § 2565.8 Records to be kept by trustee.

The trustee shall keep a tract book of the lots and blocks, a record of the deeds issued, a contest docket, and a book of receipts and disbursements.

#### § 2565.9 Disposition of records on completion of trust.

The trustee's duties having been completed, the books of accounts of all his receipts and expenditures, together with a record of his proceedings as provided in § 2565.8 of this part with all papers, other books, and everything pertaining to such townsite in his possession and all evidence of his official acts shall be transmitted to the Bureau of Land Management to become a part of the records thereof, excepting from

#### 43 CFR Ch. II (10-1-08 Edition)

such papers, however, in case the town is incorporated, the subdivisional plat of the townsite, which he will deliver to the municipal authorities of the town, together with a copy of the townsite tract book or books, taking a receipt therefore to be transmitted to the Bureau of Land Management.

(Sec. 11, 26 Stat. 1099; 48 U.S.C. 355)

### Subpart 2566—Alaska Railroad Townsites

SOURCE: 35 FR 9603, June 13, 1970, unless otherwise noted.

#### § 2566.0-3 Authority.

It is hereby ordered that the administration of that portion of the Act of March 12, 1914 (38 Stat. 305; 43 U.S.C. 975, 975a-975g) relating to the withdrawal, location and disposition of townsites shall be in accordance with the following regulations and provisions.

(a) *Orders revoked.* All Executive orders heretofore issued for the disposition of townsites along the Government railroads in Alaska are hereby revoked so far as they conflict with §§ 2566.1 and 2566.2. This order is intended to take the place of all other orders making provisions for the sale and disposal of lots in said townsites along Government railroads in Alaska under the provisions of said Act.

(b) *Amendments—(1) Executive Orders 3529 and 5136.* Sections 2566.1 and 2566.2 are amended by E.O. 3529, Aug. 9, 1921 and E.O. 5136, June 12, 1929.

(2) The designation of the *Alaskan Engineering Commission* has been changed to *The Alaska Railroad*. All matters which formerly were under the control of the chairman of said commission now are under the supervision of the general manager of the said railroad. The functions formerly exercised by the Commissioner of the General Land Office have been transferred to the Director, Bureau of Land Management.

(3) Due to the change in organization, plats of Alaska Railroad townsites are not approved by an official of the Alaska Railroad.

(4) The State Director in Alaska has been designated as Superintendent of Sales of Alaska Railroad townsites.

(c) *Executive Order 5136.* (1) It is ordered that Executive Order 3489, issued June 10, 1921, containing the Alaska Railroad Townsite Regulations, is hereby amended to authorize the Secretary of the Interior to reappraise and sell the unimproved lots in Nenana Townsite, Alaska, belonging to the United States, and to readjust the assessments levied against them for the improvement of streets, sidewalks, and alleys, and for the promotion of sanitation and fire protection by the Alaska Railroad prior to August 31, 1921.

(2) As to the lots within said townsite which have been forfeited for failure to pay such assessments, upon which valuable improvements have been placed, the provisions of said order regarding the collection of the unpaid assessments remain effective.

(3) This order shall continue in full force and effect unless and until revoked by the President or by Act of Congress.

(Sec. 24, 26 Stat. 1103; as amended, sec. 1, 36 Stat. 347; sec. 1, 38 Stat. 305; sec. 11, 39 Stat. 865; 16 U.S.C. 471, 43 U.S.C. 141, 43 U.S.C. 975f, 43 U.S.C. 301)

#### § 2566.0-7 Cross references.

(a) Sales of railroad townsites in Alaska, provided for by Executive Order 3489 of June 10, 1921, §§ 2566.1(a) to (f) and 2566.0-3(a), will be made by the authorized officer in Alaska, as superintendent of sales of railroad townsites in accordance with townsite regulations contained in §§ 2760.0-3 to 2761.2(e) so far as those regulations are applicable.

(b) For surveys, Alaska, see part 9180 of this chapter. For townsites, Alaska, see § 2565.0-7.

#### § 2566.1 General procedures.

(a) *Reservations.* The Alaska Railroad will file with the Secretary of the Interior, when deemed necessary, its recommendations for the reservation of such areas as in its opinion may be needed for townsite purposes. The Secretary of the Interior will thereupon transmit such recommendations to the President with his objections thereto or concurrence therewith. If approved

by the President, the reservation will be made by Executive order.

(b) *Survey.* When in the opinion of the Secretary of the Interior the public interests require a survey of any such reservation, he shall cause to be set aside such portions thereof for railroad purposes as may be selected by the Alaska Railroad, and cause the remainder, or any part thereof, to be surveyed into urban or suburban blocks and lots of suitable size, and into reservations for parks, schools, and other public purposes and for Government use. Highways should be laid out, where practicable, along all shore lines, and sufficient land for docks and wharf purposes along such shore lines should be reserved in such places as there is any apparent necessity therefor. The survey will be made under the supervision of the Bureau of Land Management.

(c) *Preference right.* Any person residing in a reserved townsite at the time of the subdivisional survey thereof in the field and owning and having valuable and permanent improvements thereon, may, in the discretion of the Secretary of the Interior, be granted a preference right of entry, of not exceeding two lots on which he may have such improvements by paying the appraised price fixed by the superintendent of sale, under such regulations as the Secretary of the Interior may prescribe. Preference right proof and entry, when granted, must be made prior to the date of the public sale.

#### § 2566.2 Public sale.

(a) *Generally.* The unreserved and unsold lots will be offered at public sale to the highest bidder at such time and place, and after such publication of notice, if any, as the Secretary of the Interior may direct.

(b) *Superintendent's authority.* Under the supervision of the Secretary of the Interior the superintendent of the sale will be, and he is hereby, authorized to make all appraisements of lots and at any time to reappraise any lot which in his judgment is not appraised at the proper amount, or to fix a minimum price for any lot below which it may not be sold, and he may adjourn, or postpone the sale of any lots to such time and place as he may deem proper.

## § 2568.10

(c) *Manner and terms of public sale.* (1) The Secretary of the Interior shall by regulations prescribe the manner of conducting the public sale, the terms thereof and forms therefor and he may prescribe what failures in payment will subject the bidder or purchaser to a forfeiture of his bid or right to the lot claimed and money paid thereon. The superintendent of sale will at the completion of the public sale deposit with the receiver of the proper local land office the money received and file with its officers the papers deposited with him by said bidder, together with his certificate as to successful bidder.

(2) If it be deemed advisable, the Director, Bureau of Land Management may direct the receiver of public moneys of the proper district to attend sales herein provided for in which event the cash payment required shall be paid to the said receiver.

### Subpart 2568—Alaska Native Allotments For Certain Veterans

SOURCE: 65 FR 40961, June 30, 2000, unless otherwise noted.

#### PURPOSE

#### § 2568.10 What Alaska Native allotment benefits are available to certain Alaska Native veterans?

Eligible Alaska Native veterans may receive an allotment of one or two parcels of Federal land in Alaska totaling no more than 160 acres.

#### REGULATORY AUTHORITY

#### § 2568.20 What is the legal authority for these allotments?

(a) The Alaska Native Claims Settlement Act, 43 U.S.C. 1601 *et seq.* (ANCSA), as amended.

(b) Section 432 of Public Law 105-276, the Appropriations Act for the Departments of Veterans Affairs and Housing and Urban Development for fiscal year 1999, 43 U.S.C. 1629g, which amended ANCSA by adding section 41.

(c) Section 301 of Public Law 106-559, the Indian Tribal Justice Technical and Legal Assistance Act of 2000, which amended section 41 of ANCSA.

(d) The Native Allotment Act of 1906, 34 Stat. 197, as amended, 42 Stat. 415

## 43 CFR Ch. II (10-1-08 Edition)

and 70 Stat. 954, 43 U.S.C. 270-1 through 270-3 (1970).

[65 FR 40961, June 30, 2000, as amended at 66 FR 52547, Oct. 16, 2001]

#### § 2568.21 Do other regulations directly apply to these regulations?

Yes. The regulations implementing the Native Allotment Act of 1906, 43 CFR Subpart 2561, also apply to Alaska Native Veteran Allotments to the extent they are not inconsistent with section 41 of ANCSA or other provisions in this Subpart.

#### DEFINITIONS

#### § 2568.30 What terms do I need to know to understand these regulations?

*Alaska Native* is defined in the Native Allotment Act of 1906 as amended by the Act of August 2, 1956, 70 Stat. 954.

*Allotment* has the same meaning as in 43 CFR 2561.0-5(b).

*Conservation System Unit* has the same meaning as under Sec. 102(4) of the Alaska National Interest Lands Conservation Act of December 2, 1980, 16 U.S.C. 3102(4).

*Consistent and inconsistent* mean compatible and incompatible, respectively, in accordance with the guidelines in these regulations in §§ 2568.102 through 2568.106.

*Veteran* has the same meaning as in 38 U.S.C. 101, paragraph 2.

#### INFORMATION COLLECTION

#### § 2568.40 Does BLM have the authority to ask me for the information required in these regulations?

(a) Yes. The Office of Management and Budget has approved, under 44 U.S.C. 3507, the information collection requirements contained in Subpart 2568 and has assigned them clearance number 1004-0191 for Form AK-2561-10. BLM uses this information to determine if using the public lands is appropriate. You must respond to obtain a benefit.

(b) BLM estimates that the public reporting burden for this information is as follows: 28 hours per response to fill out form AK-2561-10. These estimates include the time for reviewing instruction, searching existing data sources, gathering and maintaining the data

## Bureau of Land Management, Interior

## § 2568.64

needed and completing the collection of information.

(c) Send comments regarding this burden estimate or any other aspect of this collection to the Information Collection Clearance Officer, Bureau of Land Management, 1849 C St. N.W., Mail Stop 401 LS, Washington, D.C. 20240.

### WHO IS QUALIFIED FOR AN ALLOTMENT

#### **§ 2568.50 What qualifications do I need to be eligible for an allotment?**

To qualify for an allotment you must:

(a) Have been eligible for an allotment under the Native Allotment Act as it was in effect before December 18, 1971; and

(b) Establish that you used land in accordance with the regulation in effect before December 18, 1971, and that the land is still owned by the Federal government; and

(c) Be a veteran who served at least six months between January 1, 1969, and December 31, 1971, or enlisted or was drafted after June 2, 1971, but before December 3, 1971; and

(d) Not have already received conveyance or approval of an allotment. (However, if you are otherwise qualified to receive an allotment under the Alaska Native Veterans Allotment Act, you will still qualify even if you received another allotment interest by inheritance, devise, gift, or purchase); and

(e) Not have a Native allotment application pending on October 21, 1998; and

(f) Reside in the State of Alaska or, in the case of a deceased veteran, have been a resident of Alaska at the time of death.

[65 FR 40961, June 30, 2000, as amended at 66 FR 52547, Oct. 16, 2001]

### PERSONAL REPRESENTATIVES

#### **§ 2568.60 May the personal representatives of eligible deceased veterans apply on their behalf?**

Yes. The personal representative or special administrator, appointed in the appropriate Alaska State court proceeding, may apply for an allotment for the benefit of a deceased veteran's

heirs if the deceased veteran served in South East Asia at any time during the period beginning August 5, 1964, and ending December 31, 1971, and during that period the deceased veteran:

(a) Was killed in action,

(b) Was wounded in action and later died as a direct consequence of that wound, as determined and certified by the Department of Veterans Affairs, or

(c) Died while a prisoner of war.

[65 FR 40961, June 30, 2000, as amended at 66 FR 52547, Oct. 16, 2001]

#### **§ 2568.61 What are the requirements for a personal representative?**

The person filing the application must present proof of a current appointment as personal representative of the estate of the deceased veteran by the proper court, or proof that this appointment process has begun.

#### **§ 2568.62 Under what circumstances does BLM accept the appointment of a personal representative?**

BLM will accept an appointment of personal representative made any time after an eligible person dies, even if that appointment came before enactment of the Alaska Native Veterans Allotment Act.

#### **§ 2568.63 Under what circumstances does BLM reject the appointment of a personal representative?**

If the appointment process is incomplete at the time of allotment application filing, the prospective personal representative must file the proof of appointment with BLM within 18 months after the application filing deadline or BLM will reject the application.

#### **§ 2568.64 Are there different requirements for giving an allotment to the estate of a deceased veteran?**

No, the estate of the deceased veteran eligible under § 2568.60 must meet the same requirements for a Native allotment as other living Alaska Native veterans. In addition, a deceased veteran must have been a resident of Alaska at the time of death.

## § 2568.70

### APPLYING FOR AN ALLOTMENT

#### § 2568.70 If I am qualified for an allotment, when can I apply?

If you are qualified, you can apply between July 31, 2000 and January 31, 2002.

#### § 2568.71 Where do I file my application?

You must file your application in person or by mail with the BLM Alaska State Office in Anchorage, Alaska.

#### § 2568.72 When does BLM consider my application to be filed too late?

BLM will consider applications to be filed too late if they are:

- (a) Submitted in person after the deadline in section 2568.70, or
- (b) Postmarked after the deadline in section 2568.70.

#### § 2568.73 Do I need to fill out a special application form?

Yes. You must complete form no. AK-2561-10, "Alaska Native Veteran Allotment Application."

#### § 2568.74 What else must I file with my application?

You must also file:

- (a) A Certificate of Indian Blood (CIB), which is a Bureau of Indian Affairs form,
- (b) A DD Form 214 "Certificate of Release or Discharge from Active Duty" or other documentation from the Department of Defense (DOD) to verify military service, as well as any information on cause of death supplied by the Department of Veterans Affairs,
- (c) A map at a scale of 1:63,360 or larger, sufficient to locate on-the-ground the land for which you are applying, and
- (d) A legal description of the land for which you are applying. If there is a discrepancy between the map and the legal description, the map will control. The map must be sufficient to allow BLM to locate the parcel on the ground. You must also estimate the number of acres in each parcel.

[65 FR 40961, June 30, 2000, as amended at 71 FR 54202, Sept. 14, 2006]

## 43 CFR Ch. II (10-1-08 Edition)

#### § 2568.75 Must I include a Certificate of Indian Blood as well as a Department of Defense verification of qualifying military service when I file my application with BLM?

Yes.

(a) If the CIB or DOD verification of qualifying military service is missing when you file the application, BLM will ask you to provide the information within the time specified in a notice. BLM will not process the application until you file the necessary documents but will consider the application as having been filed on time.

(b) A personal representative filing on behalf of the estate of a deceased veteran must file the Department of Veterans Affairs verification of cause of death.

#### § 2568.76 Do I need to pay any fees when I file my application?

No. You do not need to pay a fee to file an application.

#### § 2568.77 [Reserved]

#### § 2568.78 Will my application segregate the land for which I am applying from other applications or land actions?

The filing of an application with a sufficient description to identify the lands will segregate those lands. "Segregation" has the same meaning as in 43 CFR 2091.0-5(b).

#### § 2568.79 Are there any rules about the number and size of parcels?

Yes. You may apply for one or two parcels, but if you apply for two parcels the two combined cannot total more than 160 acres. You may apply for less than 160 acres. Each parcel must be reasonably compact.

#### § 2568.80 Does the parcel have to be surveyed before I can receive title to it?

Yes. The land in your application must be surveyed before BLM can convey it to you. BLM will survey your allotment at no charge to you, or you may obtain a private survey. BLM must approve the survey if it is done by a private surveyor.

## Bureau of Land Management, Interior

## § 2568.91

### **§ 2568.81 If BLM finds errors in my application, will BLM give me a chance to correct them?**

Yes. If you file your application during the 18-month filing period and BLM finds correctable errors, it will consider the application as having been filed on time once you correct them. BLM will send you a notice advising you of any correctable errors and give you at least 60 days to correct them. You must make corrections within the specified time or BLM will reject your application.

### **§ 2568.82 If BLM decides that I have not submitted enough information to show qualifying use and occupancy, will it reject my application or give me a chance to submit more information?**

(a) BLM will not reject your application without giving you an opportunity for a hearing to establish the facts of your use.

(b) If BLM cannot determine from the information you submit that you met the use and occupancy requirements of the 1906 Act, it will send you a notice saying that you have not submitted enough evidence and will give you at least 60 days to file additional information.

(c) If you do not submit additional evidence by the end of the time BLM gives you or if you submit additional evidence but BLM still cannot determine that you meet the use and occupancy requirements, the following process will occur:

(1) BLM will issue a formal contest complaint telling you why it believes it should reject your application.

(2) If you answer the complaint and tell BLM you want a hearing, BLM will ask an Administrative Law Judge (ALJ) of the Interior Department, Office of Hearings and Appeals, to preside over a hearing to establish the facts of your use and occupancy.

(3) The ALJ will evaluate all the written evidence and oral testimony and issue a decision.

(4) You can appeal this decision to the Interior Board of Land Appeals according to 43 CFR part 4.

## AVAILABLE LANDS—GENERAL

### **§ 2568.90 If I qualify for an allotment, what land may BLM convey to me?**

You may receive title only to:

(a) Land that:

(1) Is currently owned by the Federal government,

(2) Was vacant, unappropriated, and unreserved when you first began to use and occupy it,

(3) Has not been continuously withdrawn since before your sixth birthday,

(4) You started using before December 14, 1968, the date when Public Land Order 4582 withdrew all unreserved public lands in Alaska from all forms of appropriation and disposition under the public land laws, and

(5) You prove by a preponderance of the evidence that you used and occupied in a substantially continuous and independent manner, at least potentially exclusive of others, for five or more years. This possession of the land must not be merely intermittent. "Preponderance of evidence" means evidence which is more convincing than the evidence offered in opposition to it; that is, evidence which as a whole shows that the fact you are trying to prove is more likely a fact than not.

(b) Substitute land explained in 43 CFR 2568.110.

### **§ 2568.91 Is there land owned by the Federal government that BLM cannot convey to me even if I qualify?**

You cannot receive an allotment containing any of the following:

(a) A regularly used and recognized campsite that is primarily used by someone other than yourself. The campsite area that you cannot receive is that which is actually used as a campsite.

(b) Land presently selected by, but not conveyed to, the State of Alaska. The State may relinquish up to 160 acres of its selection to allow an eligible Native veteran to receive an allotment;

(c) Land presently selected by, but not conveyed to, a Native corporation as defined in 43 U.S.C. 1602(m). A Native corporation may relinquish up to 160 acres of its selection to allow an eligible Native veteran to receive an allotment, as long as the remaining

## § 2568.92

ANCSA selection comports with the appropriate selection rules in 43 CFR 2650. Any such relinquishment must not cause the corporation to become underselected. See 43 U.S.C. 1621(j)(2) for a definition of underselection;

(d) Land designated as wilderness by statute;

(e) Land acquired by the Federal government through gift, purchase, or exchange;

(f) Land containing any development owned or controlled by a unit of government, or a person other than yourself;

(g) Land withdrawn or reserved for national defense, other than the National Petroleum Reserve-Alaska;

(h) National Forest land; or

(i) Land selected or claimed, but not yet conveyed, under a public land law, including but not limited to the following:

(1) Land within a recorded mining claim;

(2) Home sites;

(3) Trade and manufacturing sites;

(4) Reindeer sites and headquarters sites;

(5) Cemetery sites.

## § 2568.92 [Reserved]

### § 2568.93 Is there a limit to how much water frontage my allotment can include?

Yes, in some cases. You will normally be limited to a half-mile (referred to as 160 rods in the regulations at 43 CFR part 2094) along the shore of a navigable water body. If you apply for land that extends more than a half-mile, BLM will treat your application as a request to waive this limitation. As explained in 43 CFR 2094.2, BLM can waive the half-mile limitation if it determines the land is not needed for a harborage, wharf, or boat landing area, and that a waiver would not harm the public interest.

### § 2568.94 Can I receive an allotment of land that is valuable for minerals?

BLM can convey an allotment that is known to be or believed to be valuable for coal, oil, or gas, but the ownership of these minerals remains with the Federal government. BLM cannot convey to you land valuable for other kinds of minerals such as gold, silver,

## 43 CFR Ch. II (10–1–08 Edition)

sand or gravel. If BLM conveys an allotment that is valuable for coal, oil, or gas, the allottee owns all minerals in the land except those expressly reserved to the United States in the conveyance.

### § 2568.95 Will BLM try to reacquire land that has been conveyed out of Federal ownership so it can convey that land to a Native veteran?

No. The Alaska Native Veterans Allotment Act does not give BLM the authority to reacquire former Federal land in order to convey it to a Native veteran.

## AVAILABLE LANDS—CONSERVATION SYSTEM UNITS (CSU)

### § 2568.100 What is a CSU?

A CSU is an Alaska unit of the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, or a National Forest Monument.

### § 2568.101 If the land I used and occupied is within a CSU other than a National Wilderness or any part of a National Forest, can I receive a title to it?

You may receive title if you qualify for that allotment and the managing agency of the CSU agrees that conveyance of that allotment is not inconsistent with the purposes of the CSU.

### § 2568.102 Is the process by which the managing agency decides whether my allotment is not inconsistent with the CSU the same as other such determination processes?

No. This process is unique to this regulation. It should not be confused with any similar process under any other act, including the incompatibility process under the National Wildlife Refuge System Improvement Act of 1997.

### § 2568.103 By what process does the managing agency of a CSU decide if my allotment would be consistent with the CSU?

(a) BLM conducts a field exam, with you or your representative, to check the boundaries of the land for which

you are applying and to look for signs of use and occupancy. The CSU manager or a designated representative may also attend the field exam.

(b) The CSU manager or representative assesses the resources to determine if the allotment would be consistent with CSU purposes at that location. You may submit any other information for the CSU manager to consider. You or your representative may also accompany the CSU representative on any field exam.

(c) The CSU manager submits a written decision and resource assessment to BLM within 18 months of the BLM field exam. The CSU manager will send you a copy of the decision and a copy of the resource assessment.

**§2568.104 How will a CSU manager determine if my allotment is consistent with the CSU?**

The CSU manager will decide this on a case-by-case basis by considering the law or withdrawal order which created the CSU. The law or withdrawal order explains the purposes for which the CSU was created. The manager would also consider the mission of the CSU managing agency as established in law and policy. The manager will also consider how the cumulative impacts of the various activities that could take place on the allotment might affect the CSU.

**§2568.105 In what situations could a CSU manager likely find an allotment to be consistent with the CSU?**

An allotment could generally be consistent with the purposes of the CSU if:

(a) The allotment for which you qualify is located near land that BLM has conveyed to a Native corporation under ANCSA, or,

(b) A Native corporation has selected the land under ANCSA and has said it would relinquish such selection, as long as the remaining ANCSA selection comports with the appropriate selection rules in 43 CFR 2650. Any relinquishment must not cause the corporation to become underselected. See 43 U.S.C. 1621(j)(2) for a definition of underselection.

**§2568.106 In what situations could a CSU manager generally find an allotment to be inconsistent with the purposes of a CSU?**

An allotment could generally be inconsistent in situations including, but not limited to, the following:

(a) If, by itself or as part of a group of allotments, it could significantly interfere with biological, physical, cultural, scenic, recreational, natural quiet or subsistence values of the CSU.

(b) If, by itself or as part of a group of allotments, it obstructs access by the public or managing agency to the resource values of surrounding CSU lands.

(c) If, by itself or as part of a group of allotments, it could trigger development or future uses in an area that would adversely affect resource values of surrounding CSU lands.

(d) If it is isolated from existing private properties and opens an area of a CSU to new access and uses that adversely affect resource values of the surrounding CSU lands.

(e) If it interferes with the implementation of the CSU management plan.

**ALTERNATIVE ALLOTMENTS**

**§2568.110 If I qualify for Federal land in one of the categories BLM cannot convey, is there any other way for me to receive an allotment?**

Yes. If you qualify for land in one of the categories listed in section 2568.91 which BLM cannot convey, you may choose an alternative allotment from the following types of land within the same ANCSA Region as the land for which you originally qualified:

(a) Land within an original withdrawal under section 11(a)(1) of ANCSA for selection by a Village Corporation which was:

(1) Not selected,  
(2) Selected and later relinquished, or  
(3) Selected and later rejected by BLM;

(b) Land outside of, but touching a boundary of a Village withdrawal, not including land described in section 2568.91 or land within a National Park; or

(c) Vacant, unappropriated, and unreserved land. (For purposes of this section, the term "unreserved" includes

#### § 2568.111

land withdrawn solely under the authority of section 17(d)(1) of ANCSA.)

#### **§ 2568.111 What if BLM decides that I qualify for land that is in the category of Federal land that BLM cannot convey?**

BLM will notify you in writing that you are eligible to choose an alternative allotment from lands described in section 2568.110.

#### **§ 2568.112 What do I do if BLM notifies me that I am eligible to choose an alternative allotment?**

You must file a request for an alternative allotment in the Alaska State Office as stated in section 2568.71 and follow all the requirements you did for your original allotment application.

#### **§ 2568.113 Do I have to prove that I used and occupied the land I've chosen as an alternative allotment?**

No. If BLM cannot convey the allotment for which you originally apply, and you are eligible to choose an alternative allotment, you do not have to prove that you used and occupied the land in the alternative location.

#### **§ 2568.114 How do I apply for an alternative allotment if the CSU manager determines my application is inconsistent with a CSU?**

You should contact the appropriate CSU manager as quickly as possible to discuss resource concerns, potential constraints, and impacts on existing management plans. After you do this you must file a request for an alternative allotment with the BLM Alaska State Office as stated in section 2568.71 and follow all the requirements of the original allotment application. If the alternative allotment land is also in the CSU, the CSU manager will evaluate it to determine if conveyance of an allotment there would be inconsistent with the CSU as well.

#### **§ 2568.115 When must I apply for an alternative allotment if the CSU manager determines my application is inconsistent with a CSU?**

Your application for an alternative allotment must be filed:

(a) Within 12 months of when you receive a decision from a CSU manager that says your original allotment is in-

#### 43 CFR Ch. II (10–1–08 Edition)

consistent with the purposes of the CSU or,

(b) Within six months of when you receive a decision from the CSU manager on your request for reconsideration of the original decision affirming that your original allotment is inconsistent with the purposes of the CSU, or

(c) Within three months of the date an appellate decision from the appropriate Federal official becomes final. This official will be either:

- (1) The Regional Director of the National Park Service (NPS),
- (2) The Regional Director of the U.S. Fish and Wildlife Service (USFWS), or
- (3) The BLM Alaska State Director

#### APPEALS

#### **§ 2568.120 What can I do if I disagree with any of the decisions that are made about my allotment application?**

You may appeal all decisions, except for CSU inconsistency decisions or determinations by the Department of Veterans Affairs, to the Interior Board of Land Appeals under 43 CFR Part 4.

#### **§ 2568.121 If an agency determines my allotment is inconsistent with the purposes of a CSU, what can I do if I disagree?**

(a) You may request reconsideration of a CSU manager's decision by sending a signed request to that manager.

(b) The request for reconsideration must be submitted in person or correctly addressed and postmarked to the CSU manager no later than 90 calendar days of when you received the decision.

(c) The request for reconsideration must include:

- (1) The BLM case file number of the application and parcel, and
- (2) Your reason(s) for filing the reconsideration, and any new pertinent information.

#### **§ 2568.122 What then does the CSU manager do with my request for reconsideration?**

(a) The CSU manager will reconsider the original inconsistency decision and send you a written decision within 45 calendar days after he or she receives your request. The 45 days may be extended for a good reason in which case you would be notified of the extension

## Bureau of Land Management, Interior

## § 2610.0-2

in writing. The reconsideration decision will give the CSU Manager's reasons for this new decision and it will summarize the evidence that the CSU manager used.

(b) The reconsideration decision will provide information on how to appeal if you disagree with it.

### **§ 2568.123 Can I appeal the CSU Manager's reconsidered decision if I disagree with it?**

(a) Yes. If you or your legal representative disagree with the decision you may appeal to the appropriate Federal official designated in the appeal information you receive with the decision. That official will be either the NPS Regional Director, the USFWS Regional Director, or the BLM Alaska State Director, depending on the CSU where your proposed allotment is located.

(b) Your appeal must:

(1) Be in writing.

(2) Be submitted in person to the CSU manager or correctly addressed and postmarked no later than 45 calendar days of when you received the reconsidered decision.

(3) State any legal or factual reason(s) why you believe the decision is wrong. You may include any additional evidence or arguments to support your appeal.

(c) The CSU manager will send your appeal to the appropriate Federal official, which is either the NPS Regional Director, the USFWS Regional Director, or the BLM Alaska State Director.

(d) You may present oral testimony to the appropriate Federal official to clarify issues raised in the written record.

(e) The appropriate Federal official will send you his or her written decision within 45 calendar days of when he or she receives your appeal. The 45 days may be extended for good reason in which case you would be notified of the extension in writing.

(f) The decision of the appropriate Federal official is the final administrative decision of the Department of the Interior.

AUTHORITY: Sec. 4 of the Act of August 18, 1894 (28 Stat. 422), as amended (43 U.S.C. 641), known as the Carey Act.

SOURCE: 45 FR 34232, May 21, 1980, unless otherwise noted.

#### **Subpart 2610—Carey Act Grants, General**

##### **§ 2610.0-2 Objectives.**

The objective of section 4 of the Act of August 18, 1894 (28 Stat. 422), as amended (43 U.S.C. 641 *et seq.*), known as the Carey Act, is to aid public land States in the reclamation of the desert lands therein, and the settlement, cultivation, and sale thereof in small tracts to actual settlers.

### § 2610.0-3

#### § 2610.0-3 Authority.

(a) The Carey Act authorizes the Secretary of the Interior, with the approval of the President, to contract and agree to grant and patent to States, in which there are desert lands, not to exceed 1,000,000 acres of such lands to each State, under the conditions specified in the Act. The Secretary is authorized to contract and agree to grant and patent additional lands to certain States. After a State's application for a grant has been approved by the Secretary, the lands are segregated from the public domain for a period of from 3 to 15 years, the State undertaking within that time to cause the reclamation of the lands by irrigation. The lands, when reclaimed, are patented to the States or to actual settlers who are its assignees. If the lands are patented to the State, the State transfers title to the settler. Entries are limited to 160 acres to each actual settler.

(b) The Act of June 11, 1896 (29 Stat. 434; 43 U.S.C. 642), authorizes liens on the land for the cost of construction of the irrigation works, and permits the issuance of patents to States for particular tracts actually reclaimed without regard to settlement or cultivation.

(c) The Act of March 1, 1907 (34 Stat. 1056), extends the provisions of the Carey Act to the former Southern Ute Indian Reservation in Colorado.

(d) The Joint Resolution approved May 25, 1908 (35 Stat. 577), authorizes grants to the State of Idaho of an additional 1,000,000 acres.

(e) The Act of May 27, 1908 (35 Stat. 347; 43 U.S.C. 645), authorizes grants of an additional 1,000,000 acres to the State of Idaho and the State of Wyoming.

(f) The Act of February 24, 1909 (35 Stat. 644; 43 U.S.C. 647), extends the provisions of the Carey Act to the former Ute Indian Reservation in Colorado.

(g) The Act of February 16, 1911 (36 Stat. 913), extends the Carey Act to the former Fort Bridger Military Reservation in Wyoming.

(h) The Act of February 21, 1911 (36 Stat. 925; 43 U.S.C. 523-524), permits the sale of surplus water by the United

### 43 CFR Ch. II (10-1-08 Edition)

States Bureau of Reclamation for use upon Carey Act lands.

(i) The Act of March 4, 1911 (36 Stat. 1417; 43 U.S.C. 645), authorizes grants to the State of Nevada of an additional 1,000,000 acres.

(j) The Joint Resolution of August 21, 1911 (37 Stat. 38; 43 U.S.C. 645), authorizes grants to the State of Colorado of an additional 1,000,000 acres.

#### § 2610.0-4 Responsibilities.

(a) The authority of the Secretary of the Interior to approve the applications provided for in this part, has been delegated to the Director of the Bureau of Land Management and redelegated to State Directors of the Bureau of Land Management.

(b) The grant contract must be signed by the Secretary of the Interior, or an officer authorized by him, and approved by the President.

#### § 2610.0-5 Definitions.

As used in the regulations of this part:

(a) *Actual settler* means a person who establishes a primary residence on the land.

(b) *Cultivation* means tilling or otherwise preparing the land and keeping the ground in a state favorable for the growth of ordinary agricultural crops, and requires irrigation as an attendant act.

(c) *Desert lands* means unreclaimed lands which will not, without irrigation, produce any reasonably remunerative agricultural crop by usual means or methods of cultivation. This includes lands which will not, without irrigation, produce paying crops during a series of years, but on which crops can be successfully grown in alternate years by means of the so-called dry-farming system. Lands which produce native grasses sufficient in quantity, if ungrazed by grazing animals, to make an ordinary crop of hay in usual seasons, are not desert lands. Lands which will produce an agricultural crop of any kind without irrigation in amount sufficient to make the cultivation reasonably remunerative are not desert. Lands containing sufficient moisture to produce a natural growth of trees are not to be classed as desert lands.

(d) *Economic feasibility* means the capability of an entry to provide an economic return to the settler sufficient to provide a viable farm enterprise and assure continued use of the land for farming purposes. Factors considered in determining feasibility may include the cost of developing or acquiring water, land reclamation costs, land treatment costs, the cost of construction or acquisition of a habitable residence, acquisition of farm equipment, fencing and other costs associated with a farm enterprise, such as water delivery, seed, planting, fertilization, harvest, etc.

(e) *Grant contract* means the contract between a State and the United States which sets the terms and conditions which the State or its assignees shall comply with before lands shall be patented.

(f) *Irrigation* means the application of water to the land for the purpose of growing crops.

(g) *Ordinary agricultural crops* means any agricultural product to which the land under consideration is generally adapted, and which would return a fair reward for the expense of producing them. Ordinary agricultural crops do not include forest products, but may include orchards and other plants which cannot be grown on the land without irrigation and from which a profitable crop may be harvested.

(h) *Reclamation* means the establishment of works for conducting water in adequate volume and quantity to the land so as to render it available for distribution when needed for irrigation and cultivation.

(i) *Segregation* means the action under the Act of August 19, 1894 (39 Stat. 422), as amended (43 U.S.C. 641), by which the lands are reserved from the public domain and closed to application or entry under the public land laws, including location under the mining laws.

(j) *Smallest legal subdivision* means a quarter quarter section (40 acres).

#### § 2610.0-7 Background.

The Carey Act authorizes the Secretary of the Interior, with the approval of the President, to contract and agree to grant and patent to States, in which there are desert lands,

not exceeding 1 million acres of such lands to each State, as the State may cause to be reclaimed. The State shall also cause not less than 20 acres of each 160 acre tract to be cultivated by actual settlers. A number of amendments allowed additional acreages for certain States. Colorado, Nevada and Wyoming were allowed up to 2 million acres. Idaho was allowed up to 3 million acres.

#### § 2610.0-8 Lands subject to application.

(a) The lands shall be unreclaimed desert lands capable of producing ordinary agricultural crops by irrigation.

(b) The lands shall be nonmineral, except that lands withdrawn, classified or valuable for coal, phosphate, nitrate, potash, sodium, sulphur, oil, gas or asphaltic minerals may be applied for subject to a reservation of such deposit, as explained in subpart 2093 of this title.

(c) Lands embraced in mineral permits of leases, or in applications for such permits or leases, or classified, withdrawn or reported as valuable for any leasable mineral, or lying within the geologic structure of a field are subject to the provisions of §§ 2093.0-3 through 2093.0-7 of this title.

(d) A project or individual entry may consist of 2 or more noncontiguous parcels. However, noncontiguous lands should be in a pattern compact enough to be managed as an efficient, economic unit.

### Subpart 2611—Segregation Under the Carey Act: Procedures

#### § 2611.1 Applications.

##### § 2611.1-1 Applications for determination of suitability and availability of lands.

The first step in obtaining segregation of lands for Carey Act development shall be the filing of an application in the appropriate State office of the Bureau of Land Management requesting that the authorized officer make a determination regarding the suitability and availability of lands for a Carey Act Project. The application shall consist of a map of lands proposed to be reclaimed, containing sufficient

## § 2611.1-2

detail to clearly show which lands are included in the Project, the mode of irrigation and the source of water. The map shall bear a certification by the State official authorized to file the application that the lands are applied for subject to the provisions of subpart 2093 of this title.

### § 2611.1-2 Determination of suitability and availability of lands.

The authorized officer shall evaluate the suitability and availability of the lands for agricultural development under the Carey Act utilizing the criteria and procedures in part 2400 of this title.

### § 2611.1-3 Application for grant contract.

If it is determined that lands are suitable and available for agricultural development under the Carey Act, the State shall submit the following, in duplicate, to the appropriate Bureau of Land Management office (43 CFR part 1821):

(a) A plan of development that includes:

(1) A report on the economic feasibility of the project and the availability of an adequate supply of water to thoroughly irrigate and reclaim the lands to raise ordinary agricultural crops.

(2) Procedures for avoiding or mitigating adverse environmental impacts and for rehabilitation of the lands if all or part of the project fails.

(3) A map in sufficient detail to show the proposed major irrigation works and the lands to be irrigated. Map material and dimensions shall be as prescribed by the authorized officer and shall be drawn to a scale not greater than 1,000 feet to 1 inch. The map shall connect canals, pipelines larger than 8 inches in diameter, reservoirs and other major facilities in relationship to public survey lines or corners, where present. The map shall show other data as needed to enable retracement of the proposed major irrigation works on the ground. The engineer who prepared the map shall certify that the system depicted therein is accurately and fully represented and that the system proposed is sufficient to fully reclaim the lands.

## 43 CFR Ch. II (10-1-08 Edition)

(4) Additional data concerning the specifics of the plan and its feasibility as required by the authorized officer.

(b) A grant contract in a form prescribed by the Director, Bureau of Land Management, in duplicate, signed by the authorized State official, shall also be filed. A carbon copy of the contract shall not be accepted. The person who signs the contract on behalf of the State shall furnish evidence of his/her authority to do so. The contract shall obligate the State to all terms and conditions of the Act and all specifications of the approved plan, and shall obligate the United States to issue patents to the State upon actual reclamation of the lands according to the plan or to settlers who are its assignees, as provided in subpart 2093 of this title.

### § 2611.1-4 Approval of plan and contract.

(a) After making a determination that the proposed project is economically feasible, that sufficient water can be furnished to thoroughly irrigate and reclaim the lands, that measures to avoid or mitigate adverse environmental impacts and to rehabilitate the lands if the project fails are adequate, and that State laws and regulations concerning the disposal of the lands to actual settlers are not contrary to the provisions and restrictions of the Act, the authorized officer may approve the plan. Before making this determination and approving the plan, the authorized officer may, in agreement with the State, modify the plan.

(b) Upon approval of the plan, the grant contract may be signed by the Secretary of the Interior, or an officer in the Office of the Secretary who has been appointed by the President, by and with the advice and consent of the Senate. A notice that the contract has been signed and the lands are segregated shall be published in the FEDERAL REGISTER. As a condition to entering into the contract, the Secretary or his delegate may require additional terms and conditions. If such is done, the new contract form shall be returned to the State for signing.

(c) The contract is not final and binding until approved by the President.

(d) After the plan has been approved, and the contract signed and approved,

## Bureau of Land Management, Interior

## § 2612.2

the lands may be entered by the State and its agents for reclamation and for residency, if appropriate.

### § 2611.1-5 Priority of Carey Act applications.

Properly filed applications under § 2611.1-1 or § 2611.1-3 of this title shall have priority over any subsequently filed agricultural applications for lands within the project boundaries. However, the rejection of a Carey Act application will not preclude subsequent agricultural development under another authority.

### § 2611.2 Period of segregation.

(a) The States are allowed 10 years from the date of the signing of the contract by the Secretary in which to cause the lands to be reclaimed. If the State fails in this, the State Director may, in his discretion, extend the period for up to 5 years, or may restore the lands to the public domain at the end of the 10 years or any extension thereof. If actual construction of the reclamation works has not been commenced within 3 years after the segregation of the land or within such further period not exceeding 3 years as may be allowed for that purpose by the State Director, the State Director may, in his discretion, restore the lands to the public domain.

(b) All applications for extensions of the period of segregation must be submitted to the State Director. Such applications will be entertained only upon the showing of circumstances which prevent compliance by the State with the requirements within the time allowed, which, in the judgment of the State Director, could not have been reasonably anticipated or guarded against, such as the destruction of irrigation works by storms, floods, or other unavoidable casualties, unforeseen structural or physical difficulties encountered in the operations, or errors in surveying and locating needed ditches, canals, or pipelines.

### § 2611.3 Rights-of-way over other public lands.

When the canals, ditches, pipelines, reservoirs or other facilities required by the plan of development will be located on public lands not applied for by

the State under the Carey Act, an application for right-of-way over such lands under Title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761 *et seq.*), shall be filed separately by the proposed constructor. Rights-of-way shall be approved simultaneously with the approval of the plan, but shall be conditioned on approval of the contract.

## Subpart 2612—Issuance of Patents

### § 2612.1 Lists for patents.

When patents are desired for any lands that have been segregated, the State shall file in the BLM State Office a list of lands to be patented, with a certificate of the presiding officer of the State land board, or other officer of the State who may be charged with the duty of disposing of the lands which the State may obtain under the law, that the lands have been reclaimed according to the plan of development, so that a permanent supply of water has been made available for each tract in the list, sufficient to thoroughly reclaim each 160-acre tract for the raising of ordinary agricultural crops. If patents are to be issued directly to assignees, the list shall include their names, the particular lands each claims, and a certification by the State that each is an actual settler and has cultivated at least 20 acres of each 160-acre tract. If there are portions which cannot be reclaimed, the nature, extent, location, and area of such portions should be fully stated. If less than 5 acres of a smallest legal subdivision can be reclaimed and the subdivision is not essential for the reclamation, cultivation, or settlement of the lands; such legal subdivision must be relinquished, and shall be restored to the public domain as provided in a notice published in the FEDERAL REGISTER.

### § 2612.2 Publication of lists for patents.

(a) *Notice of lists.* When a list for patents is filed in the State Office, it shall be accompanied by a notice of the filing, in duplicate, prepared for the signature of the State Director, or his delegate, fully incorporating the list. The State shall cause this notice to be published

### § 2612.3

once a week for 5 consecutive weeks, in a newspaper of established character and general circulation in the vicinity of the lands, to be designated by the State Director, as provided in subpart 1824 of this chapter.

(b) *Proof of publication.* At the expiration of the period of publication, the State shall file in the State Office proof of publication and of payment for the same.

### § 2612.3 Issuance of patents.

Upon the receipt of proof of publication such action shall be taken in each case as the showing may require, and all tracts that are free from valid protest, and respecting which the law and regulations and grant contract have been complied with, shall be patented to the State, or to its assignees if the lands have been settled and cultivated. If patent issues to the State, it is the responsibility of the State to assure that the lands are cultivated and settled. If the State does not dispose of the patented lands within 5 years to actual settlers who have cultivated at least 20 acres of each 160 acre tract, or if the State disposes of the patented lands to any person who is not an actual settler or has not cultivated 20 acres of the 160 acre tract, action may be taken to revert title in the United States.

## Subpart 2613—Preference Right Upon Restoration

### § 2613.0-3 Authority.

The Act approved February 14, 1920 (41 Stat. 407; 43 U.S.C. 644), provides that upon restoration of Carey Act lands from segregation, the Secretary is authorized, in his discretion, to allow a preference right of entry under other applicable land laws to any Carey Act entryman on any such lands which such person had entered under and pursuant to the State laws providing for the administration of the grant and upon which such person had established actual, *bona fide* residence or had made substantial and permanent improvements.

### 43 CFR Ch. II (10-1-08 Edition)

### § 2613.1 Allowance of filing of applications.

(a) *Status of lands under State laws.* Prior to the restoration of lands segregated under the Carey Act, the Bureau of Land Management shall ascertain from the proper State officials whether any entries have been allowed under the State Carey Act laws on any such lands, and if any such entries have been allowed, the status thereof and action taken by the State with reference thereto.

(b) *No entries under State laws.* If it is shown with reasonable certainty, either from the report of the State officers or by other available information, that there are no entries under State law, then the Act of February 14, 1920, shall not be considered applicable to the restoration of the lands. Lands shall be restored as provided in a notice published in the FEDERAL REGISTER.

(c) *Entries under State laws.* If it appears from the report of the State officials or otherwise that there are entries under the State law which may properly be the basis for preference rights under this act, in the order restoring the lands the authorized officer may, in his discretion, allow only the filing of applications to obtain a preference right under the Act of February 14, 1920.

### § 2613.2 Applications.

(a) Applications for preference rights under the Act of February 14, 1920, shall be filed within 90 days of the publication of the restoration order.

(b) Applications shall be on a form approved by the Director and shall set forth sufficient facts to show that the applicant is qualified under the act and these regulations. The application must be subscribed and sworn to before a notary public.

(c) *Persons qualified.* The Act of February 14, 1920, applies only to cases of entries in good faith in compliance with the requirements of State law, with a view to reclaiming the land and procuring title pursuant to the provisions of the Carey Act; the act does not apply to cases where persons have settled on or improved the segregated land, either with the approval of the State authorities or otherwise, not

## Bureau of Land Management, Interior

## § 2621.0–3

pursuant to State law or not in anticipation of reclaiming the lands and procuring title under the Carey Act but in anticipation of initiating some kind of a claim to the land on its restoration because of failure of the project or cancellation of the segregation.

(d) *Persons not qualified.* The Act of February 14, 1920, does not apply to cases where the applicant's entry has been canceled by the State or forfeited for failure to perfect the entry according to State law, unless the failure is the result of conditions which culminated in the elimination of the lands from the project if the State has allowed a subsequent entry for the same lands, this shall be conclusive evidence that the default was the fault of the State entryman whose entry was forfeited or canceled.

### § 2613.3 Allowance of preference right.

If a person's application is approved, such person shall have 90 days to submit an application for entry under another land law, and shall be entitled to a preference right of entry under other law if and when the lands are determined to be suitable for entry under such law pursuant to the regulations found in part 2400 of this chapter.

## PART 2620—STATE GRANTS

### Subpart 2621—Indemnity Selections

Sec.

2621.0–2 Objectives and background.

2621.0–3 Authority.

2621.1 Applications for selection.

2621.2 Publication and protests.

2621.3 Certifications; mineral leases and permits.

2621.4 Application for selection of unsurveyed lands.

### Subpart 2622—Quantity and Special Grant Selections

2622.0–1 Purpose and scope.

2622.0–8 Lands subject to selection.

### Subpart 2623—School Land Grants to Certain States Extended To Include Mineral Sections

2623.0–3 Authority.

2623.0–7 Cross reference.

2623.0–8 Lands subject to selection.

2623.1 Effective date of grant.

2623.2 Claims protected.

2623.3 States not permitted to dispose of lands except with reservation of minerals.

2623.4 Grant of mineral school sections effective upon restoration of land from reservation.

### Subpart 2624 [Reserved]

### Subpart 2625—Swamp-land Grants

2625.0–3 Authority.

2625.1 Selection and patenting of swamp lands.

2625.2 Applications in conflict with swamp-land claims.

### Subpart 2627—Alaska

2627.1 Grant for community purposes.

2627.2 Grant for University of Alaska.

2627.3 Grant for general purposes.

2627.4 All grants.

AUTHORITY: R.S. 2478; 43 U.S.C. 1201.

### Subpart 2621—Indemnity Selections

#### § 2621.0–2 Objectives and background.

Generally, grants made by Statehood Acts to the various States of school sections 16 and 36, and in addition, sections 2 and 32 in Arizona, New Mexico, and Utah, attach to a school sections on the date of acceptance or approval of the plat of survey thereof. If the acceptance or approval was prior to the granting act, or to the date of admission of the State into the Union, the grant attaches either on the date of approval of the act or the date of admission into the Union, whichever is the later date. However, if on the date the grant would otherwise attach, the land is appropriated under some applicable public land law, the grant does not attach, and the State is entitled to indemnity therefor as provided in the regulations in this subpart.

[35 FR 9607, June 13, 1970]

#### § 2621.0–3 Authority.

(a) Sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852), referred to in §§ 2621.0–3 to 2621.4 of this subpart as *the law*, authorize the public land States except Alaska to select lands (or the retained or reserved interest of the United States in lands which have been disposed of with a reservation to the United States

## § 2621.1

of all minerals, or any specified mineral or minerals, which interest is referred to in §§ 2621.0-3 to 2621.4 as the *mineral estate*) of equal acreage within their boundaries as indemnity for grant lands in place lost to the States because of appropriation before title could pass to the State or because of natural deficiencies resulting from such causes as fractional sections and fractional townships.

(b) The law provides that indemnity for lands lost because of natural deficiencies will be selected from the unappropriated, nonmineral, public lands, and that indemnity for lands lost before title could pass to the State will be selected from the unappropriated, public lands subject to the following restrictions:

(1) No lands mineral in character may be selected except to the extent that the selection is made as indemnity for mineral lands.

(2) No lands on a known geologic structure of a producing oil or gas field may be selected except to the extent that the selection is made as indemnity for lands on such a structure.

(c) The law also provides that lands subject to a mineral lease or permit may be selected, but only if the lands are otherwise available for selection, and if none of the lands subject to that lease or permit are in producing or producible status. It permits the selection of lands withdrawn, classified, or reported as valuable for coal, phosphate, nitrate, potash, oil, gas, asphaltic minerals, oil shale, sodium, and sulphur and lands withdrawn by Executive Order 5327 of April 15, 1930, if such lands are otherwise available for, and subject to, selection: *Provided*, That except where the base lands are mineral in character, such minerals are reserved to the United States in accordance with and subject to the regulations in subpart 2093. Except for the withdrawals mentioned in this paragraph and for lands subject to classification under section 7 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269; 43 U.S.C. 315f), as amended, the law does not permit the selection of withdrawn or reserved lands.

(d) Subsection (b) of the section 2276 of the Revised Statutes, as amended, sets forth the principles of adjustment

## 43 CFR Ch. II (10-1-08 Edition)

where selections are made to compensate for deficiencies of school lands in fractional townships.

[35 FR 9607, June 13, 1970]

### § 2621.1 Applications for selection.

(a) Applications for selection must be made on a form approved by the Director, and must be accompanied by a petition on a form approved by the Director properly executed. However, if the lands described in application have been already classified and opened for selection pursuant to the regulations of this part, no petition is required.

(b) Applications for selection under the law will be made by the proper selecting agent of the State and will be filed, in duplicate, in the proper office in the State or for lands or mineral estate in a State in which there is no office, will be filed in accordance with the provisions of § 1821.2 of this chapter.

(c) Applications must be accompanied by the following information:

(1) A reference to the Act of August 27, 1958 (72 Stat. 928), as amended.

(2) A certificate by the selecting agent showing:

(i) All facts relative to medicinal or hot springs or other waters upon the selected lands.

(This provision does not apply insofar as the application involves the selection of the mineral estate.)

(ii) That indemnity has not been previously granted for the assigned base lands and that no other selection is pending for such assigned base.

(3) A statement describing the mineral or nonmineral character of each smallest legal subdivision of the base and selected lands or mineral estate.

(4) A certificate by the officer or officers charged with the care and disposal of school lands that no instrument purporting to convey, or in any way incumber, the title to any of the land used as base or bases, has been issued by the State or its agents.

(d) In addition to the requirements of paragraph (c) of this section, applications for selection must conform with the following rules:

(1) The selected land and base lands must be described in accordance with the official plats of survey except that unsurveyed lands will be described in

## Bureau of Land Management, Interior

## § 2621.4

terms of protracted surveys as officially approved in accordance with 43 CFR 3101.1-4(d)(1). If the unsurveyed lands are not covered by protracted surveys the lands must be described in terms of their probable legal description, if and when surveyed in accordance with the rectangular system of public land surveys, or if the State Director gives written approval therefor, by a metes and bounds description adequate to identify the lands accurately.

(2) Separate base or bases do not have to be assigned to each smallest legal subdivision of selected surveyed lands or mineral estate and to each tract of unsurveyed lands upon application. However, prior to final approval of the selection, separate base or bases shall be assigned. Assignment of the smallest actual or probable legal subdivision as base will constitute an election to take indemnity for the entire subdivision and is a waiver of the State's rights to such subdivision, except that any remaining balance of acreage may be used as base in other selections.

(3) For purposes of selecting unsurveyed land a protracted section shall be considered to be a smallest legal subdivision except where the State Director finds otherwise.

(4) The cause of loss of the base lands to the State must be specifically stated for each separate base.

(Secs. 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852))

[35 FR 9607, June 13, 1970. Redesignated and amended at 46 FR 24135, Apr. 29, 1981]

### § 2621.2 Publication and protests.

(a) The State will be required to publish once a week for five consecutive weeks in accordance with § 1824.3 of this chapter, at its own expense, in a designated newspaper and in a designated form, a notice allowing all persons claiming the land adversely to file in the appropriate office their objections to the issuance of a certification to the State for lands selected under the law. A protestant must serve on the State a copy of the objections and furnish evidence of service to the appropriate land office.

(b) The State must file a statement of the publisher, accompanied by a copy of the notice published, showing

that publication has been had for the required time.

[35 FR 9607, June 13, 1970. Redesignated at 46 FR 24135, Apr. 29, 1981]

### § 2621.3 Certifications; mineral leases and permits.

(a) Certifications will be issued for all selections approved under the law by the authorized officer of the Bureau of Land Management.

(b) Where all the lands subject to a mineral lease or permit are certified to a State, or if, where the State has previously acquired title to a portion of the lands subject to a mineral lease or permit, the remaining lands in the lease or permit are certified to the State, the State shall succeed to the position of the United States thereunder. Where a portion of the lands subject to any mineral lease or permit are certified to a State, the United States shall retain for the duration of the lease or permit the mineral or minerals for which the lease or permit was issued.

[35 FR 9607, June 13, 1970. Redesignated at 46 FR 24135, Apr. 29, 1981]

### § 2621.4 Application for selection of unsurveyed lands.

(a) The authorized officer will reject any application for selection of unsurveyed lands if: (1) The costs of survey of the lands would grossly exceed the average per-acre costs of surveying public lands under the rectangular system of surveys in the State in which the lands are located, or (2) if the conveyance of the lands would create serious problems in the administration of the remaining public lands or resources thereof or would significantly diminish the value of the remaining public lands. The term *remaining public lands* means the public lands from which the applied-for lands would be separated by survey.

(b) In addition to the provisions of this section, applications for selection of unsurveyed lands are subject to the provisions of subpart 2400.

[35 FR 9607, June 13, 1970. Redesignated at 46 FR 24135, Apr. 29, 1981]

### Subpart 2622—Quantity and Special Grant Selections

#### § 2622.0-1 Purpose and scope.

(a) Sections 2622.0-1 to 2622.0-8 apply generally to quantity and special grants made to States other than Alaska.

(b) The regulations in §§ 2621.2 to 2621.4 apply to quantity and special grants with the following exceptions and modifications:

(1) Sections 2621.4(b) and 2621.2(c)(4); and §§ 2621.2(d) (3) and (4) and all references to base lands and to mineral estate do not apply.

(2) Section 2621.2(c)(1) is modified to require reference to the appropriate granting act; § 2621.2(c)(3) is modified to require a statement testifying to the nonmineral character of each smallest legal subdivision of the selected land; § 2621.2(d)(2) is modified to permit as much as 6,400 acres in a single selection; and § 2621.2 is modified to require a certificate that the selection and those pending, together with those approved, do not exceed the total amount granted for the stated purpose of the grant.

[35 FR 9608, June 13, 1970]

#### § 2622.0-8 Lands subject to selection.

Selections made in satisfaction of quantity and special grants can generally be made only from the vacant, unappropriated, nonmineral, surveyed public lands within the State to which the grant was made. If the lands are otherwise available for selection, the States may select lands which are withdrawn, classified, or reported as valuable for coal, phosphate, nitrate, potash, oil, gas, asphaltic minerals, sodium, or sulphur, provided that the appropriate minerals are reserved to the United States in accordance with and subject to the regulations of subpart 2093.

[35 FR 9608, June 13, 1970]

### Subpart 2623—School Land Grants to Certain States Extended To Include Mineral Sections

SOURCE: 35 FR 9609, June 18, 1970, unless otherwise noted.

#### § 2623.0-3 Authority.

(a) The first paragraph of section 1 of the Act approved January 25, 1927 (44 Stat. 1026; 43 U.S.C. 870), reads as follows:

That, subject to the provisions of paragraphs (a), (b), and (c) of this section, the several grants to the States of numbered sections in place for the support or in aid of common or public schools be, and they are hereby, extended to embrace numbered school sections mineral in character, unless land has been granted to and/or selected by and certified or approved, to any such State or States as indemnity or in lieu of any land so granted by numbered sections.

(b) The beneficiaries of this grant are the States of Arizona, California, Colorado, Idaho, Montana, Nebraska, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. The grant also extends to the unsurveyed school sections reserved, granted, and confirmed to the State of Florida by the Act of Congress approved September 22, 1922 (42 Stat. 1017; 16 U.S.C. 483, 484).

(c) The additional grant thus made, subject to all the conditions in the statute making same, applies to school-section lands known to be of mineral character at the effective date thereof as hereinafter defined. It does not include school-section lands nonmineral in character, those not known to be mineral in character at time of grant, but afterwards found to contain mineral deposits, such lands not being excepted from the grants theretofore made (*Wyoming et al. v. United States*, 255 U.S. 489-500, 501, 65 L. ed. 742-748), nor does it include lands in numbered school sections in lieu of or as indemnity for which lands were conveyed to the States first above named, or to the State of Florida with respect to school-section lands coming within the purview of the Act of September 22, 1922, prior to January 25, 1927.

(d) Determinations made prior to January 25, 1927, by the Secretary of the Interior or the Commissioner of the General Land Office to the effect that lands in school sections were excepted from school-land grants because of their known mineral character do not, of themselves, prevent or affect in any way the vesting of title in the States

## Bureau of Land Management, Interior

## § 2623.1

pursuant to the provisions of the statute making the additional grant.

(e) Subsection (a) of section 1 of the Act provides:

That the grant of numbered mineral sections under this Act shall be of the same effect as prior grants for the numbered non-mineral sections, and title to such numbered mineral sections shall vest in the States at the time and in the manner and be subject to all the rights of adverse parties recognized by existing law in the grants of numbered nonmineral sections.

### § 2623.0-7 Cross reference.

For national forests and national parks, see § 1821.7-2 of this chapter. For naval petroleum reserves, see § 3102.2-2 of this chapter.

### § 2623.0-8 Lands subject to selection.

(a) *Lands included in grant.* (1) Section 2 of the Act of January 25, 1927 (44 Stat. 1027; 43 U.S.C. 871) reads as follows:

SEC. 2. That nothing herein contained is intended or shall be held or construed to increase, diminish, or affect the rights of States under grants other than for the support of common or public schools by numbered school sections in place, and this Act shall not apply to indemnity of lieu selections or exchanges or the right hereafter to select indemnity for numbered school sections in place lost to the State under the provisions of this or other Acts, and all existing laws governing such grants and indemnity or lieu selections and exchanges are hereby continued in full force and effect.

(2) The only grants affected in any way by the provisions of the Act of January 25, 1927, are those of numbered sections of land in place made to the States for the support of common or public schools. The adjudication of claims to land asserted under other grants, for indemnity or lieu lands and exchanges of lands, will proceed as theretofore, being governed by the provisions of existing laws applicable thereto. The States will be afforded full opportunity, however, if the facts and conditions are such as to authorize such action, either to assign new base in support of or to withdraw pending unapproved indemnity school land selections in support of which mineral school-section lands have been tendered as base.

(b) *Lands excluded from grant.* (1) Subsection (c) of section 1 of the Act of January 25, 1927, provides:

That any lands included within the limits of existing reservations of or by the United States, or specifically reserved for waterpower purposes, or included in any pending suit or proceedings in the courts of the United States, or subject to or included in any valid application, claim, or right initiated or held under any of the existing laws of the United States, unless or until such application, claim, or right is relinquished or canceled, and all lands in the Territory of Alaska are excluded from the provisions of this act.

(2) School-section lands included within the limits of existing reservations of or by the United States, specifically reserved for waterpower purposes, or included in any suit or proceedings in the courts of the United States, prior to January 25, 1927, and all lands in Alaska are excluded from the provisions of the Act. (§ 2623.4)

(3) The words *existing reservation* as used in subsection (c) are construed generally and subject to specific determination in particular cases if the need therefor shall arise, as including Indian and military reservations, naval and petroleum reserves, national parks, national forests, stock driveways, reservations established under the Act of June 25, 1910 (36 Stat. 847; 43 U.S.C. 141-143), as amended by the Act of August 24, 1912 (37 Stat. 497; 43 U.S.C. 142), and all forms of Executive withdrawal recognized and construed by the Department of the Interior as reservations, existent prior to January 25, 1927.

### § 2623.1 Effective date of grant.

Grants to the States of school lands in place (the numbered sections), of the character and status subject thereto, as a rule, are effective and operate to vest title upon the date of the approval of the statute making the grant or the date of the admission of the State into the Union, as to lands then surveyed, and as to the lands thereafter surveyed upon the date of the acceptance of the survey thereof by the Director of the Bureau of Land Management. (United States v. Morrison, 240 U.S. 192, 60 L. ed. 599; United States v. Sweet, 245 U.S. 563, 62 L. ed. 473; Wyoming et al. v. United States, *supra*.) It is held, therefore, that the grant made by the first

## § 2623.2

## 43 CFR Ch. II (10–1–08 Edition)

paragraph of section 1 of the Act of January 25, 1927, subject to the provision therein with respect to indemnity or lieu lands, to the provisions of subsections (b) and (c) of said section 1 and following the plain provisions of subsection (a) thereof is effective upon the date of the approval of the Act (January 25, 1927) as to lands then surveyed and the survey thereof accepted by the Director of the Bureau of Land Management and as to the unsurveyed school sections in the State of Florida granted to that State by the Act of September 22, 1922. The grant, as to other lands thereafter surveyed, subject to the same provisions is effective upon the acceptance of the survey thereof as above indicated.

### § 2623.2 Claims protected.

(a) Valid applications, claims, or rights protected by the provisions of subsection (c) of section 1 of the Act of January 25, 1927, include applications, entries, selections, locations, permits, leases, and other forms of filing, initiated or held pursuant to existing laws of the United States prior to January 25, 1927, embracing known mineral school-section lands then surveyed and otherwise within the terms of the additional grant, and as to lands thereafter surveyed, valid applications, claims, or rights so initiated or held prior to the date of the acceptance of the survey. The additional grant to the State will attach upon the effective date of the relinquishment or cancellation of any claim, so asserted, in the absence of any other valid existing claim for the land and if same be then surveyed. Should the validity of any such claim be questioned by the State, proceedings with respect thereto by protest, contest, hearing, etc., will be had in the form and manner prescribed by existing rules governing such cases. This procedure will be followed in the matter of all protests, contests, or claims filed by individuals, associations, or corporations against the States affecting school-section lands.

### § 2623.3 States not permitted to dispose of lands except with reservation of minerals.

(a) Subsection (b) of section 1 of the Act of January 25, 1927, provides:

That the additional grant made by this Act is upon the express condition that all sales, grants, deeds, or patents for any of the lands so granted shall be subject to and contain a reservation to the State of all the coal and other minerals in the lands so sold, granted, deeded, or patented, together with the right to prospect for, mine, and remove the same. The coal and other mineral deposits in such lands shall be subject to lease by the State as the State legislature may direct, the proceeds of rentals and royalties therefrom to be utilized for the support or in aid of the common or public schools: *Provided*, That any lands or minerals disposed of contrary to the provisions of this Act shall be forfeited to the United States by appropriate proceedings instituted by the Attorney General for that purpose in the United States district court for the district in which the property or some part thereof is located.

(b) The lands granted to the States by the Act of January 25, 1927, and the mineral deposits therein are to be disposed of by the States in the manner prescribed in subsection (b) thereof, provision being made for judicial forfeiture in case of disposal of any of the lands or minerals contrary to the provisions of the act.

### § 2623.4 Grant of mineral school sections effective upon restoration of land from reservation.

(a) By the Act of January 25, 1927 (44 Stat. 1026; 43 U.S.C. 870, 871), which grants to the States certain school-section lands that are mineral in character, it is provided by subsection (c) of section 1 that where such lands are embraced within an existing reservation at the date of said Act of 1927, they are thereby excluded from the grant made by said act.

(b) Under the amendatory Act of May 2, 1932 (47 Stat. 140; 43 U.S.C. 870), it is provided that in the event of the restoration of the lands from such reservation, the grant to the State of such mineral school-section lands will thereupon become effective.

(c) Adjudications in connection with the State's title to school sections will be governed by the provisions of this amendatory Act of May 2, 1932.

## Subpart 2624 [Reserved]

## Bureau of Land Management, Interior

## § 2625.1

### Subpart 2625—Swamp-land Grants

SOURCE: 35 FR 9610, June 13, 1970, unless otherwise noted.

#### § 2625.0-3 Authority.

(a) Circular dated Mar. 17, 1896, containing the swamp-land laws and regulations, states:

As soon as practicable after the passage of the swamp-land grant of September 28, 1850, viz, on the 21st of November 1850, the commissioner transmitted to the governors of the respective States to which the grant applied copies of office circular setting forth the provisions of said Act, giving instructions thereunder, and allowing the States to elect which of two methods they would adopt for the purpose of designating the swamp lands, viz:

1. The field notes of Government survey could be taken as the basis for selections, and all lands shown by them to be swamp or overflowed, within the meaning of the act, which were otherwise vacant and unappropriated September 28, 1850, would pass to the States.

2. The States could select the lands by their own agents and report the same to the United States surveyor general with proof as to the character of the same.

The following States elected to make the field notes of survey the basis for determining what lands passed to them under the grant, viz: Louisiana, Michigan, and Wisconsin. Later the State of Minnesota adopted this method of settlement.

The authorities of the following States elected to make their selections by their own agents and present proof that the lands selected were of the character contemplated by the swamp grant, viz: Alabama, Arkansas, Florida, Illinois, Indiana, Iowa, Mississippi, Missouri, and Ohio. Later Oregon adopted this method.

The States of Alabama, Arkansas, Indiana, Mississippi, and Ohio adopted the second method at the beginning, but they changed to the first method, i.e., to the field notes of survey, as a basis of settlement, in recent years.

The authorities of California did not adopt either method, and the passage of the Act of July 23, 1866, rendered such action on their part unnecessary.

In Louisiana the selections under the grant of March 2, 1849, forming the bulk of the selections in said State, are made in accordance with the terms of said act by deputy surveyors, under the direction of the United States surveyor general, at the expense of the State.

(b) The grant of swamp lands, under Acts of March 2, 1849, and September 28, 1850, is a grant in praesenti. See United States Supreme Court decisions *Railroad Co. v. Fremont County* (9 Wall, 89, 19 L. ed. 563); *Railroad Co. v. Smith* (id. 95, 19 L. ed. 599); *Martin v. Marks* (7 Otto 345, 24 L. ed. 940); decisions of the Secretary of the Interior, December 23, 1851 (1 Lester's L.L. 549), April 25, 1862, and opinion of Attorney General, November 10, 1858 (1 Lester's L.L. 564).

(c) The Act of September 28, 1850, did not grant swamp and overflowed lands to States admitted into the Union after its passage. See decision of Secretary of the Interior, August 17, 1858; Commissioner, General Land Office, May 2, 1871 (Copp's L.L. 474), affirmed by Secretary June 1, 1871, and Commissioner, General Land Office, January 19, 1874 (Copp's L.L. 473), affirmed by Secretary July 9, 1875.

(d) A State having elected to take swamp land by field notes and plats of survey is bound by them, as is also the Government. (See Secretary's decisions, October 4, 1855 (1 Lester's L.L. 553), August 1, 1859 (id. 571), December 4, 1877 (4 Copp's L.L. 149), and September 19, 1879.

(e) The Swamp-Land Acts do not contain any exception or reservation of mineral lands and none is to be implied, since at the time of their enactment the public policy of withholding mineral lands for disposition only under laws including them, was not established. *Work, Secretary of the Interior v. Louisiana* (269 U.S. 250, 70 L. ed. 259).

#### § 2625.1 Selection and patenting of swamp lands.

(a) All lands properly selected and reported to the Bureau of Land Management as swamp will be compared with the records of the said office, and lists of such lands as are shown to be swamp or overflowed, within the meaning of the Acts of March 2, 1849, and September 28, 1850 (9 Stat. 352, 519), and that are otherwise free from conflict will be made out by such office and approved.

(b) When the lists have been approved a copy of each list will be transmitted to the governor of the State, with the

## § 2625.2

statement that on receipt of his request patent will issue to the State for the lands. A copy of each list also will be transmitted to the authorizing officer of the proper office for the district in which the lands are situated, and he will be requested to examine the same with the records of his office and report any conflicts found.

(c) Upon receipt of a request from the governor for patent, and a report from the authorizing officer as to status, patents will issue to the State for all the lands embraced in said lists so far as they are free from conflict.

(d) Under the provisions of the Act of March 2, 1849, granting swamp lands to the State of Louisiana, a certified copy of the list approved by the Director, transmitted to the Governor, has the force and effect of a patent.

### § 2625.2 Applications in conflict with swamp-land claims.

Applications adverse to the State, in conflict with swamp-land claims, will be governed by the following rules:

(a) In those States where the adjudication of swamp-land claims is based on the evidence contained in the survey returns, applications adverse to the State for lands returned as swamp will be rejected unless accompanied by a showing that the land is non-swamp in character.

(b) In such case, the claim adverse to the State must be supported by a statement of the applicant under oath, corroborated by two witnesses, setting forth the basis of the claim and that at the date of the swamp-land grant the land was not swamp and overflowed and not rendered thereby unfit for cultivation. In the absence of such affidavit the application will be rejected. If properly supported, the application will be received and suspended subject to a hearing to determine the swamp or nonswamp character of the land, the burden of proof being upon the non-swamp claimant.

(c) In those States where the survey returns are not made the basis for adjudication of the swamp-land selections, junior applications for lands covered by swamp-land selections may be received and suspended, if supported by non-swamp affidavits corroborated by two witnesses, subject to hearing to de-

## 43 CFR Ch. II (10-1-08 Edition)

termine the character of the land, whether swamp or non-swamp, and the burden of proof will be upon the junior applicant. Likewise, the State, if a junior applicant, may be heard upon furnishing an affidavit corroborated by two witnesses alleging that the land is swamp in character within the meaning of the swamp-land grant, in which case the burden of proof at the hearing will be upon the State.

(d) Where hearings are ordered in any such cases, the Rules of Practice governing contests will be applied, except as herein otherwise provided.

### Subpart 2627—Alaska

SOURCE: 35 FR 9611, June 13, 1970, unless otherwise noted.

### § 2627.1 Grant for community purposes.

(a) *Authority.* The Act of July 7, 1958 (72 Stat. 339, 340), grants to the State of Alaska the right to select, within 25 years after January 3, 1959, not to exceed 400,000 acres of national forest lands in Alaska which are vacant and unappropriated at the time of their selection and not to exceed 400,000 acres of other public lands in Alaska which are vacant, unappropriated, and unreserved at the time of their selection. The act provides that the selected lands must be adjacent to the established communities or suitable for prospective community centers and recreational areas. The act further provides that such lands shall be selected with the approval of the Secretary of Agriculture as to national forest lands and with the approval of the Secretary of the Interior as to other lands, and that no selection shall be made north and west of the line described in section 10 of the act without approval of the President or his designated representative.

(b) *Applicable regulations.* Unless otherwise indicated therein, the regulations in § 2627.3 (a) to (d) apply to the grant and selection of lands for community purposes. In addition to the requirements of § 2627.3(c), where the selected lands are national forest, the application for selection must be accompanied by a statement of the Secretary

## Bureau of Land Management, Interior

## § 2627.3

of Agriculture or his delegate showing that he approves the selection.

(c) *Approval of selections outside of national forests.* Selection of lands outside of national forests will be approved by the authorized officer of the Bureau of Land Management if, all else being regular, he finds that approval of a selection of lands adjacent to an established community will further expansion of an established community, or if the lands are suitable for prospective community centers and recreational areas.

### § 2627.2 Grant for University of Alaska.

(a) *Statutory authority.* The Act of January 21, 1929 (45 Stat. 1091), as supplemented July 7, 1958 (72 Stat. 339, 343; 43 U.S.C. 852 NOTE), grants to the State of Alaska, for the exclusive use and benefit of the University of Alaska, the unsatisfied portion of 100,000 acres of vacant, surveyed, unreserved public lands in said State, to be selected by the State, under the direction and subject to the approval of the Secretary of the Interior, and subject to the conditions and limitations expressed in the act.

(b) *Applications for selection.* (1) Applications to select lands under the grant made to Alaska by the Act of January 21, 1929, will be made by the proper selecting agent of the State and will be filed in the proper office of the district in which such selected lands are situated. Such selections must be made in accordance with the law and with the applicable regulations governing selection of lands by States as set forth in part 2620.

(2) Notice of selection and publication is required as provided by § 2627.5 (b) and (c).

(3) Each list of selections must contain a reference to the act under which the selections are made and must be accompanied by a certificate of the selecting agent showing the selections are made under and pursuant to the laws of the State of Alaska.

(4) The selections in any one list must not exceed 6,400 acres.

(5) Each list must be accompanied by a certification of the selecting agent stating that the acreage selected together with the cumulative acreage total of all prior sales for lists pending

and finally approved for clear-listing or patenting does not exceed 100,000 acres.

(c) *Statement with application.* Every application for selection under the Act of January 21, 1929, must be accompanied by a duly corroborated statement making the following showing as to the lands sought to be selected.

(1) That no portion of the land is occupied for any purpose by the United States and that to the best of his knowledge and belief the land is unoccupied, unimproved, and unappropriated by any person claiming the same other than the applicant; and that at the date of the application no part of the land was claimed under the mining laws.

(2) That the land applied for does not extend more than 160 rods along the shore of any navigable water or that such restriction has been or should be waived. (See § 2094.2 of this chapter.)

(3) All facts relative to medicinal or hot springs or other waters upon the lands must be stated.

### § 2627.3 Grant for general purposes.

(a) *Statutory authority.* (1) The Act of July 7, 1958 (72 Stat. 339-343), referred to in paragraphs (a) to (d) of this section as *the act*, grants to the State of Alaska the right to select, within 25 years from January 3, 1959, not to exceed 102,550,000 acres from the public lands in Alaska which are vacant, unappropriated and unreserved at the time of selection. The Act of September 14, 1960 (74 Stat. 1024), defines vacant unappropriated, unreserved public lands in Alaska to include the retained or reserved interest of the United States in lands which have been disposed of with a reservation to the United States of all minerals or any specified mineral or minerals.

(2) The Act further provides that no selection shall be made in the area north and west of the line described in section 10 thereof (72 Stat. 345) without the approval of the President or his designated representative.

(b) *Lands subject to selection; patents; minerals.* (1) The Act as amended August 18, 1959 (73 Stat. 395), provides that any lease, permit, license, or contract issued under the Mineral Leasing Act of 1920 (41 Stat. 437; 30 U.S.C. 181 *et seq.*), as amended, or under the Alaska

### § 2627.3

Coal Leasing Act of 1914 (38 Stat. 741; 30 U.S.C. 432 *et seq.*), as amended, referred to in this section as *the mineral leasing acts*, shall have the effect of withdrawing the lands subject thereto from selection by the State.

(2) Under the Act, the State may select any vacant, unappropriated, and unreserved public lands in Alaska, whether or not they are surveyed and whether or not they contain mineral deposits. For the purposes of selection, leases, permits, licenses, and contracts issued under the Mineral Leasing Acts of 1914 and 1920 will be considered an appropriation of lands. Where the preference provisions of §2627.4(a) do not apply, selections by the State of lands covered by an application filed prior to the State selection will be rejected to the extent of the conflict when and if such application is allowed. Conflicting applications and offers for mineral leases and permits, except for preference right applicants, filed pursuant to the Mineral Leasing Act, whether filed prior to, simultaneously with, or after the filing of a selection under this part will be rejected when and if the selection is tentatively approved by the authorized officer of the Bureau of Land Management in accordance with paragraph (d) of this section.

(3) Patents will be issued for all selections approved under the act by the authorized officer of the Bureau of Land Management but such patents will not issue unless or until the exterior boundaries of the selected area are officially surveyed.

(4) (i) Where the State selects all the lands in a mineral lease, permit, license, or contract, issued under the Mineral Leasing Acts of 1914 and 1920, the patent issued under the act will convey to the State all mineral deposits in the selected lands. Any such patent shall vest in the State all right, title, and interest of the United States in and to any such lease, permit, license, or contract that remains outstanding on the effective date of the patent, including the right to all rentals, royalties, and other payments accruing after that date under such lease, permit, license, or contract, and including any authority that may have been retained by the United States to modify the terms and conditions of

### 43 CFR Ch. II (10–1–08 Edition)

such lease, permit, license, or contract. Issuance of patent will not affect the continued validity of any such lease, permit, license, or contract or any rights arising thereunder.

(ii) Where the State selects a portion of the lands subject to a mineral lease, permit, license, or contract issued under the Mineral Leasing Acts of 1914 and 1920, the patent issued under the act shall reserve to the United States the mineral or minerals subject to that lease, permit, license, or contract, together with such further rights as may be necessary to the full and complete enjoyment of all rights, privileges, and benefits under or with respect to that lease, permit, license, or contracts. Upon the termination of the lease, permit, license, or contract, title to minerals so reserved to the United States shall pass to the State.

(c) *Applications for selection.* (1) Applications for selection of lands under the act will be made by the proper selecting agent of the State and will be filed, in duplicate, in the proper office of the district in which such selected lands are situated. No special form is required but it must be typewritten and must contain the following information:

(i) A reference to the Act of July 7, 1958 (70 Stat. 709), as supplemented, and a statement that the selection, together with other selections under the act pending or approved, does not exceed 102,550,000 acres (400,000 acres where one of the grants for community purposes is involved).

(ii) A certificate by the selecting agent showing:

(a) That the selection is made under and pursuant to the laws of the State.

(b) The acreage selected and the cumulative acreage of all prior selection lists pending and finally approved for clear-listing or patenting.

(c) His official title and his authority to make the selection on behalf of the State.

(d) That no portion of the selected land is occupied for any purpose by the United States and that to the best of his knowledge and belief the land is unoccupied, unimproved, and unappropriated by any person claiming the land other than the applicant, and that at the date of the application no part of

## Bureau of Land Management, Interior

## § 2627.4

the land claimed or occupied under the mining laws.

(e) That the selected land does not extend more than 160 rods along the shore of any navigable water or that such restriction has been waived or should be waived. (§2094.2 of this chapter.)

(f) All the facts relative to medicinal or hot springs or other waters upon the selected lands.

(iii) If the selected lands are surveyed, the legal description of the lands in accordance with official plats of survey.

(iv) If the selected lands are unsurveyed and are described by approved protraction diagrams of the rectangular system of surveys, such description is required.

(v) If the selected lands are unsurveyed and are not described by approved protraction diagrams, a description of the lands and a map or maps, in duplicate, sufficient to permit ready identification of the location, boundaries, and area of the lands.

(2) Selections must be accompanied by a filing fee of \$10 for 5,760 acres or fraction thereof in the selection which fee is not returnable.

(3) All selections shall be made in reasonably compact tracts, taking into account the situation and potential uses of the lands involved. A tract will not be considered compact if it excludes other public lands available for selection within its exterior boundary. Each tract selected shall contain at least 5,760 acres unless isolated from other tracts open to selection.

(4) If the selected lands are in the area north and west of the line described in section 10 of the Act, all selection made or confirmed by the act must be accompanied by a statement of the President or his designated representative showing that he approves the selection.

(5) Section 2627.3(a)(1) and (c)(1)(ii) do not apply to the extent that an application embraces a reserved or retained interest.

(d) *Effect of approval of selections.* Following the selection of lands by the State and the tentative approval of such selection by the authorized officer of the Bureau of Land Management, the State is authorized to execute con-

ditional leases and to make conditional sales of such selected lands pending survey of the exterior boundaries of the selected area, if necessary, and issuance of patent. Said officer will notify the appropriate State official in writing of his tentative approval of a selection after determining that there is no bar to passing legal title to the lands to the State other than the need for the survey of the lands or for the issuance of patent or both.

### § 2627.4 All grants.

(a) *State preference right of selection: waivers.* (1) The Act of July 7, 1958 (see §2627.3(a)), provide that upon the revocation of any order of withdrawal in Alaska, the order of revocation shall provide for a period of not less than 90 days before the date on which it otherwise becomes effective during which period the State of Alaska shall have a preferred right of selection under the acts of 1956 and 1958, except as against prior existing valid rights, equitable claims subject to allowance and confirmation and other preferred rights of application conferred by law.

(2) Where the proper selecting agent of the State files in writing in the proper office a waiver of the preference provisions of paragraph (a) of this section in connection with the proposed revocation of an order of withdrawal, the order affecting such revocation will not provide for such preference.

(b) *Segregative effect of applications.* Lands desired by the State under the regulations of this part will be segregated from all appropriations based upon application or settlement and location, including locations under the mining laws, when the state files its application for selection in the proper office properly describing the lands as provided in §2627.3(c)(1) (iii), (iv), and (v). Such segregation will automatically terminate unless the State publishes first notice as provided by paragraph (c) of this section within 60 days of service of such notice by the appropriate officer of the Bureau of Land Management.

(c) *Publications and protests.* (1) The State will be required to publish once a week for five consecutive weeks in accordance with §1824.4 of this chapter, at its own expense, in a designated

newspaper, and in a designated form, a notice allowing all persons claiming the land adversely to file in the appropriate office their objections to the issuance of patent or certification for lands selected under the regulations of this part. A protestant must serve on the State a copy of the objections and furnish evidence of service to the proper office.

(2) The State must file a statement of the publisher, accompanied by a copy of the notice published, showing that publication has been had for the required time.

## PART 2630—RAILROAD GRANTS

### Subpart 2631—Patents for Lands Sold by Railroad Carriers (Transportation Act of 1940)

Sec.

2631.0–3 Authority.

2631.0–8 Lands for which applications may be made.

2631.1 Applications.

2631.2 Publication of notice.

2631.3 Surveying and conveyance fees.

2631.4 Patents.

### Subpart 2631—Patents for Lands Sold by Railroad Carriers (Transportation Act of 1940)

AUTHORITY: R.S. 2478; 43 U.S.C. 1201.

SOURCE: 35 FR 9613, June 13, 1970, unless otherwise noted.

#### § 2631.0–3 Authority.

Subsection (b) of section 321, Part II, Title III, of the Transportation Act of September 18, 1940 (54 Stat. 934; 49 U.S.C. 65), authorizes the issuance of patents for the benefit of certain innocent purchasers for value of land-grant lands from railroad carriers which have released their land-grant claims.

NOTE: Notices of releases of land grant claims by railroad carriers listing the carriers, the date of the approval of the release and the land-grant predecessors involved dated Dec. 17, 1940, May 17, 1941, and June 29, 1942, appear at 6 FR 449, 2634, and 7 FR 5319.

#### § 2631.0–8 Lands for which applications may be made.

Subsection (b) of section 321, Part II, Title III, of the Transportation Act of

1940 provides that in the case of a railroad carrier, or a predecessor, which received a land grant to aid in the construction of any part of its railroad, the laws relating to compensation for certain Government transportation services shall continue to apply as though subsection (a) of section 321 had not been enacted unless the carrier shall file on or before September 18, 1941, with the Secretary of the Interior, in the form and manner prescribed by him, a release of any claim it may have to lands, interests in lands, compensation, or reimbursement on account of lands or interests in lands so granted, claimed to have been granted or claimed should have been granted. Section 321 provides further that nothing therein shall be construed as preventing the issuance of patents confirming the title to such uncertified or unpatented lands as the Secretary of the Interior shall find have been sold prior to September 18, 1940, to innocent purchasers for value. Subsection (b) of section 321 authorizing the issuance of such patents is not an enlargement of the grants, and does not extend them to lands not already covered thereby and, therefore, has no application to lands which for various reasons, such as mineral character, prior grants, withdrawals, reservations, or appropriation, were not subject to the grants. It does apply, however, to lands selected under remedial or lieu acts supplemental to the original grants as well as to primary and indemnity lands. Classification under section 7 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269), as amended by the Act of June 26, 1936 (49 Stat. 1976; 43 U.S.C. 315f), will not be required where the sold land is such as the company was authorized by law to select.

#### § 2631.1 Applications.

Application, and supporting evidence, must be filed by the carrier in the proper office, accompanied by a non-refundable application service charge of \$10. The lands listed in any one application must be limited to those embraced in a single sale upon which the claim for patent is based. The application should state that it is filed under the railroad land grant act involved, properly cited, and subsection (b) of

## Bureau of Land Management, Interior

## § 2640.0-1

section 321, Part II, Title III of the Transportation Act of 1940 (54 Stat. 954). The application must be supported by a showing that the land is of the character which would pass under the grant involved, and was not by some superior or prior claim, withdrawal, reservation, or other reason, excluded from the operation of the grant. Full details of the alleged sale must be furnished, such as dates, the terms thereof, the estate involved, consideration, parties, amounts and dates of payments, made, and amounts due, if any, description of the land, and transfers of title. The use, occupancy, and cultivation of the land and the improvements placed thereon by the alleged purchaser should be described. All statements should be duly corroborated. Available documentary evidence, including the contract or deed, should be filed, which may be authenticated copies of the originals. An abstract of title may be necessary, dependent upon the circumstances of the particular case. No application for a patent under this act will be favorably considered unless it be shown that the alleged purchaser is entitled forthwith to the estate and interest transferred by such patent. Evidence of a recorded deed of conveyance from the carrier to the purchaser may be required. Where the company has on file an application in which the sold lands embraced, it need not file a new application, but may file a request for amendment of the pending application to come under the Transportation Act of 1940, together with the showing, *supra*, required as to the *bona fide* sale.

### § 2631.2 Publication of notice.

The authorizing officer shall direct the publication of notice of the application. The notice will be published at the carrier's expense in a newspaper of general circulation in the vicinity of the land. If a daily newspaper be designated, the notice should be published in the Wednesday issue for five consecutive weeks; if weekly, for five consecutive issues; and if semiweekly, in either issue for five consecutive weeks. The carrier must furnish evidence of such publication in due course. Notice need not be published, in case of amendment of a pending application,

where publication has already been had.

### § 2631.3 Surveying and conveyance fees.

The carrier must pay the cost of the survey of the land, paying also one-half the cost of any segregation survey in accordance with the laws and regulations pertaining to the survey and patenting of railroad lands. (See 43 U.S.C. 881 *et seq.*; also subpart 1822 of this chapter.)

### § 2631.4 Patents.

If all be found regular and in conformity with the governing law and regulations, patent shall be issued in the name of the grantee under the railroad grant, the carrier paying the costs of preparation and issuance of the patent.

## PART 2640—FAA AIRPORT GRANTS

### Subpart 2640—Airport and Airway Improvement Act of September 3, 1982

Sec.

2640.0-1 Purpose.

2640.0-3 Authority.

2640.0-5 Definitions.

2640.0-7 Cross reference.

### Subpart 2641—Procedures

2641.1 Request by Administrator for conveyance of property interest.

2641.2 Action on request.

2641.3 Publication and payment.

2641.4 Approval of conveyance.

2641.5 Reversion.

AUTHORITY: Sec. 516, Airport and Airway Improvement Act of 1982 (49 U.S.C. 2215).

SOURCE: 51 FR 26894, July 28, 1986, unless otherwise noted.

### Subpart 2640—Airport and Airway Improvement Act of September 3, 1982

#### § 2640.0-1 Purpose.

This subpart sets forth procedures for the issuance of conveyance documents for lands under the jurisdiction of the Department of the Interior to public agencies for use as airports and airways.

## § 2640.0-3

### § 2640.0-3 Authority.

Section 516 of the Airport and Airway Improvement Act of September 3, 1982 (49 U.S.C. 2215).

### § 2640.0-5 Definitions.

As used in this subpart, the term:

(a) *Act* means section 516 of the Airport and Airway Improvement Act of September 3, 1982 (49 U.S.C. 2215).

(b) *Secretary* means the Secretary of the Interior.

(c) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this subpart.

(d) *Administrator* means the person authorized by the Secretary of Transportation to administer the Act.

(e) *Applicant* means any public agency as defined in §153.3 of Title 14 of the Code of Federal Regulations, which, either individually or jointly with other such public agencies, submits to the Administrator an application requesting that lands or interests in lands under the jurisdiction of the Department of the Interior be conveyed to such applicant under the Act.

(f) *Property interest* means the title to or any other interest in lands or any easement through or other interest in air space.

(g) *Conveyance document* means a patent, deed or similar instrument which transfers title to lands or interests in lands.

### § 2640.0-7 Cross reference.

The regulations of the Federal Aviation Administration under the Act are found in 14 CFR part 153.

## Subpart 2641—Procedures

### § 2641.1 Request by Administrator for conveyance of property interest.

Each request by the Administrator in behalf of the applicant for conveyance of a property interest in lands under the jurisdiction of the Department of the Interior shall be filed with the State Office of the Bureau of Land Management having jurisdiction of the lands or interests in lands in duplicate, and shall contain the following:

## 43 CFR Ch. II (10-1-08 Edition)

(a) A copy of the application filed by the requesting public agency with the Administrator.

(b) A description of the lands or interests in lands, if surveyed, by legal subdivisions, specifying section, township, range, meridian and State. Unsurveyed lands shall be described by metes and bounds with a tie to a corner of the public-land surveys if within two miles; otherwise a tie shall be made to some prominent topographic feature and the approximate latitude and longitude shall be provided.

### § 2641.2 Action on request.

(a) Upon receipt of the request from the Administrator, the authorized officer shall determine whether the requested conveyance is inconsistent with the needs of the Department of the Interior, or any agency thereof, and shall notify the Administrator of the determination within 4 months after receipt of the request. On determining that the conveyance is not inconsistent with the needs of the Department of the Interior, the authorized officer also shall determine what, if any, covenants, terms, conditions and reservations should be included in the conveyance, if made. Any conveyance shall be made subject to valid existing rights of record, and to those disclosed as a result of publication or otherwise.

(b) Unless otherwise specifically provided by law, no conveyance shall be made of Federal lands within any national park, national monument, national recreation area, or similar area under the administration of the National Park Service; within any unit of the National Wildlife Refuge System or similar area under the jurisdiction of the United States Fish and Wildlife Service; within any area designated part of the National Wilderness Preservation System or any area designated as a wilderness study area; or within any national forest or Indian reservation.

(c) The applicant shall, upon request by the authorized officer, submit a deposit in an amount determined by the authorized officer, to cover the administrative costs of processing the application, including the cost of survey, if

one is necessary, and issuing of a document of conveyance. No document of conveyance shall be issued for unsurveyed lands. The processing of applications under this part shall be accomplished without any expense to the Bureau of Land Management.

(d) Each applicant also shall pay the cost of publication of a notice in the FEDERAL REGISTER and in a newspaper of general circulation in the area in which the lands are located.

#### **§ 2641.3 Publication and payment.**

(a) Prior to issuance of a conveyance document, the authorized officer shall publish a notice of realty action in the FEDERAL REGISTER and in a newspaper of general circulation in the area of the lands to be conveyed. The notice shall identify the lands proposed for conveyance and contain the terms, covenants, conditions and reservations to be included in the conveyance document. The notice shall provide public comment period of 45 days from the date of publication in the FEDERAL REGISTER. Comments shall be sent to the Bureau of Land Management office issuing the notice.

(b) The notice of realty action may segregate the lands or interests in lands to be conveyed to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the notice of realty action shall terminate either upon the issuance of a document of conveyance or 1 year after the date of publication, whichever occurs first.

(c) The determination concerning the granting or denial of an application shall be sent by the authorized officer to the applicant and to any party who commented on the application.

(d) The authorized officer shall advise the applicant whether any balance is due on the payments required of the applicant and of the time within which payment shall be made. Failure to pay the required amount within the allotted time shall constitute grounds for rejection of the application. If the applicant has deposited with the authorized officer an amount in excess of the payments required, the authorized officer shall so advise the applicant and return the excess payment.

#### **§ 2641.4 Approval of conveyance.**

(a) Each conveyance document shall contain appropriate covenants, terms, conditions and reservations requested by the Administrator, and those required for protection of the Department of the Interior or any agency thereof.

(b) Upon receipt of the payment required by § 2641.2 (c) and (d) of this title and after consideration of comments received, the authorized officer shall make a decision upon the application. If the decision is to make a conveyance, the authorized officer shall send the conveyance document to the Attorney General of the United States for consideration. Upon approval by the Attorney General, the authorized officer shall issue the conveyance document.

#### **§ 2641.5 Reversion.**

A conveyance shall be made only on the condition that, at the option of the Administrator, the property interest conveyed shall revert to the United States in the event that the lands in question are not developed for airport or airway purposes or are used in a manner inconsistent with the terms of the conveyance. If only a part of the property interest conveyed is not developed for airport purposes, or is used in a manner inconsistent with the terms of the conveyance, only that particular part shall, at the option of the Administrator, revert to the United States.

AUTHORITY: Sec. 25, Alaska Native Claims Settlement Act of December 18, 1971; Administrative Procedure Act (5 U.S.C. 551 *et seq.*), unless otherwise noted.

SOURCE: 38 FR 14218, May 30, 1973, unless otherwise noted.

### Subpart 2650—Alaska Native Selections: Generally

#### § 2650.0-1 Purpose.

The purpose of the regulations in this part is to provide procedures for orderly and timely implementation of those provisions of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601) which pertain to selections of lands and interests in lands in satisfaction of the land selections conferred by said Act upon Alaska Natives and Alaska Native corporations.

#### § 2650.0-2 Objectives.

The program of the Secretary is to implement such provisions in keeping with the congressional declaration of policy that the settlement of the Natives' aboriginal land claims be fair and just and that it be accomplished rapidly, with certainty, in conformity with the real economic and social needs of Natives, without litigation and with maximum participation by Natives in decisions affecting their rights and property.

#### § 2650.0-3 Authority.

Section 25 of the Alaska Native Claims Settlement Act of December 18, 1971, authorizes the Secretary of the Interior to issue and publish in the FEDERAL REGISTER, pursuant to the Administrative Procedure Act (5 U.S.C. 551, *et seq.*), such regulations as may be necessary to carry out the purposes of the act.

#### § 2650.0-5 Definitions.

(a) *Act* means the Alaska Native Claims Settlement Act of December 18,

## Bureau of Land Management, Interior

## § 2650.0-5

1971 (43 U.S.C. 1601) and any amendments thereto.

(b) *Secretary* means the Secretary of the Interior or his authorized delegate.

(c) *Native* means a Native as defined in section 3(b) of the Act.

(d) *Native village* means any tribe, band, clan, group, village, community, or association in Alaska, as defined in section 3(c) of the Act.

(e) *Village corporation* means a profit or nonprofit Alaska Native village corporation which is eligible under § 2651.2 of this chapter to select land and receive benefits under the act, and is organized under the laws of the State of Alaska in accordance with the provisions of section 8 of the Act.

(f) *Regional corporation* means an Alaska Native regional corporation organized under the laws of the State of Alaska in accordance with the provisions of section 7 of the Act.

(g) *Public lands* means all Federal lands and interests in lands located in Alaska (including the beds of all non-navigable bodies of water), except:

(1) The smallest practicable tract, as determined by the Secretary, enclosing land actually used, but not necessarily having improvements thereon, in connection with the administration of a Federal installation; and,

(2) Land selections of the State of Alaska which have been patented or tentatively approved under section 6(g) of the Alaska Statehood Act, as amended (72 Stat. 341; 77 Stat. 223; 48 U.S.C. Ch. 2), or identified for selection by the State prior to January 17, 1969, except as provided in § 2651.4(a)(1) of this chapter.

(h) *Interim conveyance* as used in these regulations means the conveyance granting to the recipient legal title to unsurveyed lands, and containing all the reservations for easements, rights-of-way, or other interests in land, provided by the act or imposed on the land by applicable law, subject only to confirmation of the boundary descriptions after approval of the survey of the conveyed land.

(i) *Patent* as used in these regulations means the original conveyance granting legal title to the recipient to surveyed lands, and containing all the reservations for easements, rights-of-way, or other interests in land, provided by

the act or imposed on the land by applicable law; or the document issued after approval of the survey by the Bureau of Land Management, to confirm the boundary description of the unsurveyed conveyed lands.

(j) *Conveyance* as used in these regulations means the transfer of title pursuant to the provisions of the act whether by interim conveyance or patent, whichever occurs first.

(k) *National Wildlife Refuge System* means all lands, waters, and interests therein administered on December 18, 1971, by the Secretary as wildlife refuges, areas for the protection and conservation of fish and wildlife that are threatened with extinction, wildlife ranges, game ranges, wildlife management areas, or waterfowl production areas, as provided in the Act of October 15, 1966, 80 Stat. 927, as amended by the Act of July 18, 1968, 82 Stat. 359 (16 U.S.C. 668dd).

(l) *Protraction diagram* means the approved diagram of the Bureau of Land Management mathematical plan for extending the public land surveys and does not constitute an official Bureau of Land Management survey, and, in the absence of an approved diagram of the Bureau of Land Management, includes the State of Alaska protraction diagrams which have been authenticated by the Bureau of Land Management.

(m) *Date of filing* shall be the date of postmark, except when there is no postmark, in which case it shall be the date of receipt in the proper office.

(n) *LUPC* means the Joint Federal-State Land Use Planning Commission for Alaska.

(o) *Major waterway* means any river, stream, or lake which has significant use in its liquid state by watercraft for access to publicly owned lands or between communities. Significant use means more than casual, sporadic or incidental use by watercraft, including floatplanes, but does not include use of the waterbody in its frozen state by snowmobiles, dogsleds or skiplanes. Designation of a river or stream as a major waterway may be limited to a specific segment of the particular waterbody.

## § 2650.0-7

(p) *Present existing use* means use by either the general public which includes both Natives and non-Natives alike or by a Federal, State, or municipal corporation entity on or before December 18, 1976, or the date of selection, whichever is later. Past use which has long been abandoned shall not be considered present existing use.

(q) *Public easement* means any easement reserved by authority of section 17(b) of the Act and under the criteria set forth in these regulations. It includes easements for use by the general public and easements for use by a specific governmental agency. Public easements may be reserved for transportation, communication and utility purposes, for air, light or visibility purposes, or for guaranteeing international treaty obligations.

(r) *Publicly owned lands* means all Federal, State, or municipal corporation (including borough) lands or interests therein in Alaska, including public lands as defined herein, and submerged lands as defined by the Submerged Lands Act, 43 U.S.C. 1301, *et seq.*

(s) *Director* means the Director, Bureau of Land Management

(t) *Isolated tract* means a tract of one or more contiguous parcels of publicly owned lands completely surrounded by lands held in nonpublic ownership or so effectively separated from other publicly owned lands as to make its use impracticable without a public easement for access.

(u) *State* means the State of Alaska.

(v) *Native corporation* means any Regional Corporation, any Village Corporation, Urban Corporation and any Native Group.

[38 FR 14218, May 30, 1973, as amended at 43 FR 55328, Nov. 27, 1978; 50 FR 15547, Apr. 19, 1985]

## § 2650.0-7 References.

(e) Mineral patent application procedures are contained in part 3860 of this chapter.

(43 U.S.C. 1601-1624)

[38 FR 14218, May 30, 1973, as amended at 40 FR 33174, Aug. 6, 1975]

## § 2650.0-8 Waiver.

The Secretary may, in his discretion, waive any nonstatutory requirement of these regulations. When the rights of third parties will not be impaired, and when rapid, certain settlement of the claims of Natives will be assisted, minor procedural and technical errors should be waived.

## § 2650.1 Provisions for interim administration.

(a)(1) Prior to any conveyance under the Act, all public lands withdrawn pursuant to sections 11, 14, and 16, or covered by section 19 of the Act, shall be administered under applicable laws and regulations by the Secretary of the Interior, or by the Secretary of Agriculture in the case of national forest lands, as provided by section 22(i) of the Act. The authority of the Secretary of the Interior and of the Secretary of Agriculture to make contracts and to issue leases, permits, rights-of-way, or easements is not impaired by the withdrawals.

(2)(i) Prior to the Secretary's making contracts or issuing leases, permits, rights-of-way, or easements, the views of the concerned regions or villages shall be obtained and considered, except as provided in paragraph (a)(2)(ii) of this section.

(ii) Prior to making contracts, or issuing leases, permits, rights-of-way, or easements on lands subject to election pursuant to section 19(b) of the Act, the Secretary shall obtain the consent of the representatives of the Natives living on those lands.

(b) As provided in section 17(d)(3) of the Act, any lands withdrawn pursuant to section 17(d) shall be subject to administration by the Secretary under applicable laws and regulations and his authority to make contracts, and to issue leases, permits, rights-of-way, or easements shall not be impaired by the withdrawal. To the extent that any

such land is also subject to the provisions of paragraph (a) of this section, the provisions of that subsection shall govern.

(c) As provided in section 21(e) of the Act, so long as there are no substantial revenues from real property interests conveyed pursuant to this Act and the lands are not subject to State and local real property taxes, such lands shall continue to receive forest fire protection services from the United States at no cost. The Secretary will promulgate criteria, after consultation with the concerned Native corporations and the State of Alaska, for determining when substantial revenues are accruing as to lands for which forest fire protection services are furnished by the Department of the Interior and no discontinuance of such service will be ordered by the Secretary unless he finds, after notice and opportunity for submission of views, that such discontinuance is in conformity with the criteria.

#### **§ 2650.2 Application procedures for land selections.**

(a) Applications for land selections must be filed on forms approved by the Director, Bureau of Land Management. Applications must be filed in accordance with subpart 1821 of this chapter.

(b) Each regional corporation shall submit with its initial application under this section a copy of the resolution authorizing the individual filing the application to do so.

(c) Each village corporation under subpart 2651 of this chapter must submit with its initial application under this section a certificate of incorporation, evidence of approval of its articles of incorporation by the regional corporation for that region, and a copy of the authorization of the individual filing the application to do so.

(d)(1) Regional and village corporations authorized by the act subsequently filing additional or amendatory applications need only refer to the serial number of the initial filing.

(2) Any change of the officer authorized to act for any corporation in the matter of land selections should be promptly submitted to the appropriate office of the Bureau of Land Management.

(e)(1) If the lands applied for are surveyed, the legal description of the lands in accordance with the official plats of survey shall be used.

(2) If the lands applied for are unsurveyed, they shall be described by protraction diagrams.

(3) If the lands applied for are not surveyed and are not covered by protraction diagrams, they must be described by metes and bounds commencing at a readily identifiable topographic feature, such as a mountain peak, mouth of a stream, etc., or a monumented point of known position, such as a triangulation station, and the description must be accompanied by a topographic map delineating the boundary of the area applied for.

(4) Where 1:63,360 U.S.G.S. quadrangle maps with the protraction diagram plotted thereon have been published, these maps shall be used to portray and describe the lands applied for. Where 1:63,360 U.S.G.S. quadrangle maps with the protraction diagram plotted thereon have not been published, then the 1:250,000 U.S.G.S. quadrangle maps with the protraction diagrams plotted thereon shall be used.

(5) If the written description shown on the application and the map portrayal accompanying the application do not agree the delineation shown on the map shall be controlling.

(f) The selected areas may be adjusted by the Secretary with the consent of the applicant and amendment of the application by the applicant, provided that the adjustment will not create an excess over the selection entitlement.

#### **§ 2650.3 Lawful entries, lawful settlements, and mining claims.**

##### **§ 2650.3-1 Lawful entries and lawful settlements.**

(a) Pursuant to sections 14(g) and 22(b) of the Act, all conveyances issued under the act shall exclude any lawful entries or entries which have been perfected under, or are being maintained in compliance with, laws leading to the acquisition of title, but shall include land subject to valid existing rights of a temporary or limited nature such as those created by leases (including leases issued under section 6(g) of the

## § 2650.3-2

Alaska Statehood Act), contracts, permits, rights-of-way, or easements.

(b) The right of use and occupancy of persons who initiated lawful settlement or entry of land, prior to August 31, 1971, is protected: *Provided*, That:

(1) Occupancy has been or is being maintained in accordance with the appropriate public land law, and

(2) Settlement or entry was not in violation of Public Land Order 4582, as amended. Any person who entered or settled upon land in violation of that public land order has gained no rights.

(c) In the event land excluded from conveyance under paragraph (a) of this section reverts to the United States, the grantee or his successor in interest shall be afforded an opportunity to acquire such land by exchange pursuant to section 22(f) of the Act.

## § 2650.3-2 Mining claims.

(a) *Possessory rights.* Pursuant to section 22(c) of the Act, on any lands to be conveyed to village or regional corporations, any person who prior to August 31, 1971, initiated a valid mining claim or location, including millsites, under the general mining laws and recorded notice thereof with the appropriate State or local office, shall not be challenged by the United States as to his possessory rights, if all requirements of the general mining laws are met. However, the validity of any unpatented mining claim may be contested by the United States, the grantee of the United States or its successor in interest, or by any person who may initiate a private contest. Contest proceedings and appeals therefrom shall be to the Interior Board of Land Appeals.

(b) *Patent requirements met.* An acceptable mineral patent application must be filed with the appropriate Bureau of Land Management office not later than December 18, 1976, on lands conveyed to village or regional corporations.

(1) Upon a showing that a mineral survey cannot be completed by December 18, 1976, the filing of an application for a mineral survey, which states on its face that it was filed for the purpose of proceeding to patent, will constitute an acceptable mineral patent application, provided all applicable require-

## 43 CFR Ch. II (10-1-08 Edition)

ments under the general mining laws have been met.

(2) The failure of an applicant to prosecute diligently his application for mineral patent to completion will result in the loss of benefits afforded by section 22(c) of the Act.

(3) The appropriate office of the Bureau of Land Management shall give notice of the filing of an application under this section to the village or regional corporation which has selection rights in the land covered by the application.

(c) *Patent requirements not met.* Any mineral patent application filed after December 18, 1976, on land conveyed to any village or regional corporation pursuant to this Act, will be rejected for lack of departmental jurisdiction. After that date, patent applications may continue to be filed on land not conveyed to village or regional corporations until such land is conveyed.

(43 U.S.C. 1601-1624)

[38 FR 14218, May 30, 1973, as amended at 40 FR 33174, Aug. 6, 1975]

## § 2650.4 Conveyance reservations.

### § 2650.4-1 Existing rights and contracts.

Any conveyance issued for surface and subsurface rights under this act will be subject to any lease, contract, permit, right-of-way, or easement and the rights of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted him.

### § 2650.4-2 Succession of interest.

Upon issuance of any conveyance under this authority, the grantee thereunder shall succeed and become entitled to any and all interests of the State of Alaska or of the United States as lessor, contractor, permitter, or grantor, in any such lease, contract, permit, right-of-way, or easement covering the estate conveyed, subject to the provisions of section 14(g) of the Act.

### § 2650.4-3 Administration.

Leases, contracts, permits, rights-of-way, or easements granted prior to the issuance of any conveyance under this

## Bureau of Land Management, Interior

## § 2650.4-7

authority shall continue to be administered by the State of Alaska or by the United States after the conveyance has been issued, unless the responsible agency waives administration. Where the responsible agency is an agency of the Department of the Interior, administration shall be waived when the conveyance covers all the land embraced within a lease, contract, permit, right-of-way, or easement, unless there is a finding by the Secretary that the interest of the United States requires continuation of the administration by the United States. In the latter event, the Secretary shall not renegotiate or modify any lease, contract, right-of-way or easement, or waive any right or benefit belonging to the grantee until he has notified the grantee and allowed him an opportunity to present his views.

### § 2650.4-4 Revenues. [Reserved]

### § 2650.4-5 National forest lands.

Every conveyance which includes lands within the boundaries of a national forest shall, as to such lands, contain reservations that:

(a) Until December 18, 1976, the sale of any timber from the land is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture; and,

(b) Until December 18, 1983, the land shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands.

### § 2650.4-6 National wildlife refuge system lands.

(a) Every conveyance which includes lands within the national wildlife refuge system shall, as to such lands, provide that the United States has the right of first refusal so long as such lands remain within the system. The right of first refusal shall be for a period of 120 days from the date of notice to the United States that the owner of the land has received a *bona fide* offer

of purchase. The United States shall exercise such right of first refusal by written notice to the village corporation within such 120-day period. The United States shall not be deemed to have exercised its right of first refusal if the village corporation does not consummate the sale in accordance with the notice to the United States.

(b) Every conveyance which covers lands lying within the boundaries of a national wildlife refuge in existence on December 18, 1971, shall provide that the lands shall remain subject to the laws and regulations governing use and development of such refuge so long as such lands remain in the refuge. Regulations governing use and development of refuge lands conveyed pursuant to section 14 shall permit such uses that will not materially impair the values for which the refuge was established.

### § 2650.4-7 Public easements.

(a) *General requirements.* (1) Only public easements which are reasonably necessary to guarantee access to publicly owned lands or major waterways and the other public uses which are contained in these regulations, or to guarantee international treaty obligations shall be reserved.

(2) In identifying appropriate public easements assessment shall be made in writing of the use and purpose to be accommodated.

(3) The primary standard for determining which public easements are reasonably necessary for access shall be present existing use. However, a public easement may be reserved absent a demonstration of present existing use only if it is necessary to guarantee international treaty obligations, if there is no reasonable alternative route or site available, or if the public easement is for access to an isolated tract or area of publicly owned land. When adverse impacts on Native culture, lifestyle, and subsistence needs are likely to occur because of the reservation of a public easement, alternative routes shall be assessed and reserved where reasonably available. The natural environment and other relevant factors shall also be considered.

(4) All public easements which are reserved shall be specific as to use, location, and size. Standard sizes and uses

which are delineated in this subsection may be varied only when justified by special circumstances.

(5) Transportation, communication, and utility easements shall be combined where the combination of such easements is reasonable considering the primary purposes for which easement is to be reserved.

(6) Public easements may be reserved to provide access to present existing Federal, State, or municipal corporation sites; these sites themselves shall not be reserved as public easements. Unless otherwise justified, access to these sites shall be limited to government use.

(7) Scenic easements or easements for recreation on lands conveyed pursuant to the Act shall not be reserved. Nor shall public easements be reserved to hunt or fish from or on lands conveyed pursuant to the Act.

(8) The identification of needed easements and major waterways shall include participation by appropriate Natives and Native corporations, LUPC, State, Federal agencies, and other members of the public.

(9) After reviewing the identified easements needs, the Director shall tentatively determine which easements shall be reserved. Tentative determinations of major waterways shall also be made by the Director and shall apply to rivers, streams, and lakes. All lakes over 640 acres in size shall be screened to determine if they qualify as major waterways. Those smaller than 640 acres may be considered on a case-by-case basis. The Director shall issue a notice of proposed easements which notifies all parties that participated in the development of the easement needs and information on major waterways as to the tentative easement reservations and which directs that all comments be sent to the LUPC and the Director.

(10) The State and the LUPC shall be afforded 90 days after notice by the Director to make recommendations with respect to the inclusion of public easements in any conveyance. If the Director does not receive a recommendation from the LUPC or the State within the time period herein called for, he may proceed with his determinations.

(11) Prior to making a determination of public easements to be reserved, the Director shall review the recommendations of the LUPC, appropriate Native corporation(s), other Federal agencies, the State, and the public. Consideration shall be given to recommendations for public easement reservations which are timely submitted to the Bureau of Land Management and accompanied by written justification.

(12) The Director, after such review, shall prepare a decision to convey that includes all necessary easements and other appropriate terms and conditions relating to conveyance of the land. If the decision prepared by the Director is contrary to the LUPC's recommendations, he shall notify the LUPC of the variance(s) and shall afford the LUPC 10 days in which to document the reasons for its disagreement before making his final decision. The Director shall then issue a Decision to Issue Conveyance (DIC).

(13) The Director shall terminate a public easement if it is not used for the purpose for which it was reserved by the date specified in the conveyance, if any, or by December 18, 2001, whichever occurs first. He may terminate an easement at any time if he finds that conditions are such that its retention is no longer needed for public use or governmental function. However, the Director shall not terminate an access easement to isolated tracts of publicly owned land solely because of the absence of proof of public use. Public easements which have been reserved to guarantee international treaty obligations shall not be terminated unless the Secretary determines that the reasons for such easements no longer justify the reservation. No public easement shall be terminated without proper notice and an opportunity for submission of written comments or for a hearing if a hearing is deemed to be necessary by either the Director or the Secretary.

(b) *Transportation easements.* (1) Public easements for transportation purposes which are reasonably necessary to guarantee the public's ability to reach publicly owned lands or major waterways may be reserved across lands conveyed to Native corporations. Such purposes may also include transportation to and from communities,

airports, docks, marine coastline, groups of private holdings sufficient in number to constitute a public use, and government reservations or installations. Public easements may also be reserved for railroads. If public easements are to be reserved, they shall:

(i) Be reserved across Native lands only if there is no reasonable alternative route of transportation across publicly owned lands;

(ii) Within the standard of reasonable necessity, be limited in number and not duplicative of one another (non-duplication does not preclude separate easements for winter and summer trails, if otherwise justified);

(iii) Be subject only to specific uses and sizes which shall be placed in the appropriate interim conveyance and patent documents;

(iv) Follow existing routes of travel unless a variance is otherwise justified;

(v) Be reserved for future roads, including railroads and roads for future logging operations, only if they are site specific and actually planned for construction within 5 years of the date of conveyance;

(vi) Be reserved in topographically suitable locations whenever the location is not otherwise determined by an existing route of travel or when there is no existing site;

(vii) Be reserved along the marine coastline only to preserve a primary route of travel between coastal communities, publicly owned uplands, or coastal communities and publicly owned uplands;

(viii) Be reserved from publicly owned uplands to the marine coastline only if significant present existing use has occurred on those publicly owned lands below the line of mean high tide. However, for isolated tracts of publicly owned uplands, public easements may be reserved to provide transportation from the marine coastline if there is no other reasonable transportation route;

(ix) Be reserved along major waterways only to provide short portages or transportation routes around obstructions. However, this condition does not preclude the reservation of a trail or road easement which happens to run alongside a waterway;

(x) Not be reserved on the beds of major waterways except where use of

the bed is related to road or trail purposes, portaging, or changing the mode of travel between water and land (e.g., launching or landing a boat); a specific portion of the bed or shore of the waterway which is necessary to provide portage or transportation routes around obstructions, including those that are dangerous or impassible or seasonably dangerous or impassible, may be reserved.

(xi) Not be reserved on the beds of nonmajor waterways except where use of the beds is related to road or trail purposes. However, this exception shall not be used to reserve a continuous linear easement on the streambed to facilitate access by boat.

(xii) Not be reserved simply to reflect patterns of Native use on Native lands;

(xiii) Not be reserved for the purpose of protecting Native stockholders from their respective corporations;

(xiv) Not be reserved on the basis of subsistence use of the lands of one village by residents of another village.

(2) Transportation easements shall be limited to roads and sites which are related to access. The use of these easements shall be controlled by applicable Federal, State, or municipal corporation laws or regulations. The uses stated herein will be specified in the interim conveyance and patent documents as permitted uses of the easement.

(i) The width of a trail easement shall be no more than 25 feet if the uses to be accommodated are for travel by foot, dogsleds, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. G.V.W.);

(ii) The width of a trail easement shall be no more than 50 feet if the uses to be accommodated are for travel by large all-terrain vehicles (more than 3,000 lbs. G.V.W.), track vehicles and 4-wheel drive vehicles, in addition to the uses included under paragraph (b)(2)(i) of this section;

(iii) The width of an existing road easement shall be no more than 60 feet if the uses to be accommodated are for travel by automobiles or trucks in addition to the uses included under paragraphs (b)(2) (i) and (ii) of this section. However, if an existing road is wider

than 60 feet, the specific public easement may encompass that wider width. For proposed roads, including U.S. Forest Service logging roads, the width of the public easement shall be 100 feet, unless otherwise justified. Prior to construction, trail uses which are included under paragraphs (b)(2) (i) and (ii) of this section may be permitted if otherwise justified and may continue if the road is not built. If after the road has been constructed a lesser width is sufficient to accommodate the road, the Director shall reduce the size of the easement to that width.

(iv) The width of a proposed railroad easement shall be 100 feet on either side of the center line of any such railroad.

(3) *Site easements.* Site easements which are related to transportation may be reserved for aircraft landing or vehicle parking (e.g., aircraft, boats, ATV's, cars, trucks), temporary camping, loading or unloading at a trail head, along an access route or waterway, or within a reasonable distance of a transportation route or waterway where there is a demonstrated need to provide for transportation to publicly owned lands or major waterways. Temporary camping, loading, or unloading shall be limited to 24 hours. Site easements shall not be reserved for recreational use such as fishing, unlimited camping, or other purposes not associated with use of the public easement for transportation. Site easements shall not be reserved for future logging or similar operations (e.g., log dumps, campsites, storage or staging areas). Before site easements are reserved on transportation routes or on major waterways, a reasonable effort shall be made to locate parking, camping, beaching, or aircraft landing sites on publicly owned lands; particularly, publicly owned lands in or around communities, or bordering the waterways. If a site easement is to be reserved, it shall:

(i) Be subject to the provisions of paragraphs (b)(1) (ii), (iii), (vi), (xii), (xiii), and (xiv) of this section.

(ii) Be no larger than one acre in size and located on existing sites unless a variance is in either instance, otherwise justified;

(iii) Be reserved on the marine coastline only at periodic points along the coast where they are determined to be reasonably necessary to facilitate transportation on coastal waters or transportation between coastal waters and publicly owned uplands;

(iv) Be reserved only at periodic points on major waterways. Uses shall be limited to those activities which are related to travel on the waterway or to travel between the waterway and publicly owned lands. Also, periodic site easements shall be those necessary to allow a reasonable pattern of travel on the waterway;

(v) Be reserved for aircraft landing strips only if they have present significant use and are a necessary part of a transportation system for access to publicly owned lands and are not suitable for reservation under section 14(c)(4) of the Act. Any such easement shall encompass only that area which is used for takeoffs and landings and any clear space around such site that is needed for parking or public safety.

(c) *Miscellaneous easements.* The public easements referred to in this subsection which do not fall into the categories above may be reserved in order to continue certain uses of publicly owned lands and major waterways. These public easements shall be limited in number. The identification and size of these public easements may vary from place to place depending upon particular circumstances. When not controlled by applicable law or regulation, size shall not exceed that which is reasonably necessary for the purposes of the identified easement. Miscellaneous easements may be reserved for the following purposes:

(1) Public easements which are for utility purposes (e.g., water, electricity, communications, oil, gas, and sewage) may be reserved and shall be based upon present existing use. Future easements for these purposes may also be reserved, but only if they are site specific and actually planned for construction within 5 years of the date of conveyance;

(2) Easements for air light or visibility purposes may be reserved if required to insure public safety or to permit proper use of improvements developed for public benefit or use; e.g., protection for aviation or navigation aids or communications sites;

(3) Public easements may be reserved to guarantee international treaty obligations or to implement any agreement entered into between the United States and the Native Corporation receiving the conveyance. For example, the agreement of May 14, 1974, related to Naval Petroleum Reserve Number Four (redesignated June 1, 1977, as the National Petroleum Reserve-Alaska) between the United States Department of the Navy and the Arctic Slope Regional Corporation and four Native village corporations, shall be incorporated in the appropriate conveyances and the easements necessary to implement the agreement shall be reserved.

(d) *Conveyance provisions.* (1) Public easement provisions shall be placed in interim conveyances and patents.

(2) Permissible uses of a specific easement shall be listed in the appropriate conveyance document. The conveyance documents shall include a general provision which states that uses which are not specifically listed are prohibited.

(3) The easements shall be identified on appropriate maps which shall be part of the pertinent interim conveyance and patent.

(4) All public easement shall be reserved to the United States and subject, as appropriate, to further Federal, State, or municipal corporation regulation.

(5) All conveyance documents shall contain a general provision which states that pursuant to section 17(b)(2) of the Act, any valid existing right recognized by the Act shall continue to have whatever right of access as is now provided for under existing law.

[43 FR 55329, Nov. 27, 1978]

#### § 2650.5 Survey requirements.

##### § 2650.5-1 General.

(a) Selected areas are to be surveyed as provided in section 13 of the Act. Any survey or description used as a basis for conveyance must be adequate to identify the lands to be conveyed.

(b) The following procedures shall be used to determine what acreage is not to be charged against Native entitlement:

(1) For any approved plat of survey where meanderable water bodies were not segregated from the survey but were included in the calculation of acreage to be charged against the Native corporation's land entitlement, the chargeable acreage shall, at no cost to the Native corporation, be recalculated to conform to the principles contained in the Bureau of Land Management's *Manual of Surveying Instructions*, 1973, except as modified by this part. Pursuant to such principles, the acreage of meanderable water bodies, as modified by this part, shall not be included in the acreage charged against the Native corporation's land entitlement.

(2) For any plat of survey approved after December 5, 1983, water bodies shall be meandered and segregated from the survey in accordance with the principles contained in the Bureau of Land Management's *Manual of Surveying Instructions*, 1973, as modified by this part, as the basis for determining acreage chargeability.

(3) If title to lands beneath navigable waters, as defined in the Submerged Lands Act, of a lake less than 50 acres in size or a river or stream less than 3 chains in width did not vest in the State on the date of Statehood, such lake, river or stream shall not be meandered and shall be charged against the Native corporation's entitlement.

(4) Any determinations of meanders which may be made pursuant to this paragraph shall not require monumentation on the ground unless specifically required by law or for good cause in the public interest.

[38 FR 14218, May 30, 1973, as amended at 50 FR 15547, Apr. 19, 1985]

#### § 2650.5-2 Rule of approximation.

To assure full entitlement, the rule of approximation may be applied with respect to the acreage limitations applicable to conveyances and surveys under this authority, i.e., any excess must be less than the deficiency would be if the smallest legal subdivision were eliminated (see 62 I.D. 417, 421).

### § 2650.5-3

#### § 2650.5-3 Regional surveys.

Lands to be conveyed to a regional corporation, when selected in contiguous units, shall be grouped together for the purpose of survey and surveyed as one tract, with monuments being established on the exterior boundary at angle points and at intervals of approximately 2 miles on straight lines. If requested by the grantee, the Secretary may survey, insofar as practicable, the individual selections that comprise the total tract.

#### § 2650.5-4 Village surveys.

(a) Only the exterior boundaries of contiguous entitlements for each village corporation will be surveyed. Where land within the outer perimeter of a selection is not selected, the boundaries along the area excluded shall be deemed exterior boundaries. The survey will be made after the total acreage entitlement of the village has been selected.

(b) Surveys will be made within the village corporation selections to delineate those tracts required by law to be conveyed by the village corporations pursuant to section 14(c) of the Act.

(c) (1) The boundaries of the tracts described in paragraph (b) of this section shall be posted on the ground and shown on a map which has been approved in writing by the affected village corporation and submitted to the Bureau of Land Management. Conflicts arising among potential transferees identified in section 14(c) of the Act, or between the village corporation and such transferees, will be resolved prior to submission of the map. Occupied lots to be surveyed will be those which were occupied as of December 18, 1971.

(2) Lands shown by the records of the Bureau of Land Management as not having been conveyed to the village corporation will be excluded by adjustments on the map by the Bureau of Land Management. No surveys shall begin prior to final written approval of the map by the village corporation and the Bureau of Land Management. After such written approval, the map will constitute a plan of survey. Surveys will then be made in accordance with the plan of survey. No further changes will be made to accommodate additional section 14(c) transferees, and no

### 43 CFR Ch. II (10-1-08 Edition)

additional survey work desired by the village corporation or municipality within the area covered by the plan of survey or immediately adjacent thereto will be performed by the Secretary.

#### § 2650.5-5 Cemetery sites and historical places.

Only those cemetery sites and historical places to be conveyed under section 14(h)(1) of the Act shall be surveyed.

#### § 2650.5-6 Adjustment to plat of survey.

All conveyances issued for lands not covered by officially approved surveys of the Bureau of Land Management shall note that upon the filing of an official plat of survey, the boundary of the selected area, described in terms of protraction diagrams or by metes and bounds, shall be redescribed in accordance with the plats of survey. However, no change will be made in the land selected.

#### § 2650.6 Selection limitations.

(a) Notwithstanding any other provisions of the act, no village or regional corporation may select lands which are within 2 miles from the boundary of any home rule or first-class city (excluding boroughs) as the boundaries existed and the cities were classified on December 18, 1971, or which are within 6 miles from the boundary of Ketchikan, except that a village corporation organized by Natives of a community which is itself a first class or home-rule city is not prohibited from making selections within 2 miles from the boundary of that first class or home-rule city, unless such selections fall within 2 miles from the boundary of another first class or home-rule city which is not itself a Native village or within 6 miles from the boundary of Ketchikan.

(b) Determination as to which cities were classified as home rule or first class as of December 18, 1971, and their boundaries as of that date will be made in accordance with the laws of the State of Alaska.

(c) If any village corporation whose land withdrawals encompass Dutch Harbor is found eligible under this act, it may select lands pursuant to subpart

## Bureau of Land Management, Interior

## § 2651.0-3

2651 of this chapter and receive a conveyance under the terms of section 14(a) of the Act.

### § 2650.7 Publication.

In order to determine whether there are any adverse claimants to the land, the applicant should publish notice of his application. If the applicant decides to avail himself of the privilege of publishing a notice to all adverse claimants and requests it, the authorized officer will prepare a notice for publication. The publication will be in accordance with the following procedure:

(a) The applicant will have the notice published allowing all persons claiming the land adversely to file in the appropriate land office their objections to the issuance of any conveyance. The notice shall be published once a week for 4 consecutive weeks in a newspaper of general circulation.

(b) The applicant shall file a statement of the publisher, accompanied by a copy of the published notice, showing that publication has been had for 4 consecutive weeks. The applicant must pay the cost of publication.

(c) Any adverse claimant must serve on the applicant a copy of his objections and furnish evidence of service thereof to the appropriate land office.

(d) For all land selections made under the Act, in order to give actual notice of the decision of the Bureau of Land Management proposing to convey lands, the decision shall be served on all known parties of record who claim to have a property interest or other valid existing right in land affected by such decision, the appropriate regional corporation, and any Federal agency of record. In order to give constructive notice of the decision to any unknown parties, or to known parties who cannot be located after reasonable efforts have been expended to locate, who claim a property interest or other valid existing right in land affected by the decision, notice of the decision shall be published once in the FEDERAL REGISTER and, once a week, for four (4) consecutive weeks, in one or more newspapers of general circulation in the State of Alaska nearest the locality where the land affected by the decision is situated, if possible. Any decision or notice actually served on parties or

constructively served on parties in accord with this subsection shall state that any party claiming a property interest in land affected by the decision may appeal the decision to the Board of Land Appeals. The decision or notice of decision shall also state that:

(1) Any party receiving actual notice of the decision shall have 30 days from the receipt of actual notice to file an appeal; and,

(2) That any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign a receipt for actual notice, shall have 30 days from the date of publication in the FEDERAL REGISTER to file an appeal. Furthermore, the decision or notice of decision shall inform readers where further information on the manner of, and requirements for, filing appeal may be obtained, and shall also state that any party known or unknown who may claim a property interest which is adversely affected by the decision shall be deemed to have waived their rights which were adversely affected unless an appeal is filed in accordance with the requirements stated in the decisions or notices provided for in this subsection and the regulation governing such appeals set out in 43 CFR part 4, subpart E.

[38 FR 14218, May 30, 1973, as amended at 41 FR 14737, Apr. 7, 1976; 41 FR 17909, Apr. 29, 1976; 49 FR 6373, Feb. 21, 1984]

### § 2650.8 Appeals.

Any decision relating to a land selection shall become final unless appealed to the Board of Land Appeals by a person entitled to appeal, under, and in accordance with, subpart E of part 4, 43 CFR.

(43 U.S.C. 1601-1624)

[40 FR 33175, Aug. 6, 1975]

## Subpart 2651—Village Selections

### § 2651.0-3 Authority.

Sections 12 and 16(b) of the Act provide for the selection of lands by eligible village corporations.

**§ 2651.1 Entitlement.**

(a) Village corporations eligible for land benefits under the Act shall be entitled to a conveyance to the surface estate in accordance with sections 14(a) and 16(b) of the Act.

(b) In addition to the land benefits in paragraph (a) of this section, each eligible village corporation shall be entitled to select and receive a conveyance to the surface estate for such acreage as is reallocated to the village corporation in accordance with section 12(b) of the Act.

**§ 2651.2 Eligibility requirements.**

(a) Pursuant to sections 11(b) and 16(a) of the Act, the Director, Juneau Area Office, Bureau of Indian Affairs, shall review and make a determination, not later than December 19, 1973, as to which villages are eligible for benefits under the act.

(1) *Review of listed native villages.* The Director, Juneau Area Office, Bureau of Indian Affairs, shall make a determination of the eligibility of villages listed in section 11(b)(1) and 16(a) of the Act. He shall investigate and examine available records and evidence that may have a bearing on the character of the village and its eligibility pursuant to paragraph (b) of this section.

(2) *Findings of fact and notice of proposed decision.* After completion of the investigation and examination of records and evidence with respect to the eligibility of a village listed in sections 11(b)(1) and 16(a) of the Act for land benefits, the Director, Juneau Area Office, Bureau of Indian Affairs, shall publish in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska his proposed decision with respect to such eligibility and shall mail a copy of the proposed decision to the affected village, all villages located in the region in which the affected village is located, all regional corporations within the State of Alaska and the State of Alaska. His proposed decision is subject to protest by any interested party within 30 days of the publication of the proposed decision in the FEDERAL REGISTER. If no valid protest is received within the 30-day period, such proposed decision shall become final and shall be published in the FEDERAL REGISTER. If

the final decision is in favor of a listed village, the Director, Juneau Area Office, Bureau of Indian Affairs, shall issue a certificate as to the eligibility of the village in question for land benefits under the act, and certify the record and the decision to the Secretary. Copies of the final decisions and certificates of village eligibility shall be mailed to the affected village, all villages located in the region in which the affected village is located, all regional corporations within the State of Alaska, and the state of Alaska.

(3) *Protest.* Within 30 days from the date of publication of the proposed decision in the FEDERAL REGISTER, any interested party may protest a proposed decision as to the eligibility of a village. No protest shall be considered which is not accompanied by supporting evidence. The protest shall be mailed to the Director, Juneau Area Office, Bureau of Indian Affairs.

(4) *Action on protest.* Upon receipt of a protest, the Director, Juneau Area Office, Bureau of Indian Affairs, shall examine and evaluate the protest and supporting evidence required herein, together with his record of findings of fact and proposed decision, and shall render a decision on the eligibility of the Native village that is the subject of the protest. Such decision shall be rendered within 30 days from the receipt of the protest and supporting evidence by the Director, Juneau Area Office, Bureau of Indian Affairs. The decision of the Director, Juneau Area Office, Bureau of Indian Affairs, shall be published in the FEDERAL REGISTER and in one or more newspapers of general circulation in the State of Alaska and a copy of the decision and findings of fact upon which the decision is based shall be mailed to the affected village, all villages located in the region in which the affected village is located, all regional corporations within the State of Alaska, the State of Alaska, and any other party of record. Such decision shall become final unless appealed to the Secretary by a notice filed within 30 days of its publication in the FEDERAL REGISTER in accordance with the regulations governing appeals set out in 43 CFR part 4, subpart E.

(5) *Action on appeals.* Appeals shall be made to the Board of Land Appeals in accordance with subpart E of part 4 of this title. Decisions of the Board on village eligibility appeals are not final until personally approved by the Secretary.

(6) *Applications by unlisted villages for determination of eligibility.* The head or any authorized subordinate officer of a Native village not listed in section 11(b) of the Act may file on behalf of the unlisted village an application for a determination of its eligibility for land benefits under the act. Such application shall be filed in duplicate with the Director, Juneau Area Office, Bureau of Indian Affairs, prior to September 1, 1973. If the application does not constitute prima facie evidence of compliance with the requirements of paragraph (b) of this section, he shall return the application to the party filing the same with a statement of reasons for return of the application, but such filing, even if returned, shall constitute timely filing of the application. The Director, Juneau Area Office, Bureau of Indian Affairs, shall immediately forward an application which appears to meet the criteria for eligibility to the appropriate office of the Bureau of Land Management for filing. Each application must identify the township or townships in which the Native village is located.

(7) *Segregation of land.* The receipt of the selection application for filing by the Bureau of Land Management shall operate to segregate the lands in the vicinity of the village as provided in sections 11(a)(1) and (2) of the Act.

(8) *Action on application for eligibility.* Upon receipt of an application which appears to meet the criteria for eligibility, the Director, Juneau Area Office, Bureau of Indian Affairs, shall have a notice of the filing of the application published in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska and shall promptly review the statements contained in the application. He shall investigate and examine available records and evidence that may have a bearing on the character of the village and its eligibility pursuant to this subpart 2651, and thereafter make findings of fact as to the character of the vil-

lage. No later than December 19, 1973, the Director, Juneau Area Office, Bureau of Indian Affairs, shall make a determination as to the eligibility of the village as a Native village for land benefits under the act and shall issue a decision. He shall publish his decision in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska and shall mail a copy of the decision to the representative or representatives of the village, all villages in the region in which the village is located, all regional corporations, and the State of Alaska.

(9) *Protest to eligibility determination.* Any interested party may protest a decision of the Director, Juneau Area Office, Bureau of Indian Affairs, regarding the eligibility of a Native village for land benefits under the provisions of sections 11(b)(3)(A) and (B) of the Act by filing a notice of protest with the Director, Juneau Area Office, Bureau of Indian Affairs, within 30 days from the date of publication of the decision in the FEDERAL REGISTER. A copy of the protest must be mailed to the representative or representatives of the village, all villages in the region in which the village is located, all regional corporations within Alaska, the State of Alaska, and any other parties of record. If no protest is received within the 30-day period, the decision shall become final and the Director, Juneau Area Office, Bureau of Indian Affairs, shall certify the record and the decision to the Secretary. No protest shall be considered which is not accompanied by supporting evidence. Anyone protesting a decision concerning the eligibility or ineligibility of an unlisted Native village shall have the burden of proof in establishing that the decision is incorrect. Anyone appealing a decision concerning the eligibility or ineligibility of an unlisted Native village shall have the burden of proof in establishing that the decision is incorrect.

(10) *Action on protest appeal.* Upon receipt of a protest, the Director, Juneau Area Office, Bureau of Indian Affairs, shall follow the procedure outlined in paragraph (a)(4) of this section. If an appeal is taken from a decision on eligibility, the provisions of paragraph (a)(5) of this section shall apply.

### § 2651.3

(b) Except as provided in paragraph (b)(4) of this section, villages must meet each of the following criteria to be eligible for benefits under sections 14(a) and (b) of the Act:

(1) There must be 25 or more Native residents of the village on April 1, 1970, as shown by the census or other evidence satisfactory to the Secretary. A Native properly enrolled to the village shall be deemed a resident of the village.

(2) The village shall have had on April 1, 1970, an identifiable physical location evidenced by occupancy consistent with the Natives' own cultural patterns and life style and at least 13 persons who enrolled thereto must have used the village during 1970 as a place where they actually lived for a period of time: *Provided*, That no village which is known as a traditional village shall be disqualified if it meets the other criteria specified in this subsection by reason of having been temporarily unoccupied in 1970 because of an act of God or government authority occurring within the preceding 10 years.

(3) The village must not be modern and urban in character. A village will be considered to be of modern and urban character if the Secretary determines that it possessed all the following attributes as of April 1, 1970:

- (i) Population over 600.
- (ii) A centralized water system and sewage system that serves a majority of the residents.
- (iii) Five or more business establishments which provide goods or services such as transient accommodations or eating establishments, specialty retail stores, plumbing and electrical services, etc.
- (iv) Organized police and fire protection.
- (v) Resident medical and dental services, other than those provided by Indian Health Service.
- (vi) Improved streets and sidewalks maintained on a year-round basis.

(4) In the case of unlisted villages, a majority of the residents must be Native, but in the case of villages listed in sections 11 and 16 of the Act, a majority of the residents must be Native only if the determination is made that

### 43 CFR Ch. II (10–1–08 Edition)

the village is modern and urban pursuant to paragraph (b)(3) of this section.

(43 U.S.C. 1601–1624)

[38 FR 14218, May 30, 1973, as amended at 40 FR 33175, Aug. 6, 1975; 49 FR 6373, Feb. 21, 1984]

#### § 2651.3 Selection period.

Each eligible village corporation must file its selection application(s) not later than December 18, 1974, under sections 12(a) or 16(b) of the Act; and not later than December 18, 1975, under section 12(b) of the Act.

#### § 2651.4 Selection limitations.

(a) Each eligible village corporation may select the maximum surface acreage entitlement under sections 12(a) and (b) and section 16(b) of the Act. Village corporations selecting lands under sections 12(a) and (b) may not select more than:

(1) 69,120 acres from land that, prior to January 17, 1969, has been selected by, or tentatively approved to, but not yet patented to the State under the Alaska Statehood Act; and

(2) 69,120 acres of land from the National Wildlife Refuge System; and

(3) 69,120 acres of land from the National Forest System.

(b) To the extent necessary to obtain its entitlement, each eligible village corporation shall select all available lands within the township or townships within which all or part of the village is located, and shall complete its selection from among all other available lands. Selections shall be contiguous and, taking into account the situation and potential uses of the lands involved, the total area selected shall be reasonably compact, except where separated by lands which are unavailable for selection. The total area selected will not be considered to be reasonably compact if (1) it excludes other lands available for selection within its exterior boundaries; or (2) lands which are similar in character to the village site or lands ordinarily used by the village inhabitants are disregarded in the selection process; or (3) an isolated tract of public land of less than 1,280 acres remains after selection.

(c) The lands selected under sections 12(a) or (b) shall be in whole sections

## Bureau of Land Management, Interior

## § 2651.6

where they are available, or shall include all available lands in less than whole sections, and, wherever feasible, shall be in units of not less than 1,280 acres. Lands selected under section 16(b) of the Act shall conform to paragraph (b) of this section and shall conform as nearly as practicable to the U.S. land survey system.

(d) Village corporation selections within sections 11 (a)(1) and (a)(3) areas shall be given priority over regional corporation selections for the same lands.

(e) Village or regional corporations are not required to select lands within an unpatented mining claim or millsite. Unpatented mining claims and millsites shall be deemed to be selected, unless they are excluded from the selection by metes and bounds or other suitable description and there is attached to the selection application a copy of the notice of location and any amendments thereto. If the village or regional corporation selection omits lands within an unpatented mining claim or millsite, this will not be construed as violating the requirements for compactness and contiguity. If, during the selection period, the excepted mining claims or millsites are declared invalid, or under the State of Alaska mining laws are determined to be abandoned, the selection will no longer be considered as compact and contiguous. The corporation shall be required to amend its selection, upon notice from the authorized officer of the Bureau of Land Management, to include the lands formerly included in the mining claim or millsite. If the corporation fails to amend its selection to include such lands, the selection may be rejected.

(f) Eligible village corporations may file applications in excess of their total entitlement. To insure that a village acquires its selection in the order of its priorities, it should identify its choices numerically in the order it wishes them granted. Such selections must be filed not later than December 18, 1974, as to sections 12(a) or 16(b) selections and December 18, 1975, as to section 12(b) selections.

(g) Whenever the Secretary determines that a dispute exists between villages over land selection rights, he

shall accept, but not act on, selection applications from any party to the dispute until the dispute has been resolved in accordance with section 12(e) of the Act.

(h) Village or regional corporations may, but are not required to, select lands within pending Native allotments. If the village or regional corporation selection omits lands within a pending Native allotment, this will not be construed as violating the requirements for compactness and contiguity. If, during the selection period, the pending Native allotment is finally rejected and closed, the village or regional corporation may amend its selection application to include all of the land formerly in the Native allotment application, but is not required to do so to meet the requirements for compactness and contiguity.

[38 FR 14218, May 30, 1973, as amended at 39 FR 34543, Sept. 26, 1974; 50 FR 15547, Apr. 19, 1985]

### § 2651.5 Conveyance reservations.

In addition to the conveyance reservations in § 2650.4 of this chapter, conveyances issued to village corporations shall provide for the transfer of the surface estates specified in section 14(c) of the Act, and shall be subject to valid existing rights under section 14(g) of the Act.

### § 2651.6 Airport and air navigation facilities.

(a) Every airport and air navigation facility owned and operated by the United States which the Secretary determines is actually used in connection with the administration of a Federal program will be deemed a *Federal installation* under the provisions of section 3(e) of the Act, and the Secretary will determine the smallest practicable tract which shall enclose such Federal installations. Such Federal installations are not public lands as defined in the act and are therefore not *lands available for selection* under the provisions of these regulations.

(b) The surface of all other lands of existing airport sites, airway beacons, or other navigation aids, together with such additional acreage or easements as are necessary to provide related services and to insure safe approaches

to airport runways, shall be conveyed by the village corporation to the State of Alaska, and the Secretary will include in the conveyance to any village corporation any and all covenants which he deems necessary to insure the fulfillment of this obligation.

### Subpart 2652—Regional Selections

#### § 2652.0-3 Authority.

Sections 12 (a)(1) and (c)(3) provide for selections by regional corporations; and sections 14 (e), (f), (h), (1), (2), (3), (5), and (8), provide for the conveyance to regional corporations of the selected surface and subsurface estates, as appropriate.

#### § 2652.1 Entitlement.

(a) Eligible regional corporations may select the maximum acreage granted pursuant to section 12(c) of the Act. They will be notified by the Secretary of their entitlement as expeditiously as possible.

(b) Where subsurface rights are not available to the eligible regional corporations in lands whose surface has been conveyed under section 14 of the Act, the regional corporations may select an equal subsurface acreage from lands withdrawn under sections 11(a)(1) and (3) of the Act, within the region, if possible.

(c) As appropriate, the regional corporations will receive title to the subsurface estate of lands, the surface estate of which is conveyed pursuant to section 14 of the Act.

(d) If a 13th regional corporation is organized under section 7(c) of the Act, it will not be entitled to any grant of lands.

#### § 2652.2 Selection period.

All regional corporations must file their selection applications not later than December 18, 1975, for lands other than those allocated under section 14(h)(8) of the Act.

#### § 2652.3 Selection limitations.

(a) To the extent necessary to obtain its entitlement, each regional corporation must select all available lands withdrawn pursuant to sections 11(a)(1)(B) and (C) of the Act, before selecting lands withdrawn pursuant to

section 11(a)(3) of the Act, except that regional corporations selecting lands withdrawn pursuant to sections 11(a)(1)(B) and (C) may select only even-numbered townships in even-numbered ranges and only odd-numbered townships in odd-numbered ranges.

(b) Village corporation selections within section 11(a)(1) and section 11(a)(3) areas shall be given priority over regional corporation selections for the same lands.

(c) Whenever a regional selection is made in any township, the regional corporation shall select all available lands in that township: *Provided*, That such selection would not exceed the entitlement of that regional corporation.

(d) Subsurface selections made by a regional corporation pursuant to section 12(a) of the Act shall be contiguous and the total area selected shall be reasonably compact, except as separated by subsurface interests that are not the property of the United States including subsurface interests under bodies of water, and the selection shall be in whole sections where they are available, or shall include all available subsurface interests in less than whole sections and, wherever feasible, shall be in units of not less than 1,280 acres. The total area selected shall not be considered to be reasonably compact if (1) it excludes other subsurface interests available for selection within its exterior boundaries; or (2) an isolated tract of subsurface interests owned by the United States of less than 1,280 acres remains after selection.

(e) Regional corporations are not required to select lands within unpatented mining claims or millsites, as provided in § 2651.4(e) of this chapter.

(f) Regional corporations may file applications in excess of their total entitlement. To insure that a regional corporation acquires its selections in the order of its priorities, it should identify its choices numerically in the order it wishes them granted.

#### § 2652.4 Conveyance reservations.

In addition to the conveyance reservations in § 2650.4 of this chapter, conveyances issued to regional corporations for the subsurface estate of lands whose surface has been conveyed to village corporations shall provide

## Bureau of Land Management, Interior

## § 2653.1

that the right to explore, develop, or remove minerals from the subsurface estate in the lands within the boundaries of any Native village shall be subject to the consent of the village corporation.

### Subpart 2653—Miscellaneous Selections

#### § 2653.0-3 Authority.

Section 14(h) of the Act requires the Secretary to withdraw and to convey 2 million acres of unreserved and unappropriated public lands located outside the areas withdrawn by sections 11 and 16 of the Act. The Secretary will convey the land in part as follows:

(a) Title to existing cemetery sites and historical places to the regional corporations for the regions in which the lands are located;

(b) Title to the surface estate to any Native group that qualifies pursuant to this subpart 2653;

(c) Title to the surface estate of lands to the Natives residing in each of the cities of Sitka, Kenai, Juneau, and Kodiak, who have incorporated;

(d) Title to the surface estate of land to a Native as a primary place of residence.

(e) Title to the regional corporations for lands selected, if any remain, pursuant to section 14(h)(8) of the Act; and

(f) Title to the subsurface estate to the regional corporations of lands conveyed under paragraphs (b) and (d) of this section and title to the regional corporations to the subsurface estate to those lands not located in a National Wildlife Refuge under paragraph (c) of this section.

[38 FR 14218, May 30, 1973, as amended at 41 FR 14737, Apr. 7, 1976]

#### § 2653.0-5 Definitions.

(a) *Cemetery site* means a burial ground consisting of the gravesites of one or more Natives.

(b) *Historical place* means a distinguishable tract of land or area upon which occurred a significant Native historical event, which is importantly associated with Native historical or cultural events or persons, or which was subject to sustained historical Native activity, but sustained Native his-

torical activity shall not include hunting, fishing, berry-picking, wood gathering, or reindeer husbandry. However, such uses may be considered in the evaluation of the sustained Native historical activity associated with the tract or area.

(c) *Native group* means any tribe, band, clan, village, community or village association of Natives composed of less than 25, but more than 3 Natives, who comprise a majority of the residents of a locality and who have incorporated under the laws of the State of Alaska.

(d) *Primary place of residence* means a place comprising a primary place of residence of an applicant on August 31, 1971, at which he regularly resides on a permanent or seasonal basis for a substantial period of time.

[38 FR 14218, May 30, 1973, as amended at 41 FR 14737, Apr. 7, 1976]

#### § 2653.1 Conveyance limitations.

(a) Under section 14(h) of the Act, a total of 2 million acres may be selected for cemetery sites and historical places, Native groups, corporations formed by the Native residents of Sitka, Kenai, Juneau, and Kodiak, for primary places of residence, and for Native allotments approved as provided in section 18 of the Act. Selections must be made before July 1, 1976. Of this total amount:

(1) 500,000 acres will be set aside to be used by the Secretary to satisfy applications filed pursuant to section 14(h) (1), (2), and (5) of the Act. The 500,000 acres will be allocated by: (i) Dividing 200,000 acres among the regions based on the number of Natives enrolled in each region; and, (ii) dividing 300,000 acres equally among the regions;

(2) 92,160 acres will be set aside for possible allocation by the Secretary to corporations formed by the Natives residing in Sitka, Kenai, Juneau, and Kodiak;

(3) 400,000 acres will be set aside to be used by the Secretary to satisfy Native allotment applications approved prior to December 18, 1975, under the Act of May 17, 1906 (34 Stat. 197), the Act of February 8, 1887 (24 Stat. 389), as amended and supplemented, and the Act of June 25, 1910 (36 Stat. 863). Any Native allotment applications pending

## § 2653.2

before the Bureau of Indian Affairs or the Bureau of Land Management on December 18, 1971, will be considered as *pending before the Department*. Those allotment applications which have been determined to meet the requirements of the acts cited herein and for which survey has been requested before December 18, 1975, shall be considered *approved* under section 14(h)(6) of the Act and shall be charged against the acreage.

(b) After subtracting the number of acres used in accordance with paragraph (a) of this section from 2 million acres, the remainder will, after July 1, 1976, be reallocated by the Secretary among the regional corporations in accordance with the number of Natives enrolled in each region.

(c) No Native allotment applications pending before the Secretary on December 18, 1971, will be rejected solely for the reason that the acreage set aside by paragraph (a)(3) of this section has been exhausted.

[38 FR 14218, May 30, 1973, as amended at 41 FR 14737, Apr. 7, 1976]

## § 2653.2 Application procedures.

(a) All applications must be filed in accordance with the procedures in § 2650.2(a) of this chapter.

(b) Applications by corporations of Native groups under section 14(h)(2) and by a Native for a primary place of residence under section 14(h)(5) of the Act must be accompanied by written concurrence of the affected regional corporation. In the case of Native groups, such concurrence must also indicate how much land per member of the Native group, not to exceed 320 acres per member, the regional corporation recommends that the Secretary convey. Any application not accompanied by the necessary concurrence and recommendation of the affected region will be rejected.

(c) Native groups, and Natives residing in Sitka, Kenai, Juneau, and Kodiak, as provided in sections 14(h)(2) and (3), respectively, must comply with the applicable terms of § 2650.2(a), (c), (d), (e), and (f) of this chapter.

(d) The filing of an application under the regulations of this section will constitute a request for withdrawal of the lands, and will segregate the lands

## 43 CFR Ch. II (10–1–08 Edition)

from all other forms of appropriation under the public land laws, including the mining and mineral leasing laws, and from selection under the Alaska Statehood Act, as amended, subject to valid existing rights, but will not segregate the lands from selections under section 12 or 16 of the Act. The segregative effect of such an application will terminate if the application is rejected.

## § 2653.3 Lands available for selection.

(a) Selection may be made for existing cemetery sites or historical places, Native groups, corporations formed by the Natives residing in Sitka, Kenai, Juneau, and Kodiak, and for primary places of residence, from any unappropriated and unreserved lands which the Secretary may withdraw for these purposes: *Provided*, That National Wildlife Refuge System lands and National Forest lands may be made available as provided by section 14(h)(7) of the Act and the regulations in this subpart. Selections for these purposes may also be made from any unappropriated and unreserved lands which the Secretary may withdraw from lands formerly withdrawn and not selected under section 16 of the Act and after December 18, 1975, from lands formerly withdrawn under section 11(a)(1) or 11(a)(3) and not selected under sections 12 or 19 of the Act.

(b) After December 18, 1975, selection of the lands allocated pursuant to § 2653.1(b), shall be made from any lands previously withdrawn under sections 11 or 16 of the Act which are not otherwise appropriated.

(c) A withdrawal made pursuant to section 17(d)(1) of the Act which is not part of the Secretary's recommendation to Congress of December 18, 1973, on the four national systems shall not preclude a withdrawal pursuant to section 14(h) of the Act.

[41 FR 14737, Apr. 7, 1976; 41 FR 17909, Apr. 29, 1976]

## § 2653.4 Termination of selection period.

Except as provided in § 2653.10, applications for selections under this subpart will be rejected after all allocated lands, as provided in § 2653.1, have been

## Bureau of Land Management, Interior

## § 2653.5

exhausted, or if the application is received after the following dates, whichever occurs first:

(a) As to primary place of residence—December 18, 1973.

(b) As to all recipients described in sections 14(h) (1), (2), and (3) of the Act—December 31, 1976.

(c) As to all recipients under section 14(h)(8) of the Act and §2653.1(b)—September 18, 1978.

[41 FR 14737, Apr. 7, 1976, as amended at 41 FR 44041, Oct. 6, 1976; 43 FR 11822, Mar. 22, 1978]

### § 2653.5 Cemetery sites and historical places.

(a) The appropriate regional corporation may apply to the Secretary for the conveyance of existing cemetery sites or historical places pursuant to section 14(h) of the Act. The Secretary may give favorable consideration to these applications: *Provided*, That the Secretary determines that the criteria in these regulations are met: *And provided further*, That the regional corporation agrees to accept a covenant in the conveyance that these cemetery sites or historical places will be maintained and preserved solely as cemetery sites or historical places by the regional corporation, in accordance with the provisions for conveyance reservations in §2653.11.

(b) A historical place may be granted in a National Wildlife Refuge or National Forest unless, in the judgment of the Secretary, the events or the qualities of the site from which it derives its particular value and significance as a historical place can be commemorated or found in an alternative site outside the refuge or forest, or if the Secretary determines that the conveyance could have a substantial detrimental effect on (1) a fish or wildlife population, (2) its habitat, (3) the management of such population or habitat, or (4) access by a fish or wildlife population to a critical part of its habitat.

(c) Although the existence of a cemetery site or historical place and a proper application for its conveyance create no valid existing right, they operate to segregate the land from all other forms of appropriation under the public land laws. Conveyances of lands reserved for the National Wildlife Refuge

System made pursuant to this subpart are subject to the provisions of section 22(g) of the Act and §2650.4–6 as though they were conveyances to a village corporation.

(d) For purposes of evaluating and determining the eligibility of properties as historical places, the quality of significance in Native history or culture shall be considered to be present in places that possess integrity of location, design, setting, materials, workmanship, feeling and association, and:

(1) That are associated with events that have made a significant contribution to the history of Alaskan Indians, Eskimos or Aleuts, or

(2) That are associated with the lives of persons significant in the past of Alaskan Indians, Eskimos or Aleuts, or

(3) That possess outstanding and demonstrably enduring symbolic value in the traditions and cultural beliefs and practices of Alaskan Indians, Eskimos or Aleuts, or

(4) That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or

(5) That have yielded, or are demonstrably likely to yield information important in prehistory or history.

(e) Criteria considerations for historic places: Ordinarily, cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible as a historical place unless they fall within one of the following categories:

(1) A religious property deriving primary significance from architectural or artistic distinction or historical importance;

(2) A building or structure removed from its original location but which is the surviving structure most importantly associated with a historic person or event;

(3) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building

directly associated with his productive life;

(4) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events;

(5) A reconstructed building when accurately executed in a suitable environment and preserved in a dignified manner as part of a restoration master plan and when no other building or structure with the same association has survived;

(6) A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or

(7) A property achieving significance within the past 50 years if it is of exceptional importance.

(f) Applications by a regional corporation under section 14(h)(1) of the Act for conveyance of existing cemetery sites or historical places within its boundaries shall be filed with the proper office of the Bureau of Land Management in accordance with § 2650.2(a) of this chapter. The regional corporation shall include as an attachment to its application for a historical place a statement describing the events that took place and the qualities of the site from which it derives its particular value and significance as a historical place. In making the application, the regional corporation should identify accurately and with sufficient specificity the size and location of the site for which the application is made as an existing cemetery site or historical place to enable the Bureau of Land Management to segregate the proper lands. The land shall be described in accordance with § 2650.2(e) of this chapter, except that if the site under application is less than 2.50 acres or if it cannot be described by a protracted survey description, it shall be described by a metes and bounds description.

(g) Upon receipt of an application for an existing cemetery site or historical place, the Bureau of Land Management shall segregate from all other appropriation under the public land laws the land which it determines, adequately encompasses the site described in the application.

(h) Notice of filing of such application specifying the regional corporation, the size and location of the segregated lands encompassing the site for which application has been made, the date of filing, and the date by which any protest of the application must be filed shall be published once in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Bureau of Land Management. The Bureau of Land Management shall then forward the application to the Director, Juneau Area Office, Bureau of Indian Affairs, for investigation, report, and certification and supply a copy to the National Park Service. When an application pertains to lands within a National Wildlife Refuge or National Forest, the Bureau of Land Management shall also forward informational copies of the application and the size and location of segregated lands to the agency or agencies involved.

(i) If, during its investigation, the Bureau of Indian Affairs finds that the location of the site as described in the application is in error, it shall notify the applicant, the Bureau of Land Management, and other affected Federal agencies, of such error. The applicant shall have 60 days from receipt of such notice to file with the Bureau of Land Management an amendment to its application with respect to the location of the site. Upon acceptance of such amendment the Bureau of Land Management shall reprocess the application, including segregation of lands and publication of notice.

(j) The Bureau of Indian Affairs shall identify on a map and mark on the ground, including gravesites or other important items, the location and size of the site or place with sufficient clarity to enable the Bureau of Land Management to locate on the ground said site or place. The Bureau of Indian Affairs, after consultation with the National Park Service and, in the case of refuges and forests, the agency or agencies involved, shall certify as to the existence of the site or place and that it meets the criteria in this subpart.

(1) *Cemetery sites.* The Bureau of Indian Affairs shall certify specifically that the site is the burial place of one

## Bureau of Land Management, Interior

## § 2653.6

or more Natives. The Bureau of Indian Affairs shall determine whether the cemetery site is in active or inactive use, and if active, it shall estimate the degree of use by Native groups and villages in the area which it shall identify.

(2) *Historical places.* The Bureau of Indian Affairs shall describe the events that took place and qualities of the site which give it particular value and significance as a historical place.

(k) The Bureau of Indian Affairs shall submit its report and certification along with the written comments and recommendations of the National Park Service and any other Federal agency, to the Bureau of Land Management. If the land is available, the Bureau of Land Management shall issue a decision to convey. However, where the issues in §2653.5(b) are raised by the reports of the Fish and Wildlife Service or the Forest Service, the State Director, Bureau of Land Management shall submit the record including a land status report, to the Secretary for a resolution of any conflicts. If the land is available for that purpose, the Secretary shall make his determination to convey or not to convey the site to the applicant.

(l) The decision of the Bureau of Land Management or the Secretary shall be served on the applicant and all parties of record in accordance with the provisions of 43 CFR part 4, subpart E and shall be published in accordance with §2650.7 of this part. The decision of the Bureau of Land Management shall become final unless appealed to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E. Any agency adversely affected by the certification of BIA or the decision of the Bureau of Land Management may also appeal the matter to the Board of Land Appeals. After a decision to convey an existing cemetery site or historical place has become final, the Bureau of Land Management shall adjust the segregation of the lands to conform with said conveyance.

(m) For inactive cemeteries, the boundaries of such cemetery sites shall include an area encompassing all actual gravesites including a reasonable buffer zone of not more than 66 feet. For active cemeteries, the boundaries

of such sites shall include an area of actual use and reasonable future expansion of not more than 10 acres, but the BLM in consultation with any affected Federal agency may include more than 10 acres upon a determination that special circumstances warrant it. For historical places, the boundaries shall include an area encompassing the actual site with a reasonable buffer zone of not more than 330 feet.

[41 FR 14738, Apr. 7, 1976; 41 FR 17909, Apr. 29, 1976, as amended at 41 FR 49487, Nov. 9, 1976]

### § 2653.6 Native groups.

(a) *Eligibility.* (1) The head or any authorized representative of a Native group incorporated pursuant to section 14(h)(2) of the Act may file on behalf of the group an application for a determination of its eligibility under said section of the Act. Such application shall be filed in duplicate with the appropriate officer, Bureau of Land Management, prior to April 16, 1976, in accordance with §2650.2(a) of this chapter. Upon serialization of the application, the Bureau of Land Management office will forward a copy of such application to the Director, Juneau Area Office, Bureau of Indian Affairs, who shall investigate and report the findings of fact required to be made herein to the Bureau of Land Management with a certification thereof. A copy of an application by a group located within a National Wildlife Refuge or a National Forest will be furnished to the appropriate agency administering the area.

(2) Each application must identify the section, township, and range in which the Native group is located, and must be accompanied by a list of the names of the Native members of the group, a listing of permanent improvements and periods of use of the locality by members, a conformed copy of the group's article of incorporation, and the regional corporation's concurrence and recommendation under §2653.2(b).

(3) Notice of the filing of such application specifying the date of such filing, the identity and location of the Native group, and the date by which any protest of the application must be filed shall be prepared by the Bureau of Indian Affairs and shall be published

once in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Bureau of Land Management. Any protest to the application shall be filed with the Bureau of Indian Affairs within the time specified in the notice.

(4) The Bureau of Indian Affairs shall investigate and determine whether each member of a Native group formed pursuant to section 14(h)(2) of the Act is enrolled pursuant to section 5 of the Act. The Bureau of Indian Affairs shall determine whether the members of the Native group actually reside in and are enrolled to the locality specified in its application. The Bureau of Indian Affairs shall specify the number and names of Natives who actually reside in and are enrolled to the locality, including children who are members of the group and who are temporarily elsewhere for purposes of education, and it shall further determine whether the members of the Native group constitute the majority of the residents of the locality where the group resides. The Bureau of Indian Affairs shall determine and identify the exterior boundaries of the Native group's locality and the location of all those permanent structures of the Native group used as dwelling houses.

(5) The Native group must have an identifiable physical location. The members of the group must use the group locality as a place where they actually live in permanent structures used as dwelling houses. The group must have the character of a separate community, distinguishable from nearby communities, and must be composed of more than a single family or household. Members of a group must have enrolled to the group's locality pursuant to section 5 of the Act, must actually have resided there as of the 1970 census enumeration date, and must have lived there as their principal place of residence since that date.

(6) The Bureau of Indian Affairs shall issue its certification, containing its findings of fact required to be made herein and its determination of the eligibility of the Native group, except it shall issue a certification of ineligibility when it is notified by the Bureau of Land Management that the land is

unavailable for selection by such Native group. It shall send a copy thereof by certified mail to the Bureau of Land Management, the Native group, its regional corporation and any party of record.

(7) Appeals concerning the eligibility of a Native group may be made to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E.

(b) *Selections.* (1) Native group selections shall not exceed the amount recommended by the regional corporation or 320 acres for each Native member of a group, or 7,680 acres for each Native group, whichever is less. Any acreage selected in excess of that number shall be identified as alternate selections and shall be numerically ordered to indicate selection preference. Native groups will not receive land benefits unless the land which is occupied by their permanent structures used as dwelling houses is available, or in the case where such land is not State or federally owned, the land which is contiguous to and immediately surrounds the land occupied by their permanent structures used as dwelling houses is available, and is not within a wildlife refuge or forest, pursuant to section 14(h) of the Act. Public lands which may be available for this purpose are set forth in §2653.3 (a) and (c). Conveyances of lands reserved for the National Wildlife Refuge System made pursuant to this part are subject to the provisions of section 22(g) of the Act and §2650.4–6 of this chapter as though they were conveyances to a village corporation.

(2) Upon receipt of the applications of a Native group for a determination of its eligibility under section 14(h)(2) of the Act, the Bureau of Land Management shall segregate the land encompassed within the group locality from land available for that purpose pursuant to §2653.6(b)(1). However, segregation of land for Native groups whose dwelling structures are located outside but adjacent to a National Wildlife Refuge or National Forest shall not include such reserved land, unless the Native group's dwelling structures are located on land excepted from the Kodiak National Wildlife Refuge pursuant to Public Land Order 1634 (FR Doc. 58–3696, filed May 16, 1958).

## Bureau of Land Management, Interior

## § 2653.8

(3) The Bureau of Indian Affairs shall visit the locality of the group and shall recommend to the Bureau of Land Management the manner in which the segregation should be modified to encompass the residences of as many members as possible while allowing for the inclusion of the land most intensively used by members of the Native group. The recommended segregation must be contiguous and as compact as possible. The Bureau of Land Management may segregate the land accordingly provided such lands are otherwise available in accordance with paragraph (b)(1) and (b)(2). If the Bureau of Land Management finds the lands are unavailable for selection by a Native group, it shall notify the Bureau of Indian Affairs.

(4) Selections shall be made from lands segregated for that purpose and shall be filed prior to July 1, 1976. Selections shall be contiguous and taking into account the situation and potential uses of the lands involved, the total area selected shall be reasonably compact except where separated by lands which are unavailable for selection. The total area selected will not be considered to be reasonably compact if (i) it excludes other lands available for selection within its exterior boundaries; or (ii) an isolated tract of public land of less than 640 acres remains after selection. The lands selected shall be in quarter sections where they are available unless the exhaustion of the acreage which the group may be entitled to select does not permit the selection of a quarter section and shall include all available lands in less than quarter sections. Lands selected shall conform as nearly as practicable to the United States land survey system.

(5) A Native group whose eligibility has not been finally determined may file its land selections as if it were determined to be eligible. The Bureau of Land Management shall release from segregation the lands not selected and shall continue segregation of the selected land until the lands are conveyed or the group is finally determined to be ineligible. However, in the case of a group determined to be ineligible by the Board of Land Appeals, the segregation shall be continued for a pe-

riod of 60 days from the date of such decision.

(6) Where any conflict in land selection occurs between any eligible Native groups, the Bureau of Land Management shall request the appropriate regional corporation to recommend the manner in which such conflict should be resolved.

(7) The Bureau of Land Management shall issue a decision on the selection of a Native group determined to be eligible and shall serve a copy of such decision by certified mail on the Native group, its regional corporation and any party of record and the decision shall be published in accordance with §2650.7 of this part.

(8) Appeals from the Bureau of Land Management decision on the selection by a Native group under this section shall be made to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E.

[41 FR 14739, Apr. 7, 1976, as amended at 41 FR 49487, Nov. 9, 1976]

### § 2653.7 Sitka-Kenai-Juneau-Kodiak selections.

(a) The corporations representing the Natives residing in Sitka, Kenai, Juneau, and Kodiak, who incorporate under the laws of the State of Alaska, may each select the surface estate of up to 23,040 acres of lands of similar character located in reasonable proximity to those municipalities.

(b) The corporations representing the Natives residing in Sitka, Kenai, Juneau, and Kodiak, shall nominate not less than 92,160 acres of lands within 50 miles of each of the four named cities which are similar in character to the lands in which each of the cities is located. After review and public hearings, the Secretary shall withdraw up to 46,080 acres near each of the cities from the lands nominated. Each corporation representing the Native residents of the four named cities may select not more than one-half the area withdrawn for selection by that corporation. The Secretary shall convey the area selected.

### § 2653.8 Primary place of residence.

(a) An application under this subpart may be made by a Native who occupied

#### § 2653.8-1

land as a primary place of residence on August 31, 1971.

(b) Applications for a primary place of residence must be filed not later than December 18, 1973.

#### § 2653.8-1 Acreage to be conveyed.

A Native may secure title to the surface estate of only a single tract not to exceed 160 acres under the provisions of this subpart, and shall be limited to the acreage actually occupied and used. An application for title under this subpart shall be accompanied by a certification by the applicant that he will not receive title to any other tract of land pursuant to sections 14 (c)(2), (h)(2), or 18 of the Act.

#### § 2653.8-2 Primary place of residence criteria.

(a) *Periods of occupancy.* Casual or occasional use will not be considered as occupancy sufficient to make the tract applied for a primary place of residence.

(b) *Improvements constructed on the land.* (1) Must have a dwelling.

(2) May include associated structures such as food cellars, drying racks, caches etc.

(c) *Evidence of occupancy.* Must have evidence of permanent or seasonal occupancy for substantial periods of time.

#### § 2653.8-3 Appeals.

Appeals from decisions made by the Bureau of Land Management on applications filed pursuant to section 14(h)(5) of the Act shall be made to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E.

[41 FR 14740, Apr. 7, 1976]

#### § 2653.9 Regional selections.

(a) Applications by a regional corporation for selection of land within its boundaries under section 14(h)(8) of the Act shall be filed with the proper office of the Bureau of Land Management in accordance with § 2650.2(a). Selections made under section 14(h)(1), (2), (3), and (5) of the Act will take priority over selections made pursuant to section 14(h)(8). Lands available for section 14(h)(8) selections are those lands originally withdrawn under section 11(a)(1),

#### 43 CFR Ch. II (10-1-08 Edition)

(3), or 16(a) of the Act and not conveyed pursuant to selections made under sections 12(a), (b), or (c), 16(b) or 19 of the Act.

(b) A regional corporation may select a total area in excess of its entitlement to ensure that it will obtain its entitlement in the event of any conflicts. Any acreage in excess of its entitlement shall be identified as alternate selections and shall be numerically ordered on a section by section basis to indicate selection preference.

(c) Selections need not be contiguous but must be made along section lines in reasonably compact tracts of at least 5,760 acres, not including any unavailable land contained therein. The exterior boundaries of such tracts shall be in linear segments of not less than two miles in length, except where adjoining unavailable lands or where shorter segments are necessary to follow section lines where township lines are offset along standard parallels caused by the convergence of the meridians. However, selected tracts may contain less than 5,760 acres where there is good cause shown for such selection, taking into consideration good land management planning and principles for the potentially remaining public lands, and which would not leave unduly fragmented tracts of such public lands. Each tract selected shall not be considered to be reasonably compact if (1) it excludes other lands for selection within its exterior boundaries, or (2) an isolated tract of public land of less than 1,280 acres remains after selection of the total entitlement. Regional corporations shall not be precluded from selecting less than 5,760 acres where the entire tract available for selection constitutes less than 5,760 acres. Selection shall conform as nearly as practicable to the United States land survey system.

(d) Notice of the filing of such selections, including the date by which any protest of the selection should be filed, shall be published once in the FEDERAL REGISTER and one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Bureau of Land Management. Any protest to the application should be filed in the Bureau of Land Management office in which such selections

## Bureau of Land Management, Interior

## § 2654.1

were filed within the time specified in the notice.

(e) Appeals from decisions made by the Bureau of Land Management with respect to such selections shall be made to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E.

[41 FR 14740, Apr. 7, 1976, as amended at 41 FR 49487, Nov. 9, 1976]

### § 2653.10 Excess selections.

Where land selections by a regional corporation, Native group, any of the four named cities, or a Native pursuant to section 14(h) (1), (2), (3), or (5) exceed the land entitlement, the Bureau of Land Management may request such corporation to indicate its preference among lands selected.

[41 FR 14740, Apr. 7, 1976]

### § 2653.11 Conveyance reservations.

(a) Conveyances issued pursuant to this subpart are subject to the conveyance reservations described in § 2650.4 of this chapter.

(b) In addition to the reservations provided in paragraph (a) of this section, conveyance for cemetery sites or historical places will contain a covenant running with the land providing that (1) the regional corporation shall not authorize mining or mineral activity of any type; nor shall it authorize any use which is incompatible with or is in derogation of the values of the area as a cemetery site or historical place (standards for determining uses which are incompatible with or in derogation of the values of the area are found in relevant portions of 36 CFR 800.9 (1974); and (2) that the United States reserves the right to seek enforcement of the covenant in an action in equity. The covenant placed in this subsection may be released by the Secretary, in his discretion, upon application of the regional corporation grantee showing that extraordinary circumstances of a nature to warrant the release have arisen subsequent to the conveyance.

(c) Conveyances for cemetery sites and historical places shall also contain

the covenant required by § 2650.4-6 of this chapter.

[38 FR 14218, May 30, 1973. Redesignated and amended at 41 FR 14740, Apr. 7, 1976]

## Subpart 2654—Native Reserves

### § 2654.0-3 Authority.

Section 19(b) of the Act authorizes any village corporation(s) located within a reserve defined in the act to acquire title to the surface and sub-surface estates in any reserve set aside for the use and benefit of its stockholders or members prior to December 18, 1971. Such acquisition precludes any other benefits under the Act.

### § 2654.0-5 Definitions.

*Reserve lands* means any lands reserved prior to the date of enactment of the act which are subject to being taken in lieu of other benefits under the act pursuant to section 19(b) of the Act.

### § 2654.1 Exercise of option.

(a) Any village corporation which has not, by December 18, 1973, elected to acquire title to the reserve lands will be deemed to have elected to receive for itself and its members the other benefits under the Act.

(b) The election of a village to acquire title to the reserve lands shall be exercised in the manner provided by its articles of incorporation. However when two or more villages are located on the same reserve there must be a special election to acquire title to the reserve lands. A majority vote of all the stockholders or members of all corporations located on the reserve is required to acquire title to the reserve lands. For the purpose of this paragraph the stockholders or members shall be determined on the basis of the roll of village residents proposed to be promulgated under 25 CFR 43h.7.<sup>1</sup> The regional corporation or village corporations or any member or stockholder of the village corporations involved may request that the election be observed by the Bureau of Indian Affairs.

<sup>1</sup>At 47 FR 13327, Mar. 30, 1982, § 43h.7 of Title 25 was redesignated as § 69.7.

## § 2654.2

(c) The results of any election by a village corporation or corporations to acquire title to the reserve lands shall be certified by such village corporation or corporations as being in conformity with the articles of incorporation and by-laws of the village corporation or corporations.

### § 2654.2 Application procedures.

(a) If the corporation or corporations elect to take title to the reserve lands, submission to the Secretary of the certificate of election will constitute an application to acquire title to those lands.

(b) If the village corporation or corporations do not elect to take the reserve lands, they shall apply for their land selections pursuant to subpart 2651 of this chapter.

### § 2654.3 Conveyances.

(a) Conveyances under this subpart are subject to the provisions of section 14(g) of the Act, as provided by § 2650.4 of this chapter.

(b) Conveyances under this subpart to two or more village corporations will be made to them as tenants-in-common, having undivided interests proportionate to the number of their respective members or stockholders determined on the basis of the final roll promulgated by the Secretary pursuant to section 5 of the Act.

## Subpart 2655—Federal Installations

AUTHORITY: Alaska Claims Settlement Act of 1971 (43 U.S.C. 1601 *et seq.*).

SOURCE: 45 FR 70206, Oct. 22, 1980, unless otherwise noted.

### § 2655.0-3 Authority.

Section 3(e)(1) of the Act provides that the Secretary shall determine the smallest practicable tract enclosing land actually used in connection with the administration of Federal installations in Alaska.

### § 2655.0-5 Definitions.

As used in this subpart, the term:

(a) *Holding agency* means any Federal agency claiming use of a tract of land subject to these regulations.

## 43 CFR Ch. II (10-1-08 Edition)

(b) *Appropriate selection period* means the statutory or regulatory period within which the lands were available for Native selection under the act.

(c) *State Director* means the Director, Alaska State Office, Bureau of Land Management.

### § 2655.1 Lands subject to determination.

(a) Holding agency lands located within areas withdrawn by sections 11(a)(1), 16(a), or 16(d) of the Act and subsequently selected by a village or regional corporation under sections 12 or 16, or selected by the regional corporation under sections 12 or 16, or selected by the regional corporation for southeast Alaska in accordance with section 14(h)(8)(B) are subject to a determination made under this subpart.

(b) Lands in the National Park System, lands withdrawn or reserved for national defense purposes and those former Indian reserves elected under section 19 of the Act are not subject to a determination under section 3(e)(1) of the Act or this subpart. Lands withdrawn under section 11(a)(3) or 14(h), except 14(h)(8)(B), of the Act do not include lands withdrawn or otherwise appropriated by a Federal agency and, therefore, are not subject to a determination under section 3(e)(1) of the Act or this subpart.

### § 2655.2 Criteria for determinations.

Land subject to determination under section 3(e)(1) of the Act will be subject to conveyance to Native corporations if they are determined to be public lands under this subpart. If the lands are determined not to be public lands, they will be retained by the holding agency. The Bureau of Land Management shall determine:

(a) Nature and time of use.

(1) If the holding agency used the lands for a purpose directly and necessarily connected with the Federal agency as of December 18, 1971; and

(2) If use was continuous, taking into account the type of use, throughout the appropriate selection period; and

(3) If the function of the holding agency is similar to that of the Federal agency using the lands as of December 18, 1971.

## Bureau of Land Management, Interior

## § 2655.3

(b) Specifications for area to be retained by Federal agency.

(1) Area shall be no larger than reasonably necessary to support the agency's use.

(2) Tracts shall be described by U.S. Survey (or portion thereof), smallest aliquot part, metes and bounds or protraction diagram, as appropriate.

(3) Tracts may include:

(i) Improved lands;

(ii) Buffer zone surrounding improved lands as is reasonably necessary for purposes such as safety measures, maintenance, security, erosion control, noise protection and drainage;

(iii) Unimproved lands used for storage;

(iv) Lands containing gravel or other materials used in direct connection with the agency's purpose and not used simply as a source of revenue or services. The extent of the areas reserved as a source of materials will be the area disturbed but not depleted as of the date of the end of the appropriate selection period; and

(v) Lands used by a non-governmental entity or private person for a use that has a direct, necessary and substantial connection to the purpose of the holding agency but shall not include lands from which proceeds of the lease, permit, contract, or other means are used primarily to derive revenue.

(c) Interest to be retained by Federal agency.

(1) Generally, full fee title to the tract shall be retained; however, where the tract is used primarily for access, electronic, light or visibility clear zones or right-of-way, an easement may be reserved in lieu of full fee title where the State Director determines that an easement affords sufficient protection, that an easement is customary for the particular use and that it would further the objectives of the act.

(2) Easements reserved in lieu of full fee title shall be reserved under the provisions of section 17(b) of the Act and § 2650.4-7 of this title.

### § 2655.3 Determination procedures.

(a) The State Director shall make the determination pursuant to the provisions in this subpart. Where sufficient information has not already been provided, the State Director shall issue

written notice to any Federal agency which the Bureau of Land Management has reason to believe might be a holding agency. The written notice shall provide that the information requested be furnished in triplicate to the State Director within 90 days from the receipt of the notice. Upon receipt of information the State Director will promptly provide affected Native corporations with copies of the documents. Upon adequate and justifiable showing as to the need for an extension by the holding agency, the State Director may grant a time extension up to 60 days to provide the information requested in this subpart.

(b) The information to be provided by the holding agency shall include the following for each tract which is subject to determination:

(1) The function and scope of the installation;

(2) A plottable legal description of the lands used;

(3) A list of structures or other alterations to the character of lands and their function, their location on the tract, and date of construction;

(4) A description of the use and function of any unaltered lands;

(5) A list of any rights, interests or permitted uses the agency has granted to others, including other Federal agencies, along with dates of issuance and expiration and copies of any relevant documents;

(6) If available, site plans, drawings and annotated aerial photographs delineating the boundaries of the installation and locations of the areas used; and

(7) A narrative explanation stating when Federal use of each area began; what use was being made of the lands as of December 18, 1971; whether any action has taken place between December 18, 1971, and the end of the appropriate selection period that would reduce the area needed, and the date this action occurred.

(c) The State Director shall request comments from the selecting Native corporation relating to the identification of lands requiring a determination. The period for comment by the Native corporation shall be as provided for the agency in paragraph (a) of this section, but shall commence from the

#### § 2655.4

date of receipt of the latest copy of the holding agency's submission.

(d) The holding agency has the burden of proof in proceedings before the State Director under this subpart. A determination of the lands to be retained by the holding agency under section 3(e) of the Act and this subpart shall be made based on the information available in the case file. If the holding agency fails to present adequate information on which to base a determination, all lands selected shall be approved for conveyance to the selecting Native corporation.

(e) The results of the determination shall be incorporated into appropriate decision documents.

#### § 2655.4 Adverse decisions.

(a) Any decision adverse to the holding agency or Native corporation shall become final unless appealed to the Board of Land Appeals in accordance with 43 CFR part 4, subpart E. If a decision is appealed, the Secretary may take personal jurisdiction over the matter in accordance with 43 CFR 4.5. In the case of appeals from affected Federal agencies, the Secretary may take jurisdiction upon written request from the appropriate cabinet level official. The requesting official, the State Director and any affected Native corporation shall be notified in writing of the Secretary's decision regarding the request for Secretarial jurisdiction and the reasons for the decision shall be communicated in writing to the requesting agency and any other parties to the appeal.

(b) When an appeal to a decision to issue a conveyance is made by a holding agency or a Native corporation on the basis that the Bureau of Land Management neglected to make a determination pursuant to section 3(e)(1) of the Act, the matter shall be remanded by the Board of Land Appeals to the Bureau of Land Management for a determination pursuant to section 3(e)(1) of the Act and these regulations: *Provided*, That the holding agency or Native corporation has reasonably satisfied the Board that its claim is not frivolous.

#### 43 CFR Ch. II (10–1–08 Edition)

### Group 2700—Disposition; Sales

NOTE: The information collection requirements contained in parts 2720 and 2740 of Group 2700 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0153 and 1004-0012, respectively. The information is being collected to permit the authorized officer to determine if disposition of Federally-owned mineral interests should be made and to determine if disposition of public lands should be made for recreation and public purposes. This information will be used to make these determinations. A response is required to obtain a benefit.

#### Subpart 2710—Sales: General Provisions

##### § 2710.0-1 Purpose.

The regulations in this part implement the sale authority of section 203

## Bureau of Land Management, Interior

## §2710.0-6

of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1713).

### §2710.0-2 Objective.

The objective is to provide for the orderly disposition at not less than fair market value of public lands identified for sale as part of the land use planning process.

### §2710.0-3 Authority.

(a) The Secretary of the Interior is authorized by the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1713), to sell public lands where, as a result of land use planning, it is determined that the sale of such tract meets any or all of the following disposal criteria:

(1) Such tract was acquired for a specific purpose and the tract is no longer required for that or any other Federal purpose; or

(2) Disposal of such tract shall serve important public objectives, including but not limited to, expansion of communities and economic development, which cannot be achieved prudently or feasibly on lands other than public lands and which outweigh other public objectives and values, including, but not limited to, recreation and scenic values, which would be served by maintaining such tract in Federal ownership; or

(3) Such tract, because of its location or other characteristics is difficult and uneconomic to manage as part of the public lands and is not suitable for management by another Federal department or agency.

(b) The Secretary of the Interior is authorized by section 310 of the Federal Land Policy and Management Act (43 U.S.C. 1740) to promulgate rules and regulations to carry out the purpose of the Act.

### §2710.0-5 Definitions.

As used in this part, the term

(a) *Public lands* means any lands and interest in lands owned by the United States and administered by the Secretary through the Bureau of Land Management except:

(1) Lands located on the Outer Continental Shelf;

(2) Lands held for the benefit of Indians, Aleuts, and Eskimos.

(b) *Secretary* means the Secretary of the Interior.

(c) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this part.

(d) *Act* means the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701).

(e) *Family sized farm* means the unit of public lands determined to be chiefly valuable for agriculture, and that is of sufficient size, based on land use capabilities, development requirements and economic capability, to provide a level of net income, after payment of expenses and taxes, which will sustain a family sized agribusiness operation above the poverty level for a rural farm family of 4 as determined by the Bureau of Labor Statistics, U.S. Department of Labor, for the calendar year immediately preceeding the year of the proposed sale under the regulations of this part. The determination of the practical size is an economic decision to be made on a local area basis considering, but not limited to, factors such as: Climatic conditions, soil character, availability of irrigation water, topography, usual crop(s) of the locale, marketability of the crop(s), production and development costs, and other physical characteristics which shall give reasonable assurance of continued production under proper conservation management.

### §2710.0-6 Policy.

(a) Sales under this part shall be made only in implementation of an approved land use plan or analysis in accordance with part 1600 of this title.

(b) Public lands determined to be suitable for sale shall be offered only on the initiative of the Bureau of Land Management. Indications of interest to have specific tracts of public lands offered for sale shall be accomplished through public input to the land use planning process. (See §§1601.1-1 and 1601.8 of this title). Nominations or requests to have specific tracts of public lands offered for sale may also be made by direct request to the authorized officer.

(c)(1) The Federal Land Policy and Management Act (43 U.S.C. 1713(f)) provides that sales of public lands under this section shall be conducted under competitive bidding procedures established by the Secretary. However, where the Secretary determines it necessary and proper in order to assure equitable distribution among purchasers of lands, or to recognize equitable considerations or public policies, including, but not limited to, a preference to users, lands may be sold by modified competitive bidding or without competitive bidding. In recognizing public policies, the Secretary shall give consideration to the following potential purchasers:

- (i) The State in which the lands are located;
- (ii) The local government entities in such State which are in vicinity of the lands;
- (iii) Adjoining landowners;
- (iv) Individuals; and
- (v) Any other person.

(2) When a parcel of land meets the sale criteria of section 203 of the Federal Land Policy and Management Act (43 U.S.C. 1713), several factors shall be considered in determining the method of sale. These factors include, but are not limited to: Competitive interest; needs of State and local governments; adjoining landowners; historical uses; and equitable distribution of land ownership.

(3) Three methods of sale are provided for in §2711.3 of this title: competitive; modified competitive; and direct (non-competitive). The policy for selecting the method of sale is:

(i) Competitive sale as provided in §2711.3-1 of this title is the general procedure for sales of public lands and may be used where there would be a number of interested parties bidding for the lands and (A) wherever in the judgment of the authorized officer the lands are accessible and usable regardless of adjoining land ownership and (B) wherever the lands are within a developing or urbanizing area and land values are increasing due to their location and interest on the competitive market.

(ii) Modified competitive sales as provided in §2711.3-2 of this title may be used to permit the existing grazing

user or adjoining landowner to meet the high bid at the public sale. This procedure will allow for limited competitive sales to protect on-going uses, to assure compatibility of the possible uses with adjacent lands, and avoid dislocation of existing users. Lands offered under this procedure would normally be public lands not located near urban expansion areas, or with rapidly increasing land values, and existing use of adjacent lands would be jeopardized by sale under competitive bidding procedures.

(iii) Direct sale as provided in §2711.3-3 of this title may be used when the lands offered for sale are completely surrounded by lands in one ownership with no public access, or where the lands are needed by State or local governments or non-profit corporations, or where necessary to protect existing equities in the lands or resolve inadvertent unauthorized use or occupancy of said lands.

(4) When lands have been offered for sale by one method of sale and the lands remain unsold, then the lands may be reoffered by another method of sale.

(5) In no case shall lands be sold for less than fair market value.

(d) Sales of public lands determined to be chiefly valuable for agriculture shall be no larger than necessary to support a family-sized farm.

(e) The sale of family-sized farm units, at any given sale, shall be limited to one unit per bidder and one unit per family. The limit of one unit per family is not to be construed as limiting children eighteen years or older from bidding in their own right.

(f) Sales under this part shall not be made at less than fair market value. Such value is to be determined by an appraisal performed by a Federal or independent appraiser, as determined by the authorized officer, using the principles contained in the *Uniform Appraisal Standards for Federal Land Acquisitions*. The value of authorized improvements owned by anyone other than the United States upon lands being sold shall not be included in the determination of fair market value. Technical review and approval for conformance with appraisal standards

## Bureau of Land Management, Interior

## § 2711.1-2

shall be conducted by the authorized officer.

(g) Constraint and discretion shall be used with regard to the terms, covenants, conditions and reservations authorized by section 208 of the Act that are to be in sales patents and other conveyance documents, except where inclusion of such provisions is required by law or for protection of valid existing rights.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29014, July 17, 1984; 49 FR 29795, July 24, 1984]

### § 2710.0-8 Lands subject to sale.

(a) All public lands, as defined by § 2710.0-5 of this title, and, which meet the disposal criteria specified under § 2710.0-3 of this title, are subject to sale pursuant to this part, except:

(1) Those public lands within the re-vested Oregon California Railroad and reconveyed Coos Bay Wagon Road grants which are more suitable for management and administration for permanent forest protection and other purposes as provided for in the Acts of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181(a)); May 24, 1939 (53 Stat. 753); and section 701(b) of the Act.

(2) Public lands in units of the National Wilderness Preservation System, National Wild and Scenic Rivers System and National System of Trails.

(3) Public lands classified, withdrawn, reserved or otherwise designated as not available or subject to sale shall not be sold under the regulations of this part until issuance of an order or notice which either opens or provides for such disposition.

(b) Unsurveyed public lands shall not be sold under the regulations of this part until they are officially surveyed under the public land survey system of the United States. Such survey shall be completed and approved by the Secretary prior to any sale.

## Subpart 2711—Sales: Procedures

### § 2711.1 Initiation of sale.

#### § 2711.1-1 Identification of tracts by land use planning.

(a) Tracts of public lands shall only be offered for sale in implementation of land use planning prepared and/or ap-

proved in accordance with subpart 1601 of this title.

(b) Public input proposing tracts of public lands for disposal through sale as part of the land use planning process may be made in accordance with §§ 1601.3, 1601.6-3 or § 1601.8 of this title.

(c) Nominations or requests for sales of public lands may be made to the District office of the Bureau of Land Management for the District in which the public lands are located and shall specifically identify the tract being nominated or requested and the reason for proposing sale of the specific tract.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29015, July 17, 1984]

### § 2711.1-2 Notice of realty action.

(a) A notice of realty action offering for sale a tract or tracts of public lands identified for disposal by sale shall be issued, published and sent to parties of interest by the authorized officer not less than 60 days prior to the sale. The notice shall include the terms, covenants, conditions and reservations which are to be included in the conveyance document and the method of sale. The notice shall also provide 45 days after the date of issuance for the right of comment by the public and interested parties.

(b) Not less than 60 days prior to sale, notice shall be sent to the Member of the U.S. House of Representatives in whose district the public lands proposed for sale are located and the U.S. Senators for the State in which the public lands proposed for sale are located, the Senate and House of Representatives, as required by paragraph (f) of this section, to Governor of the State within which the public lands are located, to the head of the governing body of any political subdivision having zoning or other land use regulatory responsibility in the geographic area within which the public lands are located and to the head of any political subdivision having administrative or public services responsibility in the geographic area within which the lands are located. The notice shall be sent to other known interested parties of record including, but not limited to, adjoining landowners and current land users.

### § 2711.1-3

(c) The notice shall be published once in the FEDERAL REGISTER and once a week for 3 weeks thereafter in a newspaper of general circulation in the general vicinity of the public lands being proposed to be offered for sale.

(d) The publication of the notice of realty action in the FEDERAL REGISTER segregates the public lands covered by the notice of realty action to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. Any subsequent application will not be accepted, will not be considered as filed, and will be returned to the applicant if the notice segregates from the use applied for in the application. The segregative effect of the notice of realty action terminates: (i) Upon issuance of a patent or other document of conveyance to such lands; (ii) upon publication in the FEDERAL REGISTER of a termination of the segregation; or (iii) at the end of the specified segregation period, whichever occurs first. The segregation period may not exceed two years unless, on a case-by-case basis, the BLM State Director determines that the extension is necessary and documents, in writing, why the extension is needed. Such an extension will not be renewable and cannot be extended beyond the additional two years. If an extension is deemed necessary, the BLM will publish a notice following the same procedure as that stated in paragraph (c) of this section.

(e) The notice published under § 1610.5 of this title may, if so designated in the notice and is the functional equivalent of a notice of realty action required by this section, serve as the notice of realty action required by paragraph (a) of this section and may segregate the public lands covered by the sale proposal to the same extent that they would have been segregated under a notice of realty action issued under paragraph (a) of this section.

(f) For tracts of public lands in excess of 2,500 acres, the notice shall be submitted to the Senate and the House of Representatives not less than the 90 days prescribed by section 203 of the Act (43 U.S.C. 1713(c)) prior to the date of sale. The sale may not be held prior to the completion of the congressional

### 43 CFR Ch. II (10-1-08 Edition)

notice period unless such period is waived by Congress.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29015, July 17, 1984; 71 FR 67068, Nov. 20, 2006]

#### § 2711.1-3 Sales requiring grazing permit or lease cancellations.

When lands are identified for disposal and such disposal will preclude livestock grazing, the sale shall not be made until the permittees and lessees are given 2 years prior notification, except in cases of emergency, that their grazing permit or grazing lease and grazing preference may be cancelled in accordance with § 4110.4-2(b) of this title. A sale may be made of such identified lands if the sale is conditioned upon continued grazing by the current permittee/lessee until such time as the current grazing permit or lease would have expired or terminated. A permittee or lessee may unconditionally waive the 2-year prior notification. The publication of a notice of realty action as provided in § 2711.1-2(c) of this title shall constitute notice to the grazing permittee or lessee if such notice has not been previously given.

[49 FR 29015, July 17, 1984]

#### § 2711.2 Qualified conveyees.

Tracts sold under this part may only be conveyed to:

(a) A citizen of the United States 18 years of age or over;

(b) A corporation subject to the laws of any State or of the United States;

(c) A State, State instrumentality or political subdivision authorized to hold property; and

(d) An entity legally capable of conveying and holding lands or interests therein under the laws of the State within which the lands to be conveyed are located. Where applicable, the entity shall also meet the requirements of paragraphs (a) and (b) of this section.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29015, July 17, 1984]

#### § 2711.3 Procedures for sale.

##### § 2711.3-1 Competitive bidding.

When public lands are offered through competitive bidding:

## Bureau of Land Management, Interior

## §2711.3-2

(a) The date, time, place, and manner for submitting bids shall be specified in the notice required by §2711.1-2 of this title.

(b) Bids may be made by a principal or a duly qualified agent.

(c) Sealed bids shall be considered only if received at the place of sale prior to the hour fixed in the notice and are made for at least the fair market value. Each bid shall be accompanied by certified check, postal money order, bank draft or cashier's check made payable to the Bureau of Land Management for the amount required in the notice of realty action which shall be not less than 10 percent or more than 30 percent of the amount of the bid, and shall be enclosed in a sealed envelope which shall be marked as prescribed in the notice. If 2 or more envelopes containing valid bids of the same amount are received, the determination of which is to be considered the highest bid shall be by supplemental biddings. The designated high bidders shall be allowed to submit oral or sealed bids as designated by the authorized officer.

(d) The highest qualifying sealed bid received shall be publicly declared by the authorized officer. If the notice published pursuant to §2711.1-2 of this title provides for oral bids, such bids, in increments specified by the authorized officer, shall then be invited. After oral bids, if any, are received, the highest qualifying bid, designated by type, whether sealed or oral, shall be declared by the authorized officer. The person declared to have entered the highest qualifying oral bid shall submit payment by cash, personal check, bank draft, money order, or any combination for not less than one-fifth of the amount of the bid immediately following the close of the sale. The successful bidder, whether such bid is a sealed or oral bid, shall submit the remainder of the full bid price prior to the expiration of 180 days from the date of the sale. Failure to submit the full bid price prior to, but not including the 180th day following the day of the sale, shall result in cancellation of the sale of the specific parcel and the deposit shall be forfeited and disposed of as other receipts of sale. In the event the authorized officer rejects the highest

qualified bid or releases the bidder from it, the authorized officer shall determine whether the public lands shall be withdrawn from the market or be reoffered.

(e) If the public lands are not sold pursuant to the notice issued under §2711.1-2 of this subpart, they may remain available for sale on a continuing basis until sold as specified in the notice.

(f) The acceptance or rejection of any offer to purchase shall be in writing no later than 30 days after receipt of such offer unless the offerer waives his right to a decision within such 30-day period. In case of a tract of land in excess of 2,500 acres, such acceptance or rejection shall not be given until the expiration of 30 days after the end of the notice to the Congress provided for in §2711.1-2(d) of this subpart. Prior to the expiration of such periods the authorized officer may refuse to accept any offer or may withdraw any tract from sale if he determines that:

(1) Consummation of the sale would be inconsistent with the provisions of any existing law; or

(2) Collusive or other activities have hindered or restrained free and open bidding; or

(3) Consummation of the sale would encourage or promote speculation in public lands.

(g) Until the acceptance of the offer and payment of the purchase price, the bidder has no contractual or other rights against the United States, and no action taken shall create any contractual or other obligations of the United States.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29015, July 17, 1984; 49 FR 29795, July 24, 1984]

### §2711.3-2 Modified bidding.

(a) Public lands may be offered for sale utilizing modified competitive bidding procedures when the authorized officer determines it is necessary in order to assure equitable distribution of land among purchasers or to recognize equitable considerations or public policies.

(1) Modified competitive bidding includes, but is not limited to:

(i) Offering to designated bidders the right to meet the highest bid. Refusal

### § 2711.3-3

### 43 CFR Ch. II (10-1-08 Edition)

or failure to meet the highest bid shall constitute a waiver of such bidding provisions; or

(ii) A limitation of persons permitted to bid on a specific tract of land offered for sale; or

(iii) Offering to designated bidders the right of first refusal to purchase the lands at fair market value. Failure to accept an offer to purchase the offered lands within the time specified by the authorized officer shall constitute a waiver of his preference consideration.

(2) Factors that shall be considered in determining when modified competitive bidding procedures shall be used, include but are not limited to: Needs of State and/or local government, adjoining landowners, historical users, and other needs for the tract. A description of the method of modified competitive bidding to be used and a statement indicating the purpose or objective of the bidding procedure selected shall be specified in the notice of realty action required in § 2711.1-2 of this subpart.

(b) Where 2 or more designated bidders exercise preference consideration awarded by the authorized officer in accordance with paragraph (a)(1) of this section, such bidders shall be offered the opportunity to agree upon a division of the lands among themselves. In the absence of a written agreement, the preference right bidders shall be allowed to continue bidding to determine the high bidder.

(c) Where designated bidders fail to exercise the preference consideration offered by the authorized officer in the allowed time, the sale shall proceed using the procedures specified in § 2711.3-1 of this subpart; and

(d) Once the method of modified competitive or noncompetitive sale is determined and such determination has been issued, published and sent in accordance with procedures of this part, payment shall be by the same instruments as authorized in § 2711.3-1(c) of this subpart.

(e) Acceptance or rejection of any offer to purchase shall be in accordance with the procedures set forth in § 2711.3-1 (f) and (g) of this subpart.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29015, July 17, 1984]

### § 2711.3-3 Direct sales.

(a) Direct sales (without competition) may be utilized, when in the opinion of the authorized officer, a competitive sale is not appropriate and the public interest would best be served by a direct sale. Examples include, but are not limited to:

(1) A tract identified for transfer to State or local government or nonprofit organization; or

(2) A tract identified for sale that is an integral part of a project or public importance and speculative bidding would jeopardize a timely completion and economic viability of the project; or

(3) There is a need to recognize an authorized use such as an existing business which could suffer a substantial economic loss if the tract were purchased by other than the authorized user; or

(4) The adjoining ownership pattern and access indicate a direct sale is appropriate; or

(5) A need to resolve inadvertent unauthorized use or occupancy of the lands.

(b) Once the authorized officer has determined that the lands will be offered by direct sale and such determination has been issued, published and sent in accordance with procedures of this part, payment shall be made by the same instruments as authorized in § 2711.3-1(c) of this subpart.

(c) Failure to accept an offer to purchase the offered lands within the time specified by the authorized officer shall constitute a waiver of this preference consideration.

(d) Acceptance or rejection of an offer to purchase the lands shall be in accordance with the procedures set forth in § 2711.3-1 (f) and (g) of this subpart.

[49 FR 29015, July 17, 1984; 49 FR 29796, July 24, 1984]

## Bureau of Land Management, Interior

## § 2720.0-2

### § 2711.4 Compensation for authorized improvements.

#### § 2711.4-1 Grazing improvements.

No public lands in a grazing lease or permit may be conveyed until the provisions of part 4100 of this title concerning compensation for any authorized grazing improvements have been met.

#### § 2711.4-2 Other private improvements.

Where public lands to be sold under this part contain authorized private improvements, other than those identified in § 2711.4-1 of this subpart or those subject to a patent reservation, the owner of such improvements shall be given an opportunity to remove them if such owner has not been declared the purchaser of the lands sold, or the prospective purchaser may compensate the owner of such authorized private improvements and submit proof of compensation to the authorized officer.

### § 2711.5 Conveyance documents.

Patents and other conveyance documents issued under this part shall contain a reservation to the United States of all minerals. Such minerals shall be subject to the right to explore, prospect for, mine, and remove under applicable law and such regulations as the Secretary may prescribe. However, upon the filing of an application as provided in part 2720 of this title, the Secretary may convey the mineral interest if all requirements of the law are met. Where such application has been filed and meets the requirements for conveyance, the authorized officer may withhold issuance of a patent or other document of conveyance on lands sold under this part until processing of the mineral conveyance application is completed, at which time a single patent or document of conveyance for the entire estate or interest of the United States may be issued.

### § 2711.5-2 Terms, covenants, conditions, and reservations.

Patents or other conveyance documents issued under this part may contain such terms, covenants, conditions, and reservations as the authorized officer determines are necessary in the

public interest to insure proper land use and protection of the public interest as authorized by section 208 of the Act.

### § 2711.5-3 Notice of conveyance.

The authorized officer shall immediately notify the Governor and the heads of local government of the issuance of conveyance documents for public lands within their respective jurisdiction.

[45 FR 39418, June 10, 1980, as amended at 49 FR 29016, July 17, 1984]

## PART 2720—CONVEYANCE OF FEDERALLY-OWNED MINERAL INTERESTS

2720.2 Determination that an exploratory program is not required.

2720.3 Action upon determination of the fair market value of the mineral interests.

2720.4 Issuance of document of conveyance.

2720.5 Appeals.

AUTHORITY: 43 U.S.C. 1719 and 1740.

SOURCE: 44 FR 1342, Jan. 4, 1979, unless otherwise noted.

### Subpart 2720—Conveyance of Federally-Owned Mineral Interests

#### § 2720.0-1 Purpose.

The purpose of these regulations is to establish procedures under section 209 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719, for conveyance of mineral interests owned by the United States where the surface is or will be in non-Federal ownership.

#### § 2720.0-2 Objectives.

The objective is to allow consolidation of surface and subsurface or mineral ownership where there are no

### § 2720.0-3

known mineral values or in those instances where the reservation interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than the mineral development.

#### § 2720.0-3 Authority.

(a) Section 209(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719(b), authorizes the Secretary of the Interior to convey mineral interests owned by the United States where the surface is or will be in non-Federal ownership, if certain specific conditions are met.

(b) Section 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1740, authorizes the Secretary of the Interior to promulgate rules and regulations to carry out the purposes of the Act.

#### § 2720.0-5 Definitions.

As used in this subpart, the term:

(a) *Prospective record owner* means a person who has a contract or other agreement to purchase a tract of land that is in non-Federal ownership with a reservation of minerals in the United States, or a person who is purchasing a tract of land under the provisions of the Federal Land Policy and Management Act of 1976 or other laws authorizing the conveyance of Federal lands subject to the reservation of a mineral interest.

(b) *Known mineral values* means mineral rights in lands containing geologic formations that are valuable in the monetary sense for exploring, developing, or producing natural mineral deposits. The presence of such mineral deposits with potential for mineral development may be known because of previous exploration, or may be inferred based on geologic information.

(c) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this part.

(d) *Proof of ownership* means evidence of title acceptable in local realty practice by attorneys and title examiners and may include a current title attorney's opinion, based on a current abstract of title prepared by a bonded

### 43 CFR Ch. II (10-1-08 Edition)

title insurance or title abstract company doing business in the locale where the lands are located.

[44 FR 1342, Jan. 4, 1979, as amended at 51 FR 9657, Mar. 20, 1986; 60 FR 12711, Mar. 8, 1995]

#### § 2720.0-6 Policy.

As required by the Federal Land Policy and Management Act, the Bureau of Land Management may convey a federally owned mineral interest only when the authorized officer determines that it has no known mineral value, or that the mineral reservation is interfering with or precluding appropriate nonmineral development of the lands and that nonmineral development is a more beneficial use than mineral development. Allegation, hypothesis or speculation that such conditions could or may exist at some future time shall not be sufficient basis for conveyance. Failure to establish by convincing factual evidence that the requisite conditions of interference or preclusion presently exist, and that nonmineral development is a more beneficial use, shall result in the rejection of an application.

[51 FR 9657, Mar. 20, 1986, as amended at 60 FR 12711, Mar. 8, 1995]

#### § 2720.0-9 Information collection.

(a) The Office of Management and Budget has approved under 44 U.S.C. 3507 the information collection requirements contained in part 2720 and assigned clearance number 1004-0153. The Bureau of Land Management is collecting the information to permit the authorized officer to determine whether the Bureau of Land Management should dispose of Federally-owned mineral interests. The Bureau of Land Management will use the information collected to make these determinations. A response is required to obtain a benefit.

(b) The Bureau of Land Management estimates the public reporting burden for this information to average 8 hours per response, including the time for reviewing regulations, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of

## Bureau of Land Management, Interior

## § 2720.1-3

this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, D.C. 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0153, Washington, D.C. 20503.

[60 FR 12711, Mar. 8, 1995]

### § 2720.1 Application to purchase federally-owned mineral interests.

#### § 2720.1-1 Filing of application.

(a) Any existing or prospective record owner of the surface of land in which mineral interests are reserved or otherwise owned by the United States may file an application to purchase such mineral interests if—

(1) He has reason to believe that there are no known mineral values in the land, or

(2) The reservation of ownership of the mineral interests in the United States interferes with or precludes appropriate non-mineral development of the land and such development would be a more beneficial use of the land than its mineral development.

(b) Publication in the FEDERAL REGISTER of a notice of the filing of an application under this part shall segregate the mineral interests owned by the United States in the public lands covered by the application to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate either upon issuance of a patent or other document of conveyance to such mineral interests, upon final rejection of the application or 2 years from the date of filing of the application which ever occurs first.

[44 FR 1342, Jan. 4, 1979, as amended at 51 FR 9657, Mar. 20, 1986]

#### § 2720.1-2 Form of application.

(a) An application shall be filed with the proper BLM Office as listed in § 1821.2-1(d) of this title.

(b) No specific form is required.

(c) A non-refundable fee of \$50 shall accompany the application.

(d) Each application shall include:

(1) The name, legal mailing address, and telephone number of the existing

or prospective record owner of the land included in the application;

(2) Proof of ownership of the land included in the application, and in the case of a prospective record owner, a copy of the contract of conveyance or a statement describing the method by which he will become the owner of record;

(3) In the case of non-Federal ownership of the surface, a certified copy of any patent or other instrument conveying the land included in the application and a showing of ownership in the applicant, with supporting survey evidence acceptable to the authorized officer, which may consist of a metes and bounds survey prepared and certified by a civil engineer or land surveyor licensed under the laws of the State in which the lands are located; and

(4) As complete a statement as possible concerning (i) the nature of federally-reserved or owned mineral values in the land, including explanatory information, (ii) the existing and proposed uses of the land, (iii) why the reservation of the mineral interests in the United States is interfering with or precluding appropriate non-mineral development of the land covered by the application (iv) how and why such development would be a more beneficial use of the land than its mineral development, and (v) a showing that the proposed use complies or will comply with State and local zoning and/or planning requirements.

[44 FR 1342, Jan. 4, 1979, as amended at 51 FR 9658, Mar. 20, 1986]

#### § 2720.1-3 Action on application.

(a) Within 90 days of receipt of an application to purchase federally-owned mineral interests, the authorized officer shall, if the application meets the requirements for further processing, determine the amount of deposit required and so inform the applicant.

(b) No application filed under this subpart shall be processed until the applicant has either—

(1) Deposited with the authorized officer an amount of money that the authorized officer estimates is needed to cover administrative costs of processing, including, but not limited to,

costs of conducting an exploratory program, if one is required, to determine the character of the mineral deposits in the land, evaluating the existing data [or the data obtained under an approved exploratory program] to aid in determining the fair market value of the mineral interests to be conveyed, and preparing and issuing the documents of conveyance, or

(2) Has obtained the consent of the authorized officer to conduct an exploratory program, such program to be conducted only under a plan of operations approved by the authorized officer and deposited with the authorized officer an amount of money the authorized officer estimates is needed to cover administrative costs of processing, including, but not limited to, costs of evaluating existing data and data submitted from an approved exploratory program to determine the fair market value of the mineral interests to be conveyed and preparing and issuing the documents of conveyance.

The authorized officer, in reaching a determination as to whether there are any known mineral values in the land and, if so, the estimated costs of an exploratory program, if one is needed, will rely upon reports on minerals prepared by or reviewed and approved by the Bureau of Land Management.

(c) The authorized officer shall inform the applicant of his determination as to the need for an exploratory program, and where appropriate, the estimated cost of such a program. The applicant may request that the exploratory program be arranged by the authorized officer or request the consent of the authorized officer to accomplish any required exploratory program by other means, at his own expense, under a plan of operations approved by the authorized officer and to provide the results to the authorized officer for his use and approval. The applicant shall, within 60 days of receipt of such notice, or any extension thereof, respond to the authorized officer's notice, stating whether he wishes to have the authorized officer arrange to have conducted the required exploratory program or requests the consent of the authorized officer to accomplish any required exploratory program by other means.

Failure to respond to said notice shall void the application.

(d) If the applicant requests that any required exploratory program be arranged by the authorized officer, he shall submit the sum of money required under paragraph (b) of this section and the authorized officer shall have the exploratory program accomplished so as to aid in determining the fair market value of the Federal mineral interests covered by the application.

(e) If the applicant requests the consent of the authorized officer to accomplish any required exploratory program by other means, at his own expense, he shall at the time of making his request for such consent, file a plan of operations to carry out any required exploratory program for approval by the authorized officer. Such plan of operations shall be sufficient to provide the resource and economic data needed to aid in determining the fair market value of the Federal mineral interests to be conveyed. Said resource and economic data shall include, where appropriate, but not be limited to, geologic maps, geologic cross-sections, tables and descriptive information encompassing lithologic, geochemical, and geophysical data, assays of samples, drill logs and outcrop sections, which aid in establishing the location, nature, quantity, and grade, and which aid in determining the fair market value of the Federal mineral interests in the land covered by the application. The plan of operations shall conform to the laws, regulations and ordinances of all governmental bodies having jurisdiction over the lands covered by the application. The authorized officer shall decide within 90 days of receipt of said request whether he shall or shall not give his consent. The authorized officer shall not give his consent if he determines that the plan of operations is not adequate to supply the resource and economic data needed to aid him in determining the fair market value of the Federal mineral interests to be conveyed. If the authorized officer, in his discretion, approves the applicant's plan of operations, the applicant may proceed to execute the plan of operations, subject to the supervision of the authorized officer. If the authorized

## Bureau of Land Management, Interior

## § 2720.3

officer does not give his consent to the applicant's request, the applicant may, within 60 days of such refusal, avail himself of the provisions of paragraph (d) of this section. Failure to deposit the required sum within the 60 day period shall void the application. All resource and economic data obtained from the approved exploratory program shall be supplied the authorized officer. The authorized officer shall supply that data needed for determination of the economic value of mineral resources to the Bureau of Land Management. The authorized officer relying upon those determinations shall determine the fair market value of the Federal mineral interests in the land covered by the application. If the authorized officer determines that the resource and economic data supplied from an approved exploratory program is not adequate to aid in determining the fair market value of the Federal mineral interests to be conveyed, he shall so notify the applicant and state what additional data is needed.

(f) Notwithstanding the provisions of the preceding paragraphs of this section, an application may be rejected without the applicant meeting the requirements of paragraph (b) of this section if the authorized officer determines from an examination of the application or of data readily available to him relating to the land concerned that the application does not meet the requirements of the Act.

[44 FR 1342, Jan. 4, 1979, as amended at 51 FR 9658, Mar. 20, 1986; 60 FR 12711, Mar. 8, 1995]

### **§ 2720.2 Determination that an exploratory program is not required.**

(a) In instances where available data indicate that there are no known mineral values in the land covered by the application, an exploratory program shall not be required.

(b) The authorized officer will not require an exploratory program to ascertain the presence of mineral values where the authorized officer determines that a reasonable person would not make exploration expenditures with expectations of deriving economic gain from the mineral production.

(c) The authorized officer will not require an exploratory program if the authorized officer determines that, for

the mineral interests covered by the application, sufficient information is available to determine their fair market value.

[44 FR 1342, Jan. 4, 1979, as amended at 60 FR 12711, Mar. 8, 1995]

### **§ 2720.3 Action upon determination of the fair market value of the mineral interests.**

(a) Upon the authorized officer's determination that all of the requirements of the Act for conveyance of mineral interests have been met by the applicant and all actions necessary to determine the fair market value of the Federal mineral interests in land covered by the application have been completed, the authorized officer shall notify the applicant in writing of the fair market value of the Federal mineral interests, including the administrative costs involved in development of and issuance of conveyance documents, and give a full and complete statement of the costs incurred in reaching such determination including any sum due the United States or that may be expended from the deposit made by the applicant. If the administrative costs of determining the fair market value of the Federal mineral interests exceed the amount of the deposit required of the applicant under this subpart, he will be informed that he is required to pay the difference between the actual costs and the deposit. If the deposit exceeds the administrative costs of determining the fair market value of the Federal mineral interests, the applicant will be informed that he is entitled to a credit for or a refund of the excess. The notice must require the applicant to pay both the fair market value of the Federal mineral interests and the remaining administrative costs owed within 90 days after the date the authorized officer mails the notice. Failure to pay the required amount within the allotted time shall constitute a withdrawal of the application and the application will be dismissed and the case closed.

(b) The Bureau of Land Management will convey mineral rights on lands for which this part does not require an exploratory program upon payment by the applicant of fair market value for

## § 2720.4

those mineral interests and all administrative costs of processing the application to acquire the mineral rights.

[44 FR 1342, Jan. 4, 1979, as amended at 60 FR 12711, Mar. 8, 1995]

### § 2720.4 Issuance of document of conveyance.

Upon receipt of the payment required by § 2720.3 of this subpart, if any is required, the authorized officer shall issue the necessary document conveying to the applicant the mineral interests of the United States in the land covered by the application.

### § 2720.5 Appeals.

An applicant adversely affected by a decision of the authorized officer made pursuant to the provisions of this subpart shall have a right of appeal pursuant to part 4 of this title. Decisions of the authorized officer under this subpart shall be subject to reversal only if found to be arbitrary, capricious, and abuse of discretion or otherwise not in accordance with law.

SOURCE: 44 FR 43471, July 25, 1979, unless otherwise noted.

#### § 2740.0-1 Purpose.

These regulations provide guidelines and procedures for transfer of certain public lands under the Recreation and Public Purposes Act as amended (43 U.S.C. 869 *et seq.*), to States or their political subdivisions, and to nonprofit corporations and associations, for recreational and public purposes.

#### § 2740.0-2 Objective.

The objective is to meet the needs of certain State and local governmental agencies and other qualified organizations for public lands required for recreational and public purposes.

#### § 2740.0-3 Authority.

(a) The Act of June 14, 1926, as amended (43 U.S.C. 869 *et seq.*), commonly known as the Recreation and Public Purposes Act, authorizes the Secretary of the Interior to lease or convey public lands for recreational and public purposes under specified conditions.

(b) Section 211 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1721), authorizes the Secretary

## Bureau of Land Management, Interior

## § 2740.0-6

of the Interior to convey to States or their political subdivisions unsurveyed islands determined by the Secretary to be public lands of the United States and *omitted lands* under the Recreation and Public Purposes Act without regard to acreage limitations contained in the Act.

(c) Section 3 of the Act of June 14, 1926, as amended by the Recreation and Public Purposes Amendment Act of 1988, authorizes the Secretary of the Interior to convey public lands for the purpose of solid waste disposal or for any other purpose which may result in or include the disposal, placement, or release of any hazardous substance, with special provisions relating to reversion of such lands to the United States.

[44 FR 43471, July 25, 1979, as amended at 57 FR 32732, July 23, 1992]

### § 2740.0-5 Definitions.

As used in this part, the term:

(a) *Act* means the Recreation and Public Purposes Act as amended by section 212 of the Federal Land Policy and Management Act of 1976.

(b) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this part.

(c) *Public lands* means any lands and interest in lands administered by the Bureau of Land Management, except lands located on the Outer Continental Shelf and lands held for the benefit of Indians, Aleuts and Eskimos.

(d) *Public purpose* means for the purpose of providing facilities or services for the benefit of the public in connection with, but not limited to, public health, safety or welfare. Use of lands or facilities for habitation, cultivation, trade or manufacturing is permissible only when necessary for and integral to, i.e., and essential part of, the public purpose.

(e) *Conveyance* means a transfer of legal title. Leases issued pursuant to subpart 2912 of this title are not conveyances.

(f) *Hazardous substance* means any substance designated pursuant to Environmental Protection Agency regulations at 40 CFR part 302.

(g) *Solid waste* means any material as defined under Environmental Protection Agency regulations at 40 CFR part 261.

[44 FR 43471, July 25, 1979, as amended at 50 FR 50300, Dec. 10, 1985; 57 FR 32732, July 23, 1992]

### § 2740.0-6 Policy.

(a) To assure development of public lands in accordance with a development plan and compliance with an approved management plan, the authorized officer may require that public lands first be leased under the provisions of subpart 2912 of this title for a period of time prior to issuance of a patent, except for conveyances under subpart 2743 of this title.

(b) Municipal corporations may not secure public lands under this act which are not within convenient access to the municipality and within the same State as the municipality. Other qualified governmental applicants may not secure public lands outside their political boundaries or other area of jurisdiction.

(c) Where lands are conveyed under the act with a reservation of the mineral estate to the United States, the Bureau of Land Management shall not thereafter convey that mineral estate to the surface owner under the provisions of section 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719).

(d) Lease or conveyance of lands for purposes other than recreational or public purposes is not authorized by the act. Uses which can be more appropriately authorized under other existing authorities shall not be authorized under the act. Approval of leases or conveyances under the act shall not be made unless the public lands shall be used for an established or definitely proposed project. A commitment by lessee(s) or conveyee(s) to a plan of physical development, management and use of the lands shall be required before a lease or conveyance is approved. Use of public lands for nonrecreational or nonpublic purposes, whether by lease or conveyance, may be applied for under sections 203 and 302 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713, 1732) or other applicable authorities.

(e) The Bureau of Land Management shall not exercise the exchange authority of section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) for the purpose of acquiring lands for later conveyance under the act.

(f) The Bureau of Land Management shall not use Federal funds to undertake determinations of the validity of mining claims on public lands for the sole purpose of clearing title so that the lands may be leased or conveyed under the act.

[44 FR 43471, July 25, 1979, as amended at 50 FR 50300, Dec. 10, 1985; 57 FR 32732, July 23, 1992]

**§ 2740.0-7 Cross references.**

(a) Requirements and procedures for conveyance of land under the Recreation and Public Purposes Act are contained in subpart 2741 of this chapter.

(b) Requirements and procedures for leasing of land under the Recreation and Public Purposes Act are contained in subpart 2912 of this title.

(c) Requirements and procedures for conveyance of unsurveyed islands and omitted lands under section 211 of the Federal Land Policy and Management Act are contained in subpart 2742 of this chapter.

(d) Requirements and procedures for conveyance of land under the Recreation and Public Purposes Act for the purpose of solid waste disposal or for any other purpose that the authorized officer determines may result in or include the disposal, placement, or release of any hazardous substance are contained in subpart 2743 of this chapter.

[44 FR 43471, July 25, 1979, as amended at 57 FR 32732, July 23, 1992]

**§ 2740.0-9 Information collection.**

The collection of information contained in part 2740 of Group 2700 has been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0012. This information will be used to determine the suitability of public lands for lease and/or disposal to States or their political subdivisions, and to nonprofit corporations and associations, for recreational and public pur-

poses. Responses are required to obtain benefits in accordance with the Recreation and Public Purposes Act.

Public reporting burden for this information is estimated to average 47 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, should be sent to the Division of Information Resources Management (770), Bureau of Land Management, 1849 C Street NW., Washington, DC 20240; and the Paperwork Reduction Project (1004-0012), Office of Management and Budget, Washington, DC 20503.

[57 FR 32732, July 23, 1992]

**Subpart 2741—Recreation and Public Purposes Act: Requirements**

**§ 2741.1 Lands subject to disposition.**

(a) The act is applicable to any public lands except (1) lands withdrawn or reserved for national forests, national parks and monuments, and national wildlife refuges, (2) Indian lands and lands set aside or held for use by or for the benefit of Indians, Aleuts and Eskimos, and (3) lands which have been acquired for specific purposes.

(b) Revested Oregon and California Railroad grant lands and reconveyed Coos Bay Wagon Road grant lands may only be leased to States and counties and to State and Federal instrumentalities and political subdivisions and to municipal corporations.

(c) Section 211 of the Federal Land Policy and Management Act of 1976 does not apply to public lands within the National Forest System, defined in the Act of August 17, 1974 (16 U.S.C. 1601), the National Park System, the National Wildlife Refuge System and the National Wild and Scenic Rivers System.

[44 FR 43472, July 25, 1979]

**§ 2741.2 Qualified applicants.**

Applications for any recreational or public purpose may be filed by States, Federal and State instrumentalities

## Bureau of Land Management, Interior

## § 2741.5

and political subdivisions, including counties and municipalities, and non-profit associations and nonprofit corporations that, by their articles of incorporation or other authority, are authorized to acquire land.

[44 FR 43472, July 25, 1979]

### § 2741.3 Preapplication consultation.

(a) Potential applicants should contact the appropriate District Office of the Bureau of Land Management well in advance of the anticipated submission of an application. Early consultation is needed to familiarize a potential applicant with management responsibilities and terms and conditions which may be required in a lease or patent.

(b) Any information furnished by the applicant in connection with preapplication activity or use, which he/she requests not be disclosed, shall be protected to the extent consistent with the Freedom of Information Act (5 U.S.C. 552).

(c) Dependent upon the magnitude and/or public interest associated with the proposed use, various investigations, studies, analyses, public meetings and negotiations may be required of the applicant prior to the submission of the application. Where a determination is made that studies and analyses are required, the authorized officer shall inform the potential applicant of these requirements.

(d) The potential applicant may be permitted to go upon the public lands to perform casual acts related to data collection necessary for development of an acceptable plan of development as required in § 2741.4(b) of this title. These casual acts include, but are not limited to:

- (1) Vehicle use on existing roads;
- (2) Sampling;
- (3) Surveys required for siting of structures or other improvements; and
- (4) Other activities which do not unduly disturb surface resources. If, however, the authorized officer determines that appreciable impacts to surface resources may occur, he/she may require the potential applicant to obtain a land use authorization permit with appro-

priate terms and conditions under the provision of part 2920 of this title.

[50 FR 50300, Dec. 10, 1985]

### § 2741.4 Applications.

(a) Applications shall be submitted on forms approved by the Director, Bureau of Land Management.

(b) Each application shall be accompanied by three copies of a statement describing the proposed use of the land. The statement shall show that there is an established or definitely proposed project for such use of the land, present detailed plan and schedule for development of the project and a management plan which includes a description of how any revenues will be used. The provisions of § 1821.2 of this title apply to filings pursuant to this section.

(c) Each application shall be accompanied by a nonrefundable filing fee of \$100. The filing fee shall be required for new applications as well as for applications for change of use or transfer of title filed under § 2741.6 of this title.

[44 FR 43472, July 25, 1979. Redesignated and amended at 50 FR 50300, Dec. 10, 1985]

### § 2741.5 Guidelines for conveyances and leases under the act.

(a) Public lands shall be conveyed or leased under the act only for an established or definitely proposed project for which there is a reasonable timetable of development and satisfactory development and management plans.

(b) No public lands having national significance shall be conveyed pursuant to the act.

(c) No more public lands than are reasonably necessary for the proposed use shall be conveyed pursuant to the act.

(d) For proposals involving over 640 acres, public lands shall not be sold or leased pursuant to this act until:

(1) Comprehensive land use plans and zoning regulations for the area in which the lands are located have been adopted by the appropriate State or local authorities.

(2) The authorized officer has held at least one public meeting on the proposal.

(e) Applications shall not be approved unless and until it has been determined that disposal under the act would serve

## § 2741.6

## 43 CFR Ch. II (10–1–08 Edition)

the national interest following the planning requirements of section 202 of the Federal Land Policy and Management Act (43 U.S.C. 1712).

(f) Public lands may be determined to be suitable for lease or sale under the act by the authorized officer on his own motion as a result of demonstrated public needs for public lands for recreational or public purposes during the planning process described in section 202 of the Federal Land Policy and Management Act.

(g) Lands under the jurisdiction of another agency shall not be determined to be suitable for lease or sale without that agency's approval.

(h)(1) A notice of realty action which shall serve as a classification of public lands as suitable or unsuitable for conveyance or lease under the act shall be issued, published and sent to parties of interest by the authorized officer not less than 60 days prior to the proposed effective date of the classification action. Notices specifying public lands classified as suitable shall include: the use proposed; whether the lands are to be conveyed or leased; and the terms, covenants, conditions and reservations which shall be included in the conveyance or lease document. The notice shall provide at least 45 days from the date of issuance for submission of public comments.

(2) If the notice of realty action states that the lands are classified as suitable for conveyance or lease under the act, it shall segregate the public lands described in the notice from appropriation under any other public land law, including locations under the mining laws, except as provided in the notice or any amendments or revisions to the notice. If, after 18 months following the issuance of the notice, an application has not been filed for the purpose for which the public lands have been classified, the segregative effect of the classification shall automatically expire and the public lands classified in the notice shall return to their former status without further action by the authorized officer.

(3) The notice of realty action shall be published once in the FEDERAL REGISTER and once a week for 3 weeks thereafter in a newspaper of general

circulation in the vicinity of the public lands covered by the notice.

(4) The notice published under § 1610.5-5 of this title, if designated in the notice, shall serve as the notice of realty action required by this section and shall segregate the public lands as stated in the notice. Any such notice given under § 1610.5-5 of this title shall be published and distributed under the provisions of this section.

(i) The Act shall not be used to provide sites for the disposal of permanent or long-term hazardous wastes.

[44 FR 43472, July 25, 1979. Redesignated at 51 FR 50300, Dec. 10, 1985, and amended at 50 FR 50301, Dec. 10, 1985; 51 FR 1795, Jan. 15, 1986; 57 FR 32733, July 23, 1992]

### § 2741.6 Applications for transfer or change of use.

(a) Applications under the act for permission to add to or change the use specified in a patent or applications to transfer title to a third party shall be filed as prescribed in § 2741.4 of this title.

(b) Applications for transfer of title are subject to the acreage limitations as prescribed in § 2741.7(a) of this title.

(c) Prior to approval of an application filed under this section, the public lands may be reappraised in accordance with § 2741.8 of this title and the beneficiary required to make such payments as are found justified by the reappraisal.

[44 FR 43472, July 25, 1979. Redesignated at 51 FR 50300, Dec. 10, 1985, and amended at 50 FR 50301, Dec. 10, 1985]

### § 2741.7 Acreage limitations and general conditions.

(a) Conveyances under the Act to any applicant in any one calendar year shall be limited as follows:

(1) Any State or State agency having jurisdiction over the State park system may acquire not more than 6,400 acres for recreational purposes and such additional acreage as may be needed for small roadside parks and rest sites of 10 acres or less each.

(2) Any State or agency or instrumentality of such State may acquire not more than 640 acres for each of its programs involving public purposes other than recreation.

## Bureau of Land Management, Interior

## § 2741.9

(3) Any political subdivision of a State may acquire for recreational purposes not more than 6,400 acres, and for public purposes other than recreation an additional 640 acres. In addition, any political subdivision of a State may acquire such additional acreage as may be needed for roadside parks and rest sites of not more than 10 acres each.

(4) If a State or political subdivision has failed in any one calendar year to receive 6,400 acres (not counting public lands for small roadside parks and rest sites) and had an application on file on the last day of that year, the State, State park agency or political subdivision may receive additional public lands to the extent that the conveyances would not have exceeded the limitations for that year.

(5) Any nonprofit corporation or nonprofit association may acquire for recreational purposes not more than 640 acres and for public purposes other than recreation an additional 640 acres.

(6) Acreage limitations described in this section do not apply to conveyances made under section 211 of the Federal Land Policy and Management Act of 1976.

(b) Conveyances within any State shall not exceed 25,600 acres for recreational purposes per calendar year, except that should any State park agency or political subdivision fail in one calendar year to receive 6,400 acres other than small roadside parks and rest sites, additional conveyances may be made thereafter to that State park agency or political subdivision pursuant to any application on file on the last day of said year to the extent that the conveyances would not have exceeded the limitations of said year.

(c) No patents shall be issued under the act unless and until the public lands are officially surveyed. This requirement does not apply to islands patented under the authority of section 211(a) of the Federal Land Policy and Management Act of 1976.

[44 FR 43472, July 25, 1979. Redesignated at 51 FR 50300, Dec. 10, 1985, and amended at 50 FR 50301, Dec. 10, 1985; 65 FR 70112, Nov. 21, 2000]

### § 2741.8 Price.

(a) Conveyances for recreational or historic-monument purposes to a

State, county, or other State or Federal instrumentality or political subdivision shall be issued without monetary consideration.

(b) All other conveyances shall be made at prices established by the Secretary of the Interior through appraisal or otherwise, taking into consideration the purpose for which the land is to be used.

(c) Patents shall be issued only after payment of the full purchase price by a patent applicant.

[44 FR 43472, July 25, 1979. Redesignated at 50 FR 50300, Dec. 10, 1985]

### § 2741.9 Patent provisions.

(a) All patents under the act shall provide that title shall revert upon a finding, after notice and opportunity for a hearing, that, without the approval of the authorized officer:

(1) The patentee or its approved successor attempts to transfer title to or control over the lands to another;

(2) The lands have been devoted to a use other than that for which the lands were conveyed;

(3) The lands have not been used for the purpose for which they were conveyed for a 5-year period; or

(4) The patentee has failed to follow the approved development plan or management plan.

(b) Patents shall also provide that the Secretary of the Interior may take action to revert title in the United States if the patentee directly or indirectly permits his agents, employees, contractors, or subcontractors (including without limitation lessees, sublessees, and permittees) to prohibit or restrict the use of any part of the patented lands or any of the facilities thereon by any person because of such person's race, creed, color, sex or national origin.

[44 FR 43472, July 25, 1979. Redesignated at 50 FR 50300, Dec. 10, 1985]

## Subpart 2742—Recreation and Public Purposes Act: Omitted Lands and Unsurveyed Islands

SOURCE: 44 FR 41794, July 18, 1979, unless otherwise noted. Redesignated at 50 FR 50301, Dec. 10, 1985.

**§ 2742.1****§ 2742.1 Lands subject to disposition.**

Omitted lands and unsurveyed islands may be conveyed to States and their local political subdivisions under the provisions of section 211 of the Federal Land Policy and Management Act (43 U.S.C. 1721).

[50 FR 50301, Dec. 10, 1985]

**§ 2742.2 Qualifications of applicants.**

States and their political subdivisions are qualified applicants.

**§ 2742.3 Survey requirement.**

(a) Islands. (1) Survey is not necessary. However, unsurveyed islands shall be determined by the Secretary to be public lands of the United States.

(2) Islands shall be surveyed at the request of the applicant, as provided in part 9185 of this chapter.

(b) Determination as to whether lands, other than islands, are public lands of the United States erroneously or fraudulently omitted from the original surveys shall be by survey. Surveys shall be in accordance with the requirements of part 9185 of this title.

**§ 2742.4 Conveyance limitations.**

(a) No conveyances shall be made under this section until the relevant State government, local government, and areawide planning agency have notified the Secretary as to the consistency of such conveyance with applicable State and local government land use plans and programs.

(b) At least 60 days prior to offering for sale or otherwise conveying public lands under this section, the Secretary shall notify the Governor of the State within which such lands are located and the head of the governing body of any political subdivision of the State having zoning or other land-use regulatory jurisdiction in the geographical area within which such lands are located in order to afford the appropriate body the opportunity to zone or otherwise regulate change or amend existing zoning or other regulations concerning the use of such lands prior to such conveyance.

(c) Conveyances under this section may be made without regard to acreage limitations contained in the Recreation and Public Purposes Act.

**§ 2742.5 Consistency with other laws.**

The provision of the Recreation and Public Purposes Act prohibiting disposal for any use authorized under any other law does not apply to conveyances under this subpart.

### **Subpart 2743—Recreation and Public Purposes Act: Solid Waste Disposal**

SOURCE: 57 FR 32733, July 23, 1992, unless otherwise noted.

**§ 2743.1 Applicable regulations.**

Unless the requested action falls within the provision of § 2743.2(b), applications filed or actions taken under this subpart shall be subject to all the requirements set forth in subpart 2741 of this chapter except §§ 2741.6 and 2741.9.

**§ 2743.2 New disposal sites.**

(a) Public lands may be conveyed for the purpose of solid waste disposal or for any other purpose that the authorized officer determines may include the disposal, placement, or release of any hazardous substance subject to the following provisions:

(1) The applicant shall furnish a copy of the application, plan of development, and any other information concerning the proposed use to all Federal and State agencies with responsibility for enforcement of laws applicable to lands used for the disposal, placement, or release of solid waste or any hazardous substance. The applicant shall include proof of this notification in the application filed with the authorized officer;

(2) The proposed use covered by an application shall be consistent with the land use planning provisions contained in part 1600 of this title, and in compliance with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4371) and any other Federal and State laws and regulations applicable to the disposal of solid wastes and hazardous substances;

(3) Conveyance shall be made only of lands classified for sale pursuant to the procedures and criteria in part 2400 of this title;

## Bureau of Land Management, Interior

## § 2743.3

(4) The applicant shall warrant that it will indemnify and hold the United States harmless against any liability that may arise out of any violation of Federal or State law in connection with the use of the lands;

(5) The authorized officer shall investigate the lands covered by an application to determine whether or not any hazardous substance is present. The authorized officer will require full reimbursement from the applicant for the costs of the investigation. The authorized officer may, in his or her discretion, make an exception to the requirement of full reimbursement if the applicant demonstrates that such costs would result in undue hardship. The investigation shall include but not be limited to:

(i) A review of available records related to the history and use of the land;

(ii) A visual inspection of the property; and

(iii) An appropriate analysis of the soil, water and air associated with the area;

(6) The investigation conducted under paragraph (a)(5) of this section must disclose no hazardous substances and there is a reasonable basis to believe that no such substances are present; and

(7) The applicant shall present certification from the State agency or agencies responsible for environmental protection and enforcement that they have reviewed all records, inspection reports, studies, and other materials produced or considered in the course of the investigation and that based on these documents, such agency or agencies agree with the authorized officer that no hazardous substances are present on the property.

(b) The authorized officer shall not convey public lands covered by an application if hazardous substances are known to be present.

(c) The authorized officer shall retain as permanent records all environmental analyses and appropriate documentation, investigation reports, State certifications, and other materials produced or considered in determining the suitability of public lands for conveyance under this section.

### § 2743.2-1 Patent provisions for new disposal sites.

For new disposal sites, each patent will provide that:

(a) The patentee shall comply with all Federal and State laws applicable to the disposal, placement, or release of hazardous substances;

(b) The patentee shall indemnify and hold harmless the United States against any legal liability or future costs that may arise out of any violation of such laws;

(c) Except as provided in paragraph (e) of this section, the land conveyed under § 2743.2 of this part shall revert to the United States unless substantially used in accordance with an approved plan and schedule of development on or before the date five years after the date of conveyance;

(d) If, at any time, the patentee transfers to another party ownership of any portion of the land not used for the purpose(s) specified in the application and the approved plan of development, the patentee shall pay the Bureau of Land Management the fair market value, as determined by the authorized officer, of the transferred portion as of the date of transfer, including the value of any improvements thereon; and

(e) No portion of the land covered by such patent shall under any circumstance revert to the United States if such portion has been used for solid waste disposal or for any other purpose that the authorized officer determines may result in the disposal, placement, or release of any hazardous substance.

### § 2743.3 Leased disposal sites.

(a) Upon request by or with the concurrence of the lessee, and only with the express approval of the Director, Bureau of Land Management, the authorized officer may issue a patent for those lands covered by a lease, or portion thereof, issued on or before November 9, 1988, that have been or will be used, as specified in the plan of development, for solid waste disposal or for any other purpose that the authorized officer determines may result in or include the disposal, placement, or release of any hazardous substance, subject to the following provisions:

### § 2743.3

### 43 CFR Ch. II (10–1–08 Edition)

(1) All conveyances shall be consistent with the land use planning provisions contained in part 1600 of this title, and in compliance with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4371) and any other Federal and State laws and regulations applicable to the disposal of solid wastes and hazardous substances;

(2) Conveyances shall be made only of lands classified for sale pursuant to the procedures and criteria in part 2400 of this title.

(3) The authorized officer shall investigate the lands to be included in the patent to determine whether they are contaminated with hazardous substances. The authorized officer will require full reimbursement from the lessee for the costs of the investigation. The authorized officer may, in his or her discretion, make an exception to the requirement of full reimbursement if the applicant demonstrates that such costs would result in undue hardship. The investigation shall include but not be limited to the following:

(i) A review of all records and inspection reports on file with the Bureau of Land Management, State, and local agencies relating to the history and use of the lands covered by a lease and any violations and enforcement problems that occurred during the term of the lease;

(ii) Consultation with the lessee and users of the landfill concerning site management and a review of all reports and logs pertaining to the type and amount of solid waste deposited at the landfill;

(iii) A visual inspection of the leased site; and

(iv) An appropriate analysis of the soil, water and air associated with the area;

(4) The investigation conducted under paragraph (a)(3) of this section must establish that the involved lands contain only those quantities and types of hazardous substances consistent with household wastes, or wastes from conditionally exempt small quantity generators (40 CFR 261.5), and there is a reasonable basis to believe that the contents of the leased disposal site do not threaten human health and the environment; and

(5) The applicant shall present certification from the State agency or agencies responsible for environmental protection and enforcement that they have reviewed all records, inspection reports, studies, and other materials produced or considered in the course of the investigation and that based on these documents, such agency or agencies agree with the authorized officer that the contents of the leased disposal site in question do not threaten human health and the environment.

(b) The authorized officer shall not convey lands identified in paragraph (a) of this section if the investigation concludes that the lands contain hazardous substances at concentrations that threaten human health and the environment.

(c) The authorized officer shall retain as permanent records all environmental analyses and appropriate documentation, investigation reports, State certifications, and other materials produced or considered in determining the suitability of public lands for conveyance under this section.

Effective Date Note: At 73 FR 50201, Aug. 26, 2008, in § 2743.3, the introductory text of paragraph (a) was revised, effective Oct. 27, 2008. For the convenience of the user, the revised text is set forth below:

#### § 2743.3 Leased disposal sites.

(a) Upon request by or with the concurrence of the lessee, the authorized officer may issue a patent for those lands covered by a lease, or portion thereof, issued on or before November 9, 1988, that have been or will be used, as specified in the plan of development, for solid waste disposal or for any other purpose that the authorized officer determines may result in or include the disposal, placement, or release of any hazardous substance, subject to the following provision:

\* \* \* \* \*

#### § 2743.3–1 Patent provisions for leased disposal sites.

Each patent for a leased disposal site will provide that:

(a) The patentee shall comply with all Federal and State laws applicable

## Bureau of Land Management, Interior

## Pt. 2800

to the disposal, placement, or release of hazardous substances;

(b) The patentee shall indemnify and hold harmless the United States against any legal liability or future costs that may arise out of any violation of such laws; and

(c) No portion of the land covered by such patent shall under any circumstance revert to the United States.

### § 2743.4 Patented disposal sites.

(a) Upon request by or with the concurrence of the patentee, the authorized officer may renounce the reversionary interests of the United States in land conveyed on or before November 9, 1988, and rescind any portion of any patent or other instrument of conveyance inconsistent with the renunciation upon a determination that such land has been used for solid waste disposal or for any other purpose that the authorized officer determines may result in the disposal, placement, or release of any hazardous substance.

(b) If the patentee elects not to accept the renunciation of the reversionary interests, the provisions contained in §§ 2741.6 and 2741.9 shall continue to apply.

#### Subpart 2802—Lands Available for FLPMA Grants

2802.10 What lands are available for grants?

2802.11 How does BLM designate corridors?

#### Subpart 2803—Qualifications for Holding FLPMA Grants

2803.10 Who may hold a grant?

2803.11 Can another person act on my behalf?

2803.12 What happens to my application or grant if I die?

#### Subpart 2804—Applying for FLPMA Grants

2804.10 What should I do before I file my application?

2804.11 Where do I file my grant application?

2804.12 What information must I submit in my application?

2804.13 Will BLM keep my information confidential?

2804.14 What is the processing fee for a grant application?

2804.15 When does BLM reevaluate the processing and monitoring fees?

2804.16 Who is exempt from paying processing and monitoring fees?

2804.17 What is a Master Agreement (Processing Category 5) and what information must I provide to BLM when I request one?

2804.18 What provisions do Master Agreements contain and what are their limitations?

2804.19 How will BLM process my Processing Category 6 application?

2804.20 How does BLM determine reasonable costs for Processing Category 6 or Monitoring Category 6 applications?

2804.21 What other factors will BLM consider in determining processing and monitoring fees?

2804.22 How will the availability of funds affect the timing of BLM's processing?

2804.23 What if there are two or more competing applications for the same facility or system?

2804.24 Do I always have to submit an application for a grant using Standard Form 299?

2804.25 How will BLM process my application?

2804.26 Under what circumstances may BLM deny my application?

2804.27 What fees do I owe if BLM denies my application or if I withdraw my application?

2804.28 What processing fees must I pay for a BLM grant application associated with Federal Energy Regulatory Commission (FERC) licenses or re-license applications under part I of the Federal Power Act (FPA)?

2804.29 What activities may I conduct on the lands covered by the proposed right-of-way while BLM is processing my application?

#### Subpart 2805—Terms and Conditions of Grants

2805.10 How will I know whether BLM has approved or denied my application?

## **Pt. 2800**

- 2805.11 What does a grant contain?
- 2805.12 What terms and conditions must I comply with?
- 2805.13 When is a grant effective?
- 2805.14 What rights does a grant convey?
- 2805.15 What rights does the United States retain?
- 2805.16 If I hold a grant, what monitoring fees must I pay?
- 2805.17 When do I pay monitoring fees?

### **Subpart 2806—Rents**

#### **GENERAL PROVISIONS**

- 2806.10 What rent must I pay for my grant?
- 2806.11 How will BLM charge me rent?
- 2806.12 When do I pay rent?
- 2806.13 What happens if I pay the rent late?
- 2806.14 Under what circumstances am I exempt from paying rent?
- 2806.15 Under what circumstances may BLM waive or reduce my rent?
- 2806.16 When must I make estimated rent payments to BLM?

#### **LINEAR RIGHTS-OF-WAY**

- 2806.20 What is the rent for a linear right-of-way?
- 2806.21 When and how does the linear rent schedule change?
- 2806.22 How will BLM calculate my rent for linear rights-of-way the schedule covers?
- 2806.23 How must I make rental payments for a linear grant?

#### **COMMUNICATION SITE RIGHTS-OF-WAY**

- 2806.30 What are the rents for communication site rights-of-way?
- 2806.31 How will BLM calculate rent for a right-of-way for communication uses in the schedule?
- 2806.32 How does BLM determine the population strata served?
- 2806.33 How will BLM calculate the rent for a grant or lease authorizing a single use communication facility?
- 2806.34 How will BLM calculate the rent for a grant or lease authorizing a multiple-use communication facility?
- 2806.35 How will BLM calculate rent for private mobile radio service (PMRS), internal microwave, and 'other' category uses?
- 2806.36 If I am a tenant or customer in a facility, must I have my own grant or lease and if so, how will this affect my rent?
- 2806.37 How will BLM calculate rent for a grant or lease involving an entity with a single use (holder or tenant) having equipment or occupying space in multiple BLM-authorized facilities to support that single use?
- 2806.38 Can I combine multiple grants or leases for facilities located on one site into a single grant or lease?

## **43 CFR Ch. II (10–1–08 Edition)**

- 2806.39 How will BLM calculate rent for a lease for a facility manager's use?
- 2806.40 How will BLM calculate rent for a grant or lease for ancillary communication uses associated with communication uses on the rent schedule?
- 2806.41 How will BLM calculate rent for communication facilities ancillary to a linear grant or other use authorization?
- 2806.42 How will BLM calculate rent for a grant or lease authorizing a communication use within a federally-owned communication facility?
- 2806.43 How does BLM calculate rent for passive reflectors and local exchange networks?
- 2806.44 How will BLM calculate rent for a facility owner's or facility manager's grant or lease which authorizes communication uses subject to the communication use rent schedule and communication uses whose rent BLM determines by other means?

#### **OTHER RIGHTS-OF-WAY**

- 2806.50 How Will BLM Determine the Rent for a Grant When Neither the Linear Rent Schedule at §2806.20 nor the communication use rent schedule at §2806.30 applies?

### **Subpart 2807—Grant Administration and Operation**

- 2807.10 When can I start activities under my grant?
- 2807.11 When must I contact BLM during operations?
- 2807.12 If I hold a grant, for what am I liable?
- 2807.13 As grant holders, what liabilities do state, tribal, and local governments have?
- 2807.14 How will BLM notify me if someone else wants a grant for land subject to my grant or near or adjacent to it?
- 2807.15 How is grant administration affected if the land my grant encumbers is transferred to another Federal agency or out of Federal ownership?
- 2807.16 Under what conditions may BLM order an immediate temporary suspension of my activities?
- 2807.17 Under what conditions may BLM suspend or terminate my grant?
- 2807.18 How will I know that BLM intends to suspend or terminate my grant?
- 2807.19 When my grant terminates, what happens to any facilities on it?
- 2807.20 When must I amend my application, seek an amendment of my grant, or obtain a new grant?
- 2807.21 May I assign my grant?
- 2807.22 How do I renew my grant?

## Bureau of Land Management, Interior

## § 2801.5

### Subpart 2808—Trespass

- 2808.10 What is trespass?  
2808.11 What will BLM do if it determines that I am in trespass?  
2808.12 May I receive a grant if I am or have been in trespass?

### Subpart 2809—Grants for Federal Agencies

- 2809.10 Do the regulations in this part apply to Federal agencies?

AUTHORITY: 43 U.S.C. 1733, 1740, 1763, and 1764.

SOURCE: 70 FR 21058, Apr. 22, 2005, unless otherwise noted.

### Subpart 2801—General information

#### § 2801.2 What is the objective of BLM's right-of-way program?

It is BLM's objective to grant rights-of-way under the regulations in this part to any qualified individual, business, or government entity and to direct and control the use of rights-of-way on public lands in a manner that:

- (a) Protects the natural resources associated with public lands and adjacent lands, whether private or administered by a government entity;
- (b) Prevents unnecessary or undue degradation to public lands;
- (c) Promotes the use of rights-of-way in common considering engineering and technological compatibility, national security, and land use plans; and
- (d) Coordinates, to the fullest extent possible, all BLM actions under the regulations in this part with state and local governments, interested individuals, and appropriate quasi-public entities.

#### § 2801.5 What acronyms and terms are used in the regulations in this part?

- (a) *Acronyms.* As used in this part:  
*ALJ* means Administrative Law Judge.

*BLM* means the Bureau of Land Management.

*CERCLA* means the Comprehensive Environmental Response Compensation and Liability Act (42 U.S.C. 9601 *et seq.*).

*EA* means environmental assessment.  
*EIS* means environmental impact statement.

*IBLA* means the Department of the Interior, Board of Land Appeals.

*IPD-GDP* means the Implicit Price Deflator, Gross Domestic Product, as published in the most recent edition of the Survey of Current Business of the Department of Commerce, Bureau of Economic Analysis.

*NEPA* means the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

*RMA* means the Rationally Metro Area Population Ranking as published in the most recent edition of the Rand McNally Commercial Atlas and Marketing Guide.

- (b) *Terms.* As used in this part, the term:

*Act* means the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*).

*Actual costs* means the financial measure of resources the Federal government expends or uses in processing a right-of-way application or in monitoring the construction, operation, and termination of a facility authorized by a grant or permit. Actual costs includes both direct and indirect costs, exclusive of management overhead costs.

*Base rent* means the dollar amount required from a grant or lease holder on BLM managed lands based on the communication use with the highest value in the associated facility or facilities, as calculated according to the communication use rent schedule. If a facility manager's or facility owner's scheduled rent is equal to the highest rent charged a tenant in the facility or facilities, then the facility manager's or facility owner's use determines the dollar amount of the base rent. Otherwise, the facility owner's, facility manager's, customer's, or tenant's use with the highest value, and which is not otherwise excluded from rent, determines the base rent.

*Casual use* means activities ordinarily resulting in no or negligible disturbance of the public lands, resources, or improvements. *Examples of casual use include:* Surveying, marking routes, and collecting data to use to prepare grant applications.

*Commercial purpose or activity* refers to the circumstance where a holder attempts to produce a profit by allowing

the use of its facilities by an additional party. BLM may assess an appropriate rent for such commercial activities. The holder's use may not otherwise be subject to rent charges under BLM's rental provisions.

*Communication use rent schedule* is a schedule of rents for the following types of communication uses, including related technologies, located in a facility associated with a particular grant or lease. All use categories include ancillary communications equipment, such as internal microwave or internal one-or two-way radio, that are directly related to operating, maintaining, and monitoring the primary uses listed below. The Federal Communications Commission (FCC) may or may not license the primary uses. The type of use and community served, identified on an FCC license, if one has been issued, do not supersede either the definitions in this subpart or the procedures in § 2806.30 of this part for calculating rent for communication facilities and uses located on public land:

(1) *Television broadcast* means a use that broadcasts UHF and VHF audio and video signals for general public reception. This category does not include low-power television (LPTV) or rebroadcast devices, such as translators, or transmitting devices, such as microwave relays serving broadcast translators;

(2) *AM and FM radio broadcast* means a use that broadcasts amplitude modulation (AM) or frequency modulation (FM) audio signals for general public reception. This category does not include low-power FM radio; rebroadcast devices, such as translators; or boosters or microwave relays serving broadcast translators;

(3) *Cable television* means a use that transmits video programming to multiple subscribers in a community over a wired or wireless network. This category does not include rebroadcast devices that retransmit television signals of one or more television broadcast stations, or personal or internal antenna systems, such as private systems serving hotels and residences;

(4) *Broadcast translator, low-power television, and low-power FM radio* means a use of translators, LPTV, or low-power FM radio (LPFM). Translators receive

a television or FM radio broadcast signal and rebroadcast it on a different channel or frequency for local reception. In some cases the translator relays the true signal to an amplifier or another translator. LPTV and LPFM are broadcast translators that originate programming. This category also includes translators associated with public telecommunication services;

(5) *Commercial mobile radio service (CMRS)/facility manager* means commercial mobile radio uses that provide mobile communication service to individual customers. *Examples of CMRS include:* Community repeaters, trunked radio (specialized mobile radio), two-way radio voice dispatch, public switched network (telephone/data) interconnect service, microwave communications link equipment, and other two-way voice and paging services. "Facility Managers" are grant or lease holders that lease building, tower, and related facility space to a variety of tenants and customers as part of the holder's business enterprise, but do not own or operate communication equipment in the facility for their own uses;

(6) *Cellular telephone* means a system of mobile or fixed communication devices that use a combination of radio and telephone switching technology and provide public switched network services to fixed or mobile users, or both, within a defined geographic area. The system consists of one or more cell sites containing transmitting and receiving antennas, cellular base station radio, telephone equipment, or microwave communications link equipment. *Examples of cellular telephone include:* Personal Communication Service, Enhanced Specialized Mobile Radio, Improved Mobile Telephone Service, Air-to-Ground, Offshore Radio Telephone Service, Cell Site Extenders, and Local Multipoint Distribution Service;

(7) *Private mobile radio service (PMRS)* means uses supporting private mobile radio systems primarily for a single entity for mobile internal communications. PMRS service is not sold and is exclusively limited to the user in support of business, community activities, or other organizational communication needs. *Examples of PMRS include:* Private local radio dispatch, private paging services, and ancillary microwave

communications equipment for controlling mobile facilities;

(8) *Microwave* means communication uses that:

(i) Provide long-line intrastate and interstate public telephone, television, and data transmissions; or

(ii) Support the primary business of pipeline and power companies, railroads, land resource management companies, or wireless internet service provider (ISP) companies; and

(9) *Other communication uses* means private communication uses, such as amateur radio, personal/private receive-only antennas, natural resource and environmental monitoring equipment, and other small, low-power devices used to monitor or control remote activities;

*Customer* means an occupant who is paying a facility manager, facility owner, or tenant for using all or any part of the space in the facility, or for communication services, and is not selling communication services or broadcasting to others. We consider persons or entities benefitting from private or internal communication uses located in a holder's facility as customers for purposes of calculating rent. Customer uses are not included in calculating the amount of rent owed by a facility owner, facility manager, or tenant, except as noted in §§2806.34(b)(4) and 2806.42 of this part. *Examples of customers include:* Users of PMRS, users in the microwave category when the microwave use is limited to internal communications, and all users in the category of "Other communication uses" (see paragraph (a) of the definition of Communication Use Rent Schedule in this section).

*Designated right-of-way corridor* means a parcel of land with specific boundaries identified by law, Secretarial order, the land-use planning process, or other management decision, as being a preferred location for existing and future rights-of-way and facilities. The corridor may be suitable to accommodate more than one type of right-of-way use or facility or one or more right-of-way uses or facilities which are similar, identical, or compatible.

*Discharge* has the meaning found at 33 U.S.C. 1321(a)(2) of the Clean Water Act.

*Facility* means an improvement or structure, whether existing or planned, that is or would be owned and controlled by the grant or lease holder within a right-of-way. For purposes of communication site rights-of-way or uses, facility means the building, tower, and related incidental structures or improvements authorized under the terms of the grant or lease.

*Facility manager* means a person or entity that leases space in a facility to communication users and:

(1) Holds a communication use grant or lease;

(2) Owns a communications facility on lands covered by that grant or lease; and

(3) Does not own or operate communications equipment in the facility for personal or commercial purposes.

*Facility owner* means a person or entity that may or may not lease space in a facility to communication users and:

(1) Holds a communication use grant or lease;

(2) Owns a communications facility on lands covered by that grant or lease; and

(3) Owns and operates his or her own communications equipment in the facility for personal or commercial purposes.

*Grant* means any authorization or instrument (e.g., easement, lease, license, or permit) BLM issues under Title V of the Federal Land Policy and Management Act, 43 U.S.C. 1761 *et seq.*, and those authorizations and instruments BLM and its predecessors issued for like purposes before October 21, 1976, under then existing statutory authority. It does not include authorizations issued under the Mineral Leasing Act (30 U.S.C. 185).

*Hazardous material* means:

(1) Any substance or material defined as hazardous, a pollutant, or a contaminant under CERCLA at 42 U.S.C. 9601(14) and (33);

(2) Any regulated substance contained in or released from underground storage tanks, as defined by the Resource Conservation and Recovery Act at 42 U.S.C. 6991;

(3) Oil, as defined by the Clean Water Act at 33 U.S.C. 1321(a) and the Oil Pollution Act at 33 U.S.C. 2701(23); or

(4) Other substances applicable Federal, state, tribal, or local law define and regulate as “hazardous.”

*Holder* means any entity with a BLM right-of-way authorization.

*Management overhead costs* means Federal expenditures associated with BLM’s directorate, including all BLM State Directors and the entire Washington Office staff, except where a State Director or Washington Office staff member is required to perform work on a specific right-of-way case.

*Monetary value of the rights and privileges you seek* means the objective value of the right-of-way or what the right-of-way grant is worth in financial terms to the applicant.

*Monitoring* means those actions the Federal government performs to ensure compliance with the terms, conditions, and stipulations of a grant.

(1) For Monitoring Categories 1 through 4, the actions include inspecting construction, operation, maintenance, and termination of permanent or temporary facilities and protection and rehabilitation activities until the holder completes rehabilitation of the right-of-way and BLM approves it;

(2) For Monitoring Category 5 (Master Agreements), those actions agreed to in the Master Agreement; and

(3) For Monitoring Category 6, those actions agreed to between BLM and the applicant before BLM issues the grant.

*Public lands* means any land and interest in land owned by the United States within the several states and administered by the Secretary of the Interior through BLM without regard to how the United States acquired ownership, except lands:

(1) Located on the Outer Continental Shelf; and

(2) Held for the benefit of Indians, Aleuts, and Eskimos.

*Reasonable* costs has the meaning found at section 304(b) of the Act.

*Release* has the meaning found at 42 U.S.C. 9601(22) of CERCLA.

*Right-of-way* means the public lands BLM authorizes a holder to use or occupy under a grant.

*Site* means an area, such as a mountaintop, where a holder locates one or more communication or other right-of-way facilities.

*Substantial deviation* means a change in the authorized location or use which requires:

(1) Construction or use outside the boundaries of the right-of-way; or

(2) Any change from, or modification of, the authorized use. *Examples of substantial deviation include:* Adding equipment, overhead or underground lines, pipelines, structures, or other facilities not included in the original grant.

*Tenant* means an occupant who is paying a facility manager, facility owner, or other entity for occupying and using all or any part of a facility. A tenant operates communication equipment in the facility for profit by broadcasting to others or selling communication services. For purposes of calculating the amount of rent that BLM charges, a tenant’s use does not include:

(1) Private mobile radio or internal microwave use that is not being sold; or

(2) A use in the category of “Other Communication Uses” (see paragraph (a) of the definition of Communication Use Rent Schedule in this section).

*Third party* means any person or entity other than BLM, the applicant, or the holder of a right-of-way authorization.

*Tramway* means a system for carrying passengers, logs, or other material using traveling carriages or cars suspended from an overhead cable or cables supported by a series of towers, hangers, tailhold anchors, guyline trees, etc.

*Transportation and utility corridor* means a parcel of land, without fixed limits or boundaries, that holders use as the location for one or more transportation or utility rights-of-way.

*Zone* means one of eight geographic groupings necessary for linear right-of-way rent assessment purposes, covering all lands in the contiguous United States.

#### § 2801.6 Scope.

(a) *What do these regulations apply to?* The regulations in this part apply to:

(1) Grants for necessary transportation or other systems and facilities which are in the public interest and which require the use of public lands for the purposes identified in 43 U.S.C.

## Bureau of Land Management, Interior

## § 2801.9

1761, and administering, amending, assigning, renewing, and terminating them;

(2) Grants to Federal departments or agencies for transporting by pipeline and related facilities oil, natural gas, synthetic liquid or gaseous fuels, and any refined products produced from them; and

(3) Grants issued on or before October 21, 1976, under then existing statutory authority, unless application of these regulations would diminish or reduce any rights conferred by the original grant or the statute under which it was issued. Where there would be a diminishment or reduction in any right, the grant or statute applies.

(b) *What don't these regulations apply to?* The regulations in this part do not apply to:

(1) Federal Aid Highways, for which Federal Highway Administration procedures apply;

(2) Roads constructed or used according to reciprocal and cost share road use agreement under subpart 2812 of this chapter;

(3) Lands within designated wilderness areas, although BLM may authorize some uses under parts 2920 and 6300 of this chapter;

(4) Grants to holders other than Federal departments or agencies for transporting by pipeline and related facilities oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced from them (see part 2880 of this chapter);

(5) Public highways constructed under the authority of Revised Statute (R.S.) 2477 (43 U.S.C. 932, repealed October 21, 1976);

(6) Reservoirs, canals, and ditches constructed under the authority of R.S. 2339 and R.S. 2340 (43 U.S.C. 661, repealed in part, October 21, 1976); or

(7)(i) Any project or portion of a project that, prior to October 24, 1992, was licensed under, or granted an exemption from, part I of the Federal Power Act (FPA) (16 U.S.C. 791a et seq.) which:

(A) Is located on lands subject to a reservation under section 24 (16 U.S.C. 818) of the FPA;

(B) Did not receive a grant under Title V of the Federal Land Policy and

Management Act (FLPMA) before October 24, 1992; and

(C) Includes continued operation of such project (license renewal) under section 15 (16 U.S.C. 808) of the FPA;

(ii) Paragraph (b)(7)(i) of this section does not apply to any additional public lands the project uses that are not subject to the reservation in paragraph (b)(7)(i)(A) of this section.

### § 2801.8 Severability.

If a court holds any provisions of the regulations in this part or their applicability to any person or circumstances invalid, the remainder of these rules and their applicability to other people or circumstances will not be affected.

### § 2801.9 When do I need a grant?

(a) You must have a grant under this part when you plan to use public lands for systems or facilities over, under, on, or through public lands. These include, but are not limited to:

(1) Reservoirs, canals, ditches, flumes, laterals, pipelines, tunnels, and other systems which impound, store, transport, or distribute water;

(2) Pipelines and other systems for transporting or distributing liquids and gases, other than water and other than oil, natural gas, synthetic liquid or gaseous fuels, or any refined products from them, or for storage and terminal facilities used in connection with them;

(3) Pipelines, slurry and emulsion systems, and conveyor belts for transporting and distributing solid materials and facilities for storing such materials in connection with them;

(4) Systems for generating, transmitting, and distributing electricity;

(5) Systems for transmitting or receiving electronic signals and other means of communication;

(6) Transportation systems, such as roads, trails, highways, railroads, canals, tunnels, tramways, airways, and livestock driveways; and

(7) Such other necessary transportation or other systems or facilities which are in the public interest and which require rights-of-way.

(b) If you apply for a right-of-way grant for generating, transmitting, and distributing electricity, you must also

## § 2801.10

comply with the applicable requirements of the Federal Energy Regulatory Commission under the Federal Power Act of 1935, 16 U.S.C. 791a *et seq.*, and 18 CFR chapter I.

(c) See part 2880 of this chapter for information about authorizations BLM issues under the Mineral Leasing Act for transporting oil and gas resources.

### § 2801.10 How do I appeal a BLM decision issued under the regulations in this part?

(a) You may appeal a BLM decision issued under the regulations in this part in accordance with part 4 of this title.

(b) All BLM decisions under this part remain in effect pending appeal unless the Secretary of the Interior rules otherwise, or as noted in this part. You may petition for a stay of a BLM decision under this part with the Office of Hearings and Appeals, Department of the Interior. Unless otherwise noted in this part, BLM will take no action on your application while your appeal is pending.

## Subpart 2802—Lands Available for FLPMA Grants

### § 2802.10 What lands are available for grants?

(a) In its discretion, BLM may grant rights-of-way on any lands under its jurisdiction except when:

(1) A statute, regulation, or public land order specifically excludes rights-of-way;

(2) The lands are specifically segregated or withdrawn from right-of-way uses; or

(3) BLM identifies areas in its land use plans or in the analysis of an application as inappropriate for right-of-way uses.

(b) BLM may require common use of a right-of-way and may require, to the extent practical, location of new rights-of-way within existing or designated right-of-way corridors (see § 2802.11 of this subpart). Safety and other considerations may limit the extent to which you may share a right-of-way. BLM will designate right-of-way corridors through land use plan decisions.

## 43 CFR Ch. II (10–1–08 Edition)

(c) You should contact the BLM office nearest the lands you seek to use to:

(1) Determine whether or not the land you want to use is available for that use; and

(2) Begin discussions about any application you may need to file.

### § 2802.11 How does BLM designate corridors?

(a) BLM may determine the locations and boundaries of right-of-way corridors during the land-use planning process described in part 1600 of this chapter. During this process BLM coordinates with other Federal agencies, state, local, and tribal governments, and the public to identify resource-related issues, concerns, and needs. The process results in a resource management plan or plan amendment, which addresses to what extent you may use public lands and resources for specific purposes.

(b) When determining which lands may be suitable for right-of-way corridors, the factors BLM considers include, but are not limited to, the following:

(1) Federal, state, and local land use plans, and applicable Federal, state, local, and tribal laws;

(2) Environmental impacts on cultural resources and natural resources, including air, water, soil, fish, wildlife, and vegetation;

(3) Physical effects and constraints on corridor placement due to geology, hydrology, meteorology, soil, or land forms;

(4) Costs of construction, operation, and maintenance and costs of modifying or relocating existing facilities in a proposed right-of-way corridor (i.e., the economic efficiency of placing a right-of-way within a proposed corridor);

(5) Risks to national security;

(6) Potential health and safety hazards imposed on the public by facilities or activities located within the proposed right-of-way corridor;

(7) Social and economic impacts of the right-of-way corridor on public land users, adjacent landowners, and other groups or individuals;

## Bureau of Land Management, Interior

## § 2804.12

(8) Transportation and utility corridor studies previously developed by user groups; and

(9) Engineering and technological compatibility of proposed and existing facilities.

(c) BLM may designate any transportation and utility corridor existing prior to October 21, 1976, as a transportation and utility corridor without further review.

(d) The resource management plan or plan amendment may also identify areas where BLM will not allow right-of-way corridors for environmental, safety, or other reasons.

### Subpart 2803—Qualifications for Holding FLPMA Grants

#### § 2803.10 Who may hold a grant?

To hold a grant under these regulations, you must be:

(a) An individual, association, corporation, partnership, or similar business entity, or a Federal agency or state, tribal, or local government;

(b) Technically and financially able to construct, operate, maintain, and terminate the use of the public lands you are applying for; and

(c) Of legal age and authorized to do business in the state where the right-of-way you seek is located.

#### § 2803.11 Can another person act on my behalf?

Another person may act on your behalf if you have authorized the person to do so under the laws of the state where the right-of-way is or will be located.

#### § 2803.12 What happens to my application or grant if I die?

(a) If an applicant or grant holder dies, any inheritable interest in an application or grant will be distributed under state law.

(b) If the distributee of a grant is not qualified to hold a grant under § 2803.10 of this subpart, BLM will recognize the distributee as grant holder and allow the distributee to hold its interest in the grant for up to two years. During that period, the distributee must either become qualified or divest itself of the interest.

### Subpart 2804—Applying for FLPMA Grants

#### § 2804.10 What should I do before I file my application?

(a) Before filing an application with BLM, we encourage you to make an appointment for a preapplication meeting with the appropriate personnel in the BLM field office having jurisdiction over the lands you seek to use. During the preapplication meeting, BLM can:

(1) Identify potential routing and other constraints;

(2) Determine whether or not the lands are located within a designated or existing right-of-way corridor;

(3) Tentatively schedule the processing of your proposed application; and

(4) Inform you of your financial obligations, such as processing and monitoring costs and rents.

(b) Subject to § 2804.13 of this subpart, BLM may share any information you provide under paragraph (a) of this section with Federal, state, tribal, and local government agencies to ensure that:

(1) These agencies are aware of any authorizations you may need from them; and

(2) We initiate effective coordinated planning as soon as possible.

#### § 2804.11 Where do I file my grant application?

(a) You must file the grant application in the BLM field office having jurisdiction over the lands affected by your application.

(b) If your application affects more than one BLM administrative unit, you may file at any BLM office having jurisdiction over any part of the project. BLM will notify you where to direct subsequent communications.

#### § 2804.12 What information must I submit in my application?

(a) File your application on Standard Form 299, available from any BLM office, and fill in the required information as completely as possible. Your completed application must include:

(1) A description of the project and the scope of the facilities;

### § 2804.13

(2) The estimated schedule for constructing, operating, maintaining, and terminating the project;

(3) The estimated life of the project and the proposed construction and reclamation techniques;

(4) A map of the project, showing its proposed location and existing facilities adjacent to the proposal;

(5) A statement of your financial and technical capability to construct, operate, maintain, and terminate the project;

(6) Any plans, contracts, agreements, or other information concerning your use of the right-of-way and its effect on competition; and

(7) A statement certifying that you are of legal age and authorized to do business in the state(s) where the right-of-way would be located, and that you have submitted correct information to the best of your knowledge.

(b) If you are a business entity, you must also submit the following information:

(1) Copies of the formal documents creating the entity, such as articles of incorporation, and including the corporate bylaws;

(2) Evidence that the party signing the application has the authority to bind the applicant;

(3) The name and address of each participant in the business;

(4) The name and address of each shareholder owning 3 percent or more of the shares, and the number and percentage of any class of voting shares of the entity which such shareholder is authorized to vote;

(5) The name and address of each affiliate of the business;

(6) The number of shares and the percentage of any class of voting stock owned by the business, directly or indirectly, in any affiliate controlled by the business;

(7) The number of shares and the percentage of any class of voting stock owned by an affiliate, directly or indirectly, in the business controlled by the affiliate; and

(8) If you have already provided the information in paragraphs (b)(1) through (7) of this section to BLM and

### 43 CFR Ch. II (10–1–08 Edition)

the information remains accurate, you need only reference the BLM serial number under which you previously filed it.

(c) BLM may require you to submit additional information at any time while processing your application. See § 2884.11(c) of this chapter for the type of information we may require.

(d) If you are a Federal oil and gas lessee or operator and you need a right-of-way for access to your production facilities or oil and gas lease, you may include your right-of-way requirements with your Application for Permit to Drill or Sundry Notice required under parts 3160 through 3190 of this chapter.

(e) If you are filing with another Federal agency for a license, certificate of public convenience and necessity, or other authorization for a project involving a right-of-way on public lands, simultaneously file an application with BLM for a grant. Include a copy of the materials, or reference all the information, you filed with the other Federal agency.

#### § 2804.13 Will BLM keep my information confidential?

BLM will keep confidential any information in your application that you mark as “confidential” or “proprietary” to the extent allowed by law.

#### § 2804.14 What is the processing fee for a grant application?

(a) Unless you are exempt under § 2804.16 of this subpart, you must pay a fee to BLM for the reasonable costs of processing your application before the Federal Government incurs them. The fees for Processing Categories 1 through 4 (see paragraph (b) of this section) are one-time fees and are not refundable. The fees are categorized based on an estimate of the amount of time that BLM will expend to process your application and issue a decision granting or denying the application.

(b) There is no processing fee if BLM’s work is estimated to take one hour or less. Processing fees are based on categories. These categories and fees for 2005 are:

## 2005 PROCESSING FEE SCHEDULE

Processing category	Federal work hours involved	Processing fee per application as of June 21, 2005. To be adjusted annually for changes in the IPD-GDP. See paragraph (c) of this section for update information
(1) Applications for new grants, assignments, renewals, and to existing grants assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $>1 \leq 8$ .	\$97.
(2) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 8 \leq 24$ .	\$343.
(3) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 24 \leq 36$ .	\$644.
(4) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 36 \leq 50$ .	\$923.
(5) Master agreements .....	Varies .....	As specified in the agreement.
(6) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 50$ .	Full reasonable costs.

(c) BLM will revise paragraph (b) of this section to update the processing fees for Categories 1 through 4 in the schedule each calendar year, based on the previous year's change in the IPD-GDP, as measured second quarter to second quarter. BLM will round these changes to the nearest dollar. BLM will update Category 5 processing fees as specified in the Master Agreement. You also may obtain a copy of the current schedule from any BLM state or field office or by writing: Director, BLM, 1849 C St., NW., Mail Stop 1000LS, Washington, DC 20240. BLM also posts the current schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

(d) After an initial review of your application, BLM will notify you of the processing category into which your application fits. You must then submit the appropriate payment for that category before BLM begins processing your application. Your signature on a cost recovery Master Agreement constitutes your agreement with the processing category decision. If you disagree with the category that BLM has determined for your application, you may appeal the decision under § 2801.10 of this part. For Processing Categories 5 and 6 applications, see §§ 2804.17, 2804.18, and 2804.19 of this subpart. If you paid the processing fee and you appeal a Processing Category 1 through 4 or a Processing Category 6 determination, BLM will process your application while the appeal is pending. If IBLA finds in your favor, you will receive a refund or adjustment of your processing fee.

(e) In processing your application, BLM may determine at any time that the application requires preparing an EIS. If this occurs, BLM will send you a decision changing your processing category to Processing Category 6. You may appeal this decision under § 2801.10 of this part.

(f) To expedite processing of your application, you may notify BLM in writing that you are waiving paying reasonable costs and are electing to pay the full actual costs incurred by BLM in processing your application and monitoring your grant.

#### § 2804.15 When does BLM reevaluate the processing and monitoring fees?

BLM reevaluates the processing and monitoring fees (see § 2805.16 of this part) for each category and the categories themselves within 5 years after they go into effect and at 10-year intervals after that. When reevaluating processing and monitoring fees, BLM considers all factors that affect the fees, including, but not limited to, any changes in:

- (a) Technology;
- (b) The procedures for processing applications and monitoring grants;
- (c) Statutes and regulations relating to the right-of-way program; or
- (d) The IPD-GDP.

#### § 2804.16 Who is exempt from paying processing and monitoring fees?

You are exempt from paying processing and monitoring fees if:

- (a) You are a state or local government, or an agency of such a government, and BLM issues the grant for

#### § 2804.17

#### 43 CFR Ch. II (10–1–08 Edition)

governmental purposes benefitting the general public. If your principal source of revenue results from charges you levy on customers for services similar to those of a profit-making corporation or business, you are not exempt; or

(b) Your application under this subpart is associated with a cost-share road or reciprocal right-of-way agreement.

#### **§ 2804.17 What is a Master Agreement (Processing Category 5) and what information must I provide to BLM when I request one?**

(a) A Master Agreement (Processing Category 5) is a written agreement covering processing and monitoring fees (see § 2805.16 of this part) negotiated between BLM and you that involves multiple BLM grant approvals for projects within a defined geographic area.

(b) Your request for a Master Agreement must:

(1) Describe the geographic area covered by the Agreement and the scope of the activity you plan;

(2) Include a preliminary work plan. This plan must state what work you must do and what work BLM must do to process your application. Both parties must periodically update the work plan, as specified in the Agreement, and mutually agree to the changes;

(3) Contain a preliminary cost estimate and a timetable for processing the application and completing the projects;

(4) State whether you want the Agreement to apply to future applications in the same geographic area that are not part of the same projects; and

(5) Contain any other relevant information that BLM needs to process the application.

#### **§ 2804.18 What provisions do Master Agreements contain and what are their limitations?**

(a) A Master Agreement:

(1) Specifies that you must comply with all applicable laws and regulations;

(2) Describes the work you will do and the work BLM will do to process the application;

(3) Describes the method of periodic billing, payment, and auditing;

(4) Describes the processes, studies, or evaluations you will pay for;

(5) Explains how BLM will monitor the grant and how BLM will recover monitoring costs;

(6) Contains provisions allowing for periodic review and updating, if required;

(7) Contains specific conditions for terminating the Agreement; and

(8) Contains any other provisions BLM considers necessary.

(b) BLM will not enter into any Agreement that is not in the public interest.

(c) If you sign a Master Agreement, you waive your right to request a reduction of processing and monitoring fees.

#### **§ 2804.19 How will BLM process my Processing Category 6 application?**

(a) For Processing Category 6 applications, you and BLM must enter into a written agreement that describes how BLM will process your application. The final agreement consists of a work plan and a financial plan.

(b) In processing your application, BLM will:

(1) Determine the issues subject to analysis under NEPA;

(2) Prepare a preliminary work plan;

(3) Develop a preliminary financial plan, which estimates the reasonable costs of processing your application and monitoring your project;

(4) Discuss with you:

(i) The preliminary plans and data;

(ii) The availability of funds and personnel;

(iii) Your options for the timing of processing and monitoring fee payments; and

(iv) Financial information you must submit; and

(5) Complete final scoping and develop final work and financial plans which reflect any work you have agreed to do. BLM will also present you with the final estimate of the reasonable costs you must reimburse BLM, including the cost for monitoring the project, using the factors in §§ 2804.20 and 2804.21 of this subpart.

(c) BLM retains the option to prepare any environmental documents related to your application. If BLM allows you to prepare any environmental documents and conduct any studies that BLM needs to process your application,

you must do the work following BLM standards. For this purpose, you and BLM may enter into a written agreement. BLM will make the final determinations and conclusions arising from such work.

(d) BLM will periodically, as stated in the agreement, estimate processing costs for a specific work period and notify you of the amount due. You must pay the amount due before BLM will continue working on your application. If your payment exceeds the reasonable costs that BLM incurred for the work, BLM will either adjust the next billing to reflect the excess, or refund you the excess under 43 U.S.C. 1734. You may not deduct any amount from a payment without BLM's prior written approval.

**§ 2804.20 How does BLM determine reasonable costs for Processing Category 6 or Monitoring Category 6 applications?**

BLM will consider the factors in paragraph (a) of this section and § 2804.21 of this subpart to determine reasonable costs. Submit to the BLM field office having jurisdiction over the lands covered by your application a written analysis of those factors applicable to your project, unless you agree in writing to waive consideration of reasonable costs and elect to pay full actual costs (see § 2804.14(f) of this subpart). Submitting your analysis with the application will expedite its handling. BLM may require you to submit additional information in support of your position. While we consider your written analysis, BLM will not process your Category 6 application.

(a) *FLPMA factors.* If your application is for a Processing Category 6, or a Monitoring Category 6 project, the BLM State Director having jurisdiction over the lands you are applying to use will apply the following factors set forth at section 304(b) of FLPMA, 43 U.S.C. 1734(b), to determine the amount you owe. With your application, submit your analysis of how each of the following factors applies to your application:

(1) Actual costs to BLM (exclusive of management overhead costs) of processing your application and of monitoring construction, operation, maintenance,

and termination of a facility authorized by the right-of-way grant;

(2) Monetary value of the rights or privileges you seek;

(3) BLM's ability to process an application with maximum efficiency and minimum expense, waste, and effort;

(4) Costs incurred for the benefit of the general public interest rather than for the exclusive benefit of the applicant. That is, the costs for studies and data collection that have value to the Federal Government or the general public apart from processing the application;

(5) Any tangible improvements, such as roads, trails, and recreation facilities, which provide significant public service and are expected in connection with constructing and operating the project; and

(6) Other factors relevant to the reasonableness of the costs (see § 2804.21 of this subpart).

(b) *Fee determination.* After considering your analysis and other information, BLM will notify you in writing of what you owe. If you disagree with BLM's determination, you may appeal it under § 2801.10 of this part.

**§ 2804.21 What other factors will BLM consider in determining processing and monitoring fees?**

(a) *Other factors.* If you include this information in your application, in arriving at your processing or monitoring fee in any category, the BLM State Director will consider whether:

(1) Payment of actual costs would:

(i) Result in undue financial hardship to your small business, and you would receive little monetary value from your grant as compared to the costs of processing and monitoring; or

(ii) Create such undue financial hardship as to prevent your use and enjoyment of your right-of-way for a non-commercial purpose.

(2) The costs of processing the application and monitoring the issued grant grossly exceed the costs of constructing the project;

(3) You are a non-profit organization, corporation, or association which is not controlled by or a subsidiary of a profit-making enterprise; and

(i) The studies undertaken in connection with processing the application or

## § 2804.22

monitoring the grant have a public benefit; or

(ii) The facility or project will provide a benefit or special service to the general public or to a program of the Secretary;

(4) You need a grant to prevent or mitigate damages to any lands or property or to mitigate hazards or danger to public health and safety resulting from an act of God, an act of war, or negligence of the United States;

(5) You have a grant and need to secure a new or amended grant in order to relocate an authorized facility to comply with public health and safety and environmental protection laws, regulations, and standards which were not in effect at the time BLM issued your original grant;

(6) You have a grant and need to secure a new grant to relocate facilities which you have to move because a Federal agency or federally-funded project needs the lands and the United States does not pay the costs associated with your relocation; or

(7) For whatever other reason, such as public benefits or public services provided, collecting processing and monitoring fees would be inconsistent with prudent and appropriate management of public lands and with your equitable interests or the equitable interests of the United States.

(b) *Fee determination.* With your written application, submit your analysis of how each of the factors, as applicable, in paragraph (a) of this section pertain to your application. BLM will notify you in writing of the BLM State Director's fee determination. You may appeal this decision under §2801.10 of this part.

## § 2804.22 How will the availability of funds affect the timing of BLM's processing?

If BLM has insufficient funds to process your application, we will not process it until funds become available or you elect to pay full actual costs under §2804.14(f) of this part.

## § 2804.23 What if there are two or more competing applications for the same facility or system?

(a) If there are two or more competing applications for the same facil-

## 43 CFR Ch. II (10-1-08 Edition)

ity or system and your application is in:

(1) *Processing Category 1 through 4.* You must reimburse BLM for processing costs as if the other application or applications had not been filed.

(2) *Processing Category 6.* You are responsible for processing costs identified in your application. If BLM cannot readily separate costs, such as costs associated with preparing environmental analyses, you and any competing applicants must pay an equal share or a proportion agreed to in writing among all applicants and BLM. If you agree to share costs that are common to your application and that of a competing applicant, and the competitor does not pay the agreed upon amount, you are liable for the entire amount due. The applicants must pay the entire processing fee in advance. BLM will not process your application until we receive the advance payments.

(b) *Who determines whether competition exists?* BLM determines whether the applications are compatible in a single right-of-way system or are competing applications for the same system.

(c) If BLM determines that competition exists, BLM will describe the procedures for a competitive bid through a bid announcement in a newspaper of general circulation in the area affected by the potential right-of-way and by a notice in the FEDERAL REGISTER.

## § 2804.24 Do I always have to submit an application for a grant using Standard Form 299?

You do not have to file an application using Standard Form 299 if:

(a) BLM determines that competition exists (see §2804.23(c) of this subpart); or

(b) You are an oil and gas operator. You may include your right-of-way requirements for a FLPMA grant as part of your Application for Permit to Drill or Sundry Notice under the regulations in parts 3160 through 3190 of this chapter.

## § 2804.25 How will BLM process my application?

(a) BLM will notify you in writing when it receives your application and will identify your processing fee described at §2804.14 of this subpart.

## Bureau of Land Management, Interior

## § 2804.27

(b) BLM may require you to submit additional information necessary to process the application. This information may include a detailed construction, operation, rehabilitation, and environmental protection plan, *i.e.*, a "Plan of Development," and any needed cultural resource surveys or inventories for threatened or endangered species. If BLM needs more informa-

tion, we will identify this information in a written deficiency notice asking you to provide the additional information within a specified period of time. BLM will notify you of any other grant applications which involve all or part of the lands for which you applied.

(c) *Customer service standard.* BLM will process your completed application as follows:

Processing category	Processing time	Conditions
1-4 .....	60 calendar days .....	If processing your application will take longer than 60 calendar days, BLM will notify you in writing of this fact prior to the 30th calendar day and inform you of when you can expect a final decision on your application.
5 .....	As specified in the Master Agreement.	BLM will process applications as specified in the Agreement.
6 .....	Over 60 calendar days .....	BLM will notify you in writing within the initial 60-day processing period of the estimated processing time.

(d) Before issuing a grant, BLM will:

(1) Complete a NEPA analysis for the application or approve a NEPA analysis previously completed for the application, as required by 40 CFR parts 1500 through 1508;

(2) Determine whether or not your proposed use complies with applicable Federal and state laws;

(3) If your application is for a road, determine whether it is in the public interest to require you to grant the United States an equivalent authorization across lands that you own;

(4) Consult, as necessary, with other governmental entities;

(5) Hold public meetings if sufficient public interest exists to warrant their time and expense. BLM will publish a notice in the FEDERAL REGISTER, a newspaper of general circulation in the vicinity of the lands involved, or both, announcing in advance any public hearings or meetings; and

(6) Take any other action necessary to fully evaluate and decide whether to approve or deny your application.

### § 2804.26 Under what circumstances may BLM deny my application?

(a) BLM may deny your application if:

(1) The proposed use is inconsistent with the purpose for which BLM manages the public lands described in your application;

(2) The proposed use would not be in the public interest;

(3) You are not qualified to hold a grant;

(4) Issuing the grant would be inconsistent with the Act, other laws, or these or other regulations;

(5) You do not have or cannot demonstrate the technical or financial capability to construct the project or operate facilities within the right-of-way; or

(6) You do not adequately comply with a deficiency notice (*see* § 2804.25(b) of this subpart) or with any BLM requests for additional information needed to process the application.

(b) If BLM denies your application, you may appeal this decision under § 2801.10 of this part.

### § 2804.27 What fees do I owe if BLM denies my application or if I withdraw my application?

If BLM denies your application or you withdraw it, you owe the processing fee set forth at § 2804.14 of this subpart, unless you have a Processing Category 5 or 6 application. Then, the following conditions apply:

(a) If BLM denies your Processing Category 5 or 6 application, you are liable for all reasonable costs that the United States incurred in processing it. The money you have not paid is due within 30 calendar days after receiving a bill for the amount due.

## § 2804.28

(b) You may withdraw your application in writing before BLM issues a grant. If you do so, you are liable for all reasonable processing costs the United States has incurred up to the time you withdraw the application and for the reasonable costs of terminating your application. Any money you have not paid is due within 30 calendar days after receiving a bill for the amount due. Any money you paid that is not used to cover costs the United States incurred as a result of your application will be refunded to you.

### **§ 2804.28 What processing fees must I pay for a BLM grant application associated with Federal Energy Regulatory Commission (FERC) licenses or re-license applications under part I of the Federal Power Act (FPA)?**

(a) You must reimburse BLM for the costs which the United States incurs in processing your grant application associated with a FERC project, other than those described at § 2801.6(b)(7) of this part. BLM also requires reimbursement for processing a grant application associated with a FERC project licensed before October 24, 1992, that involves the use of additional public lands outside the original area reserved under section 24 of the FPA.

(b) BLM will determine the amount you must pay by using the processing fee categories described at § 2804.14 of this subpart and bill you for the costs. FERC will address other costs associated with processing a FERC license or relicense (*see* 18 CFR chapter I).

### **§ 2804.29 What activities may I conduct on the lands covered by the proposed right-of-way while BLM is processing my application?**

(a) You may conduct casual use activities on the BLM lands covered by the application, as may any other member of the public. BLM does not require a grant for casual use on BLM lands.

(b) For any activities on BLM lands that are not casual use, you must obtain prior BLM approval.

## 43 CFR Ch. II (10–1–08 Edition)

### **Subpart 2805—Terms and Conditions of Grants**

#### **§ 2805.10 How will I know whether BLM has approved or denied my application?**

(a) BLM will send you a written response on your application. If we do not deny the application, we will send you an unsigned grant for your review and signature that:

(1) Includes any terms, conditions, and stipulations that BLM determines to be in the public interest. This includes modifying your proposed use or changing the route or location of the facilities;

(2) May include terms that prevent your use of the right-of-way until you have an approved Plan of Development and BLM has issued a Notice to Proceed; and

(3) Will impose a specific term for the grant. Each grant that BLM issues for 20 or more years will contain a provision requiring periodic review at the end of the twentieth year and subsequently at 10-year intervals. BLM may change the terms and conditions of the grant as a result of these reviews in accordance with § 2805.15(e) of this subpart.

(b) If you agree with the terms and conditions of the unsigned grant, you should sign and return it to BLM with any payment required under § 2805.16 of this subpart. BLM will sign the grant and return it to you with a final decision issuing the grant if the regulations in this part, including § 2804.26, remain satisfied. You may appeal this decision under § 2801.10 of this part.

(c) If BLM denies your application, we will send you a written decision that will:

(1) State the reasons for the denial (*see* § 2804.26 of this part);

(2) Identify any processing costs you must pay (*see* § 2804.14 of this part); and

(3) Notify you of your right to appeal this decision under § 2801.10 of this part.

#### **§ 2805.11 What does a grant contain?**

The grant states what your rights are on the lands subject to the grant and contains information about:

(a) *What lands you can use or occupy.* The lands may or may not correspond to those for which you applied. BLM

will limit the grant to those lands which BLM determines:

- (1) You will occupy with authorized facilities;
- (2) Are necessary for constructing, operating, maintaining, and terminating the authorized facilities;
- (3) Are necessary to protect the public health and safety;
- (4) Will not unnecessarily damage the environment; and
- (5) Will not result in unnecessary or undue degradation.

(b) *How long you can use the right-of-way.* Each grant will state the length of time that you are authorized to use the right-of-way.

(1) BLM will consider the following factors in establishing a reasonable term:

- (i) The public purpose served;
- (ii) Cost and useful life of the facility;
- (iii) Time limitations imposed by licenses or permits required by other Federal agencies and state, tribal, or local governments; and
- (iv) The time necessary to accomplish the purpose of the grant.

(2) All grants, except those issued for a term of less than one year and those issued in perpetuity, expire on December 31 of the final year of the grant.

(c) *How you can use the right-of-way.* You may only use the right-of-way for the specific use the grant authorizes.

#### **§ 2805.12 What terms and conditions must I comply with?**

By accepting a grant, you agree to comply with and be bound by the following terms and conditions. During construction, operation, maintenance, and termination of the project you must:

- (a) To the extent practicable, comply with all existing and subsequently enacted, issued, or amended Federal laws and regulations and state laws and regulations applicable to the authorized use;
- (b) Rebuild and repair roads, fences, and established trails destroyed or damaged by the project;
- (c) Build and maintain suitable crossings for existing roads and significant trails that intersect the project;
- (d) Do everything reasonable to prevent and suppress wildfires on or in the

immediate vicinity of the right-of-way area;

(e) Not discriminate against any employee or applicant for employment during any phase of the project because of race, creed, color, sex, or national origin. You must also require subcontractors to not discriminate;

(f) Pay monitoring fees and rent described in § 2805.16 of this subpart and subpart 2806 of this part;

(g) If BLM requires, obtain, and/or certify that you have obtained, a surety bond or other acceptable security to cover any losses, damages, or injury to human health, the environment, and property in connection with your use and occupancy of the right-of-way, including terminating the grant, and to secure all obligations imposed by the grant and applicable laws and regulations. If you plan to use hazardous materials in the operation of your grant, you must provide a bond that covers liability for damages or injuries resulting from releases or discharges of hazardous materials. BLM may require a bond, an increase or decrease in the value of an existing bond, or other acceptable security at any time during the term of the grant;

(h) Assume full liability if third parties are injured or damages occur to property on or near the right-of-way (see § 2807.12 of this part);

(i) Comply with project-specific terms, conditions, and stipulations, including requirements to:

(1) Restore, revegetate, and curtail erosion or conduct any other rehabilitation measure BLM determines necessary;

(2) Ensure that activities in connection with the grant comply with air and water quality standards or related facility siting standards contained in applicable Federal or state law or regulations;

(3) Control or prevent damage to:

(i) Scenic, aesthetic, cultural, and environmental values, including fish and wildlife habitat;

(ii) Public and private property; and

(iii) Public health and safety;

(4) Protect the interests of individuals living in the general area who rely on the area for subsistence uses as that

### § 2805.13

term is used in Title VIII of Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111 *et seq.*);

(5) Ensure that you construct, operate, maintain, and terminate the facilities on the lands in the right-of-way in a manner consistent with the grant;

(6) When the state standards are more stringent than Federal standards, comply with state standards for public health and safety, environmental protection, and siting, constructing, operating, and maintaining any facilities and improvements on the right-of-way; and

(7) Grant BLM an equivalent authorization for an access road across your land if BLM determines the reciprocal authorization is needed in the public interest and the authorization BLM issues to you is also for road access;

(j) Immediately notify all Federal, state, tribal, and local agencies of any release or discharge of hazardous material reportable to such entity under applicable law. You must also notify BLM at the same time, and send BLM a copy of any written notification you prepared;

(k) Not dispose of or store hazardous material on your right-of-way, except as provided by the terms, conditions, and stipulations of your grant;

(l) Certify your compliance with all requirements of the Emergency Planning and Community Right-to-Know Act of 1986, 42 U.S.C. 11001 *et seq.*, when you receive, assign, renew, amend, or terminate your grant;

(m) Control and remove any release or discharge of hazardous material on or near the right-of-way arising in connection with your use and occupancy of the right-of-way, whether or not the release or discharge is authorized under the grant. You must also remediate and restore lands and resources affected by the release or discharge to BLM's satisfaction and to the satisfaction of any other Federal, state, tribal, or local agency having jurisdiction over the land, resource, or hazardous material;

(n) Comply with all liability and indemnification provisions and stipulations in the grant;

(o) As BLM directs, provide diagrams or maps showing the location of any constructed facility; and

### 43 CFR Ch. II (10–1–08 Edition)

(p) Comply with all other stipulations that BLM may require.

#### § 2805.13 When is a grant effective?

A grant is effective after both you and BLM sign it. You must accept its terms and conditions in writing and pay any necessary rent and monitoring fees as set forth in subpart 2806 of this part and § 2805.16 of this subpart. Your written acceptance constitutes an agreement between you and BLM that your right to use the public lands, as specified in the grant, is subject to the terms and conditions of the grant and applicable laws and regulations.

#### § 2805.14 What rights does a grant convey?

The grant conveys to you only those rights which it expressly contains. BLM issues it subject to the valid existing rights of others, including the United States. Rights which the grant conveys to you include the right to:

(a) Use the described lands to construct, operate, maintain, and terminate facilities within the right-of-way for authorized purposes under the terms and conditions of the grant;

(b) If your grant specifically authorizes, allow other parties to use your facility for the purposes specified in your grant and you may charge for such use. If your grant does not specifically authorize it, you may not let anyone else use your facility and you may not charge for its use unless BLM authorizes or requires it in writing;

(c) Allow others to use the land as your agent in the exercise of the rights that the grant specifies;

(d) Do minor trimming, pruning, and removing of vegetation to maintain the right-of-way or facility;

(e) Use common varieties of stone and soil which are necessarily removed during construction of the project, without additional BLM authorization or payment, in constructing the project within the authorized right-of-way; and

(f) Assign the grant to another, provided that you obtain BLM's prior written approval.

## Bureau of Land Management, Interior

## § 2805.17

### § 2805.15 What rights does the United States retain?

The United States retains and may exercise any rights the grant does not expressly convey to you. These include BLM's right to:

(a) Access the lands covered by the grant at any time and enter any facility you construct on the right-of-way. BLM will give you reasonable notice before it enters any facility on the right-of-way;

(b) Require common use of your right-of-way, including subsurface and air space, and authorize use of the right-of-way for compatible uses. You may not charge for the use of the lands made subject to such additional right-of-way grants;

(c) Retain ownership of the resources of the land, including timber and vegetative or mineral materials and any other living or non-living resources. You have no right to use these resources, except as noted in § 2805.14(e) of this subpart;

(d) Determine whether or not your grant is renewable; and

(e) Change the terms and conditions of your grant as a result of changes in legislation, regulation, or as otherwise necessary to protect public health or safety or the environment.

### § 2805.16 If I hold a grant, what monitoring fees must I pay?

(a) *Monitoring fees.* You must pay a fee to BLM for the reasonable costs the Federal government incurs in monitoring the construction, operation, maintenance, and termination of the project and protection and rehabilitation of the public lands your grant covers. BLM categorizes the monitoring fees based on the estimated number of work hours necessary to monitor your grant. Monitoring Category 1 through 4 fees are one-time fees and are not refundable. The work hours and fees for 2005 are as follows:

2005 MONITORING FEE SCHEDULE

Monitoring category	Federal work hours involved	Monitoring fee as of June 21, 2005. To be adjusted annually for changes in the IPD-GDP. See paragraph (b) of this section for update information
(1) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 1 \leq 8$ .	\$97.
(2) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 8 \leq 24$ .	\$343.
(3) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 24 \leq 36$ .	\$644.
(4) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 36 \leq 50$ .	\$923.
(5) Master Agreements .....	Varies .....	As specified in the Agreement.
(6) Applications for new grants, assignments, renewals, and amendments to existing grants.	Estimated Federal work hours are $> 50$ .	Full reasonable costs.

(b) *Updating the schedule.* BLM will revise paragraph (a) of this section annually to update Category 1 through 4 monitoring fees in the manner described at § 2804.14(c) of this part. BLM will update Category 5 monitoring fees as specified in the Master Agreement. The monitoring cost schedule is available from any BLM state or field office or by writing: Director, Bureau of Land Management, 1849 C St., NW., Mail Stop 1000LS, Washington, DC 20240. BLM also posts the current schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

### § 2805.17 When do I pay monitoring fees?

(a) *Monitoring Categories 1 through 4.* Unless BLM otherwise directs, you must pay monitoring fees when you submit to BLM your written acceptance of the terms and conditions of the grant.

(b) *Monitoring Category 5.* You must pay monitoring fees as specified in the Master Agreement. BLM will not issue your grant until it receives the required payment.

## **§ 2806.10**

(c) *Monitoring Category 6.* BLM may periodically estimate the costs of monitoring your use of the grant. BLM will include this fee in the costs associated with processing fees described at §2804.14 of this part. If BLM has underestimated the monitoring costs, we will notify you of the shortfall. If your payments exceed the reasonable costs that Federal employees incurred for monitoring, BLM will either reimburse you the difference, or adjust the next billing to reflect the overpayment. Unless BLM gives you written authorization, you may not offset or deduct the overpayment from your payments.

(d) *Monitoring Categories 1-4 and 6.* If you disagree with the category BLM has determined for your grant, you may appeal the decision under §2801.10 of this part.

### **Subpart 2806—Rents**

#### **GENERAL PROVISIONS**

#### **§ 2806.10 What rent must I pay for my grant?**

(a) You must pay in advance a rent BLM establishes based on sound business management principles and, as far as practical and feasible, using comparable commercial practices. Rent does not include processing or monitoring fees and rent is not offset by such fees. BLM may exempt, waive, or reduce rent for a grant under §§2806.14 and 2806.15 of this subpart.

(b) If BLM issued your grant on or before October 21, 1976, under then existing statutory authority, upon request, BLM will conduct an informal hearing before a proposed rent increase becomes effective. This applies to rent increases due to a BLM-initiated change in the rent or from initially being put on a rent schedule. You are not entitled to a hearing on annual adjustments once you are on a rent schedule.

#### **§ 2806.11 How will BLM charge me rent?**

(a) BLM will charge rent beginning on the first day of the month following the effective date of the grant through the last day of the month when the grant terminates. *Example:* If a grant became effective on January 10 and ter-

## **43 CFR Ch. II (10-1-08 Edition)**

minated on September 16, the rental period would be February 1 through September 30, or 8 months.

(b) BLM will set or adjust the annual billing periods to coincide with the calendar year by prorating the rent based on 12 months.

(c) If you disagree with the rent that BLM charges, you may appeal the decision under §2801.10 of this part.

#### **§ 2806.12 When do I pay rent?**

(a) You must pay rent for the initial rental period before BLM issues you a grant.

(b) You make all other rental payments for linear rights-of-way according to the payment plan described in §2806.23 of this subpart.

(c) After the first rental payment, all rent is due on January 1 of the first year of each succeeding rental period for the term of your grant.

#### **§ 2806.13 What happens if I pay the rent late?**

(a) If BLM does not receive the rent payment within 15 calendar days after the rent was due under §2806.12 of this subpart, BLM will charge you a late payment fee of \$25.00 or 10 percent of the rent you owe, whichever is greater, not to exceed \$500 per authorization.

(b) If BLM does not receive your rent payment and late payment fee within 30 calendar days after rent was due, BLM may collect other administrative fees provided by statute.

(c) If BLM does not receive your rent, late payment fee, and any administrative fees within 90 calendar days after the rent was due, BLM may terminate your grant under §2807.17 of this part and you may not remove any facility or equipment without BLM's written permission (*see* §2807.19 of this part). The rent due, late payment fees, and any administrative fees remain a debt that you owe to the United States.

(d) If you pay the rent, late payment fee, and any administrative fees after BLM has terminated the grant, BLM does not automatically reinstate the grant. You must file a new application with BLM. BLM will consider the history of your failure to timely pay rent in deciding whether to issue you a new grant.

## Bureau of Land Management, Interior

## § 2806.20

(e) You may appeal any adverse decision BLM takes against your grant under § 2801.10 of this part.

### **§ 2806.14 Under what circumstances am I exempt from paying rent?**

You do not have to pay rent for your use if:

(a) BLM issues the grant under a statute which does not allow BLM to charge rent;

(b) You are a Federal, state, or local government or its agent or instrumentality, unless you are:

(1) Using the facility, system, space, or any part of the right-of-way area for commercial purposes; or

(2) A municipal utility or cooperative whose principal source of revenue is customer charges;

(c) You have been granted an exemption under a statute providing for such; or

(d) Electric or telephone facilities constructed on the right-of-way were financed in whole or in part, or eligible for financing, under the Rural Electrification Act of 1936, as amended (REA) (7 U.S.C. 901 *et seq.*), or are extensions of such facilities. You do not need to have sought financing from the Rural Utilities Service to qualify for this exemption. BLM may require you to document the facility's eligibility for REA financing. For communication site facilities, adding or including non-eligible facilities as, for example, by tenants or customers, on the right-of-way will subject the holder to rent in accordance with §§ 2806.30 through 2806.44 of this subpart.

### **§ 2806.15 Under what circumstances may BLM waive or reduce my rent?**

(a) BLM may waive or reduce your rent payment, even to zero in appropriate circumstances. BLM may require you to submit information to support a finding that your grant qualifies for a waiver or a reduction of rent.

(b) BLM may waive or reduce your rent if you show BLM that:

(1) You are a non-profit organization, corporation, or association which is not controlled by, or is not a subsidiary of, a profit making corporation or business enterprise and the facility or project will provide a benefit or spe-

cial service to the general public or to a program of the Secretary;

(2) You provide without charge, or at reduced rates, a valuable benefit to the public at large or to the programs of the Secretary of the Interior;

(3) You hold a valid Federal authorization in connection with your grant and the United States is already receiving compensation for this authorization. This paragraph does not apply to oil and gas leases issued under part 3100 of this chapter; or

(4) Your grant involves a cost share road or a reciprocal right-of-way agreement not subject to subpart 2812 of this chapter. In these cases, BLM will determine the rent based on the proportion of use.

(c) The BLM State Director may waive or reduce your rent payment if the BLM State Director determines that paying the full rent will cause you undue hardship and it is in the public interest to waive or reduce your rent. In your request for a waiver or rental reduction you must include a suggested alternative rental payment plan or timeframe within which you anticipate resuming full rental payments. BLM may also require you to submit specific financial and technical data or other information that corrects or modifies the statement of financial capability required by § 2804.12(a)(5) of this part.

### **§ 2806.16 When must I make estimated rent payments to BLM?**

To expedite the processing of your grant application, BLM may estimate rent payments and collect that amount before it issues the grant. The amount may change once BLM determines the actual rent of the right-of-way. BLM will credit any rental overpayment, and you are liable for any underpayment. This section does not apply to rent payments made under a rent schedule in this part.

#### LINEAR RIGHTS-OF-WAY

### **§ 2806.20 What is the rent for a linear right-of-way?**

(a) Except as noted in paragraph (c) of this section, BLM will use the Per Acre Rent Schedule found at paragraph (b) of this section to calculate rent for linear rights-of-way. The Per Acre

## § 2806.21

## 43 CFR Ch. II (10–1–08 Edition)

Rent Schedule is updated annually in accordance with § 2806.21 of this subpart.

(b) The Per Acre Rent Schedule for calendar year 2005 is as follows:

2005 PER ACRE RENT SCHEDULE

County zone number and per acre zone price		Per acre rent for oil and gas and other energy related pipeline, and all roads, ditches, and canals. To be adjusted annually for changes in the IPD-GDP. See § 2806.21 for update information	Per acre rent for electric transmission and distribution lines, telephone lines, non-related pipelines, and other linear rights-of-way. To be adjusted annually for changes in the IPD-GDP. See § 2806.21 for update information
Zone 1	\$50 .....	\$3.89	\$3.40
Zone 2	\$100 .....	7.76	6.79
Zone 3	\$200 .....	15.58	13.61
Zone 4	\$300 .....	23.31	20.43
Zone 5	\$400 .....	31.14	27.23
Zone 6	\$500 .....	38.89	34.03
Zone 7	\$600 .....	46.66	40.86
Zone 8	\$1,000 .....	77.78	68.05

(c) BLM may use an alternate means to compute your rent if the rent determined by comparable commercial practices or an appraisal would be 10 or more times the rent from the schedule.

(d) Once you are on a rent schedule, BLM will not remove you from it unless:

(1) The BLM State Director decides to remove you from the schedule under paragraph (c) of this section; or

(2) You file an application to amend your grant.

(e) You may obtain the current linear right-of-way rent schedule from any BLM state or field office or by writing: Director, BLM, 1849 C St., NW., Mail Stop 1000 LS, Washington, DC 20240. BLM also posts the most current rent schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

### § 2806.21 When and how does the linear rent schedule change?

BLM will revise § 2806.20(b) to update the rent schedule each calendar year based on the previous year's change in the IPD-GDP, as measured second quarter to second quarter.

### § 2806.22 How will BLM calculate my rent for linear rights-of-way the schedule covers?

(a) BLM calculates your rent by multiplying the rent per acre for the appropriate category of use and county zone price from the current schedule by the number of acres in the right-of-way

area that fall in those categories and multiplying the result by the number of years in the rental period.

(b) If BLM has not previously used the rent schedule to calculate your rent, we may do so after giving you reasonable written notice.

### § 2806.23 How must I make rental payments for a linear grant?

(a) For linear grants, except those issued in perpetuity, you must make either nonrefundable annual payments or a nonrefundable payment for more than 1 year, as follows:

(1) *One-time payments.* You may pay in advance the required rent amount for the entire term of the grant.

(2) If you choose not to make a one-time payment, you must pay according to one of the following methods, as applicable:

(i) *Payments by individuals.* If your annual rent is \$100 or less, you must pay at 10-year intervals not to exceed the term of the grant. If your annual rent is greater than \$100, you may pay annually or at multi-year intervals that you may choose.

(ii) *Payments by all others.* You must pay rent at 10-year intervals not to exceed the term of the grant.

(b) BLM considers the first partial calendar year in the rent payment period to be the first year of the rental payment term. BLM prorates the first

year rental amount based on the number of months left in the calendar year after the effective date of the grant.

(c) *Perpetual grants.* For linear grants issued in perpetuity, you must make a one-time rental payment before BLM will issue the grant, except individuals may choose to make rental payments as provided in paragraph (a)(2)(i) of this section. BLM determines the one-time payment as follows:

(1) BLM will calculate rent for grants issued in perpetuity by multiplying the annual rent by 100; or

(2) You may request from BLM a rent determination based on the prevailing price established by general practice in the vicinity of the right-of-way. You must:

(i) Prepare a report, at your expense, that explains how you estimated the rent;

(ii) Complete it to Federal appraisal standards; and

(iii) Submit it for consideration and approval by the BLM State Director with jurisdiction over the lands in the grant. If the BLM State Director does not approve the rent estimated in your report, you may appeal the decision under § 2801.10 of this part.

#### COMMUNICATION SITE RIGHTS-OF-WAY

#### § 2806.30 What are the rents for communication site rights-of-way?

(a) *Rent schedule.* (1) BLM uses the rent schedule for communication uses found in paragraph (b) of this section

to calculate the rent for communication site rights-of-way. The schedule is based on nine population strata (the population served), as depicted in the most recent version of the Rationally Metro Area Population Ranking, and the type of communication use or uses for which BLM normally grants communication site rights-of-way. These uses are listed as part of the definition of "communication use rent schedule," set out at § 2801.5(b) of this part. You may obtain a copy of the current schedule from any BLM state or field office or by writing: Director, BLM, 1849 C St., NW., Mail Stop 1000 LS, Washington, DC 20240. BLM also posts the current communication use rent schedule on the BLM Home Page on the Internet at <http://www.blm.gov>.

(2) BLM will revise paragraph (b) of this section annually to update the schedule based on two sources: the U.S. Department of Labor Consumer Price Index for All Urban Consumers, U.S. City Average (CPI-U), as of July of each year (difference in CPI-U from July of one year to July of the following year), and the RMA population rankings.

(3) BLM will limit the annual adjustment based on the Consumer Price Index to no more than 5 percent. At least every 10 years BLM will review the rent schedule to ensure that the schedule reflects fair market value.

(b) The annual rent schedule for communication uses for calendar year 2005 is as follows:

COMMUNICATION USE RENT SCHEDULE ANNUAL FEES  
[Calendar year 2005]

Population	Television broadcast	Am/FM radio broad- cast <sup>1</sup>	Cable television	Broadcast translator/ LPTV/LPFM	CMRS/facil- ity manager	Cellular telephone	Private mo- bile radio service	Microwave	Other com- munication uses
5,000,000 plus .....	\$55,861.13	\$42,206.21	(2)	(2)	\$14,896.30	\$14,896.30	\$12,413.59	\$12,413.59	\$93.10
2,500,000 to 4,999,999 .....	37,240.76	26,068.54	(2)	(2)	12,413.59	12,413.59	7,448.15	9,930.88	93.10
1,000,000 to 2,499,999 .....	22,344.46	17,379.01	(2)	(2)	9,930.88	9,930.88	7,448.15	8,689.51	93.10
500,000 to 999,999 .....	17,379.01	12,413.59	(2)	(2)	6,206.79	7,448.15	4,965.43	6,827.47	93.10
300,000 to 499,999 .....	14,896.30	9,930.88	(2)	(2)	4,965.43	6,206.79	3,103.39	3,103.39	93.10
100,000 to 299,999 .....	7,448.15	4,965.43	2,979.25	2,979.25	3,724.08	4,965.43	2,482.72	2,482.72	93.10
50,000 to 99,999 .....	3,724.08	2,482.72	1,489.63	1,489.63	1,489.63	3,724.08	1,241.36	1,862.03	93.10
25,000 to 49,999 .....	1,862.03	1,489.63	1,241.36	620.68	1,241.36	3,103.39	744.81	1,862.03	93.10
Less Than 25,000 .....	1,489.63	1,117.22	744.81	124.14	744.81	3,103.39	434.47	1,862.03	93.10

<sup>1</sup> Rent for AM Radio is 70% of the FM Scheduled Rent.  
<sup>2</sup> Fee to be determined by appraisal or other methods.

\$ 2806.30

43 CFR Ch. II (10-1-08 Edition)

(c) *Uses not covered by the schedule.* The communication use rent schedule does not apply to:

(1) Communication site uses, facilities, and devices located entirely within the exterior boundaries of an oil and gas lease, and directly supporting the operations of the oil and gas lease (see parts 3160 through 3190 of this chapter);

(2) Communication facilities and uses ancillary to and authorized under a linear grant, such as a railroad grant or an oil and gas pipeline grant;

(3) Communication uses not listed on the schedule, such as telephone lines, fiber optic cables, and new technologies;

(4) Grants for which BLM determines the rent by competitive bidding; or

(5) Communication facilities and uses for which the BLM State Director concurs that:

(i) The expected annual rent, as BLM estimates from market data, exceeds the rent from the rent schedule by five times; or

(ii) The communication site serves a population of one million or more and the expected annual rent for the communication use or uses is more than \$10,000 above the rent from the rent schedule.

**§ 2806.31 How will BLM calculate rent for a right-of-way for communication uses in the schedule?**

(a) *Basic rule.* BLM calculates rents for:

(1) Single-use facilities by applying the rent from the communication use rent schedule (see § 2806.30 of this subpart) for the type of use and the population strata served; and

(2) Multiple-use facilities, whose authorizations provide for subleasing, by setting the rent of the highest value use in the facility or facilities as the base rent (taken from the rent schedule) and adding to it 25 percent of the rent from the rent schedule for all tenant uses in the facility or facilities, if a tenant use is not used as the base rent (rent = base rent + 25 percent of all rent due to additional tenant uses in the facility or facilities) (see also §§ 2806.32 and 2806.34 of this subpart).

(b) *Exclusions.* When calculating rent, BLM will exclude customer uses, except as provided for at §§ 2806.34(b)(4)

and 2806.42 of this subpart. BLM will also exclude those uses exempted from rent by § 2806.14 of this subpart, and any uses whose rent has been waived or reduced to zero as described in § 2806.15 of this subpart.

(c) *Annual statement.* By October 15 of each year, you, as a grant or lease holder, must submit to BLM a certified statement listing any tenants and customers in your facility or facilities and the category of use for each tenant or customer as of September 30 of the same year. BLM may require you to submit any additional information needed to calculate your rent. BLM will determine the rent based on the certified statement provided. We require only facility owners or facility managers to hold a grant or lease (unless you are an occupant in a federally-owned facility as described in § 2806.42 of this subpart), and will charge you rent for your grant or lease based on the total number of communication uses within the right-of-way and the type of uses and population strata the facility or site serves.

**§ 2806.32 How does BLM determine the population strata served?**

(a) BLM determines the population strata served as follows:

(1) If the site or facility is within a designated RMA, BLM will use the population strata of the RMA;

(2) If the site or facility is within a designated RMA, and it serves two or more RMAs, BLM will use the population strata of the RMA having the greatest population;

(3) If the site or facility is outside an RMA, and it serves one or more RMAs, BLM will use the population strata of the RMA served having the greatest population;

(4) If the site or facility is outside an RMA and the site does not serve an RMA, BLM will use the population strata of the community it serves having the greatest population, as identified in the current edition of the Rand McNally Road Atlas;

(5) If the site or facility is outside an RMA, and it serves a community of less than 25,000, BLM will use the lowest population strata shown on the rent schedule.

(b)(1) BLM considers all facilities (and all uses within the same facility) located at one site to serve the same RMA or community. However, BLM may make case-by-case exceptions in determining the population served at a particular site by uses not located within the same facility and not authorized under the same grant or lease. BLM has the sole responsibility to make this determination. For example, when a site has a mix of high-power and low-power uses that are authorized by separate grants or leases, and only the high-power uses are capable of serving an RMA or community with the greatest population, BLM may separately determine the population strata served by the low-power uses (if not collocated in the same facility with the high-power uses), and calculate their rent as described in § 2806.30 of this subpart.

(2) For purposes of rent calculation, all uses within the same facility and/or authorized under the same grant or lease must serve the same population strata.

(3) For purposes of rent calculation, BLM will not modify the population rankings published in the Rand McNally Commercial Atlas and Marketing Guide or the population of the community served.

**§ 2806.33 How will BLM calculate the rent for a grant or lease authorizing a single use communication facility?**

BLM calculates the rent for a grant or lease authorizing a single-use communication facility from the communication use rent schedule (*see* § 2806.30 of this subpart), based on your authorized single use and the population strata it serves (*see* § 2806.32 of this subpart).

**§ 2806.34 How will BLM calculate the rent for a grant or lease authorizing a multiple-use communication facility?**

(a) *Basic rule.* BLM first determines the population strata the communication facility serves according to § 2806.32 of this subpart and then calculates the rent assessed to facility owners and facility managers for a grant or lease for a communication fa-

cility that authorizes subleasing with tenants, customers, or both, as follows:

(1) *Using the communication use rent schedule.* BLM will determine the rent of the highest value use in the facility or facilities as the base rent, and add to it 25 percent of the rent from the rent schedule (*see* § 2806.30 of this subpart) for each tenant use in the facility or facilities;

(2) If the highest value use is not the use of the facility owner or facility manager, BLM will consider the owner's or manager's use like any tenant or customer use in calculating the rent (*see* § 2806.35(b) for facility owners and § 2806.39(a) for facility managers);

(3) If a tenant use is the highest value use, BLM will exclude the rent for that tenant's use when calculating the additional 25 percent amount under paragraph (a)(1) of this section for tenant uses;

(4) If a holder has multiple uses authorized under the same grant or lease, such as a TV and a FM radio station, BLM will calculate the rent as in paragraph (a)(1) of this section. In this case, the TV rent would be the highest value use and BLM would charge the FM portion according to the rent schedule as if it were a tenant use.

(b) *Special applications.* The following provisions apply when calculating rents for communication uses exempted from rent under § 2806.14 of this subpart or communication uses whose rent has been waived or reduced to zero under § 2806.15 of this subpart:

(1) BLM will exclude exempted uses or uses whose rent has been waived or reduced to zero (*see* §§ 2806.14 and 2806.15 of this subpart) of either a facility owner or a facility manager in calculating rents. BLM will exclude similar uses (*see* §§ 2806.14 and 2806.15 of this subpart) of a customer or tenant if they choose to hold their own grant or lease (*see* § 2806.36 of this subpart) or are occupants in a Federal facility (*see* § 2806.42(a) of this subpart);

(2) BLM will charge rent to a facility owner whose own use is either exempted from rent or whose rent has been waived or reduced to zero (*see* §§ 2806.14 and 2806.15 of this subpart), but who has tenants in the facility, in an amount equal to the rent of the highest value tenant use plus 25 percent of the

rent from the rent schedule for each of the remaining tenant uses subject to rent;

(3) BLM will not charge rent to a facility owner, facility manager, or tenant (when holding a grant or lease) when all of the following occur:

(i) BLM exempts from rent, waives, or reduces to zero the rent for the holder's use (see §§ 2806.14 and 2806.15 of this subpart);

(ii) Rent from all other uses in the facility is exempted, waived, or reduced to zero, or BLM considers such uses as customer uses; and

(iii) The holder is not operating the facility for commercial purposes (see § 2801.5(b) of this part) with respect to such other uses in the facility; and

(4) If a holder, whose own use is exempted from rent or whose rent has been waived or reduced to zero, is conducting a commercial activity with customers or tenants whose uses are also exempted from rent or whose rent has been waived or reduced to zero (see §§ 2806.14 and 2806.15 of this subpart), BLM will charge rent, notwithstanding section 2806.31(b), based on the highest value use within the facility. This paragraph does not apply to facilities exempt from rent under § 2806.14(d) of this subpart except when the facility also includes non-eligible facilities.

**§ 2806.35 How will BLM calculate rent for private mobile radio service (PMRS), internal microwave, and "other" category uses?**

If an entity engaged in a PMRS, internal microwave, or "other" use is:

(a) Using space in a facility owned by either a facility owner or facility manager, BLM will consider the entity to be a customer and not include these uses in the rent calculation for the facility; or

(b) The facility owner, BLM will follow the provisions in § 2806.31 of this subpart to calculate rent for a lease involving these uses. However, we include the rent from the rent schedule for a PMRS, internal microwave, or other use in the rental calculation only if the value of that use is equal to or greater than the value of any other use in the facility. BLM excludes these uses in the 25 percent calculation (see § 2806.31(a) of this subpart) when their

value does not exceed the highest value in the facility.

**§ 2806.36 If I am a tenant or customer in a facility, must I have my own grant or lease and if so, how will this affect my rent?**

(a) You may have your own authorization, but BLM does not require a separate grant or lease for tenants and customers using a facility authorized by a BLM grant or lease that contains a subleasing provision. BLM charges the facility owner or facility manager rent based on the highest value use within the facility (including any tenant or customer use authorized by a separate grant or lease) and 25 percent of the rent from the rent schedule for each of the other uses subject to rent (including any tenant or customer use a separate grant or lease authorizes and the facility owner's use if it is not the highest value use).

(b) If you own a building, equipment shelter, or tower on public lands for communication purposes, you must have an authorization under this part, even if you are also a tenant or customer in someone else's facility.

(c) BLM will charge tenants and customers who hold their own grant or lease in a facility, as grant or lease holders, the full annual rent for their use based on the BLM communication use rent schedule. BLM will also include such tenant or customer use in calculating the rent the facility owner or facility manager must pay.

**§ 2806.37 How will BLM calculate rent for a grant or lease involving an entity with a single use (holder or tenant) having equipment or occupying space in multiple BLM-authorized facilities to support that single use?**

BLM will include the single use in calculating rent for each grant or lease authorizing that use. For example, a television station locates its antenna on a tower authorized by grant or lease "A" and locates its related broadcast equipment in a building authorized by grant or lease "B." The statement listing tenants and customers for each facility (see § 2806.31(c) of this subpart) must include the television use because

#### **§ 2806.38**

each facility is benefitting economically from having the television broadcast equipment located there, even though the combined equipment is supporting only one single end use.

#### **§ 2806.38 Can I combine multiple grants or leases for facilities located on one site into a single grant or lease?**

If you hold authorizations for two or more facilities on the same site, you can combine all those uses under one grant or lease, with BLM's approval. The highest value use in all the combined facilities determines the base rent. BLM then charges for each remaining use in the combined facilities at 25 percent of the rent from the rent schedule. These uses include those uses we previously calculated as base rents when BLM authorized each of the facilities on an individual basis.

#### **§ 2806.39 How will BLM calculate rent for a lease for a facility manager's use?**

(a) BLM will follow the provisions in § 2806.31 of this subpart to calculate rent for a lease involving a facility manager's use. However, we include the rent from the rent schedule for a facility manager's use in the rental calculation only if the value of that use is equal to or greater than the value of any other use in the facility. BLM excludes the facility manager's use in the 25 percent calculation (see § 2806.31(a) of this subpart) when its value does not exceed the highest value in the facility.

(b) If you are a facility owner and you terminate your use within the facility, but want to retain the lease for other purposes, BLM will continue to charge you for your authorized use until BLM amends the lease to change your use to facility manager or to some other communication use.

#### **§ 2806.40 How will BLM calculate rent for a grant or lease for ancillary communication uses associated with communication uses on the rent schedule?**

If the ancillary communication equipment is used solely in direct support of the primary use (see the definition of communication use rent schedule in § 2801.5 of this part), BLM will

#### **43 CFR Ch. II (10–1–08 Edition)**

calculate and charge rent only for the primary use.

#### **§ 2806.41 How will BLM calculate rent for communication facilities ancillary to a linear grant or other use authorization?**

When a communication facility is ancillary to, and authorized by BLM under, a grant for a linear use, or some other type of use authorization (e.g., a mineral lease or sundry notice), BLM will determine the rent using the linear rent schedule (see § 2806.20 of this subpart) or rent scheme associated with the other authorization, and not the communication use rent schedule.

#### **§ 2806.42 How will BLM calculate rent for a grant or lease authorizing a communication use within a federally-owned communication facility?**

(a) If you are an occupant of a federally-owned communication facility, you must have your own grant or lease and pay rent in accordance with these regulations.

(b) If a Federal agency holds a grant or lease and agrees to operate the facility as a facility owner under § 2806.31 of this subpart, occupants do not need a separate BLM grant or lease and BLM will calculate and charge rent to the Federal facility owner under §§ 2806.30 through 2806.44 of this subpart.

#### **§ 2806.43 How does BLM calculate rent for passive reflectors and local exchange networks?**

(a) BLM calculates rent for passive reflectors and local exchange networks by using the same rent schedules for passive reflectors and local exchange networks as the Forest Service uses for the region in which the facilities are located. You may obtain the pertinent schedules from the Forest Service or from any BLM state or field office in the region in question. For passive reflectors and local exchange networks not covered by a Forest Service regional schedule, BLM uses the provisions in § 2806.50 of this subpart to determine rent. See Forest Service regulations at 36 CFR chapter II.

(b) For the purposes of this subpart, the term:

(1) *Passive reflector* includes various types of nonpowered reflector devices

used to bend or ricochet electronic signals between active relay stations or between an active relay station and a terminal. A passive reflector commonly serves a microwave communication system. The reflector requires point-to-point line-of-sight with the connecting relay stations, but does not require electric power; and

(2) *Local exchange network* means radio service which provides basic telephone service, primarily to rural communities.

**§ 2806.44 How will BLM calculate rent for a facility owner's or facility manager's grant or lease which authorizes communication uses subject to the communication use rent schedule and communication uses whose rent BLM determines by other means?**

(a) BLM establishes the rent for each of the uses in the facility that are not covered by the communication use rent schedule using § 2806.50 of this subpart.

(b) BLM establishes the rent for each of the uses in the facility that are covered by the rent schedule using §§ 2806.30 and 2806.31 of this subpart.

(c) BLM determines the facility owner or facility manager's rent by identifying the highest rent in the facility of those established under paragraphs (a) and (b) of this section, and adding to it 25 percent of the rent of all other uses subject to rent.

OTHER RIGHTS-OF-WAY

**§ 2806.50 How will BLM determine the rent for a grant when neither the linear rent schedule at § 2806.20 nor the communication use rent schedule at § 2806.30 applies?**

When neither the linear nor the communication use rent schedule is appropriate, BLM determines your rent through a process based on comparable commercial practices, appraisals, competitive bid, or other reasonable methods. BLM will notify you in writing of the rent determination. If you disagree with the rent determination, you may appeal BLM's final determination under § 2801.10 of this part.

**Subpart 2807—Grant Administration and Operation**

**§ 2807.10 When can I start activities under my grant?**

When you can start depends on the terms of your grant. You can start activities when you receive the grant you and BLM signed, unless the grant includes a requirement for BLM to provide a written Notice to Proceed. If your grant contains a Notice to Proceed requirement, you may not initiate construction, operation, maintenance, or termination until BLM issues you a Notice to Proceed.

**§ 2807.11 When must I contact BLM during operations?**

You must contact BLM:

(a) At the times specified in your grant;

(b) When your use requires a substantial deviation from the grant. You must obtain BLM's approval before you begin any activity that is a substantial deviation;

(c) When there is a change affecting your application or grant, including, but not limited to, changes in:

- (1) Mailing address;
- (2) Partners;
- (3) Financial conditions; or
- (4) Business or corporate status;

(d) When you submit a certification of construction, if the terms of your grant require it. A certification of construction is a document you submit to BLM after you have finished constructing a facility, but before you begin operating it, verifying that you have constructed and tested the facility to ensure that it complies with the terms of the grant and with applicable Federal and state laws and regulations; or

(e) When BLM requests it. You must update information or confirm that information you submitted before is accurate.

**§ 2807.12 If I hold a grant, for what am I liable?**

(a) If you hold a grant, you are liable to the United States and to third parties for any damage or injury they incur in connection with your use and occupancy of the right-of-way.

## § 2807.13

## 43 CFR Ch. II (10–1–08 Edition)

(b) You are strictly liable for any activity or facility associated with your right-of-way area which BLM determines presents a foreseeable hazard or risk of damage or injury to the United States. BLM will specify in the grant any activity or facility posing such hazard or risk, and the financial limitations on damages commensurate with such hazard or risk.

(1) BLM will not impose strict liability for damage or injury resulting primarily from an act of war, an act of God, or the negligence of the United States, except as otherwise provided by law.

(2) As used in this section, strict liability extends to costs incurred by the Federal government to control or abate conditions, such as fire or oil spills, which threaten life, property, or the environment, even if the threat occurs to areas that are not under Federal jurisdiction. This liability is separate and apart from liability under other provisions of law.

(3) You are strictly liable to the United States for damage or injury up to \$2 million for any one incident. BLM will update this amount annually to adjust for changes in the Consumer Price Index for All Urban Consumers, U.S. City Average (CPI-U) as of July of each year (difference in CPI-U from July of one year to July of the following year), rounded to the nearest \$1,000. This financial limitation does not apply to the release or discharge of hazardous substances on or near the grant, or where liability is otherwise not subject to this financial limitation under applicable law.

(4) BLM will determine your liability for any amount in excess of the \$2 million strict liability limitation (as adjusted) through the ordinary rules of negligence.

(5) The rules of subrogation apply in cases where a third party caused the damage or injury.

(c) If you cannot satisfy claims for injury or damage, all owners of any interests in, and all affiliates or subsidiaries of any holder of, a grant, except for corporate stockholders, are jointly and severally liable to the United States.

(d) If BLM issues a grant to more than one person, each is jointly and severally liable.

(e) By accepting the grant, you agree to fully indemnify or hold the United States harmless for liability, damage, or claims arising in connection with your use and occupancy of the right-of-way area.

(f) We address liability of state, tribal, and local governments in § 2807.13 of this subpart.

(g) The provisions of this section do not limit or exclude other remedies.

### **§ 2807.13 As grant holders, what liabilities do state, tribal, and local governments have?**

(a) If you are a state, tribal, or local government or its agency or instrumentality, you are liable to the fullest extent law allows at the time that BLM issues your grant. If you do not have the legal power to assume full liability, you must repair damages or make restitution to the fullest extent of your powers.

(b) BLM may require you to provide a bond, insurance, or other acceptable security to:

(1) Protect the liability exposure of the United States to claims by third parties arising out of your use and occupancy of the right-of-way;

(2) Cover any losses, damages, or injury to human health, the environment, and property incurred in connection with your use and occupancy of the right-of-way; and

(3) Cover any damages or injuries resulting from the release or discharge of hazardous materials incurred in connection with your use and occupancy of the right-of-way.

(c) Based on your record of compliance and changes in risk and conditions, BLM may require you to increase or decrease the amount of your bond, insurance, or security.

(d) The provisions of this section do not limit or exclude other remedies.

### **§ 2807.14 How will BLM notify me if someone else wants a grant for land subject to my grant or near or adjacent to it?**

BLM will notify you in writing when it receives a grant application for land subject to your grant or near or adjacent to it. BLM will consider your

written recommendations as to how the proposed use affects the integrity of, or your ability to operate, your facilities. The notice will contain a time period within which you must respond. The notice may also notify you of additional opportunities to comment.

**§ 2807.15 How is grant administration affected if the land my grant encumbers is transferred to another Federal agency or out of Federal ownership?**

(a) If there is a proposal to transfer the land your grant encumbers to another Federal agency, BLM may, after reasonable notice to you, transfer administration of your grant for the lands BLM formerly administered to another Federal agency, unless doing so would diminish your rights. If BLM determines your rights would be diminished by such a transfer, BLM can still transfer the land, but retain administration of your grant under existing terms and conditions.

(b) If there is a proposal to transfer the land your grant encumbers out of Federal ownership, BLM may, after reasonable notice to you and in conformance with existing policies and procedures:

(1) Transfer the land subject to your grant. In this case, administration of your grant for the lands BLM formerly administered is transferred to the new owner of the land;

(2) Transfer the land, but BLM retains administration of your grant; or

(3) Reserve to the United States the land your grant encumbers, and BLM retains administration of your grant.

(c) BLM or, if BLM no longer administers the land, the new land owner may negotiate new grant terms and conditions with you. This may include increasing the term of your grant, should you request it, to a perpetual grant under § 2806.23(c) of this part or providing for an easement.

**§ 2807.16 Under what conditions may BLM order an immediate temporary suspension of my activities?**

(a) If BLM determines that you have violated one or more of the terms, conditions, or stipulations of your grant, we can order an immediate temporary suspension of activities within the right-of-way area to protect public

health or safety or the environment. BLM can require you to stop your activities before holding an administrative proceeding on the matter.

(b) BLM may issue the immediate temporary suspension order orally or in writing to you, your contractor or subcontractor, or to any representative, agent, or employee representing you or conducting the activity. When you receive the order, you must stop the activity immediately. BLM will, as soon as practical, confirm an oral order by sending or hand delivering to you or your agent at your address a written suspension order explaining the reasons for it.

(c) You may file a written request for permission to resume activities at any time after BLM issues the order. In the request, give the facts supporting your request and the reasons you believe that BLM should lift the order. BLM must grant or deny your request within 5 business days after receiving it. If BLM does not respond within 5 business days, BLM has denied your request. You may appeal the denial under § 2801.10 of this part.

(d) The immediate temporary suspension order is effective until you receive BLM's written notice to proceed with your activities.

**§ 2807.17 Under what conditions may BLM suspend or terminate my grant?**

(a) BLM may suspend or terminate your grant if you do not comply with applicable laws and regulations or any terms, conditions, or stipulations of the grant (such as rent payments), or if you abandon the right-of-way.

(b) A grant also terminates when:

(1) The grant contains a term or condition that has been met that requires the grant to terminate;

(2) BLM consents in writing to your request to terminate the grant; or

(3) It is required by law to terminate.

(c) Your failure to use your right-of-way for its authorized purpose for any continuous 5-year period creates a presumption of abandonment. BLM will notify you in writing of this presumption of abandonment by proving that you used the right-of-way or that your failure to use the right-of-way was due to

#### **§ 2807.18**

circumstances beyond your control, such as acts of God, war, or casualties not attributable to you.

(d) You may appeal a decision under this section under § 2801.10 of this part.

#### **§ 2807.18 How will I know that BLM intends to suspend or terminate my grant?**

(a) Before BLM suspends or terminates your grant under § 2807.17(a) of this subpart, it will send you a written notice stating that it intends to suspend or terminate your grant and giving the grounds for such action. The notice will give you a reasonable opportunity to correct any noncompliance or start or resume use of the right-of-way, as appropriate.

(b) To suspend or terminate a grant issued as an easement, BLM must give you written notice and refer the matter to the Office of Hearings and Appeals for a hearing before an ALJ under 5 U.S.C. 554. No hearing is required if the grant provided by its terms for termination on the occurrence of a fixed or agreed upon condition, event, or time. If the ALJ determines that grounds for suspension or termination exist and such action is justified, BLM will suspend or terminate the grant.

#### **§ 2807.19 When my grant terminates, what happens to any facilities on it?**

(a) After your grant terminates, you must remove any facilities within the right-of-way within a reasonable time, as determined by BLM, unless BLM instructs you otherwise in writing, or termination is due to non-payment of rent (see § 2806.13(c) of this part).

(b) After removing the facilities, you must remediate and restore the right-of-way area to a condition satisfactory to BLM, including the removal and clean up of any hazardous materials.

(c) If you do not remove all facilities within a reasonable period as determined by BLM, BLM may declare them to be the property of the United States. However, you are still liable for the costs of removing them and for remediating and restoring the right-of-way area.

#### **43 CFR Ch. II (10–1–08 Edition)**

#### **§ 2807.20 When must I amend my application, seek an amendment of my grant, or obtain a new grant?**

(a) You must amend your application or seek an amendment of your grant when there is a proposed substantial deviation in location or use.

(b) The requirements to amend an application or grant are the same as those for a new application, including paying processing and monitoring fees and rent according to §§ 2804.14, 2805.16, and 2806.10 of this part.

(c) Any activity not authorized by your grant may subject you to prosecution under applicable law and to trespass charges under subpart 2808 of this part.

(d) If your grant was issued prior to October 21, 1976, and there is a proposed substantial deviation in the location or use or terms and conditions of your right-of-way grant, you must apply for a new grant consistent with the remainder of this section. BLM may respond to your request in one of the following ways:

(1) If BLM approves your application, BLM will terminate your old grant and you will receive a new grant under 43 U.S.C. 1761 *et seq.* and the regulations in this part. BLM may include the same terms and conditions in the new grant as were in the original grant as to annual rent, duration, and nature of interest if BLM determines, based on current land use plans and other management decisions, that it is in the public interest to do so; or

(2) Alternatively, BLM may keep the old grant in effect and issue a new grant for the new use or location, or terms and conditions.

(e) You must apply for a new grant to allow realignment of your railroad and appurtenant communication facilities. BLM must issue a decision within 6 months after it receives your complete application. BLM may include the same terms and conditions in the new grant as were in the original grant as to annual rent, duration, and nature of interest if:

(1) These terms are in the public interest;

(2) The lands are of approximately equal value; and

(3) The lands involved are not within an incorporated community.

**§ 2807.21 May I assign my grant?**

(a) With BLM's approval, you may assign, in whole or in part, any right or interest in a grant.

(b) In order to assign a grant, the proposed assignee must file an application and satisfy the same procedures and standards as for a new grant, including paying processing fees (see subpart 2804 of this part).

(c) The assignment application must also include:

(1) Documentation that the assignor agrees to the assignment; and

(2) A signed statement that the proposed assignee agrees to comply with and be bound by the terms and conditions of the grant that is being assigned and all applicable laws and regulations.

(d) BLM will not recognize an assignment until it approves it in writing. BLM will approve the assignment if doing so is in the public interest. BLM may modify the grant or add bonding and other requirements, including additional terms and conditions, to the grant when approving the assignment. BLM may decrease rents if the new holder qualifies for an exemption (see § 2806.14 of this part), or waiver or reduction (see § 2806.15 of this part) and the previous holder did not. Similarly, BLM may increase rents if the previous holder qualified for an exemption or waiver or reduction and the new holder does not. If BLM approves the assignment, the benefits and liabilities of the grant apply to the new grant holder.

(e) The processing time and conditions described at § 2804.25(c) of this part apply to assignment applications.

**§ 2807.22 How do I renew my grant?**

(a) If your grant specifies that it is renewable, and you choose to renew it, you must apply to BLM to renew the grant at least 120 calendar days before your grant expires. BLM will renew the grant if you are complying with the terms, conditions, and stipulations of the grant and applicable laws and regulations.

(b) If your grant does not address whether it is renewable, you may apply to BLM to renew the grant. You must send BLM your application at least 120 calendar days before your grant expires. In your application you must

show that you are complying with the terms, conditions, and stipulations of the grant and applicable laws and regulations. BLM has the discretion to renew the grant if doing so is in the public interest.

(c) Submit your application under paragraph (a) or (b) of this section and include the same information necessary for a new application (see subpart 2804 of this part). You must reimburse BLM in advance for the administrative costs of processing the renewal in accordance with § 2804.14 of this part.

(d) BLM will review your application and determine the applicable terms and conditions of any renewed grant.

(e) BLM will not renew grants issued before October 21, 1976. If you hold such a grant and would like to continue to use the right-of-way beyond your grant's expiration date, you must apply to BLM for a new FLPMA grant (see subpart 2804 of this part). You must send BLM your application at least 120 calendar days before your grant expires.

(f) If BLM denies your application, you may appeal the decision under § 2801.10 of this part.

**Subpart 2808—Trespass****§ 2808.10 What is trespass?**

(a) Trespass is using, occupying, or developing the public lands or their resources without a required authorization or in a way that is beyond the scope and terms and conditions of your authorization. Trespass is a prohibited act.

(b) Trespass includes acts or omissions causing unnecessary or undue degradation to the public lands or their resources. In determining whether such degradation is occurring, BLM may consider the effects of the activity on resources and land uses outside the area of the activity.

(c) There are two kinds of trespass, willful and non-willful.

(1) *Willful trespass* is voluntary or conscious trespass and includes trespass committed with criminal or malicious intent. It includes a consistent pattern of actions taken with knowledge, even if those actions are taken in the belief that the conduct is reasonable or legal.

## § 2808.11

(2) *Non-willful trespass* is trespass committed by mistake or inadvertence.

### § 2808.11 What will BLM do if it determines that I am in trespass?

(a) BLM will notify you in writing of the trespass and explain your liability. Your liability includes:

(1) Reimbursing the United States for all costs incurred in investigating and terminating the trespass;

(2) Paying the rental for the lands, as provided for in subpart 2806 of this part, for the current and past years of trespass, or, where applicable, the cumulative value of the current use fee, amortization fee, and maintenance fee for unauthorized use of any BLM-administered road; and

(3) Rehabilitating and restoring any damaged lands or resources. If you do not rehabilitate and restore the lands and resources within the time set by BLM in the notice, you will be liable for the costs the United States incurs in rehabilitating and restoring the lands and resources.

(b) In addition to amounts you owe under paragraph (a) of this section, BLM may assess penalties as follows:

(1) For willful or repeated non-willful trespass, the penalty is two times the rent. For roads, the penalty is two times the charges for road use, amortization, and maintenance which have accrued since the trespass began.

(2) For non-willful trespass not resolved within 30 calendar days after receiving the written notice under paragraph (a) of this section, the penalty is an amount equal to the rent. To resolve the trespass you must meet one of the conditions identified in 43 CFR 9239.7-1. For roads, the penalty is an amount equal to the charges for road use, amortization, and maintenance which have accrued since the trespass began.

(c) The penalty will not be less than the fee for a Processing Category 2 application (see § 2804.14 of this part) for non-willful trespass or less than three times this amount for willful or repeated non-willful trespass. You must pay whichever is the higher of:

(1) The amount computed in paragraph (b) of this section; or

(2) The minimum penalty amount in paragraph (c) of this section.

## 43 CFR Ch. II (10-1-08 Edition)

(d) In addition to civil penalties under paragraph (b) of this section, you may be tried before a United States magistrate judge and fined no more than \$1,000 or imprisoned for no more than 12 months, or both, for a knowing and willful trespass, as provided at 43 CFR 9262.1 and 43 U.S.C. 1733(a).

(e) Until you comply with the requirements of 43 CFR 9239.7-1, BLM will not process any of your applications for any activities on BLM lands.

(f) You may appeal a trespass decision under § 2801.10 of this part.

(g) Nothing in this section limits your liability under any other Federal or state law.

### § 2808.12 May I receive a grant if I am or have been in trespass?

Until you satisfy your liability for a trespass, BLM will not process any applications you have pending for any activity on BLM-administered lands. A history of trespass will not necessarily disqualify you from receiving a grant. In order to correct a trespass, you must apply under the procedures described at subpart 2804 of this part. BLM will process your application as if it were a new use. Prior unauthorized use does not create a preference for receiving a grant.

## Subpart 2809—Grants for Federal Agencies

### § 2809.10 Do the regulations in this part apply to Federal agencies?

The regulations in this part apply to Federal agencies to the extent possible, except that:

(a) BLM may suspend or terminate a Federal agency's grant only if:

(1) The terms and conditions of the Federal agency's grant allow it; or

(2) The agency head holding the grant consents to it; and

(b) Federal agencies are generally not required to pay rent for a grant (see § 2806.14 of this part).

## Bureau of Land Management, Interior

## § 2812.0-5

### PART 2810—TRAMROADS AND LOGGING ROADS

#### Subpart 2812—Over O. and C. and Coos Bay Revested Lands

Sec.

- 2812.0-3 Authority.
- 2812.0-5 Definitions.
- 2812.0-6 Statement of policy.
- 2812.0-7 Cross reference.

AUTHORITY: 43 U.S.C. 1181e, 1732, 1733, and 1740.

#### Subpart 2812—Over O. and C. and Coos Bay Revested Lands

SOURCE: 35 FR 9638, June 13, 1970, unless otherwise noted.

##### § 2812.0-3 Authority.

Sections 303 and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, and 1740), and the Act of August 28, 1937 (43 U.S.C. 1181a and 1181b), provide for the conservation and management of the Oregon and California Railroad lands and the Coos Bay Wagon Road lands and authorize the Secretary of the Interior to issue regulations providing for the use, occupancy, and development of the public lands through permits and rights-of-way.

[54 FR 25855, June 20, 1989]

##### § 2812.0-5 Definitions.

Except as the context may otherwise indicate, as the terms are used in this paragraph:

(a) *Bureau* means Bureau of Land Management.

(b) *Timber of the United States or federal timber* means timber owned by the United States or managed by any agency thereof, including timber on allotted and tribal Indian lands in the O. and C. area.

(c) *State Director* means the State Director, Bureau of Land Management, or his authorized representative.

(d) *Authorized Officer* means an employee of the Bureau of Land Management to whom has been delegated the authority to take action.

(e) *O. and C. lands* means the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands, other lands administered by the Bureau under the provisions of the act approved August 28, 1937, and the public lands administered by the Bureau of Land Management which are in Oregon and in and west of Range 8 E., Willamette Meridian, Oregon.

(f) *Tramroads* include tramways, and wagon or motor-truck roads to be used in connection with logging, and the manufacturing of lumber; it also includes railroads to be used principally for the transportation, in connection with such activities, of the property of the owner of such railroad.

(g) *Management* means police protection, fire presuppression and suppression, inspection, cruising, reforestation, thinning, stand improvement, inventorying, surveying, construction and maintenance of improvements, disposal of land, the eradication of forest insects, pests and disease, and other activities of a similar nature.

(h) *Licensee* of the United States is, with respect to any road or right-of-way, any person who is authorized to remove timber or forest products from lands of the United States, or to remove timber or forest products from other lands committed by a cooperative agreement to coordinated administration with the timber of the United States over such road or right-of-way while it is covered by an outstanding permit, or while a former permittee is entitled to receive compensation for such use under the provisions of these regulations. A licensee is not an agent of the United States.

(i) *Direct control* of a road, right-of-way, or land, by an applicant for a permit hereunder means that such applicant has authority to permit the United States and its licensees to use such road, right-of-way of land in accordance with this paragraph.

(j) *Indirect control* of a road, right-of-way, or land, by an applicant hereunder means that such road, right-of-way, or land, is not directly controlled by him but is subject to use by him or by:

(1) A principal, disclosed or undisclosed, of the applicant; or

(2) A beneficiary of any trust or estate administered or established by the applicant; or

(3) Any person having or exercising the right to designate the immediate destination of the timber to be transported over the right-of-way for which application is made; or

(4) Any person who at any time has owned, or controlled the disposition of the timber to be transported over the

right-of-way applied for, and during the 24 months preceding the filing of the application has disposed of such ownership or control to the applicant or his predecessor, under an agreement reserving or conferring upon the grantor the right to share directly or indirectly in the proceeds realized upon the grantee's disposal to third persons of the timber or products derived therefrom or the right to reacquire ownership or control of all or any part of the timber prior to the time when it undergoes its first mechanical alteration from the form of logs; or

(5) Any person who stands in such relation to the applicant that there is liable to be absence of arm's length bargaining in transactions between them relating to such road, rights-of-way, or lands.

**§ 2812.0-6 Statement of policy.**

(a) The intermingled character of the O. and C. lands presents peculiar problems of management which require for their solution the cooperation between the Federal Government and the owners of the intermingled lands, particularly with respect to timber roads.

(b) It is well established that the value of standing timber is determined in significant part by the cost of transporting the logs to the mill. Where there is an existing road which is adequate or can readily be made adequate for the removal of timber in the area, the failure to make such road available for access to all the mature and over-mature timber it could tap leads to economic waste. Blocks of timber which are insufficient in volume or value to support the construction of a duplicating road may be left in the woods for lack of access over the existing road. Moreover, the duplication of an existing road reduces the value of the federal and other timber which is tapped by the existing road.

(c) It is also clear that the Department of the Interior, which is responsible for the conservation of the resources of the O. and C. lands and is charged specifically with operating the timber lands on a sustained-yield basis, must have access to these lands for the purpose of managing them and their resources. In addition, where the public interest requires the disposition of

Federal timber by competitive bidding, prospective bidders must have an opportunity to reach the timber to be sold. Likewise, where other timber is committed by cooperative agreement to coordinated administration with timber of the United States, there must be access to both.

(d) Accordingly, to the extent that in the judgment of the authorized officer it appears necessary to accomplish these purposes, when the United States, acting through the Bureau of Land Management, grants a right-of-way across O. and C. lands to a private operator, the private operator will be required to grant to the United States for use by it and its licensees:

(1) Rights-of-way across lands controlled directly or indirectly by him;

(2) The right to use, to the extent indicated in §§2812.3-5 and 2812.3-6, any portions of the road system or rights-of-way controlled directly or indirectly by the private operator which is adequate or can economically be made adequate to accommodate the probable normal requirements of both the operator and of the United States and its licensees, and which form an integral part of or may be added to the road system with which the requested right-of-way will connect;

(3) The right to extend such road system across the operator's lands to reach federal roads or timber; and

(4) In addition, in the limited circumstances set forth in §2812.3-2 of this subpart the right to use certain other roads and rights-of-way. The permit will describe by legal subdivisions the lands of the operator as to which the United States receives rights. In addition, the extent and duration of the rights received by the United States will be specifically stated in the permit and ordinarily will embrace only those portions of such road system, rights-of-way and lands as may be actually needed for the management and removal of federal timber, or other timber committed by a cooperative agreement to coordinated administration with timber of the United States.

(e) When the United States or a licensee of the United States uses any portion of a permittee's road system for the removal of forest products, the permittee will be entitled to receive

just compensation, including a fair share of the maintenance and amortization charges attributable to such road, and to prescribe reasonable road operating rules, in accordance with §§2812.3-7 to 2812.4-4.

(f) As some examples of how this policy would be applied in particular instances, the United States may issue a permit under subpart 2812 without requesting any rights with respect to roads, rights-of-way or lands which the authorized officer finds will not be required for management of or access to Federal timber, or timber included in a cooperative agreement. Where, however, the authorized officer finds that there is a road controlled directly or indirectly by the applicant, which will be needed for such purposes and which he finds either has capacity to accommodate the probable normal requirements both of the applicant and of the Government and its licensees, or such additional capacity can be most economically provided by an investment in such road system by the Government rather than by the construction of a duplicate road, he may require, for the period of time during which the United States and its licensees will have need for the road, the rights to use the road for the marketing and management of its timber and of timber included in a cooperative agreement in return for the granting of rights-of-way across O. and C. lands, and an agreement that the road builder will be paid a fair share of the cost of the road and its maintenance. Where it appears to the authorized officer that such a road will not be adequate or cannot economically be enlarged to handle the probable normal requirements both of the private operator and of the United States and its licensees, or even where the authorized officer has reasonable doubt as to such capacity, he will not request rights over such a road. Instead, the Bureau will make provision for its own road system either by providing in its timber sale contracts that in return for the road cost allowance made in fixing the appraised value of the timber, timber purchasers will construct or extend a different road system, or by expending for such construction or by extension monies appropriated for such purposes

by the Congress, or, where feasible, by using an existing duplicating road over which the Government has obtained road rights. In such circumstances, however, road cost and maintenance allowances made in the stumpage price of O. and C. timber will be required to be applied to the road which the Bureau has the right to use, and thereafter will not in any circumstances be available for amortization or maintenance costs of the applicant's road.

(g) When a right-of-way permit is issued for a road or road system over which the United States obtains rights of use for itself and its licensees, the authorized officer will seek to agree with the applicant respecting such matters as the time, route, and specifications for the future development of the road system involved; the portion of the capital and maintenance costs of the road system to be borne by the timber to be transported over the road system by the United States and its licensees; a formula for determining the proportion of the capacity of the road system which is to be available to the United States and its licensees for the transportation of forest products; and other similar matters respecting the use of the road by the United States and its licensees and the compensation payable therefor. To the extent that any such matter is not embraced in such an agreement, it will be settled by negotiation between the permittee and the individual licensees of the United States who use the road, and, in the event of their disagreement, by private arbitration between them in accordance with the laws of the State of Oregon.

(h) The authorized officer may in his discretion, issue short term right-of-way permits for periods not exceeding three years, subject to one-year extensions in his discretion. Such permits shall specify the volume of timber which may be carried over the right-of-way and the area from which such timber may be logged. The permits shall be revocable by the authorized officer, the State Director, or the Secretary for violation of their terms and conditions or of these regulations or if hazardous conditions result from the construction, maintenance or use of the rights-of-way by the permittees or those act-

ing under their authority. As a condition for the granting of such permits, the applicant must comply with §§ 2812.3-1 and 2812.3-3 of this subpart to the extent that rights-of-way and road use rights are needed to remove government timber offered for sale in the same general area during the period for which the short term right-of-way is granted.

(i) The authorized officer may, in his discretion, issue to private operators rights-of-way across O. and C. lands, needed for the conduct of salvage operations, for a period not to exceed five years. A salvage operation as used in this paragraph means the removal of trees injured or killed by windstorms, insect infestation, disease, or fire, together with any adjacent green timber needed to make an economic logging show. As a condition of the granting of such rights-of-way, the operator will be required, when the authorized officer deems it necessary, to grant to the United States and its licensees for the conduct of salvage operations on O. and C. lands for a period not to exceed five years, rights-of-way across lands controlled directly or indirectly by him and to grant the right to use to the extent indicated in §§ 2812.3-5 and 2812.3-6 any portions of the road system controlled directly or indirectly by the private operator which is adequate or can economically be made adequate to accommodate the requirements of both the operator and of the United States and its licensees.

**§ 2812.0-7 Cross reference.**

For disposal of timber or material to a trespasser, see § 9239.0-9 of this chapter.

**§ 2812.0-9 Information collection.**

The information collection requirements contained in part 2810 of Group 2800 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0102 and 1004-0107. The information is being collected to permit the authorized officer to determine if use of the public lands should be granted for rights-of-way grants or temporary use permits. The information

## Bureau of Land Management, Interior

## §2812.1-2

will be used to make this determination. A response is required to obtain a benefit.

[60 FR 57072, Nov. 13, 1995]

### §2812.1 Application procedures.

#### §2812.1-1 Filing.

(a) An application for a permit for a right-of-way over the O. and C. lands must be submitted in duplicate on a form prescribed by the Director and filed in the appropriate district office. Application forms will be furnished upon request.

(b) Any application filed hereunder, including each agreement submitted by the applicant as a part thereof or as a condition precedent to the issuance of a permit, may be withdrawn by the applicant by written notice delivered to the authorized officer prior to the time the permit applied for has been issued to, and accepted by, the applicant.

[35 FR 9637, June 13, 1970, as amended at 41 FR 21642, May 27, 1976]

#### §2812.1-2 Contents.

(a) An individual applicant and each member of any unincorporated association which is an applicant must state in the application whether he is a native born or a naturalized citizen of the United States. Naturalized citizens will be required to furnish evidence of naturalization pursuant to the provisions of §2802.1-4.

(b) An application by a private corporation must be accompanied by two copies of its articles of incorporation, one of which must be certified by the proper official of the company under its corporate seal, or by the secretary of the State where organized. A corporation organized in a State other than Oregon must submit a certificate issued by the State of Oregon attesting that the corporation is authorized to transact business within that State. The requirements of this paragraph shall be deemed satisfied if the corporation, having once filed the required documents, makes specific reference to the date and case number of such previous applications, states what changes, if any, have been made since the prior filings, and includes a statement that the right of the company to

do business in the State of Oregon has not lapsed or terminated.

(c) Where the application is for a right-of-way on any portion of which the applicant proposes to construct a road, it must be accompanied by two copies of a map prepared on a scale of 4 inches or 8 inches to the mile. Showing the survey of the right-of-way so that it may be accurately located on the ground. The map should comply with the following requirements, except as the authorized officer may waive in any particular instance all or any of such requirements:

Courses and distances of the center line of the right-of-way should be given; the courses referred to the true meridian and the distance in feet and decimals thereof. The initial and terminal points of the survey must be accurately connected by course and distance to the nearest readily identifiable corner of the public land surveys, or, if there be no such corner within two miles, then connected to two permanent and prominent monuments or natural objects. All subdivisions of the public lands surveys, any part of which is within the limits of the survey, should be shown in their entirety, based upon the official subsisting plat with subdivisions, section, township, and range clearly marked. The width of the right-of-way should be given; and if not of uniform width, the locations and amount of change must be definitely shown. There shall also be a statement on the face of or appended to the map indicating the grade and usable width of the road to be constructed, the type of material which will be used for the surface, the type and extent of the drainage facilities, and the type of construction and estimated capacity of any bridges. The map should bear upon its face the statement of the person who made the survey, if any, and the certificate of the applicant; such statement and certificate should be as set out in Forms as approved by the Director.

(d) Where the application is for the use of an existing road, a map adequate to show the location thereof will be required, together with a statement of the specific nature and location of any proposed improvements to such road. A blank map suitable for most cases may be procured from the appropriate district forester.

(e) Every application for a right-of-way must also be accompanied by a diagram indicating the roads and rights-of-way which form an integral part of the road system with which the requested right-of-way will connect,

### § 2812.1-3

the portions of such road system which the applicant directly controls within the meaning of § 2812.0-5(i), the portions thereof which the applicant indirectly controls within the meaning of § 2812.0-5(j), and the portions thereof as to which the applicant has no control within the meaning of such sections. As to the portions over which the applicant has no control, he must furnish a statement showing for the two years preceding the date of the filing of the application, all periods of time that he had direct or indirect control thereof, and the date and nature of any changes in such control. The diagram shall also contain the name of the person whom the applicant believes directly controls any portion of such road system which the applicant does not directly control. Where a right-of-way for a railroad is involved, the applicant must indicate which portions of the right-of-way will be available for use as truck roads upon the removal of the rails and ties and the probable date of such removal. Blank diagram forms, suitable for most cases, may be obtained from the appropriate district forester.

### § 2812.1-3 Unauthorized use, occupancy, or development.

Any use, occupancy, or development of the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands (O&C) lands (as is defined in 43 CFR 2812.0-5(e)), for tramroads without an authorization pursuant to this subpart, or which is beyond the scope and specific limitations of such an authorization, or that cause unnecessary or undue degradation, is prohibited and shall constitute a trespass as defined in § 2808.10 of this chapter. Anyone determined by the authorized officer to be in violation of this section shall be notified of such trespass in writing and shall be liable to the United States for all costs and payments determined in the same manner as set forth in subpart 2808 of this chapter.

[70 FR 21078, Apr. 22, 2005]

### § 2812.2 Nature of permit.

#### § 2812.2-1 Nonexclusive license.

Permits for rights-of-way for tramroads, do not constitute ease-

### 43 CFR Ch. II (10-1-08 Edition)

ments, and do not confer any rights on the permittee to any material for construction or other purposes except, in accordance with the provisions of §§ 2812.6-2 and 2812.8-3, such materials as may have been placed on such lands by a permittee. The permits are merely nonexclusive licenses to transport forest products owned by the permittee. Such permits may be canceled pursuant to § 2812.8.

#### § 2812.2-2 Right of permittee to authorize use by third parties.

A permittee may not authorize other persons to use the right-of-way for the transportation of forest products which are not owned by the permittee. Any person, other than the permittee or a licensee of the United States who desires to use the right-of-way for such purposes, is required to make application therefor and to comply with all the provisions of these regulations relating to applications and applicants: *Provided, however,* That upon the request of a permittee the authorized officer may, with respect to an independent contractor who desires to use such right-of-way for the transportation of forest products owned by such independent contractor and derived from timber or logs acquired by him from such permittee, waive the requirements of this sentence. Where the right-of-way involved has been substantially improved by the holder of an outstanding permit, any subsequent permit issued for the same right-of-way will be conditioned upon the subsequent permittee's agreement while the prior permit is outstanding, to be bound by the road rules of and to pay fair compensation to, the prior permittee, such rules and compensation to be agreed upon by the prior and subsequent permittee in accordance with the procedures and standards established by the regulations in §§ 2812.4-1, 2812.4-3, and 2812.4-4 of this subpart.

#### § 2812.2-3 Construction in advance of permit.

The authorized officer may grant an applicant authority to construct improvements on a proposed right-of-way prior to a determination whether the permit should issue. Such advance authority shall not be construed as any

## **Bureau of Land Management, Interior**

## **§ 2812.3-4**

representation or commitment that a permit will issue. Upon demand by the authorized officer, the applicant will fully and promptly comply with all the requirements imposed under and by this paragraph. Advance construction will not be authorized unless and until applicant has complied with §§ 2812.1-1, 2812.1-2, 2812.3-1 and 2812.5-1.

### **§ 2812.3 Right-of-way and road use agreement.**

#### **§ 2812.3-1 Rights over lands controlled by applicant.**

Where, in the judgment of the authorized officer, it appears necessary in order to carry out the policy set forth in § 2812.0-6, he may require the applicant, as a condition precedent to the issuance of the permit:

(a) To grant to the United States, for use by it and its licensees and permittees, rights-of-way across lands in the O. and C. area directly controlled by the applicant; and as to lands in such area which are indirectly controlled by him, either to obtain such rights for the United States or to make a showing satisfactory to the authorized officer that he has negotiated therefor in good faith and to waive as to the United States, its licensees and permittees any exclusive or restricted right he may have to such lands as are indirectly controlled by him.

(b) In addition, to agree to permit the United States and its licensees, upon the payment of fair compensation as hereinafter provided, to use under the terms and conditions of this paragraph such portion as the applicant directly controls of the road system and rights-of-way which are an integral part of or may be added to the road system with which the right-of-way applied for will connect, and as to the portions of such road system or rights-of-way as the applicant indirectly controls, either to obtain such rights for the United States and its licensees or to make a showing satisfactory to the authorized officer that he has negotiated therefor in good faith and, in such latter circumstance, to waive as to the United States and its licensees any exclusive or restricted right he may have in such portion of the road system and rights-of-way.

#### **§ 2812.3-2 Other roads and rights-of-way controlled by applicant.**

In addition to the private road systems and rights-of-way described in § 2812.3-1 in the event the applicant controls directly or indirectly other roads or rights-of-way in any O. and C. area where the authorized officer of the Bureau finds that, as of the time of filing or during the pendency of the application, the United States is unreasonably denied access to its timber for management purposes or where, as of such time, competitive bidding by all prospective purchasers of timber managed by the Bureau in the O. and C. area, or of other Federal timber intermingled with or adjacent to such timber, is substantially precluded by reason of the applicant's control, direct or indirect, of such roads or rights-of-way, the authorized officer may require the applicant to negotiate an agreement granting to the United States and its licensees the right to use, in accordance with the terms and conditions of this paragraph such portion of such roads or rights-of-way as may be necessary to accommodate such management or competitive bidding.

#### **§ 2812.3-3 Form of grant to the United States, recordation.**

Any grant of rights to the United States under this section shall be executed on a form prescribed by the Director which shall constitute and form a part of any permit issued upon the application involved. The applicant shall record such agreement in the office of land records of the county or counties in which the roads, rights-of-way, or lands, subject to the agreement are located, and submit evidence of such recordation to the appropriate district manager.

#### **§ 2812.3-4 Where no road use agreement is required.**

Where, in the judgment of the authorized officer, it is consistent with the policy set forth in subpart 2811 he may issue a permit without requesting the applicant to grant any rights to the United States under this paragraph.

#### **§ 2812.3-5**

##### **§ 2812.3-5 Use by the United States and its licensees of rights received from a permittee.**

The use by the United States and its licensees of any of the rights received from a permittee hereunder shall be limited to that which is necessary for management purposes, or to reach, by the most reasonably direct route, involving the shortest practicable use of the permittee's road system, a road or highway which is suitable for the transportation of forest products in the type and size of vehicle customarily used for such purposes and which is legally available for public use for ingress to and the removal of forest products from Government lands or from other lands during such periods of time as the timber thereon may be committed by a cooperative agreement to coordinated administration with timber of the United States. However, the type and size of vehicle which may be used by the licensee on the permittee's road shall be governed by §§ 2812.3-7 and 2812.4-3.

##### **§ 2812.3-6 Duration and location of rights granted or received by the United States.**

The rights-of-way granted by the United States under any permit issued under § 2812.6, subject to the provisions of § 2812.7, will be for a stated term or terms which may vary for each portion of the right-of-way granted; such term or terms will normally be coincident with the probable period of use for the removal of forest products by the permittee and any successor in interest of the various portions of the right-of-way requested. In the same manner the permit will also state the duration of the rights of the United States to use and to permit its licensees to use, and the location by legal subdivisions of, each of the various portions, if any, of the roads, rights-of-way, and lands which a permittee hereunder authorizes the United States and its licensees to use; and, similarly, the duration of such rights received by the United States will normally be coincident with the probable period of use for the removal of forest products, by the United States and its existing and prospective licensees, of such roads, rights-of-way, and lands.

#### **43 CFR Ch. II (10-1-08 Edition)**

##### **§ 2812.3-7 Permittee's agreement with United States respecting compensation and adjustment of road use.**

(a) Where the United States receives rights over any road, right-of-way, or lands, controlled directly or indirectly by a permittee, the authorized officer will seek to arrive at an advance agreement with the permittee respecting any or all of such matters as the time, route, and specifications for the development of the road system in the area; the total volume of timber to be moved over such road system, and the proportion of such timber which belongs to the United States or is embraced in a cooperative agreement for coordinated management with timber of the United States managed by the Bureau; the consequent proportion of the capital costs of the road system to be borne by such timber of the United States or embraced in such cooperative agreement; the period of time over, or rate at which, the United States or its licensees shall be required to amortise such capital cost; provisions for road maintenance; the use in addition to the uses set forth in § 2812.3-5 which the United States and its licensees may make of the road system involved, a formula for determining the proportionate capacity of the road system or portions thereof which shall be available to the United States and its licensees for the transportation of forest products; the amount and type of insurance to be carried, and the type of security to be furnished by licensees of the United States who use such road; and such other similar matters as the authorized officer may deem appropriate. To the extent necessary to fulfill the obligations of the United States under any such advance agreement, subsequent contracts for the sale of timber managed by the Bureau and tapped by such road system, and subsequent cooperative agreements for the coordinated management of such timber with other timber, will contain such provisions as may be necessary or appropriate to require such licensees to comply with the terms of the advance agreement. Where such an advance agreement between the United States and the permittee includes provisions relating to the route and specifications

## Bureau of Land Management, Interior

## §2812.4-1

for extensions of the road system involved, the authorized officer may agree that upon the filing of proper applications in the future the applicant or his successor in interest shall receive the necessary permits for such road extensions as may cross lands managed by the Bureau: *Provided, however,* That the applicant shall have substantially complied with the terms of such advance agreement and of the outstanding permits theretofore issued to him.

(b) The provisions of §2812.4 shall not be applicable to any matters embraced in an agreement made pursuant to this section.

### §2812.4 Arbitration and agreements.

#### §2812.4-1 Agreements and arbitration between permittee and licensee respecting compensation payable by licensee to permittee for use of road.

(a) In the event the United States exercises the rights received from a permittee hereunder to license a person to remove forest products over any road, right-of-way, or lands of the permittee or of his successor in interest, to the extent that such matters are not covered by an agreement under §2812.3-7 of this subpart, such licensee will be required to pay the permittee or his successor in interest such compensation and to furnish him such security, and to carry such liability insurance as the permittee or his successor in interest and the licensee may agree upon. If the parties do not agree, then upon the written request of either party delivered to the other party, the matter shall be referred to and finally determined by arbitration in accordance with the procedures established by §2812.4-4. During the pendency of such arbitration proceedings the licensee shall be entitled to use the road, right-of-way, or lands involved upon payment, or tender thereof validly maintained, to the permittee of an amount to be determined by the authorized officer and upon the furnishing to the permittee of a corporate surety bond in an amount equal to the difference between the amount fixed by the authorized officer and the amount sought by the permittee. The licensee shall also, as a condition of use in such cir-

cumstances, maintain such liability insurance in such amounts covering any additional hazard and risk which might accrue by reason of the licensee's use of the road, as the authorized officer may prescribe.

(b) The arbitrators shall base their award as to the compensation to be paid by the licensee to the permittee or his successor in interest upon the amortization of the replacement costs for a road of the type involved, including in such replacement costs an extraordinary cost peculiar to the construction of the particular road involved and subtracting therefrom any capital investment made by the United States or its licensees in the particular road involved or in improvements thereto used by and useful to the permittee or his successor in interest plus a reasonable interest allowance on the resulting cost figure, taking into account the risk involved, plus costs of maintenance if furnished by the permittee or his successor, including costs of gates and gateman. In arriving at the amortization item, the arbitrators shall take into account the probable period of time, past and present, during which such road may be in existence, and the volume of timber which has been moved and the volume of timber currently merchantable, which probably will be moved from all sources over such road. The arbitrators shall also take into account the extent to which the use which the licensee might otherwise economically make of the road system is limited by §2812.3-5. In addition, the arbitrators may fix the rate at which payments shall be made by the licensee during his use of the road. The arbitrators shall require the licensee to provide adequate bond, cash deposit, or other security to indemnify the permittee or his successor in interest against failure of the licensee to comply with the terms of the award and against damage to the road not incident to normal usage and for any other reasonable purpose, and also to carry appropriate liability insurance covering any additional hazard and risks which may accrue by reason of the licensee's use of the road.

(c) Where improvements or additions are required to enable a licensee to use

a road or right-of-way to remove timber or forest products, the cost of such improvements will be allowable to the licensee.

(d) The full value at current stumpage prices will be allocable against a licensee for all timber to be cut, removed, or destroyed by the licensee on a permittee's land in the construction or improvement of the road involved.

**§ 2812.4-2 Compensation payable by United States to permittee for use of road.**

In the event the United States itself removes forest products over any road or right-of-way of the permittee or his successor in interest, the United States, if there has been no agreement under § 2812.3-7 covering the matter, shall pay to the permittee or his successor in interest reasonable compensation as determined by the State Director, who shall base his determination upon the same standards established by this paragraph for arbitrators in the determination of the compensation to be paid by a licensee to a permittee: *Provided, however,* That no bond or other security or liability insurance is to be required of the United States. When the United States constructs or improves a road on a permittee's land or right-of-way it shall pay to the permittee the full value at current stumpage prices of all timber of the permittee cut, removed, or destroyed in the construction or maintenance of such road or road improvements. Current stumpage prices shall be determined by the application of the standard appraisal formula, used in appraising O. and C. timber for sale, to the volume and grade of timber. Such volume and grade shall be determined by a cruise made by the permittee or, at his request, by the authorized officer. If either the permittee or the authorized officer does not accept the cruise made by the other, the volume and grade shall be determined by a person or persons acceptable both to the permittee and the State Director.

**§ 2812.4-3 Agreements and arbitration between permittee and licensee respecting adjustment of road use.**

(a) When the United States exercises the right received under this paragraph

to use or to license any person to use a road of a permittee, the permittee or his successor in interest shall not unreasonably obstruct the United States or such licensee in such use. If there has been no agreement under § 2812.3-7 covering such matters, the permittee shall have the right to prescribe reasonable operating regulations, to apply uniformly as between the permittee and such licensee, covering the use of such road for such matters as speed and load limits, scheduling of hauls during period of use by more than one timber operator, coordination of peak periods of use, and such other matters as are reasonably related to safe operations and protection of the road; if the capacity of such road should be inadequate to accommodate the use thereof which such licensee and permittee desire to make concurrently, they shall endeavor to adjust their respective uses by agreement.

(b) If the permittee and such licensee are unable to agree as to the reasonableness of such operating regulations or on the adjustment of their respective uses where the capacity of the road is inadequate to accommodate their concurrent use, then upon the written request of either party delivered to the other party, the matter shall be referred to and finally determined by arbitration in accordance with the procedures established by § 2812.4-4.

(c) The arbitrators may make such disposition of a dispute involving the reasonableness of such operating regulations as appears equitable to them, taking into account the capacity and the construction of the road and the volume of use to which it will be subjected. In the determination of a dispute arising out of the inadequacy of the capacity of a road to accommodate the concurrent use by a permittee and a licensee, the arbitrators may make such disposition thereof as appears equitable to them, taking into account, among other pertinent facts, the commitments of the permittee and the licensee with respect to the cutting and removal of the timber involved and the disposition of the products derived therefrom; the extent to which each of the parties may practicably satisfy any of the aforesaid commitments from

## Bureau of Land Management, Interior

## § 2812.5-2

other timber currently controlled by him; the past normal use of such road by the permittee; the extent to which federal timber has contributed to the amortization of the capital costs of such road; and the extent to which the United States or its licensees have enlarged the road capacity.

### § 2812.4-4 Arbitration procedure.

(a) Within 10 days after the delivery of a written request for arbitration under § 2812.4-1 or § 2812.4-3 of this subpart each of the parties to the disagreement shall appoint an arbitrator and the two arbitrators thus appointed shall select a third arbitrator. If either party fails to appoint an arbitrator as provided herein, the other party may apply to a court of record of the State of Oregon for the appointment of such an arbitrator, as provided by the laws of such State. If within ten days of the appointment of the second of them, the original two arbitrators are unable to agree upon a third arbitrator who will accept the appointment, either party may petition such a court of record of the State of Oregon for the appointment of a third arbitrator. Should any vacancy occur by reason of the resignation, death or inability of one or more of the arbitrators to serve, the vacancy shall be filled according to the procedures applicable to the appointment of the arbitrator whose death, disability, or other inability to serve, created the vacancy.

(b) By mutual agreement, the parties may submit to a single arbitration proceeding controversies arising under both §§ 2812.4-1 and 2812.4-3.

(c) The arbitrators shall hear and determine the controversy and make, file, and serve their award in accordance with the substantive standards prescribed in §§ 2812.4-1 and 2812.4-3, for the type of controversy involved and in accordance with the procedures established by the laws of the State of Oregon pertaining to arbitration proceedings. A copy of the award shall also be served at the same time upon the authorized officer or the State Director, either personally or by registered mail.

(d) Costs of the arbitration proceedings shall be assessed by the arbitrators against either or both of the

parties, as may appear equitable to the arbitrators, taking into account the original contentions of the parties, the ultimate decision of the arbitrators and such other matter as may appear relevant to the arbitrators.

[35 FR 9638, June 13, 1970, as amended at 41 FR 21642, May 27, 1976]

### § 2812.5 Payment to the United States, bond.

#### § 2812.5-1 Payment required for O. and C. timber.

An applicant will be required to pay to the Bureau of Land Management, in advance of the issuance of the permit, the full stumpage value as determined by the authorized officer of the estimated volume of all timber to be cut, removed, or destroyed, on O. and C. lands in the construction or operation of the road.

#### § 2812.5-2 Payment to the United States for road use.

(a) A permittee shall pay a basic fee of \$5 per year per mile or fraction thereof for the use of any existing road or of any road constructed by the permittee upon the right-of-way. If the term of the permit is for 5 years or less, the entire basic fee must be paid in advance of the issuance of the permit. If the term of the permit is longer than 5 years, the basic fee for each 5-year period or for the remainder of the last period, if less than 5 years, must be paid in advance at 5-year intervals: *Provided, however,* That in those cases where the permittee has executed under §§ 2812.3-1 to 2812.3-5 an agreement respecting the use of roads, rights-of-way or lands, no such basic fee shall be paid: *Provided further,* This paragraph shall not apply where payment for road use is required under § 2812.3-1(b).

(b) Where the permittee receives a right to use a road constructed or acquired by the United States, which road is under the administrative jurisdiction of the Bureau of Land Management, the permittee will be required to pay to the United States a fee to be determined by the authorized officer who may also fix the rate at which payments shall be made by the permittee

during his use of the road. The authorized officer shall base his determination upon the amortization of the replacement costs for a road of the type involved, together with a reasonable interest allowance on such costs plus costs of maintenance if furnished by the United States and any extraordinary costs peculiar to the construction or acquisition of the particular road. In the case of federally acquired or constructed access roads, an allowance representing a reasonable allocation for recreational or other authorized uses shall be deducted from the replacement costs of the road before the amortization item is computed. A similar allowance and deduction shall be made in cases involving roads constructed as a part of a timber sale contract when, and if, subsequent to completion of such contract any such road becomes subject to recreational or other authorized uses. In arriving at the amortization item, the authorized officer shall take into account the probable period of time, past and present, during which such road may be in existence, and the volume of timber which has been moved, and the volume of timber currently merchantable which probably will be moved from all sources over such road: *Provided, however,* That this subdivision shall not apply where the permittee transports forest products purchased from the United States through the Bureau of Land Management, or where payment for such road use to another permittee is required under this subpart 2812: *Provided further,* That where the United States is entitled to charge a fee for the use of a road, the authorized officer may waive such fee if the permittee grants to the United States and its licensees the right to use, without charge, permittee's roads of approximately equal value as determined under the methods provided in this subdivision and § 2812.4-1(b), as may be applicable.

(c) If an application is filed to use a road built on O. and C. lands by the applicant or his predecessor in interest under a permit which has expired, the authorized officer may issue a new permit which provides that as to such road the applicant's road use payments shall be determined in accordance with

paragraph (b) of this section except that he shall be required to pay a road use fee which is adequate to amortize only his proportionate share of any capital improvements which have been or may be placed on the road by the United States or its licensees together with a reasonable interest allowance thereon plus cost of maintenance if furnished by the United States: *Provided, however,* That if the application is for use of a road which has been built by a predecessor in interest the permit shall provide that the applicant may use the road only for the purpose of reaching the lands of the predecessor in interest that were served by the road. As a condition for the granting of such a permit, the applicant must comply with §§ 2812.3-1 to 2812.3-5 to the extent that rights-of-way and road use rights are needed to manage lands of the United States or to remove timber therefrom.

**§ 2812.5-3 Bonds in connection with existing roads.**

An applicant for permit or a permittee desiring to use an existing road owned or controlled by the United States, shall prior to such use post a bond on a form prescribed by the Director. The amount of the bond shall be determined by the authorized officer but in no event less than five hundred dollars (\$500) per mile or fraction thereof. The bond shall be executed by an approved corporate surety, or the permittee may deposit an equivalent amount in cash or negotiable securities of the United States and the bond shall be conditioned upon compliance with subpart 2812 and the terms and conditions of the permit.

**§ 2812.6 Approval and terms of permit.**

**§ 2812.6-1 Approval.**

(a) Upon the applicant's compliance with the appropriate provisions of this paragraph and if it is determined that the approval of the application will be in the public interest, the authorized officer may, in his discretion, issue an appropriate permit, upon a form prescribed by the Director.

(b) The authorized officer may waive the requirements of §§ 2812.1-2 (c) and (e) and 2812.5-3 in the case of a natural person who applies for a right-of-way

## Bureau of Land Management, Interior

## §2812.6-2

for not to exceed a period of twelve weeks. Not more than one such waiver shall be allowed in each consecutive twelve calendar months on behalf of or for the benefit of the same person.

### §2812.6-2 Terms and conditions of permit.

(a) As to all permits: Every permittee shall agree:

(1) To comply with the applicable regulations in effect as of the time when the permit is issued and, as to the permittee's roads as to which the United States has received rights under §§2812.3-1 to 2812.3-5 with such additional regulations as may be issued from time to time relating to the use of roads for the purpose of access by properly licensed hunters and fishermen and by other recreationalists to lands of the United States in the O. and C. area which are suitable for such recreational purposes, where such use will not unreasonably interfere with the use of the road by the permittee for the transportation of forest products or unduly enhance the risk of fire, collision, or other hazards on such road and on lands in the vicinity thereof. If, notwithstanding the request of the authorized officer that the permittee allow use of a road in conformity with such additional regulations the permittee shall unreasonably withhold his assent, the authorized officer shall refer the disagreement through the proper channels to the Director of the Bureau for his consideration, and, if the Director concurs in the conclusion of the authorized officer and if the matter is still in dispute, he shall refer the matter to the Secretary of the Interior for his consideration. In the event of the Secretary's concurrence in the conclusions of the authorized officer, and if the permittee nevertheless unreasonably withholds such assent, the United States may institute such judicial proceedings as may be appropriate to enforce said regulations.

(2) Not to cut, remove, or destroy any timber not previously purchased on the right-of-way without having first obtained specific authority from the authorized officer and making payment therefor.

(3) To take adequate precaution to prevent forest, brush, and grass fires;

to endeavor with all available personnel to suppress any fire originating on or threatening the right-of-way on which a road is being used or constructed by the permittee or any fire caused by the permittee; to do no burning on or near the right-of-way without State permit during the seasons that permits are required and in no event to set fire on or near the right-of-way that will result in damage to any natural resource or improvement.

(4) To submit to arbitration proceedings and to be bound by the resulting arbitral awards, pursuant to §§2812.4-1, 2812.4-3, and 2812.4-4.

(5) In the event that the United States acquires by purchase or eminent domain the land or any interest therein, over which there passes a road which the United States has acquired the right to use under §§2812.3-1 to 2812.3-5 of this subpart to waive compensation for the value of the road, equivalent to the proportion that the amount the United States has contributed bears to the total actual cost of construction of the road. Such contribution shall include any investment in or amortization of the cost of such road, or both, as the case may be, made by the United States or a licensee either by way of direct expenditures upon such road, or by way of payment by the United States or a licensee to the permittee, or by way of allowance made by the United States to the permittee in any timber sales contract for such amortization or capital investment.

(6) To construct all roads and other improvements as described in the application for the permit, except as the authorized officer may authorize modification or abandonment of any such proposed construction.

(7) To use the permit and right-of-way afforded subject to all valid existing rights, to such additional rights-of-way as may be granted under this paragraph to a reservation of rights-of-way for ditches and canals constructed under authority of the United States.

(8) Not to discriminate against any employee or applicant for employment because of race, creed, color, or national origin, and to require an identical provision to be included in all subcontracts.

## § 2812.7

## 43 CFR Ch. II (10–1–08 Edition)

(9) Except as the authorized officer may otherwise permit or direct to clean up and remove from the road and right-of-way within six months after the expiration or other termination of the permit, all debris, refuse, and waste material which may have resulted from his operations and use of said road; to repair all damage to said road resulting directly or indirectly from his use thereof; and to remove therefrom all structures, timbers, and other objects that may have been installed or placed thereon by him in connection with said operations or use; *Provided, however*, That the road and all usable road improvements shall be left in place.

(10) Upon request of an authorized officer, to submit to the Bureau within 30 days with permission to publish, the detailed terms and conditions, including the fee which the permittee will ask as a condition of such licensee's use for the removal of forest products over any road or right-of-way which the United States and its licensees have acquired a right to use under §§ 2812.1–3 to 2812.1–5.

(11) To grant to the United States, upon request of an authorized officer in lieu of the rights-of-way across legal subdivisions granted pursuant to §§ 2812.1–3 to 2812.1–5, such permanent easements on specifically described locations as may be necessary to permit the Bureau to construct roads on such legal subdivisions with appropriated funds: *Provided*, That at the time of the grant of such permanent easements the Bureau shall release, except for necessary connecting spur roads, the rights-of-way across such legal subdivisions previously granted: *Provided further*, That if the United States builds a road on such permanent easements it shall pay for any timber of the permittee which is cut, removed, or destroyed in accordance with § 2812.4–2. The authorized officer shall waive the requirement under this paragraph, however, if the permittee makes a satisfactory showing to the authorized officer that he does not own a sufficient interest in the land to grant a permanent easement, and that he has negotiated therefor in good faith without success.

(b) As to permits for the use of an existing road: In addition, every per-

mittee to whom a permit is issued for the use of an existing road is required to agree:

(1) To maintain such a road in an adequate and satisfactory condition or to arrange therefor with the other users of the road. In the absence of satisfactory performance, the authorized officer may have such maintenance work performed as may be necessary in his judgment, determine the proportionate share allocable to each user, and collect the cost thereof from the parties or the sureties on the bonds furnished by said parties.

(2) Upon the expiration or other termination of his right to its use, to leave said road and right-of-way in at least as good a condition as existed prior to the commencement of his use.

### § 2812.7 Assignment of permit.

Any proposed assignment of a permit must be submitted in duplicate, within 90 days after the date of its execution, to the authorized officer for approval, accompanied by the same showing and undertaking by the assignee as is required of an applicant by §§ 2812.1–2 and 2812.3–1 to 2812.3–5, and must be supported by a stipulation that the assignee agrees to comply with and be bound by the terms and conditions of the permit and the applicable regulations of the Department of the Interior in force as of the date of such approval of the assignment.

[35 FR 9638, June 13, 1970, as amended at 41 FR 21642, May 27, 1976]

### § 2812.8 Cause for termination of permittee's rights.

#### § 2812.8–1 Notice of termination.

(a) The authorized officer in his discretion may elect upon 30 days' notice to terminate any permit or right-of-way issued under this paragraph if:

(1) In connection with the application made therefor, the applicant represented any material fact knowing the same to be false or made such representation in reckless disregard of the truth; or

(2) A permittee, subsequent to the issuance of a permit or right-of-way to him, represents any material fact to

the Bureau, in accordance with any requirement of such permit or this paragraph, knowing such representation to be false, or makes such representation in reckless disregard of the truth.

(b) The authorized officer in his discretion may elect to terminate any permit or right-of-way issued under this paragraph, if the permittee shall fail to comply with any of the provisions of such regulations or make defaults in the performance or obligation of any of the conditions of the permit, and such failure or default shall continue for 60 days after service of written notice thereof by the authorized officer.

(c) Notice of such termination shall be served personally or by registered mail upon the permittee, shall specify the misrepresentation, failure or default involved, and shall be final, subject, however, to the permittee's right of appeal.

(d) Termination of the permit and of the right-of-way under this section shall not operate to terminate any right granted to the United States pursuant to this paragraph, nor shall it affect the right of the permittee, after the termination of his permit and right-of-way to receive compensation and to establish road operating rules with respect to roads controlled by him which the United States has the right to use and to permit its licensees to use; nor shall it relieve the permittee of his duty under this paragraph, to submit to and be bound by arbitration pursuant to §§2812.4-1, 2812.4-3, and 2812.4-4.

#### **§2812.8-2 Remedies for violations by licensee.**

(a) No licensee of the United States will be authorized to use the roads of a permittee except under the terms of a timber sale contract or a cooperative agreement with the United States which will require the licensee to comply with all the applicable provisions of this paragraph, and any agreements or awards made pursuant thereto. If a licensee fails to comply with the regulations, agreements, or awards, the authorized officer will take such action as may be appropriate under the provisions of the timber sale contract or cooperative agreement.

(b) A permittee who believes that a licensee is violating the provisions of such a timber sale contract or cooperative agreement pertaining to use of the permittee's roads, rights-of-way, or lands, may petition the authorized officer, setting forth the grounds for his belief, to take such action against the licensee as may be appropriate under the contract or the cooperative agreement. In such event the permittee shall be bound by the decision of the authorized officer, subject, however, to a right of appeal pursuant to §2812.9 and subject, further, to the general provisions of law respecting review of administrative determinations. In the alternative, a permittee who believes that a licensee has violated the terms of the timber sale contract or cooperative agreement respecting the use of the permittee's roads may proceed against the licensee in any court of competent jurisdiction to obtain such relief as may be appropriate in the premises.

#### **§2812.8-3 Disposition of property on termination of permit.**

Upon the expiration or other termination of the permittee's rights, in the absence of an agreement to the contrary, the permittee will be allowed 6 months in which to remove or otherwise dispose of all property or improvements, other than the road and usable improvements to the road, placed by him on the right-of-way, but if not removed within this period, all such property and improvements shall become the property of the United States.

#### **§2812.9 Appeals.**

An appeal pursuant to part 4 of 43 CFR Subtitle A, may be taken from any final decision of the authorized officer, to the Board of Land Appeals, Office of the Secretary.

### Subpart 2881—General Information

#### § 2881.2 What is the objective of BLM's right-of-way program?

It is BLM's objective to grant rights-of-way under the regulations in this part to any qualified individual, business, or government entity and to direct and control the use of rights-of-way on public lands in a manner that:

(a) Protects the natural resources associated with Federal lands and adjacent lands, whether private or administered by a government entity;

(b) Prevents unnecessary or undue degradation to public lands;

(c) Promotes the use of rights-of-way in common considering engineering and technological compatibility, national security, and land use plans; and

(d) Coordinates, to the fullest extent possible, all BLM actions under the regulations in this part with state and local governments, interested individuals, and appropriate quasi-public entities.

#### § 2881.5 What acronyms and terms are used in the regulations in this part?

(a) *Acronyms.* Unless an acronym is listed in this section, the acronyms

listed in part 2800 of this chapter apply to this part. As used in this part:

*MLA* means the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185).

*TAPS* means the Trans-Alaska Oil Pipeline System.

*TUP* means a temporary use permit.

(b) *Terms.* Unless a term is defined in this part, the defined terms in part 2800 of this chapter apply to this part. As used in this part, the term:

*Act* means section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185).

*Actual costs* means the financial measure of resources the Federal government expends or uses in processing a right-of-way application or in monitoring the construction, operation, and termination of a facility authorized by a grant or permit. Actual costs include both direct and indirect costs, exclusive of management overhead costs.

*Casual use* means activities ordinarily resulting in no or negligible disturbance of the public lands, resources, or improvements. Examples of casual use include: Surveying, marking routes, and collecting data to prepare applications for grants or TUPs.

*Facility* means an improvement or structure, whether existing or planned, that is, or would be, owned and controlled by the grant or TUP holder within the right-of-way or TUP area.

*Federal lands* means all lands owned by the United States, except lands:

(1) In the National Park System;

(2) Held in trust for an Indian or Indian tribe; or

(3) On the Outer Continental Shelf.

*Grant* means any authorization or instrument BLM issues under section 28 of the Mineral Leasing Act, 30 U.S.C. 185, authorizing a nonpossessory, non-exclusive right to use Federal lands to construct, operate, maintain, or terminate a pipeline. The term includes those authorizations and instruments BLM and its predecessors issued for like purposes before November 16, 1973, under then existing statutory authority. It does not include authorizations issued under FLPMA (43 U.S.C. 1761 *et seq.*).

*Monitoring* means those actions, subject to § 2886.11 of this part, that the Federal government performs to ensure

compliance with the terms, conditions, and stipulations of a grant or TUP.

(1) For Monitoring Categories 1 through 4, the actions include inspecting construction, operation, maintenance, and termination of permanent or temporary facilities and protection and rehabilitation activities until the holder completes rehabilitation of the right-of-way or TUP area and BLM approves it;

(2) For Monitoring Category 5 (Master Agreements), those actions agreed to in the Master Agreement; and

(3) For Monitoring Category 6, those actions agreed to between BLM and the applicant before BLM issues the grant or TUP.

*Oil or gas* means oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced from them.

*Pipeline* means a line crossing Federal lands for transportation of oil or gas. The term includes feeder lines, trunk lines, and related facilities, but does not include a lessee's or lease operator's production facilities located on its oil and gas lease.

*Pipeline system* means all facilities, whether or not located on Federal lands, used by a grant holder in connection with the construction, operation, maintenance, or termination of a pipeline.

*Production facilities* means a lessee's or lease operator's pipes and equipment used on its oil and gas lease to aid in extracting, processing, and storing oil or gas. The term includes:

(1) Storage tanks and processing equipment;

(2) Gathering lines upstream from such tanks and equipment, or in the case of gas, upstream from the point of delivery; and

(3) Pipes and equipment, such as water and gas injection lines, used in the production process for purposes other than carrying oil and gas downstream from the wellhead.

*Related facilities* means those structures, devices, improvements, and sites, located on Federal lands, which may or may not be connected or contiguous to the pipeline, the substantially continuous use of which is necessary for the operation or maintenance of a pipeline, such as:

(1) Supporting structures;

(2) Airstrips;

(3) Roads;

(4) Campsites;

(5) Pump stations, including associated heliports, structures, yards, and fences;

(6) Valves and other control devices;

(7) Surge and storage tanks;

(8) Bridges;

(9) Monitoring and communication devices and structures housing them;

(10) Terminals, including structures, yards, docks, fences, and storage tank facilities;

(11) Retaining walls, berms, dikes, ditches, cuts and fills; and

(12) Structures and areas for storing supplies and equipment.

*Right-of-way* means the Federal lands BLM authorizes a holder to use or occupy under a grant.

*Substantial deviation* means a change in the authorized location or use which requires:

(1) Construction or use outside the boundaries of the right-of-way or TUP area; or

(2) Any change from, or modification of, the authorized use. Examples of substantial deviation include: Adding equipment, overhead or underground lines, pipelines, structures, or other facilities not included in the original grant or TUP.

*Temporary use permit or TUP* means a document BLM issues under 30 U.S.C. 185 that is a revocable, nonpossessory privilege to use specified Federal lands in the vicinity of and in connection with a right-of-way, to construct, operate, maintain, or terminate a pipeline or to protect the environment or public safety. A TUP does not convey any interest in land.

*Third party* means any person or entity other than BLM, the applicant, or the holder of a right-of-way authorization.

#### §2881.7 Scope.

(a) *What do these regulations apply to?* The regulations in this part apply to:

(1) Issuing grants and TUPs for pipelines to transport oil or gas, and administering, amending, assigning, renewing, and terminating them;

(2) All grants and permits BLM and its predecessors previously issued under section 28 of the Act; and

## Bureau of Land Management, Interior

## § 2883.10

(3) Pipeline systems, or parts thereof, within a Federal oil and gas lease owned by:

(i) A party who is not the lessee or lease operator; or

(ii) The lessee or lease operator which are downstream from a custody transfer metering device.

(b) *What don't these regulations apply to?* The regulations in this part do not apply to:

(1) Production facilities on an oil and gas lease which operate for the benefit of the lease. The lease authorizes these production facilities;

(2) Pipelines crossing Federal lands under the jurisdiction of a single Federal department or agency other than BLM, including bureaus and agencies within the Department of the Interior;

(3) Authorizations BLM issues to Federal agencies for oil or gas transportation under § 2801.6 of this chapter; or

(4) Authorizations BLM issues under Title V of the Federal Land Policy and Management Act of 1976 (see part 2800 of this chapter).

(c) Notwithstanding the definition of "grant" in section 2881.5 of this subpart, the regulations in this part apply, consistent with 43 U.S.C. 1652(c), to any authorization issued by the Secretary of the Interior or his or her delegate under 43 U.S.C. 1652(b) for the Trans-Alaska Oil Pipeline System.

### § 2881.9 Severability.

If a court holds any provisions of the regulations in this part or their applicability to any person or circumstances invalid, the remainder of these rules and their applicability to other people or circumstances will not be affected.

### § 2881.10 How do I appeal a BLM decision issued under the regulations in this part?

(a) You may appeal a BLM decision issued under the regulations in this part in accordance with part 4 of this title.

(b) All BLM decisions under this part remain in effect pending appeal unless the Secretary of the Interior rules otherwise, or as noted in this part. You may petition for a stay of a BLM decision under this part with the Office of

Hearings and Appeals, Department of the Interior. Unless otherwise noted in this part, BLM will take no action on your application while your appeal is pending.

### § 2881.11 When do I need a grant from BLM for an oil and gas pipeline?

You must have a BLM grant under 30 U.S.C. 185 for an oil or gas pipeline or related facility to cross Federal lands under:

(a) BLM's jurisdiction; or

(b) The jurisdiction of two or more Federal agencies.

### § 2881.12 When do I need a TUP for an oil and gas pipeline?

You must obtain a TUP from BLM when you require temporary use of more land than your grant authorizes in order to construct, operate, maintain, or terminate your pipeline, or to protect the environment or public safety.

## Subpart 2882—Lands Available for MLA Grants and TUPs

### § 2882.10 What lands are available for grants or TUPs?

(a) For lands BLM exclusively manages, we use the same criteria to determine whether lands are available for grants or TUPs as we do to determine whether lands are available for FLPMA grants (see subpart 2802 of this chapter).

(b) BLM may require common use of a right-of-way and may restrict new grants to existing right-of-way corridors where safety and other considerations allow. Generally, BLM land use plans designate right-of-way corridors.

(c) Where a proposed oil or gas right-of-way involves lands managed by two or more Federal agencies, see § 2884.26 of this part.

## Subpart 2883—Qualifications for Holding MLA Grants and TUPs

### § 2883.10 Who may hold a grant or TUP?

To hold a grant or TUP under these regulations, you must be:

## § 2883.11

(a)(1) A United States citizen, an association of such citizens, or a corporation, partnership, association, or similar business entity organized under the laws of the United States, or of any state therein; or

(2) A state or local government; and

(b) Financially and technically able to construct, operate, maintain, and terminate the proposed facilities.

### § 2883.11 Who may not hold a grant or TUP?

Aliens may not acquire or hold any direct or indirect interest in grants or TUPs, except that they may own or control stock in corporations holding grants or TUPs if the laws of their country do not deny similar or like privileges to citizens of the United States.

### § 2883.12 How do I prove I am qualified to hold a grant or TUP?

(a) If you are a private individual, BLM requires no proof of citizenship with your application;

(b) If you are a partnership, corporation, association, or other business entity, submit the following information, as applicable, in your application:

(1) Copies of the formal documents creating the business entity, such as articles of incorporation, and including the corporate bylaws;

(2) Evidence that the party signing the application has the authority to bind the applicant;

(3) The name, address, and citizenship of each participant (*e.g.*, partner, associate, or other) in the business entity;

(4) The name, address, and citizenship of each shareholder owning 3 percent or more of each class of shares, and the number and percentage of any class of voting shares of the business entity which such shareholder is authorized to vote;

(5) The name and address of each affiliate of the business entity;

(6) The number of shares and the percentage of any class of voting stock owned by the business entity, directly or indirectly, in any affiliate controlled by the business entity; and

(7) The number of shares and the percentage of any class of voting stock owned by an affiliate, directly or indi-

## 43 CFR Ch. II (10–1–08 Edition)

rectly, in the business entity controlled by the affiliate.

(c) If you have already supplied this information to BLM and the information remains accurate, you only need to reference the existing or previous BLM serial number under which it is filed.

### § 2883.13 What happens if BLM issues me a grant or TUP and later determines that I am not qualified to hold it?

If BLM issues you a grant or TUP, and later determines that you are not qualified to hold it, BLM will terminate your grant or TUP under 30 U.S.C. 185(o). You may appeal this decision under § 2881.10 of this part.

### § 2883.14 What happens to my application, grant, or TUP if I die?

(a) If an applicant or grant or TUP holder dies, any inheritable interest in the application, grant, or TUP will be distributed under state law.

(b) If the distributee of a grant or TUP is not qualified to hold a grant or TUP under § 2883.10 of this subpart, BLM will recognize the distributee as grant or TUP holder and allow the distributee to hold its interest in the grant or TUP for up to two years. During that period, the distributee must either become qualified or divest itself of the interest.

## Subpart 2884—Applying for MLA Grants or TUPs

### § 2884.10 What should I do before I file my application?

(a) When you determine that a proposed oil and gas pipeline system would cross Federal lands under BLM jurisdiction, or under the jurisdiction of two or more Federal agencies, you should notify BLM.

(b) Before filing an application with BLM, we encourage you to make an appointment for a preapplication meeting with the appropriate personnel in the BLM field office nearest the lands you seek to use. During the preapplication meeting BLM can:

(1) Identify potential routing and other constraints;

(2) Determine whether or not the lands are located within a designated or existing right-of-way corridor;

(3) Tentatively schedule the processing of your proposed application;

(4) Provide you information about qualifications for holding grants and TUPs, and inform you of your financial obligations, such as processing and monitoring costs and rents; and

(5) Identify any work which will require obtaining one or more TUPs.

(c) BLM may share this information with Federal, state, tribal, and local government agencies to ensure that these agencies are aware of any authorizations you may need from them.

(d) BLM will keep confidential any information in your application that you mark as "confidential" or "proprietary" to the extent allowed by law.

**§ 2884.11 What information must I submit in my application?**

(a) File your application on Form SF-299 or as part of an Application for Permit to Drill or Reenter (BLM Form 3160-3) or Sundry Notice and Report on Wells (BLM Form 3160-5), available from any BLM office. Provide a complete description of the project, including:

(1) The exact diameters of the pipes and locations of the pipelines;

(2) Proposed construction and reclamation techniques; and

(3) The estimated life of the facility.

(b) File with BLM copies of any applications you file with other Federal agencies, such as the Federal Energy Regulatory Commission (*see* 18 CFR chapter I), for licenses, certificates, or other authorities involving the right-of-way.

(c) BLM may ask you to submit additional information beyond that required in the form to assist us in processing your application. This information may include:

(1) A list of any Federal and state approvals required for the proposal;

(2) A description of alternative route(s) and mode(s) you considered when developing the proposal;

(3) Copies of, or reference to, all similar applications or grants you have submitted, currently hold, or have held in the past;

(4) A statement of the need and economic feasibility of the proposed project;

(5) The estimated schedule for constructing, operating, maintaining, and terminating the project (a Plan of Development);

(6) A map of the project, showing its proposed location and showing existing facilities adjacent to the proposal;

(7) A statement certifying that you are of legal age and authorized to do business in the state(s) where the right-of-way would be located, and that you have submitted correct information to the best of your knowledge;

(8) A statement of the environmental, social, and economic effects of the proposal;

(9) A statement of your financial and technical capability to construct, operate, maintain, and terminate the project;

(10) Proof that you are a United States citizen; and

(11) Any other information BLM considers necessary to process your application.

(d) Before BLM reviews your application for a grant, grant amendment, or grant renewal, you must submit the following information and material to ensure that the facilities will be constructed, operated, and maintained as common carriers under 30 U.S.C. 185(r):

(1) Conditions for, and agreements among, owners or operators to add pumping facilities and looping, or otherwise to increase the pipeline or terminal's throughput capacity in response to actual or anticipated increases in demand;

(2) Conditions for adding or abandoning intake, offtake, or storage points or facilities; and

(3) Minimum shipment or purchase tenders.

(e) If conditions or information affecting your application change, promptly notify BLM and submit to BLM in writing the necessary changes to your application. BLM may deny your application if you fail to do so.

**§ 2884.12 What is the processing fee for a grant or TUP application?**

(a) You must pay a fee with the application to cover the costs to the Federal Government of processing your application before the Federal Government incurs them. The fees for Processing Categories 1 through 4 (see paragraph (b) of this section) are one-time

fees and are not refundable. The fees are categorized based on an estimate of the amount of time that the Federal Government will expend to process your application and issue a decision granting or denying the application.

(b) There is no processing fee if work is estimated to take one hour or less. Processing fees are based on categories. These categories and fees for 2005 are:

2005 PROCESSING FEE SCHEDULE

Processing category	Federal work hours involved	Processing fee per application as of June 21, 2005. To be adjusted annually for changes in the IPD-GDP. See paragraph (c) of this section for update information
(1) Applications for new grants or TUPs, assignments, renewals, and amendments to existing grants or TUPs.	Estimated Federal work hours are >1 ≤8.	\$97.
(2) Applications for new grants or TUPs, assignments, renewals, and amendments to existing grants or TUPs.	Estimated Federal work hours are >8 ≤24.	\$343.
(3) Applications for new grants or TUPs, assignments, renewals, and amendments to existing grants or TUPs.	Estimated Federal work hours are >24 ≤36.	\$644.
(4) Applications for new grants or TUPs, assignments, renewals, and amendments to existing grants or TUPs.	Estimated Federal work hours are >36 ≤50.	\$923.
(5) Master Agreements. ....	Varies .....	As specified in the Agreement.
(6) Applications for new grants or TUPs, assignments, renewals, and amendments to existing grants or TUPs.	Estimated Federal work hours are >50.	Actual costs (see § 2884.17 of this part).

(c) BLM will revise paragraph (b) of this section to update the processing fees for Categories 1 through 4 in the schedule each calendar year, based on the previous year's change in the IPD-GDP, as measured second quarter to second quarter. BLM will round these changes to the nearest dollar. BLM will update Category 5 processing fees as specified in the Master Agreement. You also may obtain a copy of the current schedule from any BLM state or field office or by writing: Director, BLM, 1849 C St., NW., Mail Stop 1000LS, Washington, DC 20240. BLM also posts the current schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

(d) After an initial review of your application, BLM will notify you of the processing category into which your application fits. You must then submit the appropriate payment for that category before BLM begins processing your application. Your signature on a cost recovery Master Agreement constitutes your agreement with the processing category decision. If you dis-

agree with the category that BLM has determined for your application, you may appeal the decision under § 2881.10 of this part. If you paid the processing fee and you appeal a Processing Category 1 through 4 or a Processing Category 6 determination to IBLA, BLM will process your application while the appeal is pending. If IBLA finds in your favor, you will receive a refund or adjustment of your processing fee.

(e) In processing your application, BLM may determine at any time that the application requires preparing an EIS. If this occurs, BLM will send you a decision changing your processing category to Processing Category 6. You may appeal the decision under § 2881.10 of this part.

(f) If you hold an authorization relating to TAPS, BLM will send you a written statement seeking reimbursement of actual costs within 60 calendar days after the close of each quarter. Quarters end on the last day of March, June, September, and December. In processing applications and administering authorizations relating to

## Bureau of Land Management, Interior

## § 2884.17

TAPS, the Department of the Interior will avoid unnecessary employment of personnel and needless expenditure of funds.

### **§ 2884.13 Who is exempt from paying processing and monitoring fees?**

You are exempt from paying processing and monitoring fees if you are a state or local government or an agency of such a government and BLM issues the grant for governmental purposes benefitting the general public. If your principal source of revenue results from charges you levy on customers for services similar to those of a profit-making corporation or business, you are not exempt.

### **§ 2884.14 When does BLM reevaluate the processing and monitoring fees?**

BLM reevaluates the processing and monitoring fees (see § 2885.23 of this part) for each category and the categories themselves within 5 years after they go into effect and at 10-year intervals after that. When reevaluating processing and monitoring fees, BLM considers all factors that affect the fees, including, but not limited to, any changes in:

- (a) Technology;
- (b) The procedures for processing applications and monitoring grants;
- (c) Statutes and regulations relating to the right-of-way program; or
- (d) The IPD-GDP.

### **§ 2884.15 What is a Master Agreement (Processing Category 5) and what information must I provide to BLM when I request one?**

(a) A Master Agreement (Processing Category 5) is a written agreement covering processing and monitoring fees (see § 2885.23 of this part) negotiated between BLM and you that involves multiple BLM grant or TUP approvals for projects within a defined geographic area.

(b) Your request for a Master Agreement must:

- (1) Describe the geographic area covered by the Agreement and the scope of the activity you plan;
- (2) Include a preliminary work plan. This plan must state what work you must do and what work BLM must do to process your application. Both par-

ties must periodically update the work plan, as specified in the Agreement, and mutually agree to the changes;

(3) Contain a preliminary cost estimate and a timetable for processing the application and completing the project;

(4) State whether you want the Agreement to apply to future applications in the same geographic area that are not part of the same project(s); and

(5) Contain any other relevant information that BLM needs to process the application.

### **§ 2884.16 What provisions do Master Agreements contain and what are their limitations?**

(a) A Master Agreement:

(1) Specifies that you must comply with all applicable laws and regulations;

(2) Describes the work you will do and the work BLM will do to process the application;

(3) Describes the method of periodic billing, payment, and auditing;

(4) Describes the processes, studies, or evaluations you will pay for;

(5) Explains how BLM will monitor the grant and how BLM will recover monitoring costs;

(6) Contains provisions allowing for periodic review and updating, if required;

(7) Contains specific conditions for terminating the Agreement; and

(8) Contains any other provisions BLM considers necessary.

(b) BLM will not enter into any Agreement that is not in the public interest.

### **§ 2884.17 How will BLM process my Processing Category 6 application?**

(a) For Processing Category 6 applications, you and BLM must enter into a written agreement that describes how BLM will process your application. The final agreement consists of a work plan and a financial plan.

(b) In processing your application, BLM will:

(1) Determine the issues subject to analysis under NEPA;

(2) Prepare a preliminary work plan;

(3) Develop a preliminary financial plan, which estimates the actual costs

#### § 2884.18

#### 43 CFR Ch. II (10–1–08 Edition)

of processing your application and monitoring your project;

(4) Discuss with you:

(i) The preliminary plans and data;

(ii) The availability of funds and personnel;

(iii) Your options for the timing of processing and monitoring fee payments; and

(iv) Financial information you must submit; and

(5) Complete final scoping and develop final work and financial plans which reflect any work you have agreed to do. BLM will also present you with the final estimate of the costs you must reimburse the United States, including the cost for monitoring the project.

(c) BLM retains the option to prepare any environmental documents related to your application. If BLM allows you to prepare any environmental documents and conduct any studies that BLM needs to process your application, you must do the work following BLM standards. For this purpose, you and BLM may enter into a written agreement. BLM will make the final determinations and conclusions arising from such work.

(d) BLM will periodically, as stated in the agreement, estimate processing costs for a specific work period and notify you of the amount due. You must pay the amount due before BLM will continue working on your application. If your payment exceeds the costs that the United States incurred for the work, BLM will either adjust the next billing to reflect the excess, or refund you the excess under 43 U.S.C. 1734. You may not deduct any amount from a payment without BLM's prior written approval.

#### § 2884.18 What if there are two or more competing applications for the same pipeline?

(a) If there are two or more competing applications for the same pipeline and your application is in:

(1) *Processing Categories 1 through 4.* You must reimburse BLM for processing costs as if the other application or applications had not been filed.

(2) *Processing Category 6.* You are responsible for processing costs identified in your application. If BLM cannot

readily separate costs, such as costs associated with preparing environmental analyses, you and any competing applicants must pay an equal share or a proportion agreed to in writing among all applicants and BLM. If you agree to share costs that are common to your application and that of a competing applicant, and the competitor does not pay the agreed upon amount, you are liable for the entire amount due. The applicants must pay the entire processing fee in advance. BLM will not process the application until we receive the advance payments.

(b) *Who determines whether competition exists?* BLM determines whether the applications are compatible in a single right-of-way or are competing applications to build the same pipeline.

(c) If BLM determines that competition exists, BLM will describe the procedures for a competitive bid through a bid announcement in a newspaper of general circulation in the area affected by the potential right-of-way and by a notice in the FEDERAL REGISTER.

#### § 2884.19 Where do I file my application for a grant or TUP?

(a) If BLM has exclusive jurisdiction over the lands involved, file your application with the BLM Field Office having jurisdiction over the lands described in the application.

(b) If another Federal agency has exclusive jurisdiction over the land involved, file your application with that agency and refer to its regulations for its requirements.

(c) If there are no BLM-administered lands involved, but the lands are under the jurisdiction of two or more Federal agencies, you may file your application at the BLM office in the vicinity of the pipeline. BLM will notify you where to direct future communications about the pipeline.

(d) If two or more Federal agencies, including BLM, have jurisdiction over the lands in the application, file it at any BLM office having jurisdiction over a portion of the Federal lands. BLM will notify you where to direct future communications about the pipeline.

## Bureau of Land Management, Interior

## § 2884.22

### § 2884.20 What are the public notification requirements for my application?

(a) When BLM receives your application, it will publish a notice in the FEDERAL REGISTER or a newspaper of general circulation in the vicinity of the lands involved. If BLM determines the pipeline(s) will have only minor environmental impacts, it is not required to publish this notice. The notice will, at a minimum, contain:

(1) A description of the pipeline system; and

(2) A statement of where the application and related documents are available for review.

(b) BLM will send copies of the published notice for review and comment to the:

(1) Governor of each state within which the pipeline system would be located;

(2) Head of each local or tribal government or jurisdiction within which the pipeline system would be located; and

(3) Heads of other Federal agencies whose jurisdiction includes lands with-

in which the pipeline system would be located.

(c) If your application involves a pipeline that is 24 inches or more in diameter, BLM will also send notice of the application to the appropriate committees of Congress in accordance with 30 U.S.C. 185(w).

(d) BLM may hold public hearings or meetings on your application if we determine there is sufficient interest to warrant the time and expense of such hearings or meetings. BLM will publish a notice of any such hearings or meetings in advance in the FEDERAL REGISTER or in a newspaper of general circulation in the vicinity of the lands involved.

### § 2884.21 How will BLM process my application?

(a) BLM will notify you in writing when it receives your application and will identify your processing fee described at § 2884.12 of this subpart.

(b) *Customer service standard.* BLM will process your completed application as follows:

Processing category	Processing time	Conditions
1-4 .....	60 calendar days .....	If processing your application will take longer than 60 calendar days, BLM will notify you in writing of this fact prior to the 30th calendar day and inform you of when you can expect a final decision on your application.
5 .....	As specified in the Master Agreement.	BLM will process applications as specified in the Agreement.
6 .....	Over 60 calendar days .....	BLM will notify you in writing within the initial 60 day processing period of the estimated processing time.

(c) Before issuing a grant or TUP, BLM will:

(1) Complete a NEPA analysis for the application or approve a NEPA analysis previously completed for the application, as required by 40 CFR parts 1500 through 1508;

(2) Determine whether or not your proposed use complies with applicable Federal and state laws, regulations, and local ordinances;

(3) Consult, as necessary, with other governmental entities;

(4) Hold public meetings, if sufficient public interest exists to warrant their time and expense. BLM will publish a notice in the FEDERAL REGISTER, a newspaper of general circulation in the vicinity of the lands involved, or both,

announcing in advance any public hearings or meetings; and

(5) Take any other action necessary to fully evaluate and decide whether to approve or deny your application.

### § 2884.22 Can BLM ask me for additional information?

(a) If we ask for additional information we will follow the procedures in § 2804.25(b) of this chapter.

(b) BLM may also ask other Federal agencies for additional information, for terms and conditions or stipulations which the grant or TUP should contain, and for advice as to whether or not to issue the grant or TUP.

**§ 2884.23****§ 2884.23 Under what circumstances may BLM deny my application?**

(a) BLM may deny your application if:

(1) The proposed use is inconsistent with the purpose for which BLM or other Federal agencies manage the lands described in your application;

(2) The proposed use would not be in the public interest;

(3) You are not qualified to hold a grant or TUP;

(4) Issuing the grant or TUP would be inconsistent with the Act, other laws, or these or other regulations;

(5) You do not have or cannot demonstrate the technical or financial capability to construct the pipeline or operate facilities within the right-of-way or TUP area; or

(6) You do not adequately comply with a deficiency notice (see § 2804.25(b) of this chapter) or with any BLM requests for additional information needed to process the application.

(b) If BLM denies your application, you may appeal the decision under § 2881.10 of this part.

**§ 2884.24 What fees do I owe if BLM denies my application or if I withdraw my application?**

If BLM denies your application, or you withdraw it, you owe the processing fee set forth at § 2884.12(b) of this subpart, unless you have a Processing Category 5 or 6 application. Then, the following conditions apply:

(a) If BLM denies your Processing Category 5 or 6 application, you are liable for all actual costs that the United States incurred in processing it. The money you have not paid is due within 30 calendar days after receiving a bill for the amount due; and

(b) You may withdraw your application in writing before BLM issues a grant or TUP. If you do so, you are liable for all actual processing costs the United States has incurred up to the time you withdraw the application and for the actual costs of terminating your application. Any money you have not paid is due within 30 calendar days after receiving a bill for the amount due.

**§ 2884.25 What activities may I conduct on BLM lands covered by my application for a grant or TUP while BLM is processing my application?**

(a) You may conduct casual use activities on BLM lands covered by the application, as may any other member of the public. BLM does not require a grant or TUP for casual use on BLM lands.

(b) For any activities on BLM lands that are not casual use, you must obtain prior BLM approval. To conduct activities on lands administered by other Federal agencies, you must obtain any prior approval those agencies require.

**§ 2884.26 When will BLM issue a grant or TUP when the lands are managed by two or more Federal agencies?**

If the application involves lands managed by two or more Federal agencies, BLM will not issue or renew the grant or TUP until the heads of the agencies administering the lands involved have concurred. Where concurrence is not reached, the Secretary of the Interior, after consultation with these agencies, may issue or renew the grant or TUP, but not through lands within a Federal reservation where doing so would be inconsistent with the purposes of the reservation.

**§ 2884.27 What additional requirement is necessary for grants or TUPs for pipelines 24 or more inches in diameter?**

If an application is for a grant or TUP for a pipeline 24 inches or more in diameter, BLM will not issue or renew the grant or TUP until after we notify the appropriate committees of Congress in accordance with 30 U.S.C. 185(w).

**Subpart 2885—Terms and Conditions of MLA Grants and TUPs****§ 2885.10 When is a grant or TUP effective?**

A grant or TUP is effective after both you and BLM sign it. You must accept its terms and conditions in writing and pay any necessary rent and monitoring

fees as set out in §§ 2885.19 and 2885.23 of this subpart. Your written acceptance constitutes an agreement between you and the United States that your right to use the Federal lands, as specified in the grant or TUP, is subject to the terms and conditions of the grant or TUP and applicable laws and regulations.

**§ 2885.11 What terms and conditions must I comply with?**

(a) *Duration.* All grants with a term of one year or longer will terminate on December 31 of the final year of the grant. The term of a grant may not exceed 30 years. The term of a TUP may not exceed 3 years. BLM will consider the following factors in establishing a reasonable term:

(1) The cost of the pipeline and related facilities you plan to construct, operate, maintain, or terminate;

(2) The pipeline's or related facility's useful life;

(3) The public purpose served; and

(4) Any potentially conflicting land uses; and

(b) *Terms and conditions of use.* BLM may modify your proposed use or change the route or location of the facilities in your application. By accepting a grant or TUP, you agree to use the lands described in the grant or TUP for the purposes set forth in the grant or TUP. You also agree to comply with, and be bound by, the following terms and conditions. During construction, operation, maintenance, and termination of the project you must:

(1) To the extent practicable, comply with all existing and subsequently enacted, issued, or amended Federal laws and regulations, and state laws and regulations applicable to the authorized use;

(2) Rebuild and repair roads, fences, and established trails destroyed or damaged by constructing, operating, maintaining, or terminating the project;

(3) Build and maintain suitable crossings for existing roads and significant trails that intersect the project;

(4) Do everything reasonable to prevent and suppress fires on or in the immediate vicinity of the right-of-way or TUP area;

(5) Not discriminate against any employee or applicant for employment during any phase of the project because of race, creed, color, sex, or national origin. You must also require subcontractors to not discriminate;

(6) Pay the rent and monitoring fees described in §§ 2885.19 and 2885.23 of this subpart;

(7) If BLM requires, obtain and/or certify that you have obtained a surety bond or other acceptable security to cover any losses, damages, or injury to human health, the environment, and property incurred in connection with your use and occupancy of the right-of-way or TUP area, including terminating the grant or TUP, and to secure all obligations imposed by the grant or TUP and applicable laws and regulations. Your bond must cover liability for damages or injuries resulting from releases or discharges of hazardous materials. BLM may require a bond, an increase or decrease in the value of an existing bond, or other acceptable security at any time during the term of the grant or TUP. This bond is in addition to any individual lease, statewide, or nationwide oil and gas bonds you may have;

(8) Assume full liability if third parties are injured or damages occur to property on or near the right-of-way or TUP area (see § 2886.13 of this part);

(9) Comply with project-specific terms, conditions, and stipulations, including requirements to:

(i) Restore, revegetate, and curtail erosion or any other rehabilitation measure BLM determines is necessary;

(ii) Ensure that activities in connection with the grant or TUP comply with air and water quality standards or related facility siting standards contained in applicable Federal or state law or regulations;

(iii) Control or prevent damage to scenic, aesthetic, cultural, and environmental values, including fish and wildlife habitat, and to public and private property and public health and safety;

(iv) Protect the interests of individuals living in the general area who rely on the area for subsistence uses as that term is used in Title VIII of ANILCA (16 U.S.C. 3111 *et seq.*); and

(v) Ensure that you construct, operate, maintain, and terminate the facilities on the lands in the right-of-way or TUP area in a manner consistent with the grant or TUP;

(10) Immediately notify all Federal, state, tribal, and local agencies of any release or discharge of hazardous material reportable to such entity under applicable law. You must also notify BLM at the same time, and send BLM a copy of any written notification you prepared;

(11) Not dispose of or store hazardous material on your right-of-way or TUP area, except as provided by the terms, conditions, and stipulation of your grant or TUP;

(12) Certify that your compliance with all requirements of the Emergency Planning and Community Right-to-Know Act of 1986, 42 U.S.C. 11001 *et seq.*, when you receive, assign, renew, amend, or terminate your grant or TUP;

(13) Control and remove any release or discharge of hazardous material on or near the right-of-way or TUP area arising in connection with your use and occupancy of the right-of-way or TUP area, whether or not the release or discharge is authorized under the grant or TUP. You must also remediate and restore lands and resources affected by the release or discharge to BLM's satisfaction and to the satisfaction of any other Federal, state, tribal, or local agency having jurisdiction over the land, resource, or hazardous material;

(14) Comply with all liability and indemnification provisions and stipulations in the grant or TUP;

(15) As BLM directs, provide diagrams or maps showing the location of any constructed facility;

(16) Construct, operate, and maintain the pipeline as a common carrier. This means that the pipeline owners and operators must accept, convey, transport, or purchase without discrimination all oil or gas delivered to the pipeline without regard to where the oil and gas was produced (*i.e.*, whether on Federal or non-federal lands). Where natural gas not subject to state regulatory or conservation laws governing its purchase by pipeline companies is offered for sale, each pipeline company must

purchase, without discrimination, any such natural gas produced in the vicinity of the pipeline. Common carrier provisions of this paragraph do not apply to natural gas pipelines operated by a:

(i) Person subject to regulation under the Natural Gas Act (15 U.S.C. 717 *et seq.*); or

(ii) Public utility subject to regulation by state or municipal agencies with the authority to set rates and charges for the sale of natural gas to consumers within the state or municipality.

(17) Within 30 calendar days after BLM requests it, file rate schedules and tariffs for oil and gas, or derivative products, transported by the pipeline as a common carrier with the agency BLM prescribes, and provide BLM proof that you made the required filing;

(18) With certain exceptions (listed in the statute), not export domestically produced crude oil by pipeline without Presidential approval (*see* 30 U.S.C. 185(u) and (s) and 50 U.S.C. App. 2401);

(19) Not exceed the right-of-way width that is specified in the grant without BLM's prior written authorization. If you need a right-of-way wider than 50 feet plus the ground occupied by the pipeline and related facilities, *see* § 2885.14 of this subpart;

(20) Not use the right-of-way or TUP area for any use other than that authorized by the grant or TUP. If you require other pipelines, looping lines, or other improvements not authorized by the grant or TUP, you must first secure BLM's written authorization;

(21) Not use or construct on the land in the right-of-way or TUP area until:

(i) BLM approves your detailed plan for construction, operation, and termination of the pipeline, including provisions for rehabilitation of the right-of-way or TUP area and environmental protection; and

(ii) You receive a Notice to Proceed for all or any part of the right-of-way or TUP area. In certain situations BLM may waive this requirement in writing; and

(22) Comply with all other stipulations that BLM may require.

## Bureau of Land Management, Interior

## § 2885.16

### § 2885.12 What rights does a grant or TUP convey?

The grant or TUP conveys to you only those rights which it expressly contains. BLM issues it subject to the valid existing rights of others, including the United States. Rights which the grant or TUP conveys to you include the right to:

- (a) Use the described lands to construct, operate, maintain, and terminate facilities within the right-of-way or TUP area for authorized purposes under the terms and conditions of the grant or TUP;
- (b) Allow others to use the land as your agent in the exercise of the rights that the grant or TUP specifies;
- (c) Do minor trimming, pruning, and removing of vegetation to maintain the right-of-way or TUP area or facility;
- (d) Use common varieties of stone and soil which are necessarily removed during construction of the pipeline, without additional BLM authorization or payment, in constructing the pipeline within the authorized right-of-way or TUP area; and
- (e) Assign the grant or TUP to another, provided that you obtain BLM's prior written approval.

### § 2885.13 What rights does the United States retain?

The United States retains and may exercise any rights the grant or TUP does not expressly convey to you. These include the United States' right to:

- (a) Access the lands covered by the grant or TUP at any time and enter any facility you construct on the right-of-way or TUP area. BLM will give you reasonable notice before it enters any facility on the right-of-way or TUP area;
- (b) Require common use of your right-of-way or TUP area, including subsurface and air space, and authorize use of the right-of-way or TUP area for compatible uses. You may not charge for the use of the lands made subject to such additional right-of-way grants;
- (c) Retain ownership of the resources of the land covered by the grant or TUP, including timber and vegetative or mineral materials and any other living or non-living resources. You have

no right to use these resources, except as noted in § 2885.12 of this subpart;

- (d) Determine whether or not your grant is renewable; and
- (e) Change the terms and conditions of your grant or TUP as a result of changes in legislation, regulation, or as otherwise necessary to protect public health or safety or the environment.

### § 2885.14 What happens if I need a right-of-way wider than 50 feet plus the ground occupied by the pipeline and related facilities?

- (a) You may apply to BLM at any time for a right-of-way wider than 50 feet plus the ground occupied by the pipeline and related facilities. In your application you must show that the wider right-of-way is necessary to:
  - (1) Properly operate and maintain the pipeline after you have constructed it;
  - (2) Protect the environment; or
  - (3) Provide for public safety.
- (b) BLM will notify you in writing of its finding(s) and its decision on your application for a wider right-of-way. If the decision is adverse to you, you may appeal it under § 2881.10 of this part.

### § 2885.15 How will BLM charge me rent?

- (a) BLM will charge rent beginning on the first day of the month following the effective date of the grant or TUP through the last day of the month when the grant or TUP terminates. *Example:* If a grant or TUP becomes effective on January 10 and terminates on September 16, the rental period would be February 1 through September 30, or 8 months.
- (b) There are no reductions or waivers of rent for grants or TUPs.
- (c) BLM will set or adjust the annual billing periods to coincide with the calendar year by prorating the rent based on 12 months.
- (d) If you disagree with the rent that BLM charges, you may appeal the decision under § 2881.10 of this part.

### § 2885.16 When do I pay rent?

- (a) You must pay rent for the initial rental period before BLM issues you a grant or TUP.

## **§ 2885.17**

(b) You make all other rental payments according to the payment plan described in § 2885.21 of this subpart.

(c) After the first rental payment, all rent is due on January 1 of the first year of each succeeding rental period for the term of your grant.

### **§ 2885.17 What happens if I pay the rent late?**

(a) If BLM does not receive the rent payment within 15 calendar days after the rent was due under § 2885.16 of this subpart, BLM will charge you a late payment fee of \$25.00 or 10 percent of the rent you owe, whichever is greater, not to exceed \$500 per authorization.

(b) If BLM does not receive your rent payment and late payment fee within 30 calendar days after rent was due, BLM may collect other administrative fees provided by statute.

(c) If BLM does not receive your rent, late payment fee, and any administrative fees within 90 calendar days after the rent was due, BLM may terminate your grant under § 2886.17 of this part and you may not remove any facility or equipment without BLM's written permission. The rent due, late payment fees, and any administrative fees remain a debt that you owe to the United States.

(d) If you pay the rent, late payment fees, and any administrative fees after BLM has terminated the grant, BLM does not automatically reinstate the grant. You must file a new application with BLM. BLM will consider the history of your failure to timely pay rent in deciding whether to issue you a new grant.

(e) You may appeal any adverse decision BLM takes against your grant or TUP under § 2881.10 of this part.

### **§ 2885.18 When must I make estimated rent payments to BLM?**

To expedite the processing of your application for a grant or TUP, BLM may estimate rent payments and require you to pay that amount when it issues the grant or TUP. The rent amount may change once BLM determines the actual rent of the grant or TUP. BLM will credit you any rental overpayment, and you are liable for any underpayment. This section does

## **43 CFR Ch. II (10–1–08 Edition)**

not apply to rent payments made under the rent schedule in this part.

### **§ 2885.19 What is the rent for a linear right-of-way?**

(a) Except as noted in paragraph (b) of this section, BLM will use the Per Acre Rent Schedule at § 2806.20(b) of this chapter to calculate the rent. The Per Acre Rent Schedule is updated annually in accordance with § 2806.21 of this chapter.

(b) BLM may determine your rent using the methods described in § 2806.50 of this chapter, rather than by using the rent schedule cited in paragraph (a) of this section if the rent determined by comparable commercial practices or an appraisal would be 10 or more times the rent from the schedule.

(c) Once you are on a rent schedule, BLM will not remove you from it, unless:

(1) The BLM State Director decides to remove you from the schedule under paragraph (b) of this section; or

(2) You file an application to amend your grant.

(d) You may obtain the current linear right-of-way rent schedule from any BLM state or field office or by writing: Director, BLM, 1849 C St., NW., Mail Stop 1000 LS, Washington, DC 20240. BLM also posts the current rent schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

### **§ 2885.20 How will BLM calculate my rent for linear rights-of-way the schedule covers?**

(a) BLM calculates your rent by multiplying the rent per acre for the appropriate category of use and county zone price from the current schedule by the number of acres in the right-of-way or TUP area that fall in those categories and multiplying the result by the number of years in the rental period.

(b) If BLM has not previously used the rent schedule to calculate your rent, we may do so after giving you reasonable written notice.

### **§ 2885.21 How must I make rent payments for my grant or TUP?**

(a) For TUPs you must make a one-time nonrefundable payment for the term of the TUP. For grants, you must

## Bureau of Land Management, Interior

## § 2885.23

make either nonrefundable annual payments or nonrefundable payments for more than 1 year, as follows:

(1) *One-time payments.* You may pay in advance the required rent amount for the entire term of the grant.

(2) If you choose not to make a one-time payment, you must pay according to one of the following methods, as applicable:

(i) *Payments by individuals.* If your annual rent is \$100 or less, you must pay at 10-year intervals not to exceed the term of the grant. If your annual rent is greater than \$100, you may pay annually or at multi-year intervals that you may choose.

(ii) *Payments by all others.* You must pay rent in advance at ten-year intervals not to exceed the term of the grant.

(b) BLM considers the first partial calendar year in the rent payment period to be the first year of the rental payment term. BLM prorates the first year rental amount based on the number of months left in the calendar year after the effective date of the grant.

### § 2885.22 How will BLM calculate rent for communication uses ancillary to a linear grant, TUP, or other use authorization?

When a communication use is ancillary to, and authorized by BLM under, a grant or TUP for a linear use, or some other type of authorization (*e.g.*, a mineral lease or sundry notice), BLM will determine the rent using the linear rent schedule (*see* § 2885.19 of this subpart) or rent scheme associated with the other authorization, and not the communication use rent schedule (*see* § 2806.30 of this chapter).

### § 2885.23 If I hold a grant or TUP, what monitoring fees must I pay?

(a) *Monitoring fees.* Subject to § 2886.11 of this part, you must pay a fee to BLM for any costs the Federal Government incurs in monitoring the construction, operation, maintenance, and termination of the pipeline and protection and rehabilitation of the affected Federal lands your grant or TUP covers. BLM categorizes the monitoring fees based on the estimated number of work hours necessary to monitor your grant or TUP. Category 1 through 4 monitoring fees are one-time fees and are not refundable. The work hours and fees for 2005 are as follows:

2005 MONITORING FEE SCHEDULE

Monitoring category	Federal work hours involved	Monitoring fee as of June 21, 2005. To be adjusted annually for changes in the IPD-GDP. See paragraph (b) of this section for update information
(1) Applications for new grants and TUPs, assignments, renewals, and amendments to existing grants and TUPs.	Estimated Federal work hours are > 1 ≤ 8.	\$97.
(2) Applications for new grants and TUPs, assignments, renewals, and amendments to existing grants and TUPs.	Estimated Federal work hours are > 8 ≤ 24.	\$343.
(3) Applications for new grants and TUPs, assignments, renewals, and amendments to existing grants and TUPs.	Estimated Federal work hours are > 24 ≤ 36.	\$644.
(4) Applications for new grants and TUPs, assignments, renewals, and amendments to existing grants and TUPs.	Estimated Federal work hours are > 36 ≤ 50.	\$923.
(5) Master Agreements .....	Varies .....	As specified in the Agreement.
(6) Applications for new grants and TUPs, assignments, renewals, and amendments to existing grants and TUPs.	Estimated Federal work hours > 50..	Actual costs.

(b) *Updating the schedule.* BLM will revise paragraph (a) of this section annually to update Category 1 through 4 monitoring fees in the manner described at § 2884.12(c) of this part. BLM

will update Category 5 monitoring fees as specified in the Master Agreement. The monitoring cost schedule is available from any BLM state or field office or by writing: Director, Bureau of Land

## § 2885.24

Management, 1849 C St., NW., Mail Stop 1000LS, Washington, DC 20240. BLM also posts the current schedule on the BLM Homepage on the Internet at <http://www.blm.gov>.

### § 2885.24 When do I pay monitoring fees?

(a) *Monitoring Categories 1 through 4.* Unless BLM otherwise directs, you must pay monitoring fees when you submit to BLM your written acceptance of the terms and conditions of the grant or TUP.

(b) *Monitoring Category 5.* You must pay the monitoring fees as specified in the Master Agreement. BLM will not issue your grant or TUP until it receives the required payment.

(c) *Monitoring Category 6.* BLM may periodically estimate the costs of monitoring your use of the grant or TUP. BLM will include this fee in the costs associated with processing fees described at § 2884.12 of this part. If BLM has underestimated the monitoring costs, we will notify you of the shortfall. If your payments exceed the actual costs that Federal employees incurred for monitoring, BLM will either reimburse you the difference, or adjust the next billing to reflect the overpayment. Unless BLM gives you written authorization, you may not offset or deduct the overpayment from your payments.

(d) *Monitoring Categories 1-4 and 6.* If you disagree with the category BLM has determined for your application, you may appeal the decision under § 2881.10 of this part.

## Subpart 2886—Operations on MLA Grants and TUPs

### § 2886.10 When can I start activities under my grant or TUP?

(a) When you can start depends on the terms of your grant or TUP. You can start activities when you receive the grant or TUP you and BLM signed, unless the grant or TUP includes a requirement for BLM to provide a written Notice to Proceed. If your grant or TUP contains a Notice to Proceed requirement, you may not initiate construction, operation, maintenance, or termination until BLM issues you a Notice to Proceed.

## 43 CFR Ch. II (10-1-08 Edition)

(b) Before you begin operating your pipeline or related facility authorized by a grant or TUP, you must certify in writing to BLM that the pipeline system:

(1) Has been constructed and tested according to the terms of the grant or TUP; and

(2) Is in compliance with all required plans, specifications, and Federal and state laws and regulations.

### § 2886.11 Who regulates activities within my right-of-way or TUP area?

After BLM has issued the grant or TUP, the head of the agency having administrative jurisdiction over the Federal lands involved will regulate your grant or TUP activities in conformance with the Act, appropriate regulations, and the terms and conditions of the grant or TUP. BLM and the other agency head may reach another agreement under 30 U.S.C. 185(c).

### § 2886.12 When must I contact BLM during operations?

You must contact BLM:

(a) At the times specified in your grant or TUP;

(b) When your use requires a substantial deviation from the grant or TUP. You must obtain BLM's approval before you begin any activity that is a substantial deviation;

(c) When there is a change affecting your application, grant, or TUP including, but not limited to changes in:

(1) Mailing address;

(2) Partners;

(3) Financial conditions; or

(4) Business or corporate status; and

(d) When BLM requests it, such as to update information or confirm that information you submitted before is accurate.

### § 2886.13 If I hold a grant or TUP, for what am I liable?

(a) If you hold a grant or TUP, you are liable to the United States and to third parties for any damage or injury they incur in connection with your use and occupancy of the right-of-way or TUP area.

(b) You are strictly liable for any activity or facility associated with your right-of-way or TUP area which BLM

## Bureau of Land Management, Interior

## §2886.15

determines presents a foreseeable hazard or risk of damage or injury to the United States. BLM will specify in the grant or TUP any activity or facility posing such hazard or risk, and the financial limitations on damages commensurate with such hazard or risk.

(1) BLM will not impose strict liability for damage or injury resulting primarily from an act of war or the negligence of the United States, except as otherwise provided by law.

(2) As used in this section, strict liability extends to costs incurred by the Federal government to control or abate conditions, such as fire or oil spills, which threaten life, property, or the environment, even if the threat occurs to areas that are not under Federal jurisdiction. This liability is separate and apart from liability under other provisions of law.

(3) You are strictly liable to the United States for damage or injury up to \$2 million for any one incident. BLM will update this amount annually to adjust for changes in the Consumer Price Index for All Urban Consumers, U.S. City Average (CPI-U) as of July of each year (difference in CPI-U from July of one year to July of the following year), rounded to the nearest \$1,000. This financial limitation does not apply to the release or discharge of hazardous substances on or near the grant or TUP area, or where liability is otherwise not subject to this financial limitation under applicable law.

(4) BLM will determine your liability for any amount in excess of the \$2 million strict liability limitation (as adjusted) through the ordinary rules of negligence.

(5) The rules of subrogation apply in cases where a third party caused the damage or injury.

(c) If you cannot satisfy claims for injury or damage, all owners of any interests in, and all affiliates or subsidiaries of any holder of, a grant or TUP, except for corporate stockholders, are jointly and severally liable to the United States.

(d) If BLM issues a grant or TUP to more than one holder, each is jointly and severally liable.

(e) By accepting the grant or TUP, you agree to fully indemnify or hold the United States harmless for liability,

damage, or claims arising in connection with your use and occupancy of the right-of-way or TUP area.

(f) We address liability of state, tribal, and local governments in §2886.14 of this subpart.

(g) The provisions of this section do not limit or exclude other remedies.

### **§2886.14 As grant or TUP holders, what liabilities do state, tribal, and local governments have?**

(a) If you are a state, tribal, or local government or its agency or instrumentality, you are liable to the fullest extent law allows at the time that BLM issues your grant or TUP. If you do not have the legal power to assume full liability, you must repair damages or make restitution to the fullest extent of your powers.

(b) BLM may require you to provide a bond, insurance, or other acceptable security to:

(1) Protect the liability exposure of the United States to claims by third parties arising out of your use and occupancy of the right-of-way or TUP area;

(2) Cover any losses, damages, or injury to human health, the environment, and property incurred in connection with your use and occupancy of the right-of-way or TUP area; and

(3) Cover any damages or injuries resulting from the release or discharge of hazardous materials incurred in connection with your use and occupancy of the right-of-way or TUP area.

(c) Based on your record of compliance and changes in risk and conditions, BLM may require you to increase or decrease the amount of your bond, insurance, or security.

(d) The provisions of this section do not limit or exclude other remedies.

### **§2886.15 How is grant or TUP administration affected if the BLM land my grant or TUP encumbers is transferred to another Federal agency or out of Federal ownership?**

(a) If there is a proposal to transfer the BLM land your grant or TUP encumbers to another Federal agency, BLM may, after reasonable notice to you, transfer administration of your grant or TUP, for the lands BLM formerly administered, to another Federal

agency, unless doing so would diminish your rights. If BLM determines your rights would be diminished by such a transfer, BLM can still transfer the land, but retain administration of your grant or TUP under existing terms and conditions.

(b) If there is a proposal to transfer the BLM land your grant or TUP encumbers out of Federal ownership, BLM may, after reasonable notice to you and in conformance with existing policies and procedures:

(1) Transfer the land subject to your grant or TUP. In this case, administration of your grant or TUP, for the lands BLM formerly administered, is transferred to the new owner of the land;

(2) Transfer the land, but BLM retains administration of your grant or TUP; or

(3) Reserve to the United States the land your grant or TUP encumbers, and BLM retains administration of your grant or TUP.

(c) BLM or, if BLM no longer administers the land, the new land owner may negotiate new grant or TUP terms and conditions with you.

**§ 2886.16 Under what conditions may BLM order an immediate temporary suspension of my activities?**

(a) Subject to § 2886.11, BLM can order an immediate temporary suspension of grant or TUP activities within the right-of-way or TUP area to protect public health or safety or the environment. BLM can require you to stop your activities before holding an administrative proceeding on the matter and may order immediate remedial action.

(b) BLM may issue the immediate temporary suspension order orally or in writing to you, your contractor or subcontractor, or to any representative, agent, or employee representing you or conducting the activity. BLM may take this action whether or not any action is being or has been taken by other Federal or state agencies. When you receive the order, you must stop the activity immediately. BLM will, as soon as practical, confirm an oral order by sending or hand delivering to you or your agent at your ad-

dress a written suspension order explaining the reasons for it.

(c) You may file a written request for permission to resume activities at any time after BLM issues the order. In the request, give the facts supporting your request and the reasons you believe that BLM should lift the order. BLM must grant or deny your request within 5 business days after receiving it. If BLM does not respond within 5 business days, BLM has denied your request. You may appeal the denial under § 2881.10 of this part.

(d) The immediate temporary suspension order is effective until you receive BLM's written notice to proceed with your activities.

**§ 2886.17 Under what conditions may BLM suspend or terminate my grant or TUP?**

(a) Subject to § 2886.11, BLM may suspend or terminate your grant if you do not comply with applicable laws and regulations or any terms, conditions, or stipulations of the grant, or if you abandon the right-of-way.

(b) Subject to § 2886.11, BLM may suspend or terminate your TUP if you do not comply with applicable laws and regulations or any terms, conditions, or stipulations of the TUP, or if you abandon the TUP area.

(c) A grant or TUP also terminates when:

(1) The grant or TUP contains a term or condition that has been met that requires the grant or TUP to terminate;

(2) BLM consents in writing to your request to terminate the grant or TUP; or

(3) It is required by law to terminate.

(d) Your failure to use your right-of-way for its authorized purpose for any continuous 2-year period creates a presumption of abandonment. BLM will notify you in writing of this presumption. You may rebut the presumption of abandonment by proving that you used the right-of-way or that your failure to use the right-of-way was due to circumstances beyond your control, such as acts of God, war, or casualties not attributable to you.

(e) You may appeal a decision under this section under § 2881.10 of this part.

**§ 2886.18 How will I know that BLM intends to suspend or terminate my grant or TUP?**

(a) *Grants.* When BLM determines that it will suspend or terminate your grant under § 2886.17 of this subpart, it will send you a written notice of this determination. The determination will provide you a reasonable opportunity to correct the violation, start your use, or resume your use of the right-of-way, as appropriate. In the notice BLM will state the date by which you must correct the violation or start or resume use of the right-of-way.

(1) If you have not corrected the violation or started or resumed use of the right-of-way by the date specified in the notice, BLM will refer the matter to the Office of Hearings and Appeals. An ALJ in the Office of Hearings and Appeals will provide an appropriate administrative proceeding under 5 U.S.C. 554 and determine whether grounds for suspension or termination exist. No administrative proceeding is required where the grant by its terms provides that it terminates on the occurrence of a fixed or agreed upon condition, event, or time.

(2) BLM will suspend or terminate the grant if the ALJ determines that grounds exist for suspension or termination and the suspension or termination is justified.

(b) *TUPs.* When BLM determines that it will suspend or terminate your TUP, it will send you a written notice and provide you a reasonable opportunity to correct the violation or start or resume use of the TUP area. The notice will also provide you information on how to file a written request for reconsideration.

(1) You may file a written request with the BLM office that issued the notice, asking for reconsideration of the determination to suspend or terminate your TUP. BLM must receive this request within 10 business days after you receive the notice.

(2) BLM will provide you with a written decision within 20 business days after receiving your request for reconsideration. The decision will include a finding of fact made by the next higher level of authority than that who made the suspension or termination determination. The decision will also inform

you whether BLM suspended or terminated your TUP or cancelled the notice made under paragraph (b) of this section.

(3) If the decision is adverse to you, you may appeal it under § 2881.10 of this part.

**§ 2886.19 When my grant or TUP terminates, what happens to any facilities on it?**

(a) Subject to § 2886.11, after your grant or TUP terminates, you must remove any facilities within the right-of-way or TUP area within a reasonable time, as determined by BLM, unless BLM instructs you otherwise in writing, or termination is due to non-payment of rent (see § 2885.17(c) of this part).

(b) After removing the facilities, you must remediate and restore the right-of-way or TUP area to a condition satisfactory to BLM, including the removal and clean-up of any hazardous materials.

(c) If you do not remove all facilities within a reasonable period, as determined by BLM, BLM may declare them to be the property of the United States. However, you are still liable for the costs of removing them and for remediating and restoring the right-of-way or TUP area.

**Subpart 2887—Amending, Assigning, or Renewing MLA Grants and TUPs****§ 2887.10 When must I amend my application, seek an amendment of my grant or TUP, or obtain a new grant or TUP?**

(a) You must amend your application or seek an amendment of your grant or TUP when there is a proposed substantial deviation in location or use.

(b) The requirements to amend an application or a grant or TUP are the same as those for a new application, including paying processing and monitoring fees and rent according to §§ 2884.12, 2885.23, 2885.19, and 2886.11 of this part.

(c) Any activity not authorized by your grant or TUP may subject you to prosecution under applicable law and to trespass charges under subpart 2888 of this part.

## **§ 2887.11**

(d) Notwithstanding paragraph (a) of this section, if you hold a pipeline grant issued before November 16, 1973, and there is a proposed substantial deviation in location or use of the right-of-way, you must apply for a new grant.

(e) BLM may ratify or confirm a grant that was issued before November 16, 1973, if we can modify the grant to comply with the Act and these regulations. BLM and you must jointly agree to any modification of a grant made under this paragraph.

### **§ 2887.11 May I assign my grant or TUP?**

(a) With BLM's approval, you may assign, in whole or in part, any right or interest in a grant or TUP.

(b) In order to assign a grant or TUP, the proposed assignee, subject to § 2886.11 of this part, must file an application and satisfy the same procedures and standards as for a new grant or TUP, including paying processing fees (see § 2884.12 of this part).

(c) The assignment application must also include:

(1) Documentation that the assignor agrees to the assignment; and

(2) A signed statement that the proposed assignee agrees to comply with and to be bound by the terms and conditions of the grant or TUP that is being assigned, and all applicable laws and regulations.

(d) BLM will not recognize an assignment until we approve it in writing. BLM will approve the assignment if doing so is in the public interest. BLM may modify the grant or TUP or add bonding and other requirements, including terms and conditions, to the grant or TUP when approving the assignment. If BLM approves the assignment, the benefits and liabilities of the grant or TUP apply to the new grant or TUP holder.

(e) The processing time and conditions described at § 2884.21 of this part apply to assignment applications.

### **§ 2887.12 How do I renew my grant?**

(a) You must apply to BLM to renew the grant at least 120 calendar days before your grant expires. BLM will renew the grant if the pipeline is being operated and maintained in accordance

## **43 CFR Ch. II (10–1–08 Edition)**

with the grant, these regulations, and the Act. If your grant has expired or terminated, you must apply for a new grant under subpart 2884 of this part.

(b) BLM may modify the terms and conditions of the grant at the time of renewal, and you must pay the processing fees (see § 2884.12 of this part) in advance.

(c) The time and conditions for processing applications for rights-of-way, as described at § 2884.21 of this part, apply to applications for renewals.

## **Subpart 2888—Trespass**

### **§ 2888.10 What is trespass?**

(a) Trespass is using, occupying, or developing the public lands or their resources without a required authorization or in a way that is beyond the scope and terms and conditions of your authorization. Trespass is a prohibited act.

(b) Trespass includes acts or omissions causing unnecessary or undue degradation to the public lands or their resources. In determining whether such degradation is occurring, BLM may consider the effects of the activity on resources and land uses outside the area of the activity.

(c) BLM will administer trespass actions for grants and TUPs as set forth in §§ 2808.10(c), and 2808.11 of this chapter, except that the rental exemption provisions of part 2800 do not apply to grants issued under this part.

(d) Other Federal agencies will address trespass on non-BLM lands under their respective laws and regulations.

### **§ 2888.11 May I receive a grant if I am or have been in trespass?**

Until you satisfy your liability for a trespass, BLM will not process any applications you have pending for any activity on BLM-administered lands. A history of trespass will not necessarily disqualify you from receiving a grant. In order to correct a trespass, you must apply under the procedures described at subpart 2884 of this part. BLM will process your application as if it were a new use. Prior unauthorized use does not create a preference for receiving a grant.

##### Subpart 2911—Airport

AUTHORITY: 49 U.S.C. 211; 43 U.S.C. 1701 *et seq.*

SOURCE: 51 FR 40809, Nov. 10, 1986, unless otherwise noted.

##### § 2911.0-1 Purpose.

This subpart sets forth procedures for issuance of airport leases on the public lands.

##### § 2911.0-3 Authority.

The Act of May 24, 1928, as amended (49 U.S.C. Appendix, 211-213), author-

izes the Secretary of the Interior to lease for use as a public airport, any contiguous unreserved and unappropriated public lands not to exceed 2,560 acres in area.

##### § 2911.0-5 Definitions.

As used in this subpart, the term:

(a) *Act* means the Act of May 24, 1928, as amended (49 U.S.C. Appendix, 211-213).

(b) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this subpart.

(c) *Administrator* means the Administrator of the Federal Aviation Administration.

(d) *Applicant* means any individual who is a citizen of the United States; a group or association of citizens of the United States; any corporation, organized under the laws of the United States or of any State, authorized to conduct business in the State in which the land involved is located; or a State or political subdivisions or instrumentality thereof, including counties and municipalities; who submits an application for an airport lease under this subpart.

(e) *Public airport* means an airport open to use by all persons without prior permission of the airport lessee or operator, and without restrictions within the physical capacities of its available facilities.

##### § 2911.0-8 Lands available for leasing.

Any contiguous unreserved and unappropriated public lands, surveyed or unsurveyed, not exceeding 2,560 acres in area, may be leased under the provisions of the Act, subject to valid existing rights under the public land laws.

##### § 2911.1 Terms and conditions.

(a) The lessee shall, within 1 year from the date of issuance of the lease, equip the airport as required by the Administrator and file a report thereof in the Bureau of Land Management District office having jurisdiction over the lands under lease.

(b) At any time during the term of the lease, the Administrator may have an inspection made of the airport, and if the airport does not comply with the

## § 2911.2

ratings set by the Federal Aviation Administration, the Administrator shall submit a written statement describing the deficiencies to the Bureau of Land Management District office having jurisdiction over the lands under lease for appropriate action.

(c) The authorized officer may cancel, in whole or in part, a lease issued under the Act for any of the following reasons: Lessee failure to use the leased premises or any part thereof for a period of at least 6 months; use of the property or any part thereof for a purpose other than the authorized use; failure to pay the annual rental in full on or before the date due; failure to maintain the premises according to the ratings set by the Federal Aviation Administration; failure to comply with the regulations in this part or the terms of the lease.

(d) Leases under the Act shall be for a period not to exceed 20 years and may be renewed for like periods.

(e) Annual rental for leases to any citizen of the United States, any group or association of citizens, or any corporation organized under the laws of the United States or any State shall be at appraised fair market rental, with a minimum annual rental payment of \$100. State or political subdivisions thereof, including counties and municipalities, shall pay to the lessor an annual rental calculated at the appraised fair market value of the rental of the property less 50%, with a minimum annual rental payment of \$100. In fixing the rentals, consideration shall be given to all pertinent facts and circumstances, including use of the airport by government departments and agencies. Rental of each lease shall be reconsidered and revised at 5-year intervals to reflect current appraised fair market value. The first annual rental payment shall be made prior to issuance of the lease. All subsequent payments shall be paid on or before the anniversary date of issuance of the lease.

(f) The lessee shall agree that all departments and agencies of the United States operating aircraft shall have free and unrestricted use of the airport and, with the approval of the authorized officer, such departments or agencies shall have the right to erect and

## 43 CFR Ch. II (10–1–08 Edition)

install therein such structures and improvements as are deemed advisable by the heads of such departments and agencies. Whenever the President may deem it necessary for military purposes, the Secretary of the Army may assume full control of the airport.

(g) The lessee shall submit to the Administrator for approval regulations governing operations of the airport.

### § 2911.2 Procedures.

#### § 2911.2–1 Preapplication activity.

Persons seeking to lease public lands under this subpart shall first consult with the authorized officer in the District or Resource Area Office in which the lands are located. Such consultation is necessary to determine land availability and conformity of proposed use with approved land use plans, explain associated statutory and regulatory requirements, familiarize the potential applicant with respective management responsibilities, set forth the application processing procedures for the proposed action, and identify potential conflicts. Upon completion of the consultation, persons seeking to lease public lands for a public airport may submit an application for consideration by the authorized officer.

#### § 2911.2–2 Applications.

(a) Each application shall clearly describe the lands applied for by legal subdivisions and/or by metes and bounds and contain a plan of development and use signed by the applicant or by a duly authorized agent or officer of the applicant. When required by the authorized officer, the application shall include copies of the appropriate State, county, or municipal airport licenses or permits, as well as such additional States and local clearances as may be required.

(b) Each application shall be accompanied by a non-refundable filing fee of \$100. Each applicant shall also be required to pay the cost of publication of a Notice of Realty Action in the FEDERAL REGISTER and a newspaper of general circulation in the area in which the lands are located.

(c) If approval of an application results in cancellation of a grazing permit of lease or a reduction in grazing

**Bureau of Land Management, Interior**

**§2912.1-1**

acreage, the provisions of §4110.4-2 of this title shall apply.

**§2911.2-3 Report by Administrator; Notice of Realty Action.**

(a) Upon receipt of the application, the authorized officer shall send 1 copy to the Administrator for a determination concerning what fuel facilities, lights, and other furnishings are necessary to meet the rating set by that agency. After receiving the report of the Administrator, and before making a determination to issue a lease, the authorized officer shall publish a Notice of Realty Action in the FEDERAL REGISTER and in a newspaper of general circulation in the area of the lands to be leased. The notice shall provide 45 days from the date of publication in the FEDERAL REGISTER for comments by the public. Comments shall be sent to the office issuing the notice. The notice shall not be published until the authorized officer has received the filing fee from the applicant and is satisfied that all statutory and regulatory requirements have been met.

(b) The notice of realty action may segregate the lands or interests in lands to be conveyed to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the notice of realty action shall terminate either upon issuance of a document of conveyance or 1 year from the date of publication in the FEDERAL REGISTER, whichever occurs first.

[51 FR 40809, Nov. 10, 1986; 51 FR 45986, Dec. 23, 1986]

**§2911.2-4 Execution of lease.**

Upon receipt of the payments required by §2911.2-2(b) of this title and not less than 45 days following the publications required by §2911.2-4 of this title, the authorized officer shall make a decision on the application and, if the application is approved, issue the lease.

[51 FR 40809, Nov. 10, 1986; 51 FR 45986, Dec. 23, 1986]

**Subpart 2912—Recreation and Public Purposes Act**

AUTHORITY: Recreation and Public Purposes Act, as amended (43 U.S.C. 869, *et seq.*).

SOURCE: 44 FR 43473, July 25, 1979, unless otherwise noted.

**§2912.0-7 Cross reference.**

The general requirements and procedures under the Recreation and Public Purposes Act are contained in part 2740 of this title.

**§2912.1 Nature of interest.**

**§2912.1-1 Terms and conditions of lease.**

(a) The term of leases under the Recreation and Public Purposes Act, hereafter referred to as *the Act*, shall be fixed by the authorized officer but shall not exceed 20 years for nonprofit associations and nonprofit corporations, and 25 years for Federal, State, and local governmental entities. A lease may contain, at the discretion of the authorized officer, a provision giving the lessee the privilege of renewing the lease for a like period.

(b) Leases shall be issued on a form approved by the Director, Bureau of Land Management and shall contain terms and conditions required by law, and public policy, and which the authorized officer considers necessary for the proper development of the land, for the protection of Federal property, and for the protection of the public interest.

(c) Leases shall be terminable by the authorized officer upon failure of the lessee to comply with the terms of the lease, upon a finding, after notice and opportunity for hearing, that all or part of the land is being devoted to a use other than the use authorized by the lease, or upon a finding that the land has not been used by the lessee for the purpose specified in the lease for any consecutive period specified by the authorized officer. The specified period of non-use or unauthorized use shall not be less than 2 years nor more than 5 years.

(d) Reasonable annual rentals shall be established by the Secretary of the Interior and shall be payable in advance. Upon notification of the amount

## § 2912.2

of the yearly rental, a lease applicant shall be required to pay at least the first year's rental before the lease shall be issued. Upon the voluntary relinquishment of a lease before the expiration of its term, any rental paid for the unexpired portion of the term shall be returned to the lessee upon a proper application for repayment to the extent that the amount paid covers a full lease year or years of the remainder of the term of the original lease. Leases for recreational or historic-monument purposes to a State, county or other State or Federal instrumentality or political subdivision shall be issued without monetary consideration.

(e) Leases are not transferable except with the consent of the authorized officer. Transferees shall have all the qualifications of applicants under the Act and shall be subject to all the terms and conditions of the regulations in this part.

(f) A lessee shall not be permitted to cut timber from the leased lands without prior permission from the authorized officer.

(g) All leases shall reserve to the United States all minerals together with the right to mine and remove the same under applicable laws and regulations to be established by the Secretary of the Interior.

## § 2912.2 Renewal of leases.

A lessee with a privilege of renewal must notify the authorized officer at least 180 days before the end of the lease period that it will exercise the privilege.

## § 2912.3 Substitution of a new lease.

A lessee may apply for a new lease at any time. Applications for new leases shall be accompanied by consent of the lessee to cancellation of the existing lease upon the issuance of the new lease and by three copies of a statement showing (a) the need for a new lease and (b) any changes in the use or management of the lands or the terms and conditions of the lease which the applicant desires.

## Subpart 2916—Alaska Fur Farm

SOURCE: 35 FR 9665, June 13, 1970, unless otherwise noted.

## 43 CFR Ch. II (10–1–08 Edition)

## § 2916.0–3 Authority.

The Act of July 3, 1926 (44 Stat. 821, 48 U.S.C. secs. 360, 361), authorizes the Secretary of the Interior to lease public lands on the mainland of or islands in Alaska, with the exception of the Pribilof Islands, for fur farming, for periods not exceeding ten years.

## § 2916.0–6 Policy.

(a) The authority to lease the public lands in Alaska for fur-farming purposes was granted in order to promote the development of the production of furs in Alaska.

(b) No lease for the purpose of raising beavers will be granted on any area already occupied by a beaver colony nor will any such lease be granted on streams or lakes where the activities of beavers may interfere with the run or spawning of salmon.

(c) In order to offer more people an opportunity to lease lands, and to avoid tying up large areas of land unnecessarily, fur-farming leases on public lands will not be granted for areas greater than are justified by the needs and experience of the applicant.

## § 2916.0–8 Area subject to lease.

(a) *Acreage limitation and exceptions.*

(1) On the mainland such leases may be for an area not exceeding 640 acres. A lease may cover an entire island, provided the area thereof does not exceed 30 square miles, and provided the need for such entire island is clearly established. Islands so close together that animals can cross from one to the other and whose combined area does not exceed 30 square miles, will be treated as one island. Islands having an area of more than 30 square miles will be treated as mainland.

(2) Where a lease is granted for an area in excess of 640 acres on an island, the manager may, after notice to the lessee, reduce the area to an amount not less than 640 acres, if he determines that the lessee cannot reasonably use all of the area for which the lease was granted.

(b) *Lands subject to lease.* (1) Vacant, unreserved, and unappropriated public lands are subject to lease.

(2) Except for lands under the jurisdiction of the Fish and Wildlife Service and the National Park Service, public

## Bureau of Land Management, Interior

## §2916.2-1

lands withdrawn or reserved for any purpose are subject to lease, if the department or agency having jurisdiction thereof consents to the issuance of the lease.

### §2916.1 Terms and conditions.

#### §2916.1-1 Commencement of operations; stocking lands.

The lessee shall, within one year from the date of issuance of the lease, commence operations by taking possession of the leased area, and by placing thereon within that period such improvements as may be needed for such operations and as will show good faith, and shall thereafter develop the fur-farming enterprise on the leased area with reasonable diligence. The lessee shall stock the leased area with the minimum of fur-bearing animals required by the lease within the periods specified in the lease.

#### §2916.1-2 Rights reserved; protection of improvements and roads.

Nothing in this part or any lease issued under this part shall interfere with or prevent:

(a) The prospecting, locating, development, entering, leasing, or patenting of mineral resources in the leased area under laws applicable thereto.

(b) The use and disposal of timber or other resources on or in the leased area under applicable laws.

(c) The use and occupation of parts of leased areas for the taking, preparing, manufacturing, or storing of fish or fish products, or the utilization of the lands for purposes of trade or business, to the extent and in the manner provided by law, and as authorized by the State Director.

(d) The acquisition or granting of rights-of-way or easements under applicable laws and regulations.

(e) Hunting and fishing under applicable Federal and State hunting and fishing laws and regulations, but the authorized officer may prohibit or restrict, or he may authorize the lessee to prohibit or restrict hunting or fishing on such parts of the leased area and for such periods as he may determine to be necessary in order to prevent any substantial interference with the purposes for which the lease is issued.

### §2916.2 Procedures.

#### §2916.2-1 Applications.

(a) *Qualifications of applicants.* Any person who is a citizen of the United States, or any group or association composed of such persons, or any corporation organized under the laws of the United States, or of any State thereof, authorized to conduct business in Alaska may file an application.

(b) *Contents of application.* An application for lease should be filed in duplicate in the proper office. No specific form of application is required, but the application should contain or be accompanied by the following:

(1) Applicant's full name, post office address, the general nature of his present business, and the principal place of business.

(2)(i) A statement of the age and of the citizenship status, whether native-born or naturalized, of the applicant, if an individual, or of each partner or member of a partnership or association. A copartnership or an association applicant shall file a copy of whatever written articles of association its members have executed.

(ii) A corporation shall file a certified copy of its articles of incorporation, evidence that it is authorized to transact business in Alaska, and a copy of the corporate minutes or resolutions authorizing the filing of the application and the execution of the lease.

(3) Description of the land for which the lease is desired, by legal subdivision, section, township, and range, if surveyed, and by metes and bounds, with the approximate area, if unsurveyed. The metes and bounds description should be connected by course and distance with some corner of the public-land surveys, if practicable, or with reference to rivers, creeks, mountains, towns, islands, or other prominent topographical points or natural objects or monuments.

(4) A statement as to the applicant's experience in and knowledge of fur farming.

(5) A statement as to the kind of fur-bearing animals to be raised, and, if foxes, the color type; the number of fur-bearing animals the applicant proposes to have on the leased land within one year from the date of the lease, and

whether it is proposed to purchase or trap the stock; and that before commencing operations of any lease which may be issued, the applicant will procure from the appropriate State game agency whatever licenses are required under Alaska law.

(6) A detailed statement of the reasons for the need for any area in excess of 640 acres but not exceeding 30 square miles, when the land applied for is comprised of an island, or islands.

(7) A statement of the nature and results of the investigation made by applicant as to whether the land and climate are suited to raising the kind of animals proposed to be stocked.

(8) A statement as to whether the land is occupied, claimed, or used by natives of Alaska or others; and, if so the nature of the use and occupancy and the improvements thereon, if any.

(9) If beavers are to be raised, a statement as to whether a beaver colony exists on the land, and whether salmon streams or lakes are on or adjacent to the land proposed to be leased.

(10) A statement that the applicant is acting solely on his own account and not under any agreement or understanding with another.

(11) The serial numbers of all other applications filed or leases obtained under this act by applicant, or applicant's spouse or business associate, or in which applicant has a direct or indirect interest.

(12) The showing as to hot or medicinal springs required by § 2311.2(a) of this chapter.

(13) All applications must be accompanied by an application service fee of \$10 which will not be returnable.

(c) *Form of lease; rental and royalty; report of annual operations.* (1) Leases will be issued on a form approved by the Director.

(2) Prior to the issuance of a lease and annually thereafter, the lessee shall pay an advance rental of \$5 per annum if the lease embraces 10 acres or less, a rental of \$25 per annum if the leased area is more than 10 acres but not more than 640 acres, and a rental of \$50 per annum if the leased area exceeds 640 acres.

(3) Within 60 days after the end of each lease year the lessee shall file with the land office a report on a form

approved by the Director, in duplicate, showing his operations under the lease and his gross receipts thereunder from the sale of live animals and pelts for the preceding lease year. The lessee shall pay, at the time of filing the report, a royalty of 1 percent of such gross receipts deducting therefrom the amount of the advance rental payment made for such preceding lease year.

**§ 2916.2-2 Assignments and subleases.**

A proposed assignment on a lease, in whole or in part, or a sublease, must be filed in duplicate with the proper office within 90 days from the date of its execution; must contain all of the terms and conditions agreed upon by the parties thereto; and must be supported by a statement that the assignee or sublessee agrees to be bound by the provisions of the lease. The assignee or sublessee must submit with the assignment or sublease the information or statements required by § 2916.2-1(b) (1), (2), (4), (5), (10), and (11). No assignment or sublease will be recognized unless and until approved by the authorizing officer.

(Sec. 2, 44 Stat. 822; 48 U.S.C. 361)

**§ 2916.2-3 Renewal of leases.**

Upon an application filed in the proper office within 90 days preceding the expiration date of the lease, if it is determined that a renewal lease should be granted, the lessee will be offered such lease by the authorized officer, upon such terms and conditions and for such duration as may be fixed, not exceeding 10 years. The filing of an application for renewal does not confer on the lessee any preference right to a renewal. The timely filing of an application will, however authorize the exclusive fur-farming use of the lands by the lessee in accordance with the terms of the prior lease pending final action on the renewal application.

**§ 2916.2-4 Termination of lease; cancellation.**

(a) *Action by authorized officer.* (1) The authorized officer may terminate a lease at the request of the lessee if the lessee shall make satisfactory showing that such termination will not adversely affect the public interest and

## Bureau of Land Management, Interior

§ 2920.0-3

that he has paid all charges due the Government thereunder.

(2) A lease may be canceled if the lessee shall fail to comply with any of the provisions of this part or of the lease, or shall devote the lease area primarily to any purpose other than the rearing of fur-bearing animals as authorized. No lease will be canceled until the lessee has been formally notified of such default and such default shall continue for 60 days after service of such notice.

(b) *Removal of improvements and personal property.* (1) Improvements or personal property may not be removed from the lands, except fur-bearing animals disposed of in the regular course of business, unless all moneys due the United States under the lease have been paid. The lessee shall be allowed 90 days from the date of expiration or termination of the lease within which to remove his personal property and such improvements as are not disposed of in the manner set forth in paragraph (b)(2) of this section, which he has a right to remove; if not removed or otherwise disposed of within the said period, such improvements or personal property shall become the property of the United States.

(2) Upon the expiration of the lease or the earlier termination thereof, the authorizing officer may, in his discretion and upon a written petition filed by the lessee within 30 days from the date of such expiration or termination, require the subsequent lease applicant, prior to the execution of a new lease, to agree to compensate the lessee for any improvements of a permanent nature that he may have placed upon the leased area for fur-farming purposes during the period of the lease. If the interested parties are unable to reach an agreement as to the amount of compensation, the amount shall be fixed by the authorizing officer. All such agreements to be effective, must be approved by the authorizing officer. The failure of the subsequent lessee to pay the former lessee in accordance with such agreement will be just cause for cancellation of the lease.

### Subpart 2920—Leases, Permits and Easements: General Provisions

#### § 2920.0-1 Purpose.

The purpose of the regulations in this part is to establish procedures for the orderly and timely processing of proposals for non-Federal use of the public lands. The procedural and informational requirements set by these regulations vary in relation to the nature of the anticipated use.

#### § 2920.0-3 Authority.

Sections 302, 303 and 310 of the Federal Land Policy and Management Act

## § 2920.0-5

of 1976 (43 U.S.C. 1732, 1733, 1740) authorize the Secretary of the Interior to issue regulations providing for the use, occupancy, and development of the public lands through leases, permits, and easements.

[52 FR 49115, Dec. 29, 1987]

### § 2920.0-5 Definitions.

As used in this part, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this part.

(b) *Easement* means an authorization for a non-possessory, non-exclusive interest in lands which specifies the rights of the holder and the obligation of the Bureau of Land Management to use and manage the lands in a manner consistent with the terms of the easement.

(c) *Lease* means an authorization to possess and use public lands for a fixed period of time.

(d) *Permit* means a short-term revocable authorization to use public lands for specified purposes.

(e) *Land use proposal* means an informal statement, in writing, from any person to the authorized officer requesting consideration of a specified use of the public lands.

(f) *Land use plan* means resource management plans or management framework plans prepared by the Bureau of Land Management pursuant to its land use planning system.

(g) *Public lands* means lands or interests in lands administered by the Bureau of Land Management, except lands located on the Outer Continental Shelf and lands held for the benefit of Indians, Aleuts and Eskimos.

(h) *Person* means any person or entity legally capable of conveying and holding lands or interests therein, under the laws of the State within which the lands or interests therein are located, who is a citizen of the United States, or in the case of a corporation, is subject to the laws of any State or of the United States.

(i) *Proponent* means any person who submits a land use proposal, either on his/her own initiative or in response to a notice for submission of such proposals.

## 43 CFR Ch. II (10-1-08 Edition)

(j) *Applicant* means any person who submits an application for a land use authorization under this part.

(k) *Casual use* means any short term non-commercial activity which does not cause appreciable damage or disturbance to the public lands, their resources or improvements, and which is not prohibited by closure of the lands to such activities.

(l) *Land use authorization* means any authorization to use the public lands issued under this part.

(m) *Knowing and willful* means that a violation is *knowingly and willfully* committed if it constitutes the voluntary or conscious performance of an act which is prohibited or the voluntary or conscious failure to perform an act or duty that is required. The term does not include performances or failures to perform which are honest mistakes or which are merely inadvertent. The term includes, but does not require, performances or failures to perform which result from a criminal or evil intent or from a specific intent to violate the law. The knowing or willful nature of conduct may be established by plain indifference to or reckless disregard of the requirements of law, regulations, orders, or terms of a lease. A consistent pattern of performance or failure to perform also may be sufficient to establish the knowing or willful nature of the conduct, where such consistent pattern is neither the result of honest mistake or mere inadvertency. Conduct which is otherwise regarded as being knowing or willful is rendered neither accidental nor mitigated in character by the belief that the conduct is reasonable or legal.

[46 FR 5777, Jan. 19, 1981, as amended at 52 FR 49115, Dec. 29, 1987]

### § 2920.0-6 Policy.

(a) Land use authorizations shall be issued only at fair market value and only for those uses that conform with Bureau of Land Management plans, policy, objectives and resource management programs. Conformance with land use authorizations will be determined through the planning process and procedures provided in part 1600 of this title.

## Bureau of Land Management, Interior

## § 2920.1-2

(b) In determining the informational and procedural requirements, the authorized officer will consider the duration of the anticipated use, its impact on the public lands and resources and the investment required by the anticipated use.

### § 2920.0-9 Information collection.

(a) The information collection requirements contained in Part 2920 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, and assigned clearance number 1004-0009. The BLM will use the information in considering land use proposals and applications. You must respond to obtain a benefit under Section 302 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732).

(b) Public reporting burden for this information is estimated to average 7.43 hours, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer, Bureau of Land Management (DW-101), Building 50, Denver Federal Center, P.O. Box 25047, Denver, Colorado 80225, and to the Office of Management and Budget, Paperwork Reduction Project, 1004-0009, Washington, D.C. 20503.

[61 FR 32353, June 24, 1996]

### § 2920.1 Uses.

#### § 2920.1-1 Authorized use.

Any use not specifically authorized under other laws or regulations and not specifically forbidden by law may be authorized under this part. Uses which may be authorized include residential, agricultural, industrial, and commercial, and uses that cannot be authorized under title V of the Federal Land Policy and Management Act or section 28 of the Mineral Leasing Act. Land use authorizations shall be granted under the following categories:

(a) Leases shall be used to authorize uses of public lands involving substan-

tial construction, development, or land improvement and the investment of large amounts of capital which are to be amortized over time. A lease conveys a possessory interest and is revocable only in accordance with its terms and the provisions of § 2920.9-3 of this title. Leases shall be issued for a term, determined by the authorized officer, that is consistent with the time required to amortize the capital investment.

(b) Permits shall be used to authorize uses of public lands for not to exceed 3 years that involve either little or no land improvement, construction, or investment, or investment which can be amortized within the term of the permit. A permit conveys no possessory interest. The permit is renewable at the discretion of the authorized officer and may be revoked in accordance with its terms and the provisions of § 2920.9-3 of this title. Permits shall be issued on a form approved by the Director, Bureau of Land Management, that has been filed by the applicant with the appropriate Bureau of Land Management office.

(c) Easements may be used to assure that uses of public lands are compatible with non-Federal uses occurring on adjacent or nearby land. The term of the easement shall be determined by the authorized officer. An easement granted under this part may be issued only for purposes not authorized under title V of the Federal Land Policy and Management Act or section 28 of the Mineral Leasing Act.

(d) No land use authorization is required under the regulations in this part for casual use of the public lands.

[52 FR 49115, Dec. 29, 1987]

#### § 2920.1-2 Unauthorized use.

(a) Any use, occupancy, or development of the public lands, other than casual use as defined in § 2920.0-5(k) of this title, without authorization under the procedures in § 2920.1-1 of this title, shall be considered a trespass. Anyone determined by the authorized officer to be in trespass on the public lands shall be notified of such trespass and shall be liable to the United States for:

(1) The administrative costs incurred by the United States as a consequence of such trespass; and

## § 2920.2

## 43 CFR Ch. II (10–1–08 Edition)

(2) The fair market value rental of the lands for the current year and past years of trespass; and

(3) Rehabilitating and stabilizing the lands that were the subject of such trespass, or if the person determined to be in trespass does not rehabilitate and stabilize the lands determined to be in trespass within the period set by the authorized officer in the notice, he/she shall be liable for the costs incurred by the United States in rehabilitating and stabilizing such lands.

(b) In addition, the following penalties may be assessed by the authorized officer for a trespass not timely resolved under paragraph (a) of this section and where the trespass is determined to be:

(1) Nonwillful, twice the fair market rental value which has accrued since the inception of the trespass, not to exceed a total of 6 years; or

(2) Knowing and willful, three times the fair market rental value which has accrued since the inception of the trespass, not to exceed a total of 6 years.

(c) For any person found to be in trespass on the public lands under this section, the authorized officer may take action under § 2920.9–3 of this title to terminate, revoke, or cancel any land use authorization issued to such person under this part.

(d) Failure to satisfy the liability and penalty requirements imposed under this section for unauthorized use of the public lands may result in denial of:

(1) A use authorization under this part; and

(2) A request to purchase or exchange public lands filed under subparts 2711 and 2201 of this title.

(e) Any person who knowingly and willfully violates the regulations in this part by using the public lands without the authorization required by this part, in addition to the civil penalties provided for in this part, may be subject to a fine of not more than \$1,000 or imprisonment of not more than 12 months, or both under subpart 9262 of this title.

(f) Any person adversely affected by a decision issued under this section, may appeal that decision under the provisions of part 4 of this title.

[52 FR 49115, Dec. 29, 1987]

### § 2920.2 Procedures for public-initiated land use proposals.

#### § 2920.2–1 Discussion of proposals.

(a) *Suggestions by land use proponent.* Any person who seeks to use public lands may contact the Bureau of Land Management office having jurisdiction over the public lands in question and discuss the land use proposal. This contact should be made as early as possible so that administrative requirements and potential conflicts with other land uses can be identified.

(b) *Response by the authorized officer.* The authorized officer will discuss with the land use proponent whether the requested land use, suitability or non-suitability of the requested land use based on a preliminary examination of existing land use plans, where available, is or is not in conformance with Bureau of Land Management policies and programs for the lands, local zoning ordinances and any other pertinent information. The authorized officer will discuss administrative requirements for the type of land use authorization which may be granted (lease, permit or easement), including, but not limited to: additional information which may be required; qualifications; cost reimbursement requirements; associated clearances, other permits or licenses which may be required; environmental and management considerations; and special requirements such as competitive bidding and identification of on-the-ground investigations which may be required in order to issue a land use authorization.

#### § 2920.2–2 Minimum impact permits.

(a) The authorized officer may, without publication of a notice of realty action, issue a permit for a land use upon a determination that the proposed use is in conformance with Bureau of Land Management plans, policies and programs, local zoning ordinances and any other requirements and will not cause appreciable damage or disturbance to the public lands, their resources or improvements.

(b) Permit decisions made under paragraph (a) of this section take effect immediately upon execution, and remain in effect during the period of time specified in the decision to issue

## Bureau of Land Management, Interior

## § 2920.3

the permit. Any person whose interest is adversely affected by a decision to grant or deny a permit under paragraph (a) of this section may appeal to the Board of Land Appeals under part 4 of this title. However, decisions and permits issued under paragraph (a) of this section will remain in effect until stayed.

[46 FR 5777, Jan. 19, 1981, as amended at 61 FR 32354, June 24, 1996]

### § 2920.2-3 Other land use proposals.

(a) A proposal for a land use authorization, including permits not covered by § 2920.2-2 of this title, shall be submitted in writing to the Bureau of Land Management office having jurisdiction over the public lands covered by the proposal.

(b) The submission of a proposal gives no right to use the public lands.

### § 2920.2-4 Proposal content.

(a) Proposals for a land use authorization shall include a description of the proposed land use in sufficient detail to enable the authorized officer to evaluate the feasibility of the proposed land use, the impacts if any, on the environment, the public or other benefits from the proposed land use, the approximate cost of the proposal, any threat to the public health and safety posed by the proposal and whether the proposal is, in the proponent's opinion, in conformance with Bureau of Land Management plans, programs and policies for the public lands covered by the proposal. The description shall include, but not be limited to:

(1) Details of the proposed uses and activities;

(2) A description of all facilities for which authorization is sought, access needs and special types of easements that may be needed;

(3) A map of sufficient scale to allow all of the required information to be legible and a legal description of primary and alternative project locations; and

(4) A schedule for construction of any facilities.

(b) The proposal shall include the name, legal mailing address and telephone number of Bureau of Land Use proponent.

### § 2920.2-5 Proposal review.

(a) A land use proposal shall, upon submission, be reviewed to determine if the public lands covered by the proposal are appropriate for the proposed land use and if the proposal is otherwise legal.

(b) If the proposal is found to be appropriate for further consideration, the authorized officer shall examine the proposal and make one of the following determinations:

(1) The proposed land use is in conformance with the appropriate land use plan and can be approved;

(2) The proposed land use has not been addressed in an existing land use plan and shall be addressed in accordance with the procedure in part 1600 of this title;

(3) The proposed land use is in an area not covered in an existing land use plan and shall be processed in accordance with the procedure in § 1601.8 of this title; or

(4) The proposed land use is not in conformance with the approved land use plan. This determination may be appealed under 43 CFR 4.400 for review of the question of conformance with the land use plan.

(c)(1) If a proposed land use does not meet the requirements of this subpart or is found not to be in conformance with the land use plan, the authorized officer shall so advise the proponent and shall provide a written explanation of the reasons the proposed use does not meet the requirements of this subpart and/or is not in conformance with an existing land use plan.

(2) Where a proposed land use is determined not to be in conformance with an approved land use plan, with the land use plan, the authorized officer may consider the proposal for land use as an application to amend or revise the existing land use plan under part 1600 of this title.

### § 2920.3 Bureau of Land Management initiated land use proposals.

Where, as a result of the land use planning process, the desirability of allowing use of the public lands or providing increased service to the public from such use of the public lands is demonstrated, the authorized officer may identify a use for the public land

#### § 2920.4

and notify the public that proposals for utilizing the land through a lease, permit or easement will be considered.

#### § 2920.4 Notice of realty action.

(a) A notice of realty action indicating the availability of public lands for non-Federal uses through lease, permit or easement shall be issued, published and sent to parties of interest by the authorized officer, including, but not limited to, adjoining land owners and current or past land users, when a determination has been made that such public lands are available for a particular use either through the submission of a public initiated proposal or through the land use planning process.

(b) The notice shall include the use proposed for the public lands and shall notify the public that applications for a lease, permit or easement shall be considered. The notice shall specify the form of negotiation, whether by competitive or non-competitive bidding, under which the land use authorization shall be issued. A notice of realty action is not a specific action implementing a resource management plan or amendment.

(c) The notice of realty action shall be published once in the FEDERAL REGISTER and once a week for 3 weeks thereafter in a newspaper of general circulation in the vicinity of the public lands included in the land use proposal.

(d) An application submitted before a notice of realty action is published shall not be processed and shall be returned to the person who submitted it. Return of an application shall not be subject to appeal or protest.

#### § 2920.5 Application procedure.

##### § 2920.5-1 Filing of applications for land use authorizations.

(a) Only after publication of a notice of realty action shall an application for a land use authorization be filed with the Bureau of Land Management office having jurisdiction over the public lands covered by the application.

(b) The filing of an application gives no right to use the public lands.

#### 43 CFR Ch. II (10-1-08 Edition)

##### § 2920.5-2 Application content.

(a) Applications for land use authorizations shall include a reference to the notice of realty action under which the application is filed and a description of the proposed land use in sufficient detail to enable the authorized officer to evaluate the feasibility of the proposed land use, the impacts, if any, on the environment, the public or other benefits from the land use, the approximate cost of the proposed land use, any threat to the public health and safety posed by the proposed use and whether the proposed use is, in the opinion of the applicant, in conformance with the Bureau of Land Management plans, programs and policies for the public lands covered by the proposed use. The description shall include, but not be limited to:

(1) Details of the proposed uses and activities;

(2) A description of all facilities for which authorization is sought, access needs and special types of easements that may be needed;

(3) A map of sufficient scale to allow all of the required information to be legible and a legal description of primary and alternative project locations; and

(4) A schedule for construction of any facilities.

##### (b) Additional information:

(1) After review of the project description, the authorized officer may require the applicant(s) to fund or to perform additional studies or submit additional environmental data, or both, so as to enable the Bureau of Land Management to prepare an environmental analysis in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*); and comply with the requirements of the National Historic Preservation Act of 1966 (16 U.S.C. 470); The Archeological and Historic Preservation Act of 1974 (16 U.S.C. 469 *et seq.*); Executive Order 11593, "Protection and Enhancement of the Cultural Environment" of May 13, 1971 (36 FR 8921); "Procedures for the Protection of Historic and Cultural Properties" (36 CFR part 300); and other laws and regulations as applicable.

(2) An application for the use of public lands may require additional private, State, local or other Federal agency licenses, permits, easements, certificates or other approval documents. The authorized officer may require the applicant to furnish such documents, or proof of application for such documents, as part of the application.

(3) The authorized officer may require evidence that the applicant has, or prior to commencement of construction will have, the technical and financial capability to construct, operate, maintain and terminate the authorized land use.

(c) The application shall include the name and legal mailing address of the applicant.

(d) *Business Associations.* If the applicant is other than an individual, the application shall include the name and address of an agent authorized to receive notice of actions pertaining to the application.

(e) *Federal departments and agencies.* Federal departments and agencies are not qualified to hold land use authorizations under this authority.

(f) If any of the information required in this section has already been submitted as part of a land use proposal submitted under §2920.2 of this title, the application need only refer to that proposal by filing date, office and case number. The applicant shall certify that there have been no changes in any of the information.

#### § 2920.5-3 Application review.

Every application shall be reviewed to determine if it conforms to the notice of realty action. If the application does not meet the requirements of this subpart, the application may be denied, and the applicant shall be so advised in writing, with an explanation.

#### § 2920.5-4 Competitive or non-competitive bids.

(a) *Competitive.* Land use authorizations may be offered on a competitive basis if, in the judgment of the authorized officer, a competitive interest exists or if no equities, such as prior use of the lands, warrant non-competitive land use authorization. Land use authorizations shall be awarded on the basis of the public benefit to be pro-

vided, the financial and technical capability of the bidder to undertake the project and the bid offered. A bid at less than fair market value shall not be considered. Each bidder shall submit information required by the notice of realty action.

(b) *Non-competitive.* Land use authorizations may be offered on a negotiated, non-competitive basis, when, in the judgement of the authorized officer equities, such as prior use of the lands, exist, no competitive interest exists or where competitive bidding would represent unfair competitive and economic disadvantage to the originator of the unique land use concept. The non-competitive bid shall not be for less than fair market value.

#### § 2920.5-5 Application processing.

(a) After review of applications filed, the authorized officer shall select one application for further processing in accordance with the notice of realty action. The authorized officer shall provide public notice of the selection of an applicant and notify the selected applicant, in writing, of the selection. All other applications shall be rejected and returned to the applicants.

(b) The selected land use applicant shall submit any additional information that the authorized officer considers necessary to process the land use authorization.

#### § 2920.6 Reimbursement of costs.

(a) When two or more applications are submitted for a land use authorization, each applicant shall be liable for the identifiable costs of processing his (or her) application. Where the costs of processing two or more applications cannot be readily identified with particular applications, all applicants shall be liable for such costs, to be divided equally among them.

(b) The selected land use applicant shall reimburse the United States for reasonable administrative and other costs incurred by the United States in processing a land use authorization application and in monitoring construction, operation, maintenance and rehabilitation of facilities authorized under this part, including preparation of reports and statements required by the National Environmental Policy Act of

1969 (43 U.S.C. 4321 *et seq.*). The reimbursement of costs shall be in accordance with the provisions of §§2804.14 and 2805.16 of this chapter, except that any permit whose total rental is less than \$250 shall be exempt from reimbursement of costs requirements.

(c) The authorized officer may, before beginning any processing of a land use authorization application, require payment, as may be needed, to cover the estimated costs of processing the application. Before granting a land use authorization, the authorized officer shall assess and collect the actual costs of processing after furnishing the applicant with a statement of costs. This payment shall be determined in accordance with the provisions of §§2804.14 and 2805.16 of this chapter.

(d) A selected applicant who withdraws, in writing, a land use application before a final decision is reached on the authorization is responsible for all costs incurred by the United States in processing the application up to the day that the authorized officer receives notice of the withdrawal and for costs subsequently incurred by the United States in terminating the proposed land use authorization process. Reimbursement of such costs shall be paid within 30 days of receipt of notice from the authorized officer of the amount due.

(e) Advance payments based on a schedule of rates developed by the authorized officer, are required for monitoring of operations and maintenance during the term of the land use authorization, which amount shall be paid simultaneously with the rental payment required by §2920.8(a) of this title.

(f) The selected applicant shall, before a land use authorization is issued, submit a payment based on a schedule of rates developed by the Director, Bureau of Land Management, for monitoring rehabilitation or restoration of the lands upon expiration of the land use authorization.

(g) If payment, as required by paragraphs (b), (d) and (e) of this section, exceeds actual costs to the United States, refund may be made by the authorized officer from applicable funds under authority of 43 U.S.C. 1734, or the authorized officer may adjust the next billing to reflect the overpayment. Nei-

ther an applicant nor a holder of land use authorization shall set off or otherwise deduct any debt due to or any sum claimed to be owed them by the United States without the prior written approval of the authorized officer.

(h) The authorized officer shall, on request, give a selected applicant an estimate, based on the best available cost information, of the costs, which may be incurred by the United States in processing the proposed land use authorization. However, reimbursement shall not be limited to the estimate of the authorized officer if actual costs exceed the projected estimate.

(i) When through partnership, joint venture or other business arrangement, more than one person, partnership, corporation, association or other entity jointly make application for a land use authorization, each such party shall be jointly and severally liable for the costs under this section.

(j) Requests for modification of or addition to the land use authorization or reconstruction or relocation of any authorized facilities shall be treated as a new application for cost recovery purposes and are subject to the cost requirements of this section.

[46 FR 5777, Jan. 19, 1981, as amended at 70 FR 21090, Apr. 22, 2005]

**§ 2920.7 Terms and conditions.**

(a) In all land use authorizations the United States reserves the right to use the public lands or to authorize the use of the public lands by the general public in any way compatible or consistent with the authorized land use and such reservations shall be included as a part of all land use authorizations. Authorized representatives of the Department of the Interior, other Federal agencies and State and local law enforcement personnel shall at all times have the right to enter the premises on official business. Holders shall not close or otherwise obstruct the use of roads or trails commonly in public use.

(b) Each land use authorization shall contain terms and conditions which shall:

- (1) Carry out the purposes of applicable law and regulations issued thereunder;
- (2) Minimize damage to scenic, cultural and aesthetic values, fish and

## Bureau of Land Management, Interior

## § 2920.7

wildlife habitat and otherwise protect the environment;

(3) Require compliance with air and water quality standards established pursuant to applicable Federal or State law; and

(4) Require compliance with State standards for public health and safety, environmental protection, siting, construction, operation and maintenance of, or for, such use if those standards are more stringent than applicable Federal standards.

(c) Land use authorizations shall also contain such other terms and conditions as the authorized officer considers necessary to:

(1) Protect Federal property and economic interests;

(2) Manage efficiently the public lands which are subject to the use or adjacent to or occupied by such use;

(3) Protect lives and property;

(4) Protect the interests of individuals living in the general area of the use who rely on the fish, wildlife and other biotic resources of the area for subsistence purposes;

(5) Require the use to be located in an area which shall cause least damage to the environment, taking into consideration feasibility and other relevant factors; and

(6) Otherwise protect the public interest.

(d) A holder shall be required to secure authorization under applicable law to pay in advance the fair market value, as determined by the authorized officer, of any mineral, vegetative materials (including timber) to be cut, removed, used or destroyed on public lands.

(e) A holder shall not use the public lands for any purposes other than those specified in the land use authorization without the approval of the authorized officer.

(f) Liability provisions:

(1) Holders of a land use authorization and all owners of any interest in, and all affiliates or subsidiaries of any holder of a land use authorization issued under these regulations shall pay the United States the full value for all injuries or damage to public lands or other property of the United States caused by the holder or by its employees, agents or servants, or by a con-

tractor, its employees, agents or servants, except holders shall be held to standards of strict liability where the Secretary of the Interior determines that the activities taking place on the area covered by the land use authorization present a foreseeable hazard or risk of danger to public lands or other property of the United States. Strict liability shall not be applied where such damages or injuries result from acts of war or negligence of the United States.

(2) Holders of a land use authorization and all owners of any interest in, and affiliates or subsidiaries of any holder of a land use authorization issued under these regulations shall pay third parties the full value of all injuries or damage to life, person or property caused by the holder, its employees, agents or servants or by a contractor, its employees, agents or servants.

(3) Holders of a land use authorization shall indemnify or hold harmless the United States against any liability for damages to life, person or property arising from the authorized occupancy or use of the public lands under the land use authorization. Where a land use authorization is issued to a State or local government or any agency or instrumentality thereof, which has no legal power to assume such liability with respect to damages caused by it to lands or property, such State or local government or agency in lieu thereof shall be required to repair all damages.

(g) The authorized officer may require a bond or other security satisfactory to him/her to insure the fulfillment of the terms and conditions of the land use authorization.

(h) Any land use authorization existing on the effective date of this regulation is not affected by this regulation and shall continue to be administered under the statutory authority under which it was issued. However, by filing a proposal for amendment or renewal, the holder of a land use authorization shall be considered to have agreed to convert the entire authorization to the current statutory authority and the regulations in effect at the time of approval of the amendment or renewal.

(i) The holder of a land use authorization who has complied with the provisions thereof, shall, upon the filing of a

## § 2920.8

request for renewal, be the preferred user for a new land use authorization provided that the public lands are not needed for another use. Renewal, if granted, shall be subject to new terms and conditions. If so specified in the terms of a permit, the permit may be automatically renewable upon payment of the annual rental unless the authorized officer notifies the permittee within 60 days of the expiration date of the permit that the permit shall not be renewed.

(j) Land use authorizations may be transferred in whole or in part but only under the following conditions:

(1) The transferee shall comply with the provisions of § 2920.2-3 of this title;

(2) The authorized officer may modify the terms and conditions of the land use authorization and the transferee shall agree, in writing, to comply with and be bound by the terms and conditions of the authorization as modified; and

(3) Transfers shall not take effect until approved by the authorized officer.

(k) If public lands included in a lease or easement are to be disposed of, the conveyance shall be made subject to the lease or easement. Permits shall be revoked prior to disposal of the public lands.

## § 2920.8 Fees.

(a) *Rental.* (1) Holders of a land use authorization shall pay annually or otherwise as determined by the authorized officer, in advance, a rental as determined by the authorized officer. The rental shall be based either upon the fair market value of the rights authorized in the land use authorization or as determined by competitive bidding. In no case shall the rental be less than fair market value.

(2) Rental fees for leases and easements may be adjusted every 5 years or earlier, as determined by the authorized officer, to reflect current fair market value.

(3) The rental fees required by this section are payable when due, and a late charge of 1 percent per month of the unpaid amount or \$15 per month, whichever is greater, shall be assessed if subsequent billings are required. Failure to pay the rental fee in a time-

## 43 CFR Ch. II (10-1-08 Edition)

ly manner is cause for termination of the land use authorization.

(b) *Processing fee.* Each request for renewal, transfer or assignment of a lease or easement shall be accompanied by a non-refundable processing fee of \$25. The authorized officer may waive or reduce this fee for requests for permit renewals which can be processed with a minimal amount of work.

## § 2920.9 Supervision of the land use authorization.

### § 2920.9-1 Construction phase.

(a) Unless otherwise stated in the land use authorization, construction may proceed immediately upon receipt and acceptance of the land use authorization by the selected applicant.

(b) Where an authorization to use public lands provides that no construction shall occur until specific permission to begin construction is granted, no construction shall occur until an appropriate Notice to Proceed has been issued by the authorized officer, following the submission and approval of required plans or documents.

(c) The authorized officer shall inspect and monitor construction as necessary, to assure compliance with approved plans and protection of the resources, the environment and the public health, safety and welfare.

(d) The holder of a land use authorization may be required to designate a field representative who can accept and act on guidance and instructions from the authorized officer.

(e) The holder of a land use authorization may be required to provide proof of construction to the approved plan and required standards. Thereafter, operation of the authorized facilities may begin.

### § 2920.9-2 Operation and maintenance.

The authorized officer shall inspect and monitor the operation and maintenance of the land use authorization area, its facilities and improvements to assure compliance with the plan of management and protection of the resources, the environment and the public health, safety and welfare, and the holder of the land use authorization shall take corrective action as required by the authorized officer.

**§ 2920.9-3 Termination and suspension.**

(a) Land use authorizations may be terminated under the following circumstances:

(1) If a land use authorization provides by its terms that it shall terminate on the occurrence of a fixed or agreed-upon event, the land use authorization shall thereupon automatically terminate by operation of law upon the occurrence of such event.

(2) Noncompliance with applicable law, regulations or terms and conditions of the land use authorization.

(3) Failure of the holder to use the land use authorization for the purpose for which it was authorized. Failure to construct or nonuse for any continuous 2-year period shall constitute a presumption of abandonment and termination.

(4) Mutual agreement that the land use authorization should be terminated.

(5) Nonpayment of rent for 2 consecutive months, following notice of payment due.

(6) So that the public lands covered by the permit can be disposed of or used for any other purpose.

(b)(1) Upon determination that there is noncompliance with the terms and conditions of a land use authorization which adversely affects the public health, safety or welfare or the environment, the authorized officer shall issue an immediate temporary suspension.

(2) The authorized officer may give an immediate temporary suspension order orally or in writing at the site of the activity to the holder or a contractor or subcontractor of the holder, or to any representative, agent, employee or contractor of any of them, and the suspended activity shall cease at that time. As soon as practicable, the authorized officer shall confirm the order by a written notice to the holder addressed to the holder or the holder's designated agent. The authorized officer may also take such action considered necessary to require correction of such defects prior to an administrative proceeding.

(3) The authorized officer may order immediate temporary suspension of an activity regardless of any action that

has been or is being taken by another Federal agency or a State agency.

(4) An order of temporary suspension of activities shall remain effective until the authorized officer issues an order permitting resumption of activities.

(5) Any time after an order of suspension has been issued, the holder may file with the authorized officer a request for permission to resume. The request shall be in writing and shall contain a statement of the facts supporting the request.

(6) The authorized officer may render an order to either grant or deny the request to resume within 5 working days of the date the request is filed. If the authorized officer does not render an order on the request within 5 working days, the request shall be considered denied, the holder shall have the same right to appeal the denial as if an order denying the request had been issued.

(c) Process for termination or suspension other than temporary immediate suspension.

(1) Prior to commencing any proceeding to suspend or terminate a land use authorization, the authorized officer shall give written notice to the holder of the legal grounds for such action and shall give the holder a reasonable time to correct any noncompliance.

(2) After due notice of termination or suspension to the holder of a land use authorization, if noncompliance still exists after a reasonable time, the authorized officer shall give written notice to the holder and refer the matter to the Office of Hearings and Appeals for a hearing before an Administrative Law Judge pursuant to 43 CFR 4.420-4.439. The authorized officer shall suspend or revoke the land use authorization if the Administrative Law Judge determines that grounds for suspension or revocation exists and that such action is justified.

(3) The authorized officer shall terminate a suspension order when the authorized officer determines that the violation causing such suspension has been rectified.

(d) Upon termination, revocation or cancellation of a land use authorization, the holder shall remove all structures and improvements except those

owned by the United States within 60 days of the notice of termination, revocation or cancellation and shall restore the site to its pre-use condition, unless otherwise agreed upon in writing or in the land use authorization. If the holder fails to remove all such structures or improvements within a reasonable period, they shall become the property of the United States, but that shall not relieve the holder of liability for the cost of their removal and restoration of the site.

### **Subpart 2931—Permits for Recreation; General**

#### **§ 2931.1 What are the purposes of these regulations?**

The regulations in this part—

## Bureau of Land Management, Interior

## § 2932.5

(a) State when you need a permit to use public lands and waters for recreation, including recreation-related business;

(b) Tell you how to obtain the permit;

(c) State the fees you must pay to obtain the permit; and

(d) Establish the framework for BLM's administration of your permit.

### § 2931.2 What kinds of permits does BLM issue for recreation-related uses of public lands?

The regulations in this part establish permit and fee systems for:

(a) Special Recreation Permits for commercial use, organized group activities or events, competitive use, and for use of special areas; and

(b) Recreation use permits for use of fee areas such as campgrounds and day use areas.

### § 2931.3 What are the authorities for these regulations?

The statutory authorities underlying the regulations in this part are the Federal Land Policy and Management Act, 43 U.S.C. 1701 *et seq.*, and the Federal Land Recreation Enhancement Act, 16 U.S.C. 6801 *et seq.*

(a) The Federal Land Policy and Management Act (FLPMA) contains the Bureau of Land Management's (BLM's) general land use management authority over the public lands, and establishes outdoor recreation as one of the principal uses of those lands (43 U.S.C. 1701(a)(8)). Section 302(b) of FLPMA directs the Secretary of the Interior to regulate through permits or other instruments the use of the public lands, which includes commercial recreation use. Section 303 of FLPMA authorizes the BLM to promulgate and enforce regulations, and establishes the penalties for violations of the regulations.

(b) The Federal Land Recreation Enhancement Act (REA) authorizes the BLM to collect fees for recreational use in areas meeting certain criteria (16 U.S.C. 6802(f) and (g)(2)), and to issue special recreation permits for group activities and recreation events (16 U.S.C. 6802(h)).

(c) 18 U.S.C. 3571 and 3581 *et seq.* establish sentences of fines and imprisonment for violation of regulations.

[72 FR 7836, Feb. 21, 2007]

### § 2931.8 Appeals.

(a) If you are adversely affected by a decision under this part, you may appeal the decision under parts 4 and 1840 of this title.

(b) All decisions BLM makes under this part will go into effect immediately and will remain in effect while appeals are pending unless a stay is granted under § 4.21(b) of this title.

### § 2931.9 Information collection.

The information collection requirements in this part have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0119. BLM will use the information to determine whether we should grant permits to applicants for Special Recreation Permits on public lands. You must respond to requests for information to obtain a benefit.

## Subpart 2932—Special Recreation Permits for Commercial Use, Competitive Events, Organized Groups, and Recreation Use in Special Areas

### § 2932.5 Definitions.

*Actual expenses* means money spent directly on the permitted activity. These may include costs of such items as food, rentals of group equipment, transportation, and permit or use fees. Actual expenses do not include the rental or purchase of personal equipment, amortization of equipment, salaries or other payments to participants, bonding costs, or profit.

*Commercial use* means recreational use of the public lands and related waters for business or financial gain.

(1) The activity, service, or use is commercial if—

(i) Any person, group, or organization makes or attempts to make a profit, receive money, amortize equipment, or obtain goods or services, as compensation from participants in recreational activities occurring on public lands

## § 2932.10

led, sponsored, or organized by that person, group, or organization;

(ii) Anyone collects a fee or receives other compensation that is not strictly a sharing of actual expenses, or exceeds actual expenses, incurred for the purposes of the activity, service, or use;

(iii) There is paid public advertising to seek participants; or

(iv) Participants pay for a duty of care or an expectation of safety.

(2) Profit-making organizations and organizations seeking to make a profit are automatically classified as commercial, even if that part of their activity covered by the permit is not profit-making or the business as a whole is not profitable.

(3) Use of the public lands by scientific, educational, and therapeutic institutions or non-profit organizations is commercial and subject to a permit requirement when it meets any of the threshold criteria in paragraphs (1) and (2) of this definition. The non-profit status of any group or organization does not alone determine that an event or activity arranged by such a group or organization is noncommercial.

### *Competitive use means—*

(1) Any organized, sanctioned, or structured use, event, or activity on public land in which 2 or more contestants compete and either or both of the following elements apply:

(i) Participants register, enter, or complete an application for the event;

(ii) A predetermined course or area is designated; or

(2) One or more individuals contesting an established record such as for speed or endurance.

*Organized group activity* means a structured, ordered, consolidated, or scheduled event on, or occupation of, public lands for the purpose of recreational use that is not commercial or competitive.

### *Special area means:*

(1) An area officially designated by statute, or by Presidential or Secretarial order;

(2) An area for which BLM determines that the resources require special management and control measures for their protection; or

(3) An area covered by joint agreement between BLM and a State under

## 43 CFR Ch. II (10–1–08 Edition)

Title II of the Sikes Act (16 U.S.C. 670a *et seq.*)

*Vending* means the sale of goods or services, not from a permanent structure, associated with recreation on the public lands or related waters, such as food, beverages, clothing, firewood, souvenirs, photographs or film (video or still), or equipment repairs.

### **§ 2932.10 When you need Special Recreation Permits.**

### **§ 2932.11 When do I need a Special Recreation Permit?**

(a) Except as provided in § 2932.12, you must obtain a Special Recreation Permit for:

(1) Commercial use, including vending associated with recreational use; or

(2) Competitive use.

(b) If BLM determines that it is necessary, based on planning decisions, resource concerns, potential user conflicts, or public health and safety, we may require you to obtain a Special Recreation Permit for—

(1) Recreational use of special areas;

(2) Noncommercial, noncompetitive, organized group activities or events; or

(3) Academic, educational, scientific, or research uses that involve:

(i) Means of access or activities normally associated with recreation;

(ii) Use of areas where recreation use is allocated; or

(iii) Use of special areas.

### **§ 2932.12 When may BLM waive the requirement to obtain a permit?**

We may waive the requirement to obtain a permit if:

(a) The use or event begins and ends on non-public lands or related waters, traverses less than 1 mile of public lands or 1 shoreline mile, and poses no threat of appreciable damage to public land or water resource values;

(b) BLM sponsors or co-sponsors the use. This includes any activity or event that BLM is involved in organizing and hosting, or sharing responsibility for, arranged through authorizing letters or written agreements; or

(c) The use is a competitive event that—

(1) Is not commercial;

(2) Does not award cash prizes;

(3) Is not publicly advertised;

## Bureau of Land Management, Interior

## § 2932.24

(4) Poses no appreciable risk for damage to public land or related water resource values; and

(5) Requires no specific management or monitoring.

(d) The use is an organized group activity or event that—

(1) Is not commercial;

(2) Is not publicly advertised;

(3) Poses no appreciable risk for damage to public land or related water resource values; and

(4) Requires no specific management or monitoring.

### **§ 2932.13 How will I know if individual use of a special area requires a Special Recreation Permit?**

BLM will publish notification of the requirement to obtain a Special Recreation Permit to enter a special area in the FEDERAL REGISTER and local and regional news media. We will post permit requirements at major access points for the special area and provide information at the local BLM office.

### **§ 2932.14 Do I need a Special Recreation Permit to hunt, trap, or fish?**

(a) If you hold a valid State license, you do not need a Special Recreation Permit to hunt, trap, or fish. You must comply with State license requirements for these activities. BLM Special Recreation Permits do not alone authorize you to hunt, trap, or fish. However, you must have a Special Recreation Permit if BLM requires one for recreational use of a special area where you wish to hunt, trap, or fish.

(b) Outfitters and guides providing services to hunters, trappers, or anglers must obtain Special Recreation Permits from BLM. Competitive event operators and organized groups may also need a Special Recreation Permit for these activities.

### **§ 2932.20 Special Recreation Permit applications.**

### **§ 2932.21 Why should I contact BLM before submitting an application?**

If you wish to apply for a Special Recreation Permit, we strongly urge you to contact the appropriate BLM office before submitting your application. You may need early consultation to become familiar with BLM practices and responsibilities, and the terms and

conditions that we may require in a Special Recreation Permit. Because of the lead time involved in processing Special Recreation Permit applications, you should contact BLM in sufficient time to complete a permit application ahead of the 180 day requirement (see § 2932.22(a)).

### **§ 2932.22 When do I apply for a Special Recreation Permit?**

(a) For all uses requiring a Special Recreation Permit, except private, noncommercial use of special areas (see paragraph (b) of this section), you must apply to the local BLM office at least 180 days before you intend your use to begin. Through publication in the local media and on-site posting as necessary, a BLM office may require applications for specific types of use more than 180 days before your intended use. A BLM office may also authorize shorter application times for activities or events that do not require extensive environmental documentation or consultation.

(b) BLM field offices will establish Special Recreation Permit application procedures for private noncommercial individual use of special areas, including when to apply. As you begin to plan your use, you should call the field office with jurisdiction.

### **§ 2932.23 Where do I apply for a Special Recreation Permit?**

You must apply to the local BLM office with jurisdiction over the land you wish to use.

### **§ 2932.24 What information must I submit with my application?**

(a) Your application for a Special Recreation Permit for all uses, except individual and noncommercial group use of special areas, must include:

(1) A completed BLM Special Recreation Application and Permit form;

(2) Unless waived by BLM, a map or maps of sufficient scale and detail to allow identification of the proposed use area; and

(3) Other information that BLM requests, in sufficient detail to allow us to evaluate the nature and impact of the proposed activity, including measures you will use to mitigate adverse impacts.

## § 2932.25

(b) If you are an individual or non-commercial group wishing to use a special area, contact the local office with jurisdiction to find out the requirements, if any.

### § 2932.25 What will BLM do when I apply for a Special Recreation Permit?

BLM will inform you within 30 days after the filing date of your application if we must delay a decision on issuing the permit. An example of when this could happen is if we determine that we cannot complete required environmental assessments or consultations with other agencies within 180 days.

### § 2932.26 How will BLM decide whether to issue a Special Recreation Permit?

BLM has discretion over whether to issue a Special Recreation Permit. We will base our decision on the following factors to the extent that they are relevant:

- (a) Conformance with laws and land use plans;
- (b) Public safety,
- (c) Conflicts with other uses,
- (d) Resource protection,
- (e) The public interest served,
- (f) Whether in the past you complied with the terms of your permit or other authorization from BLM and other agencies, and
- (g) Such other information that BLM finds appropriate.

### § 2932.30 Fees for Special Recreation Permits.

### § 2932.31 How does BLM establish fees for Special Recreation Permits?

(a) The BLM Director establishes fees, including minimum annual fees, for Special Recreation Permits for commercial activities, organized group activities or events, and competitive events.

(b) The BLM Director may adjust the fees as necessary to reflect changes in costs and the market, using the following types of data:

- (1) The direct and indirect cost to the government;
- (2) The types of services or facilities provided; and
- (3) The comparable recreation fees charged by other Federal agencies,

## 43 CFR Ch. II (10–1–08 Edition)

non-Federal public agencies, and the private sector located within the service area.

(c) The BLM Director will publish fees and adjusted fees in the FEDERAL REGISTER.

(d) The State Director with jurisdiction—

(1) Will set fees for other Special Recreation Permits (including any use of Special Areas, such as per capita special area fees applicable to all users, including private noncommercial visitors, commercial clients, and spectators),

(2) May adjust the fees when he or she finds it necessary,

(3) Will provide fee information in field offices, and

(4) Will provide newspaper or other appropriate public notice.

(e)(1) *Commercial use.* In addition to the fees set by the Director, BLM, if BLM needs more than 50 hours of staff time to process a Special Recreation Permit for commercial use in any one year, we may charge a fee for recovery of the processing costs.

(2) *Competitive or organized group/event use.* BLM may charge a fee for recovery of costs to the agency of analyses and permit processing instead of the Special Recreation Permit fee, if—

(i) BLM needs more than 50 hours of staff time to process a Special Recreation Permit for competitive or organized group/event use in any one year, and

(ii) We anticipate that permit fees on the fee schedule for that year will be less than the costs of processing the permit.

(3) *Limitations on cost recovery.* Cost recovery charges will be limited to BLM's costs of issuing the permit, including necessary environmental documentation, on-site monitoring, and permit enforcement. Programmatic or general land use plan NEPA documentation are not subject to cost recovery charges, except if the documentation work done was done for or provides special benefits or services to an identifiable individual applicant.

(f) We will notify you in writing if you need to pay actual costs before processing your application.

## Bureau of Land Management, Interior

## § 2932.51

### § 2932.32 When must I pay the fees?

You must pay the required fees before BLM will authorize your use and by the deadline or deadlines that BLM will establish in each case. We may allow you to make periodic payments for commercial use. We will not process or continue processing your application until you have paid the required fees or installments.

### § 2932.33 When are fees refundable?

(a) *Overpayments.* For multi-year commercial permits, if your actual fees due are less than the estimated fees you paid in advance, BLM will credit overpayments to the following year or season. For other permits, BLM will give you the option whether to receive refunds or credit overpayments to future permits, less processing costs.

(b) *Underuse.* (1) Except as provided in paragraph (b)(2) of this section, for areas where BLM's planning process allocates use to commercial outfitters, or non-commercial users, or a combination, we will not make refunds for use of the areas we allocate to you in your permit if your actual use is less than your intended use.

(2) We may consider a refund if we have sufficient time to authorize use by others.

(c) *Non-refundable fees.* Application fees and minimum annual commercial use fees (those on BLM's published fee schedule) are not refundable.

### § 2932.34 When may BLM waive Special Recreation Permit fees?

BLM may waive Special Recreation Permit fees on a case-by-case basis for accredited academic, scientific, and research institutions, therapeutic, or administrative uses.

### § 2932.40 Permit stipulations and terms.

### § 2932.41 What stipulations must I follow?

You must follow all stipulations in your approved Special Recreation Permit. BLM may impose stipulations and conditions to meet management goals and objectives and to protect lands and resources and the public interest.

### § 2932.42 How long is my Special Recreation Permit valid?

You may request a permit for a day, season of use, or other time period, up to a maximum of 10 years. BLM will determine the appropriate term on a case-by-case basis.

[69 FR 5706, Feb. 6, 2004]

### § 2932.43 What insurance requirements pertain to Special Recreation Permits?

(a) All commercial and competitive applicants for Special Recreation Permits, except vendors, must obtain a property damage, personal injury, and public liability insurance policy that BLM judges sufficient to protect the public and the United States. Your policy must name the U.S. Government as additionally insured or co-insured and stipulate that you or your insurer will notify BLM 30 days in advance of termination or modification of the policy.

(b) We may also require vendors and other applicants, such as organized groups, to obtain and submit such a policy. BLM may waive the insurance requirement if we find that the vending or group activity will not cause appreciable environmental degradation or risk to human health or safety.

### § 2932.44 What bonds does BLM require for a Special Recreation Permit?

BLM may require you to submit a payment bond, a cash or surety deposit, or other financial guarantee in an amount sufficient to cover your fees or defray the costs of restoration and rehabilitation of the lands affected by the permitted use. We will return the bonds and financial guarantees when you have complied with all permit stipulations. BLM may waive the bonding requirement if we find that your activity will not cause appreciable environmental degradation or risk to human health and safety.

### § 2932.50 Administration of Special Recreation Permits.

### § 2932.51 When can I renew my Special Recreation Permit?

We will renew your Special Recreation Permit upon application at the end of its term only if—

## § 2932.52

- (a) It is in good standing;
- (b) Consistent with BLM management plans and policies; and
- (c) You and all of your affiliates have a satisfactory record of performance.

### § 2932.52 How do I apply for a renewal?

(a) You must apply for renewal on the same form as for a new permit. You must include information that has changed since your application or your most recent renewal. If information about your operation or activities has not changed, you may merely state that and refer to your most recent application or renewal.

(b) BLM will establish deadlines in your permit for submitting renewal applications.

### § 2932.53 What will be my renewal term?

Renewals will generally be for the same term as the previous permit.

### § 2932.54 When may I transfer my Special Recreation Permit to other individuals, companies, or entities?

(a) BLM may transfer a commercial Special Recreation Permit only in the case of an actual sale of a business or a substantial part of the business. Only BLM can approve the transfer or assignment of permit privileges to another person or entity, also basing our decision on the criteria in § 2932.26.

(b) The approved transferee must complete the standard permit application process as provided in § 2932.20 through 2932.24. Once BLM approves your transfer of permit privileges and your transferee meets all BLM requirements, including payment of fees, BLM will issue a Special Recreation Permit to the transferee.

### § 2932.55 When must I allow BLM to examine my permit records?

(a) You must make your permit records available upon BLM request. BLM will not ask to inspect any of this material later than 3 years after your permit expires.

(b) BLM may examine any books, documents, papers, or records pertaining to your Special Recreation Permit or transactions relating to it, whether in your possession, or that of

## 43 CFR Ch. II (10–1–08 Edition)

your employees, business affiliates, or agents.

### § 2932.56 When will BLM amend, suspend, or cancel my permit?

(a) BLM may amend, suspend, or cancel your Special Recreation Permit if necessary to protect public health, public safety, or the environment.

(b) BLM may suspend or cancel your Special Recreation Permit if you—

(1) Violate permit stipulations, or

(2) Are convicted of violating any Federal or State law or regulation concerning the conservation or protection of natural resources, the environment, endangered species, or antiquities.

(c) If we suspend your permit or a portion thereof, all of your responsibilities under the permit will continue during the suspension.

### § 2932.57 Prohibited acts and penalties.

(a) *Prohibited acts.* You must not—

(1) Fail to obtain a Special Recreation Permit and pay the fees required by this subpart;

(2) Violate the stipulations or conditions of a permit issued under this subpart;

(3) Knowingly participate in an event or activity subject to the permit requirements of this subpart if BLM has not issued a permit;

(4) Fail to post a copy of any commercial or competitive permit where all participants may read it;

(5) Fail to show a copy of your Special Recreation Permit upon request by either a BLM employee or a participant in your activity.

(6) Obstruct or impede pedestrians or vehicles, or harass visitors or other persons with physical contact while engaged in activities covered under a permit or other authorization; or

(7) Refuse to leave or disperse, when directed to do so by a BLM law enforcement officer or State or local law enforcement officer, whether you have a required Special Recreation Permit or not.

(b) *Penalties.* (1) If you are convicted of any act prohibited by paragraphs (a)(2) through (a)(7) of this section, or of failing to obtain a Special Recreation Permit under paragraph (a)(1) of this section, you may be subject to a

sentence of a fine or imprisonment or both for a Class A misdemeanor in accordance with 18 U.S.C. 3571 and 3581 *et seq.* under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)).

(2) If you are convicted of failing to pay a fee required by paragraph (a)(1) of this section, you may be subject to a sentence of a fine not to exceed \$100 for the first offense, or a sentence of a fine and or imprisonment for a Class A or B misdemeanor in accordance with 18 U.S.C. 3571 and 3581 *et seq.* for all subsequent offenses.

(3) You may also be subject to civil action for unauthorized use of the public lands or related waters and their resources, for violations of permit terms, conditions, or stipulations, or for uses beyond those allowed by permit.

[67 FR 61740, Oct. 1, 2002, as amended at 72 FR 7836, Feb. 21, 2007]

### **Subpart 2933—Recreation Use Permits for Fee Areas**

#### **§ 2933.10 Obtaining Recreation Use Permits.**

#### **§ 2933.11 When must I obtain a Recreation Use Permit?**

You must obtain a Recreation Use Permit for individual or group use of fee areas. These are sites where we provide or administer specialized facilities, equipment, or services related to outdoor recreation. You may visit these areas for the uses and time periods BLM specifies. We will post these uses and limits at the entrance to the area or site, and provide this information in the local BLM office with jurisdiction over the area or site. You may contact this office for permit information when planning your visit.

#### **§ 2933.12 Where can I obtain a Recreation Use Permit?**

You may obtain a permit at self-service pay stations, from personnel at the site, or at other specified locations. Because these locations may vary from site to site, you should contact the local BLM office with jurisdiction over the area or site in advance for permit information.

#### **§ 2933.13 When do I need a reservation to use a fee site?**

Most sites are available on a first come/first serve basis. However, you may need a reservation to use some sites. You should contact the local BLM office with jurisdiction over the site or area to learn whether a reservation is required.

#### **§ 2933.14 For what time may BLM issue a Recreation Use Permit?**

You may obtain a permit for a day, season of use, year, or any other time period that we deem appropriate for the particular use. We will post this information on site, or make it available at the local BLM office with jurisdiction over the area or site, or both.

#### **§ 2933.20 Fees for Recreation Use Permits.**

#### **§ 2933.21 When are fees charged for Recreation Use Permits?**

You must pay a fee for individual or group recreational use if the area is posted to that effect. You may also find fee information at BLM field offices or BLM Internet websites.

#### **§ 2933.22 How does BLM establish Recreation Use Permit fees?**

BLM sets recreation use fees and adjusts them from time to time to reflect changes in costs and the market, using the following types of data:

- (a) The direct and indirect cost to the government;
- (b) The types of services or facilities provided; and
- (c) The comparable recreation fees charged by other Federal agencies, non-Federal public agencies, and the private sector located within the service area.

#### **§ 2933.23 When must I pay the fees?**

You must pay the required fees upon occupying a designated recreation use facility, when you receive services, or as the BLM's reservation system may require. These practices vary from site to site. You may contact the local BLM office with jurisdiction over the area or site for fee information.

**§ 2933.24**

**43 CFR Ch. II (10–1–08 Edition)**

**§ 2933.24 When can I get a refund of Recreation Use Permit fees?**

If we close the fee site for administrative or emergency reasons, we will refund the unused portion of your permit fee upon request.

**§ 2933.30 Rules of conduct.**

**§ 2933.31 What rules must I follow at fee areas?**

You must comply with all rules that BLM posts in the area. Any such site-specific rules supplement the general rules of conduct contained in subpart 8365 of this chapter relating to public safety, resource protection, and visitor comfort.

**§ 2933.32 When will BLM suspend or revoke my permit?**

(a) We may suspend your permit to protect public health, public safety, the environment, or you.

(b) We may revoke your permit if you commit any of the acts prohibited in subpart 8365 of this chapter, or violate any of the stipulations attached to your permit, or any site-specific rules posted in the area.

**§ 2933.33 Prohibited acts and penalties.**

(a) *Prohibited acts.* You must not—

(1) Fail to obtain a use permit or pay any fees required by this subpart;

(2) Violate the stipulations or conditions of a permit issued under this subpart;

(3) Fail to pay any fees within the time specified;

(4) Fail to display any required proof of payment of fees;

(5) Willfully and knowingly possess, use, publish as true, or sell to another, any forged, counterfeited, or altered document or instrument used as proof of or exemption from fee payment;

(6) Willfully and knowingly use any document or instrument used as proof of or exemption from fee payment, that the BLM issued to or intended another to use; or

(7) Falsely represent yourself to be a person to whom the BLM has issued a document or instrument used as proof of or exemption from fee payment.

(b) *Evidence of nonpayment.* The BLM will consider failure to display proof of payment on your unattended vehicle parked within a fee area, where payment is required to be prima facie evidence of nonpayment.

(c) *Responsibility for penalties.* If another driver incurs a penalty under this subpart when using a vehicle registered in your name, you and the driver are jointly responsible for the penalty, unless you show that the vehicle was used without your permission.

(d) *Types of penalties.* You may be subject to the following fines or penalties for violating the provisions of this subpart:

**LIF YOU ARE CONVICTED OF . . .**

If you are convicted of . . .	then you may be subject to . . .	under . . .
(1) Failing to obtain a permit under paragraph (a)(1) of this section, or any act prohibited by paragraph (a)(4), (5), or (6) of this section.	A sentence of a fine and/or imprisonment for a Class A misdemeanor in accordance with 18 U.S.C. 3571 and 3581 <i>et seq.</i>	The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)).
(2) Violating any regulation in this subpart or any condition of a Recreation Use Permit.	A sentence of a fine and/or imprisonment for a Class A misdemeanor in accordance with 18 U.S.C. 3571 and 3581 <i>et seq.</i>	The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)).
(3) Failing to pay a Recreation Use Permit fee required by paragraph (a)(1) of this section, or any act prohibited by paragraph (a)(3) of this section.	A fine not to exceed \$100 for the first offense, or a sentence of a fine and/or imprisonment for a Class A or B misdemeanor in accordance with 18 U.S.C. 3571 and 3581 <i>et seq.</i> for all subsequent offenses.	The Federal Lands Recreation Enhancement Act (16 U.S.C. 6811).

[69 FR 5706, Feb. 6, 2004, as amended at 72 FR 7836, Feb. 21, 2007]

SOURCE: 48 FR 33659, July 22, 1983, unless otherwise noted.

#### Subpart 3000—General

##### § 3000.0-5 Definitions.

As used in Groups 3000 and 3100 of this title, the term:

(a) *Gas* means any fluid, either combustible or noncombustible, which is produced in a natural state from the earth and which maintains a gaseous or rarefied state at ordinary temperatures and pressure conditions.

(b) *Oil* means all nongaseous hydrocarbon substances other than those substances leasable as coal, oil shale or gilsonite (including all vein-type solid hydrocarbons).

(c) *Secretary* means the Secretary of the Interior.

(d) *Director* means the Director of the Bureau of Land Management.

(e) *Authorized officer* means any employee of the Bureau of Land Management authorized to perform the duties described in Group 3000 and 3100.

(f) *Proper BLM office* means the Bureau of Land Management office hav-

ing jurisdiction over the lands subject to the regulations in Groups 3000 and 3100, except that all oil and gas lease offers, and assignments or transfers for lands in Alaska shall be filed in the Alaska State Office, Anchorage, Alaska.

(See § 1821-2-1 of this title for office location and area of jurisdiction of Bureau of Land Management offices.)

(g) *Public domain lands* means lands, including mineral estates, which never left the ownership of the United States, lands which were obtained by the United States in exchange for public domain lands, lands which have reverted to the ownership of the United States through the operation of the public land laws and other lands specifically identified by the Congress as part of the public domain.

(h) *Acquired lands* means lands which the United States obtained by deed through purchase or gift, or through condemnation proceedings, including lands previously disposed of under the public land laws including the mining laws.

(i) *Anniversary date* means the same day and month in succeeding years as that on which the lease became effective.

(j) *Act* means the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 *et seq.*).

(k) *Party in interest* means a party who is or will be vested with any interest under the lease as defined in paragraph (l) of this section. No one is a sole party in interest with respect to an application, offer, competitive bid or lease in which any other party has an interest;

(l) *Interest* means ownership in a lease or prospective lease of all or a portion of the record title, working interest, operating rights, overriding royalty, payments out of production, carried interests, net profit share or similar instrument for participation in the benefit derived from a lease. An *interest* may be created by direct or indirect ownership, including options. *Interest*

## § 3000.1

does not mean stock ownership, stockholding or stock control in an application, offer, competitive bid or lease, except for purposes of acreage limitations in §3101.2 of this title and qualifications of lessees in subpart 3102 of this title.

(m) *Surface managing agency* means any Federal agency outside of the Department of the Interior with jurisdiction over the surface overlying federally-owned minerals.

(n) *Service* means the Minerals Management Service.

(o) *Bureau* means the Bureau of Land Management.

[48 FR 33659, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984; 53 FR 17351, May 16, 1988; 53 FR 22835, June 17, 1988]

### § 3000.1 Nondiscrimination.

Any person acquiring a lease under this chapter shall comply fully with the equal opportunity provisions of Executive Order 11246 of September 24, 1965, as amended, and the rules, regulations and relevant orders of the Secretary of Labor (41 CFR part 60 and 43 CFR part 17).

### § 3000.2 False statements.

Under the provisions of 18 U.S.C. 1001, it is a crime punishable by 5 years imprisonment or a fine of up to \$10,000, or both, for any person knowingly and willfully to submit or cause to be submitted to any agency of the United States any false or fraudulent statement(s) as to any matter within the agency's jurisdiction.

### § 3000.3 Unlawful interests.

No member of, or delegate to, Congress, or Resident Commissioner, and no employee of the Department of the Interior, except as provided in 43 CFR part 20, shall be entitled to acquire or hold any Federal lease, or interest therein. (Officer, agent or employee of the Department—see 43 CFR part 20; Member of Congress—see R.S. 3741; 41 U.S.C. 22; 18 U.S.C. 431-433.)

### § 3000.4 Appeals.

Except as provided in §§3101.7-3(b), 3120.1-3, 3165.4, and 3427.2 of this title, any party adversely affected by a decision of the authorized officer made pursuant to the provisions of Group 3000 or

## 43 CFR Ch. II (10-1-08 Edition)

Group 3100 of this title shall have a right of appeal pursuant to part 4 of this title.

[53 FR 22835, June 17, 1988]

### § 3000.5 Limitations on time to institute suit to contest a decision of the Secretary.

No action contesting a decision of the Secretary involving any oil or gas lease, offer or application shall be maintained unless such action is commenced or taken within 90 days after the final decision of the Secretary relating to such matter.

### § 3000.6 Filing of documents.

All necessary documents shall be filed in the proper BLM office. A document shall be considered filed when it is received in the proper BLM office during regular business hours (see §1821.2 of this title).

### § 3000.7 Multiple development.

The granting of a permit or lease for the prospecting, development or production of deposits of any one mineral shall not preclude the issuance of other permits or leases for the same lands for deposits of other minerals with suitable stipulations for simultaneous operation, nor the allowance of applicable entries, locations or selections of leased lands with a reservation of the mineral deposits to the United States.

### § 3000.8 Management of Federal minerals from reserved mineral estates.

Where nonmineral public land disposal statutes provide that in conveyances of title all or certain minerals shall be reserved to the United States together with the right to prospect for, mine and remove the minerals under applicable law and regulations as the Secretary may prescribe, the lease or sale, and administration and management of the use of such minerals shall be accomplished under the regulations of Groups 3000 and 3100 of this title. Such mineral estates include, but are not limited to, those that have been or will be reserved under the authorities of the Small Tract Act of June 1, 1938, as amended (43 U.S.C. 682(b)) and the

## Bureau of Land Management, Interior

## § 3000.11

Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*).

[53 FR 17351, May 16, 1988]

### § 3000.9 Enforcement.

Provisions of section 41 of the Act shall be enforced by the United States Department of Justice.

[53 FR 22835, June 17, 1988]

### § 3000.10 What do I need to know about fees in general?

(a) *Setting fees.* Fees may be statutorily set fees, relatively nominal filing fees, or processing fees intended to reimburse BLM for its reasonable processing costs. For processing fees, BLM takes into account the factors in Section 304 (b) of the Federal Land Policy and Management Act of 1976 (FLPMA) (43 U.S.C. 1734(b)) before deciding a fee. BLM considers the factors for each type of document when the processing fee is a fixed fee and for each individual document when the fee is decided on a case-by-case basis, as explained in § 3000.11.

(b) *Conditions for filing.* BLM will not accept a document that you submit without the proper filing or processing fee amounts except for documents where BLM sets the fee on a case-by-case basis. Fees are not refundable except as provided for case-by-case fees in § 3000.11. BLM will keep your fixed filing or processing fee as a service charge even if we do not approve your application or you withdraw it completely or partially.

(c) *Periodic adjustment.* We will periodically adjust fees established in this subchapter according to change in the Implicit Price Deflator for Gross Domestic Product, which is published quarterly by the U.S. Department of Commerce. Because the fee recalculations are simply based on a mathematical formula, we will change the fees in final rules without opportunity for notice and comment.

(d) *Timing of fee applicability.* (1) For a document BLM receives before November 7, 2005, we will not charge a fixed fee or a case-by-case fee under this subchapter for processing that document, except for fees applicable under then-existing regulations.

(2) For a document BLM receives on or after November 7, 2005, you must include required fixed fees with documents you file, as provided in § 3000.12(a) of this chapter, and you are subject to case-by-case processing fees as provided in § 3000.11 of this chapter and under other provisions of this chapter.

[70 FR 58872, Oct. 7, 2005, as amended at 72 FR 50886, Sept. 5, 2007]

### § 3000.11 When and how does BLM charge me processing fees on a case-by-case basis?

(a) Fees in this subchapter are designated either as case-by-case fees or as fixed fees. The fixed fees are established in this subchapter for specified types of documents. However, if BLM decides at any time that a particular document designated for a fixed fee will have a unique processing cost, such as the preparation of an Environmental Impact Statement, we may set the fee under the case-by-case procedures in this section.

(b) For case-by-case fees, BLM measures the ongoing processing cost for each individual document and considers the factors in Section 304(b) of FLPMA on a case-by-case basis according to the following procedures:

(1) You may ask BLM's approval to do all or part of any study or other activity according to standards BLM specifies, thereby reducing BLM's costs for processing your document.

(2) Before performing any case processing, we will give you a written estimate of the proposed fee for reasonable processing costs after we consider the FLPMA Section 304(b) factors.

(3) You may comment on the proposed fee.

(4) We will then give you the final estimate of the processing fee amount after considering your comments and any BLM-approved work you will do.

(i) If we encounter higher or lower processing costs than anticipated, we will re-estimate our reasonable processing costs following the procedure in paragraphs (b)(1), (b)(2), (b)(3) and (b)(4) of this section, but we will not stop ongoing processing unless you do not pay in accordance with paragraph (b)(5) of this section.

## § 3000.12

(ii) If the fee you would pay under this paragraph (b)(4) is less than BLM's actual costs as a result of consideration of the FLPMA Section 304(b) factors, and we are not able to process your document promptly because of the unavailability of funding or other resources, you will have the option to pay BLM's actual costs to process your document. This will enable BLM to process your document sooner.

(iii) Once processing is complete, we will refund to you any money that we did not spend on processing costs.

(5)(i) We will periodically estimate what our reasonable processing costs will be for a specific period and will bill you for that period. Payment is due to BLM 30 days after you receive your bill. BLM will stop processing your document if you do not pay the bill by the date payment is due.

(ii) If a periodic payment turns out to be more or less than BLM's reasonable processing costs for the period, we will adjust the next billing accordingly or make a refund. Do not deduct any amount from a payment without our prior written approval.

(6) You must pay the entire fee before we will issue the final document.

(7) You may appeal BLM's estimated processing costs in accordance with the regulations in part 4, subpart E, of this title. You may also appeal any determination BLM makes under paragraph (a) of this section that a document designated for a fixed fee will be processed as a case-by-case fee. We will not process the document further until the appeal is resolved, in accordance with paragraph (b)(5)(i) of this section, unless you pay the fee under protest while the appeal is pending. If the appeal results in a decision changing the proposed fee, we will adjust the fee in accordance with paragraph (b)(5)(ii) of this section.

[70 FR 58872, Oct. 7, 2005]

### § 3000.12 What is the fee schedule for fixed fees?

(a) The table in this section shows the fixed fees that you must pay to BLM for the services listed for Fiscal Year 2009. These fees are nonrefundable and must be included with documents you file under this chapter. Fees will be adjusted annually according to the

## 43 CFR Ch. II (10–1–08 Edition)

change in the Implicit Price Deflator for Gross Domestic Product (IPD-GDP) by way of publication of a final rule in the FEDERAL REGISTER, and will subsequently be posted on the BLM Web site (<http://www.blm.gov>) before October 1 each year. Revised fees are effective each year on October 1.

FY 2009 PROCESSING AND FILING FEE TABLE

Document/action	FY 2009 fee
Oil & Gas (parts 3100, 3110, 3120, 3130, 3150):	
Noncompetitive lease application .....	\$365
Competitive lease application .....	140
Assignment and transfer of record title or operating rights .....	80
Overriding royalty transfer, payment out of production .....	10
Name change, corporate merger or transfer to heir/devisee .....	190
Lease consolidation .....	405
Lease renewal or exchange .....	365
Lease reinstatement, Class I .....	70
Leasing under right-of-way .....	365
Geophysical exploration permit application—Alaska .....	25
Renewal of exploration permit—Alaska .....	25
Geothermal (part 3200):	
Noncompetitive lease application .....	365
Competitive lease application .....	140
Assignment and transfer of record title or operating rights .....	80
Name change, corporate merger or transfer to heir/devisee .....	190
Lease consolidation .....	405
Lease reinstatement .....	70
Nomination of lands .....	10
plus per acre nomination fee .....	0.10
Site license application .....	55
Assignment or transfer of site license .....	55
Coal (parts 3400, 3470):	
License to mine application .....	10
Exploration license application .....	300
Lease or lease interest transfer .....	60
Leasing of Solid Minerals Other Than Coal and Oil Shale (parts 3500, 3580):	
Applications other than those listed below	35
Prospecting permit application amendment	60
Extension of prospecting permit .....	100
Lease modification or fringe acreage lease	25
Lease renewal .....	470
Assignment, sublease, or transfer of operating rights .....	25
Transfer of overriding royalty .....	25
Use permit .....	25
Shasta and Trinity hardrock mineral lease	25
Renewal of existing sand and gravel lease in Nevada .....	25
Multiple Use; Mining (part 3730):	
Notice of protest of placer mining operations .....	10
Mining Law Administration (parts 3800, 3810, 3830, 3850, 3860, 3870):	
Application to open lands to location .....	10
Notice of location* .....	15
Amendment of location .....	10
Transfer of mining claim/site .....	10
Recording an annual FLPMA filing .....	10
Deferment of assessment work .....	100

## Pt. 3100

### FY 2009 PROCESSING AND FILING FEE TABLE— Continued

Document/action	FY 2009 fee
Recording a notice of intent to locate mining claims on Stockraising Homestead Act lands .....	25
Mineral patent adjudication .....	2,760 (more than 10 claims) 1,380 (10 or fewer claims)
Adverse claim .....	100
Protest .....	60

\*To record a mining claim or site location, you must pay this processing fee along with the initial maintenance fee and the one-time location fee required by statute. (43 CFR part 3833).

(b) The amount of a fixed fee is not subject to appeal to the Interior Board of Land Appeals pursuant to part 4, subpart E, of this title.

[70 FR 58873, Oct. 7, 2005, as amended at 72 FR 24400, May 2, 2007; 72 FR 50886, Sept. 5, 2007; 73 FR 54720, Sept. 23, 2008]

## PART 3100—OIL AND GAS LEASING

### Subpart 3100—Oil and Gas Leasing: General

- Sec.
- 3100.0-3 Authority.
  - 3100.0-5 Definitions.
  - 3100.0-9 Information collection.
  - 3100.1 Helium.
  - 3100.2 Drainage.
  - 3100.2-1 Compensation for drainage.
  - 3100.2-2 Drilling and production or payment of compensatory royalty.
  - 3100.3 Options.
  - 3100.3-1 Enforceability.
  - 3100.3-2 Effect of option on acreage.
  - 3100.3-3 Option statements.
  - 3100.4 Public availability of information.

### Subpart 3101—Issuance of Leases

- 3101.1 Lease terms and conditions.
- 3101.1-1 Lease form.
- 3101.1-2 Surface use rights.
- 3101.1-3 Stipulations and information notices.
- 3101.1-4 Modification or waiver of lease terms and stipulations.
- 3101.2 Acreage limitations.
- 3101.2-1 Public domain lands.
- 3101.2-2 Acquired lands.
- 3101.2-3 Excepted acreage.
- 3101.2-4 Excess acreage.
- 3101.2-5 Computation.
- 3101.2-6 Showing required.
- 3101.3 Leases within unit areas.
- 3101.3-1 Joinder evidence required.
- 3101.3-2 Separate leases to issue.

- 3101.4 Lands covered by application to close lands to mineral leasing.
- 3101.5 National Wildlife Refuge System lands.
- 3101.5-1 Wildlife refuge lands.
- 3101.5-2 Coordination lands.
- 3101.5-3 Alaska wildlife areas.
- 3101.5-4 Stipulations.
- 3101.6 Recreation and public purposes lands.
- 3101.7 Federal lands administered by an agency outside of the Department of the Interior.
- 3101.7-1 General requirements.
- 3101.7-2 Action by the Bureau of Land Management.
- 3101.7-3 Appeals.
- 3101.8 State's or charitable organization's ownership of surface overlying Federally-owned minerals.

### Subpart 3102—Qualifications of Lessees

- 3102.1 Who may hold leases.
- 3102.2 Aliens.
- 3102.3 Minors.
- 3102.4 Signature.
- 3102.5 Compliance, certification of compliance and evidence.
- 3102.5-1 Compliance.
- 3102.5-2 Certification of compliance.
- 3102.5-3 Evidence of compliance.

### Subpart 3103—Fees, Rentals and Royalty

- 3103.1 Payments.
- 3103.1-1 Form of remittance.
- 3103.1-2 Where submitted.
- 3103.2 Rentals.
- 3103.2-1 Rental requirements.
- 3103.2-2 Annual rental payments.
- 3103.3 Royalties.
- 3103.3-1 Royalty on production.
- 3103.3-2 Minimum royalties.
- 3103.4 Production incentives.
- 3103.4-1 Royalty reductions.
- 3103.4-2 Stripper well royalty reductions.
- 3103.4-3 Heavy oil royalty reductions.
- 3103.4-4 Suspension of operations and/or production.

### Subpart 3104—Bonds

- 3104.1 Bond obligations.
- 3104.2 Lease bond.
- 3104.3 Statewide and nationwide bonds.
- 3104.4 Unit operator's bond.
- 3104.5 Increased amount of bonds.
- 3104.6 Where filed and number of copies.
- 3104.7 Default.
- 3104.8 Termination of period of liability.

### Subpart 3105—Cooperative Conservation Provisions

- 3105.1 Cooperative or unit agreement.
- 3105.2 Communitization or drilling agreements.
- 3105.2-1 Where filed.

**Pt. 3100**

SOURCE: 48 FR 33662, July 22, 1983, unless otherwise noted.

**Subpart 3100—Onshore Oil and Gas Leasing: General****§ 3100.0-3 Authority.**

(a) *Public domain.* (1) Oil and gas in public domain lands and lands returned to the public domain under section 2370 of this title are subject to lease under the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 *et seq.*), by acts, including, but not limited to, section 1009 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3148).

(2) *Exceptions.* (i) Units of the National Park System, including lands withdrawn by section 206 of the Alaska National Interest Lands Conservation Act, except as provided in paragraph (g)(4) of this section;

(ii) Indian reservations;

(iii) Incorporated cities, towns and villages;

(iv) Naval petroleum and oil shale reserves and the National Petroleum Reserve—Alaska.

(v) Lands north of 68 degrees north latitude and east of the western boundary of the National Petroleum Reserve—Alaska;

(vi) Arctic National Wildlife Refuge in Alaska.

(vii) Lands recommended for wilderness allocation by the surface managing agency;

(viii) Lands within Bureau of Land Management wilderness study areas;

(ix) Lands designated by Congress as wilderness study areas, except where oil and gas leasing is specifically allowed to continue by the statute designating the study area;

(x) Lands within areas allocated for wilderness or further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document numbered 96-119), unless such lands are allocated to uses other than wilderness by a land and resource management plan or have been released to uses other than wilderness by an Act of Congress; and

(xi) Lands within the National Wilderness Preservation System, subject to valid existing rights under section 4(d)(3) of the Wilderness Act established before midnight, December 31, 1983, unless otherwise provided by law.

(b) *Acquired lands.* (1) Oil and gas in acquired lands are subject to lease under the Mineral Leasing Act for Acquired Lands of August 7, 1947, as amended (30 U.S.C. 351-359).

(2) *Exceptions.* (i) Units of the National Park System, except as provided in paragraph (g)(4) of this section;

(ii) Incorporated cities, towns and villages;

(iii) Naval petroleum and oil shale reserves and the National Petroleum Reserve—Alaska;

(iv) Tidelands or submerged coastal lands within the continental shelf adjacent or littoral to lands within the jurisdiction of the United States;

(v) Lands acquired by the United States for development of helium, fissionable material deposits or other minerals essential to the defense of the country, except oil, gas and other minerals subject to leasing under the Act;

(vi) Lands reported as excess under the Federal Property and Administrative Services Act of 1949;

(vii) Lands acquired by the United States by foreclosure or otherwise for resale.

(viii) Lands recommended for wilderness allocation by the surface managing agency;

(ix) Lands within Bureau of Land Management wilderness study areas;

(x) Lands designated by Congress as wilderness study areas, except where oil and gas leasing is specifically allowed to continue by the statute designating the study area;

(xi) Lands within areas allocated for wilderness or further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document numbered 96-119), unless such lands are allocated to uses other than wilderness by a land and resource management plan or have been released to uses other than wilderness by an Act of Congress; and

(xii) Lands within the National Wilderness Preservation System, subject to valid existing rights under section 4(d)(3) of the Wilderness Act established before midnight, December 31, 1983, unless otherwise provided by law.

(c) National Petroleum Reserve—Alaska is subject to lease under the Department of the Interior Appropriations Act, Fiscal Year 1981 (42 U.S.C. 6508).

(d) Where oil or gas is being drained from lands otherwise unavailable for leasing, there is implied authority in the agency having jurisdiction of those lands to grant authority to the Bureau of Land Management to lease such lands (see 43 U.S.C. 1457; also Attorney General's Opinion of April 2, 1941 (Vol. 40 Op. Atty. Gen. 41)).

(e) Where lands previously withdrawn or reserved from the public domain are no longer needed by the agency for which the lands were withdrawn or reserved and such lands are retained by the General Services Administration, or where acquired lands are declared as excess to or surplus by the General Services Administration, authority to lease such lands may be transferred to the Department in accordance with the Federal Property and Administrative Services Act of 1949 and the Mineral Leasing Act for Acquired Lands, as amended.

(f) The Act of May 21, 1930 (30 U.S.C. 301-306), authorizes the leasing of oil and gas deposits under certain rights-of-way to the owner of the right-of-way or any assignee.

(g)(1) The Act of May 9, 1942 (56 Stat. 273), as amended by the Act of October 25, 1949 (63 Stat. 886), authorizes leasing on certain lands in Nevada.

(2) The Act of March 3, 1933 (47 Stat. 1487), as amended by the Act of June 5, 1936 (49 Stat. 1482) and the Act of June 29, 1936 (49 Stat. 2026), authorizes leasing on certain lands patented to the State of California.

(3) The Act of June 30, 1950 (16 U.S.C. 508(b)) authorizes leasing on certain National Forest Service Lands in Minnesota.

(4) *Units of the National Park System.* The Secretary is authorized to permit mineral leasing in the following units of the National Park System if he/she finds that such disposition would not have significant adverse effects on the administration of the area and if lease operations can be conducted in a manner that will preserve the scenic, scientific and historic features contrib-

uting to public enjoyment of the area, pursuant to the following authorities:

(i) *Lake Mead National Recreation Area*—The Act of October 8, 1964 (16 U.S.C. 460n *et seq.*).

(ii) *Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area*—The Act of November 8, 1965 (79 Stat. 1295; 16 U.S.C. 460q *et seq.*).

(iii) *Ross Lake and Lake Chelan National Recreation Areas*—The Act of October 2, 1968 (82 Stat. 926; 16 U.S.C. 90 *et seq.*).

(iv) *Glen Canyon National Recreation Area*—The Act of October 27, 1972 (86 Stat. 1311; 16 U.S.C. 460dd *et seq.*).

(5) *Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area.* Section 6 of the Act of November 8, 1965 (Pub. L. 89-336; 79 Stat. 1295), authorizes the Secretary of the Interior to permit the removal of leasable minerals from lands (or interest in lands) within the recreation area under the jurisdiction of the Secretary of Agriculture in accordance with the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 181 *et seq.*), or the Acquired Lands Mineral Leasing Act of August 7, 1947 (30 U.S.C. 351-359), if he finds that such disposition would not have significant adverse effects on the purpose of the Central Valley project or the administration of the recreation area.

[48 FR 33662, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984; 53 FR 17351, 17352, May 16, 1988; 53 FR 22835, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

#### § 3100.0-5 Definitions.

As used in this part, the term:

(a) *Operator* means any person or entity, including, but not limited to, the lessee or operating rights owner, who has stated in writing to the authorized officer that it is responsible under the terms and conditions of the lease for the operations conducted on the leased lands or a portion thereof.

(b) *Unit operator* means the person authorized under the agreement approved by the Department of the Interior to conduct operations within the unit.

(c) *Record title* means a lessee's interest in a lease which includes the obligation to pay rent, and the rights to

## Bureau of Land Management, Interior

## § 3100.0-9

assign and relinquish the lease. Overriding royalty and operating rights are severable from record title interests.

(d) *Operating right* (working interest) means the interest created out of a lease authorizing the holder of that right to enter upon the leased lands to conduct drilling and related operations, including production of oil or gas from such lands in accordance with the terms of the lease.

(e) *Transfer* means any conveyance of an interest in a lease by assignment, sublease or otherwise. This definition includes the terms: *Assignment* which means a transfer of all or a portion of the lessee's record title interest in a lease; and *sublease* which means a transfer of a non-record title interest in a lease, i.e., a transfer of operating rights is normally a sublease and a sublease also is a subsidiary arrangement between the lessee (sublessor) and the sublessee, but a sublease does not include a transfer of a purely financial interest, such as overriding royalty interest or payment out of production, nor does it affect the relationship imposed by a lease between the lessee(s) and the United States.

(f) *National Wildlife Refuge System Lands* means lands and water, or interests therein, administered by the Secretary as wildlife refuges, areas for the protection and conservation of fish and wildlife that are threatened with extinction, wildlife management areas or waterfowl production areas.

(g) *Actual drilling operations* includes not only the physical drilling of a well, but the testing, completing or equipping of such well for production.

(h)(1) *Primary term* of lease subject to section 4(d) of the Act prior to the revision of 1960 (30 U.S.C. 226-1(d)) means all periods of the life of the lease prior to its extension by reason of production of oil and gas in paying quantities; and

(2) *Primary term* of all other leases means the initial term of the lease. For competitive leases, except those within the National Petroleum Reserve—Alaska, this means 5 years and for non-competitive leases this means 10 years.

(i) *Lessee* means a person or entity holding record title in a lease issued by the United States.

(j) *Operating rights owner* means a person or entity holding operating rights in a lease issued by the United States. A lessee also may be an operating rights owner if the operating rights in a lease or portion thereof have not been severed from record title.

(k) *Bid* means an amount of remittance offered as partial compensation for a lease equal to or in excess of the national minimum acceptable bonus bid set by statute or by the Secretary, submitted by a person or entity for a lease parcel in a competitive lease sale.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17352, May 16, 1988; 53 FR 22836, June 17, 1988]

### § 3100.0-9 Information collection.

(a)(1) The collections of information contained in § 3103.4-1(b) have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and are among the collections assigned clearance number 1004-0145. The information will be used to determine whether an oil and gas operator or owner may obtain a reduction in the royalty rate. Response is required to obtain a benefit in accordance with 30 U.S.C. 181, *et seq.*, and 30 U.S.C. 351-359.

(2) Public reporting burden for the information collections assigned clearance number 1004-0145 is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0145, Washington, DC 20503.

(b)(1) The collections of information contained in § 3103.4-1(c) and (d) have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1010-0090. The information will be used to determine whether an oil and gas lessee may obtain a reduction in the

## **§ 3100.1**

royalty rate. Response is required to obtain a benefit in accordance with 30 U.S.C. 181, *et seq.*, and 30 U.S.C. 351-359.

(2) Public reporting burden for this information is estimated to average ½ hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer, Minerals Management Service (Mail Stop 2300), 381 Elden Street, Herndon, VA 22070-4817, and the Office of Management and Budget, Paperwork Reduction Project, 1010-0090, Washington, DC 20503.

[57 FR 35973, Aug. 11, 1992]

### **§ 3100.1 Helium.**

The ownership of and the right to extract helium from all gas produced from lands leased or otherwise disposed of under the Act have been reserved to the United States.

### **§ 3100.2 Drainage.**

#### **§ 3100.2-1 Compensation for drainage.**

Upon a determination by the authorized officer that lands owned by the United States are being drained of oil or gas by wells drilled on adjacent lands, the authorized officer may execute agreements with the owners of adjacent lands whereby the United States and its lessees shall be compensated for such drainage. Such agreements shall be made with the consent of any lessee affected by an agreement. Such lands may also be offered for lease in accordance with part 3120 of this title.

#### **§ 3100.2-2 Drilling and production or payment of compensatory royalty.**

Where lands in any leases are being drained of their oil or gas content by wells either on a Federal lease issued at a lower rate of royalty or on non-Federal lands, the lessee shall both drill and produce all wells necessary to protect the leased lands from drainage. In lieu of drilling necessary wells, the lessee may, with the consent of the authorized officer, pay compensatory roy-

## **43 CFR Ch. II (10-1-08 Edition)**

alty in the amount determined in accordance with § 3162.2(a) of this title.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17352, May 16, 1988]

### **§ 3100.3 Options.**

#### **§ 3100.3-1 Enforceability.**

(a) No option to acquire any interest in a lease shall be enforceable if entered into for a period of more than 3 years (including any renewal period that may be provided for in the option) without the approval of the Secretary.

(b) No option or renewal thereof shall be enforceable until a signed copy or notice of option has been filed in the proper BLM office. Each such signed copy or notice shall include:

(1) The names and addresses of the parties thereto;

(2) The serial number of the lease to which the option is applicable;

(3) A statement of the number of acres covered by the option and of the interests and obligations of the parties to the option, including the date and expiration date of the option; and

(4) The interest to be conveyed and retained in exercise of the option. Such notice shall be signed by all parties to the option or their duly authorized agents. The signed copy or notice of option required by this paragraph shall contain or be accompanied by a signed statement by the holder of the option that he/she is the sole party in interest in the option; if not, he/she shall set forth the names and provide a description of the interest therein of the other interested parties, and provide a description of the agreement between them, if oral, and a copy of such agreement, if written.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17352, May 16, 1988. Redesignated at 53 FR 22836, June 17, 1988]

#### **§ 3100.3-2 Effect of option on acreage.**

The acreage to which the option is applicable shall be charged both to the grantor of the option and the option holder. The acreage covered by an unexercised option remains charged

## Bureau of Land Management, Interior

## §3101.1-1

during its term until notice of its relinquishment or surrender has been filed in the proper BLM office.

[48 FR 33662, July 22, 1983. Redesignated at 53 FR 22836, June 17, 1988]

### §3100.3-3 Option statements.

Each option holder shall file in the proper BLM office within 90 days after June 30 and December 31 of each year a statement showing as of the prior June 30 and December 31, respectively:

(a) Any changes to the statements submitted under §3100.3-1(b) of this title, and

(b) The number of acres covered by each option and the total acreage of all options held in each State.

[53 FR 17352, May 16, 1988. Redesignated and amended at 53 FR 22836, June 17, 1988]

### §3100.4 Public availability of information.

(a) All data and information concerning Federal and Indian minerals submitted under this part 3100 and parts 3110 through 3190 of this chapter are subject to part 2 of this title, except as provided in paragraph (c) of this section. Part 2 of this title includes the regulations of the Department of the Interior covering the public disclosure of data and information contained in Department of the Interior records. Certain mineral information not protected from public disclosure under part 2 of this title may be made available for inspection without a Freedom of Information Act (FOIA) (5 U.S.C. 552) request.

(b) When you submit data and information under this part 3100 and parts 3110 through 3190 of this chapter that you believe to be exempt from disclosure to the public, you must clearly mark each page that you believe includes confidential information. BLM will keep all such data and information confidential to the extent allowed by §2.13(c) of this title.

(c) Under the Indian Mineral Development Act of 1982 (IMDA) (25 U.S.C. 2101 *et seq.*), the Department of the Interior will hold as privileged proprietary information of the affected Indian or Indian tribe—

(1) All findings forming the basis of the Secretary's intent to approve or

disapprove any Minerals Agreement under IMDA; and

(2) All projections, studies, data, or other information concerning a Minerals Agreement under IMDA, regardless of the date received, related to—

(i) The terms, conditions, or financial return to the Indian parties;

(ii) The extent, nature, value, or disposition of the Indian mineral resources; or

(iii) The production, products, or proceeds thereof.

(d) For information concerning Indian minerals not covered by paragraph (c) of this section—

(1) BLM will withhold such records as may be withheld under an exemption to FOIA when it receives a request for information related to tribal or Indian minerals held in trust or subject to restrictions on alienation;

(2) BLM will notify the Indian mineral owner(s) identified in the records of the Bureau of Indian Affairs (BIA), and BIA, and give them a reasonable period of time to state objections to disclosure, using the standards and procedures of §2.15(d) of this title, before making a decision about the applicability of FOIA exemption 4 to:

(i) Information obtained from a person outside the United States Government; when

(ii) Following consultation with a submitter under §2.15(d) of this title, BLM determines that the submitter does not have an interest in withholding the records that can be protected under FOIA; but

(iii) BLM has reason to believe that disclosure of the information may result in commercial or financial injury to the Indian mineral owner(s), but is uncertain that such is the case.

[63 FR 52952, Oct. 1, 1998]

## Subpart 3101—Issuance of Leases

### §3101.1 Lease terms and conditions.

#### §3101.1-1 Lease form.

A lease shall be issued only on the standard form approved by the Director.

[53 FR 17352, May 16, 1988]

## **§ 3101.1-2**

### **§ 3101.1-2 Surface use rights.**

A lessee shall have the right to use so much of the leased lands as is necessary to explore for, drill for, mine, extract, remove and dispose of all the leased resource in a leasehold subject to: Stipulations attached to the lease; restrictions deriving from specific, nondiscretionary statutes; and such reasonable measures as may be required by the authorized officer to minimize adverse impacts to other resource values, land uses or users not addressed in the lease stipulations at the time operations are proposed. To the extent consistent with lease rights granted, such reasonable measures may include, but are not limited to, modification to siting or design of facilities, timing of operations, and specification of interim and final reclamation measures. At a minimum, measures shall be deemed consistent with lease rights granted provided that they do not: require relocation of proposed operations by more than 200 meters; require that operations be sited off the leasehold; or prohibit new surface disturbing operations for a period in excess of 60 days in any lease year.

[53 FR 17352, May 16, 1988]

### **§ 3101.1-3 Stipulations and information notices.**

The authorized officer may require stipulations as conditions of lease issuance. Stipulations shall become part of the lease and shall supersede inconsistent provisions of the standard lease form. Any party submitting a bid under subpart 3120 of this title, or an offer under § 3110.1(b) of this title during the period when use of the parcel number is required pursuant to § 3110.5-1 of this title, shall be deemed to have agreed to stipulations applicable to the specific parcel as indicated in the List of Lands Available for Competitive Nominations or the Notice of Competitive Lease Sale available from the proper BLM office. A party filing a noncompetitive offer in accordance with § 3110.1(a) of this title shall be deemed to have agreed to stipulations applicable to the specific parcel as indicated in the List of Lands Available for Competitive Nominations or the Notice of Competitive Lease Sale, un-

## **43 CFR Ch. II (10-1-08 Edition)**

less the offer is withdrawn in accordance with § 3110.6 of this title. An information notice has no legal consequences, except to give notice of existing requirements, and may be attached to a lease by the authorized officer at the time of lease issuance to convey certain operational, procedural or administrative requirements relative to lease management within the terms and conditions of the standard lease form. Information notices shall not be a basis for denial of lease operations.

[53 FR 17352, May 16, 1988, as amended at 53 FR 22836, June 17, 1988]

### **§ 3101.1-4 Modification or waiver of lease terms and stipulations.**

A stipulation included in an oil and gas lease shall be subject to modification or waiver only if the authorized officer determines that the factors leading to its inclusion in the lease have changed sufficiently to make the protection provided by the stipulation no longer justified or if proposed operations would not cause unacceptable impacts. If the authorized officer has determined, prior to lease issuance, that a stipulation involves an issue of major concern to the public, modification or waiver of the stipulation shall be subject to public review for at least a 30-day period. In such cases, the stipulation shall indicate that public review is required before modification or waiver. If subsequent to lease issuance the authorized officer determines that a modification or waiver of a lease term or stipulation is substantial, the modification or waiver shall be subject to public review for at least a 30-day period.

[53 FR 22836, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

### **§ 3101.2 Acreage limitations.**

#### **§ 3101.2-1 Public domain lands.**

(a) No person or entity shall take, hold, own or control more than 246,080 acres of Federal oil and gas leases in any one State at any one time. No more than 200,000 acres of such acres may be held under option.

(b) In Alaska, the acreage that can be taken, held, owned or controlled is limited to 300,000 acres in the northern

## Bureau of Land Management, Interior

## §3101.2-5

leasing district and 300,000 acres in the southern leasing district, of which no more than 200,000 acres may be held under option in each of the 2 leasing districts. The boundary between the 2 leasing districts in Alaska begins at the northeast corner of the Tetlin National Wildlife Refuge as established on December 2, 1980 (16 U.S.C. 3101), at a point on the boundary between the United States and Canada, then northwesterly along the northern boundary of the refuge to the left limit of the Tanana River (63°9'38" north latitude, 142°20'52" west longitude), then westerly along the left limit to the confluence of the Tanana and Yukon Rivers, and then along the left limit of the Yukon River from said confluence to its principal southern mouth.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17352, May 16, 1988]

### §3101.2-2 Acquired lands.

An acreage limitation separate from, but equal to the acreage limitation for public domain lands described in §3101.2-1 of this title, applies to acquired lands. Where the United States owns only a fractional interest in the mineral resources of the lands involved in a lease, only that part owned by the United States shall be charged as acreage holdings. The acreage embraced in a future interest lease shall not be charged as acreage holdings until the lease for the future interest becomes effective.

### §3101.2-3 Excepted acreage.

(a) The following acreage shall not be included in computing accountable acreage:

(1) Acreage under any lease any portion of which is committed to any Federally approved unit or cooperative plan or communitization agreement;

(2) Acreage under any lease for which royalty (including compensatory royalty or royalty in-kind) was paid in the preceding calendar year; and

(3) Acreage under leases subject to an operating, drilling or development contract approved by the Secretary.

(b) Acreage subject to offers to lease, overriding royalties and payments out

of production shall not be included in computing accountable acreage.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17352, May 16, 1988; 71 FR 14823, Mar. 24, 2006]

### §3101.2-4 Excess acreage.

(a) Where, as the result of the termination or contraction of a unit or cooperative plan, the elimination of a lease from an operating, drilling or development contract a party holds or controls excess accountable acreage, said party shall have 90 days from that date to reduce the holdings to the prescribed limitation and to file proof of the reduction in the proper BLM office. Where as a result of a merger or the purchase of the controlling interest in a corporation, acreage in excess of the amount permitted is acquired, the party holding the excess acreage shall have 180 days from the date of the merger or purchase to divest the excess acreage. If additional time is required to complete the divestiture of the excess acreage, a petition requesting additional time, along with a full justification for the additional time, may be filed with the authorized officer prior to the termination of the 180-day period provided herein.

(b) If any person or entity is found to hold accountable acreage in violation of the provisions of these regulations, lease(s) or interests therein shall be subject to cancellation or forfeiture in their entirety, until sufficient acreage has been eliminated to comply with the acreage limitation. Excess acreage or interest shall be cancelled in the inverse order of acquisition.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17353, May 16, 1988]

### §3101.2-5 Computation.

The accountable acreage of a party owning an undivided interest in a lease shall be the party's proportionate part of the total lease acreage. The accountable acreage of a party who is the beneficial owner of more than 10 percent of the stock of a corporation which holds Federal oil and gas leases shall be the party's proportionate part of the corporation's accountable acreage. Parties to a contract for development of leased

### **§ 3101.2-6**

lands and co-parties, except those operating, drilling or development contracts subject to § 3101.2-3 of this title, shall be charged with their proportionate interests in the lease. No holding of acreage in common by the same persons in excess of the maximum acreage specified in the laws for any one party shall be permitted.

[48 FR 33662, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984; 53 FR 17353, May 16, 1988]

#### **§ 3101.2-6 Showing required.**

At any time the authorized officer may require any lessee or operator to file with the Bureau of Land Management a statement showing as of specified date the serial number and the date of each lease in which he/she has any interest, in the particular State, setting forth the acreage covered thereby.

#### **§ 3101.3 Leases within unit areas.**

##### **§ 3101.3-1 Joinder evidence required.**

Before issuance of a lease for lands within an approved unit, the lease offeror shall file evidence with the proper BLM office of having joined in the unit agreement and unit operating agreement or a statement giving satisfactory reasons for the failure to enter into such agreement. If such statement is acceptable to the authorized officer the operator shall be permitted to operate independently but shall be required to conform to the terms and provisions of the unit agreement with respect to such operations.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17353, May 16, 1988]

##### **§ 3101.3-2 Separate leases to issue.**

A lease offer for lands partly within and partly outside the boundary of a unit shall result in separate leases, one for the lands within the unit, and one for the lands outside the unit.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17353, May 16, 1988]

##### **§ 3101.4 Lands covered by application to close lands to mineral leasing.**

Offers filed on lands within a pending application to close lands to mineral leasing shall be suspended until the

### **43 CFR Ch. II (10-1-08 Edition)**

segregative effect of the application is final.

#### **§ 3101.5 National Wildlife Refuge System lands.**

##### **§ 3101.5-1 Wildlife refuge lands.**

(a) Wildlife refuge lands are those lands embraced in a withdrawal of public domain and acquired lands of the United States for the protection of all species of wildlife within a particular area. Sole and complete jurisdiction over such lands for wildlife conservation purposes is vested in the Fish and Wildlife Service even though such lands may be subject to prior rights for other public purposes or, by the terms of the withdrawal order, may be subject to mineral leasing.

(b) No offers for oil and gas leases covering wildlife refuge lands shall be accepted and no leases covering such lands shall be issued except as provided in § 3100.2 of this title. There shall be no drilling or prospecting under any lease heretofore or hereafter issued on lands within a wildlife refuge except with the consent and approval of the Secretary with the concurrence of the Fish and Wildlife Service as to the time, place and nature of such operations in order to give complete protection to wildlife populations and wildlife habitat on the areas leased, and all such operations shall be conducted in accordance with the stipulations of the Bureau on a form approved by the Director.

##### **§ 3101.5-2 Coordination lands.**

(a) Coordination lands are those lands withdrawn or acquired by the United States and made available to the States by cooperative agreements entered into between the Fish and Wildlife Service and the game commissions of the various States, in accordance with the Act of March 10, 1934 (48 Stat. 401), as amended by the Act of August 14, 1946 (60 Stat. 1080), or by long-term leases or agreements between the Department of Agriculture and the game commissions of the various States pursuant to the Bankhead-Jones Farm Tenant Act (50 Stat. 525), as amended, where such lands were subsequently transferred to the Department of the Interior, with the Fish

## Bureau of Land Management, Interior

## § 3101.7-3

and Wildlife Service as the custodial agency of the United States.

(b) Representatives of the Bureau and the Fish and Wildlife Service shall, in cooperation with the authorized members of the various State game commissions, confer for the purpose of determining by agreement those coordination lands which shall not be subject to oil and gas leasing. Coordination lands not closed to oil and gas leasing shall be subject to leasing on the imposition of such stipulations as are agreed upon by the State Game Commission, the Fish and Wildlife Service and the Bureau.

### § 3101.5-3 Alaska wildlife areas.

No lands within a refuge in Alaska open to leasing shall be available until the Fish and Wildlife Service has first completed compatability determinations.

### § 3101.5-4 Stipulations.

Leases shall be issued subject to stipulations prescribed by the Fish and Wildlife Service as to the time, place, nature and condition of such operations in order to minimize impacts to fish and wildlife populations and habitat and other refuge resources on the areas leased. The specific conduct of lease activities on any refuge lands shall be subject to site-specific stipulations prescribed by the Fish and Wildlife Service.

### § 3101.6 Recreation and public purposes lands.

Under the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*), all lands within Recreation and Public Purposes leases and patents are subject to lease under the provisions of this part, subject to such conditions as the Secretary deems appropriate.

### § 3101.7 Federal lands administered by an agency outside of the Department of the Interior.

#### § 3101.7-1 General requirements.

(a) Acquired lands shall be leased only with the consent of the surface managing agency, which upon receipt of a description of the lands from the authorized officer, shall report to the authorized officer that it consents to

leasing with stipulations, if any, or withholds consent or objects to leasing.

(b) Public domain lands shall be leased only after the Bureau has consulted with the surface managing agency and has provided it with a description of the lands, and the surface managing agency has reported its recommendation to lease with stipulations, if any, or not to lease to the authorized officer. If consent or lack of objection of the surface managing agency is required by statute to lease public domain lands, the procedure in paragraph (a) of this section shall apply.

(c) National Forest System lands whether acquired or reserved from the public domain shall not be leased over the objection of the Forest Service. The provisions of paragraph (a) of this section shall apply to such National Forest System lands.

[53 FR 22836, June 17, 1988]

### § 3101.7-2 Action by the Bureau of Land Management.

(a) Where the surface managing agency has consented to leasing with required stipulations, and the Secretary decides to issue a lease, the authorized officer shall incorporate the stipulations into any lease which it may issue. The authorized officer may add additional stipulations.

(b) The authorized officer shall not issue a lease and shall reject any lease offer on lands to which the surface managing agency objects or withholds consent required by statute. In all other instances, the Secretary has the final authority and discretion to decide to issue a lease.

(c) The authorized officer shall review all recommendations and shall accept all reasonable recommendations of the surface managing agency.

[48 FR 33662, July 22, 1983. Redesignated and amended at 53 FR 22836, June 17, 1988]

#### § 3101.7-3 Appeals.

(a) The decision of the authorized officer to reject an offer to lease or to issue a lease with stipulations recommended by the surface managing agency may be appealed to the Interior Board of Land Appeals under part 4 of this title.

## **§ 3101.8**

(b) Where, as provided by statute, the surface managing agency has required that certain stipulations be included in a lease or has consented, or objected or refused to consent to leasing, any appeal by an affected lease offeror shall be pursuant to the administrative remedies provided by the particular surface managing agency.

[53 FR 22837, June 17, 1988]

### **§ 3101.8 State's or charitable organization's ownership of surface overlying Federally-owned minerals.**

Where the United States has conveyed title to, or otherwise transferred the control of the surface of lands to any State or political subdivision, agency, or instrumentality thereof, or a college or any other educational corporation or association, or a charitable or religious corporation or association, with reservation of the oil and gas rights to the United States, such party shall be given an opportunity to suggest any lease stipulations deemed necessary for the protection of existing surface improvements or uses, to set forth the facts supporting the necessity of the stipulations and also to file any objections it may have to the issuance of a lease. Where a party controlling the surface opposes the issuance of a lease or wishes to place such restrictive stipulations upon the lease that it could not be operated upon or become part of a drilling unit and hence is without mineral value, the facts submitted in support of the opposition or request for restrictive stipulations shall be given consideration and each case decided on its merits. The opposition to lease or necessity for restrictive stipulations expressed by the party controlling the surface affords no legal basis or authority to refuse to issue the lease or to issue the lease with the requested restrictive stipulations for the reserved minerals in the lands; in such case, the final determination whether to issue and with what stipulations, or not to issue the lease depends upon whether or not the interests of the United States would best be served by the issuance of the lease.

[48 FR 33662, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984; 53 FR 22837, June 17, 1988]

## **43 CFR Ch. II (10-1-08 Edition)**

### **Subpart 3102—Qualifications of Lessees**

#### **§ 3102.1 Who may hold leases.**

Leases or interests therein may be acquired and held only by citizens of the United States; associations (including partnerships and trusts) of such citizens; corporations organized under the laws of the United States or of any State or Territory thereof; and municipalities.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17353, May 16, 1988]

#### **§ 3102.2 Aliens.**

Leases or interests therein may be acquired and held by aliens only through stock ownership, holding or control in a present or potential lessee that is incorporated under the laws of the United States or of any State or territory thereof, and only if the laws, customs or regulations of their country do not deny similar or like privileges to citizens or corporations of the United States. If it is determined that a country has denied similar or like privileges to citizens or corporations of the United States, it would be placed on a list available from any Bureau of Land Management State office.

[53 FR 17353, May 16, 1988]

#### **§ 3102.3 Minors.**

Leases shall not be acquired or held by one considered a minor under the laws of the State in which the lands are located, but leases may be acquired and held by legal guardians or trustees of minors in their behalf. Such legal guardians or trustees shall be citizens of the United States or otherwise meet the provisions of § 3102.1 of this title.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17353, May 16, 1988]

#### **§ 3102.4 Signature.**

(a) The original of an offer or bid shall be signed in ink and dated by the present or potential lessee or by anyone authorized to sign on behalf of the present or potential lessee.

(b) Three copies of a transfer of record title or of operating rights (sublease), as required by section 30a of the act, shall be originally signed and

dated by the transferor or anyone authorized to sign on behalf of the transferor. However, a transferee, or anyone authorized to sign on his or her behalf, shall be required to sign and date only 1 original request for approval of a transfer.

(c) Documents signed by any party other than the present or potential lessee shall be rendered in a manner to reveal the name of the present or potential lessee, the name of the signatory and their relationship. A signatory who is a member of the organization that constitutes the present or potential lessee (e.g., officer of a corporation, partner of a partnership, etc.) may be requested by the authorized officer to clarify his/her relationship, when the relationship is not shown on the documents filed.

(d) Submission of a qualification number does not meet the requirements of paragraph (c) of this section.

[53 FR 17353, May 16, 1988]

**§ 3102.5 Compliance, certification of compliance and evidence.**

**§ 3102.5-1 Compliance.**

In order to actually or potentially own, hold, or control an interest in a lease or prospective lease, all parties, including corporations, and all members of associations, including partnerships of all types, shall, without exception, be qualified and in compliance with the act. Compliance means that the lessee, potential lessee, and all such parties (as defined in § 3000.0-5(k)) are:

(a) Citizens of the United States (see § 3102.1) or alien stockholders in a corporation organized under State or Federal law (see § 3102.2);

(b) In compliance with the Federal acreage limitations (see § 3101.2);

(c) Not minors (see § 3102.3);

(d) Except for an assignment or transfer under subpart 3106 of this title, in compliance with section 2(a)(2)(A) of the Act, in which case the signature on an offer or lease constitutes evidence of compliance. A lease issued to any entity in violation of this paragraph (d) shall be subject to the cancellation provisions of § 3108.3 of this title. The term *entity* is defined at § 3400.0-5(rr) of this title.

(e) Not in violation of the provisions of section 41 of the Act; and

(f) In compliance with section 17(g) of the Act, in which case the signature on an offer, lease, assignment, transfer, constitutes evidence of compliance that the signatory and any subsidiary, affiliate, or person, association, or corporation controlled by or under common control with the signatory, as defined in § 3400.0-5(rr) of this title, has not failed or refused to comply with reclamation requirements with respect to all leases and operations thereon in which such person or entity has an interest. Noncompliance with section 17(g) of the Act begins on the effective date of the imposition of a civil penalty by the authorized officer under § 3163.2 of this title, or when the bond is attached by the authorized officer for reclamation purposes, whichever comes first. A lease issued, or an assignment or transfer approved, to any such person or entity in violation of this paragraph (f) shall be subject to the cancellation provisions of § 3108.3 of this title, notwithstanding any administrative or judicial appeals that may be pending with respect to violations or penalties assessed for failure to comply with the prescribed reclamation standards on any lease holdings. Noncompliance shall end upon a determination by the authorized officer that all required reclamation has been completed and that the United States has been fully reimbursed for any costs incurred due to the required reclamation.

(g) In compliance with § 3106.1(b) of this title and section 30A of the Act. The authorized officer may accept the signature on a request for approval of an assignment of less than 640 acres outside of Alaska (2,560 acres within Alaska) as acceptable certification that the assignment would further the development of oil and gas, or the authorized officer may apply the provisions of § 3102.5-3 of this title.

[53 FR 22837, June 17, 1988]

**§ 3102.5-2 Certification of compliance.**

Any party(s) seeking to obtain an interest in a lease shall certify it is in compliance with the act as set forth in § 3102.5-1 of this title. A party(s) that is a corporation or publicly traded association, including a publicly traded

### § 3102.5-3

partnership, shall certify that constituent members of the corporation, association or partnership holding or controlling more than 10 percent of the instruments of ownership of the corporation, association or partnership are in compliance with the act. Execution and submission of an offer, competitive bid form, or request for approval of a transfer of record title or of operating rights (sublease), constitutes certification of compliance.

[53 FR 17353, May 16, 1988; 53 FR 22837, June 17, 1988]

#### § 3102.5-3 Evidence of compliance.

The authorized officer may request at any time further evidence of compliance and qualification from any party holding or seeking to hold an interest in a lease. Failure to comply with the request of the authorized officer shall result in adjudication of the action based on the incomplete submission.

[53 FR 17353, May 16, 1988]

## Subpart 3103—Fees, Rentals and Royalty

### § 3103.1 Payments.

#### § 3103.1-1 Form of remittance.

All remittances shall be by personal check, cashier's check, certified check, or money order, and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. Payments made to the Bureau may be made by other arrangements such as by electronic funds transfer or credit card when specifically authorized by the Bureau. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

[53 FR 22837, June 17, 1988]

#### § 3103.1-2 Where submitted.

(a)(1) All fees for lease applications or offers or for requests for approval of a transfer and all first-year rentals and bonuses for leases issued under Group 3100 of this title shall be paid to the proper BLM office.

(2) All second-year and subsequent rentals, except for leases specified in

### 43 CFR Ch. II (10-1-08 Edition)

paragraph (b) of this section, shall be paid to the Service at the following address: Minerals Management Service, Royalty Management Program/BRASS, Box 5640 T.A., Denver, CO 80217.

(b) All rentals and royalties on producing leases, communitized leases in producing well units, unitized leases in producing unit areas, leases on which compensatory royalty is payable and all payments under subsurface storage agreements and easements for directional drilling shall be paid to the Service.

[48 FR 33662, July 22, 1983, as amended at 49 FR 11637, Mar. 27, 1984; 49 FR 39330, Oct. 5, 1984; 53 FR 17353, May 16, 1988; 72 FR 50887, Sept. 5, 2007]

### § 3103.2 Rentals.

#### § 3103.2-1 Rental requirements.

(a) Each competitive bid or competitive nomination submitted in response to a List of Lands Available for Competitive Nominations or Notice of Competitive Lease Sale, and each non-competitive lease offer shall be accompanied by full payment of the first year's rental based on the total acreage, if known, and, if not known, shall be based on 40 acres for each smallest legal subdivision. An offer deficient in the first year's rental by not more than 10 percent or \$200, whichever is less, shall be accepted by the authorized officer provided all other requirements are met. Rental submitted shall be determined based on the total amount remitted less all required fees. The additional rental shall be paid within 30 days from notice of the deficiency under penalty of cancellation of the lease.

(b) If the acreage is incorrectly indicated in a List of Lands Available for Competitive Nominations or a Notice of Competitive Lease Sale, payment of the rental based on the error is curable within 15 calendar days of receipt of notice from the authorized officer of the error.

(c) Rental shall not be prorated for any lands in which the United States owns an undivided fractional interest

## Bureau of Land Management, Interior

## § 3103.3-1

but shall be payable for the full acreage in such lands.

[48 FR 33662, July 22, 1983, as amended at 49 FR 26920, June 29, 1984, 53 FR 22837, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

### § 3103.2-2 Annual rental payments.

Rentals shall be paid on or before the lease anniversary date. A full year's rental shall be submitted even when less than a full year remains in the lease term, except as provided in § 3103.4-4(d) of this title. Failure to make timely payment shall cause a lease to terminate automatically by operation of law. If the designated Service office is not open on the anniversary date, payment received on the next day the designated Service office is open to the public shall be deemed to be timely made. Payments made to an improper BLM or Service office shall be returned and shall not be forwarded to the designated Service office. Rental shall be payable at the following rates:

(a) The annual rental for all leases issued subsequent to December 22, 1987, shall be \$1.50 per acre or fraction thereof for the first 5 years of the lease term and \$2 per acre or fraction for any subsequent year, except as provided in paragraph (b) of this section;

(b) The annual rental for all leases issued on or before December 22, 1987, or issued pursuant to an application or offer to lease filed prior to that date shall be as stated in the lease or in regulations in effect on December 22, 1987, except:

(1) Leases issued under former subpart 3112 of this title on or after February 19, 1982, shall be subject after February 1, 1989, to annual rental in the sixth and subsequent lease years of \$2 per acre or fraction thereof;

(2) The rental rate of any lease determined after December 22, 1987, to be in a known geological structure outside of Alaska or in a favorable petroleum geological province within Alaska shall not be increased because of such determination;

(3) Exchange and renewal leases shall be subject to rental of \$2 per acre or fraction thereof upon exchange or renewal;

(c) Rental shall not be due on acreage for which royalty or minimum royalty is being paid, except on nonproducing

leases when compensatory royalty has been assessed in which case annual rental as established in the lease shall be due in addition to compensatory royalty;

(d) On terminated leases that were originally issued noncompetitively and are reinstated under § 3108.2-3 of this title, and on noncompetitive leases that were originally issued under § 3108.2-4 of this title, the annual rental shall be \$5 per acre or fraction thereof beginning with the termination date upon the filing, on or after the effective date of this regulation, of a petition to reinstate a lease or convert an abandoned, unpatented oil placer mining claim;

(e) On terminated leases that were originally issued competitively, the annual rental shall be \$10 per acre or fraction thereof beginning with the termination date upon the filing, on or after the effective date of this regulation, of a petition to reinstate a lease under § 3108.2-3 of this title; and

(f) Each succeeding time a specific lease is reinstated under § 3108.2-3 of this title, the annual rental on that lease shall increase by an additional \$5 per acre or fraction thereof for leases that were originally issued noncompetitively and by an additional \$10 per acre or fraction thereof for leases that were originally issued competitively.

[53 FR 17353, May 16, 1988 and 53 FR 22837, June 17, 1988, as amended at 61 FR 4750, Feb. 8, 1996]

### § 3103.3 Royalties.

#### § 3103.3-1 Royalty on production.

(a) Royalty on production shall be payable only on the mineral interest owned by the United States. Royalty shall be paid in amount or value of the production removed or sold as follows:

(1) 12½ percent on all leases, including exchange and renewal leases and leases issued in lieu of unpatented oil placer mining claims under § 3108.2-4 of this title, issued after December 22, 1987, except:

(i) Leases issued after December 22, 1987, resulting from offers to lease or bids filed on or before December 22, 1987, which are subject to the rates in effect on December 22, 1987; and

### § 3103.3-2

(ii) Leases issued on or before December 22, 1987, which are subject to the rates contained in the lease or in regulations at the time of issuance;

(2) 16⅔ percent on noncompetitive leases reinstated under § 3108.2-3 of this title plus an additional 2 percentage-point increase added for each succeeding reinstatement;

(3) Not less than 4 percentage points above the rate used for royalty determination contained in the lease that is reinstated or in force at the time of issuance of the lease that is reinstated for competitive leases, plus an additional 2 percentage-point increase added for each succeeding reinstatement.

(b) Leases that qualify under specific provisions of the Act of August 8, 1946 (30 U.S.C. 226c) may apply for a limitation of a 12½ percent royalty rate.

(c) The average production per well per day for oil and gas shall be determined pursuant to 43 CFR 3162.7-4.

(d) Payment of a royalty on the helium component of gas shall not convey the right to extract the helium. Applications for the right to extract helium shall be made under part 16 of this title.

[53 FR 22838, June 17, 1988]

### § 3103.3-2 Minimum royalties.

(a) A minimum royalty shall be payable at the expiration of each lease year beginning on or after a discovery of oil or gas in paying quantities on the lands leased, except that on unitized leases the minimum royalty shall be payable only on the participating acreage, at the following rates:

(1) On leases issued on or after August 8, 1946, and on those issued prior thereto if the lessee files an election under section 15 of the Act of August 8, 1946, a minimum royalty of \$1 per acre or fraction thereof in lieu of rental, except as provided in paragraph (a)(2) of this section; and

(2) On leases issued from offers filed after December 22, 1987, and on competitive leases issued from successful bids placed at oral auctions conducted after December 22, 1987, a minimum royalty in lieu of rental of not less than the amount of rental which otherwise would be required for that lease year.

### 43 CFR Ch. II (10-1-08 Edition)

(b) Minimum royalties shall not be prorated for any lands in which the United States owns a fractional interest but shall be payable on the full acreage of the lease.

(c) Minimum royalties and rentals on non-participating acreage shall be payable to the Service.

(d) The minimum royalty provisions of this section shall be applicable to leases reinstated under § 3108.2-3 of this title and leases issued under § 3108.2-4 of this title.

[48 FR 33662, July 22, 1983, as amended at 49 FR 11637, Mar. 27, 1984; 49 FR 30448, July 30, 1984; 53 FR 22838, June 17, 1988]

### § 3103.4 Production incentives.

#### § 3103.4-1 Royalty reductions.

(a) In order to encourage the greatest ultimate recovery of oil or gas and in the interest of conservation, the Secretary, upon a determination that it is necessary to promote development or that the leases cannot be successfully operated under the terms provided therein, may waive, suspend or reduce the rental or minimum royalty or reduce the royalty on an entire leasehold, or any portion thereof.

(b)(1) An application for the benefits under paragraph (a) of this section on other than stripper oil well leases or heavy oil properties must be filed by the operator/payor in the proper BLM office. (Royalty reductions specifically for stripper oil well leases or heavy oil properties are discussed in § 3103.4-2 and § 3103.4-3 respectively.) The application must contain the serial number of the leases, the names of the record title holders, operating rights owners (sublessees), and operators for each lease, the description of lands by legal subdivision and a description of the relief requested.

(2) Each application shall show the number, location and status of each well drilled, a tabulated statement for each month covering a period of not less than 6 months prior to the date of filing the application of the aggregate amount of oil or gas subject to royalty, the number of wells counted as producing each month and the average production per well per day.

(3) Every application shall contain a detailed statement of expenses and

costs of operating the entire lease, the income from the sale of any production and all facts tending to show whether the wells can be successfully operated upon the fixed royalty or rental. Where the application is for a reduction in royalty, full information shall be furnished as to whether overriding royalties, payments out of production, or similar interests are paid to others than the United States, the amounts so paid and efforts made to reduce them. The applicant shall also file agreements of the holders to a reduction of all other royalties or similar payments from the leasehold to an aggregate not in excess of one-half the royalties due the United States.

(c) Petition may be made for reduction of royalty under § 3108.2-3(f) for leases reinstated under § 3108.2-3 of this title and under § 3108.2-4(i) for non-competitive leases issued under § 3108.2-4 of this title. Petitions to waive, suspend or reduce rental or minimum royalty for leases reinstated under § 3108.2-3 of this title or for leases issued under § 3108.2-4 of this title may be made under this section.

[48 FR 33662, July 22, 1983; 48 FR 39225, Aug. 30, 1983, as amended at 49 FR 30448, July 30, 1984; 53 FR 17354, May 16, 1988; 57 FR 35973, Aug. 11, 1992; 61 FR 4750, Feb. 8, 1996]

#### § 3103.4-2 Stripper well royalty reductions.

(a)(1) A stripper well property is any Federal lease or portion thereof segregated for royalty purposes, a communitization agreement, or a participating area of a unit agreement, operated by the same operator, that produces an average of less than 15 barrels of oil per eligible well per well-day for the qualifying period.

(2) An eligible well is an oil well that produces or an injection well that injects and is integral to production for any period of time during the qualifying or subsequent 12-month period.

(3) An oil completion is a completion from which the energy equivalent of the oil produced exceeds the energy equivalent of the gas produced (including the entrained liquid hydrocarbons) or any completion producing oil and less than 60 MCF of gas per day.

(4) An injection well is a well that injects a fluid for secondary or enhanced

oil recovery, including reservoir pressure maintenance operations.

(b) Stripper oil well property royalty rate reduction shall be administered according to the following requirements and procedures.

(1) An application for the benefits under paragraph (a) of this section for stripper oil well properties is not required.

(2) Total oil production (regardless of disposition) for the subject period from the eligible wells on the property is totaled and then divided by the total number of well days or portions of days, both producing and injection days, as reported on Form MMS-3160 or MMS-4054 for the eligible wells to determine the property average daily production rate. For those properties in communitization agreements and participating areas of unit agreements that have allocated (not actual) production, the production rate for all eligible well(s) in that specific communitization agreement or participating area is determined and shall be assigned to that allocated property in that communitization agreement or participating area.

(3) Procedures to be used by operator:

(i) Qualifying determination.

(A) Calculate an average daily production rate for the property in order to verify that the property qualifies as a stripper property.

(B) The initial qualifying period for producing properties is the period August 1, 1990, through July 31, 1991. For the properties that were shut-in for 12 consecutive months or longer, the qualifying period is the 12-month production period immediately prior to the shut-in. If the property does not qualify during the initial qualifying period, it may later qualify due to production decline. In those cases, the 12-month qualifying period will be the first consecutive 12-month period beginning after August 31, 1990, during which the property qualifies.

(ii) Qualifying royalty rate calculation. If the property qualifies, use the production rate rounded down to the next whole number (e.g., 6.7 becomes 6) for the qualifying period, and apply the following formula to determine the

maximum royalty rate for oil production from the Federal leases for the life of the program.

Royalty Rate (%) =  $0.5 + (0.8 \times \text{the average daily production rate})$

The formula-calculated royalty rate shall apply to all oil production (except condensate) from the property for the first 12 months. The rate shall be effective the first day of the production month after the Minerals Management Service (MMS) receives notification. If the production rate is 15 barrels or greater, the royalty rate will be the rate in the lease terms.

(iii) Outyears royalty rate calculations.

(A) At the end of each 12-month period, the property average daily production rate shall be determined for that period. A royalty rate shall then be calculated using the formula in paragraph (b)(3)(ii) of this section.

(B) The new calculated royalty rate shall be compared to the qualifying period royalty rate. The lower of the two rates shall be used for the current period provided that the operator notifies the MMS of the new royalty rate. The new royalty rate shall not become effective until the first day of the month after the MMS receives notification. Notification shall be received on Form MMS-4377 and mailed to Minerals Management Service, P.O. Box 17110, Denver, CO 80217. If the operator does not notify the MMS of the new royalty rate within 60 days after the end of the subject 12-month period, the royalty rate for the property shall revert back to the royalty rate established as the qualifying period royalty rate, effective at the beginning of the current 12-month period.

(C) The royalty rate shall never exceed the calculated qualifying royalty rate for the life of this program.

(iv) Prohibition. For the qualifying period and any subsequent 12-month period, the production rate shall be the result of routine operational and economic factors for that period and for that property and not the result of production manipulation for the purpose of obtaining a lower royalty rate. A production rate that is determined to have resulted from production manipu-

lation will not receive the benefit of a royalty rate reduction.

(v) Certification. The applicable royalty rate shall be used by the operator/payor when submitting the required royalty reports/payments to MMS. By submitting royalty reports/payments using the royalty rate reduction benefits of this program, the operator certifies that the production rate for the qualifying and subsequent 12-month period was not subject to manipulation for the purpose of obtaining the benefit of a royalty rate reduction, and the royalty rate was calculated in accordance with the instructions and procedures in these regulations.

(vi) *Record retention.* For seven years after production on which the operator claims a royalty rate reduction for stripper well properties, the operator must retain and make available to BLM for inspection all documents on which the calculation of the applicable royalty rate under this section relies.

(vii) Agency action. If a royalty rate is improperly calculated, the MMS will calculate the correct rate and inform the operator/payors. Any additional royalties due are payable immediately upon notification. Late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102. The BLM may terminate a royalty rate reduction if it is determined that the production rate was manipulated by the operator for the purpose of receiving a royalty rate reduction. Terminations of royalty rate reductions will be effective on the effective date of the royalty rate reduction resulting from the manipulated production rate (i.e., the termination will be retroactive to the effective date of the improper reduction). The operator/payor shall pay the difference in royalty resulting from the retroactive application of the unmanipulated rate. Late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102.

(4) The royalty rate reduction provision for stripper well properties shall be effective as of October 1, 1992. If the oil price, adjusted for inflation by BLM and MMS, using the implicit price deflator for gross national product with 1991 as the base year, remains on average above \$28 per barrel, based on West Texas Intermediate crude average

**Bureau of Land Management, Interior**

**§ 3103.4-2**

posted price for a period of 6 consecutive months, the benefits of the royalty rate reduction under this section may be terminated upon 6 months' notice, published in the FEDERAL REGISTER.

(5) The Secretary will evaluate the effectiveness of the stripper well royalty reduction program and may at any time after September 10, 1997, terminate any or all royalty reductions granted under this section upon 6 months notice.

(6) The stripper well property royalty rate reduction benefits shall apply to all oil produced from the property.

(7) The royalty for gas production (including liquids produced in association with gas) for oil completions shall be calculated separately using the lease royalty rate.

(8) If the lease royalty rate is lower than the benefits provided in this stripper oil property royalty rate reduction program, the lease rate prevails.

(9) The minimum royalty provisions of § 3103.3-2 apply.

(10) Examples.

# Royalty Rate (RR) Reduction Example 1: Immediate Qualification

BILLING CODE 4310-84-C

## Explanation, Example 1

1. Property production rate per well for qualifying period (August 1, 1990-July 31, 1991) is 10 barrels of oil per day (BOPD).

2. Using the formula, the royalty rate for the first year is calculated to be 8.5 percent. This rate is also the maximum royalty rate for the life of the program.

$$8.5\% = 0.5 + (0.8 \times 10)$$

3. Production rate for the first year is 8 BOPD.

4. Using the formula, the royalty rate is calculated at 6.9 percent. Since 6.9 percent is less than the first year rate of 8.5 percent, 6.9 percent is the applicable royalty rate for the second year.

$$6.9\% = 0.5 + (0.8 \times 8)$$

## Bureau of Land Management, Interior

## § 3103.4-2

5. Production rate for the second year is 12 BOPD.

6. Using the formula, the royalty rate is calculated at 10.1 percent. Since the 8.5 percent first year royalty rate is less than 10.1 percent, the applicable royalty rate for third year is 8.5 percent.

$$10.1\% = 0.5 + (0.8 \times 12)$$

7. Production rate for the third year is 23 BOPD.

8. Since the production rate of 23 BOPD is greater than the 15 BOPD threshold for the

program, the calculated royalty rate would be the property royalty rate. However, since the 8.5 percent first year royalty rate is less than the property rate, the royalty rate for the fourth year is 8.5 percent.

9. Production rate for the fourth year is 15 BOPD.

10. Since the production is at the 15 BOPD threshold, the royalty rate would be the property royalty rate. However, since the 8.5 percent first year royalty rate is less than the lease rate, the royalty rate for the fifth year is 8.5 percent.

## Royalty Rate (RR) Reduction Example 2: Subsequent Qualification

BILLING CODE 4310-84-C

### Explanation, Example 2

1. Property production rate of 23 BOPD per well (for the August 1, 1990-July 31, 1991, qualifying period prior to the effective date of the program) is greater than the 15 BOPD which qualifies a property for a royalty rate reduction. Therefore, the property is not entitled to a royalty rate reduction for the first year of the program.

2. Property royalty rate for the first year is the rate as stated in the lease.

3. Production rate for the first year is 8 BOPD.

4. Using the formula, the royalty rate is calculated to be 6.9 percent for the second year. This rate is also the maximum royalty rate for the life of the program.

$$6.9\% = 0.5 + (0.8 \times 8)$$

**Bureau of Land Management, Interior**

**§ 3103.4-2**

5. Production rate for the second year is 12 BOPD.

6. Using the formula, the royalty rate is calculated at 10.1 percent. Since the 6.9 percent second year royalty rate is less than 10.1 percent, the applicable royalty rate for third year is 6.9 percent.

$$10.1\% = 0.5 + (0.8 \times 12)$$

7. Production rate third year is 7 BOPD.

8. Using the formula, the royalty rate is calculated at 6.1 percent. Since the 6.1 percent third year royalty rate is less than the

qualifying (maximum) rate of 6.9 percent, the royalty rate for the fourth year is 6.1 percent.

$$6.1\% = 0.5 + (0.8 \times 7)$$

9. Production rate for the fourth year is 15 BOPD.

10. Since the production is at the 15 BOPD threshold, the royalty rate would be the lease royalty rate. However, since the 6.9 percent second year royalty rate is less than the lease rate, the royalty rate for the fifth year is 6.9 percent.

## U.S. DEPARTMENT OF THE INTERIOR

**NOTE:** Reduced Royalty Rate is not effective until the month after this notification is received by the Minerals Management Service. See 43 CFR Part 3100 for complete instructions.

AREA CODE	TELEPHONE NUMBER	EXTEN.
--------------	---------------------	--------

[illegible]

13 Current period royalty rate must be compared to qualifying period royalty rate and the lower of the two rates will be the royalty rate for the subsequent year, when notification is received by MMS.

352

**Bureau of Land Management, Interior**

**§ 3103.4-3**

**§ 3103.4-3 Heavy oil royalty reductions.**

(a)(1) A heavy oil well property is any Federal lease or portion thereof segregated for royalty purposes, a communitization area, or a unit participating area, operated by the same operator, that produces crude oil with a weighted average gravity of less than 20 degrees as measured on the American Petroleum Institute (API) scale.

(2) An oil completion is a completion from which the energy equivalent of the oil produced exceeds the energy equivalent of the gas produced (including the entrained liquefiable hydrocarbons) or any completion producing oil and less than 60 MCF of gas per day.

(b) Heavy oil well property royalty rate reductions will be administered according to the following requirements and procedures:

(1) The Bureau of Land Management requires no specific application form for the benefits under paragraph (a) of this section for heavy oil well properties. However, the operator/payor must notify, in writing, the proper BLM office that it is seeking a heavy oil royalty rate reduction. The letter must contain the serial number of the affected leases (or, as appropriate, the communitization agreement number or the unit agreement name); the names of the operators for each lease; the calculated new royalty rate as determined under paragraph (b)(2) of this section; and copies of the Purchaser's State-

ments (sales receipts) to document the weighted average API gravity for a property.

(2) The operator must determine the weighted average API gravity for a property by averaging (adjusted to rate of production) the API gravities reported on the operator's Purchaser's Statement for the last 3 calendar months preceding the operator's written notice of intent to seek a royalty rate reduction, during each of which at least one sale was held. This is shown in the following 3 illustrations:

(i) If a property has oil sales every month prior to requesting the royalty rate reduction in October of 1996, the operator must submit Purchaser's Statements for July, August, and September of 1996;

(ii) If a property has sales only every 6 months, during the months of March and September, prior to requesting the rate reduction in October of 1996, the operator must submit Purchaser's Statements for the months of September 1995, and March and September 1996; and

(iii) If a property has multiple sales each month, the operator must submit Purchaser's Statements for every sale for the 3 entire calendar months immediately preceding the request for a rate reduction.

(3) The following equation must be used by the operator/payor for calculating the weighted average API gravity for a heavy oil well property:

$$\frac{(V_1 \times G_1) + (V_2 \times G_2) + (V_n \times G_n)}{V_1 + V_2 + V_n} = \text{Weighted Average API gravity for a property}$$

Where:

$V_1$ =Average Production (bbls) of Well #1 over the last 3 calendar months of sales

$V_2$ =Average Production (bbls) of Well #2 over the last 3 calendar months of sales

$V_n$ =Average Production (bbls) of each additional well ( $V_3$ ,  $V_4$ , etc.) over the last 3 calendar months of sales

$G_1$ =Average Gravity (degrees) of oil produced from Well #1 over the last 3 calendar months of sales

$G_2$ =Average Gravity (degrees) of oil produced from Well #2 over the last 3 calendar months of sales

$G_n$ =Average Gravity (degrees) of each additional well ( $G_3$ ,  $G_4$ , etc.) over the last 3 calendar months of sales

*Example:* Lease "A" has 3 wells producing at the following average rates over 3 sales months with the following associated average gravities: Well #1, 4,000 bbls, 13° API; Well #2, 6000 bbls, 21° API; Well #3, 2,000 bbls, 14° API. Using the equation above—

$$\frac{(4,000 \times 13) + (6,000 \times 21) + (2,000 \times 14)}{(4,000 + 6,000 + 2,000)} = 17.2 \text{ Weighted Average API gravity for property}$$

(4) For those properties subject to a communitization agreement or a unit participating area, the weighted average API oil gravity for the lands dedicated to that specific communitization agreement or unit participating area must be determined in the manner prescribed in paragraph (b)(3) of this section and assigned to all property subject to Federal royalties in the communitization agreement or unit participating area.

(5) The operator/payor must use the following procedures in order to obtain a royalty rate reduction under this section:

(i) *Qualifying royalty rate determination.* (A) The operator/payor must calculate the weighted average API gravity for the property proposed for the royalty rate reduction in order to verify that the property qualifies as a heavy oil well property.

(B) Properties that have removed or sold oil less than 3 times in their productive life may still qualify for this royalty rate reduction. However, no additional royalty reductions will be granted until the property has a sales history of at least 3 production months (see paragraph (b)(2) of this section).

(ii) *Calculating the qualifying royalty rate.* If the Federal leases or portions thereof (e.g., communitization or unit agreements) qualify as heavy oil property, the operator/payor must use the weighted average API gravity rounded down to the next whole degree (e.g., 11.7 degrees API becomes 11 degrees), and determine the appropriate royalty rate from the following table:

ROYALTY RATE REDUCTION FOR HEAVY OIL	
Weighted average API gravity (degrees)	Royalty Rate (percent)
6 .....	0.5
7 .....	1.4
8 .....	2.2
9 .....	3.1
10 .....	3.9
11 .....	4.8
12 .....	5.6
13 .....	6.5
14 .....	7.4
15 .....	8.2
16 .....	9.1

ROYALTY RATE REDUCTION FOR HEAVY OIL—  
Continued

Weighted average API gravity (degrees)	Royalty Rate (percent)
17 .....	9.9
18 .....	10.8
19 .....	11.6
20 .....	12.5

(iii) *New royalty rate effective date.* The new royalty rate will be effective on the first day of production 2 months after BLM receives notification by the operator/payor. The rate will apply to all oil production from the property for the next 12 months (plus the 2 calendar month grace period during which the next 12 months' royalty rate is determined in the next year). If the API oil gravity is 20 degrees or greater, the royalty rate will be the rate in the lease terms.

*Example:* BLM receives notification from an operator on June 8, 1996. There is a two month period before new royalty rate is effective—July and August. New royalty rate is effective September 1, 1996.

(iv) *Royalty rate determinations in subsequent years.* (A) At the end of each 12-month period, beginning on the first day of the calendar month the royalty rate reduction went into effect, the operator/payor must determine the weighted average API oil gravity for the property for that period. The operator/payor must then determine the royalty rate for the following year using the table in paragraph (b)(5)(ii) of this section.

(B) The operator/payor must notify BLM of its determinations under this paragraph and paragraph (b)(5)(iv)(A) of this section. The new royalty rate (effective for the next 12 month period) will become effective the first day of the third month after the prior 12 month period comes to a close, and will remain effective for 12 calendar months (plus the 2 calendar month grace period during which the next 12 months' royalty rate is determined in the next year). Notification must include copies of the Purchaser's Statements (sales

receipts) and be mailed to the proper BLM office. If the operator does not notify the BLM of the new royalty rate within 60 days after the end of the subject 12-month period, the royalty rate for the heavy oil well property will return to the rate in the lease terms.

*Example:* On September 30, 1997, at the end of a 12-month royalty reduction period, the operator/payor determines what the weighted average API oil gravity for the property for that period has been. The operator/payor then determines the new royalty rate for the next 12 month using the table in paragraph (b)(5)(ii) of this section. Given that there is a 2-month delay period for the operator/payor to calculate the new royalty rate, the new royalty rate would be effective December 1, 1997 through November 30, 1998 (plus the 2 calendar month grace period during which the next 12 months' royalty rate is determined—December 1, 1998 through January 31, 1999).

(v) *Prohibition.* Any heavy oil property reporting an API average oil gravity determined by BLM to have resulted from any manipulation of normal production or adulteration of oil sold from the property will not receive the benefit of a royalty rate reduction under this paragraph (b).

(vi) *Certification.* The operator/payor must use the applicable royalty rate when submitting the required royalty reports/payments to the Minerals Management Service (MMS). In submitting royalty reports/payments using a royalty rate reduction authorized by this paragraph (b), the operator/payor must certify that the API oil gravity for the initial and subsequent 12-month periods was not subject to manipulation or adulteration and the royalty rate was determined in accordance with the requirements and procedures of this paragraph (b).

(vii) *Agency action.* If an operator/payor incorrectly calculates the royalty rate, the BLM will determine the correct rate and notify the operator/payor in writing. Any additional royalties due are payable to MMS immediately upon receipt of this notice. Late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102. The BLM will terminate a royalty rate reduction for a property if BLM determines that the API oil gravity was manipulated or adulterated by the operator/payor. Ter-

minations of royalty rate reductions for individual properties will be effective on the effective date of the royalty rate reduction resulting from a manipulated or adulterated API oil gravity so that the termination will be retroactive to the effective date of the improper reduction. The operator/payor must pay the difference in royalty resulting from the retroactive application of the non-manipulated rate. The late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102.

(6) The BLM may suspend or terminate all royalty reductions granted under this paragraph (b) and terminate the availability of further heavy oil royalty relief under this section—

(i) Upon 6 month's notice in the FEDERAL REGISTER when BLM determines that the average oil price has remained above \$24 per barrel over a period of 6 consecutive months (based on the WTI Crude average posted prices and adjusted for inflation using the implicit price deflator for gross national product with 1991 as the base year), or

(ii) After September 10, 1999, if the Secretary determines the royalty rate reductions authorized by this paragraph (b) have not been effective in reducing the loss of otherwise recoverable reserves. This will be determined by evaluating the expected versus the actual abandonment rate, the number of enhanced recovery projects, and the amount of operator reinvestment in heavy oil production that can be attributed to this rule.

(7) The heavy oil well property royalty rate reduction applies to all Federal oil produced from a heavy oil property.

(8) If the lease royalty rate is lower than the benefits provided in this heavy oil well property royalty rate reduction program, the lease rate prevails.

(9) If the property qualifies for a stripper well property royalty rate reduction, as well as a heavy oil well property reduction, the lower of the two rates applies.

(10) The operator/payor must separately calculate the royalty for gas production (including condensate produced in association with gas) from oil

#### § 3103.4-4

completions using the lease royalty rate.

(11) The minimum royalty provisions of § 3103.3-2 will continue to apply.

[61 FR 4750, Feb. 8, 1996]

#### § 3103.4-4 Suspension of operations and/or production.

(a) A suspension of all operations and production may be directed or consented to by the authorized officer only in the interest of conservation of natural resources. A suspension of operations only or a suspension of production only may be directed or consented to by the authorized officer in cases where the lessee is prevented from operating on the lease or producing from the lease, despite the exercise of due care and diligence, by reason of *force majeure*, that is, by matters beyond the reasonable control of the lessee. Applications for any suspension shall be filed in the proper BLM office. Complete information showing the necessity of such relief shall be furnished.

(b) The term of any lease shall be extended by adding thereto the period of the suspension, and no lease shall be deemed to expire during any suspension.

(c) A suspension shall take effect as of the time specified in the direction or assent of the authorized officer, in accordance with the provisions of § 3165.1 of this title.

(d) Rental and minimum royalty payments shall be suspended during any period of suspension of all operations and production directed or assented to by the authorized officer beginning with the first day of the lease month in which the suspension of all operations and production becomes effective, or if the suspension of all operations and production becomes effective on any date other than the first day of a lease month, beginning with the first day of the lease month following such effective date. Rental and minimum royalty payments shall resume on the first day of the lease month in which the suspension of all operations and production is terminated. Where rentals are creditable against royalties and have been paid in advance, proper credit shall be allowed on the next rental or royalty due under the terms of the lease. Rental and minimum royalty payments

#### 43 CFR Ch. II (10-1-08 Edition)

shall not be suspended during any period of suspension of operations only or suspension of production only.

(e) Where all operations and production are suspended on a lease on which there is a well capable of producing in paying quantities and the authorized officer approves resumption of operations and production, such resumption shall be regarded as terminating the suspension, including the suspension of rental and minimum royalty payments, as provided in paragraph (d) of this section.

(f) The relief authorized under this section also may be obtained for any Federal lease included within an approved unit or cooperative plan of development and operation. Unit or cooperative plan obligations shall not be suspended by relief obtained under this section but shall be suspended only in accordance with the terms and conditions of the specific unit or cooperative plan.

[53 FR 17354, May 16, 1988. Redesignated at 61 FR 4750, Feb. 8, 1996]

#### Subpart 3104—Bonds

##### § 3104.1 Bond obligations.

(a) Prior to the commencement of surface disturbing activities related to drilling operations, the lessee, operating rights owner (sublessee), or operator shall submit a surety or a personal bond, conditioned upon compliance with all of the terms and conditions of the entire leasehold(s) covered by the bond, as described in this subpart. The bond amounts shall be not less than the minimum amounts described in this subpart in order to ensure compliance with the act, including complete and timely plugging of the well(s), reclamation of the lease area(s), and the restoration of any lands or surface waters adversely affected by lease operations after the abandonment or cessation of oil and gas operations on the lease(s) in accordance with, but not limited to, the standards and requirements set forth in §§ 3162.3 and 3162.5 of this title and orders issued by the authorized officer.

(b) Surety bonds shall be issued by qualified surety companies approved by the Department of the Treasury (see

## Bureau of Land Management, Interior

## § 3104.3

Department of the Treasury Circular No. 570).

(c) Personal bonds shall be accompanied by:

(1) Certificate of deposit issued by a financial institution, the deposits of which are Federally insured, explicitly granting the Secretary full authority to demand immediate payment in case of default in the performance of the terms and conditions of the lease. The certificate shall explicitly indicate on its face that Secretarial approval is required prior to redemption of the certificate of deposit by any party;

(2) Cashier's check;

(3) Certified check;

(4) Negotiable Treasury securities of the United States of a value equal to the amount specified in the bond. Negotiable Treasury securities shall be accompanied by a proper conveyance to the Secretary of full authority to sell such securities in case of default in the performance of the terms and conditions of a lease; or

(5) Irrevocable letter of credit issued by a financial institution, the deposits of which are Federally insured, for a specific term, identifying the Secretary as sole payee with full authority to demand immediate payment in the case of default in the performance of the terms and conditions of a lease.

Letters of credit shall be subject to the following conditions:

(i) The letter of credit shall be issued only by a financial institution organized or authorized to do business in the United States;

(ii) The letter of credit shall be irrevocable during its term. A letter of credit used as security for any lease upon which drilling has taken place and final approval of all abandonment has not been given, or as security for a statewide or nationwide lease bond, shall be forfeited and shall be collected by the authorized officer if not replaced by other suitable bond or letter of credit at least 30 days before its expiration date;

(iii) The letter of credit shall be payable to the Bureau of Land Management upon demand, in part or in full, upon receipt from the authorized officer of a notice of attachment stating the basis therefor, e.g., default in compliance with the lease terms and condi-

tions or failure to file a replacement in accordance with paragraph (c)(5)(ii) of this section;

(iv) The initial expiration date of the letter of credit shall be at least 1 year following the date it is filed in the proper BLM office; and

(v) The letter of credit shall contain a provision for automatic renewal for periods of not less than 1 year in the absence of notice to the proper BLM office at least 90 days prior to the originally stated or any extended expiration date.

[53 FR 22838, June 17, 1988]

### § 3104.2 Lease bond.

A lease bond may be posted by a lessee, owner of operating rights (sublessee), or operator in an amount of not less than \$10,000 for each lease conditioned upon compliance with all of the terms of the lease. Where 2 or more principals have interests in different formations or portions of the lease, separate bonds may be posted. The operator on the ground shall be covered by a bond in his/her own name as principal, or a bond in the name of the lessee or sublessee, provided that a consent of the surety, or the obligor in the case of a personal bond, to include the operator under the coverage of the bond is furnished to the Bureau office maintaining the bond.

[53 FR 22839, June 17, 1988]

### § 3104.3 Statewide and nationwide bonds.

(a) In lieu of lease bonds, lessees, owners of operating rights (sublessees), or operators may furnish a bond in an amount of not less than \$25,000 covering all leases and operations in any one State.

(b) In lieu of lease bonds or statewide bonds, lessees, owners of operating rights (sublessees), or operators may furnish a bond in an amount of not less than \$150,000 covering all leases and operations nationwide.

[53 FR 22839, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

#### **§ 3104.4**

##### **§ 3104.4 Unit operator's bond.**

In lieu of individual lease, statewide, or nationwide bonds for operations conducted on leases committed to an approved unit agreement, the unit operator may furnish a unit operator bond in the manner set forth in § 3104.1 of this title. The amount of such a bond shall be determined by the authorized officer. The format for such a surety bond is set forth in § 3186.2 of this title. Where a unit operator is covered by a nationwide or statewide bond, coverage for such a unit may be provided by a rider to such bond specifically covering the unit and increasing the bond in such amount as may be determined appropriate by the authorized officer.

[53 FR 22839, June 17, 1988]

##### **§ 3104.5 Increased amount of bonds.**

(a) When an operator desiring approval of an Application for Permit to Drill has caused the Bureau to make a demand for payment under a bond or other financial guarantee within the 5-year period prior to submission of the Application for Permit to Drill, due to failure to plug a well or reclaim lands completely in a timely manner, the authorized officer shall require, prior to approval of the Application for Permit to Drill, a bond in an amount equal to the costs as estimated by the authorized officer of plugging the well and reclaiming the disturbed area involved in the proposed operation, or in the minimum amount as prescribed in this subpart, whichever is greater.

(b) The authorized officer may require an increase in the amount of any bond whenever it is determined that the operator poses a risk due to factors, including, but not limited to, a history of previous violations, a notice from the Service that there are uncollected royalties due, or the total cost of plugging existing wells and reclaiming lands exceeds the present bond amount based on the estimates determined by the authorized officer. The increase in bond amount may be to any level specified by the authorized officer, but in no circumstances shall it exceed the total of the estimated costs of plugging and reclamation, the amount of uncollected royalties due to the Service, plus the amount of monies

#### **43 CFR Ch. II (10–1–08 Edition)**

owed to the lessor due to previous violations remaining outstanding.

[53 FR 22839, June 17, 1988]

##### **§ 3104.6 Where filed and number of copies.**

All bonds shall be filed in the proper BLM office on a current form approved by the Director. A single copy executed by the principal or, in the case of surety bonds, by both the principal and an acceptable surety is sufficient. A bond filed on a form not currently in use shall be acceptable, unless such form has been declared obsolete by the Director prior to the filing of such bond. For purposes of §§ 3104.2 and 3104.3(a) of this title, bonds or bond riders shall be filed in the Bureau State office having jurisdiction of the lease or operations covered by the bond or rider. Nationwide bonds may be filed in any Bureau State office (See § 1821.2-1).

[53 FR 17354, May 16, 1988]

##### **§ 3104.7 Default.**

(a) Where, upon a default, the surety makes a payment to the United States of an obligation incurred under a lease, the face amount of the surety bond or personal bonds and the surety's liability thereunder shall be reduced by the amount of such payment.

(b) After default, where the obligation in default equals or is less than the face amount of the bond(s), the principal shall either post a new bond or restore the existing bond(s) to the amount previously held or a larger amount as determined by the authorized officer. In lieu thereof, the principal may file separate or substitute bonds for each lease covered by the deficient bond(s). Where the obligation incurred exceeds the face amount of the bond(s), the principal shall make full payment to the United States for all obligations incurred that are in excess of the face amount of the bond(s) and shall post a new bond in the amount previously held or such larger amount as determined by the authorized officer. The restoration of a bond or posting of a new bond shall be made within 6 months or less after receipt of notice from the authorized officer. Failure to comply with these requirements may subject all leases covered

## Bureau of Land Management, Interior

## § 3105.2-3

by such bond(s) to cancellation under the provisions of § 3108.3 of this title.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17354, May 16, 1988]

### § 3104.8 Termination of period of liability.

The authorized officer shall not give consent to termination of the period of liability of any bond unless an acceptable replacement bond has been filed or until all the terms and conditions of the lease have been met.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17355, May 16, 1988; 53 FR 31867, Aug. 22, 1988]

## Subpart 3105—Cooperative Conservation Provisions

### § 3105.1 Cooperative or unit agreement.

The suggested contents of such an agreement and the procedures for obtaining approval are contained in 43 CFR part 3180.

### § 3105.2 Communitization or drilling agreements.

#### § 3105.2-1 Where filed.

(a) Requests to communitize separate tracts shall be filed, in triplicate, with the proper BLM office.

(b) Where a duly executed agreement is submitted for final Departmental approval, a minimum of 3 signed counterparts shall be submitted. If State lands are involved, 1 additional counterpart shall be submitted.

#### § 3105.2-2 Purpose.

When a lease or a portion thereof cannot be independently developed and operated in conformity with an established well-spacing or well-development program, the authorized officer may approve communitization or drilling agreements for such lands with other lands, whether or not owned by the United States, upon a determination that it is in the public interest. Operations or production under such an agreement shall be deemed to be operations or production as to each lease committed thereto.

### § 3105.2-3 Requirements.

(a) The communitization or drilling agreement shall describe the separate tracts comprising the drilling or spacing unit, shall show the apportionment of the production or royalties to the several parties and the name of the operator, and shall contain adequate provisions for the protection of the interests of the United States. The agreement shall be signed by or on behalf of all necessary parties and shall be filed prior to the expiration of the Federal lease(s) involved in order to confer the benefits of the agreement upon such lease(s).

(b) The agreement shall be effective as to the Federal lease(s) involved only if approved by the authorized officer. Approved communitization agreements are considered effective from the date of the agreement or from the date of the onset of production from the communitized formation, whichever is earlier, except when the spacing unit is subject to a State pooling order after the date of first sale, then the effective date of the agreement may be the effective date of the order.

(c) The public interest requirement for an approved communitization agreement shall be satisfied only if the well dedicated thereto has been completed for production in the communitized formation at the time the agreement is approved or, if not, that the operator thereafter commences and/or diligently continues drilling operations to a depth sufficient to test the communitized formation or establish to the satisfaction of the authorized officer that further drilling of the well would be unwarranted or impracticable. If an application is received for voluntary termination of a communitization agreement during its fixed term or such an agreement automatically expires at the end of its fixed term without the public interest requirement having been satisfied, the approval of that agreement by the authorized officer shall be invalid and no Federal lease shall be eligible for extension under § 3107.4 of this title.

[53 FR 17355, May 16, 1988]

## **§ 3105.3**

### **§ 3105.3 Operating, drilling or development contracts.**

#### **§ 3105.3-1 Where filed.**

A contract submitted for approval under this section shall be filed with the proper BLM office, together with enough copies to permit retention of 5 copies by the Department after approval.

#### **§ 3105.3-2 Purpose.**

Approval of operating, drilling or development contracts ordinarily shall be granted only to permit operators or pipeline companies to enter into contracts with a number of lessees sufficient to justify operations on a scale large enough to justify the discovery, development, production or transportation of oil or gas and to finance the same.

#### **§ 3105.3-3 Requirements.**

The contract shall be accompanied by a statement showing all the interests held by the contractor in the area or field and the proposed or agreed plan for development and operation of the field. All the contracts held by the same contractor in the area or field shall be submitted for approval at the same time and full disclosure of the projects made.

### **§ 3105.4 Combination for joint operations or for transportation of oil.**

#### **§ 3105.4-1 Where filed.**

An application under this section together with sufficient copies to permit retention of 5 copies by the Department after approval shall be filed with the proper BLM office.

[48 FR 33662, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984]

#### **§ 3105.4-2 Purpose.**

Upon obtaining approval of the authorized officer, lessees may combine their interests in leases for the purpose of constructing and carrying on the business of a refinery or of establishing and constructing as a common carrier a pipeline or lines or railroads to be operated and used by them jointly in the transportation of oil or gas from their wells or from the wells of other lessees.

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 3105.4-3 Requirements.**

The application shall show a reasonable need for the combination and that it will not result in any concentration of control over the production or sale of oil and gas which would be inconsistent with the anti-monopoly provisions of law.

#### **§ 3105.4-4 Rights-of-way.**

Rights-of-way for pipelines may be granted as provided in part 2880 of this title.

### **§ 3105.5 Subsurface storage of oil and gas.**

#### **§ 3105.5-1 Where filed.**

(a) Applications for subsurface storage shall be filed in the proper BLM office.

(b) Enough copies of the final agreement signed by all the parties in interest shall be submitted to permit the retention of 5 copies by the Department after approval.

#### **§ 3105.5-2 Purpose.**

In order to avoid waste and to promote conservation of natural resources, the Secretary, upon application by the interested parties, may authorize the subsurface storage of oil and gas, whether or not produced from lands owned by the United States. Such authorization shall provide for the payment of such storage fee or rental on the stored oil or gas as may be determined adequate in each case, or, in lieu thereof, for a royalty other than that prescribed in the lease when such stored oil or gas is produced in conjunction with oil or gas not previously produced.

#### **§ 3105.5-3 Requirements.**

The agreement shall disclose the ownership of the lands involved, the parties in interest, the storage fee, rental or royalty offered to be paid for such storage and all essential information showing the necessity for such project.

#### **§ 3105.5-4 Extension of lease term.**

Any lease used for the storage of oil or gas shall be extended for the period of storage under an approved agreement. The obligation to pay annual

## Bureau of Land Management, Interior

## § 3106.4-1

lease rent continues during the extended period.

### § 3105.6 Consolidation of leases.

BLM may approve consolidation of leases if we determine that there is sufficient justification and it is in the public interest. Each application for a consolidation of leases must include payment of the processing fee found in the fee schedule in §3000.12 of this chapter. Each application for consolidation of leases shall be considered on its own merits. Leases to different lessees for different terms, rental and royalty rates, and those containing provisions required by law that cannot be reconciled, shall not be consolidated. The effective date of a consolidated lease shall be that of the oldest lease involved in the consolidation.

[53 FR 17355, May 16, 1988, as amended at 70 FR 58874, Oct. 7, 2005]

## Subpart 3106—Transfers by Assignment, Sublease or Otherwise

SOURCE: 53 FR 17355, May 16, 1988, unless otherwise noted.

### § 3106.1 Transfers, general.

(a) Leases may be transferred by assignment or sublease as to all or part of the acreage in the lease or as to either a divided or undivided interest therein. An assignment of a separate zone or deposit, or of part of a legal subdivision, shall be disapproved.

(b) An assignment of less than 640 acres outside Alaska or of less than 2,560 acres within Alaska shall be disapproved unless the assignment constitutes the entire lease or is demonstrated to further the development of oil and gas to the satisfaction of the authorized officer. Execution and submission of a request for approval of such an assignment shall certify that the assignment would further the development of oil and gas, subject to the provisions of §3102.5-3 of this title. The rights of the transferee to a lease or an interest therein shall not be recognized by the Department until the transfer has been approved by the authorized officer. A transfer may be withdrawn in writing, signed by the transferor and

the transferee, if the transfer has not been approved by the authorized officer. A request for approval of a transfer of a lease or interest in a lease shall be filed within 90 days from the date of its execution. The 90-day filing period shall begin on the date the transferor signs and dates the transfer. If the transfer is filed after the 90th day, the authorized officer may require verification that the transfer is still in force and effect. A transfer of production payments or overriding royalty or other similar payments, arrangements, or interests shall be filed in the proper BLM office but shall not require approval.

(c) No transfer of an offer to lease or interest in a lease shall be approved prior to the issuance of the lease.

[53 FR 22839, June 17, 1988]

### § 3106.2 Qualifications of transferees.

Transferees shall comply with the provisions of subpart 3102 of this title and post any bond that may be required.

### § 3106.3 Fees.

Each transfer of record title or of operating rights (sublease) for each lease must include payment of the processing fee for assignments and transfers found in the fee schedule in §3000.12 of this chapter. Each request for a transfer to an heir or devisee, request for a change of name, or notification of a corporate merger under §3106.8, must include payment of the processing fee for name changes, corporate mergers or transfers to heir/devisee found in the fee schedule in §3000.12 of this chapter. Each transfer of overriding royalty or payment out of production must include payment of the processing fee for overriding royalty transfers or payments out of productions found in the fee schedule in §3000.12 of this chapter for each lease to which it applies.

[70 FR 58874, Oct. 7, 2005]

### § 3106.4 Forms.

#### § 3106.4-1 Transfers of record title and of operating rights (subleases).

Each transfer of record title or of an operating right (sublease) shall be filed

## § 3106.4-2

with the proper BLM office on a current form approved by the Director or exact reproductions of the front and back of such form. A transfer filed on a form not currently in use shall be acceptable, unless such form has been declared obsolete by the Director prior to the filing of the transfer. A separate form for each transfer, in triplicate, originally executed shall be filed for each lease out of which a transfer is made. Only 1 originally executed copy of a transferee's request for approval for each transfer shall be required, including in those instances where several transfers to a transferee have been submitted at the same time (See also § 3106.4-3). Copies of documents other than the current form approved by the Director shall not be submitted. However, reference(s) to other documents containing information affecting the terms of the transfer may be made on the submitted form.

### § 3106.4-2 Transfers of other interests, including royalty interests and production payments.

(a) Each transfer of overriding royalty interest, payment out of production or similar interests created or reserved in a lease in conjunction with a transfer of record title or of operating rights (sublease) shall be described for each lease on the current form when filed.

(b) Each transfer of overriding royalty interest, payment out of production or similar interests created or reserved in a lease independently of a transfer of record title or of operating rights (sublease), if not filed on the current form, shall be described and shall include the transferee's executed statement as to his/her qualifications under subpart 3102 of this title. A single executed copy of each such transfer of other interests for each lease shall be filed with the proper BLM office.

### § 3106.4-3 Mass transfers.

(a) A mass transfer may be utilized in lieu of the provisions of §§ 3106.4-1 and 3106.4-2 of this title when a transferor transfers interests of any type in a large number of Federal leases to the same transferee.

(b) Three originally executed copies of the mass transfer shall be filed with

## 43 CFR Ch. II (10-1-08 Edition)

each proper BLM office administering any lease affected by the mass transfer. The transfer shall be on a current form approved by the Director or an exact reproduction of both sides thereof, with an exhibit attached to each copy listing the following for each lease:

(1) The serial number;

(2) The type and percent of interest being conveyed; and

(3) A description of the lands affected by the transfer in accordance with § 3106.5 of this title.

(c) One reproduced copy of the form required by paragraph (b) of this section shall be filed with the proper BLM office for each lease involved in the mass transfer. A copy of the exhibit for each lease may be limited to line items pertaining to individual leases as long as that line item includes the information required by paragraph (b) of this section.

(d) Include with your mass transfer the processing fee for assignments and transfers found in the fee schedule in § 3000.12 of this chapter for each such interest transferred for each lease.

[53 FR 17355, May 16, 1988, as amended at 70 FR 58874, Oct. 7, 2005]

### § 3106.5 Description of lands.

Each transfer of record title shall describe the lands involved in the same manner as the lands are described in the lease or in the manner required by § 3110.5 of this title, except no land description is required when 100 percent of the entire area encompassed within a lease is conveyed.

[48 FR 33662, July 22, 1983, as amended at 55 FR 12350, Apr. 3, 1990]

### § 3106.6 Bonds.

#### § 3106.6-1 Lease bond.

Where a lease bond is maintained by the lessee or operating rights owner (sublessee) in connection with a particular lease, the transferee of record title interest or operating rights in such lease shall furnish, if bond coverage continues to be required, either a proper bond or consent of the surety under the existing bond to become co-principal on such bond if the transferor's bond does not expressly contain such consent. Where bond coverage is

provided by an operator, the new operator shall furnish an appropriate replacement bond or provide evidence of consent of the surety under the existing bond to become co-principal on such bond.

**§ 3106.6-2 Statewide/nationwide bond.**

If the transferee is maintaining a statewide or nationwide bond, a lease bond shall not be required, but the amount of the bond may be increased to an amount determined by the authorized officer in accordance with the provisions of § 3104.5 of this title.

**§ 3106.7 Approval of transfer.**

**§ 3106.7-1 Failure to qualify.**

No transfer of record title or of operating rights (sublease) shall be approved if the transferee or any other parties in interest are not qualified to hold the transferred interest(s), or if the bond, should one be required, is insufficient. Transfers are approved for administrative purposes only. Approval does not warrant or certify that either party to a transfer holds legal or equitable title to a lease.

**§ 3106.7-2 If I transfer my lease, what is my continuing obligation?**

(a) You are responsible for performing all obligations under the lease until the date BLM approves an assignment of your record title interest or transfer of your operating rights.

(b) After BLM approves the assignment or transfer, you will continue to be responsible for lease obligations that accrued before the approval date, whether or not they were identified at the time of the assignment or transfer. This includes paying compensatory royalties for drainage. It also includes responsibility for plugging wells and abandoning facilities you drilled, installed, or used before the effective date of the assignment or transfer.

[66 FR 1892, Jan. 10, 2001]

**§ 3106.7-3 Lease account status.**

A transfer of record title or of operating rights (sublease) in a producing lease shall not be approved unless the lease account is in good standing.

**§ 3106.7-4 Effective date of transfer.**

The signature of the authorized officer on the official form shall constitute approval of the transfer of record title or of operating rights (sublease) which shall take effect as of the first day of the lease month following the date of filing in the proper BLM office of all documents and statements required by this subpart and an appropriate bond, if one is required.

**§ 3106.7-5 Effect of transfer.**

A transfer of record title to 100 percent of a portion of the lease segregates the transferred portion and the retained portion into separate leases. Each resulting lease retains the anniversary date and the terms and conditions of the original lease. A transfer of an undivided record title interest or a transfer of operating rights (sublease) shall not segregate the transferred and retained portions into separate leases.

**§ 3106.7-6 If I acquire a lease by an assignment or transfer, what obligations do I agree to assume?**

(a) If you acquire record title interest in a Federal lease, you agree to comply with the terms of the original lease during your lease tenure. You assume the responsibility to plug and abandon all wells which are no longer capable of producing, reclaim the lease site, and remedy all environmental problems in existence and that a purchaser exercising reasonable diligence should have known at the time. You must also maintain an adequate bond to ensure performance of these responsibilities.

(b) If you acquire operating rights in a Federal lease, you agree to comply with the terms of the original lease as it applies to the area or horizons in which you acquired rights. You must plug and abandon all unplugged wells, reclaim the lease site, and remedy all environmental problems in existence and that a purchaser exercising reasonable diligence should have known at the time you receive the transfer. You must also maintain an adequate bond to ensure performance of these responsibilities.

[66 FR 1892, Jan. 10, 2001]

## **§ 3106.8**

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 3106.8 Other types of transfers.**

#### **§ 3106.8–1 Heirs and devisees.**

(a) If an offeror, applicant, lessee or transferee dies, his/her rights shall be transferred to the heirs, devisees, executor or administrator of the estate, as appropriate, upon the filing of a statement that all parties are qualified to hold a lease in accordance with subpart 3102 of this title. Include the processing fee for transfers to heir/devisee found in the fee schedule in § 3000.12 of this chapter with your request to transfer lease rights. A bond rider or replacement bond may be required for any bond(s) previously furnished by the decedent.

(b) Any ownership or interest otherwise forbidden by the regulations in this group which may be acquired by descent, will, judgement or decree may be held for a period not to exceed 2 years after its acquisition. Any such forbidden ownership or interest held for a period of more than 2 years after acquisition shall be subject to cancellation.

[53 FR 17355, May 16, 1988, as amended at 70 FR 58874, Oct. 7, 2005]

#### **§ 3106.8–2 Change of name.**

A change of name of a lessee shall be reported to the proper BLM office. Include the processing fee for name change found in the fee schedule in § 3000.12 of this chapter with your notice of name change. The notice of name change shall be submitted in writing and be accompanied by a list of the serial numbers of the leases affected by the name change. If a bond(s) has been furnished, change of name may be made by surety consent or a rider to the original bond or by a replacement bond.

[53 FR 17355, May 16, 1988, as amended at 70 FR 58874, Oct. 7, 2005]

#### **§ 3106.8–3 Corporate merger.**

Where a corporate merger affects leases situated in a State where the transfer of property of the dissolving corporation to the surviving corporation is accomplished by operation of law, no transfer of any affected lease interest is required. A notification of the merger shall be furnished with a

list, by serial number, of all lease interests affected. Include the processing fee for corporate merger found in the fee schedule in § 3000.12 of this chapter with your notification of a corporate merger. A bond rider or replacement bond conditioned to cover the obligations of all affected corporations may be required by the authorized officer as a prerequisite to recognition of the merger.

[53 FR 17355, May 16, 1988, as amended at 70 FR 58874, Oct. 7, 2005]

### **Subpart 3107—Continuation, Extension or Renewal**

#### **§ 3107.1 Extension by drilling.**

Any lease on which actual drilling operations were commenced prior to the end of its primary term and are being diligently prosecuted at the end of the primary term or any lease which is part of an approved communitization agreement or cooperative or unit plan of development or operation upon which such drilling takes place, shall be extended for 2 years subject to the rental being timely paid as required by § 3103.2 of this title, and subject to the provisions of § 3105.2–3 and § 3186.1 of this title, if applicable. Actual drilling operations shall be conducted in a manner that anyone seriously looking for oil or gas could be expected to make in that particular area, given the existing knowledge of geologic and other pertinent facts. In drilling a new well on a lease or for the benefit of a lease under the terms of an approved agreement or plan, it shall be taken to a depth sufficient to penetrate at least 1 formation recognized in the area as potentially productive of oil or gas, or where an existing well is reentered, it shall be taken to a depth sufficient to penetrate at least 1 new and deeper formation recognized in the area as potentially productive of oil or gas. The authorized officer may determine that further drilling is unwarranted or impracticable.

[48 FR 33662, July 22, 1983, as amended at 49 FR 2113, Jan. 18, 1984; 53 FR 17357, May 16, 1988; 53 FR 22839, June 17, 1988]

## Bureau of Land Management, Interior

## § 3107.4

### § 3107.2 Production.

#### § 3107.2-1 Continuation by production.

A lease shall be extended so long as oil or gas is being produced in paying quantities.

#### § 3107.2-2 Cessation of production.

A lease which is in its extended term because of production in paying quantities shall not terminate upon cessation of production if, within 60 days thereafter, reworking or drilling operations on the leasehold are commenced and are thereafter conducted with reasonable diligence during the period of nonproduction. The 60-day period commences upon receipt of notification from the authorized officer that the lease is not capable of production in paying quantities.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17357, May 16, 1988; 53 FR 22840, June 17, 1988]

#### § 3107.2-3 Leases capable of production.

No lease for lands on which there is a well capable of producing oil or gas in paying quantities shall expire because the lessee fails to produce the same, unless the lessee fails to place the lease in production within a period of not less than 60 days as specified by the authorized officer after receipt of notice by certified mail from the authorized officer to do so. Such production shall be continued unless and until suspension of production is granted by the authorized officer.

[48 FR 33662, July 22, 1983, as amended at 53 FR 22840, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

### § 3107.3 Extension for terms of cooperative or unit plan.

#### § 3107.3-1 Leases committed to plan.

Any lease or portion of a lease, except as described in § 3107.3-3 of this title, committed to a cooperative or unit plan that contains a general provision for allocation of oil or gas shall continue in effect so long as the lease or portion thereof remains subject to the plan; *Provided*, That there is production of oil or gas in paying quantities under the plan prior to the expiration date of such lease.

### § 3107.3-2 Segregation of leases committed in part.

Any lease committed after July 29, 1954, to any cooperative or unit plan, which covers lands within and lands outside the area covered by the plan, shall be segregated, as of the effective date of unitization, into separate leases; one covering the lands committed to the plan, the other lands not committed to the plan. The segregated lease covering the nonunitized portion of the lands shall continue in force and effect for the term of the lease or for 2 years from the date of segregation, whichever is longer. However, for any lease segregated from a unit, if the public interest requirement for the unit is not satisfied, such segregation shall be declared invalid by the authorized officer. Further, the segregation shall be conditioned to state that no operations shall be approved on the segregated portion of the lease past the expiration date of the original lease until the public interest requirement of the unit has been satisfied.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17357, May 16, 1988]

### § 3107.3-3 20-year lease or any renewal thereof.

Any lease issued for a term of 20 years, or any renewal thereof, committed to a cooperative or unit plan approved by the Secretary, or any portion of such lease so committed, shall continue in force so long as committed to the plan, beyond the expiration date of its primary term. This provision does not apply to that portion of any such lease which is not included in the cooperative or unit plan unless the lease was so committed prior to August 8, 1946.

### § 3107.4 Extension by elimination.

Any lease eliminated from any approved or prescribed cooperative or unit plan or from any communization or drilling agreement authorized by the Act and any lease in effect at the termination of such plan or agreement, unless relinquished, shall continue in effect for the original term of the lease or for 2 years after its elimination from the plan or agreement or after the termination of the plan or agreement,

## **§ 3107.5**

whichever is longer, and for so long thereafter as oil or gas is produced in paying quantities. No lease shall be extended if the public interest requirement for an approved cooperative or unit plan or a communitization agreement has not been satisfied as determined by the authorized officer.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17357, May 16, 1988]

### **§ 3107.5 Extension of leases segregated by assignment.**

#### **§ 3107.5-1 Extension after discovery on other segregated portions.**

Any lease segregated by assignment, including the retained portion, shall continue in effect for the primary term of the original lease, or for 2 years after the date of first discovery of oil or gas in paying quantities upon any other segregated portion of the original lease, whichever is the longer period.

#### **§ 3107.5-2 Undeveloped parts of leases in their extended term.**

Undeveloped parts of leases retained or assigned out of leases which are in their extended term shall continue in effect for 2 years after the effective date of assignment, provided the parent lease was issued prior to September 2, 1960.

#### **§ 3107.5-3 Undeveloped parts of producing leases.**

Undeveloped parts of leases retained or assigned out of leases which are extended by production, actual or suspended, or the payment of compensatory royalty shall continue in effect for 2 years after the effective date of assignment and for so long thereafter as oil or gas is produced in paying quantities.

#### **§ 3107.6 Extension of reinstated leases.**

Where a reinstatement of a terminated lease is granted under § 3108.2 of this title and the authorized officer finds that the reinstatement will not afford the lessee a reasonable opportunity to continue operations under the lease, the authorized officer may extend the term of such lease for a period sufficient to give the lessee such an opportunity. Any extension shall be subject to the following conditions:

## **43 CFR Ch. II (10-1-08 Edition)**

(a) No extension shall exceed a period equal to the unexpired portion of the lease or any extension thereof remaining at the date of termination.

(b) When the reinstatement occurs after the expiration of the term or extension thereof, the lease may be extended from the date the authorized officer grants the petition, but in no event for more than 2 years from the date the reinstatement is authorized and so long thereafter as oil or gas is produced in paying quantities.

[48 FR 33662, July 22, 1983, as amended at 49 FR 30448, July 30, 1984; 53 FR 17357, May 16, 1988]

### **§ 3107.7 Exchange leases: 20-year term.**

Any lease which issued for a term of 20 years, or any renewal thereof, or which issued in exchange for a 20-year lease prior to August 8, 1946, may be exchanged for a new lease. Such new lease shall be issued for a primary term of 5 years. The lessee must file an application to exchange a lease for a new lease, in triplicate, at the proper BLM office. The application must show full compliance by the applicant with the terms of the lease and applicable regulations, and must include payment of the processing fee for lease renewal or exchange found in the fee schedule in § 3000.12 of this chapter. Execution of the exchange lease by the applicant is certification of compliance with § 3102.5 of this title.

[48 FR 33662, July 22, 1983, as amended at 53 FR 22840, June 17, 1988; 70 FR 58874, Oct. 7, 2005]

### **§ 3107.8 Renewal leases.**

#### **§ 3107.8-1 Requirements.**

(a) Twenty year leases and renewals thereof may be renewed for successive terms of 10 years. Any application for renewal of a lease shall be made by the lessee, and may be joined in or consented to by the operator. The application shall show whether all monies due the United States have been paid and whether operations under the lease have been conducted in compliance with the applicable regulations.

(b) The applicant or his/her operator shall furnish, in triplicate, with the application for renewal, copies of all

## Bureau of Land Management, Interior

## § 3108.1

agreements not theretofore filed providing for overriding royalties or other payments out of production from the lease which will be in existence as of the date of its expiration.

[48 FR 33662, July 22, 1983, as amended at 53 FR 22840, June 17, 1988]

### § 3107.8-2 Application.

File your application to renew your lease in triplicate in the proper BLM office at least 90 days, but not more than 6 months, before your lease expires. Include the processing fee for lease renewal or exchange found in the fee schedule in § 3000.12 of this chapter.

[70 FR 58874, Oct. 7, 2005]

### § 3107.8-3 Approval.

(a) Copies of the renewal lease, in triplicate, dated the first day of the month following the month in which the original lease terminated, shall be forwarded to the lessee for execution. Upon receipt of the executed lease forms, which constitutes certification of compliance with § 3102.5 of this title, and any required bond, the authorized officer shall execute the lease and deliver 1 copy to the lessee.

(b) If overriding royalties and payments out of production or similar interests in excess of 5 percent of gross production constitute a burden to lease operations that will retard, or impair, or cause premature abandonment, the lease application shall be suspended until overriding royalties and payments out of production or similar interests are reduced to not more than 5 percent of the value of the production. If the holders of outstanding overriding royalty or other interests payable out of production, the operator and the lessee are unable to enter into a mutually fair and equitable agreement, any of the parties may apply for a hearing at which all interested parties may be heard and written statements presented. Thereupon, a final decision will be rendered by the Department, outlining the conditions acceptable to it as a basis for a fair and reasonable adjustment of the excessive overriding royalties and other payments out of production and an opportunity shall be afforded within a fixed period of time to submit proof that such adjustment

has been effected. Upon failure to submit such proof within the time so fixed, the application for renewal shall be denied.

[48 FR 33662, July 22, 1983, as amended at 53 FR 17357, May 16, 1988; 53 FR 22840, June 17, 1988]

### § 3107.9 Other types.

#### § 3107.9-1 Payment of compensatory royalty.

The payment of compensatory royalty shall extend the term of any lease for the period during which such compensatory royalty is paid and for a period of 1 year from the discontinuance of such payments.

#### § 3107.9-2 Subsurface storage of oil and gas.

See § 3105.5-4 of this title.

## Subpart 3108—Relinquishment, Termination, Cancellation

### § 3108.1 As a lessee, may I relinquish my lease?

You may relinquish your lease or any legal subdivision of your lease at any time. You must file a written relinquishment with the BLM State Office with jurisdiction over your lease. All lessees holding record title interests in the lease must sign the relinquishment. A relinquishment takes effect on the date you file it with BLM. However, you and the party that issued the bond will continue to be obligated to:

(a) Make payments of all accrued rentals and royalties, including payments of compensatory royalty due for all drainage that occurred before the relinquishments;

(b) Place all wells to be relinquished in condition for suspension or abandonment as BLM requires; and

(c) Complete reclamation of the leased sites after stopping or abandoning oil and gas operations on the lease, under a plan approved by the appropriate surface management agency.

[66 FR 1892, Jan. 10, 2001]

## § 3108.2

## 43 CFR Ch. II (10–1–08 Edition)

### § 3108.2 Termination by operation of law and reinstatement.

### § 3108.2–2 Reinstatement at existing rental and royalty rates: Class I reinstatements.

#### § 3108.2–1 Automatic termination.

(a) Except as provided in paragraph (b) of this section, any lease on which there is no well capable of producing oil or gas in paying quantities shall automatically terminate by operation of law (30 U.S.C. 188) if the lessee fails to pay the rental at the designated Service office on or before the anniversary date of such lease. However, if the designated Service office is closed on the anniversary date, a rental payment received on the next day the Service office is open to the public shall be considered as timely made.

(b) If the rental payment due under a lease is paid on or before its anniversary date but the amount of the payment is deficient and the deficiency is nominal as defined in this section, or the amount of payment made was determined in accordance with the rental or acreage figure stated in a bill rendered by the designated Service office, or decision rendered by the authorized officer, and such figure is found to be in error resulting in a deficiency, such lease shall not have automatically terminated unless the lessee fails to pay the deficiency within the period prescribed in the Notice of Deficiency provided for in this section. A deficiency shall be considered nominal if it is not more than \$100 or more than 5 percent of the total payment due, whichever is less. The designated Service office shall send a Notice of Deficiency to the lessee. The Notice shall be sent by certified mail, return receipt requested, and shall allow the lessee 15 days from the date of receipt or until the due date, whichever is later, to submit the full balance due to the designated Service office. If the payment required by the Notice is not paid within the time allowed, the lease shall have terminated by operation of law as of its anniversary date.

[48 FR 33662, July 22, 1983, as amended at 49 FR 11637, Mar. 27, 1984; 49 FR 30448, July 30, 1984; 53 FR 17357, May 16, 1988]

(a) Except as hereinafter provided, the authorized officer may reinstate a lease which has terminated for failure to pay on or before the anniversary date the full amount of rental due, provided that:

(1) Such rental was paid or tendered within 20 days after the anniversary date; and

(2) It is shown to the satisfaction of the authorized officer that the failure to timely submit the full amount of the rental due was either justified or not due to a lack of reasonable diligence on the part of the lessee (reasonable diligence shall include a rental payment which is postmarked by the U.S. Postal Service, common carrier, or their equivalent (not including private postal meters) on or before the lease anniversary date or, if the designated Service office is closed on the anniversary date, postmarked on the next day the Service office is open to the public); and

(3) A petition for reinstatement, the processing fee for lease reinstatement, Class I, found in the fee schedule in § 3000.12 of this chapter, and the required rental, including any back rental that has accrued from the date of the termination of the lease, are filed with the proper BLM office within 60 days after receipt of Notice of Termination of Lease due to late payment of rental. If a terminated lease becomes productive prior to the time the lease is reinstated, all required royalty that has accrued shall be paid to the Service.

(b) The burden of showing that the failure to pay on or before the anniversary date was justified or not due to lack of reasonable diligence shall be on the lessee.

(c) Under no circumstances shall a terminated lease be reinstated if:

(1) A valid oil and gas lease has been issued prior to the filing of a petition for reinstatement affecting any of the lands covered by that terminated lease; or

(2) The oil and gas interests of the United States in the lands have been disposed of or otherwise have become unavailable for leasing.

## Bureau of Land Management, Interior

## § 3108.2-3

(d) The authorized officer shall not issue a lease for lands which have been covered by a lease which terminated automatically until 90 days after the date of termination.

[49 FR 30448, July 30, 1984, as amended at 53 FR 17357, May 16, 1988; 70 FR 58874, Oct. 7, 2005]

### **§ 3108.2-3 Reinstatement at higher rental and royalty rates: Class II reinstatements.**

(a) The authorized officer may, if the requirements of this section are met, reinstate an oil and gas lease which was terminated by operation of law for failure to pay rental timely when the rental was not paid or tendered within 20 days of the termination date and it is shown to the satisfaction of the authorized officer that such failure was justified or not due to a lack of reasonable diligence, or no matter when the rental was paid, it is shown to the satisfaction of the authorized officer that such failure was inadvertent.

(b)(1) Leases that terminate on or before August 8, 2005, may be reinstated if the required back rental and royalty at the increased rates accruing from the date of termination, together with a petition for reinstatement, are filed on or before the earlier of:

(i) Sixty days after the receipt of the Notice of Termination sent to the lessee of record, whether by return of check or any form of actual notice; or

(ii) Fifteen months after termination of the lease.

(2) Leases that terminate after August 8, 2005 may be reinstated if the required back rental and royalty at the increased rates accruing from the date of termination, together with a petition for reinstatement, are filed on or before the earlier of:

(i) Sixty days after the last date that any lessee of record received Notice of Termination by certified mail; or

(ii) Twenty months after termination of the lease.

(3) After determining that the requirements for filing of the petition for reinstatement have been timely met, the authorized officer may reinstate the lease if:

(i) No valid lease has been issued prior to the filing of the petition for reinstatement affecting any of the lands

covered by the terminated lease, whether such lease is still in effect or not;

(ii) The oil and gas interests of the United States in the lands have not been disposed of or have not otherwise become unavailable for leasing;

(iii) Payment of all back rentals and royalties at the rates established for the reinstated lease, including the release to the United States of funds being held in escrow, as appropriate;

(iv) An agreement has been signed by the lessee and attached to and made a part of the lease specifying future rentals at the applicable rates specified for reinstated leases in § 3103.2-2 of this title and future royalties at the rates set in § 3103.3-1 of this title for all production removed or sold from such lease or shared by such lease from production allocated to the lease by virtue of its participation in a unit or communitization agreement or other form of approved joint development agreement or plan;

(v) A notice of the proposed reinstatement of the terminated lease and the terms and conditions of reinstatement has been published in the FEDERAL REGISTER at least 30 days prior to the date of reinstatement for which the lessee shall reimburse the Bureau for the full costs incurred in the publishing of said notice; and

(vi) The lessee has paid the Bureau a nonrefundable administrative fee of \$500.

(c) The authorized officer shall not, after the receipt of a petition for reinstatement, issue a new lease affecting any of the lands covered by the terminated lease until all action on the petition is final.

(d) The authorized officer shall furnish to the Chairpersons of the Committee on Interior and Insular Affairs of the House of Representatives and of the Committee on Energy and Natural Resources of the Senate, at least 30 days prior to the date of reinstatement, a copy of the notice, together with information concerning rental, royalty, volume of production, if any, and any other matter which the authorized officer considers significant in making the determination to reinstate.

(e) If the authorized officer reinstates the lease, the reinstatement shall be as

of the date of termination, for the unexpired portion of the original lease or any extension thereof remaining on the date of termination, and so long thereafter as oil or gas is produced in paying quantities. Where a lease is reinstated under this section and the authorized officer finds that the reinstatement of such lease either (1) occurs after the expiration of the primary term or any extension thereof, or (2) will not afford the lessee a reasonable opportunity to continue operations under the lease, the authorized officer may extend the term of the reinstated lease for such period as determined reasonable, but in no event for more than 2 years from the date of the reinstatement and so long thereafter as oil or gas is produced in paying quantities.

(f) The authorized officer may, either in acting on a petition for reinstatement or in response to a request filed after reinstatement, or both, reduce the royalty in that reinstated lease on the entire leasehold or any tract or portion thereof segregated for royalty purposes, if he/she determines there are either economic or other circumstances which could cause undue economic hardship or premature termination of production; or because of any written action of the United States, its agents or employees, which preceded, and was a major consideration in, the lessee's expenditure of funds to develop the lands covered by the lease after the rental had become due and had not been paid; or if the authorized officer determines it is equitable to do so for any other reason.

[49 FR 30449, July 30, 1984, as amended at 71 FR 14823, Mar. 24, 2006]

**§ 3108.2-4 Conversion of unpatented oil placer mining claims: Class III reinstatements.**

(a) For any unpatented oil placer mining claim validly located prior to February 24, 1920, which has been or is currently producing or is capable of producing oil or gas, and has been or is deemed after January 12, 1983, conclusively abandoned for failure to file timely the required instruments or copies of instruments required by section 314 of the Federal Land Policy and Management Act (43 U.S.C. 1744), and it is shown to the satisfaction of the au-

thorized officer that such failure was inadvertent, justifiable or not due to lack of reasonable diligence on the part of the owner, the authorized officer may issue, for the lands covered by the abandoned unpatented oil placer mining claim, a noncompetitive oil and gas lease consistent with the provisions of section 17(e) of the Act (30 U.S.C. 226(e)). The effective date of any lease issued under this section shall be from the statutory date that the claim was deemed conclusively abandoned.

(b) The authorized officer may issue a noncompetitive oil and gas lease if a petition has been filed in the proper BLM office for the issuance of a noncompetitive oil and gas lease accompanied by the required rental and royalty, including back rental and royalty accruing, at the rates specified in §§ 3103.2-2 and 3103.3-1 of this title, for any claim deemed conclusively abandoned after January 12, 1983. The petition shall have been filed on or before the 120th day after the final notification by the Secretary or a court of competent jurisdiction of the determination of the abandonment of the oil placer mining claim.

(c) The authorized officer shall not issue a noncompetitive oil and gas lease under this section if a valid oil and gas lease has been issued affecting any of the lands covered by the abandoned oil placer mining claim prior to the filing of the petition for issuance of a noncompetitive oil and gas lease.

(d) After the filing of a petition for issuance of a noncompetitive oil and gas lease covering an abandoned oil placer claim, the authorized officer shall not issue any new lease affecting any lands covered by such petition until all action on the petition is final.

(e) Any noncompetitive lease issued under this section shall include:

(1) Terms and conditions for the payment of rental in accordance with § 3103.2-2(j) of this title. Payment of back rentals accruing from the date of abandonment of the oil placer mining claim, at the rental set by the authorized officer, shall be made prior to the lease issuance.

(2) Royalty rates set in accordance with § 3103.3-1 of this title. Royalty shall be paid at the rate established by the authorized officer on all production

## Bureau of Land Management, Interior

## § 3108.4

removed or sold from the oil placer mining claim, including all royalty on production made subsequent to the date the claim was deemed conclusively abandoned prior to the lease issuance.

(f) Noncompetitive oil and gas leases issued under this section shall be subject to all regulations in part 3100 of this title except for those terms and conditions mandated by Title IV of the Federal Oil and Gas Royalty Management Act.

(g) A notice of the proposed conversion of the oil placer mining claim into a noncompetitive oil and gas lease, including the terms and conditions of conversion, shall be published in the FEDERAL REGISTER at least 30 days prior to the issuance of a noncompetitive oil and gas lease. The mining claim owner shall reimburse the Bureau for the full costs incurred in the publishing of said notice.

(h) The mining claim owner shall pay the Bureau a nonrefundable administrative fee of \$500 prior to the issuance of the noncompetitive lease.

(i) The authorized officer may, either in acting on a petition to issue a noncompetitive oil and gas lease or in response to a request filed after issuance, or both, reduce the royalty in such lease, if he/she determines there are either economic or other circumstances which could cause undue economic hardship or premature termination of production.

[49 FR 30449, July 30, 1984, as amended at 53 FR 17357, May 16, 1988; 53 FR 22840, June 17, 1988]

### § 3108.3 Cancellation.

(a) Whenever the lessee fails to comply with any of the provisions of the law, the regulations issued thereunder, or the lease, the lease may be canceled by the Secretary, if the leasehold does not contain a well capable of production of oil or gas in paying quantities, or if the lease is not committed to an approved cooperative or unit plan or communitization agreement that contains a well capable of production of unitized substances in paying quantities. The lease may be canceled only after notice to the lessee in accordance with section 31(b) of the Act and only if default continues for the period pre-

scribed in that section after service of 30 days notice of failure to comply.

(b) Whenever the lessee fails to comply with any of the provisions of the law, the regulations issued thereunder, or the lease, and if the leasehold contains a well capable of production of oil or gas in paying quantities, or if the lease is committed to an approved cooperative or unit plan or communitization agreement that contains a well capable of production of unitized substances in paying quantities, the lease may be canceled only by judicial proceedings in the manner provided by section 31(a) of the Act.

(c) If any interest in any lease is owned or controlled, directly or indirectly, by means of stock or otherwise, in violation of any of the provisions of the act, the lease may be canceled, or the interest so owned may be forfeited, or the person so owning or controlling the interest may be compelled to dispose of the interest, only by judicial proceedings in the manner provided by section 27(h)(1) of the Act.

(d) Leases shall be subject to cancellation if improperly issued.

[48 FR 33662, July 22, 1983, as amended at 53 FR 22840, June 17, 1988; 53 FR 31868, Aug. 22, 1988]

### § 3108.4 *Bona fide purchasers.*

A lease or interest therein shall not be cancelled to the extent that such action adversely affects the title or interest of a *bona fide* purchaser even though such lease or interest, when held by a predecessor in title, may have been subject to cancellation. All purchasers shall be charged with constructive notice as to all pertinent regulations and all Bureau records pertaining to the lease and the lands covered by the lease. Prompt action shall be taken to dismiss as a party to any proceedings with respect to a violation by a predecessor of any provisions of the act, any person who shows the holding of an interest as a *bona fide* purchaser without having violated any provisions of the Act. No hearing shall be necessary upon such showing unless prima facie evidence is presented that

## § 3108.5

the purchaser is not a *bona fide* purchaser.

[48 FR 33662, July 22, 1983; 48 FR 39225, Aug. 30, 1983, as amended at 53 FR 17357, May 16, 1988]

### § 3108.5 Waiver or suspension of lease rights.

If, during any proceeding with respect to a violation of any provisions of the regulations in Groups 3000 and 3100 of this title or the act, a party thereto files a waiver of his/her rights under the lease to drill or to assign his/her lease interests, or if such rights are suspended by order of the Secretary pending a decision, payments of rentals and the running of time against the term of the lease involved shall be suspended as of the first day of the month following the filing of the waiver or the Secretary's suspension until the first day of the month following the final decision in the proceeding or the revocation of the waiver or suspension.

[53 FR 17357, May 16, 1988; 53 FR 22840, June 17, 1988]

## Subpart 3109—Leasing Under Special Acts

### § 3109.1 Rights-of-way.

#### § 3109.1-1 Generally.

The Act of May 21, 1930 (30 U.S.C. 301-306), authorizes either the leasing of oil and gas deposits under railroad and other rights-of-way to the owner of the right-of-way or the entering of a compensatory royalty agreement with adjoining landowners. This authority shall be exercised only with respect to railroad rights-of-way and easements issued pursuant either to the Act of March 3, 1875 (43 U.S.C. 934 *et seq.*), or pursuant to earlier railroad right-of-way statutes, and with respect to rights-of-way and easements issued pursuant to the Act of March 3, 1891 (43 U.S.C. 946 *et seq.*). The oil and gas underlying any other right-of-way or easement is included within any oil and gas lease issued pursuant to the Act which covers the lands within the right-of-way, subject to the limitations on use of the surface, if any, set out in the statute under which, or permit by which, the right-of-way or easement

## 43 CFR Ch. II (10-1-08 Edition)

was issued, and such oil and gas shall not be leased under the Act of May 21, 1930.

### § 3109.1-2 Application.

No approved form is required for an application to lease oil and gas deposits underlying a right-of-way. The right-of-way owner or his/her transferee must file the application in the proper BLM office. Include the processing fee for leasing under right-of-way found in the fee schedule in § 3000.12 of this chapter. If the transferee files an application, it must also include an executed transfer of the right to obtain a lease. The application shall detail the facts as to the ownership of the right-of-way, and of the transfer if the application is filed by a transferee; the development of oil or gas in adjacent or nearby lands, the location and depth of the wells, the production and the probability of drainage of the deposits in the right-of-way. A description by metes and bounds of the right-of-way is not required but each legal subdivision through which a portion of the right-of-way desired to be leased extends shall be described.

[53 FR 17357, May 16, 1988; 53 FR 22840, June 17, 1988; 70 FR 58874, Oct. 7, 2005]

### § 3109.1-3 Notice.

After the Bureau of Land Management has determined that a lease of a right-of-way or any portion thereof is consistent with the public interest, either upon consideration of an application for lease or on its own motion, the authorized officer shall serve notice on the owner or lessee of the oil and gas rights of the adjoining lands. The adjoining land owner or lessee shall be allowed a reasonable time, as provided in the notice, within which to submit a bid for the amount or percent of compensatory royalty, the owner or lessee shall pay for the extraction of the oil and gas underlying the right-of-way through wells on such adjoining lands. The owner of the right-of-way shall be given the same time period to submit a bid for the lease.

## Bureau of Land Management, Interior

## § 3109.2

### § 3109.1-4 Award of lease or compensatory royalty agreement.

Award of lease to the owner of the right-of-way, or a contract for the payment of compensatory royalty by the owner or lessee of the adjoining lands shall be made to the bidder whose offer is determined by the authorized officer to be to the best advantage of the United States, considering the amount of royalty to be received and the better development under the respective means of production and operation.

### § 3109.1-5 Compensatory royalty agreement or lease.

(a) The lease or compensatory royalty agreement shall be on a form approved by the Director.

(b) The royalty to be charged shall be fixed by the Bureau of Land Management in accordance with the provisions of § 3103.3 of this title, but shall not be less than 12½ percent.

(c) The term of the lease shall be for a period of not more than 20 years.

### § 3109.2 Units of the National Park System.

(a) Oil and gas leasing in units of the National Park System shall be governed by 43 CFR Group 3100 and all operations conducted on a lease or permit in such units shall be governed by 43 CFR parts 3160 and 3180.

(b) Any lease or permit respecting minerals in units of the National Park System shall be issued or renewed only with the consent of the Regional Director, National Park Service. Such consent shall only be granted upon a determination by the Regional Director that the activity permitted under the lease or permit will not have significant adverse effect upon the resources or administration of the unit pursuant to the authorizing legislation of the unit. Any lease or permit issued shall be subject to such conditions as may be prescribed by the Regional Director to protect the surface and significant resources of the unit, to preserve their use for public recreation, and to the condition that site specific approval of any activity on the lease will only be given upon concurrence by the Regional Director. All lease applications received for reclamation withdrawn

lands shall also be submitted to the Bureau of Reclamation for review.

(c) The units subject to the regulations in this part are those units of land and water which are shown on the following maps on file and available for public inspection in the office of the Director of the National Park Service and in the Superintendent's Office of each unit. The boundaries of these units may be revised by the Secretary as authorized in the Acts.

(1) Lake Mead National Recreation Area—The map identified as "boundary map, 8360-80013B, revised February 1986.

(2) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area—The map identified as "Proposed Whiskeytown-Shasta-Trinity National Recreation Area," numbered BOR-WST 1004, dated July 1963.

(3) Ross Lake and Lake Chelan National Recreation Areas—The map identified as "Proposed Management Units, North Cascades, Washington," numbered NP-CAS-7002, dated October 1967.

(4) Glen Canyon National Recreation Area—the map identified as "boundary map, Glen Canyon National Recreation Area," numbered GLC-91,006, dated August 1972.

(d) The following excepted units shall not be open to mineral leasing:

(1) *Lake Mead National Recreation Area.* (i) All waters of Lakes Mead and Mohave and all lands within 300 feet of those lakes measured horizontally from the shoreline at maximum surface elevation;

(ii) All lands within the unit of supervision of the Bureau of Reclamation around Hoover and Davis Dams and all lands outside of resource utilization zones as designated by the Superintendent on the map (602-2291B, dated October 1987) of Lake Mead National Recreation Area which is available for inspection in the Office of the Superintendent.

(2) *Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area.* (i) All waters of Whiskeytown Lake and all lands within 1 mile of that lake measured from the shoreline at maximum surface elevation;

## § 3109.2-1

(ii) All lands classified as high density recreation, general outdoor recreation, outstanding natural and historic, as shown on the map numbered 611-20,004B, dated April 1979, entitled "Land Classification, Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area." This map is available for public inspection in the Office of the Superintendent;

(iii) All lands within section 34 of Township 33 north, Range 7 west, Mt. Diablo Meridian.

(3) *Ross Lake and Lake Chelan National Recreation Areas.* (i) All of Lake Chelan National Recreation Area;

(ii) All lands within ½ mile of Gorge, Diablo and Ross Lakes measured from the shoreline at maximum surface elevation;

(iii) All lands proposed for or designated as wilderness;

(iv) All lands within ½ mile of State Highway 20;

(v) Pyramid Lake Research Natural Area and all lands within ½ mile of its boundaries.

(4) *Glen Canyon National Recreation Area.* Those units closed to mineral disposition within the natural zone, development zone, cultural zone and portions of the recreation and resource utilization zone as shown on the map numbered 80,022A, dated March 1980, entitled "Mineral Management Plan—Glen Canyon National Recreation Area." This map is available for public inspection in the Office of the Superintendent and the office of the State Directors, Bureau of Land Management, Arizona and Utah.

### **Subpart 3110—Noncompetitive Leases**

#### **§ 3110.1 Lands available for noncompetitive offer and lease.**

(a) *Offer.* (1) Effective June 12, 1988, through January 2, 1989, noncompetitive lease offers may be filed only for lands available under § 3110.1(b) of this title. Noncompetitive lease offers filed after December 22, 1987, and prior to June 12, 1988, for lands available for filing under § 3110.1(a) of this title shall receive priority. Such offers shall be

## Bureau of Land Management, Interior

## §3110.3-3

exposed to competitive bidding under subpart 3120 of this title and if no bid is received, a noncompetitive lease shall be issued all else being regular. After January 2, 1989, noncompetitive lease offers may be filed on unleased lands, except for:

(i) Those lands which are in the one-year period commencing upon the expiration, termination, relinquishment, or cancellation of the leases containing the lands; and

(ii) Those lands included in a Notice of Competitive Lease Sale or a List of Lands Available for Competitive Nominations. Neither exception is applicable to lands available under §3110.1(b) of this title.

(2) Noncompetitive lease offers may be made pursuant to an opening order or other notice and shall be subject to all provisions and procedures stated in such order or notice.

(3) No noncompetitive lease may issue for any lands unless and until they have satisfied the requirements of §3110.1(b) of this title.

(b) *Lease.* Only lands that have been offered competitively under subpart 3120 of this title, and for which no bid has been received, shall be available for noncompetitive lease. Such lands shall become available for a period of 2 years beginning on the first business day following the last day of the competitive oral auction, or when formal nominations have been requested as specified in §3120.3-1 of this title, or the first business day following the posting of the Notice of Competitive Lease Sale, and ending on that same day 2 years later. A lease may be issued from an offer properly filed any time within the 2-year noncompetitive leasing period.

[53 FR 22840, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

### §3110.2 Priority.

(a) Offers filed for lands available for noncompetitive offer or lease, as specified in §§3110.1(a)(1) and 3110.1(b) of this title, shall receive priority as of the date and time of filing as specified in §1821.2-3(a) of this title, except that all noncompetitive offers shall be considered simultaneously filed if received in the proper BLM office any time during the first business day following the last day of the competitive oral auction, or

when formal nominations have been requested as specified in §3120.3-1 of this title, on the first business day following the posting of the Notice of Competitive Lease Sale. An offer shall not be available for public inspection the day it is filed.

(b) If more than 1 application was filed for the same parcel in accordance with the regulations contained in former subpart 3112 of this title, and if no lease has been issued by the authorized officer prior to the effective date of these regulations, only a single priority application shall be selected from the filings. If the selected application fails to mature into a lease, the lands shall be available for offer under §3110.1(a) of this title.

### §3110.3 Lease terms.

#### §3110.3-1 Duration of lease.

All noncompetitive leases shall be for a primary term of 10 years.

[53 FR 22840, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

#### §3110.3-2 Dating of leases.

All noncompetitive leases shall be considered issued when signed by the authorized officer. Noncompetitive leases, except future interest leases issued under §3110.9 of this title, shall be effective as of the first day of the month following the date the leases are issued. A lease may be made effective on the first day of the month within which it is issued if a written request is made prior to the date of signature of the authorized officer. Future interest leases issued under §3110.9 of this title shall be effective as of the date the mineral interests vest in the United States.

#### §3110.3-3 Lease offer size.

(a) Lease offers for public domain minerals shall not be made for less than 640 acres or 1 full section, whichever is larger, where the lands have been surveyed under the rectangular survey system or are within an approved protracted survey, except where the offer includes all available lands within a section and there are no contiguous lands available for lease. Such public domain lease offers in Alaska shall not be made for less than 2,560

#### § 3110.4

#### 43 CFR Ch. II (10–1–08 Edition)

acres or 4 full contiguous sections, whichever is larger, where the lands have been surveyed under the rectangular survey system or are within an approved protracted survey, except where the offer includes all available lands within the subject section and there are no contiguous lands available for lease. Where an offer exceeds the minimum 640-acre provision of this paragraph, the offer may include less than all available lands in any given section. Cornering lands are not considered contiguous lands. This paragraph shall not apply to offers made under § 3108.2–4 of this title or where the offer is filed on an entire parcel as it was offered by the Bureau in a competitive sale during that period specified under § 3110.5–1 of this title.

(b) An offer to lease public domain or acquired lands may not include more than 10,240 acres. The lands in an offer shall be entirely within an area of 6 miles square or within an area not exceeding 6 surveyed sections in length or width measured in cardinal directions. An offer to lease acquired lands may exceed the 6 mile square limit if:

(1) The lands are not surveyed under the rectangular survey system of public land surveys and are not within the area of the public land surveys; and

(2) The tract desired is described by the acquisition or tract number assigned by the acquiring agency and less than 50 percent of the tract lies outside the 6 mile square area, and such acquisition or tract number is provided in accordance with § 3110.5–2(d) of this title in lieu of any other description.

(c) If an offer exceeds the 10,240 acre maximum by not more than 160 acres, the offeror shall be granted 30 days from notice of the excess to withdraw the excess acreage from the offer, failing which the offer shall be rejected and priority lost.

##### **§ 3110.4 Requirements for offer.**

(a) An offer to lease shall be made on a current form approved by the Director, or on unofficial copies of that form in current use. For noncompetitive leases processed under § 3108.2–4 of this title, the current lease form shall be used. Copies shall be exact reproductions on 1 page of both sides of the official approved form, without additions,

omissions, or other changes, or advertising. The original copy of each offer must be typed or printed plainly in ink, signed in ink and dated by the offeror or an authorized agent, and must include payment of the first year's rental and the processing fee for noncompetitive lease applications found in the fee schedule in § 3000.12 of this chapter. The original and 2 copies of each offer to lease, with each copy showing that the original has been signed, shall be filed in the proper BLM office. A noncompetitive offer to lease a future interest applied for under § 3110.9 must include the processing fee for noncompetitive lease applications found in the fee schedule in § 3000.12 of this chapter. Where remittances for offers are returned for insufficient funds, the offer shall not obtain priority of filing until the date the remittance is properly made.

(b) Where a correction to an offer is made, whether at the option of the offeror or at the request of the authorized officer, it shall gain priority as of the date the filing is correct and complete. The priority that existed before the date the corrected offer is filed, may be defeated by an intervening offer to the extent of any conflict in such offers, except as provided under §§ 3103.2–1(a) and 3110.3–3(c) of this title.

(c) An offer shall be limited to either public domain minerals or acquired lands minerals, subject to the provisions for corrections under paragraph (b) of this section.

(d) Compliance with subpart 3102 shall be required.

(e) All offers for leases should name the United States agency from which consent to the issuance of a lease shall be obtained, or the agency that may have title records covering the ownership for the mineral interest involved, and identify the project, if any, of which the lands covered by the offer are a part.

[53 FR 22840, June 17, 1988; 53 FR 31958, Aug. 22, 1988; 70 FR 58874, Oct. 7, 2005]

##### **§ 3110.5 Description of lands in offer.**

###### **§ 3110.5–1 Parcel number description.**

From the first day following the end of a competitive process until the end

of that same month, the only acceptable description for a noncompetitive lease offer for the lands covered by that competitive process shall be the parcel number on the List of Lands Available for Competitive Nominations or the Notice of Competitive Lease Sale, whichever is appropriate. Each such offer shall contain only a single parcel. Thereafter, the description of the lands shall be made in accordance with the remainder of this section.

**§3110.5-2 Public domain.**

(a) If the lands have been surveyed under the public land rectangular survey system, each offer shall describe the lands by legal subdivision, section, township, range, and, if needed, meridian.

(b) If the lands have not been surveyed under the public land rectangular system, each offer shall describe the lands by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected by courses and distances to an official corner of the public land surveys.

(c) When protracted surveys have been approved and the effective date thereof published in the FEDERAL REGISTER, all offers to lease lands shown on such protracted surveys, filed on or after such effective date, shall describe the lands in the same manner as provided in paragraph (a) of this section for officially surveyed lands.

(d)(1) Where offers are pending for unsurveyed lands that are subsequently surveyed or protracted before the lease issuance, the description in the lease shall be conformed to the subdivisions of the approved protracted survey or the public land survey, whichever is appropriate.

(2) The description of lands in an existing lease shall be conformed to a subsequent resurvey or amended protraction survey, whichever is appropriate.

(e) The requirements of this section shall apply to applications for conversion of abandoned unpatented oil placer mining claims made under §3108.2-4 of this title, except that deficiencies shall be curable.

**§3110.5-3 Acquired lands.**

(a) If the lands applied for lie within and conform to the rectangular system of public land surveys and constitute either all or a portion of the tract acquired by the United States, such lands shall be described by legal subdivision, section, township, range, and, if needed, meridian.

(b) If the lands applied for do not conform to the rectangular system of public land surveys, but lie within an area of the public land surveys and constitute the entire tract acquired by the United States, such lands shall be described by metes and bounds, giving courses and distances between the successive angle points with appropriate ties to the nearest official survey corner, or a copy of the deed or other conveyance document by which the United States acquired title to the lands may be attached to the offer and referred to therein in lieu of redescribing the lands on the offer form. If the desired lands constitute less than the entire tract acquired by the United States, such lands shall be described by metes and bounds, giving courses and distances between the successive angle points with appropriate ties to the nearest official survey corner. If a portion of the boundary of the desired lands coincides with the boundary in the deed or other conveyance document, that boundary need not be redescribed on the offer form, provided that a copy of the deed or other conveyance document upon which the coinciding description is clearly identified is attached to the offer. That portion of the description not coinciding shall be tied by description on the offer by courses and distances between successive angle points into the description in the deed or other conveyance document.

(c) If the lands applied for lie outside an area of the public land surveys and constitute the entire tract acquired by the United States, such lands shall be described as in the deed or other conveyance document by which the United States acquired title to the lands, or a copy of that document may be attached to the offer and referred to therein in lieu of redescribing the lands on the offer form. If the desired lands constitute less than the entire tract acquired by the United States, such

#### **§ 3110.5-4**

lands shall be described by courses and distances between successive angle points tying by courses and distances into the description in the deed or other conveyance document. If a portion of the boundary of the desired lands coincides with the boundary in the deed or other conveyance document, that boundary need not be re-described on the offer form, provided that a copy of the deed or other conveyance document upon which the coinciding description is clearly identified is attached to the offer. That portion of the description not coinciding shall be tied by description in the offer by courses and distances between successive angle points into the description in the deed or other conveyance document.

(d) Where the acquiring agency has assigned an acquisition or tract number covering the lands applied for, without loss of priority to the offeror, the authorized officer may require that number in addition to any description otherwise required by this section. If the authorized officer determines that the acquisition or tract number, together with identification of the State and county, constitutes an adequate description, the authorized officer may allow the description in this manner in lieu of other descriptions required by this section.

(e) Where the lands applied for do not conform to the rectangular system of public land surveys, without loss of priority to the offeror, the authorized officer may require 3 copies of a map upon which the location of the desired lands are clearly marked with respect to the administrative unit or project of which they are a part.

#### **§ 3110.5-4 Accreted lands.**

Where an offer includes any accreted lands, the accreted lands shall be described by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected by courses and distances to an angle point on the perimeter of the tract to which the accretions appertain.

#### **§ 3110.5-5 Conflicting descriptions.**

If there is any variation in the land description among the required copies

#### **43 CFR Ch. II (10-1-08 Edition)**

of the official forms, the copy showing the date and time of receipt in the proper BLM office shall control.

[53 FR 22840, June 17, 1988; 53 FR 31868, Aug. 22, 1988]

#### **§ 3110.6 Withdrawal of offer.**

An offer for noncompetitive lease under this subpart may be withdrawn in whole or in part by the offeror. However, a withdrawal of an offer made in accordance with § 3110.1(b) of this title may be made only if the withdrawal is received by the proper BLM office after 60 days from the date of filing of such offer. No withdrawal may be made once the lease, an amendment of the lease, or a separate lease, whichever covers the lands so described in the withdrawal, has been signed on behalf of the United States. If a public domain offer is partially withdrawn, the lands retained in the offer shall comply with § 3110.3-3(a) of this title.

#### **§ 3110.7 Action on offer.**

(a) No lease shall be issued before final action has been taken on any prior offer to lease the lands or any extension of, or petition for reinstatement of, an existing or former lease on the lands. If a lease is issued before final action, it shall be canceled, if the prior offeror is qualified to receive a lease or the petitioner is entitled to reinstatement of a former lease.

(b) The authorized officer shall not issue a lease for lands covered by a lease which terminated automatically, until 90 days after the date of termination.

(c) The United States shall indicate its acceptance of the lease offer, in whole or in part, and the issuance of the lease, by signature of the authorized officer on the current lease form. A signed copy of the lease shall be delivered to the offeror.

(d) Except as otherwise specifically provided in the regulations of this group, an offer that is not filed in accordance with the regulations in this part shall be rejected.

(e) Filing an offer on a lease form not currently in use, unless such lease form has been declared obsolete by the Director prior to the filing shall be allowed, on the condition that the offeror

is bound by the terms and conditions of the lease form currently in use.

**§3110.8 Amendment to lease.**

After the competitive process has concluded in accordance with subpart 3120 of this title, if any of the lands described in a lease offer for lands available during the 2-year period are open to oil and gas filing when the offer is filed but are omitted from the lease for any reason the original lease shall be amended to include the omitted lands unless, before the issuance of the amendment, the proper BLM office receives a withdrawal of the offer with respect to such lands or the offeror elects to receive a separate lease in lieu of an amendment. Such election shall be made by submission of a signed statement of the offeror requesting a separate lease, and a new offer on the required form executed pursuant to this part describing the remaining lands in the original offer. The new offer shall have the same priority as the old offer. No new application fee is required with the new offer. The rental payment held in connection with the original offer shall be applied to the new offer. The rental and the term of the lease for the lands added by an amendment shall be the same as if the lands had been included in the original lease when it was issued. If a separate lease is issued, it shall be dated in accordance with §3110.3-2 of this title.

**§3110.9 Future interest offers.**

**§3110.9-1 Availability.**

A noncompetitive future interest lease shall not be issued until the lands covered by the offer have been made available for competitive lease under subpart 3120 of this title. An offer made for lands that are leased competitively shall be rejected.

**§3110.9-2 Form of offer.**

An offer to lease a future interest shall be filed in accordance with this subpart, and may include tracts in which the United States owns a fractional present interest as well as the future interest for which a lease is sought.

**§3110.9-3 Fractional present and future interest.**

Where the United States owns both a present fractional interest and a future fractional interest in the minerals in the same tract, the lease, when issued, shall cover both the present and future interests in the lands. The effective date and primary term of the present interest lease is unaffected by the vesting of a future fractional interest. The lease for the future fractional interest, when such interest vests in the United States, shall have the same primary term and anniversary date as the present fractional interest lease.

**§3110.9-4 Future interest terms and conditions.**

(a) No rental or royalty shall be due to the United States prior to the vesting of the oil and gas rights in the United States. However, the future interest lessee shall agree that if he/she is or becomes the holder of any present interest operating rights in the lands:

(1) The future interest lessee transfers all or a part of the lessee's present oil and gas interests, such lessee shall file in the proper BLM office an assignment or transfer, in accordance with subpart 3106 of this title, of the future interest lease of the same type and proportion as the transfer of the present interest, and

(2) The future interest lessee's present lease interests are relinquished, cancelled, terminated, or expired, the future interest lease rights with the United States also shall cease and terminate to the same extent.

(b) Upon vesting of the oil and gas rights in the United States, the future interest lease rental and royalty shall be as for any noncompetitive lease issued under this subpart, as provided in subpart 3103 of this title, and the acreage shall be chargeable in accordance with §3101.2 of this title.

### Subpart 3120—Competitive Leases

#### § 3120.1 General.

##### § 3120.1-1 Lands available for competitive leasing.

All lands available for leasing shall be offered for competitive bidding under this subpart, including but not limited to:

(a) Lands in oil and gas leases that have terminated, expired, been cancelled or relinquished.

(b) Lands for which authority to lease has been delegated from the General Services Administration.

(c) If, in proceeding to cancel a lease, interest in a lease, option to acquire a lease or an interest therein, acquired in violation of any of the provisions of the act, an underlying lease, interest or option in the lease is cancelled or forfeited to the United States and there are valid interests therein that are not subject to cancellation, forfeiture, or

## 43 CFR Ch. II (10-1-08 Edition)

compulsory disposition, such underlying lease, interest, or option shall be sold to the highest responsible qualified bidder by competitive bidding under this subpart, subject to all outstanding valid interests therein and valid options pertaining thereto. If less than the whole interest in the lease, interest, or option is cancelled or forfeited, such partial interest shall likewise be sold by competitive bidding. If no satisfactory bid is obtained as a result of the competitive offering of such whole or partial interests, such interests may be sold in accordance with section 27 of the Act by such other methods as the authorized officer deems appropriate, but on terms no less favorable to the United States than those of the best competitive bid received. Interest in outstanding leases(s) so sold shall be subject to the terms and conditions of the existing lease(s).

(d) Lands which are otherwise unavailable for leasing but which are subject to drainage (protective leasing).

(e) Lands included in any expression of interest or noncompetitive offer, except offers properly filed within the 2-year period provided under § 3110.1(b) of this title, submitted to the authorized officer.

(f) Lands selected by the authorized officer.

#### § 3120.1-2 Requirements.

(a) Each proper BLM State office shall hold sales at least quarterly if lands are available for competitive leasing.

(b) Lease sales shall be conducted by a competitive oral bidding process.

(c) The national minimum acceptable bid shall be \$2 per acre or fraction thereof payable on the gross acreage, and shall not be prorated for any lands in which the United States owns a fractional interest.

#### § 3120.1-3 Protests and appeals.

No action pursuant to the regulations in this subpart shall be suspended under § 4.21(a) of this title due to an appeal from a decision by the authorized officer to hold a lease sale. The authorized officer may suspend the offering of a specific parcel while considering a protest or appeal against its inclusion in a Notice of Competitive Lease Sale.

## **Bureau of Land Management, Interior**

## **§ 3120.3-3**

Only the Assistant Secretary for Land and Minerals Management may suspend a lease sale for good and just cause after reviewing the reason(s) for an appeal.

### **§ 3120.2 Lease terms.**

#### **§ 3120.2-1 Duration of lease.**

Competitive leases shall be issued for a primary term of 10 years.

[58 FR 40754, July 30, 1993]

#### **§ 3120.2-2 Dating of leases.**

All competitive leases shall be considered issued when signed by the authorized officer. Competitive leases, except future interest leases issued under § 3120.7 of this title, shall be effective as of the first day of the month following the date the leases are signed on behalf of the United States. A lease may be made effective on the first day of the month within which it is issued if a written request is made prior to the date of signature of the authorized officer. Leases for future interest shall be effective as of the date the mineral interests vest in the United States.

#### **§ 3120.2-3 Lease size.**

Lands shall be offered in leasing units of not more than 2,560 acres outside Alaska, or 5,760 acres within Alaska, which shall be as nearly compact in form as possible.

### **§ 3120.3 Nomination process.**

The Director may elect to implement the provisions contained in §§ 3120.3-1 through 3120.3-7 of this title after review of any comments received during a period of not less than 30 days following publication in the FEDERAL REGISTER of notice that implementation of those sections is being considered.

#### **§ 3120.3-1 General.**

The Director may elect to accept nominations requiring submission of the national minimum acceptable bid, as set forth in this section, as part of the competitive process required by the act, or elect to accept informal expressions of interest. A List of Lands Available for Competitive Nominations may be posted in accordance with § 3120.4 of

this title, and nominations in response to this list shall be made in accordance with instructions contained therein and on a form approved by the Director. Those parcels receiving nominations shall be included in a Notice of Competitive Lease Sale, unless the parcel is withdrawn by the Bureau.

#### **§ 3120.3-2 Filing of a nomination for competitive leasing.**

Nominations filed in response to a List of Lands Available for Competitive Nominations and on a form approved by the Director shall:

(a) Include the nominator's name and personal or business address. The name of only one citizen, association or partnership, corporation or municipality shall appear as the nominator. All communications relating to leasing shall be sent to that name and address, which shall constitute the nominator's name and address of record:

(b) Be completed, signed in ink and filed in accordance with the instructions printed on the form and the regulations in this subpart. Execution of the nomination form shall constitute a legally binding offer to lease by the nominator, including all terms and conditions;

(c) Be filed within the filing period and in the BLM office specified in the List of Lands Available for Competitive Nominations. A nomination shall be unacceptable and shall be returned with all moneys refunded if it has not been completed and timely filed in accordance with the instructions on the form or with the other requirements in this subpart; and

(d) Be accompanied by a remittance sufficient to cover the national minimum acceptable bid, the first year's rental per acre or fraction thereof, and the administrative fee as set forth in § 3120.5-2(b) of this title for each parcel nominated on the form.

[53 FR 22843, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

#### **§ 3120.3-3 Minimum bid and rental remittance.**

Nominations filed in response to a List of Lands Available for Competitive Nominations shall be accompanied by a single remittance. Failure to submit either a separate remittance with

#### **§ 3120.3-4**

each form or an amount sufficient to cover all the parcels nominated on each form shall cause the entire filing to be deemed unacceptable with all moneys refunded.

#### **§ 3120.3-4 Withdrawal of a nomination.**

A nomination shall not be withdrawn, except by the Bureau for cause, in which case all moneys shall be refunded.

#### **§ 3120.3-5 Parcels receiving nominations.**

Parcels which receive nominations shall be included in a Notice of Competitive Lease Sale. The Notice shall indicate which parcels received multiple nominations in response to a List of Lands Available for Competitive Nominations, or parcels which have been withdrawn by the Bureau.

#### **§ 3120.3-6 Parcels not receiving nominations.**

Lands included in the List of Lands Available for Competitive Nominations which are not included in the Notice of Competitive Lease Sale because they were not nominated, unless they were withdrawn by the Bureau, shall be available for a 2-year period, for non-competitive leasing as specified in the List.

#### **§ 3120.3-7 Refund.**

The minimum bid, first year's rental and administrative fee shall be refunded to all nominators who are unsuccessful at the oral auction.

#### **§ 3120.4 Notice of competitive lease sale.**

##### **§ 3120.4-1 General.**

(a) The lands available for competitive lease sale under this subpart shall be described in a Notice of Competitive Lease Sale.

(b) The time, date, and place of the competitive lease sale shall be stated in the Notice.

(c) The notice shall include an identification of, and a copy of, stipulations applicable to each parcel.

##### **§ 3120.4-2 Posting of notice.**

At least 45 days prior to conducting a competitive auction, lands to be offered for competitive lease sale, as included in a List of Lands Available for Competitive Nominations or in a Notice of Competitive Lease Sale, shall be posted in the proper BLM office having jurisdiction over the lands as specified in § 1821.2-1(d) of this title, and shall be made available for posting to surface managing agencies having jurisdiction over any of the included lands.

#### **43 CFR Ch. II (10-1-08 Edition)**

ferred for competitive lease sale, as included in a List of Lands Available for Competitive Nominations or in a Notice of Competitive Lease Sale, shall be posted in the proper BLM office having jurisdiction over the lands as specified in § 1821.2-1(d) of this title, and shall be made available for posting to surface managing agencies having jurisdiction over any of the included lands.

#### **§ 3120.5 Competitive sale.**

##### **§ 3120.5-1 Oral auction.**

(a) Parcels shall be offered by oral bidding. The existence of a nomination accompanied by the national minimum acceptable bid shall be announced at the auction for the parcel.

(b) A winning bid shall be the highest oral bid by a qualified bidder, equal to or exceeding the national minimum acceptable bid. The decision of the auctioneer shall be final.

(c) Two or more nominations on the same parcel when the bids are equal to the national minimum acceptable bid, with no higher oral bid being made, shall be returned with all moneys refunded. If the Bureau reoffers the parcel, it shall be reoffered only competitively under this subpart with any non-competitive offer filed under § 3110.1(a) of this title retaining priority, provided no bid is received at an oral auction.

##### **§ 3120.5-2 Payments required.**

(a) Payments shall be made in accordance with § 3103.1-1 of this title.

(b) Each winning bidder shall submit, by the close of official business hours, or such other time as may be specified by the authorized officer, on the day of the sale for the parcel:

(1) The minimum bonus bid of \$2 per acre or fraction thereof;

(2) The total amount of the first year's rental; and

(3) The processing fee for competitive lease applications found in the fee schedule in § 3000.12 of this chapter for each parcel.

(c) The winning bidder shall submit the balance of the bonus bid to the proper BLM office within 10 working

**Bureau of Land Management, Interior**

**Pt. 3130**

days after the last day of the oral auction.

[53 FR 22843, June 17, 1988, as amended at 70 FR 58875, Oct. 7, 2005]

**§ 3120.5-3 Award of lease.**

(a) A bid shall not be withdrawn and shall constitute a legally binding commitment to execute the lease bid form and accept a lease, including the obligation to pay the bonus bid, first year's rental, and administrative fee. Execution by the high bidder of a competitive lease bid form approved by the Director constitutes certification of compliance with subpart 3102 of this title, shall constitute a binding lease offer, including all terms and conditions applicable thereto, and shall be required when payment is made in accordance with § 3120.5-2(b) of this title. Failure to comply with § 3120.5-2(c) of this title shall result in rejection of the bid and forfeiture of the monies submitted under § 3120.5-2(b) of this title.

(b) A lease shall be awarded to the highest responsible qualified bidder. A copy of the lease shall be provided to the lessee after signature by the authorized officer.

(c) If a bid is rejected, the lands shall be reoffered competitively under this subpart with any noncompetitive offer filed under § 3110.1(a) of this title retaining priority, provided no bid is received in an oral auction.

(d) Issuance of the lease shall be consistent with § 3110.7 (a) and (b) of this title.

**§ 3120.6 Parcels not bid on at auction.**

Lands offered at the oral auction that receive no bids shall be available for filing for noncompetitive lease for a 2-year period beginning the first business day following the auction at a time specified in the Notice of Competitive Lease Sale.

**§ 3120.7 Future interest.**

**§ 3120.7-1 Nomination to make lands available for competitive lease.**

A nomination for a future interest lease shall be filed in accordance with this subpart.

**§ 3120.7-2 Future interest terms and conditions.**

(a) No rental or royalty shall be due to the United States prior to the vesting of the oil and gas rights in the United States. However, the future interest lessee shall agree that if, he/she is or becomes the holder of any present interest operating rights in the lands:

(1) The future interest lessee transfers all or a part of the lessee's present oil and gas interests, such lessee shall file in the proper BLM office an assignment or transfer, in accordance with subpart 3106 of this title, of the future interest lease of the same type and proportion as the transfer of the present interest, and

(2) The future interest lessee's present lease interests are relinquished, cancelled, terminated, or expired, the future interest lease rights with the United States also shall cease and terminate to the same extent.

(b) Upon vesting of the oil and gas rights in the United States, the future interest lease rental and royalty shall be as for any competitive lease issued under this subpart, as provided in subpart 3103 of this title, and the acreage shall be chargeable in accordance with § 3101.2 of this title.

**§ 3120.7-3 Compensatory royalty agreements.**

The terms and conditions of compensatory royalty agreements involving acquired lands in which the United States owns a future or fractional interest shall be established on an individual case basis. Such agreements shall be required when leasing is not possible in situations where the interest of the United States in the oil and gas deposit includes both a present and a future fractional interest in the same tract containing a producing well.

[53 FR 22843, June 17, 1988]

**PART 3130—OIL AND GAS LEASING: NATIONAL PETROLEUM RESERVE, ALASKA**

NOTE: The information collection requirements contained in part 3130 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004-0067. The information

## **Pt. 3130**

is being collected to allow the authorized officer to determine if the bidder is qualified to hold a lease. The information will be used in making that determination. The obligation to respond is required to obtain a benefit.

- 3137.5 What terms do I need to know to understand this subpart?

#### **GENERAL**

- 3137.10 What benefits do I receive for entering into a unit agreement?
- 3137.11 What consultation must the BLM perform if lands in the unit area are owned by a regional corporation or the State of Alaska?

#### **APPLICATION**

- 3137.15 If the Federal lands constitute less than 10 percent of the lands in the proposed unit area, is the unit agreement subject to Federal regulations or approval?
- 3137.20 Is there a standard unit agreement form?
- 3137.21 What must I include in a NPR-A unit agreement?

## Bureau of Land Management, Interior

## Pt. 3130

- 3137.22 What are the size and shape requirements for a unit area?
- 3137.23 What must I include in my NPR-A unitization application?
- 3137.24 Why would BLM reject a unit agreement application?
- 3137.25 How will the parties to the unit know if BLM approves the unit agreement?
- 3137.26 When is a unit agreement effective?
- 3137.27 What effect do subsequent contracts or obligations have on the unit agreement?
- 3137.28 What oil and gas resources of committed tracts does the unit agreement include?

### DEVELOPMENT

- 3137.40 What initial development obligations must I define in a unit agreement?
- 3137.41 What continuing development obligations must I define in a unit agreement?

### OPTIONAL TERMS

- 3137.50 What optional terms may I include in a unit agreement?
- 3137.51 Under what conditions does BLM permit multiple unit operators?
- 3137.52 How may I modify the unit agreement?

### UNIT AGREEMENT OPERATING REQUIREMENTS

- 3137.60 As the unit operator, what are my obligations?
- 3137.61 How do I change unit operators?
- 3137.62 What are my liabilities as a former unit operator?
- 3137.63 What are my liabilities after BLM approves me as the new unit operator?
- 3137.64 As a unit operator, what must I do to prevent or compensate for drainage?

### DEVELOPMENT REQUIREMENTS

- 3137.70 What must I do to meet initial development obligations?
- 3137.71 What must I do to meet continuing development obligations?
- 3137.72 What if reasons beyond my control prevent me from meeting the initial or a continuing development obligation by the time the unit agreement specifies?
- 3137.73 What will BLM do after I submit a plan to meet continuing development obligations?
- 3137.74 What must I do after BLM approves my continuing development obligations plan?
- 3137.75 May I perform additional development outside established participating areas to fulfill continuing development obligations?
- 3137.76 What happens if I do not meet a continuing development obligation?

### PARTICIPATING AREAS

- 3137.80 What are participating areas and how do they relate to the unit agreement?
- 3137.81 What is the function of a participating area?
- 3137.82 What are productivity criteria?
- 3137.83 What establishes a participating area?
- 3137.84 What must I submit to BLM to establish a new participating area, or modify an existing participating area?
- 3137.85 What is the effective date of a participating area?
- 3137.86 What happens to participating area when I obtain new information demonstrating that the participating area should be larger or smaller than previously determined?
- 3137.87 What must I do if there are unleased Federal tracts in a participating area?
- 3137.88 What happens when a well outside a participating area does not meet the productivity criteria?
- 3137.89 How does production allocation occur from wells that do not meet the productivity criteria?
- 3137.90 Who must operate wells that do not meet the productivity criteria?
- 3137.91 When will BLM allow a well previously determined to be a non-unit well to be used in establishing or modifying a PA?
- 3137.92 When does a participating area terminate?

### PRODUCTION ALLOCATION

- 3137.100 How must I allocate production to the United States when a participating area includes unleased Federal lands?

### OBLIGATIONS AND EXTENSIONS

- 3137.110 Do the terms and conditions of a unit agreement modify Federal lease stipulations?
- 3137.111 When will BLM extend the primary term of all leases committed to a unit agreement or renew all leases committed to a unit agreement?
- 3137.112 What happens if I am prevented from performing actual or constructive drilling or reworking operations?

### CHANGE IN OWNERSHIP

- 3137.120 As a transferee of an interest in a unitized NPR-A lease, am I subject to the terms and conditions of the unit agreement?

### UNIT TERMINATION

- 3137.130 Under what circumstances will BLM approve a voluntary termination of the unit?

## § 3130.0-1

- 3137.131 What happens if the unit terminated before the unit operator met the initial development obligations?
- 3137.132 What if I do not meet a continuing development obligation before I establish any participating area in the unit?
- 3137.133 After participating areas are established, when does the unit terminate?
- 3137.134 What happens to committed leases if the unit terminates?
- 3137.135 What are the unit operator's obligations after unit termination?

### APPEALS

- 3137.150 How do I appeal a decision that BLM issues under this subpart?

### Subpart 3138—Subsurface Storage Agreements in the National Petroleum Reserve-Alaska (NPR-A)

- 3138.10 When will BLM enter into a subsurface storage agreements in NPR-A covering federally-owned lands?
- 3138.11 How do I apply for a subsurface storage agreement?
- 3138.12 What must I pay for storage?

AUTHORITY: 42 U.S.C. 6508, 43 U.S.C. 1733 and 1740.

SOURCE: 46 FR 55497, Nov. 9, 1981, unless otherwise noted.

### Subpart 3130—Oil and Gas Leasing, National Petroleum Reserve, Alaska: General

#### § 3130.0-1 Purpose.

These regulations establish the procedures under which the Secretary of the Interior will exercise the authority granted to administer a competitive leasing program for oil and gas within the National Petroleum Reserve—Alaska.

#### § 3130.0-2 Policy.

The oil and gas leasing program within the National Petroleum Reserve—Alaska shall be conducted in accordance with the purposes and policy directions provided by the Department of the Interior Appropriations Act, Fiscal Year 1981 (Pub. L. 96-514), and other executive, legislative, judicial and Department of the Interior guidance.

#### § 3130.0-3 Authority.

(a) The Department of the Interior Appropriations Act, Fiscal year 1981 (Pub. L. 96-514);

## 43 CFR Ch. II (10-1-08 Edition)

(b) The Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6504, *et seq.*); and

(c) The Federal Lands Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), except that sections 202 and 603 are not applicable.

(d) The Energy Policy Act of 2005 (42 U.S.C. 6506a(o)).

[46 FR 55497, Nov. 9, 1981, as amended at 73 FR 6442, Feb. 4, 2008]

#### § 3130.0-5 Definitions.

As used in this part, the term:

(a) *Act* means the Department of the Interior Appropriations Act, Fiscal Year 1981 (Pub. L. 96-514).

(b) *Bureau* means the Bureau of Land Management.

(c) *Constructive operations* means the exploring, testing, surveying or otherwise investigating the potential of a lease for oil and gas or the actual drilling or preparation for drilling of wells therefor.

(d) *NPR-A* means the area formerly within Naval Petroleum Reserve Numbered 4 Alaska which was redesignated as the National Petroleum Reserve—Alaska by the Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6501).

(e) *Reworking operations* means all operations designed to secure, restore or improve production through some use of a hole previously drilled, including, but not limited to, mechanical or chemical treatment of any horizon, deepening to test deeper strata and plugging back to test higher strata.

(f) *Special Areas* means the Utokok River, the Teshekpuk Lake areas and other areas within NPR—A identified by the Secretary as having significant subsistence, recreational, fish and wildlife or historical or scenic value.

(g) *Production allocation methodology* means a way of attributing the production of oil and gas produced from a unit well or wells to individual tracts committed to the unit and forming a participating area.

(h) *Reservoir heterogeneity* means spatial differences in the oil and gas reservoir properties. This can include, but is not limited to, the thickness of the reservoir, the amount of pore space in the reservoir rock that contains oil, gas, or water, and the amount of water

## Bureau of Land Management, Interior

## § 3130.1

contained in the reservoir rock. This information may be used to allocate production.

(i) *Variation in reservoir producibility* means differences in the rates oil and gas wells produce from the reservoir. These differences can result from variations in the thickness of the reservoir, porosity, and the amount of connected pore space.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988; 73 FR 6442, Feb. 4, 2008]

### § 3130.0-7 Cross references. [Reserved]

#### § 3130.1 Attorney General review.

(a) Prior to the issuance of any lease, contract or operating agreement under this subpart, the Secretary shall notify the Attorney General of the proposed issuance, the name of the successful bidder, the terms of the proposed lease, contract or operating agreement and any other information the Attorney General may require to conduct an antitrust review of the proposed action. Such other information shall include, but is not limited to, information to be provided the Secretary by the successful bidder or its owners.

(b) In advance of the publication of any notice of sale, the Attorney General shall notify the Secretary of his/her preliminary determination of the information each successful bidder shall be required to submit for antitrust review purposes. The Secretary shall require this information to be promptly submitted by successful bidders, and may provide prospective bidders the opportunity to submit such information in advance of or accompanying their bids. For subsequent notices of sale, the Attorney General's preliminary information requirements shall be as specified for the prior notice unless a change in the requirements is communicated to the Secretary in advance of publication of the new notice of sale. Where a bidder in a prior sale has previously submitted any of the currently required information, a reference to the date of submission and to the serial number of the record in which it is filed, together with a statement of any and all changes in the information since the date of the previous submission, shall be sufficient.

(c) The Secretary shall not issue any lease, contract or operating agreement until:

(1) Thirty days after the Attorney General receives notice from the Secretary of the proposed lease contract or operating agreement, together with any other information required under this section; or

(2) The Attorney General notifies the Secretary that issuance of the proposed lease, contract or operating agreement does not create or maintain a situation inconsistent with the antitrust laws, whichever comes first. The Attorney General shall inform the successful bidder, and simultaneously the Secretary, if the information supplied is insufficient, and shall specify what information is required for the Attorney General to complete his/her review. The 30-day period shall stop running on the date of such notification and not resume running until the Attorney General receives the required information.

(d) The Secretary shall not issue the lease, contract for operating agreement to the successful bidder, if, during the 30-day period, the Attorney General notifies the Secretary that such issuance would create or maintain a situation inconsistent with the antitrust laws.

(e) If the Attorney General does not reply in writing to the notification provided under paragraph (a) of this section within the 30-day review period, the Secretary may issue the lease, contract or operating agreement without waiting for the advice of the Attorney General.

(f) Information submitted to the Secretary to comply with this section shall be treated by the Secretary and by the Attorney General as confidential and proprietary data if marked confidential by the submitting bidder or other person. Such information shall be submitted to the Secretary in sealed envelopes and shall be transmitted in that form to the Attorney General.

(g) The procedures outlined in paragraphs (a) through (f) of this section apply to the proposed assignment or transfer of any lease, contract or operating agreement.

## § 3130.2

### § 3130.2 Limitation on time to institute suit to contest a Secretary's decision.

Any action seeking judicial review of the adequacy of any programmatic or site-specific environmental impact statement under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) concerning oil and gas leasing in NPR-A shall be barred unless brought in the appropriate District Court within 60 days after notice of availability of such statement is published in the FEDERAL REGISTER.

### § 3130.3 Drainage.

Upon a determination by the authorized officer, that lands owned by the United States within NPR-A are being drained, the regulations under § 3162.2 of this title, including the provisions relating to compensatory agreements or royalties, shall apply.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988; 66 FR 1892, Jan. 10, 2001]

### § 3130.4 Leasing: General.

#### § 3130.4-1 Tract size.

A tract selected for leasing shall consist of a compact area of not more than 60,000 acres.

#### § 3130.4-2 Lease term.

The primary term of an NPR-A lease is 10 years.

[67 FR 17885, Apr. 11, 2002]

### § 3130.5 *Bona fide* purchasers.

The provisions of § 3108.4 of this title shall apply to *bona fide* purchasers of leases within NPR-A.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

### § 3130.6 Leasing maps and land descriptions.

#### § 3130.6-1 Leasing maps.

The Bureau shall prepare leasing maps showing the tracts to be offered for lease sale.

#### § 3130.6-2 Land descriptions.

(a) All tracts shall be composed of entire sections either surveyed or protracted, whichever is applicable, except

## 43 CFR Ch. II (10-1-08 Edition)

that if the tracts are adjacent to upland navigable water areas, they may be adjusted on the basis of subdivisional parts of the sections.

(b) Leased lands shall be described according to section, township and range in accordance with the official survey or protraction diagrams.

### Subpart 3131—Leasing Program

#### § 3131.1 Receipt and consideration of nominations; public notice and participation.

During preparation of a proposed leasing schedule, the Secretary shall invite and consider suggestions and relevant information for such program from the Governor of Alaska, local governments, Native corporations, industry, other Federal agencies, including the Attorney General and all interested parties, including the general public. This request for information shall be issued as a notice in the FEDERAL REGISTER.

#### § 3131.2 Tentative tract selection.

(a) The State Director Alaska, Bureau of Land Management, shall issue calls for Nominations and Comments on tracts for leasing for oil and gas in specified areas. The call for Nominations and Comments shall be published in the FEDERAL REGISTER and may be published in other publications as desired by the State Director. Nominations and Comments on tracts shall be addressed to the State Director Alaska, Bureau of Land Management. The State Director shall also request comments on tracts which should receive special concern and analysis.

(b) The State Director, after completion of the required environmental analysis (see 40 CFR 1500-1508), shall select tracts to be offered for sale. In making the selection, the State Director shall consider available environmental information, multiple-use conflicts, resource potential, industry interest, information from appropriate Federal agencies and other available information. The State Director shall develop measures to mitigate adverse impacts, including lease stipulations

## Bureau of Land Management, Interior

## § 3132.3

and information to lessees. These mitigating measures shall be made public in the notice of sale.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

### § 3131.3 Special stipulations.

Special stipulations shall be developed to the extent the authorized officer deems necessary and appropriate for mitigating reasonably foreseeable and significant adverse impacts on the surface resources. Special Areas stipulations for exploration or production shall be developed in accordance with section 104 of the Naval Petroleum Reserves Production Act of 1976. Any special stipulations and conditions shall be set forth in the notice of sale and shall be attached to and made a part of the lease, if issued. Additional stipulations needed to protect surface resources and special areas may be imposed at the time the surface use plan and permit to drill are approved.

### § 3131.4 Lease sales.

#### § 3131.4-1 Notice of sale.

(a) The State Director Alaska, Bureau of Land Management, shall publish the notice of sale in the FEDERAL REGISTER, and may publish the notice in other publications if he/she deems it appropriate. The publication in the FEDERAL REGISTER shall be at least 30 days prior to the date of the sale. The notice shall state the place and time at which bids are to be filed, and the place, date and hour at which bids are to be opened.

(b) Tracts shall be offered for lease by competitive sealed bidding under conditions specified in the notice of lease sale and in accordance with all applicable laws and regulations. Bidding systems used in sales shall be based on bidding systems included in section (205)(a)(1)(A) through (H) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1801 *et seq.*).

(c) A detailed statement of the sale, including a description of the areas to be offered for lease, the lease terms, conditions and special stipulations and how and where to submit bids shall be made available to the public immediately after publication of the notice of sale.

## Subpart 3132—Issuance of Leases

### § 3132.1 Who may hold a lease.

Leases issued pursuant to this subpart may be held only by:

(a) Citizens and nationals of the United States;

(b) Aliens lawfully admitted for permanent residence in the United States as defined in 8 U.S.C. 1101(a)(20);

(c) Private, public or municipal corporations organized under the laws of the United States or of any State or of the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa or any of its territories; or

(d) Associations of such citizens, nationals, resident aliens or private, public or municipal corporations.

### § 3132.2 Submission of bids.

(a) A separate sealed bid shall be submitted for each tract in the manner prescribed. A bid shall not be submitted for less than an entire tract.

(b) Each bidder shall submit with the bid a certified or cashier's check, bank draft, U.S. currency or any other form of payment approved by the Secretary for one-fifth of the amount of the cash bonus, unless stated otherwise in the notice of sale.

(c) Each bid shall be accompanied by statements of qualifications prepared in accordance with § 3132.4 of this title.

(d) Bidders are bound by the provisions of 18 U.S.C. 1860 prohibiting unlawful combination or intimidation of bidders.

### § 3132.3 Payments.

(a) Make payments of bonuses, including deferred bonuses, first year's rental, other payments due upon lease issuance, and fees, to BLM's Alaska State Office. Before we issue a lease, the highest bidder must pay the processing fee for competitive lease applications found in the fee schedule in § 3000.12 of this chapter in addition to other remaining bonus and rental payments. All payments shall be made by certified or cashier's check, bank draft, U.S. currency or any other form of payment approved by the Secretary. Payments shall be made payable to the Department of the Interior, Bureau of

#### § 3132.4

Land Management, unless otherwise directed.

(b) All other payments required by a lease or the regulations in this part shall be payable to the Department of the Interior, Minerals Management Service.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988; 70 FR 58875, Oct. 7, 2005]

#### § 3132.4 Qualifications.

Submission of a lease bid constitutes certification of compliance with the regulations of this part. Anyone seeking to acquire, or anyone holding, a Federal oil and gas lease or interest therein may be required to submit additional information to show compliance with the regulations of this part.

[47 FR 8546, Feb. 26, 1982]

#### § 3132.5 Award of leases.

(a) Sealed bids received in response to the notice of lease sale shall be opened at the place, date and hour specified in the notice of sale. The opening of bids is for the sole purpose of publicly announcing and recording the bids received. No bids shall be accepted or rejected at that time.

(b) The United States reserves the right to reject any and all bids received for any tract, regardless of the amount offered.

(c) In the event the highest bids are tie bids, the tying bidders shall be allowed to submit within 15 days of the public announcement of a tie bid additional sealed bids to break the tie. The additional bids shall include any additional amount necessary to bring the amount tendered with his/her bid to one-fifth of the additional bid. Additional bids to break tie bids shall be processed in accordance with paragraph (a) of this section.

(d) If the authorized officer fails to accept the highest bid for a lease within 90 days or a lesser period of time as specified in the notice of sale, the highest bid for that lease shall be considered rejected. This 90-day period or lesser period as specified in the notice of sale shall not include any period of time during which acceptance, rejection or other processing of bids and lease issuance by the Department of

#### 43 CFR Ch. II (10–1–08 Edition)

the Interior are enjoined or prohibited by court order.

(e) Written notice of the final decision on the bids shall be transmitted to those bidders whose deposits have been held in accordance with instructions set forth in the notice of sale. If a bid is accepted, 2 copies of the lease shall be transmitted with the notice of acceptance to the successful bidder. The bidder shall, not later than the 15th day after receipt of the lease, sign both copies of the lease and return them, together with the first year's rental and the balance of the bonus bid, unless deferred, and shall file a bond, if required to do so. Deposits shall be refunded on rejected bids.

(f) If the successful bidder fails to execute the lease within the prescribed time or otherwise to comply with the applicable regulations, the deposit shall be forfeited and disposed of as other receipts under the Act.

(g) If the awarded lease is executed by an attorney-in-fact acting on behalf of the bidder, the lease shall be accompanied by evidence that the bidder authorized the attorney-in-fact to execute the lease on his/her behalf. Reference may be made to the serial number of the record and the office of the Bureau of Land Management in which such evidence has already been filed.

(h) When the executed lease is returned to the authorized officer, he/she shall within 15 days of receipt of the material required by paragraph (e) of this section, execute the lease on behalf of the United States. A copy of the fully executed lease shall be transmitted to the lessee.

#### § 3132.5–1 Forms.

Leases shall be issued on forms approved by the Director.

#### § 3132.5–2 Dating of leases.

All leases issued under the regulations in this part shall become effective as of the first day of the month following the date they are signed on behalf of the United States. When prior written request is made, a lease may become effective as of the first day of the month within which it is signed on behalf of the United States.

### Subpart 3133—Rentals and Royalties

#### § 3133.1 Rentals.

(a) An annual rental shall be due and payable at the rate prescribed in the notice of sale and the lease, but in no event shall such rental be less than \$3 per acre, or fraction thereof. Payment shall be made on or before the first day of each lease year prior to discovery of oil or gas on the lease.

(b) If there is no actual or allocated production on the portion of a lease that has been segregated from a producing lease, the owner of such segregated lease shall pay an annual rental for such segregated portion at the rate per acre specified in the original lease. This rental shall be payable each lease year following the year in which the segregation became effective and prior to discovery of oil or gas on such segregated portion.

(c) Annual rental paid in any year prior to discovery of oil or gas on the lease shall be in addition to, and shall not be credited against, any royalties due from production.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

#### § 3133.2 Royalties.

Royalties on oil and gas shall be at the rate specified in the notice of sale as to the tracts, if appropriate, and in the lease, unless the Secretary, in order to promote increased production on the leased area through direct, secondary or tertiary recovery means, reduces or eliminates any royalty set out in the lease.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

#### § 3133.2-1 Minimum royalties.

For leases which provide for minimum royalty payments, each lessee shall pay the minimum royalty specified in the lease at the end of each lease year beginning with the first lease year following a discovery on the lease.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

#### § 3133.3 Under what circumstances will BLM waive, suspend, or reduce the rental, royalty, or minimum royalty on my NPR-A lease?

(a) BLM will waive, suspend, or reduce the rental or minimum royalty or reduce the royalty rate on your lease if BLM finds that—

(1) It encourages the greatest ultimate recovery of oil or gas or it is in the interest of conservation; and

(2) It is necessary to promote development or the BLM determines the lease cannot be successfully operated under the terms of the lease.

(b) The BLM will consult with the State of Alaska and the North Slope Borough within 10 days of receiving an application for waiver, suspension, or reduction of rental or minimum royalty, or reduction of the royalty rate and will not approve an application under § 3133.4 of this subpart until at least 30 days after the consultation.

(c) If your lease includes land that was made available for acquisition by a regional corporation (as defined in 43 U.S.C. 1602) under the provision of Section 1431(o) of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3101 *et seq.*), the BLM will only approve a waiver, suspension, or reduction of rental or minimum royalty, or reduction of the royalty rate if the regional corporation concurs.

[67 FR 17885, Apr. 11, 2002, as amended at 73 FR 6442, Feb 4, 2008]

#### § 3133.4 How do I apply for a waiver, suspension or reduction of rental, royalty or minimum royalty for my NPR-A lease?

(a) Submit to BLM your application and in it describe the relief you are requesting and include—

(1) The lease serial number;

(2) The number, location and status of each well drilled;

(3) A statement that shows the aggregate amount of oil or gas subject to royalty for each month covering a period of at least six months immediately before the date you filed the application;

(4) The number of wells counted as producing each month and the average production per well per day;

### § 3134.1

### 43 CFR Ch. II (10–1–08 Edition)

(5) A detailed statement of expenses and costs of operating the entire lease, including the amount of any overriding royalty and payments out of production or similar interests applicable to your lease;

(6) All facts that demonstrate the waiver, suspension, or reduction of the rental or minimum royalty, or the reduction of the royalty rate encourages the greatest ultimate recovery of oil or gas or it is in the interest of conservation; and

(7) All facts that demonstrate you cannot successfully operate the lease under the terms of the lease;

(8) Any other information BLM requires.

(b) Your application must be signed by—

(1) All record title holders of the lease; or

(2) By the operator on behalf of all record title holders.

[67 FR 17885, Apr. 11, 2002, as amended at 73 FR 6442, Feb. 4, 2008]

### Subpart 3134—Bonding: General

#### § 3134.1 Bonding.

(a) Prior to issuance of an oil and gas lease, the successful bidder shall furnish the authorized officer a surety or personal bond in accordance with the provisions of § 3104.1 of this title in the sum of \$100,000 conditioned on compliance with all the lease terms, including rentals and royalties, conditions and any stipulations. The bond shall not be required if the bidder already maintains or furnishes a bond in the sum of \$300,000 conditioned on compliance with the terms, conditions and stipulations of all oil and gas leases held by the bidder within NPR-A, or maintains or furnishes a nationwide bond as set forth in § 3104.3(b) of this title and furnishes a rider thereto sufficient to bring total coverage to \$300,000 to cover all oil and gas leases held within NPR-A.

(b) A bond in the sum of \$100,000 or \$300,000, or a nationwide bond as provided in § 3104.3(b) of this title with a rider thereto sufficient to bring total coverage to \$300,000 to cover all oil and gas leases within NPR-A, may be provided by an operating rights owner (sublessee) or operator in lieu of a bond

furnished by the lessee, and shall assume the responsibilities and obligations of the lessee for the entire leasehold in the same manner and to the extent as though he/she were the lessee.

(c) If as a result of a default, the surety on a bond makes payment to the United States of any indebtedness under a lease secured by the bond, the face amount of such bond and the surety's liability shall be reduced by the amount of such payment.

(d) A new bond in the amount previously held or a larger amount as determined by the authorized officer shall be posted within 6 months or such shorter period as the authorized officer may direct after a default. In lieu thereof, separate or substitute bonds for each lease covered by the prior bond may be filed. The authorized officer may cancel a lease(s) covered by a deficient bond(s), in accordance with § 3136.3 of this title. Where a bond is furnished by an operator, suit may be brought thereon without joining the lessee when such lessee is not a party to the bond.

(e) Except as provided in this subpart, the bonds required for NPR-A leases are in addition to any other bonds the successful bidder may have filed or be required to file under §§ 3104.2, 3104.3(a) and 3154.1 and subparts 3206 and 3209 of this title.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988; 53 FR 22846, June 17, 1988]

#### § 3134.1–1 Form of bond.

All bonds furnished by a lessee, operating rights owner (sublessee), or operator shall be on a form approved by the Director.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988]

#### § 3134.1–2 Additional bonds.

(a) The authorized officer may require the bonded party to supply additional bonding in accordance with § 3104.5(b) of this chapter.

(b) The holders of any oil and gas lease bond for a lease on the NPR-A shall be permitted to obtain a rider to

## Bureau of Land Management, Interior

## § 3135.1-3

include the coverage of oil and gas geophysical operations within the boundaries of NPR-A.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17358, May 16, 1988; 73 FR 6442, Feb. 4, 2008]

### Subpart 3135—Transfers, Extensions, Consolidations, and Suspensions

#### § 3135.1 Transfers and extensions, general.

##### § 3135.1-1 Transfers.

(a) Subject to approval of the authorized officer, a lessee may transfer his/her lease(s), or any undivided interest therein, or any legal subdivision, to anyone qualified under §§3130.1 and 3132.4 of this title to hold a lease.

(b) Any approved transfer shall be deemed to be effective on the first day of the lease month following its filing in the proper BLM office, unless, at the request of the parties, an earlier date is specified in the approval.

(c) The transferor shall continue to be responsible for all obligations under the lease accruing prior to the approval of the transfer.

(d) The transferee shall be responsible for all obligations under the lease subsequent to the effective date of a transfer, and shall comply with all regulations issued under the Act.

(e) When a transfer of operating rights (sublease) is approved, the sublessee is responsible for all obligations under the rights transferred to the sublessee.

(f) Transfers are approved for administrative purposes only. Approval does not warrant or certify that either party to a transfer holds legal or equitable title to a lease.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17359, May 16, 1988; 53 FR 31867, Aug. 22, 1988]

##### § 3135.1-2 Requirements for filing of transfers.

(a)(1) All instruments of transfer of lease or of an interest therein, including operating rights, subleases and assignments of record-title shall be filed in triplicate for approval. Such instruments shall be filed within 90 days from the date of final execution. The

instruments of transfer shall include a statement, over the transferee's own signature, with respect to citizenship and qualifications as required of a bidder under §3132.4 of this title and shall contain all of the terms and conditions agreed upon by the parties thereto. Carried working interests, overriding royalty interests or payments out of production or other interest may be created or transferred without approval.

(2) An application for approval of any instrument that the regulations require you to file must include the processing fee for assignments and transfers found in the fee schedule in §3000.12 of this chapter. Any document that the regulations in this part do not require you to file, but that you submit for record purposes, must also include the processing fee for assignments and transfers found in the fee schedule in §3000.12 of this chapter for each lease affected. Such documents may be rejected by the authorized officer.

(b) An attorney-in-fact, on behalf of the holder of a lease, operating rights or sublease, shall furnish evidence of authority to execute the transfer or application for approval and the statement required by §3132.5(g) of this title.

(c) Where a transfer of record title creates separate leases, a bond shall be furnished covering the transferred lands in the amount prescribed in §3134.1 of this title. Where a transfer does not create separate leases, the transferee, if the transfer so provides and the surety consents, may become co-principal on the bond with the transferor.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17359, May 16, 1988; 70 FR 58875, Oct. 7, 2005]

##### § 3135.1-3 Separate filing for transfers.

A separate instrument of transfer shall be filed for each lease on a form approved by the Director or an exact reproduction of the front and back of such form. Any earlier editions of the current form are deemed obsolete and are unacceptable for filing. When transfers to the same person, association or corporation, involving more than 1 lease are filed at the same time for approval, 1 request for approval and

#### § 3135.1-4

1 showing as to the qualifications of the transferee shall be sufficient.

[53 FR 17359, May 16, 1988; 53 FR 31959, Aug. 22, 1988]

#### § 3135.1-4 Effect of transfer of a tract.

(a) When a transfer is made of all the record title to a portion of the acreage in a lease, the transferred and retained portions are divided into separate and distinct leases. The BLM will not approve transfers of a tract of land:

(1) Of less than 640 acres that is not compact; or

(2) That would leave a retained tract of less than 640 acres.

(b) Each segregated lease shall continue in full force and effect for the primary term of the original lease and so long thereafter as the activities on the segregated lease support extension in accordance with § 3135.1-5.

[73 FR 6442, Feb. 4, 2008]

#### § 3135.1-5 Extension of lease.

(a) The term of a lease shall be extended beyond its primary term:

(1) So long as oil or gas is produced from the lease in paying quantities;

(2) If the BLM has determined in writing that oil or gas is capable of being produced in paying quantities from the lease; or

(3) So long as drilling or reworking operations, actual or constructive, as approved by the BLM, are conducted thereon.

(b) Your lease will expire on the 30th anniversary of the original issuance date of the lease unless oil or gas is being produced in paying quantities. If your lease contains a well that is capable of production, but you fail to produce the oil or gas due to circumstances beyond your control, you may apply for a suspension under § 3135.2. If the BLM approves the suspension, the lease will not expire on the 30th anniversary of the original issuance date of the lease.

(c) A lease may be maintained in force by the BLM-approved directional wells drilled under the leased area from surface locations on adjacent or adjoining lands not covered by the lease. In such circumstances, drilling shall be considered to have commenced on the lease area when drilling is commenced

#### 43 CFR Ch. II (10-1-08 Edition)

on the adjacent or adjoining lands for the purpose of directional drilling under the leased area through any directional well surfaced on adjacent or adjoining lands. Production, drilling or reworking of any such directional well shall be considered production or drilling or reworking operations on the lease area for all purposes of the lease.

[73 FR 6442, Feb. 4, 2008]

#### § 3135.1-6 Lease renewal.

(a) *With a discovery*—(1) At any time after the fifth year of the primary term of a lease, the BLM may approve a 10-year lease renewal for a lease on which there has been a well drilled and a discovery of hydrocarbons even if the BLM has determined that the well is not capable of producing oil or gas in paying quantities. The BLM must receive the lessee's application for lease renewal no later than 60 days prior to the expiration of the primary term of the lease.

(2) The renewal application must provide evidence, and a certification by the lessee, that the lessee or its operator has drilled one or more wells and discovered producible hydrocarbons on the leased lands in such quantities that a prudent operator would hold the lease for potential future development.

(3) The BLM will approve the renewal application if it determines that a discovery was made and that a prudent operator would hold the lease for future development.

(4) The lease renewal will be effective on the day following the end of the primary term of the lease.

(5) The lease renewal may be approved on the condition that the lessee drills one or more additional wells or acquires and analyzes more well data, seismic data, or geochemical survey data prior to the end of the primary term.

(b) *Without a discovery*—(1) At any time after the fifth year of the primary term of a lease, the BLM may approve an application for a 10-year lease renewal for a lease on which there has not been a discovery of oil or gas. The BLM must receive the lessee's application no later than 60 days prior to the expiration of the primary term of the lease.

(2) The renewal application must:

## Bureau of Land Management, Interior

## § 3135.1-8

(i) Provide sufficient evidence that the lessee has diligently pursued exploration that warrants continuation of the lease with the intent of continued exploration or future potential development of the leased land. The application must show the:

(A) Lessee or its operator has drilled one or more wells or has acquired and analyzed seismic data, or geochemical survey data on a significant portion of the leased land since the lease was issued;

(B) Data collected indicates a reasonable probability of future success; and

(C) Lessee's plans for future exploration; or

(ii) Show that all or part of the lease is part of a unit agreement covering a lease that qualifies for renewal without a discovery and that the lease has not been previously contracted out of the unit.

(3) The BLM will approve the renewal application if it determines that the application satisfies the requirements of paragraph (b)(2)(i) or (ii) of this section. If the BLM approves the application for lease renewal, the applicant must submit to the BLM a fee of \$100 per acre within 5 business days of receiving notification of approval.

(4) The lease renewal will be effective on the day following the end of the primary term of the lease.

(5) The lease renewal may be approved on the condition that the lessee drills one or more additional wells or acquires and analyzes more well data, seismic data or geochemical survey data prior to the end of the primary term.

(c) *Renewed lease.* The renewed lease will be subject to the terms and conditions applicable to new oil and gas leases issued under the Integrated Activity Plan in effect on the date that the BLM issues the decision to renew the lease.

[73 FR 6442, Feb. 4, 2008]

### § 3135.1-7 Consolidation of leases.

(a) Leases may be consolidated upon written request of the lessee filed with the State Director Alaska, Bureau of Land Management. The request shall identify each lease involved by serial number and shall explain the factors which justify the consolidation. In-

clude with each request for a consolidation of leases the processing fee found in the fee schedule in § 3000.12 of this chapter.

(b) All parties holding any undivided interest in any lease involved in the consolidation shall agree to enter into the same lease consolidation.

(c) Consolidation of leases not to exceed 60,000 acres may be approved by the State Director, Alaska if it is determined that the consolidation is justified.

(d) The effective date, the anniversary date, and the primary term of the consolidated lease will be those of the oldest original lease involved in the consolidation. The term of a consolidated lease may be extended, or renewed, as appropriate, beyond the primary lease term under § 3135.1-5 or § 3135.1-6.

(e) Royalty, rental, special lease stipulations and other terms and conditions of each original lease except the effective date, anniversary date and the primary term shall continue to apply to that lease or any portion thereof regardless of the lease becoming a part of a consolidated lease. The highest royalty and rental rates of the original leases shall apply to the consolidated lease.

[48 FR 413, Jan. 5, 1983, as amended at 70 FR 58875, Oct. 7, 2005. Redesignated and amended at 73 FR 6442, 6443, Feb. 4, 2008]

### § 3135.1-8 Termination of administration for conveyed lands and segregation.

(a) If all of the mineral estate is conveyed to a regional corporation, the regional corporation will assume the lessor's obligation to administer any oil and gas lease.

(b) If a conveyance of the mineral estate does not include all of the land covered by an oil and gas lease, the lease will be segregated into two leases, one of which will cover only the mineral estate conveyed. The regional corporation will assume administration of the lease covering the conveyed mineral estate.

(c) If the regional corporation assumes administration of a lease under paragraph (a) or (b) of this section, all lease terms, BLM regulations, and

## § 3135.2

BLM orders in effect on the date of assumption continue to apply to the lessee under the lease. All such obligations will be enforceable by the regional corporation as the lessor until the lease terminates.

(d) In a case in which a conveyance of a mineral estate described in paragraph (b) of this section does not include all of the land covered by the oil and gas lease, the owner of the mineral estate in any particular portion of the land covered by the lease is entitled to all of the revenues reserved under the lease as to that portion including all of the royalty payable with respect to oil or gas produced from or allocated to that portion.

[73 FR 6443, Feb. 4, 2008]

### **§ 3135.2 Under what circumstances will BLM require a suspension of operations and production or approve my request for a suspension of operations and production for my lease?**

(a) BLM will require a suspension of operations and production or approve your request for a suspension of operations and production for your lease(s) if BLM determines that—

(1) It is in the interest of conservation of natural resources;

(2) It encourages the greatest ultimate recovery of oil and gas, such as by encouraging the planning and construction of a transportation system to a new area of discovery; or

(3) It mitigates reasonably foreseeable and significantly adverse effects on surface resources.

(b) BLM will suspend operations and production for your lease if it determines that, despite the exercise of due care and diligence, you can't comply with your lease requirements for reasons beyond your control.

(c) If BLM requires a suspension of operations and production or approves your request for a suspension of operations and production, the suspension—

(1) Stops the running of your lease term and prevents it from expiring for as long as the suspension is in effect;

(2) Relieves you of your obligation to pay rent, royalty, or minimum royalty during the suspension; and

## 43 CFR Ch. II (10–1–08 Edition)

(3) Prohibits you from operating on, producing from, or having any other beneficial use of your lease during the suspension. However, you must continue to perform necessary maintenance and safety activities.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.3 How do I apply for a suspension of operations and production?**

(a) You must submit to BLM an application stating the circumstances that are beyond your reasonable control that prevent you from operating or producing your lease(s).

(b) Your suspension application must be signed by—

(1) All record title holders of the lease; or

(2) The operator on behalf of the record title holders of the leases committed to an approved agreement.

(c) You must submit your application to BLM before your lease expires.

(d) Your application must be for your entire lease.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.4 When is a suspension of operations and production effective?**

A suspension of operations and production is effective—

(a) The first day of the month in which you file the application for suspension or BLM requires the suspension; or

(b) Any other date BLM specifies in the decision document.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.5 When should I stop paying rental or royalty after BLM requires or approves a suspension of operations and production?**

You should stop paying rental or royalty on the first day of the month that the suspension is effective. However, if there is any production sold or removed during that month, you must pay royalty on that production.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.6 When will my suspension terminate?**

(a) Your suspension terminates—

(1) On the first day of the month in which you begin to operate or produce on your lease with BLM approval; or

## Bureau of Land Management, Interior

## § 3136.3

(2) The date BLM specifies in a written notice to you.

(b) You must notify BLM at least 24 hours before you begin operations or production under paragraph (a)(1) of this section.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.7 What effect does a suspension of operations and production have on the term of my lease?**

(a) *Primary term.* If BLM grants a suspension of operations and production for your lease, the suspension stops the running of the primary term of your lease for the period of the suspension.

(b) *Extended term.* If your lease is in its extended term, a suspension holds your lease in its extended term for the period of the suspension as if it were in production.

[67 FR 17886, Apr. 11, 2002]

### **§ 3135.8 If BLM requires a suspension or grants my request for a suspension of operations and production for my lease, when must I next pay advance annual rental, royalty, or minimum royalty?**

(a) You are not required to submit your next rental or minimum royalty payment until the date the suspension terminates. Therefore, if your suspension begins in month 3 of lease year A and ends in month 2 of lease year B, you must submit your rental payment for lease year B when your suspension ends. BLM will send a written notice to the lessee and operator stating that the suspension is terminated and the date your rental payment for lease year B is due to MMS. BLM's notice also will state when you must pay any minimum royalty due for lease year A. Your minimum royalty for lease year B will be due at the end of that year.

(b) If you remove or sell any production from the lease during the term of the suspension, you must pay royalty on that production.

[67 FR 17886, Apr. 11, 2002]

## **Subpart 3136—Relinquishments, Terminations and Cancellations of Leases**

### **§ 3136.1 Relinquishment of leases or parts of leases.**

A lease may be surrendered in whole or in part by the lessee by filing a written relinquishment, in triplicate, with the Alaska State Office of the Bureau. No filing fee is required. In the case of partial relinquishments, neither the relinquished lands nor the retained lands shall be less than a compact tract of not less than 640 acres. A relinquishment shall take effect on the date it is filed subject to the continued obligation of lessee and the surety to make all payments due, including any accrued rental, royalties and deferred bonuses and to abandon all wells, and condition or remove other facilities on the lands to be relinquished to the satisfaction of the authorized officer.

[46 FR 55497, Nov. 9, 1981, as amended at 53 FR 17359, May 16, 1988]

### **§ 3136.2 Terminations.**

Any lease on which there is no well capable of producing oil or gas in paying quantities shall terminate if the lessee fails to pay the annual rental in full on or before the anniversary date of such lease and such failure continues for more than 30 days after the notice of delinquent rental has been delivered by registered or certified mail to the lease owner's record post office address.

### **§ 3136.3 Cancellation of leases.**

(a) Any nonproducing lease may be canceled by the authorized officer whenever the lessee fails to comply with any provisions of the Acts cited in § 3130.0-3 of this title, of the regulations issued thereunder or of the lease, if such failure to comply continues for 30 days after a notice thereof has been delivered by registered or certified mail to the lease owner's record post office address.

(b) Producing leases or leases known to contain valuable deposits of oil or gas may be canceled only by court order.

### Subpart 3137—Unitization Agreements—National Petroleum Reserve-Alaska

SOURCE: 67 FR 17886, Apr. 11, 2002, unless otherwise noted.

#### § 3137.5 What terms do I need to know to understand this subpart?

As used in this subpart—

*Actual drilling* means operations you conduct that are similar to those that a person seriously looking for oil or gas could be expected to conduct in that particular area, given the existing knowledge of geologic and other pertinent facts about the area to be drilled. The term includes the testing, completing, or equipping of the drill hole (casing, tubing, packers, pumps, etc.) so that it is capable of producing oil or gas. Actual drilling operations do not include preparatory or preliminary work such as grading roads and well sites, or moving equipment onto the lease.

*Actual production* means oil or gas flowing from the wellbore into treatment or sales facilities.

*Actual reworking operations* means reasonably continuous well-bore operations such as fracturing, acidizing, and tubing repair.

*Committed tract* means—

(1) A Federal lease where all record title holders and all operating rights owners have agreed to the terms and conditions of a unit agreement, committed their interest to the unit; or

(2) A State lease or private parcel of land where all oil and gas lessees and all operating rights owners or the owners of unleased minerals have agreed to the terms and conditions of a unit agreement.

*Constructive drilling* means those activities that are necessary to prepare for actual drilling that occur after BLM approves an application to drill, but before you actually drill the well. These include, but are not limited to, activities such as road and well pad construction, and drilling rig and equipment set-up.

*Constructive reworking operations* means activities that are necessary to prepare for well-bore operations. These may include rig and equipment set-up and pit construction.

*Continuing development obligations* means a program of development or operations you conduct that, after you complete initial obligations defined in a unit agreement—

(1) Meets or exceeds the rate of non-unit operations in the vicinity of the unit; and

(2) Represents an investment proportionate to the size of the area covered by the unit agreement.

*Drainage* means the migration of hydrocarbons, inert gases (other than helium), or associated resources caused by production from other wells.

*NPR-A lease* means any oil and gas lease within the boundaries of the NPR-A, issued and administered by the United States under the Naval Petroleum Reserves Production Act of 1976, as amended (42 U.S.C. 6501-6508), that authorizes exploration for and removal of oil and gas.

*Operating rights* (working interest) means any interest you hold that allows you to explore for, develop, and produce oil and gas.

*Participating area* means those committed tracts or portions of those committed tracts within the unit area that are proven to be productive by a well meeting the productivity criteria specified in the unit agreement.

*Primary target* means the principal geologic formation that you intend to develop and produce.

*Producible interval* means any pool, deposit, zone, or portion thereof capable of producing oil or gas.

*Record title* means legal ownership of an oil and gas lease recorded in BLM's records.

*Tract* means land that may be included in an NPR-A oil and gas unit agreement and that may or may not be in a Federal lease.

*Unit agreement* means a BLM-approved agreement to cooperate in exploring, developing, operating and sharing in production of all or part of an oil or gas pool, field or like area, including at least one NPR-A lease, without regard to lease boundaries and ownership.

*Unit area* means all tracts committed to a BLM-approved unit. Tracts not committed to the unit, even though they may be within the external unit boundary, are not part of the unit area.

## Bureau of Land Management, Interior

## §3137.21

*Unit operations* are all activities associated with exploration, development drilling, and production operations the unit operator(s) conducts on committed tracts.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6443, Feb. 4, 2008]

### GENERAL

#### **§3137.10 What benefits do I receive for entering into a unit agreement?**

(a) Each individual tract committed to the unit agreement meets its full performance obligation if one or more tracts in the unit meets the development or production requirements;

(b) Production from a well that meets the productivity criteria (see §3137.82 of this subpart) under the unit agreement extends the term of all NPR-A leases committed to the unit agreement as provided in §3137.111 of this subpart;

(c) You may drill within the unit without regard to certain lease restrictions, such as lease boundaries within the unit and spacing offsets; and

(d) You may consolidate operations and permitting and reporting requirements.

#### **§3137.11 What consultation must the BLM perform if lands in the unit area are owned by a regional corporation or the State of Alaska?**

If the BLM administers a unit containing tracts where the mineral estate is owned by a regional corporation or the State of Alaska, or if a proposed unit contains tracts where the mineral estate is owned by a regional corporation or the State of Alaska, the BLM will consult with and provide opportunities for participation in negotiations with respect to the creation or expansion of the unit by—

(a) The regional corporation, if the unit acreage contains the regional corporation's mineral estate; or

(b) The State of Alaska, if the unit acreage contains the state's mineral estate.

[73 FR 6443, Feb. 4, 2008]

### APPLICATION

#### **§3137.15 If the Federal lands constitute less than 10 percent of the lands in the proposed unit area, is the unit agreement subject to Federal regulations or approval?**

If the Federal lands constitute less than 10 percent of the lands in the proposed unit area—

(a) You may use a unit agreement approved by the State and/or a native corporation;

(b) BLM will authorize commitment of the Federal lands to the unit if it determines that the unit agreement protects the public interest; or

(c) As unit operator you may ask BLM to approve and administer the unit. If BLM agrees to approve and administer the unit, you must follow, and BLM will administer, the regulations in this subpart and 43 CFR part 3160.

#### **§3137.20 Is there a standard unit agreement form?**

There is no standard unit agreement form. BLM will accept any unit agreement format if it protects the public interest and includes the mandatory terms required in §3137.21 of this subpart.

#### **§3137.21 What must I include in an NPR-A unit agreement?**

(a) Your NPR-A unit agreement must include—

(1) A description of the unit area and any geologic and engineering factors upon which you are basing the area;

(2) Initial and continuing development obligations (see §§3137.40 and 3137.41 of this subpart);

(3) The anticipated participating area size and well locations (see §3137.80(b) of this subpart);

(4) A provision that acknowledges BLM's authority to set or modify the quantity, rate, and location of development and production; and

(5) A provision that acknowledges the BLM consulted with and provided opportunities for participation in the creation of the unit and a provision that acknowledges that the BLM will consult with and provide opportunities for participation in the expansion of the unit by —

## **§ 3137.22**

(A) The regional corporation, if the unit acreage contains the regional corporation's mineral estate; or

(B) The State of Alaska, if the unit acreage contains the state's mineral estate.

(6) Any optional terms which are authorized in § 3137.50 of this subpart that you choose to include in the unit agreement.

(b) You must include in the unit agreement any additional terms and conditions that result from consultation with BLM. After your initial application, BLM may request additional supporting documentation.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6443, Feb. 4, 2008]

### **§ 3137.22 What are the size and shape requirements for a unit area?**

(a) The unit area must—

(1) Consist of tracts, each of which must be contiguous to at least one other tract in the unit, that are located so that you can perform operations and production in an efficient and logical manner; and

(2) Include at least one NPR-A lease.

(b) BLM may limit the size and shape of the unit considering the type, amount and rate of the proposed development and production and the location of the oil or gas.

### **§ 3137.23 What must I include in my NPR-A unitization application?**

Your unitization application to BLM must include—

(a) The proposed unit agreement;

(b) A map showing the proposed unit area;

(c) A list of committed tracts including, for each tract, the—

(1) Legal land description and acreage;

(2) Names of persons holding record title interest;

(3) Names of persons owning operating rights; and

(4) Name of the unit operator.

(d) A statement certifying—

(1) That you invited all owners of oil and gas rights (leased or unleased) and lease interests (record title and operating rights) within the external boundary of the unit area described in the application to join the unit;

## **43 CFR Ch. II (10–1–08 Edition)**

(2) That there are sufficient tracts committed to the unit agreement to reasonably operate and develop the unit area;

(3) The commitment status of all tracts within the area proposed for unitization; and

(4) That you accept unit obligations under § 3137.60 of this subpart.

(e) Evidence of acceptable bonding;

(f) A discussion of reasonably foreseeable and significantly adverse effects on the surface resources of NPR-A and how unit operations may reduce impacts compared to individual lease operations;

(g) A discussion of the proposed methodology for allocating production among the committed tracts. If the unit includes non-Federal oil and gas mineral estate, you must explain how the methodology takes into account reservoir heterogeneity and area variation in reservoir producibility; and

(h) Other documentation BLM may request. BLM may require additional copies of maps, plats, and other similar exhibits.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

### **§ 3137.24 Why would BLM reject a unit agreement application?**

BLM will reject a unit agreement application—

(a) That does not address all mandatory terms, including those required under § 3137.21(b) of this subpart;

(b) If the unit operator—

(1) Has an unsatisfactory record of complying with applicable laws, regulations, the terms of any lease or permit, or the requirements of any notice or order; or

(2) Is not qualified to operate within NPR-A under applicable laws and regulations;

(c) That does not conserve natural resources;

(d) That is not in the public interest;

(e) That does not comply with any special conditions in effect for any part of the NPR-A that the unit or any lease subject to the unit would affect; or

(f) That does not comply with the requirements of this subpart.

## Bureau of Land Management, Interior

## §3137.51

### **§3137.25 How will the parties to the unit know if BLM approves the unit agreement?**

BLM will notify the unit operator in writing when it approves or disapproves the proposed unit agreement. The unit operator must notify, in writing, all parties to the unit agreement within 30 calendar days after receiving BLM's notice of approval or disapproval.

### **§3137.26 When is a unit agreement effective?**

The unit agreement is effective on the date BLM approves it.

### **§3137.27 What effect do subsequent contracts or obligations have on the unit agreement?**

No subsequent contract or obligation—

- (a) Modifies the terms or conditions of the unit agreement; or
- (b) Relieves the unit operator of any right or obligation under the unit agreement.

### **§3137.28 What oil and gas resources of committed tracts does the unit agreement include?**

A unit agreement includes all oil and gas resources of committed tracts unless BLM approves unit agreement terms to the contrary pursuant to §3137.50 of this subpart.

## DEVELOPMENT

### **§3137.40 What initial development obligations must I define in a unit agreement?**

Your unit agreement must define—

- (a) The number of wells you anticipate will be necessary to assess the reservoir adequately;
- (b) A primary target for each well;
- (c) A schedule for starting and completing drilling operations for each well; and
- (d) The time between starting operations on a well to the start of operations on the next well.

### **§3137.41 What continuing development obligations must I define in a unit agreement?**

A unit agreement must provide for submission of supplemental or additional plans of development which obli-

gate the operator to a program of exploration and development (see §3137.71 of this subpart) that, after completion of the initial obligations —

- (a) Meets or exceeds the rate of non-unit operations in the vicinity of the unit; and
- (b) Represents an investment proportionate to the size of the area covered by the unit agreement.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

## OPTIONAL TERMS

### **§3137.50 What optional terms may I include in a unit agreement?**

BLM may approve the following optional terms for a unit agreement if they promote additional development or enhanced production potential—

- (a) Limiting the unit agreement to certain formations and their intervals;
- (b) Multiple unit operators (see §3137.51 of this subpart);
- (c) Allowing modification of the unit agreement terms if less than 100 percent of the parties to the unit agreement (see §3137.52 of this subpart) agree to the modification; or
- (d) Other terms that BLM determines will promote the greatest economic recovery of oil and gas consistent with applicable law.

### **§3137.51 Under what conditions does BLM permit multiple unit operators?**

BLM permits multiple unit operators only if the unit agreement defines—

- (a) The conditions under which additional unit operators are acceptable;
- (b) The responsibilities of the different operators, including obtaining BLM approvals, reporting, paying Federal royalties and conducting operations;
- (c) Which unit operators are obligated to ensure bond coverage for each NPR-A lease in the unit;
- (d) The consequences if one or more unit operators defaults. For example, if an operator defaults, the unit agreement would list which unit operators would conduct that operator's operations and ensure bonding of those operations; and

## § 3137.52

(e) Which unit operator is responsible for unit obligations not specifically assigned in the unit agreement.

### § 3137.52 How may I modify the unit agreement?

(a) You may modify a unit agreement if—

(1) All current parties to the unit agreement agree to the modification; or

(2) You meet the requirements of the modification provision in the unit agreement. The modification provision must identify which parties, and what percentage of those parties, must consent to each type of modification.

(b) You must submit to BLM an application for modification. The application must include the following—

(1) The operator must certify that the necessary parties have agreed to the modification; and

(2) If the unit agreement modification alters the current allocation schedule, you must submit to BLM both a—

(i) Description of the new allocation methodology; and

(ii) New allocation schedule.

(c) A modification is not effective unless BLM approves it. After BLM approves the modification, it is effective retroactively to the date you filed a complete application for modification. However, BLM may approve a different effective date if you request it and provide acceptable justification.

(d) BLM will reject modifications that do not comply with BLM regulations or applicable law.

#### UNIT AGREEMENT OPERATING REQUIREMENTS

### § 3137.60 As the unit operator, what are my obligations?

As the unit operator—

(a) You must comply with the terms and conditions of the unit agreement, Federal laws and regulations, lease terms and stipulations, and BLM notices and orders;

(b) You must provide to BLM evidence of acceptable bonding. Acceptable bonding means a bond in an amount which is no less than the sum of the individual Federal bonding requirements for each of the NPR-A leases committed to the unit. You may

## 43 CFR Ch. II (10–1–08 Edition)

also meet this requirement if you add the unit operator as a principal to lease bonds to reach the required amount; and

(c) The bond must be payable to the Secretary of the Interior.

### § 3137.61 How do I change unit operators?

(a) To change unit operators, the new unit operator must submit to BLM—

(1) Statements that—

(i) It accepts unit obligations; and

(ii) The percentage of required interest owners consented to a change of unit operator; and

(2) Evidence of acceptable bonding (see § 3137.60(b) of this subpart).

(b) The effective date of the change in unit operator is the date BLM approves the new unit operator.

### § 3137.62 What are my liabilities as a former unit operator?

You are responsible for all duties and obligations of the unit agreement that accrued while you were unit operator up to the date BLM approves a new unit operator.

### § 3137.63 What are my liabilities after BLM approves me as the new unit operator?

(a) After BLM approves the change in unit operator, you, as the new unit operator, assume full liability, jointly and severally with the record title and operating rights owners, except as otherwise provided in paragraph (c) of this section and to the extent permitted by law, for—

(1) Compliance with the terms and conditions of the unit agreement, Federal laws and regulations, lease terms and stipulations, and BLM notices and orders;

(2) Plugging unplugged wells and reclaiming unreclaimed facilities that were installed or used before the effective date of the change in unit operator (this liability is joint and several with the former unit operator); and

(3) Those liabilities accruing during the time you are unit operator.

(b) Your liability includes, but is not limited to—

(1) Rental and royalty payments;

## Bureau of Land Management, Interior

## §3137.72

(2) Protecting the unit from loss due to drainage as provided in §3137.64 of this subpart;

(3) Well plugging and abandonment;

(4) Surface reclamation;

(5) All environmental remediation or restoration required by law, regulations, lease terms, or conditions of approval; and

(6) Other requirements related to unit operations.

(c) Your liability for royalty and other payments on the unit is limited by section 102(a) of the Federal Oil and Gas Royalty Management Act of 1982, as amended (30 U.S.C. 1712(a)).

### **§3137.64 As a unit operator, what must I do to prevent or compensate for drainage?**

You must prevent uncompensated drainage of oil and gas from unit land by wells on land not subject to the unit agreement. Permissible means of satisfying the obligation include—

(a) Drilling a protective well if it is economically feasible. For this subpart, *economically feasible* means producing a sufficient quantity of oil or gas from a protective well in the unit for a reasonable profit above the cost of drilling, completing and operating the protective well;

(b) Paying compensatory royalty;

(c) Forming other agreements, or modifying existing agreements, that allow the tracts committed to the unit agreement to share in production after the effective date of the new or modified agreement; or

(d) BLM may require additional measures to prevent uncompensated drainage.

### DEVELOPMENT REQUIREMENTS

### **§3137.70 What must I do to meet initial development obligations?**

(a) To meet initial development obligations by the time specified in your unit agreement you must—

(1) Drill the required test well(s) to the primary target;

(2) Drill at least one well that meets the productivity criteria (see §3137.82 of this subpart); or

(3) Establish, to BLM's satisfaction, that further drilling to meet the productivity criteria is unwarranted or impracticable.

(b) You must certify to BLM that you met initial development obligations no later than 60 calendar days after meeting the obligations. BLM may require you to supply documentation that supports your certification.

### **§3137.71 What must I do to meet continuing development obligations?**

(a) Once you meet initial development obligations, you must perform additional development. Work you did before meeting initial development obligations is not continuing development. Continuing development includes the following operations—

(1) Drilling, testing, or completing additional wells to the primary target or other unit formations;

(2) Drilling or completing additional wells that establish production of oil and gas;

(3) Recompleting wells or other operations that establish new unit production; or

(4) Drilling existing wells to a deeper target.

(b) No later than 90 calendar days after meeting initial development obligations, submit to BLM a plan that describes how you will meet continuing development obligations. You must submit to BLM updated continuing obligation plans as soon as you determine that, for whatever reason, the plan needs amending.

(1) If you have drilled a well that meets the productivity criteria, your plan must describe the activities to fully develop the oil and gas field.

(2) If you fulfilled your initial development obligations, but did not establish a well that meets the productivity criteria, your plan must describe the further actual or constructive drilling operations you will conduct.

### **§3137.72 What if reasons beyond my control prevent me from meeting the initial or a continuing development obligation by the time the unit agreement specifies?**

(a) If reasons beyond your control prevent you from meeting the initial or a continuing development obligation by the time specified in the unit agreement, you may apply to BLM for an extension of time for meeting those obligations. You must submit the request for an extension of time before the date

### § 3137.73

the obligation is due to be met. In the application-

(1) State the obligation for which you are requesting an extension;

(2) List the reasons beyond your control that prevent you from performing the obligation; and

(3) State when you expect the reasons beyond your control to terminate.

(b) BLM will grant an extension of time to meet initial or continuing development obligations if we determine that-

(1) The extension encourages the greatest ultimate recovery of oil or gas or it is in the interest of conservation; and

(2) The reasons beyond your control prevent you from performing the initial or a continuing development obligation.

(c) The extension of time for performing the initial or a continuing development obligation will continue for so long as the conditions giving rise to the extension continue to exist.

### § 3137.73 What will BLM do after I submit a plan to meet continuing development obligations?

Within 30 calendar days after receiving your proposed plan, BLM will notify you in writing that we—

(a) Approved your plan;

(b) Rejected your plan and explain why. This will include an explanation of how you should correct the plan to come into compliance; or

(c) Have not acted on the plan, explaining the reasons and when you can expect a final response.

### § 3137.74 What must I do after BLM approves my continuing development obligations plan?

No later than 90 calendar days after BLM's approval of your plan submitted under 3137.71(b), you must certify to BLM that you started operations to fulfill your continuing development obligations. BLM may require you to—

(a) Supply documentation to support your certification; and

(b) Submit periodic reports that demonstrate continuing development.

### 43 CFR Ch. II (10–1–08 Edition)

### § 3137.75 May I perform additional development outside established participating areas to fulfill continuing development obligations?

You may perform additional development either within or outside a participating area, depending on the terms of the unit agreement.

### § 3137.76 What happens if I do not meet a continuing development obligation?

(a) After you establish a participating area, if you do not meet a continuing development obligation and BLM has not granted you an extension of time to meet the obligation, the unit contracts. This means that—

(1) All areas within the unit that do not have participating areas established are eliminated from the unit. Any eliminated areas are subject to their original lease terms; and

(2) Only established participating areas, whether they are actually producing or not, remain in the unit.

(b) Units contract effective the first day of the month after the date on which the unit agreement required the continuing development obligations to begin.

(c) If you do not meet a continuing development obligation before you establish a participating area, the unit terminates (*see* § 3137.132 of this subpart).

### PARTICIPATING AREAS

### § 3137.80 What are participating areas and how do they relate to the unit agreement?

(a) Participating areas are those committed tracts or portions of those committed tracts within the unit area that are proven to be productive by a well meeting the productivity criteria specified in the unit agreement.

(b) You must include a description of the anticipated participating area(s) size in the unit agreement for planning purposes to aid in the mitigation of reasonably foreseeable and significantly adverse effects on NPR-A surface resources. The unit agreement must define the proposed participating areas. Your proposed participating area may be limited to separate producible intervals or areas.

(c) At the time you meet the productivity criteria discussed in § 3137.82 of this subpart, you must delineate those participating areas.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

**§ 3137.81 What is the function of a participating area?**

(a) The function of a participating area is to allocate production to each committed tract within a participating area. The BLM will allocate production for royalty purposes to each committed tract within the participating area using the allocation methodology agreed to in the unit agreement (see § 3137.23(g) of this subpart).

(b) For exploratory and primary recovery operations, BLM will consider gas cycling and pressure maintenance wells when establishing participating area boundaries.

(c) For secondary and tertiary recovery operations, BLM will consider all wells that contribute to production when establishing participating area boundaries.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

**§ 3137.82 What are productivity criteria?**

(a) Productivity criteria are characteristics of a unit well that warrant including a defined area surrounding the well in a participating area. The unit agreement must define these criteria for each separate producible interval. You must be able to determine whether you meet the criteria when the well is drilled and you complete well testing, after a reasonable period of time to analyze new data.

(b) To meet the productivity criteria, the well must indicate future production potential sufficient to pay for the costs of drilling, completing, and operating the well on a unit basis.

(c) BLM will consider wells that contribute to unit production (*e.g.*, pressure maintenance, gas cycling) when setting the participating area boundaries as provided in § 3137.81(b) and (c) of this subpart.

**§ 3137.83 What establishes a participating area?**

The first well you drill meeting the productivity criteria after the unit agreement is formed establishes an initial participating area. When you establish an initial participating area, lands that contain previously existing wells in the unit meeting the productivity criteria (see § 3137.82 of this subpart), will—

(a) Be added to that initial participating area as a revision, if the well is completed in the same producible interval; or

(b) Become a separate participating area, if the well is completed in a different producible interval (see also § 3137.88 of this subpart for wells that do not meet the productivity criteria).

**§ 3137.84 What must I submit to BLM to establish a new participating area, or modify an existing participating area?**

To establish a new participating area or modify an existing participating area, you must submit to BLM a—

(a) Statement that—

(1) The well meets the productivity criteria (see § 3137.82 of this subpart), necessary to establish a new participating area. You must submit information supporting your statement; or

(2) Explains the reasons for modifying an existing participating area. You must submit information supporting your explanation;

(b) Map showing the new or revised participating area and acreage; and

(c) Schedule that establishes the production allocation for each NPR-A lease or tract, and each record title holder and operating rights owner in the participating area. You must submit a separate allocation schedule for each participating area.

**§ 3137.85 What is the effective date of a participating area?**

(a) The effective date of an initial participating area is the first day of the month in which you complete a well meeting the productivity criteria, but no earlier than the effective date of the unit.

(b) The effective date of a modified participating area or modified allocation schedule is the earlier of the first

## § 3137.86

day of the month in which you file the proposal for a modification or such other effective date as may be provided for in the unit agreement and approved by the BLM, but no earlier than the effective date of the unit.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

### **§ 3137.86 What happens to a participating area when I obtain new information demonstrating that the participating area should be larger or smaller than previously determined?**

(a) If you obtain new information demonstrating that the participating area should be larger than BLM previously determined, within 60 calendar days of obtaining the information, you must—

(1) File a statement, map and revised production allocation schedule under § 3137.84 of this subpart requesting addition to the participating area of all committed tracts or portions of committed tracts in the unit area that meet the productivity criteria;

(2) If the proposed expanded participating area is outside the existing unit boundaries, invite all owners of oil and gas rights (leased or unleased) and lease interests (record title and operating rights) in such additional land to join the unit. If the owners of oil and gas rights in any tract of such land join the unit, you must submit to BLM—

(i) An application to enlarge the unit to include the expanded area;

(ii) A map showing the expanded area of the unit and the information with respect to each additional committed tract you proposed to add to the unit specified in § 3137.23(c) of this subpart; and

(iii) A revised allocation schedule; and

(3) If any additional committed tract or tracts are added to the unit under paragraph (a)(2) of this section, you must file a statement, map and revised production allocation schedule under § 3137.84 of this subpart requesting addition to the participating area of all such committed tracts or portions of such committed tracts in the unit area meeting the productivity criteria.

## 43 CFR Ch. II (10–1–08 Edition)

(b) If you obtain information demonstrating that the participating area should be smaller than previously determined, within 60 calendar days of obtaining the information, you must file a statement, map and revised production allocation schedule under § 3137.84 of this subpart requesting removal from the participating area of all land that does not meet the productivity criteria.

### **§ 3137.87 What must I do if there are unleased Federal tracts in a participating area?**

If there are unleased Federal tracts in a participating area, you must—

(a) Include the unleased Federal tracts in the participating area, even though BLM will not share in unit costs;

(b) Allocate production for royalty purposes as if the unleased Federal tracts were leased and committed to the unit agreement under § 3137.100 of this subpart;

(c) Admit Federal tracts leased after the effective date of the unit agreement into the unit agreement on the date the lease is effective; and

(d) Submit to BLM revised maps, a list of committed leases, and allocation schedules that reflect the commitment of the newly leased Federal tracts to the unit.

### **§ 3137.88 What happens when a well outside a participating area does not meet the productivity criteria?**

If a well outside any of the established participating area(s) does not meet the productivity criteria, all operations on that well are non-unit operations and we will not revise the participating area. You must notify BLM within 60 calendar days after you determine a well does not meet the productivity criteria. You must conduct non-unit operations under the terms of the underlying lease or other federally-approved cooperative oil and gas agreements.

### **§ 3137.89 How does production allocation occur from wells that do not meet the productivity criteria?**

(a) If a well that does not meet the productivity criteria was drilled before the unit was formed, the production is allocated on a lease or other federally-

## Bureau of Land Management, Interior

## §3137.110

approved oil and gas agreement basis. You must pay and report the royalties from any such well either as specified in the underlying lease or other federally-approved oil and gas agreements.

(b) If you drilled a well after the unit was formed and the well is completed within an existing participating area, the production becomes a part of that participating area production even if it does not meet the productivity criteria. BLM may require the participating area to be revised under §3137.84 of this subpart.

(c) If a well not meeting the productivity criteria is outside a participating area, the production is allocated as provided in paragraph (a) of this section.

### **§3137.90 Who must operate wells that do not meet the productivity criteria?**

(a) If a well not meeting the productivity criteria was drilled before the unit was formed and is not included in the participating area, the operator of the well at the time the unit was formed may continue as operator.

(b) As unit operator, you must continue to operate wells drilled after unit formation not meeting the productivity criteria unless BLM approves a change in the designation of operator for those wells.

### **§3137.91 When will BLM allow a well previously determined to be a non-unit well to be used in establishing or modifying a PA?**

If you, as the unit operator, complete sufficient work so that a well BLM previously determined to be a non-unit well now meets the productivity criteria, you must demonstrate this to BLM within 60 calendar days after you determine that the well meets the productivity criteria. You must then modify an existing participating area or establish a new participating area (see §3137.84 of this subpart).

### **§3137.92 When does a participating area terminate?**

(a) After contraction under §3137.76 of this subpart, a participating area terminates 60 calendar days after BLM notifies you that there is insufficient production to meet the operating costs of that production, unless you show

that within 60 calendar days after BLM's notification—

(1) Your operations to restore or establish new production are in progress; and

(2) You are diligently pursuing oil or gas production.

(b) If you demonstrate to BLM that reasons beyond your control prevent you, despite reasonable diligence, from meeting the requirements in paragraphs (a)(1) and (a)(2) of this section within 60 calendar days after BLM notifies you that there is insufficient production to meet the operating costs of that production, BLM will extend the period of time to start those operations.

## PRODUCTION ALLOCATION

### **§3137.100 How must I allocate production to the United States when a participating area includes unleased Federal lands?**

(a) When a participating area includes unleased Federal lands, you must allocate production as if the unleased Federal lands were leased and committed to the unit agreement (see §§3137.80 and 3137.81 of this subpart). The obligation to pay royalty for production attributable to unleased Federal lands accrues from the later of the date the—

(1) Committed leases in the participating area that includes unleased Federal lands receive a production allocation; or

(2) Previously leased tracts within the participating area become unleased.

(b) The royalty rate applicable to production allocated to unleased Federal lands is the greater of 12½ percent or the highest royalty rate for any lease committed to the unit.

(c) The value of the production must be determined under the Minerals Management Service's oil and gas product value regulations at 30 CFR part 206.

## OBLIGATIONS AND EXTENSIONS

### **§3137.110 Do the terms and conditions of a unit agreement modify Federal lease stipulations?**

A unit agreement does not modify Federal lease stipulations.

## § 3137.111

### **§ 3137.111 When will BLM extend the primary term of all leases committed to a unit agreement or renew all leases committed to a unit agreement?**

If the unit operator requests it, the BLM will extend the primary term of all NPR-A leases committed to a unit agreement or renew the leases committed to a unit agreement if any committed lease within the unit is extended or renewed under § 3135.1-5 or § 3135.1-6. If the BLM approves a lease renewal under § 3135.1-6(b), the BLM will require a renewal fee of \$100 per acre for each lease in the unit that is renewed.

[73 FR 6444, Feb. 4, 2008]

### **§ 3137.112 What happens if I am prevented from performing actual or constructive drilling or reworking operations?**

(a) If you demonstrate to BLM that reasons beyond your control prevent you, despite reasonable diligence, from starting actual or constructive drilling, reworking, or completing operations, BLM will extend all committed NPR-A leases as if you were performing constructive or actual drilling or reworking operations. You are limited to two extensions under this section.

(b) You must resume actual or constructive drilling or reworking operations when conditions permit. If you do not resume operations—

(1) BLM will cancel the extension; and

(2) The unit terminates (*see* § 3137.131 of this subpart).

## CHANGE IN OWNERSHIP

### **§ 3137.120 As a transferee of an interest in a unitized NPR-A lease, am I subject to the terms and conditions of the unit agreement?**

As a transferee of an interest in an NPR-A lease that is included in a unit agreement, you are subject to the terms and conditions of the unit agreement.

## 43 CFR Ch. II (10–1–08 Edition)

## UNIT TERMINATION

### **§ 3137.130 Under what circumstances will BLM approve a voluntary termination of the unit?**

BLM will approve the voluntary termination of the unit at any time—

(a) Before the unit operator discovers production sufficient to establish a participating area; and

(b) The unit operator submits to BLM certification that at least 75 percent of the operating rights owners in the unit agreement, on a surface acreage basis, agree to the termination.

### **§ 3137.131 What happens if the unit terminated before the unit operator met the initial development obligations?**

If the unit terminated before the unit operator met the initial development obligations, BLM's approval of the unit agreement is revoked. You, as lessee, forfeit all further benefits, including extensions and suspensions, granted any NPR-A lease because of having been committed to the unit. Any lease that the BLM extended because of being committed to the unit would expire unless it had been granted an extension or renewal under § 3135.1-5 or § 3135.1-6.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

### **§ 3137.132 What if I do not meet a continuing development obligation before I establish any participating area in the unit?**

If you do not meet a continuing development obligation before you establish any participating area, the unit terminates automatically. Termination is effective the day after you did not meet a continuing development obligation.

### **§ 3137.133 After participating areas are established, when does the unit terminate?**

After participating areas are established, the unit terminates when the last participating area of the unit terminates (*see* § 3137.92 of this subpart).

**§3137.134 What happens to committed leases if the unit terminates?**

(a) If the unit terminates, all committed NPR-A leases return to individual lease status and are subject to their original provisions.

(b) An NPR-A lease that has completed its primary term on or before the date the unit terminates will expire unless it is granted an extension or renewal under §3135.1-5 or §3135.1-6.

[67 FR 17886, Apr. 11, 2002, as amended at 73 FR 6444, Feb. 4, 2008]

**§3137.135 What are the unit operator's obligations after unit termination?**

Within three months after unit termination, the unit operator must submit to BLM for approval a plan and schedule for mitigating the impacts resulting from unit operations. The plan must describe in detail planned plugging and abandonment and surface restoration operations. The unit operator must then comply with the BLM-approved plan and schedule.

## APPEALS

**§3137.150 How do I appeal a decision that BLM issues under this subpart?**

(a) You may file for a State Director Review (SDR) of a decision BLM issues under this subpart. Part 3160, subpart 3165 of this title contains regulations on SDR; or

(b) If you are adversely affected by a BLM decision under this subpart you may directly appeal the decision under parts 4 and 1840 of this title.

**Subpart 3138—Subsurface Storage Agreements in the National Petroleum Reserve-Alaska (NPR-A)**

SOURCE: 67 FR 17893, Apr. 11, 2002, unless otherwise noted.

**§3138.10 When will BLM enter into a subsurface storage agreement in NPR-A covering federally-owned lands?**

BLM will enter into a subsurface storage agreement in NPR-A covering federally-owned lands to allow you to use either leased or unleased federally-

owned lands for the subsurface storage of oil and gas, whether or not the oil or gas you intend to store is produced from federally-owned lands, if you demonstrate that storage is necessary to—

- (a) Avoid waste; or
- (b) Promote conservation of natural resources.

**§3138.11 How do I apply for a subsurface storage agreement?**

(a) You must submit an application to BLM for a subsurface storage agreement that includes—

(1) The reason for forming a subsurface storage agreement;

(2) A description of the area you plan to include in the subsurface storage agreement;

(3) A description of the formation you plan to use for storage;

(4) The proposed storage fees or rentals. The fees or rentals must be based on the value of the subsurface storage, injection, and withdrawal volumes, and rental income or other income generated by the operator for letting or subletting the storage facilities;

(5) The payment of royalty for native oil or gas (oil or gas that exists in the formation before injection and that is produced when the stored oil or gas is withdrawn);

(6) A description of how often and under what circumstances you and BLM intend to renegotiate fees and payments;

(7) The proposed effective date and term of the subsurface storage agreement;

(8) Certification that all owners of mineral rights (leased or unleased) and lease interests have consented to the gas storage agreement in writing;

(9) An ownership schedule showing lease or land status;

(10) A schedule showing the participation factor for all parties to the subsurface storage agreement; and

(11) Supporting data (geologic maps showing the storage formation, reservoir data, etc.) demonstrating the capability of the reservoir for storage.

(b) BLM will negotiate the terms of a subsurface storage agreement with you, including bonding, and reservoir management.

## § 3138.12

(c) BLM may request documentation in addition to that which you provide under paragraph (a) of this section.

### § 3138.12 What must I pay for storage?

You must pay any combination of storage fees, rentals, or royalties to which you and BLM agree. The royalty you pay on production of native oil and gas from leased lands will be the royalty required by the underlying lease(s).

## PART 3140—LEASING IN SPECIAL TAR SAND AREAS

### Subpart 3140—Conversion of Existing Oil and Gas Leases and Valid Claims Based on Mineral Locations

Sec.

- 3140.0-1 Purpose.

### Subpart 3140—Conversion of Existing Oil and Gas Leases and Valid Claims Based on Mineral Locations

SOURCE: 47 FR 22478, May 24, 1982, unless otherwise noted.

#### § 3140.0-1 Purpose.

The purpose of this subpart is to provide for the conversion of existing oil and gas leases and valid claims based on mineral locations within Special Tar Sand Areas to combined hydrocarbon leases.

#### § 3140.0-3 Authority.

These regulations are issued under the authority of the Mineral Lands Leasing Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 *et seq.*), and the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97-78).

#### § 3140.0-5 Definitions.

As used in this subpart, the term:

## Bureau of Land Management, Interior

## § 3140.1-3

(a) *Combined hydrocarbon lease* means a lease issued in a Special Tar Sand Area for the removal of gas and non-gaseous hydrocarbon substances other than coal, oil shale or gilsonite.

(b) A complete plan of operations means a plan of operations that is in substantial compliance with the information requirements of 43 CFR 3592 for both exploration plans and mining plans, as well as any additional information required in this part and under 43 CFR 3593, as may be appropriate.

(c) *Special Tar Sand Area* means an area designated by the Department of the Interior's orders of November 20, 1980 (45 FR 76800), and January 21, 1981 (46 FR 6077) referred to in those orders as Designated Tar Sand Areas, as containing substantial deposits of tar sand.

(d) *Owner of an oil and gas lease* means all of the record title holders of an oil gas lease.

(e) *Owner of a valid claim based on a mineral location* means all parties appearing on the title records recognized as official under State law as having the right to sell or transfer any part of the mining claim, which was located within a Special Tar Sand Area prior to January 21, 1926, for any hydrocarbon resource, except coal, oil shale or gilsonite, leasable under the Combined Hydrocarbon Leasing Act.

(f) *Unitization* means unitization as that term is defined in 43 CFR part 3180.

[47 FR 22478, May 24, 1982, as amended at 55 FR 12351, Apr. 3, 1990; 70 FR 58614, Oct. 7, 2005]

### § 3140.1 General provisions.

#### § 3140.1-1 Existing rights.

(a) The owner of an oil and gas lease issued prior to November 16, 1981, or the owner of a valid claim based on a mineral location situated within a Special Tar Sand Area may convert that portion of the lease or claim so situated to a combined hydrocarbon lease, provided that such conversion is consistent with the provisions of this subpart.

(b) Owners of oil and gas leases in Special Tar Sand Areas who elect not to convert their leases to a combined hydrocarbon lease do not acquire the

rights to any hydrocarbon resource except oil and gas as those terms were defined prior to the enactment of the Combined Hydrocarbon Leasing Act of 1981. The failure to file an application to convert a valid claim based on a mineral location within the time herein provided shall have no effect on the validity of the mining claim nor the right to maintain that claim.

#### § 3140.1-2 Notice of intent to convert.

(a) Owners of oil and gas leases in Special Tar Sand Areas which are scheduled to expire prior to the effective date of these regulations or within 6 months thereafter, may preserve the right to convert their leases to combined hydrocarbon leases by filing a Notice of Intent to Convert with the State Director, Utah State Office, Bureau of Land Management, 136 E. South Temple, Salt Lake City, Utah 84111.

(b) A letter, submitted by the lessee, notifying the Bureau of Land Management of the lessee's intention to submit a plan of operations shall constitute a notice of intent to convert a lease. The Notice of Intent shall contain the lease number.

(c) The Notice of Intent shall be filed prior to the expiration date of the lease. The notice shall preserve the lessee's conversion rights only for a period ending 6 months after the effective date of this subpart.

#### § 3140.1-3 Exploration plans.

(a) The authorized officer may grant permission to holders of existing oil and gas leases to gather information to develop, perfect, complete or amend a plan of operations required for conversion upon the approval of the authorized officer of an exploration plan developed in accordance with 43 CFR 3592.1.

(b) The approval of an exploration plan in units of the National Park System requires the consent of the Regional Director of the National Park Service in accordance with § 3140.7 of this title.

(c) The filing of an exploration plan alone shall be insufficient to meet the

#### § 3140.1-4

requirements of a complete plan of operations as set forth in § 3140.2-3 of this title.

[47 FR 22478, May 24, 1982, as amended at 55 FR 12351, Apr. 3, 1990]

#### § 3140.1-4 Other provisions.

(a) A combined hydrocarbon lease shall be for no more than 5,760 acres. Acreage held under a combined hydrocarbon lease in a Special Tar Sand Area is not chargeable to State oil and gas limitations allowable in § 3101.2 of this title.

(b) The rental rate for a combined hydrocarbon lease shall be \$2 per acre per year and shall be payable annually in advance.

(c)(1) The royalty rate for a combined hydrocarbon lease converted from an oil and gas lease shall be that provided for in the original oil and gas lease.

(2) The royalty rate for a combined hydrocarbon lease converted from a valid claim based on a mineral location shall be 12½ percent.

(3) A reduction of royalties may be granted either as provided in § 3103.4 of this title or, at the request of the lessee and upon a review of information provided by the lessee, prior to commencement of commercial operations if the purpose of the request is to promote development and the maximum production of tar sand.

(d)(1) Existing oil and gas leases and valid claims based on mineral locations may be unitized prior to or after the lease or claim has been converted to a combined hydrocarbon lease. The requirements of 43 CFR part 3180 shall provide the procedures and general guidelines for unitization of combined hydrocarbon leases. For leases within units of the National Park System, unitization requires the consent of the Regional Director of the National Park Service in accordance with § 3140.4-1(b) of this title.

(2) If the plan of operations submitted for conversion is designed to cover a unit, a fully executed unit agreement shall be approved before the plan of operations applicable to the unit may be approved under § 3140.2 of this title. The proposed plan of operations and the proposed unit agreement may be reviewed concurrently. The approved unit agreement shall be

#### 43 CFR Ch. II (10-1-08 Edition)

effective after the leases or claims subject to it are converted to combined hydrocarbon leases. The plan of operations shall explain how and when each lease included in the unit operation will be developed.

(e) Except as provided for in this subpart, the regulations set out in part 3100 of this title are applicable, as appropriate, to all combined hydrocarbon leases issued under this subpart.

[47 FR 22478, May 24, 1982, as amended at 48 FR 33682, July 22, 1983; 55 FR 12351, Apr. 3, 1990; 61 FR 4752, Feb. 8, 1996; 70 FR 58614, Oct. 7, 2005]

#### § 3140.2 Applications.

##### § 3140.2-1 Forms.

No special form is required for a conversion application.

##### § 3140.2-2 Who may apply.

Only owners of oil and gas leases issued within Special Tar Sands Areas, on or before November 16, 1981, and owners of valid claims based on mineral locations within Special Tar Sands Areas, are eligible to convert leases or claims to combined hydrocarbon leases in Special Tar Sands Areas.

[55 FR 12351, Apr. 3, 1990]

##### § 3140.2-3 Application requirements.

(a) The applicant shall submit to the State Director, Utah State Office of the Bureau of Land Management, a written request for a combined hydrocarbon lease signed by the owner of the lease or valid claim which shall be accompanied by 3 copies of a plan of operations which shall meet the requirements of 43 CFR 3592.1 and which shall provide for reasonable protection of the environment and diligent development of the resources requiring enhanced recovery methods of development or mining.

(b) A plan of operations may be modified or amended before or after conversion of a lease or valid claim to reflect changes in technology, slippages in schedule beyond the control of the lessee, new information about the resource or the economic or environmental aspects of its development, changes to or initiation of applicable unit agreements or for other purposes. To obtain approval of a modification or

## Bureau of Land Management, Interior

## §3140.4-1

amended plan, the applicant shall submit a written statement of the proposed changes or supplements and the justification for the changes proposed. Any modifications shall be in accordance with 43 CFR 3592.1(c). The approval of the modification or amendment is the responsibility of the authorized officer. Changes or modification to the plan of operations shall have no effect on the primary term of the lease. The authorized officer shall, prior to approving any amendment or modification, review the modification or amendment with the appropriate surface management agency. For leases within units of the National Park System, no amendment or modification shall be approved without the consent of the Regional Director of the National Park Service in accordance with §3140.7 of this title.

(c) The plan of operations may be for a single existing oil and gas lease or valid claim or for an area of proposed unit operation.

(d) The plan of operations shall identify by lease number all Federal oil and gas leases proposed for conversion and identify valid claims proposed for conversion by the recordation number of the mining claim.

(e) The plan of operations shall include any proposed designation of operator or proposed operating agreement.

(f) The plan of operations may include an exploration phase, if necessary, but it shall include a development phase. Such a plan can be approved even though it may indicate work under the exploration phase is necessary to perfect the proposed plan for the development phase as long as the overall plan demonstrates reasonable protection of the environment and diligent development of the resources requiring enhanced recovery methods of mining.

(g)(1) Upon determination that the plan of operations is complete, the authorized officer shall suspend the term of the Federal oil and gas lease(s) as of the date that the complete plan was filed until the plan is finally approved or rejected. Only the term of the oil and gas lease shall be suspended, not any operation and production requirements thereunder.

(2) If the authorized officer determines that the plan of operations is not complete, the applicant shall be notified that the plan is subject to rejection if not completed within the period specified in the notice.

(3) The authorized officer may request additional data after the plan of operations has been determined to be complete. This request for additional information shall have no effect on the suspension of the running of the oil and gas lease.

[47 FR 22478, May 24, 1982, as amended at 55 FR 12351, Apr. 3, 1990]

### §3140.3 Time limitations.

#### §3140.3-1 Conversion applications.

A plan of operations to convert an existing oil and gas lease or valid claim based on a mineral location to a combined hydrocarbon lease shall be filed on or before November 15, 1983, or prior to the expiration of the oil and gas lease, whichever is earlier, except as provided in §3140.1-2 of this title.

#### §3140.3-2 Action on an application.

The authorized officer shall take action on an application for conversion within 15 months of receipt of a proposed plan of operations.

[47 FR 22478, May 24, 1982, as amended at 55 FR 12351, Apr. 3, 1990]

### §3140.4 Conversion.

#### §3140.4-1 Approval of plan of operations (and unit and operating agreements).

(a) The owner of an oil and gas lease, or the owner of a valid claim based on a mineral location shall have such lease or claim converted to a combined hydrocarbon lease when the plan of operations, filed under §3140.2 of this title, is deemed acceptable and is approved by the authorized officer.

(b) The conversion of a lease within a unit of the National Park System shall be approved only with the consent of the Regional Director of the National Park Service in accordance with §3140.7 of this title.

(c) A plan of operations may not be approved in part but may be approved where it contains an appropriately

## **§ 3140.4-2**

staged plan of exploration and development operations.

[47 FR 22478, May 24, 1982, as amended at 55 FR 12351, Apr. 3, 1990]

### **§ 3140.4-2 Issuance of the combined hydrocarbon lease.**

(a) After a plan of operations is found acceptable, and is approved, the authorized officer shall prepare and submit to the owner, for execution, a combined hydrocarbon lease containing all appropriate terms and conditions, including any necessary stipulations that were part of the oil and gas lease being converted, as well as any additional stipulations, such as those required to ensure compliance with the plan of operations.

(b) The authorized officer shall not sign the combined hydrocarbon lease until it has been executed by the conversion applicant and the lease or claim to be converted has been formally relinquished to the United States.

(c) The effective date of the combined hydrocarbon lease shall be the first day of the month following the date that the authorized officer signs the lease.

(d)(1) Except to the extent that any such lease would exceed 5,210 acres, the authorized officer may issue, upon the request of the applicant, 1 combined hydrocarbon lease to cover contiguous oil and gas leases or valid claims based on mineral locations which have been approved for conversion.

(2) To the extent necessary to promote the development of the resource, the authorized officer may issue, upon the request of the applicant, one combined hydrocarbon lease that does not exceed 5,760 acres, which shall be as nearly compact as possible, to cover non-contiguous oil and gas leases or valid claims which have been approved for conversion.

[47 FR 22478, May 24, 1982, as amended at 70 FR 58614, Oct. 7, 2005]

### **§ 3140.5 Duration of the lease.**

A combined hydrocarbon lease shall be for a primary term of 10 years and for so long thereafter as oil or gas is produced in paying quantities.

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 3140.6 Use of additional lands.**

(a) The authorized officer may non-competitively lease additional lands for ancillary facilities in a Special Tar Sand Area that are needed to support any operations necessary for the recovery of tar sand. Such uses include, but are not limited to, mill site or waste disposal. Application for a lease or permit to use additional lands shall be filed under the provisions of part 2920 of this title with the proper BLM office having jurisdiction of the lands. The application for additional lands may be filed at the time a plan of operations is filed.

(b) A lease for the use of additional lands shall not be issued when the use can be authorized under parts 2800 and 2880 of this title. Such uses include, but are not limited to, reservoirs, pipelines, electrical generation systems, transmission lines, roads, and railroads.

(c) Within units of the National Park System, permits or leases for additional lands shall only be issued by the National Park Service. Applications for such permits or leases shall be filed with the Regional Director of the National Park Service.

### **§ 3140.7 Lands within the National Park System.**

Conversions of existing oil and gas leases and valid claims based on mineral locations to combined hydrocarbon leases within units of the National Park System shall be allowed only where mineral leasing is permitted by law and where the lands covered by the lease or claim proposed for conversion are open to mineral resource disposition in accordance with any applicable minerals management plan. (See 43 CFR 3100.0-3 (g)(4)). In order to consent to any conversion or any subsequent development under a combined hydrocarbon lease requiring further approval, the Regional Director of the National Park Service shall find that there will be no resulting significant adverse impacts on the resources and administration of such areas or on other contiguous units of the National

Park System in accordance with § 3109.2(b) of this title.

[47 FR 22478, May 24, 1982, as amended at 48 FR 33682, July 22, 1983; 55 FR 12351, Apr. 3, 1990]

### Subpart 3141—Leasing in Special Tar Sand Areas

SOURCE: 48 FR 7422, Feb. 18, 1983, unless otherwise noted.

NOTE: The information collection requirements contained in 43 CFR subpart 3141 do not require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* because there are fewer than 10 respondents annually.

#### § 3141.0-1 Purpose.

The purpose of this subpart is to provide for the competitive leasing of lands and issuance of Combined Hydrocarbon Leases, Oil and Gas Leases, or Tar Sand Leases within special tar sand areas.

[70 FR 58614, Oct. 7, 2005]

#### § 3141.0-3 Authority.

The regulations in this subpart are issued under the authority of the Mineral Leasing Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 *et seq.*), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Combined Hydrocarbon Leasing Act of 1981 (95 Stat. 1070), and the Energy Policy Act of 2005 (Pub. L. 109-58).

[70 FR 58615, Oct. 7, 2005]

#### § 3141.0-5 Definitions.

As used in this subpart, the term:

(a) *Combined hydrocarbon lease* means a lease issued in a Special Tar Sand Area for the removal of any gas and nongaseous hydrocarbon substance other than coal, oil shale or gilsonite.

(b) For purposes of this subpart, “*oil and gas lease*” means a lease issued in a Special Tar Sand Area for the exploration and development of oil and gas resources other than tar sand.

(c) Tar sand lease means a lease issued in a Special Tar Sand area exclusively for the exploration for and extraction of tar sand.

(d) *Special Tar Sand Area* means an area designated by the Department of the Interior’s Orders of November 20, 1980 (45 FR 76800), and January 21, 1981 (46 FR 6077), and referred to in those orders as Designated Tar Sand Areas, as containing substantial deposits of tar and sand.

(e) *Tar sand* means any consolidated or unconsolidated rock (other than coal, oil shale or gilsonite) that either: (1) Contains a hydrocarbonaceous material with a gas-free viscosity, at original reservoir temperature greater than 10,000 centipoise, or (2) contains a hydrocarbonaceous material and is produced by mining or quarrying.

[47 FR 22478, May 24, 1982, as amended at 70 FR 58615, Oct. 7, 2005; 71 FR 28779, May 18, 2006]

#### § 3141.0-8 Other Applicable Regulations.

(a) *Combined hydrocarbon leases.* (1) The following provisions of part 3100 of this title, as they relate to competitive leasing, apply to the issuance and administration of combined hydrocarbon leases issued under this part.

(i) All of subpart 3100, with the exception of § 3100.3-2;

(ii) The following sections of subpart 3101: §§ 3101.1-1, 3101.2-1, 3101.2-2, 3101.2-4, 3101.2-5, 3101.7-1, 3101.7-2, and 3101.7-3;

(iii) All of subpart 3102;

(iv) All of subpart 3103, with the exception of §§ 3103.2-1, those portions of 3103.2-2 dealing with noncompetitive leases, and 3103.3-1 (a), (b), and (c);

(v) All of subpart 3104;

(vi) All of subpart 3105;

(vii) All of subpart 3106, with the exception of § 3106.1 (c);

(viii) All of subpart 3107, with the exception of § 3107.7;

(ix) All of subpart 3108; and

(x) All of subpart 3109, with special emphasis on § 3109.2 (b).

(2) Prior to commencement of operations, the lessee shall develop either a plan of operations as described in 43 CFR 3592.1 which ensures reasonable protection of the environment or file an application for a permit to drill as described in 43 CFR part 3160, whichever is appropriate.

(3) The provisions of 43 CFR part 3180 shall serve as general guidance to the

### § 3141.1

### 43 CFR Ch. II (10–1–08 Edition)

administration of combined hydrocarbon leases issued under this part to the extent they may be included in unit or cooperative agreements.

(b) *Oil and gas leases.* (1) All of the provisions of parts 3100, 3110, and 3120 of this title apply to the issuance and administration of oil and gas leases issued under this part.

(2) All of the provisions of part 3160 apply to operations on an oil and gas lease issued under this part.

(3) The provisions of 43 CFR part 3180 apply to the administration of oil and gas leases issued under this part.

(c) *Tar sand leases.* (1) The following provisions of part 3100 of this title, as they relate to competitive leasing, apply to the issuance of tar sand leases issued under this part.

(i) All of subpart 3102;

(ii) All of subpart 3103 with the exception of sections 3103.2–1, 3103.2–2(d), and 3103.3;

(iii) All of section 3120.4; and

(iv) All of section 3120.5.

(2) Prior to commencement of operations, the lessee shall develop a plan of operations as described in 43 CFR 3592.1 which ensures reasonable protection of the environment.

[48 FR 7422, Feb. 18, 1983, as amended at 55 FR 12351, Apr. 3, 1990; 70 FR 58615, Oct. 7, 2005]

#### § 3141.1 General.

(a) Combined hydrocarbons or tar sands within a Special Tar Sand Area shall be leased only by competitive bonus bidding.

(b) Oil and gas within a Special Tar Sand Area shall be leased by competitive bonus bidding as described in 43 CFR part 3120 or if no qualifying bid is received during the competitive bidding process, the area offered for competitive lease may be leased non-competitively as described in 43 CFR part 3110.

(c) The authorized officer may issue either combined hydrocarbon leases, or oil and gas leases for oil and gas within such areas.

(d) The rights to explore for or develop tar sand deposits in a Special Tar Sand Area may be acquired through either a combined hydrocarbon lease or a tar sand lease.

(e) An oil and gas lease in a Special Tar Sand Area does not include the rights to explore for or develop tar sand.

(f) A tar sand lease in a Special Tar Sand Area does not include the rights to explore for or develop oil and gas.

(g) The minimum acceptable bid for a lease issued for tar sand shall be \$2 per acre.

(h) The acreage of combined hydrocarbon leases or tar sand leases held within a Special Tar Sand Area shall not be charged against acreage limitations for the holding of oil and gas leases as provided in section 3101.2–1 of this title.

(i)(1) The authorized officer may non-competitively lease additional lands for ancillary facilities in a Special Tar Sand Area that are shown by an applicant to be needed to support any operations necessary for the recovery of tar sand. Such uses include, but are not limited to, mill siting or waste disposal. An application for a lease or permit to use additional lands shall be filed under the provisions of part 2920 of this title with the proper BLM office having jurisdiction of the lands. The application for additional lands may be filed at the time a plan of operations is filed.

(2) A lease for the use of additional lands shall not be issued under this part when the use can be authorized under part 2800 of this title. Such uses include, but are not limited to, reservoirs, pipelines, electrical generation systems, transmission lines, roads and railroads.

(3) Within units of the National Park System, permits or leases for additional lands for any purpose shall be issued only by the National Park Service. Applications for such permits or leases shall be filed with the Regional Director of the National Park Service.

[47 FR 22478, May 24, 1982, as amended at 70 FR 58615, Oct. 7, 2005]

#### § 3141.2 Prelease exploration within Special Tar Sand Areas.

##### § 3141.2–1 Geophysical exploration.

Geophysical exploration in Special Tar Sand Areas shall be governed by part 3150 of this title. Information obtained under a permit shall be made

## Bureau of Land Management, Interior

## §3141.2-2

available to the Bureau of Land Management upon request.

[48 FR 7422, Feb. 18, 1983, as amended at 55 FR 12351, Apr. 3, 1990]

### §3141.2-2 Exploration licenses.

(a) Any person(s) qualified to hold a lease under the provisions of subpart 3102 of this title and this subpart may obtain an exploration license to conduct core drilling and other exploration activities to collect geologic, environmental and other data concerning tar sand resources only on lands, the surface of which are under the jurisdiction of the Bureau of Land Management, within or adjacent to a Special Tar Sand Area. The application for such a license shall be submitted to the proper BLM office having jurisdiction of the lands. No drilling for oil or gas will be allowed under an exploration license issued under this subpart. No specific form is required for an application for an exploration license.

(b) The application for an exploration license shall be subject to the following requirements:

(1) Each application shall contain the name and address of the applicant(s);

(2) Each application shall be accompanied by a nonrefundable filing fee of \$250.00;

(3) Each application shall contain a description of the lands covered by the application according to section, township and range in accordance with the official survey;

(4) Each application shall include 3 copies of an exploration plan which complies with the requirements of 43 CFR 4392.1 (a); and

(5) An application shall cover no more than 5,760 acres, which shall be as compact as possible. The authorized officer may grant an exploration license covering more than 5,760 acres only if the application contains a justification for an exception to the normal limitation.

(c) The authorized officer may, if he/she determines it necessary to avoid impacts resulting from duplication of exploration activities, require applicants for exploration licenses to provide an opportunity for other parties to participate in exploration under the license on a pro rata cost sharing basis. If joint participation is determined

necessary, it shall be conducted according to the following:

(1) Immediately upon the notification of a determination that parties shall be given an opportunity to participate in the exploration license, the applicant shall publish a "Notice of Invitation," approved by the authorized officer, once every week for 2 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands covered by the exploration license are situated. This notice shall contain an invitation to the public to participate in the exploration license on a pro rata cost sharing basis. Copies of the "Notice of Invitation" shall be filed with the authorized officer at the time of publication by the applicant for posting in the proper BLM office having jurisdiction over the lands covered by the application for at least 30 days prior to the issuance of the exploration license.

(2) Any person seeking to participate in the exploration program described in the Notice of Invitation shall notify the authorized officer and the applicant in writing of such intention within 30 days after posting in the proper BLM office having jurisdiction over the lands covered by the Notice of Invitation. The authorized officer may require modification of the original exploration plan to accommodate the legitimate exploration needs of the person(s) seeking to participate and to avoid the duplication of exploration activities in the same area, or that the person(s) should file a separate application for an exploration license.

(3) An application to conduct exploration which could have been conducted under an existing or recent exploration license issued under this paragraph may be rejected.

(d) The authorized officer may accept or reject an exploration license application. An exploration license shall become effective on the date specified by the authorized officer as the date when exploration activities may begin. The exploration plan approved by the Bureau of Land Management shall be attached and made a part of each exploration license.

(e) An exploration license shall be subject to these terms and conditions:

### § 3141.3

(1) The license shall be for a term of not more than 2 years;

(2) The rental shall be \$2 per acre per year payable in advance;

(3) The licensee shall provide a bond in an amount determined by the authorized officer, but not less than \$5,000. The authorized officer may accept bonds furnished under subpart 3104 of this title, if adequate. The period of liability under the bond shall be terminated only after the authorized officer determines that the terms and conditions of the license, the exploration plan and the regulations have been met;

(4) The licensee shall provide to the Bureau of Land Management upon request all required information obtained under the license. Any information provided shall be treated as confidential and proprietary, if appropriate, at the request of the licensee, and shall not be made public until the areas involved have been leased or only if the Bureau of Land Management determines that public access to the data will not damage the competitive position of the licensee.

(5) Operations conducted under a license shall not unreasonably interfere with or endanger any other lawful activity on the same lands, shall not damage any improvements on the lands, and shall not result in any substantial disturbance to the surface of the lands and their resources;

(6) The authorized officer shall include in each license requirements and stipulations to protect the environment and associated natural resources, and to ensure reclamation of the land disturbed by exploration operations;

(7) When unforeseen conditions are encountered that could result in an action prohibited by paragraph (e)(5) of this section, or when warranted by geologic or other physical conditions, the authorized officer may adjust the terms and conditions of the exploration license, may direct adjustment in the exploration plan;

(8) The licensee may submit a request for modification of the exploration plan to the authorized officer. Any modification shall be subject to the regulations in this section and the terms and conditions of the license. The authorized officer may approve the

### 43 CFR Ch. II (10–1–08 Edition)

modification after any necessary adjustments to the terms and conditions of the license that are accepted in writing by the licensee; and

(9) The license shall be subject to termination or suspension as provided in § 2920.9–3 of this title.

[48 FR 7422, Feb. 18, 1983, as amended at 55 FR 12351, Apr. 3, 1990; 70 FR 58615, Oct. 7, 2005]

#### § 3141.3 Land use plans.

No lease shall be issued under this subpart unless the lands have been included in a land use plan which meets the requirements under part 1600 of this title or an approved Minerals Management Plan of the National Park Service. The decision to hold a lease sale and issue leases shall be in conformance with the appropriate plan.

#### § 3141.4 Consultation.

##### § 3141.4–1 Consultation with the Governor.

The Secretary shall consult with the Governor of the State in which any tract proposed for sale is located. The Secretary shall give the Governor 30 days to comment before determining whether to conduct a lease sale. The Secretary shall seek the recommendations of the Governor of the State in which the lands proposed for lease are located as to whether or not to lease such lands and what alternative actions are available and what special conditions could be added to the proposed lease(s) to mitigate impacts. The Secretary shall accept the recommendations of the Governor if he/she determines that they provide for a reasonable balance between the national interest and the State's interest. The Secretary shall communicate to the Governor in writing and publish in the FEDERAL REGISTER the reasons for his/her determination to accept or reject such Governor's recommendations.

##### § 3141.4–2 Consultation with others.

(a) Where the surface is administered by an agency other than the Bureau of Land Management, including lands patented or leased under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*), all leasing under this subpart shall be

## Bureau of Land Management, Interior

## §3141.6-1

in accordance with the consultation requirements of subpart 3100 of this title.

(b) The issuance of combined hydrocarbon leases, oil and gas leases, and tar sand leases within special tar sand areas in units of the National Park System shall be allowed only where mineral leasing is permitted by law and where the lands are open to mineral resource disposition in accordance with any applicable Minerals Management Plan. In order to consent to any issuance of a combined hydrocarbon lease, oil and gas lease, tar sand lease, or subsequent development of hydrocarbon resources within a unit of National Park System, the Regional Director of the National Park Service shall find that there will be no resulting significant adverse impacts to the resources and administration of the unit or other contiguous units of the National Park System in accordance with §3109.2 (b) of this title.

[48 FR 7422, Feb. 18, 1983, as amended at 55 FR 12351, Apr. 3, 1990; 70 FR 58615, Oct. 7, 2005]

### §3141.5 Leasing procedures.

#### §3141.5-1 Economic evaluation.

Prior to any lease sale for a combined hydrocarbon lease, the authorized officer shall request an economic evaluation of the total hydrocarbon resource on each proposed lease tract exclusive of coal, oil shale, or gilsonite.

[70 FR 58615, Oct. 7, 2005]

#### §3141.5-2 Term of lease.

(a) Combined hydrocarbon leases or oil and gas leases shall have a primary term of 10 years and shall remain in effect so long thereafter as oil or gas is produced in paying quantities.

(b) Tar Sand leases shall have a primary term of 10 years and shall remain in effect so long thereafter as tar sand is produced in paying quantities.

[70 FR 58615, Oct. 7, 2005]

#### §3141.5-3 Royalties and rentals.

(a) The royalty rate on all combined hydrocarbon leases or tar sand leases is 12½ percent of the value of production removed or sold from a lease. The Minerals Management Service shall be re-

sponsible for collecting and administering royalties.

(b) The lessee may request the Secretary to reduce the royalty rate applicable to tar sand prior to commencement of commercial operations in order to promote development and maximum production of the tar sand resource in accordance with procedures established by the Bureau of Land Management and may request a reduction in the royalty after commencement of commercial operations in accordance with §3103.4-1 of this title.

(c) The rental rate for a combined hydrocarbon lease shall be \$2 per acre per year, and shall be payable annually in advance.

(d) The rental rate for a tar sand lease shall be \$1.50 per acre for the first 5 years and \$2.00 per acre for each year thereafter.

(e) Except as explained in paragraphs (a), (b), and (c) of this section, all other provisions of §§3103.2 and 3103.3 of this title apply to combined hydrocarbon leasing.

[48 FR 7422, Feb. 18, 1983, as amended at 55 FR 12351, Apr. 3, 1990; 70 FR 58615, Oct. 7, 2005]

#### §3141.5-4 Lease size.

Combined hydrocarbon leases or tar sand leases in Special Tar Sand Areas shall not exceed 5,760 acres.

[70 FR 58616, Oct. 7, 2005]

#### §3141.5-5 Dating of lease.

A combined hydrocarbon lease shall be effective as of the first day of the month following the date the lease is signed on behalf of the United States, except that where prior written request is made, a lease may be made effective on the first of the month in which the lease is signed.

### §3141.6 Sale procedures.

#### §3141.6-1 Initiation of competitive lease offering.

The Bureau of Land Management may, on its own motion, offer lands through competitive bidding. A request or expression(s) of interest in tract(s) for competitive lease offerings shall be submitted in writing to the proper BLM office.

## § 3141.6-2

### § 3141.6-2 Publication of a notice of competitive lease offering.

(a) *Combined Hydrocarbon Leases.* Where a determination to offer lands for competitive leasing is made, a notice shall be published of the lease sale in the FEDERAL REGISTER and a newspaper of general circulation in the area in which the lands to be leased are located. The publication shall appear once in the FEDERAL REGISTER and at least once a week for 3 consecutive weeks in a newspaper, or for other such periods deemed necessary. The notice shall specify the time and place of sale; the manner in which the bids may be submitted; the description of the lands; the terms and conditions of the lease, including the royalty and rental rates; the amount of the minimum bid; and shall state that the terms and conditions of the leases are available for inspection and designate the proper BLM office where bid forms may be obtained.

(b) *Tar Sand Leases or Oil and Gas Leases.* At least 45 days prior to conducting a competitive auction, lands to be offered for a competitive lease sale shall be posted in the proper BLM office having jurisdiction over the lands as specified in § 1821.10 of this chapter, and shall be made available for posting to surface managing agencies having jurisdiction over any of the included lands.

[70 FR 58616, Oct. 7, 2005, as amended at 71 FR 28779, May 18, 2006]

### § 3141.6-3 Conduct of sales.

(a) *Combined Hydrocarbon Leases.* (1) Competitive sales shall be conducted by the submission of written sealed bids.

(2) Minimum bids shall be not less than \$25 per acre.

(3) In the event that only 1 sealed bid is received and it is equal to or greater than the minimum bid, that bid shall be considered the highest bid.

(4) The authorized officer may reject any or all bids.

(5) The authorized officer may waive minor deficiencies in the bids or the lease sale advertisement.

(6) A bid deposit of one-fifth of the amount of the sealed bid shall be required and shall accompany the sealed

## 43 CFR Ch. II (10-1-08 Edition)

bid. All bid deposits shall be in the form of either a certified check, money order, bank cashier's check or cash.

(b) *Oil and Gas Leases.* Lease sales for oil and gas leases will be conducted using the procedures for oil and gas leases in § 3120.5 of this title.

(c) *Tar Sand Leases.* (1) Parcels shall be offered by oral bidding.

(2) The winning bid shall be the highest oral bid by a qualified bidder, equal to or exceeding \$2.00 per acre.

(3) Payments shall be made as provided in § 3120.5-2 of this title.

[48 FR 7422, Feb. 18, 1983, as amended at 70 FR 58616, Oct. 7, 2005]

### § 3141.6-4 Qualifications.

Each bidder shall submit with the bid a statement over the bidder's signature with respect to compliance with subpart 3102 of this title.

### § 3141.6-5 Fair market value for combined hydrocarbon leases.

Only those bids which reflect the fair market value of the tract(s) as determined by the authorized officer shall be accepted; all other bids shall be rejected.

### § 3141.6-6 Rejection of bid.

If the high bid is rejected for failure by the successful bidder to execute the lease forms and pay the balance of the bonus bid, or otherwise to comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited.

### § 3141.6-7 Consideration of next highest bid.

The Department reserves the right to accept the next highest bid if the highest bid is rejected. In no event shall an offer be made to the next highest bidder if the difference between his/her bid and that of the rejected successful bidder is greater than the one-fifth bonus forfeited by the rejected successful bidder.

[55 FR 12351, Apr. 3, 1990]

### § 3141.7 Award of lease.

After determining the highest responsible qualified bidder, the authorized officer shall send 3 copies of the

## Bureau of Land Management, Interior

## § 3142.2-1

lease on a form approved by the Director, and any necessary stipulations, to the successful bidder. The successful bidder shall, not later than the 30th day after receipt of the lease, execute the lease, pay the balance of the bid and the first year's rental, and file a bond as required in subpart 3104 of this title. Failure to comply with this section shall result in rejection of the lease.

### Subpart 3142—Paying Quantities/ Diligent Development for Combined Hydrocarbon Leases

SOURCE: 51 FR 7276, Mar. 3, 1986, unless otherwise noted.

#### § 3142.0-1 Purpose.

This subpart provides definitions and procedures for meeting the production in paying quantities and the diligent development requirements for tar sand in all combined hydrocarbon leases.

#### § 3142.0-3 Authority.

These regulations are issued under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 *et seq.*), the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351-359), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*) and the Combined Hydrocarbon Leasing Act of 1981 (95 Stat. 1070).

#### § 3142.0-5 Definitions.

As used in part 3140 of this title, the term *production in paying quantities* means:

- (a) Production, in compliance with an approved plan of operations and by nonconventional methods, of oil and gas which can be marketed; or
- (b) Production of oil or gas by conventional methods as the term is currently used in part 3160 of this title.

[51 FR 7276, Mar. 3, 1986, as amended at 70 FR 58616, Oct. 7, 2005]

#### § 3142.1 Diligent development.

A lessee shall have met his/her diligent development obligation if:

(a) The lessee is conducting activity on the lease in accordance with an approved plan of operations; and

(b) The lessee files with the authorized officer, not later than the end of the eighth lease year, a supplement to the approved plan of operations which shall include the estimated recoverable tar sand reserves and a detailed development plan for the next stage of operations;

(c) The lessee has achieved production in paying quantities, as that term is defined in § 3142.0-5(a) of this title, by the end of the primary term; and

(d) The lessee annually produces the minimum amount of tar sand established by the authorized officer under the lease in the minimum production schedule which shall be made part of the plan of operations or pays annually advance royalty in lieu of this minimum production.

#### § 3142.2 Minimum production levels.

##### § 3142.2-1 Minimum production schedule.

Upon receipt of the supplement to the plan of operations described in § 3142.1(b) of this title, the authorized officer shall examine the information furnished by the lessee and determine if the estimate of the recoverable tar sand reserves is adequate and reasonable. In making this determination, the authorized officer may request, and the lessee shall furnish, any information that is the basis of the lessee's estimate of the recoverable tar sand reserves. As part of the authorized officer's determination that the estimate of the recoverable tar sand reserves is adequate and reasonable, he/she may consider, but is not limited to, the following: or grade, strip ratio, vertical and horizal continuity, extract process recoverability, and proven or unproven status of extraction technology, terrain, environmental mitigation factors, marketability of products and capital operations costs. The authorized officer shall then establish as soon as possible, but prior to the beginning of the eleventh year, based upon the estimate of the recoverable tar sand reserves, a minimum annual tar sand production schedule for the lease or unit operations which shall start in the

## **§ 3142.2-2**

eleventh year of the lease. This minimum production level shall escalate in equal annual increments to a maximum of 1 percent of the estimated recoverable tar sand reserves in the twentieth year of the lease and remain at 1 percent each year thereafter.

### **§ 3142.2-2 Advance royalties in lieu of production.**

(a) Failure to meet the minimum annual tar sand production schedule level in any year shall result in the assessment of an advance royalty in lieu of production which shall be credited to future production royalty assessments applicable to the lease or unit.

(b) If there is no production during the lease year, and the lessee has reason to believe that there shall be no production during the remainder of the lease year, the lessee shall submit to the authorized officer a request for suspension of production at least 90 days prior to the end of that lease year and a payment sufficient to cover any advance royalty due and owing as a result of the failure to produce. Upon receipt of the request for suspension of production and the accompanying payment, the authorized officer shall approve a suspension of production for that lease year and the lease shall not expire during that year for lack of production.

(c) If there is production on the lease or unit during the lease year, but such production fails to meet the minimum production schedule required by the plan of operations for that lease or unit, the lessee shall pay an advance royalty within 60 days of the end of the lease year in an amount sufficient to cover the difference between such actual production and the production schedule required by the plan of operations for that lease or unit and the authorized officer shall direct a suspension of production for those periods during which no production occurred.

### **§ 3142.3 Expiration.**

Failure of the lessee to pay advance royalty within the time prescribed by the authorized officer, or failure of the lessee to comply with any other provisions of this subpart following the end of the primary term of the lease, shall result in the automatic expiration of

## **43 CFR Ch. II (10-1-08 Edition)**

the lease as of the first of the month following notice to the lessee of its failure to comply. The lessee shall remain subject to the requirement of applicable laws, regulations and lease terms which have not been met at the expiration of the lease.

## Subpart 3150—Onshore Oil and Gas Geophysical Exploration; General

### § 3150.0-1 Purpose.

The purpose of this part is to establish procedures for conducting oil and gas geophysical exploration operations when authorization for such operations is required from the Bureau of Land Management. Geophysical exploration on public lands, the surface of which is administered by the Bureau, requires Bureau approval. The procedures in this part also apply to geophysical exploration conducted under the rights granted by any Federal oil and gas lease unless the surface is administered by the U.S. Forest Service. However, a lessee may elect to conduct exploration operations outside of the rights granted by the lease, in which case authorization from the surface managing agency or surface owner may be required. At the request of any other surface managing agency, the procedures in this part may be applied on a case-by-case basis to unleased public lands administered by such agency. The procedures of this part do not apply to:

- (a) Casual use activities;
- (b) Operations conducted on private surface overlying public lands unless such operations are conducted by a lessee under the rights granted by the Federal oil and gas lease; and
- (c) Exploration operations conducted in the Arctic National Wildlife Refuge in accordance with section 1002 of the Alaska National Interest Lands Conservation Act (See 50 CFR part 37).

### § 3150.0-3 Authority.

The Mineral Leasing Act of 1920, as amended and supplemented, (30 U.S.C. 181 *et seq.*), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351-359), the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 *et seq.*), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Independent Offices Appropriations Act of 1952 (31 U.S.C. 483a), the Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6504) and the Department of the Interior Appropriations Act, Fiscal Year 1981 (42 U.S.C. 6508).

### § 3150.0-5 Definitions.

As used in this part, the term:

(a) *Oil and gas geophysical exploration* means activity relating to the search for evidence of oil and gas which requires the physical presence upon the lands and which may result in damage to the lands or the resources located thereon. It includes, but is not limited to, geophysical operations, construction of roads and trails and cross-country transit of vehicles over such lands. It does not include core drilling for subsurface geologic information or drilling for oil and gas; these activities shall be authorized only by the issuance of an oil and gas lease and the approval of an Application for a Permit to Drill. The regulations in this part, however, are not intended to prevent drilling operations necessary for placing explosive charges, where permissible, for seismic exploration.

(b) *Casual use* means activities that involve practices which do not ordinarily lead to any appreciable disturbance or damage to lands, resources and improvements. For example, activities which do not involve use of heavy equipment or explosives and which do not involve vehicular movement except over established roads and trails are casual use.

[53 FR 17359, May 16, 1988; 53 FR 31959, Aug. 22, 1988]

### § 3150.1 Suspension, revocation or cancellation.

The right to conduct exploration under notices of intent and oil and gas geophysical exploration permits may be revoked or suspended, after notice, by the authorized officer and upon a final administrative finding of a violation of any term or condition of the instrument, including, but not limited to, terms and conditions requiring compliance with regulations issued under Acts applicable to the public lands and applicable State air and water quality standards or implementation plans. The Secretary may order an immediate temporary suspension of activities authorized under a permit or other use authorization prior to a hearing or final administrative finding if he/she determines that such a suspension is necessary to protect health or

## **§ 3150.2**

safety or the environment. Further, where other applicable law contains specific provisions for suspension, revocation, or cancellation of a permit or other authorization to use, occupy, or develop the public lands, the specific provisions of such law shall prevail.

### **§ 3150.2 Appeals.**

(a) A party adversely affected by a decision or approval of the authorized officer may appeal that decision to the Interior Board of Land Appeals as set forth in part 4 of this title.

(b) All decisions and approvals of the authorized officer under this part shall remain effective pending appeal unless the Interior Board of Land Appeals determines otherwise upon consideration of the standards stated in this paragraph. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of the authorized officer under this part. A petition for a stay of a decision or approval of the authorized officer shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards:

(1) The relative harm to the parties if the stay is granted or denied,

(2) The likelihood of the appellant's success on the merits,

(3) The likelihood of irreparable harm to the appellant or resources if the stay is not granted, and

(4) Whether the public interest favors granting the stay.

Nothing in this paragraph shall diminish the discretionary authority of the authorized officer to stay the effectiveness of a decision subject to appeal pursuant to paragraph (a) of this section upon a request by an adversely affected party or on the authorized officer's own initiative. If the authorized officer denies such a request, the requester can petition for a stay of the denial decision by filing a petition with the Interior Board of Land Appeals that addresses the standards described above in this paragraph.

[57 FR 9012, Mar. 13, 1992, as amended at 57 FR 44336, Sept. 25, 1992]

## **43 CFR Ch. II (10–1–08 Edition)**

### **Subpart 3151—Exploration Outside of Alaska**

#### **§ 3151.1 Notice of intent to conduct oil and gas geophysical exploration operations.**

Parties wishing to conduct oil and gas geophysical exploration outside of the State of Alaska shall file a Notice of Intent to Conduct Oil and Gas Exploration Operations, referred to herein as a notice of intent. The notice of intent shall be filed with the District Manager of the proper BLM office on the form approved by the Director. Within 5 working days of the filing date, the authorized officer shall process the notice of intent and notify the operator of practices and procedures to be followed. If the notice of intent cannot be processed within 5 working days of the filing date, the authorized officer shall promptly notify the operator as to when processing will be completed, giving the reason for the delay. The operator shall, within 5 working days of the filing date, or such other time as may be convenient for the operator, participate in a field inspection if requested by the authorized officer. Signing of the notice of intent by the operator shall signify agreement to comply with the terms and conditions contained therein and in this part, and with all practices and procedures specified at any time by the authorized officer.

#### **§ 3151.2 Notice of completion of operations.**

Upon completion of exploration, there shall be filed with the District Manager a Notice of Completion of Oil and Gas Exploration Operations. Within 30 days after this filing, the authorized officer shall notify the party whether rehabilitation of the lands is satisfactory or whether additional rehabilitation is necessary, specifying the nature and extent of actions to be taken by the operator.

### **Subpart 3152—Exploration in Alaska**

#### **§ 3152.1 Application for oil and gas geophysical exploration permit.**

Parties wishing to conduct oil and gas geophysical exploration operations

## Bureau of Land Management, Interior

## § 3152.6

in Alaska shall complete an application for an oil and gas geophysical exploration permit. The application shall contain the following information:

- (a) The applicant's name and address;
- (b) The operator's name and address;
- (c) The contractor's name and address;

(d) A description of lands involved by township and range, including a map or overlays showing the lands to be entered and affected;

(e) The period of time when operations will be conducted; and

(f) A plan for conducting the exploration operations.

NOTE TO §3152.1: Submit your application along with the filing fee for geophysical exploration permit—Alaska, found in the fee schedule in §3000.12 of this chapter (except where the exploration operations are to be conducted on a leasehold by or on behalf of the lessee), to the District Manager of the proper BLM office.

[53 FR 17359, May 16, 1988, as amended at 72 FR 50887, Sept. 5, 2007]

### § 3152.2 Action on application.

(a) The authorized officer shall review each application and approve or disapprove it within 90 calendar days, unless compliance with statutory requirements such as the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) delays this action. The applicant shall be notified promptly in writing of any such delay.

(b) The authorized officer shall include in each geophysical exploration permit terms and conditions deemed necessary to protect values, mineral resources, and nonmineral resources. Geophysical permits within National Petroleum Reserve—Alaska shall contain such reasonable conditions, restrictions and prohibitions as the authorized officer deems appropriate to mitigate adverse effects upon the surface resources of the Reserve and to satisfy the requirement of section 104(b) of the Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6504) (See part 3130 for stipulations relating to the National Petroleum Reserve—Alaska).

(c) An exploration permit shall become effective on the date specified by the authorized officer and shall expire 1 year thereafter.

(d) For lands subject to section 1008 of the Alaska National Interest Lands Conservation Act, exploration shall be authorized only upon a determination that such activities can be conducted in a manner which is consistent with the purposes for which the affected area is managed under applicable law.

### § 3152.3 Renewal of exploration permit.

Upon application by the permittee and payment of the filing fee for renewal of exploration permit—Alaska, found in the fee schedule in section 3000.12 of this chapter (except where the exploration operations are to be conducted on a leasehold by or on behalf of the lessee), an exploration permit may be renewed for a period not to exceed one year.

[72 FR 50887, Sept. 5, 2007]

### § 3152.4 Relinquishment of exploration permit.

Subject to the continued obligations of the permittee and the surety to comply with the terms and conditions of the exploration permit and the regulations, the permittee may relinquish an exploration permit for all or any portion of the lands covered by it. Such relinquishment shall be filed with the District Manager of the proper BLM office.

### § 3152.5 Modification of exploration permit.

(a) A permittee may request, and the authorized officer may approve a modification of an exploration permit.

(b) The authorized officer may, after consultation with the permittee, require modifications determined necessary.

### § 3152.6 Collection and submission of data.

(a) The permittee shall submit to the authorized officer all data and information obtained in carrying out the exploration plan.

(b) All information submitted under this section is subject to part 2 of this title, which sets forth the rules of the Department of the Interior relating to

## **§ 3152.7**

public availability of information contained in Departmental records, as provided at § 3100.4 of this chapter.

[53 FR 17359, May 16, 1988, as amended at 63 FR 52952, Oct. 1, 1998]

### **§ 3152.7 Completion of operations.**

(a) The permittee shall submit to the authorized officer a completion report within 30 days of completion of all operations under the permit. The completion report shall contain the following:

(1) A description of all work performed;

(2) Charts, maps or plats depicting the areas and blocks in which the exploration was conducted and specifically identifying the lines of geophysical traverses and any roads constructed;

(3) The dates on which the actual exploration was conducted;

(4) Such other information about the exploration operations as may be specified by the authorized officer in the permit; and

(5) A statement that all terms and conditions have been complied with or that corrective measures shall be taken to rehabilitate the lands or other resources.

(b) Within 90 days after the authorized officer receives a completion report from the permittee that exploration has been completed or after the expiration of the permit, whichever occurs first, the authorized officer shall notify the permittee of the specific nature and extent of any additional measures required to rectify any damage to the lands and resources.

[53 FR 17359, May 16, 1988; 53 FR 31959, Aug. 22, 1988]

## **Subpart 3153—Exploration of Lands Under the Jurisdiction of the Department of Defense**

### **§ 3153.1 Geophysical permit requirements.**

Except in unusual circumstances, permits for geophysical exploration on unleased lands under the jurisdiction of the Department of Defense shall be issued by the appropriate agency of that Department. In the event an agency of the Department of Defense refers

## **43 CFR Ch. II (10–1–08 Edition)**

an application for exploration to the Bureau for issuance, the provisions of subpart 3152 of this title shall apply. Geophysical exploration on lands under the jurisdiction of the Department of Defense shall be authorized only with the consent of, and subject to such terms and conditions as may be required by, the Department of Defense.

## **Subpart 3154—Bond Requirements**

### **§ 3154.1 Types of bonds.**

Prior to each planned exploration, the party(s) filing the notice of intent or application for a permit shall file with the authorized officer a bond as described in § 3104.1 of this title in the amount of at least \$5,000, conditioned upon full and faithful compliance with the terms and conditions of this subpart and the notice of intent or permit. In lieu thereof, the party(s) may file a statewide bond in the amount of \$25,000 covering all oil and gas exploration operations in the same State or a nationwide bond in the amount of \$50,000 covering all oil and gas exploration operations in the nation. Holders of individual, statewide or nationwide oil and gas lease bonds shall be allowed to conduct exploration on their leaseholds without further bonding, and holders of statewide or nationwide lease bonds wishing to conduct exploration on lands they do not have under lease may obtain a rider to include oil and gas exploration operations under this part. Holders of nationwide or any National Petroleum Reserve-Alaska oil and gas lease bonds shall be permitted to obtain a rider to include the coverage of oil and gas exploration within the National Petroleum Reserve—Alaska under subpart 3152 of this title.

### **§ 3154.2 Additional bonding.**

The authorized officer may increase the amount of any bond that is required under this subpart after determining that additional coverage is needed to ensure protection of the lands or resources.

### **§ 3154.3 Bond cancellation or termination of liability.**

The authorized officer shall not consent to the cancellation of the bond or the termination of liability unless and

## Bureau of Land Management, Interior

## Pt. 3160

until the terms and conditions of the notice of intent or permit have been met. Should the authorized officer fail to notify the party within 90 days of the filing of a notice of completion of the need for additional action by the operator to rehabilitate the lands, liability for that particular exploration operation shall automatically terminate.

[53 FR 17359, May 16, 1988; 53 FR 31867, Aug. 22, 1988]

### PART 3160—ONSHORE OIL AND GAS OPERATIONS

#### Subpart 3160—Onshore Oil and Gas Operations: General

##### Sec.

- 3160.0-1 Purpose.
- 3160.0-2 Policy.
- 3160.0-3 Authority.
- 3160.0-4 Objectives.
- 3160.0-5 Definitions.
- 3160.0-7 Cross references.
- 3160.0-9 Information collection.

#### Subpart 3161—Jurisdiction and Responsibility

- 3161.1 Jurisdiction.
- 3161.2 Responsibility of the authorized officer.
- 3161.3 Inspections.

#### Subpart 3162—Requirements for Operating Rights Owners and Operators

- 3162.1 General requirements.
- 3162.2 Drilling, producing, and drainage obligations.
- 3162.2-2 What steps may BLM take to avoid uncompensated drainage of Federal or Indian mineral resources?
- 3162.2-3 When am I responsible for protecting my Federal or Indian lease from drainage?
- 3162.2-4 What protective action may BLM require the lessee to take to protect the leases from drainage?
- 3162.2-5 Must I take protective action when a protective well would be uneconomic?
- 3162.2-6 When will I have constructive notice that drainage may be occurring?
- 3162.2-7 Who is liable for drainage if more than one person holds undivided interests in the record title or operating rights for the same lease?
- 3162.2-8 Does my responsibility for drainage protection end when I assign or transfer my lease interest?

- 3162.2-9 What is my duty to inquire about the potential for drainage and inform BLM of my findings?
- 3162.2-10 Will BLM notify me when it determines that drainage is occurring?
- 3162.2-11 How soon after I know of the likelihood of drainage must I take protective action?
- 3162.2-12 If I hold an interest in a lease, for what period will the Department assess compensatory royalty against me?
- 3162.2-13 If I acquire an interest in a lease that is being drained, will the Department assess me for compensatory royalty?
- 3162.2-14 May I appeal BLM's decision to require drainage protective measures?
- 3162.2-15 Who has the burden of proof if I appeal BLM's drainage determination?
- 3162.3 Conduct of operations.
- 3162.3-1 Drilling applications and plans.
- 3162.3-2 Subsequent well operations.
- 3162.3-3 Other lease operations.
- 3162.3-4 Well abandonment.
- 3162.4 Records and reports.
- 3162.4-1 Well records and reports.
- 3162.4-2 Samples, tests, and surveys.
- 3162.4-3 Monthly report of operations (Form 3160-6).
- 3162.5 Environment and safety.
- 3162.5-1 Environmental obligations.
- 3162.5-2 Control of wells.
- 3162.5-3 Safety precautions.
- 3162.6 Well and facility identification.
- 3162.7 Measurement, disposition, and protection of production.
- 3162.7-1 Disposition of production.
- 3162.7-2 Measurement of oil.
- 3162.7-3 Measurement of gas.
- 3162.7-4 Royalty rates on oil; sliding and step-scale leases (public land only).
- 3162.7-5 Site security on Federal and Indian (except Osage) oil and gas leases.

#### Subpart 3163—Noncompliance, Assessments, and Penalties

- 3163.1 Remedies for acts of noncompliance.
- 3163.2 Civil penalties.
- 3163.3 Criminal penalties.
- 3163.4 Failure to pay.
- 3163.5 Assessments and civil penalties.
- 3163.6 Injunction and specific performance.

#### Subpart 3164—Special Provisions

- 3164.1 Onshore Oil and Gas Orders.
- 3164.2 NTL's and other implementing procedures.
- 3164.3 Surface rights.
- 3164.4 Damages on restricted Indian lands.

#### Subpart 3165—Relief, Conflicts, and Appeals

- 3165.1 Relief from operating and producing requirements.

## § 3160.0-1

- 3165.1-1 Relief from royalty and rental requirements.  
3165.2 Conflicts between regulations.  
3165.3 Notice, State Director review and hearing on the record.  
3165.4 Appeals.

AUTHORITY: 25 U.S.C. 396d and 2107; 30 U.S.C. 189, 306, 359, and 1751; and 43 U.S.C. 1732(b), 1733 and 1740.

SOURCE: 47 FR 47765, Oct. 27, 1982, unless otherwise noted. Redesignated at 48 FR 36583, Aug. 12, 1983.

### Subpart 3160—Onshore Oil and Gas Operations: General

#### § 3160.0-1 Purpose.

The regulations in this part govern operations associated with the exploration, development and production of oil and gas deposits from—

(a) Leases issued or approved by the United States;

(b) Restricted Indian land leases; and

(c) Those leases under the jurisdiction of the Secretary of the Interior by law or administrative arrangement including the National Petroleum Reserve-Alaska (NPR-A). However, provisions relating to suspension and royalty reductions contained in subpart 3165 of this part do not apply to the NPR-A.

[67 FR 17894, Apr. 11, 2002]

#### § 3160.0-2 Policy.

The regulations in this part are administered under the direction of the Director of the Bureau of Land Management; except that as to lands within naval petroleum reserves, they shall be administered under such official as the Secretary of Energy shall designate.

[48 FR 36584, Aug. 12, 1983]

#### § 3160.0-3 Authority.

The Mineral Leasing Act, as amended and supplemented (30 U.S.C. 181 *et seq.*), the Act of May 21, 1930 (30 U.S.C. 301-306), the Mineral Leasing Act for Acquired Lands, as amended (30 U.S.C. 351-359), the Act of March 3, 1909, as amended (25 U.S.C. 396), the Act of May 11, 1938, as amended (25 U.S.C. 396a-396q), the Act of February 28, 1891, as amended (25 U.S.C. 397), the Act of May 29, 1924 (25 U.S.C. 398), the Act of March

## 43 CFR Ch. II (10-1-08 Edition)

3, 1927 (25 U.S.C. 398a-398e), the Act of June 30, 1919, as amended (25 U.S.C. 399), R.S. § 441 (43 U.S.C. 1457), the Attorney General's Opinion of April 2, 1941 (40 Op Atty. Gen. 41), the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 *et seq.*), the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), the Act of December 12, 1980 (94 Stat. 2964), the Combined Hydrocarbon Leasing Act of 1981 (95 Stat. 1070), the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701), the Indian Mineral Development Act of 1982 (25 U.S.C. 2102), and Order Number 3087, dated December 3, 1982, as amended on February 7, 1983 (48 FR 8983) under which the Secretary consolidated and transferred the onshore minerals management functions of the Department, except mineral revenue functions and the responsibility for leasing of restricted Indian lands, to the Bureau of Land Management.

[48 FR 36583, Aug. 12, 1983]

#### § 3160.0-4 Objectives.

The objective of these regulations is to promote the orderly and efficient exploration, development and production of oil and gas.

[48 FR 36583, Aug. 12, 1983]

#### § 3160.0-5 Definitions.

As used in this part, the term:

*Authorized representative* means any entity or individual authorized by the Secretary to perform duties by cooperative agreement, delegation or contract.

*Avoidably lost* means the venting or flaring of produced gas without the prior authorization, approval, ratification or acceptance of the authorized officer and the loss of produced oil or gas when the authorized officer determines that such loss occurred as a result of:

(1) Negligence on the part of the operator; or

(2) The failure of the operator to take all reasonable measures to prevent and/or control the loss; or

(3) The failure of the operator to comply fully with the applicable lease terms and regulations, applicable orders and notices, or the written orders of the authorized officer; or

(4) Any combination of the foregoing.

*Drainage* means the migration of hydrocarbons, inert gases (other than helium), or associated resources caused by production from other wells.

*Federal lands* means all lands and interests in lands owned by the United States which are subject to the mineral leasing laws, including mineral resources or mineral estates reserved to the United States in the conveyance of a surface or nonmineral estate.

*Fresh water* means water containing not more than 1,000 ppm of total dissolved solids, provided that such water does not contain objectionable levels of any constituent that is toxic to animal, plant or aquatic life, unless otherwise specified in applicable notices or orders.

*Knowingly or willfully* means a violation that constitutes the voluntary or conscious performance of an act that is prohibited or the voluntary or conscious failure to perform an act or duty that is required. It does not include performances or failures to perform that are honest mistakes or merely inadvertent. It includes, but does not require, performances or failures to perform that result from a criminal or evil intent or from a specific intent to violate the law. The knowing or willful nature of conduct may be established by plain indifference to or reckless disregard of the requirements of the law, regulations, orders, or terms of the lease. A consistent pattern of performance or failure to perform also may be sufficient to establish the knowing or willful nature of the conduct, where such consistent pattern is neither the result of honest mistakes or mere inadvertency. Conduct that is otherwise regarded as being knowing or willful is rendered neither accidental nor mitigated in character by the belief that the conduct is reasonable or legal.

*Lease* means any contract, profit-share arrangement, joint venture or other agreement issued or approved by the United States under a mineral leasing law that authorizes exploration for, extraction of, or removal of oil or gas.

*Lease site* means any lands, including the surface of a severed mineral estate, on which exploration for, or extraction and removal of, oil or gas is authorized under a lease.

*Lessee* means any person holding record title or owning operating rights in a lease issued or approved by the United States.

*Lessor* means the party to a lease who holds legal or beneficial title to the mineral estate in the leased lands.

*Major violation* means noncompliance that causes or threatens immediate, substantial, and adverse impacts on public health and safety, the environment, production accountability, or royalty income.

*Maximum ultimate economic recovery* means the recovery of oil and gas from leased lands which a prudent operator could be expected to make from that field or reservoir given existing knowledge of reservoir and other pertinent facts and utilizing common industry practices for primary, secondary or tertiary recovery operations.

*Minor violation* means noncompliance that does not rise to the level of a *major violation*.

*New or resumed production under section 102(b)(3) of the Federal Oil and Gas Royalty Management Act* means the date on which a well commences production, or resumes production after having been off production for more than 90 days, and is to be construed as follows:

(1) For an oil well, the date on which liquid hydrocarbons are first sold or shipped from a temporary storage facility, such as a test tank, or the date on which liquid hydrocarbons are first produced into a permanent storage facility, whichever first occurs; and

(2) For a gas well, the date on which gas is first measured through sales metering facilities or the date on which associated liquid hydrocarbons are first sold or shipped from a temporary storage facility, whichever first occurs. For purposes of this provision, a gas well shall not be considered to have been off of production unless it is incapable of production.

*Notice to lessees and operators (NTL)* means a written notice issued by the authorized officer. NTL's implement the regulations in this part and operating orders, and serve as instructions on specific item(s) of importance within a State, District, or Area.

## § 3160.0-7

*Onshore oil and gas order* means a formal numbered order issued by the Director that implements and supplements the regulations in this part.

*Operating rights owner* means a person who owns operating rights in a lease. A record title holder may also be an operating rights owner in a lease if it did not transfer all of its operating rights.

*Operator* means any person or entity including but not limited to the lessee or operating rights owner, who has stated in writing to the authorized officer that it is responsible under the terms and conditions of the lease for the operations conducted on the leased lands or a portion thereof.

*Paying well* means a well that is capable of producing oil or gas of sufficient value to exceed direct operating costs and the costs of lease rentals or minimum royalty.

*Person* means any individual, firm, corporation, association, partnership, consortium or joint venture.

*Production in paying quantities* means production from a lease of oil and/or gas of sufficient value to exceed direct operating costs and the cost of lease rentals or minimum royalties.

*Protective well* means a well drilled or modified to prevent or offset drainage of oil and gas resources from its Federal or Indian lease.

*Record title holder* means the person(s) to whom BLM or an Indian lessor issued a lease or approved the assignment of record title in a lease.

*Superintendent* means the superintendent of an Indian Agency, or other officer authorized to act in matters of record and law with respect to oil and gas leases on restricted Indian lands.

*Surface use plan of operations* means a plan for surface use, disturbance, and reclamation.

*Waste of oil or gas* means any act or failure to act by the operator that is not sanctioned by the authorized officer as necessary for proper development and production and which results in: (1) A reduction in the quantity or quality of oil and gas ultimately producible from a reservoir under prudent

## 43 CFR Ch. II (10-1-08 Edition)

and proper operations; or (2) avoidable surface loss of oil or gas.

[53 FR 17362, May 16, 1988, as amended at 53 FR 22846, June 17, 1988; 66 FR 1892, Jan. 10, 2001]

### § 3160.0-9 Information collection.

(a) The information collection requirements contained in §§ 3162.3, 3162.3-1, 3162.3-2, 3162.3-3, 3162.3-4, 3162.4-1, 3162.4-2, 3162.5-1, 3162.5-2, 3162.5-3, 3162.6, 3162.7-1, 3162.7-2, 3162.7-3, 3162.7-5, 3164.3, 3165.1, and 3165.3 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance Number 1004-0134. The information may be collected from some operators either to provide data so that proposed operations may be approved or to enable the monitoring of compliance with granted approvals. The information will be used to grant approval to begin or alter operations or to allow operations to continue. The obligation to respond is required to obtain benefits under the lease.

(b) Public reporting burden for this information is estimated to average 0.4962 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0134, Washington, DC 20503.

(c)(1) The information collection requirements contained in part 3160 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned the following Clearance Numbers:

## Bureau of Land Management, Interior

## § 3161.2

### OPERATING FORMS

Form No.	Name and filing date	OMB No.
3160-3	Application for Permit to Drill, Deepen, or Plug Back—Filed 30 days prior to planned action .....	1004-0136
3160-4	With Completion of Recompletion Report and Log—Due 30 days after well completion .....	
3160-5	Sundry Notice and Reports on Wells—Subsequent report due 30 days after operations completed ....	1004-0135

The information will be used to manage Federal and Indian oil and gas leases. It will be used to allow evaluation of the technical, safety, and environmental factors involved with drilling and producing oil and gas on Federal and Indian oil and gas leases. Response is mandatory only if the operator elects to initiate drilling, completion, or subsequent operations on an oil and gas well, in accordance with 30 U.S.C. 181 *et seq.*

(2) Public reporting burden for this information is estimated to average 25 minutes per response for clearance number 1004-0135, 30 minutes per response for clearance number 1004-0136, and 1 hour per response for clearance number 1004-0137, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0135, 1004-0136, or 1004-0137, as appropriate, Washington, DC 20503.

(d) There are many leases and agreements currently in effect, and which will remain in effect, involving both Federal and Indian oil and gas leases which specifically refer to the United States Geological Survey, USGS, Minerals Management Service, MMS, or Conservation Division. These leases and agreements also often specifically refer to various officers such as Supervisor, Conservation Manager, Deputy Conservation Manager, Minerals Manager, and Deputy Minerals Manager. In

addition, many leases and agreements specifically refer to 30 CFR part 221 or specific sections thereof, which has been redesignated as 43 CFR part 3160. Those references shall now be read in the context of Secretarial Order 3087 and now mean either the Bureau of Land Management or Minerals Management Service, as appropriate.

[57 FR 3024, Jan. 27, 1992]

### Subpart 3161—Jurisdiction and Responsibility

#### § 3161.1 Jurisdiction.

(a) All operations conducted on a Federal or Indian oil and gas lease by the operator are subject to the regulations in this part.

(b) Regulations in this part relating to site security, measurement, reporting of production and operations, and assessments or penalties for non-compliance with such requirements are applicable to all wells and facilities on State or privately-owned mineral lands committed to a unit or communitization agreement which affects Federal or Indian interests, notwithstanding any provision of a unit or communitization agreement to the contrary.

[52 FR 5391, Feb. 20, 1987, as amended at 53 FR 17362, May 16, 1988]

#### § 3161.2 Responsibility of the authorized officer.

The authorized officer is authorized and directed to approve unitization, communitization, gas storage and other contractual agreements for Federal lands; to assess compensatory royalty; to approve suspensions of operations or production, or both; to issue NTL's; to approve and monitor other operator proposals for drilling, development or production of oil and gas; to perform administrative reviews; to impose monetary assessments or penalties; to provide technical information and advice relative to oil and gas development and operations on Federal and Indian lands; to enter into cooperative agreements with States, Federal agencies and Indian tribes relative to oil and gas development and operations; to approve, inspect and regulate the operations that are subject to the

### § 3161.3

regulations in this part; to require compliance with lease terms, with the regulations in this title and all other applicable regulations promulgated under the cited laws; and to require that all operations be conducted in a manner which protects other natural resources and the environmental quality, protects life and property and results in the maximum ultimate recovery of oil and gas with minimum waste and with minimum adverse effect on the ultimate recovery of other mineral resources. The authorized officer may issue written or oral orders to govern specific lease operations. Any such oral orders shall be confirmed in writing by the authorized officer within 10 working days from issuance thereof. Before approving operations on leasehold, the authorized officer shall determine that the lease is in effect, that acceptable bond coverage has been provided and that the proposed plan of operations is sound both from a technical and environmental standpoint.

[48 FR 36584, Aug. 12, 1983, as amended at 52 FR 5391, Feb. 20, 1987; 53 FR 17362, May 16, 1988]

#### § 3161.3 Inspections.

(a) The authorized officer shall establish procedures to ensure that each Federal and Indian lease site which is producing or is expected to produce significant quantities of oil or gas in any year or which has a history of non-compliance with applicable provisions of law or regulations, lease terms, orders or directives shall be inspected at least once annually. Similarly, each lease site on non-Federal or non-Indian lands subject to a formal agreement such as a unit or communitization agreement which has been approved by the Department of the Interior and in which the United States or the Indian lessors share in production shall be inspected annually whenever any of the foregoing criteria are applicable.

(b) In accomplishing the inspections, the authorized officer may utilize Bureau personnel, may enter into cooperative agreements with States or Indian Tribes, may delegate the inspection authority to any State, or may contract with any non-Federal Government entities. Any cooperative agreement, delegation or contractual arrangement

### 43 CFR Ch. II (10–1–08 Edition)

shall not be effective without concurrence of the Secretary and shall include applicable provisions of the Federal Oil and Gas Royalty Management Act.

[49 FR 37363, Sept. 21, 1984, as amended at 52 FR 5391, Feb. 20, 1987]

### Subpart 3162—Requirements for Operating Rights Owners and Operators

#### § 3162.1 General requirements.

(a) The operating rights owner or operator, as appropriate, shall comply with applicable laws and regulations; with the lease terms, Onshore Oil and Gas Orders, NTL's; and with other orders and instructions of the authorized officer. These include, but are not limited to, conducting all operations in a manner which ensures the proper handling, measurement, disposition, and site security of leasehold production; which protects other natural resources and environmental quality; which protects life and property; and which results in maximum ultimate economic recovery of oil and gas with minimum waste and with minimum adverse effect on ultimate recovery of other mineral resources.

(b) The operator shall permit properly identified authorized representatives to enter upon, travel across and inspect lease sites and records normally kept on the lease pertinent thereto without advance notice. Inspections normally will be conducted during those hours when responsible persons are expected to be present at the operation being inspected. Such permission shall include access to secured facilities on such lease sites for the purpose of making any inspection or investigation for determining whether there is compliance with the mineral leasing laws, the regulations in this part, and any applicable orders, notices or directives.

(c) For the purpose of making any inspection or investigation, the Secretary or his authorized representative shall have the same right to enter upon or travel across any lease site as the

## Bureau of Land Management, Interior

## § 3162.2-4

operator has acquired by purchase, condemnation or otherwise.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37364, Sept. 21, 1984; 53 FR 17363, May 16, 1988]

### **§ 3162.2 Drilling, producing, and drainage obligations.**

#### **§ 3162.2-1 Drilling and producing obligations.**

(a) The operator, at its election, may drill and produce other wells in conformity with any system of well spacing or production allotments affecting the field or area in which the leased lands are situated, and which is authorized and sanctioned by applicable law or by the authorized officer.

(b) After notice in writing, the lessee(s) and operating rights owner(s) shall promptly drill and produce such other wells as the authorized officer may reasonably require in order that the lease may be properly and timely developed and produced in accordance with good economic operating practices.

[66 FR 1892, Jan. 10, 2001. Redesignated at 66 FR 1892, Jan. 10, 2001; 66 FR 24073, May 11, 2001]

#### **§ 3162.2-2 What steps may BLM take to avoid uncompensated drainage of Federal or Indian mineral resources?**

If we determine that a well is draining Federal or Indian mineral resources, we may take any of the following actions:

(a) If the mineral resources being drained are in Federal or Indian leases, we may require the lessee to drill and produce all wells that are necessary to protect the lease from drainage, unless the conditions of this part are met. BLM will consider applicable Federal, State, or Tribal rules, regulations, and spacing orders when determining which action to take. Alternatively, we may accept other equivalent protective measures;

(b) If the mineral resources being drained are either unleased (including those which may not be subject to leasing) or in Federal or Indian leases, we may execute agreements with the owners of interests in the producing well

under which the United States or the Indian lessor may be compensated for the drainage (with the consent of the Federal or (in consultation with the Indian mineral owner and BIA) Indian lessees, if any);

(c) We may offer for lease any qualifying unleased mineral resources under part 3120 of this chapter or enter into a communitization agreement; or

(d) We may approve a unit or communitization agreement that provides for payment of a royalty on production attributable to unleased mineral resources as provided in § 3181.5.

[66 FR 1893, Jan. 10, 2001]

#### **§ 3162.2-3 When am I responsible for protecting my Federal or Indian lease from drainage?**

You must protect your Federal or Indian lease from drainage if your lease is being drained of mineral resources by a well:

(a) Producing for the benefit of another mineral owner;

(b) Producing for the benefit of the same mineral owner but with a lower royalty rate; or

(c) Located in a unit or communitization agreement, which due to its Federal or Indian mineral owner's allocation or participation factor, generates less revenue for the United States or the Indian mineral owner for the mineral resources produced from your lease.

[66 FR 1893, Jan. 10, 2001]

#### **§ 3162.2-4 What protective action may BLM require the lessee to take to protect the leases from drainage?**

We may require you to:

(a) Drill or modify and produce all wells that are necessary to protect the leased mineral resources from drainage;

(b) Enter into a unitization or communitization agreement with the lease containing the draining well; or

(c) Pay compensatory royalties for drainage that has occurred or is occurring.

[66 FR 1893, Jan. 10, 2001]

## § 3162.2-5

### **§ 3162.2-5 Must I take protective action when a protective well would be uneconomic?**

You are not required to take any of the actions listed in § 3162.2-4 if you can prove to BLM that when you first knew or had constructive notice of drainage you could not produce a sufficient quantity of oil or gas from a protective well on your lease for a reasonable profit above the cost of drilling, completing, and operating the protective well.

[66 FR 1893, Jan. 10, 2001]

### **§ 3162.2-6 When will I have constructive notice that drainage may be occurring?**

(a) You have constructive notice that drainage may be occurring when well completion or first production reports for the draining well are filed with either BLM, State oil and gas commissions, or regulatory agencies and are publicly available.

(b) If you operate or own any interest in the draining well or lease, you have constructive notice that drainage may be occurring when you complete drill stem, production, pressure analysis, or flow tests of the well.

[66 FR 1893, Jan. 10, 2001]

### **§ 3162.2-7 Who is liable for drainage if more than one person holds undivided interests in the record title or operating rights for the same lease?**

(a) If more than one person holds record title interests in a portion of a lease that is subject to drainage, each person is jointly and severally liable for taking any action we may require under this part to protect the lease from drainage, including paying compensatory royalty accruing during the period and for the area in which it holds its record title interest.

(b) Operating rights owners are jointly and severally liable with each other and with all record title holders for drainage affecting the area and horizons in which they hold operating rights during the period they hold operating rights.

[66 FR 1893, Jan. 10, 2001]

## 43 CFR Ch. II (10-1-08 Edition)

### **§ 3162.2-8 Does my responsibility for drainage protection end when I assign or transfer my lease interest?**

If you assign your record title interest in a lease or transfer your operating rights, you are not liable for drainage that occurs after the date we approve the assignment or transfer. However, you remain responsible for the payment of compensatory royalties for any drainage that occurred when you held the lease interest.

[66 FR 1893, Jan. 10, 2001]

### **§ 3162.2-9 What is my duty to inquire about the potential for drainage and inform BLM of my findings?**

(a) When you first acquire a lease interest, and at all times while you hold the lease interest, you must monitor the drilling of wells in the same or adjacent spacing units and gather sufficient information to determine whether drainage is occurring. This information can be in various forms, including but not limited to, well completion reports, sundry notices, or available production information. As a prudent lessee, it is your responsibility to analyze and evaluate this information and make the necessary calculations to determine:

(1) The amount of drainage from production of the draining well;

(2) The amount of mineral resources which will be drained from your Federal or Indian lease during the life of the draining well; and

(3) Whether a protective well would be economic to drill.

(b) You must notify BLM within 60 days from the date of actual or constructive notice of:

(1) Which of the actions in § 3162.2-4 you will take; or

(2) The reasons a protective well would be uneconomic.

(c) If you do not have sufficient information to comply with § 3162.2-9(b)(1), indicate when you will provide the information.

(d) You must provide BLM with the analysis under paragraph (a) of this section within 60 days after we request it.

[66 FR 1893, Jan. 10, 2001]

## Bureau of Land Management, Interior

## § 3162.2-15

### **§ 3162.2-10 Will BLM notify me when it determines that drainage is occurring?**

We will send you a demand letter by certified mail, return receipt requested, or personally serve you with notice, if we believe that drainage is occurring. However, your responsibility to take protective action arises when you first knew or had constructive notice of the drainage, even when that date precedes the BLM demand letter.

[66 FR 1894, Jan. 10, 2001]

### **§ 3162.2-11 How soon after I know of the likelihood of drainage must I take protective action?**

(a) You must take protective action within a reasonable time after the earlier of:

(1) The date you knew or had constructive notice that the potentially draining well had begun to produce oil or gas; or

(2) The date we issued a demand letter for protective action.

(b) Since the time required to drill and produce a protective well varies according to the location and conditions of the oil and gas reservoir, BLM will determine this on a case-by-case basis. When we determine whether you took protective action within a reasonable time, we will consider several factors including, but not limited to:

(1) Time required to evaluate the characteristics and performance of the draining well;

(2) Rig availability;

(3) Well depth;

(4) Required environmental analysis;

(5) Special lease stipulations which provide limited time frames in which to drill; and

(6) Weather conditions.

(c) If BLM determines that you did not take protection action timely, you will owe compensatory royalty for the period of the delay under § 3162.2-12.

[66 FR 1894, Jan. 10, 2001]

### **§ 3162.2-12 If I hold an interest in a lease, for what period will the Department assess compensatory royalty against me?**

The Department will assess compensatory royalty beginning on the first day of the month following the earliest

reasonable time we determine you should have taken protective action. You must continue to pay compensatory royalty until:

(a) You drill sufficient economic protective wells and remain in continuous production;

(b) We approve a unitization or communitization agreement that includes the mineral resources being drained;

(c) The draining well stops producing; or

(d) You relinquish your interest in the Federal or Indian lease.

[66 FR 1894, Jan. 10, 2001]

### **§ 3162.2-13 If I acquire an interest in a lease that is being drained, will the Department assess me for compensatory royalty?**

If you acquire an interest in a Federal or Indian lease through an assignment of record title or transfer of operating rights under this part, you are liable for all drainage obligations accruing on and after the date we approve the assignment or transfer.

[66 FR 1894, Jan. 10, 2001]

### **§ 3162.2-14 May I appeal BLM's decision to require drainage protective measures?**

You may appeal any BLM decision requiring you take drainage protective measures. You may request BLM State Director review under 43 CFR 3165.3 and/or appeal to the Interior Board of Land Appeals under 43 CFR part 4 and subpart 1840.

[66 FR 1894, Jan. 10, 2001]

### **§ 3162.2-15 Who has the burden of proof if I appeal BLM's drainage determination?**

BLM has the burden of establishing a *prima facie* case that drainage is occurring and that you knew of such drainage. Then the burden of proof shifts to you to refute the existence of drainage or to prove there was not sufficient information to put you on notice of the need for drainage protection. You also have the burden of proving that drilling and producing from a protective well would not be economically feasible.

[66 FR 1894, Jan. 10, 2001]

### § 3162.3

### 43 CFR Ch. II (10–1–08 Edition)

#### § 3162.3 Conduct of operations.

(a) Whenever a change in operator occurs, the authorized officer shall be notified promptly in writing, and the new operator shall furnish evidence of sufficient bond coverage in accordance with § 3106.6 and subpart 3104 of this title.

(b) A contractor on a leasehold shall be considered the agent of the operator for such operations with full responsibility for acting on behalf of the operator for purposes of complying with applicable laws, regulations, the lease terms, NTL's, Onshore Oil and Gas Orders, and other orders and instructions of the authorized officer.

[53 FR 17363, May 16, 1988; 53 FR 31959, Aug. 22, 1988]

#### § 3162.3–1 Drilling applications and plans.

(a) Each well shall be drilled in conformity with an acceptable well-spacing program at a surveyed well location approved or prescribed by the authorized officer after appropriate environmental and technical reviews (see § 3162.5–1 of this title). An acceptable well-spacing program may be either (1) one which conforms with a spacing order or field rule issued by a State Commission or Board and accepted by the authorized officer, or (2) one which is located on a lease committed to a communitized or unitized tract at a location approved by the authorized officer, or (3) any other program established by the authorized officer.

(b) Any well drilled on restricted Indian land shall be subject to the location restrictions specified in the lease and/or Title 25 of the CFR.

(c) The operator shall submit to the authorized officer for approval an Application for Permit to Drill for each well. No drilling operations, nor surface disturbance preliminary thereto, may be commenced prior to the authorized officer's approval of the permit.

(d) The Application for Permit to Drill process shall be initiated at least 30 days before commencement of operations is desired. Prior to approval, the application shall be administratively and technically complete. A complete application consists of Form 3160–3 and the following attachments:

(1) A drilling plan, which may already be on file, containing information required by paragraph (e) of this section and appropriate orders and notices.

(2) A surface use plan of operations containing information required by paragraph (f) of this section and appropriate orders and notices.

(3) Evidence of bond coverage as required by the Department of the Interior regulations, and

(4) Such other information as may be required by applicable orders and notices.

(e) Each drilling plan shall contain the information specified in applicable notices or orders, including a description of the drilling program, the surface and projected completion zone location, pertinent geologic data, expected hazards, and proposed mitigation measures to address such hazards. A drilling plan may be submitted for a single well or for several wells proposed to be drilled to the same zone within a field or area of geological and environmental similarity. A drilling plan may be modified from time to time as circumstances may warrant, with the approval of the authorized officer.

(f) The surface use plan of operations shall contain information specified in applicable orders or notices, including the road and drillpad location, details of pad construction, methods for containment and disposal of waste material, plans for reclamation of the surface, and other pertinent data as the authorized officer may require. A surface use plan of operations may be submitted for a single well or for several wells proposed to be drilled in an area of environmental similarity.

(g) For Federal lands, upon receipt of the Application for Permit to Drill or Notice of Staking, the authorized officer shall post the following information for public inspection at least 30 days before action to approve the Application for Permit to Drill: the company/operator name; the well name/number; the well location described to the nearest quarter-quarter section (40 acres), or similar land description in the case of lands described by metes and bounds, or maps showing the affected lands and the location of all

## Bureau of Land Management, Interior

## §3162.3-3

tracts to be leased and of all leases already issued in the general area; and any substantial modifications to the lease terms. Where the inclusion of maps in such posting is not practicable, maps of the affected lands shall be made available to the public for review. This information also shall be provided promptly by the authorized officer to the appropriate office of the Federal surface management agency, for lands the surface of which is not under Bureau jurisdiction, requesting such agency to post the proposed action for public inspection for at least 30 days. The posting shall be in the office of the authorized officer and in the appropriate surface managing agency if other than the Bureau. The posting of an Application for Permit to Drill is for information purposes only and is not an appealable decision.

(h) Upon initiation of the Application for Permit to Drill process, the authorized officer shall consult with the appropriate Federal surface management agency and with other interested parties as appropriate and shall take one of the following actions as soon as practical, but in no event later than 5 working days after the conclusion of the 30-day notice period for Federal lands, or within 30 days from receipt of the application for Indian lands:

(1) Approve the application as submitted or with appropriate modifications or conditions;

(2) Return the application and advise the applicant of the reasons for disapproval; or

(3) Advise the applicant, either in writing or orally with subsequent written confirmation, of the reasons why final action will be delayed along with the date such final action can be expected.

The surface use plan of operations for National Forest System lands shall be approved by the Secretary of Agriculture or his/her representative prior to approval of the Application for Permit to Drill by the authorized officer. Appeals from the denial of approval of such surface use plan of operations shall be submitted to the Secretary of Agriculture.

(i) Approval of the Application for Permit to Drill does not warrant or certify that the applicant holds legal

or equitable title to the subject lease(s) which would entitle the applicant to conduct drilling operations.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 52 FR 5391, Feb. 20, 1987; 53 FR 17363, May 16, 1988; 53 FR 22846, June 17, 1988; 53 FR 31958, Aug. 22, 1988]

### §3162.3-2 Subsequent well operations.

(a) A proposal for further well operations shall be submitted by the operator on Form 3160-5 for approval by the authorized officer prior to commencing operations to redrill, deepen, perform casing repairs, plug-back, alter casing, perform nonroutine fracturing jobs, recomplete in a different interval, perform water shut off, commingling production between intervals and/or conversion to injection. If there is additional surface disturbance, the proposal shall include a surface use plan of operations. A subsequent report on these operations also will be filed on Form 3160-5. The authorized officer may prescribe that each proposal contain all or a portion of the information set forth in §3162.3-1 of this title.

(b) Unless additional surface disturbance is involved and if the operations conform to the standard of prudent operating practice, prior approval is not required for routine fracturing or acidizing jobs, or recompletion in the same interval; however, a subsequent report on these operations must be filed on Form 3160-5.

(c) No prior approval or a subsequent report is required for well cleanout work, routine well maintenance, or bottom hole pressure surveys.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 52 FR 5391, Feb. 20, 1987; 53 FR 17363, May 16, 1988; 53 FR 22847, June 17, 1988]

### §3162.3-3 Other lease operations.

Prior to commencing any operation on the leasehold which will result in additional surface disturbance, other than those authorized under §3162.3-1 or §3162.3-2 of this title, the operator shall submit a proposal on Form 3160-5 to the authorized officer for approval.

#### **§ 3162.3-4**

The proposal shall include a surface use plan of operations.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, and amended at 52 FR 5391, Feb. 20, 1987; 53 FR 17363, May 16, 1988; 53 FR 22847, June 17, 1988]

#### **§ 3162.3-4 Well abandonment.**

(a) The operator shall promptly plug and abandon, in accordance with a plan first approved in writing or prescribed by the authorized officer, each newly completed or recompleted well in which oil or gas is not encountered in paying quantities or which, after being completed as a producing well, is demonstrated to the satisfaction of the authorized officer to be no longer capable of producing oil or gas in paying quantities, unless the authorized officer shall approve the use of the well as a service well for injection to recover additional oil or gas or for subsurface disposal of produced water. In the case of a newly drilled or recompleted well, the approval to abandon may be written or oral with written confirmation.

(b) Completion of a well as plugged and abandoned may also include conditioning the well as water supply source for lease operations or for use by the surface owner or appropriate Government Agency, when authorized by the authorized officer. All costs over and above the normal plugging and abandonment expense will be paid by the party accepting the water well.

(c) No well may be temporarily abandoned for more than 30 days without the prior approval of the authorized officer. The authorized officer may authorize a delay in the permanent abandonment of a well for a period of 12 months. When justified by the operator, the authorized officer may authorize additional delays, no one of which may exceed an additional 12 months. Upon the removal of drilling or producing equipment from the site of a well which is to be permanently abandoned, the surface of the lands disturbed in connection with the conduct of operations shall be reclaimed in ac-

#### **43 CFR Ch. II (10-1-08 Edition)**

cordance with a plan first approved or prescribed by the authorized officer.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17363, May 16, 1988; 53 FR 22847, June 17, 1988]

#### **§ 3162.4 Records and reports.**

##### **§ 3162.4-1 Well records and reports.**

(a) The operator shall keep accurate and complete records with respect to all lease operations including, but not limited to, production facilities and equipment, drilling, producing, re-drilling, deepening, repairing, plugging back, and abandonment operations, and other matters pertaining to operations. With respect to production facilities and equipment, the record shall include schematic diagrams as required by applicable orders and notices.

(b) Standard forms for providing basic data are listed in NOTE 1 at the beginning of this title. As noted on Form 3160-4, two copies of all electric and other logs run on the well must be submitted to the authorized officer. Upon request, the operator shall transmit to the authorized officer copies of such other records maintained in compliance with paragraph (a) of this section.

(c) Not later than the 5th business day after any well begins production on which royalty is due anywhere on a lease site or allocated to a lease site, or resumes production in the case of a well which has been off production for more than 90 days, the operator shall notify the authorized officer by letter or sundry notice, Form 3160-5, or orally to be followed by a letter or sundry notice, of the date on which such production has begun or resumed.

(d) All records and reports required by this section shall be maintained for 6 years from the date they were generated. In addition, if the Secretary, or his/her designee notifies the recordholder that the Department of the Interior has initiated or is participating in an audit or investigation involving such records, the records shall be maintained until the Secretary, or his/her designee, releases the

## Bureau of Land Management, Interior

## § 3162.4-3

recordholder from the obligation to maintain such records.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37364, Sept. 21, 1984; 52 FR 5391, Feb. 20, 1987; 53 FR 17363, May 16, 1988]

### § 3162.4-2 Samples, tests, and surveys.

(a) During the drilling and completion of a well, the operator shall, when required by the authorized officer, conduct tests, run logs, and make other surveys reasonably necessary to determine the presence, quantity, and quality of oil, gas, other minerals, or the presence or quality of water; to determine the amount and/or direction of deviation of any well from the vertical; and to determine the relevant characteristics of the oil and gas reservoirs penetrated.

(b) After the well has been completed, the operator shall conduct periodic well tests which will demonstrate the quantity and quality of oil and gas and water. The method and frequency of such well tests will be specified in appropriate notices and orders. When needed, the operator shall conduct reasonable tests which will demonstrate the mechanical integrity of the downhole equipment.

(c) Results of samples, tests, and surveys approved or prescribed under this section shall be provided to the authorized officer without cost to the lessor.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17363, May 16, 1988]

### § 3162.4-3 Monthly report of operations (Form 3160-6).

The operator shall report production data to BLM in accordance with the requirements of this section until required to begin reporting to MMS pursuant to 30 CFR 216.50. When reporting production data to BLM in accordance with the requirements of this section, the operator shall either use Form BLM 3160-6 or Form MMS-3160. A separate report of operations for each lease shall be made on Form 3160-6 for each calendar month, beginning with the month in which drilling operations are initiated, and shall be filed with the authorized officer on or before the 10th day of the second month following the operation month, unless an extension

of time for the filing of such report is granted by the authorized officer. The report on this form shall disclose accurately all operations conducted on each well during each month, the status of operations on the last day of the month, and a general summary of the status of operations on the leased lands, and the report shall be submitted each month until the lease is terminated or until omission of the report is authorized by the authorized officer. It is particularly necessary that the report shall show for each calendar month:

(a) The lease be identified by inserting the name of the United States land office and the serial number, or in the case of Indian land, the lease number and lessor's name, in the space provided in the upper right corner;

(b) Each well be listed separately by number, its location be given by 40-acre subdivision ( $\frac{1}{4}$   $\frac{1}{4}$  sec. or lot), section number, township, range, and meridian;

(c) The number of days each well produced, whether oil or gas, and the number of days each input well was in operation be stated;

(d) The quantity of oil, gas and water produced, the total amount of gasoline, and other lease products recovered, and other required information. When oil and gas, or oil, gas and gasoline, or other hydrocarbons are concurrently produced from the same lease, separate reports on this form should be submitted for oil and for gas and gasoline, unless otherwise authorized or directed by the authorized officer.

(e) The depth of each active or suspended well, and the name, character, and depth of each formation drilled during the month, the date each such depth was reached, the date and reason for every shut-down, the names and depths of important formation changes and contents of formations, the amount and size of any casing run since last report, the dates and results of any tests such as production, water shut-off, or gasoline content, and any other noteworthy information on operations not specifically provided for in the form.

(f) The footnote shall be completely filled out as required by the authorized officer. If no runs or sales were made

## § 3162.5

during the calendar month, the report shall so state.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 52 FR 5391, Feb. 20, 1987; 53 FR 16413, May 9, 1988]

### § 3162.5 Environment and safety.

#### § 3162.5-1 Environmental obligations.

(a) The operator shall conduct operations in a manner which protects the mineral resources, other natural resources, and environmental quality. In that respect, the operator shall comply with the pertinent orders of the authorized officer and other standards and procedures as set forth in the applicable laws, regulations, lease terms and conditions, and the approved drilling plan or subsequent operations plan. Before approving any Application for Permit to Drill submitted pursuant to § 3162.3-1 of this title, or other plan requiring environmental review, the authorized officer shall prepare an environmental record of review or an environmental assessment, as appropriate. These environmental documents will be used in determining whether or not an environmental impact statement is required and in determining any appropriate terms and conditions of approval of the submitted plan.

(b) The operator shall exercise due care and diligence to assure that leasehold operations do not result in undue damage to surface or subsurface resources or surface improvements. All produced water must be disposed of by injection into the subsurface, by approved pits, or by other methods which have been approved by the authorized officer. Upon the conclusion of operations, the operator shall reclaim the disturbed surface in a manner approved or reasonably prescribed by the authorized officer.

(c) All spills or leakages of oil, gas, produced water, toxic liquids, or waste materials, blowouts, fires, personal injuries, and fatalities shall be reported by the operator in accordance with these regulations and as prescribed in applicable order or notices. The operator shall exercise due diligence in taking necessary measures, subject to approval by the authorized officer, to control and remove pollutants and to

## 43 CFR Ch. II (10-1-08 Edition)

extinguish fires. An operator's compliance with the requirements of the regulations in this part shall not relieve the operator of the obligation to comply with other applicable laws and regulations.

(d) When reasonably required by the authorized officer, a contingency plan shall be submitted describing procedures to be implemented to protect life, property, and the environment.

(e) The operator's liability for damages to third parties shall be governed by applicable law.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17363, May 16, 1988; 53 FR 22847, June 17, 1988]

#### § 3162.5-2 Control of wells.

(a) *Drilling wells.* The operator shall take all necessary precautions to keep each well under control at all times, and shall utilize and maintain materials and equipment necessary to insure the safety of operating conditions and procedures.

(b) *Vertical drilling.* The operator shall conduct drilling operations in a manner so that the completed well does not deviate significantly from the vertical without the prior written approval of the authorized officer. Significant deviation means a projected deviation of the well bore from the vertical of 10° or more, or a projected bottom hole location which could be less than 200 feet from the spacing unit or lease boundary. Any well which deviates more than 10° from the vertical or could result in a bottom hole location less than 200 feet from the spacing unit or lease boundary without prior written approval must be promptly reported to the authorized officer. In these cases, a directional survey is required.

(c) *High pressure or loss of circulation.* The operator shall take immediate steps and utilize necessary resources to maintain or restore control of any well in which the pressure equilibrium has become unbalanced.

(d) *Protection of fresh water and other minerals.* The operator shall isolate freshwater-bearing and other usable water containing 5,000 ppm or less of dissolved solids and other mineral-bearing formations and protect them

## Bureau of Land Management, Interior

## § 3162.7-1

from contamination. Tests and surveys of the effectiveness of such measures shall be conducted by the operator using procedures and practices approved or prescribed by the authorized officer.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17363, May 16, 1988]

### § 3162.5-3 Safety precautions.

The operator shall perform operations and maintain equipment in a safe and workmanlike manner. The operator shall take all precautions necessary to provide adequate protection for the health and safety of life and the protection of property. Compliance with health and safety requirements prescribed by the authorized officer shall not relieve the operator of the responsibility for compliance with other pertinent health and safety requirements under applicable laws or regulations.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17363, May 16, 1988]

### § 3162.6 Well and facility identification.

(a) Every well within a Federal or Indian lease or supervised agreement shall have a well identification sign. All signs shall be maintained in a legible condition.

(b) For wells located on Federal and Indian lands, the operator shall properly identify, by a sign in a conspicuous place, each well, other than those permanently abandoned. The well sign shall include the well number, the name of the operator, the lease serial number, the surveyed location (the quarter-quarter section, section, township and range or other authorized survey designation acceptable to the authorized officer; such as metes and bounds). When approved by the authorized officer, individual well signs may display only a unique well name and number. When specifically requested by the authorized officer, the sign shall include the unit or communitization name or number. The authorized officer may also require the sign to include the name of the Indian allottee lessor(s) preceding the lease serial number. In all cases, individual well

signs in place on the effective date of this rulemaking which do not have the unit or communitization agreement number or do not have quarter-quarter identification will satisfy these requirements until such time as the sign is replaced. All new signs shall have identification as above, including quarter-quarter section.

(c) All facilities at which Federal or Indian oil is stored shall be clearly identified with a sign that contains the name of the operator, the lease serial number or communitization or unit agreement identification number, as appropriate, and in public land states, the quarter-quarter section, township, and range. On Indian leases, the sign also shall include the name of the appropriate Tribe and whether the lease is tribal or allotted. For situations of 1 tank battery servicing 1 well in the same location, the requirements of this paragraph and paragraph (b) of this section may be met by 1 sign as long as it includes the information required by both paragraphs. In addition, each storage tank shall be clearly identified by a unique number. All identification shall be maintained in legible condition and shall be clearly apparent to any person at or approaching the sales or transportation point. With regard to the quarter-quarter designation and the unique tank number, any such designation established by state law or regulation shall satisfy this requirement.

(d) All abandoned wells shall be marked with a permanent monument containing the information in paragraph (b) of this section. The requirement for a permanent monument may be waived in writing by the authorized officer.

[52 FR 5391, Feb. 20, 1987, as amended at 53 FR 17363, May 16, 1988]

### § 3162.7 Measurement, disposition, and protection of production.

#### § 3162.7-1 Disposition of production.

(a) The operator shall put into marketable condition, if economically feasible, all oil, other hydrocarbons, gas, and sulphur produced from the leased land.

(b) Where oil accumulates in a pit, such oil must either be (1) recirculated

## § 3162.7-2

through the regular treating system and returned to the stock tanks for sale, or (2) pumped into a stock tank without treatment and measured for sale in the same manner as from any sales tank in accordance with applicable orders and notices. In the absence of prior approval from the authorized officer, no oil should go to a pit except in an emergency. Each such occurrence must be reported to the authorized officer and the oil promptly recovered in accordance with applicable orders and notices.

(c)(1) Any person engaged in transporting by motor vehicle any oil from any lease site, or allocated to any such lease site, shall carry on his/her person, in his/her vehicle, or in his/her immediate control, documentation showing at a minimum; the amount, origin, and intended first purchaser of the oil.

(2) Any person engaged in transporting any oil or gas by pipeline from any lease site, or allocated to any lease site, shall maintain documentation showing, at a minimum, the amount, origin, and intended first purchaser of such oil or gas.

(3) On any lease site, any authorized representative who is properly identified may stop and inspect any motor vehicle that he/she has probable cause to believe is carrying oil from any such lease site, or allocated to such lease site, to determine whether the driver possesses proper documentation for the load of oil.

(4) Any authorized representative who is properly identified and who is accompanied by an appropriate law enforcement officer, or an appropriate law enforcement officer alone, may stop and inspect any motor vehicle which is not on a lease site if he/she has probable cause to believe the vehicle is carrying oil from a lease site, or allocated to a lease site, to determine whether the driver possesses proper documentation for the load of oil.

(d) The operator shall conduct operations in such a manner as to prevent avoidable loss of oil and gas. A operator shall be liable for royalty payments on oil or gas lost or wasted from a lease site, or allocated to a lease site, when such loss or waste is due to negligence on the part of the operator of such lease, or due to the failure of the

## 43 CFR Ch. II (10-1-08 Edition)

operator to comply with any regulation, order or citation issued pursuant to this part.

(e) When requested by the authorized officer, the operator shall furnish storage for royalty oil, on the leasehold or at a mutually agreed upon delivery point off the leased land without cost to the lessor, for 30 days following the end of the calendar month in which the royalty accrued.

(f) Any records generated under this section shall be maintained for 6 years from the date they were generated or, if notified by the Secretary, or his designee, that such records are involved in an audit or investigation, the records shall be maintained until the recordholder is released by the Secretary from the obligation to maintain them.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37364, Sept. 21, 1984; 53 FR 17363, May 16, 1988]

### § 3162.7-2 Measurement of oil.

All oil production shall be measured on the lease by tank gauging, positive displacement metering system, or other methods acceptable to the authorized officer, pursuant to methods and procedures prescribed in applicable orders and notices. Where production cannot be measured due to spillage or leakage, the amount of production shall be determined in accordance with the methods and procedures approved or prescribed by the authorized officer. Off-lease storage or measurement, or commingling with production from other sources prior to measurement, may be approved by the authorized officer.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37364, Sept. 21, 1984; 52 FR 5392, Feb. 20, 1987]

### § 3162.7-3 Measurement of gas.

All gas production shall be measured by orifice meters or other methods acceptable to the authorized officer on the lease pursuant to methods and procedures prescribed in applicable orders and notices. The measurement of the volume of all gas produced shall be adjusted by computation to the standard pressure and temperature of 14.73 psia

**Bureau of Land Management, Interior**

**§3162.7-4**

and 60° F unless otherwise prescribed by the authorized officer, regardless of the pressure and temperature at which the gas is actually measured. Gas lost without measurement by meter shall be estimated in accordance with methods prescribed in applicable orders and notices. Off-lease measurement or commingling with production from other sources prior to measurement may be approved by the authorized officer.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37364, Sept. 21, 1984; 52 FR 5392, Feb. 20, 1987]

**§3162.7-4 Royalty rates on oil; sliding and step-scale leases (public land only).**

Sliding- and step-scale royalties are based on the average daily production per well. The authorized officer shall specify which wells on a leasehold are commercially productive, including in that category all wells, whether produced or not, for which the annual value of permissible production would be greater than the estimated reasonable annual lifting cost, but only wells that yield a commercial volume of production during at least part of the month shall be considered in ascertaining the average daily production per well. The average daily production per well for a lease is computed on the basis of a 28-, 29-, 30-, or 31-day month (as the case may be), the number of wells on the leasehold counted as producing, and the gross production from the leasehold. The authorized officer will determine which commercially productive wells shall be considered each month as producing wells for the purpose of computing royalty in accordance with the following rules, and in the authorized officer's discretion may count as producing any commercially productive well shut in for conservation purposes.

(a) For a previously producing leasehold, count as producing for every day of the month each previously producing well that produced 15 days or more during the month, and disregard wells that produced less than 15 days during the month.

(b) Wells approved by the authorized officer as input wells shall be counted as producing wells for the entire month

if so used 15 days or more during the month and shall be disregarded if so used less than 15 days during the month.

(c) When the initial production of a leasehold is made during the calendar month, compute royalty on the basis of producing well days.

(d) When a new well is completed for production on a previously producing leasehold and produces for 10 days or more during the calendar month in which it is brought in, count such new wells as producing every day of the month in arriving at the number of producing well days. Do not count any new well that produces for less than 10 days during the calendar month.

(e) Consider "head wells" that make their best production by intermittent pumping or flowing as producing every day of the month, provided they are regularly operated in this manner with approval of the authorized officer.

(f) For previously producing leaseholds on which no wells produced for 15 days or more, compute royalty on the basis of actual producing well days.

(g) For previously producing leaseholds on which no wells were productive during the calendar month but from which oil was shipped, compute royalty at the same royalty percentage as that of the last preceding calendar month in which production and shipments were normal.

(h) Rules for special cases not subject to definition, such as those arising from averaging the production from two distinct sands or horizons when the production of one sand or horizon is relatively insignificant compared to that of the other, shall be made by the authorized officer as need arises.

(i)(1) In the following summary of operations on a typical leasehold for the month of June, the wells considered for the purpose of computing royalty on the entire production of the property for the months are indicated.

Well No. and record	Count (marked X)
1. Produced full time for 30 days .....	X
2. Produced for 26 days; down 4 days for repairs ..	X
3. Produced for 28 days; down June 5, 12 hours, rods; June 14, 6 hours, engine down; June 26, 24 hours, pulling rods and tubing.	X
4. Produced for 12 days; down June 13 to 30.	
5. Produced for 8 hours every day (head well) .....	X

§ 3162.7-5

Well No. and record	Count (marked X)
6. Idle producer (not operated).	X
7. New well, completed June 17; produced for 14 days.	
8. New well, completed June 22; produced for 9 days.	

(2) In this example, there are eight wells on the leasehold, but wells No. 4, 6, and 8 are not counted in computing royalties. Wells No. 1, 2, 3, 5, and 7 are counted as producing for 30 days. The average production per well per day is determined by dividing the total production of the leasehold for the month (including the oil produced by wells 4 and 8) by 5 (the number of wells counted as producing), and dividing the quotient thus obtained by the number of days in the month.

[53 FR 1226, Jan. 15, 1988, as amended at 53 FR 17364, May 16, 1988]

**§ 3162.7-5 Site security on Federal and Indian (except Osage) oil and gas leases.**

(a) *Definitions. Appropriate valves.* Those valves in a particular piping system, i.e., fill lines, equalizer or overflow lines, sales lines, circulating lines, and drain lines that shall be sealed during a given operation.

*Effectively sealed.* The placement of a seal in such a manner that the position of the sealed valve may not be altered without the seal being destroyed.

*Production phase.* That period of time or mode of operation during which crude oil is delivered directly to or through production vessels to the storage facilities and includes all operations at the facility other than those defined by the sales phase.

*Sales phase.* That period of time or mode of operation during which crude oil is removed from the storage facilities for sales, transportation or other purposes.

*Seal.* A device, uniquely numbered, which completely secures a valve.

(b) *Minimum Standards.* Each operator of a Federal or Indian lease shall comply with the following minimum standards to assist in providing accountability of oil or gas production:

(1) All lines entering or leaving oil storage tanks shall have valves capable of being effectively sealed during the

43 CFR Ch. II (10-1-08 Edition)

production and sales operations unless otherwise modified by other subparagraphs of this paragraph, and any equipment needed for effective sealing, excluding the seals, shall be located at the site. For a minimum of 6 years the operator shall maintain a record of seal numbers used and shall document on which valves or connections they were used as well as when they were installed and removed. The site facility diagram(s) shall show which valves will be sealed in which position during both the production and sales phases of operation.

(2) Each Lease Automatic Custody Transfer (LACT) system shall employ meters that have non-resettable totalizers. There shall be no by-pass piping around the LACT. All components of the LACT that are used for volume or quality determinations of the oil shall be effectively sealed. For systems where production may only be removed through the LACT, no sales or equalizer valves need be sealed. However, any valves which may allow access for removal of oil before measurement through the LACT shall be effectively sealed.

(3) There shall be no by-pass piping around gas meters. Equipment which permits changing the orifice plate without bleeding the pressure off the gas meter run is not considered a by-pass.

(4) For oil measured and sold by hand gauging, all appropriate valves shall be sealed during the production or sales phase, as applicable.

(5) Circulating lines having valves which may allow access to remove oil from storage and sales facilities to any other source except through the treating equipment back to storage shall be effectively sealed as near the storage tank as possible.

(6) The operator, with reasonable frequency, shall inspect all leases to determine production volumes and that the minimum site security standards are being met. The operator shall retain records of such inspections and measurements for 6 years from generation. Such records and measurements shall be available to any authorized officer or authorized representative upon request.

(7) Any person removing oil from a facility by motor vehicle shall possess the identification documentation required by applicable NTL's or onshore Orders while the oil is removed and transported.

(8) Theft or mishandling of oil from a Federal or Indian lease shall be reported to the authorized officer as soon as discovered, but not later than the next business day. Said report shall include an estimate of the volume of oil involved. Operators also are expected to report such thefts promptly to local law enforcement agencies and internal company security.

(9) Any operator may request the authorized officer to approve a variance from any of the minimum standards prescribed by this section. The variance request shall be submitted in writing to the authorized officer who may consider such factors as regional oil field facility characteristics and fenced, guarded sites. The authorized officer may approve a variance if the proposed alternative will ensure measures equal to or in excess of the minimum standards provided in paragraph (b) of this section will be put in place to detect or prevent internal and external theft, and will result in proper production accountability.

(c) *Site security plans.* (1) Site security plans, which include the operator's plan for complying with the minimum standards enumerated in paragraph (b) of this section for ensuring accountability of oil/condensate production are required for all facilities and such facilities shall be maintained in compliance with the plan. For new facilities, notice shall be given that it is subject to a specific existing plan, or a notice of a new plan shall be submitted, no later than 60 days after completion of construction or first production or following the inclusion of a well on committed non-Federal lands into a federally supervised unit or communitization agreement, whichever occurs first, and on that date the facilities shall be in compliance with the plan. At the operator's option, a single plan may include all of the operator's leases, unit and communitized areas, within a single BLM district, provided the plan clearly identifies each lease, unit, or communitized area

included within the scope of the plan and the extent to which the plan is applicable to each lease, unit, or communitized area so identified.

(2) The operator shall retain the plan but shall notify the authorized officer of its completion and which leases, unit and communitized areas are involved. Such notification is due at the time the plan is completed as required by paragraph (c)(1) of this section. Such notification shall include the location and normal business hours of the office where the plan will be maintained. Upon request, all plans shall be made available to the authorized officer.

(3) The plan shall include the frequency and method of the operator's inspection and production volume recordation. The authorized officer may, upon examination, require adjustment of the method or frequency of inspection.

(d) *Site facility diagrams.* (1) Facility diagrams are required for all facilities which are used in storing oil/condensate produced from, or allocated to, Federal or Indian lands. Facility diagrams shall be filed within 60 days after new measurement facilities are installed or existing facilities are modified or following the inclusion of the facility into a federally supervised unit or communitization agreement.

(2) No format is prescribed for facility diagrams. They are to be prepared on 8½"×11" paper, if possible, and be legible and comprehensible to a person with ordinary working knowledge of oil field operations and equipment. The diagram need not be drawn to scale.

(3) A site facility diagram shall accurately reflect the actual conditions at the site and shall, commencing with the header if applicable, clearly identify the vessels, piping, metering system, and pits, if any, which apply to the handling and disposal of oil, gas and water. The diagram shall indicate which valves shall be sealed and in what position during the production or sales phase. The diagram shall clearly identify the lease on which the facility is located and the site security plan to

### § 3163.1

### 43 CFR Ch. II (10–1–08 Edition)

which it is subject, along with the location of the plan.

[47 FR 47765, Oct. 27, 1982. Redesignated at 48 FR 36583–36586, Aug. 12, 1983, and amended at 52 FR 5392, Feb. 20, 1987. Redesignated at 53 FR 1218, Jan. 15, 1988; 53 FR 24688, June 30, 1988]

#### **Subpart 3163—Noncompliance, Assessments, and Penalties**

##### **§ 3163.1 Remedies for acts of non-compliance.**

(a) Whenever an operating rights owner or operator fails or refuses to comply with the regulations in this part, the terms of any lease or permit, or the requirements of any notice or order, the authorized officer shall notify the operating rights owner or operator, as appropriate, in writing of the violation or default. Such notice shall also set forth a reasonable abatement period:

(1) If the violation or default is not corrected within the time allowed, the authorized officer may subject the operating rights owner or operator, as appropriate, to an assessment of not more than \$500 per day for each day nonabatement continues where the violation or default is deemed a major violation;

(2) Where noncompliance involves a minor violation, the authorized officer may subject the operating rights owner or operator, as appropriate, to an assessment of \$250 for failure to abate the violation or correct the default within the time allowed;

(3) When necessary for compliance, or where operations have been commenced without approval, or where continued operations could result in immediate, substantial, and adverse impacts on public health and safety, the environment, production accountability, or royalty income, the authorized officer may shut down operations. Immediate shut-in action may be taken where operations are initiated and conducted without prior approval, or where continued operations could result in immediate, substantial, and adverse impacts on public health and safety, the environment, production accountability, or royalty income. Shut-in actions for other situations

may be taken only after due notice, in writing, has been given;

(4) When necessary for compliance, the authorized officer may enter upon a lease and perform, or have performed, at the sole risk and expense of the operator, operations that the operator fails to perform when directed in writing by the authorized officer. Appropriate charges shall include the actual cost of performance, plus an additional 25 percent of such amount to compensate the United States for administrative costs. The operator shall be provided with a reasonable period of time either to take corrective action or to show why the lease should not be entered;

(5) Continued noncompliance may subject the lease to cancellation and forfeiture under the bond. The operator shall be provided with a reasonable period of time either to take corrective action or to show why the lease should not be recommended for cancellation;

(6) Where actual loss or damage has occurred as a result of the operator's noncompliance, the actual amount of such loss or damage shall be charged to the operator.

(b) Certain instances of noncompliance are violations of such a serious nature as to warrant the imposition of immediate assessments upon discovery. Upon discovery the following violations shall result in immediate assessments, which may be retroactive, in the following specified amounts per violation:

(1) For failure to install blowout preventer or other equivalent well control equipment, as required by the approved drilling plan, \$500 per day for each day that the violation existed, including days the violation existed prior to discovery, not to exceed \$5,000;

(2) For drilling without approval or for causing surface disturbance on Federal or Indian surface preliminary to drilling without approval, \$500 per day for each day that the violation existed, including days the violation existed prior to discovery, not to exceed \$5,000;

(3) For failure to obtain approval of a plan for well abandonment prior to commencement of such operations, \$500.

(c) Assessments under paragraph (a)(1) of this section shall not exceed

## Bureau of Land Management, Interior

## § 3163.2

\$1,000 per day, per operating rights owner or operator, per lease. Assessments under paragraph (a)(2) of this section shall not exceed a total of \$500 per operating rights owner or operator, per lease, per inspection.

(d) Continued noncompliance shall subject the operating rights owner or operator, as appropriate, to penalties described in § 3163.2 of this title.

(e) On a case-by-case basis, the State Director may compromise or reduce assessments under this section. In compromising or reducing the amount of the assessment, the State Director shall state in the record the reasons for such determination.

[52 FR 5393, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987, as amended at 53 FR 17364, May 16, 1988; 53 FR 22847, June 17, 1988]

### § 3163.2 Civil penalties.

(a) Whenever an operating rights owner or operator, as appropriate, fails or refuses to comply with any applicable requirements of the Federal Oil and Gas Royalty Management Act, any mineral leasing law, any regulation thereunder, or the terms of any lease or permit issued thereunder, the authorized officer shall notify the operating rights owner or operator, as appropriate, in writing of the violation, unless the violation was discovered and reported to the authorized officer by the liable person or the notice was previously issued under § 3163.1 of this title. If the violation is not corrected within 20 days of such notice or report, or such longer time as the authorized officer may agree to in writing, the operating rights owner or operator, as appropriate, shall be liable for a civil penalty of up to \$500 per violation for each day such violation continues, dating from the date of such notice or report. Any amount imposed and paid as assessments under the provisions of § 3163.1(a)(1) of this title shall be deducted from penalties under this section.

(b) If the violation specified in paragraph (a) of this section is not corrected within 40 days of such notice or report, or a longer period as the authorized officer may agree to in writing, the operating rights owner or operator, as appropriate, shall be liable for a civil penalty of up to \$5,000 per viola-

tion for each day the violation continues, not to exceed a maximum of 60 days, dating from the date of such notice or report. Any amount imposed and paid as assessments under the provisions of § 3163.1(a)(1) of this title shall be deducted from penalties under this section.

(c) In the event the authorized officer agrees to an abatement period of more than 20 days, the date of notice shall be deemed to be 20 days prior to the end of such longer abatement period for the purpose of civil penalty calculation.

(d) Whenever a transporter fails to permit inspection for proper documentation by any authorized representative, as provided in § 3162.7-1(c) of this title, the transporter shall be liable for a civil penalty of up to \$500 per day for the violation, not to exceed a maximum of 20 days, dating from the date of notice of the failure to permit inspection and continuing until the proper documentation is provided.

(e) Any person shall be liable for a civil penalty of up to \$10,000 per violation for each day such violation continues, not to exceed a maximum of 20 days if he/she:

(1) Fails or refuses to permit lawful entry or inspection authorized by § 3162.1(b) of this title; or

(2) Knowingly or willfully fails to notify the authorized officer by letter or Sundry Notice, Form 3160-5 or orally to be followed by a letter or Sundry Notice, not later than the 5th business day after any well begins production on which royalty is due, or resumes production in the case of a well which has been off of production for more than 90 days, from a well located on a lease site, or allocated to a lease site, of the date on which such production began or resumed.

(f) Any person shall be liable for a civil penalty of up to \$25,000 per violation for each day such violation continues, not to exceed a maximum of 20 days if he/she:

(1) Knowingly or willfully prepares, maintains or submits false, inaccurate or misleading reports, notices, affidavits, records, data or other written information required by this part; or

(2) Knowingly or willfully takes or removes, transports, uses or diverts

### § 3163.3

any oil or gas from any Federal or Indian lease site without having valid legal authority to do so; or

(3) Purchases, accepts, sells, transports or conveys to another any oil or gas knowing or having reason to know that such oil or gas was stolen or unlawfully removed or diverted from a Federal or Indian lease site.

(g) Determinations of Penalty Amounts for this section are as follows:

(1) For major violations, all initial proposed penalties shall be at the maximum rate provided in paragraphs (a), (b), and (d) through (f) of this section, i.e., in paragraph (a) of this section, the initial proposed penalty for a major violation shall be at the rate of \$500 per day through the 40th day of a non-compliance beginning after service of notice, and in paragraph (b) of this section, \$5,000 per day for each day the violation remains uncorrected after the date of notice or report of the violation. Such penalties shall not exceed a rate of \$1,000 per day, per operating rights owner or operator, per lease under paragraph (a) of this section or \$10,000 per day, per operating rights owner or operator, per lease under paragraph (b) of this section. For paragraphs (d) through (f) of this section, the rate shall be \$500, \$10,000, and \$25,000, respectively.

(2) For minor violations, no penalty under paragraph (a) of this section shall be assessed unless:

(i) The operating rights owner or operator, as appropriate, has been notified of the violation in writing and did not correct the violation within the time allowed; and

(ii) The operating rights owner or operator, as appropriate, has been assessed \$250 under § 3163.1 of this title and a second notice has been issued giving an abatement period of not less than 20 days; and

(iii) The noncompliance was not abated within the time allowed by the second notice. The initial proposed penalty for a minor violation under paragraph (a) of this section shall be at the rate of \$50 per day beginning with the date of the second notice. Under paragraph (b) of this section, the penalty shall be at a daily rate of \$500. Such penalties shall not exceed a rate

### 43 CFR Ch. II (10–1–08 Edition)

of \$100 per day, per operating rights owner or operator, per lease under paragraph (a) of this section, of \$1,000 per day, per operating rights owner or operator, per lease under paragraph (b) of this section.

(h) On a case-by-case basis, the Secretary may compromise or reduce civil penalties under this section. In compromising or reducing the amount of a civil penalty, the Secretary shall state on the record the reasons for such determination.

(i) Civil penalties provided by this section shall be supplemental to, and not in derogation of, any other penalties or assessments for noncompliance in any other provision of law, except as provided in paragraphs (a) and (b) of this section.

(j) If the violation continues beyond the 60-day maximum specified in paragraph (b) of this section or beyond the 20 day maximum specified in paragraphs (e) and (f) of this section, lease cancellation proceedings shall be initiated under either Title 43 or Title 25 of the Code of Federal Regulations.

(k) If the violation continues beyond the 20-day maximum specified in paragraph (d) of this section, the authorized officer shall revoke the transporter's authority to remove crude oil or other liquid hydrocarbons from any Federal or Indian lease under the authority of that authorized officer or to remove any crude oil or liquid hydrocarbons allocation to such lease site. This revocation of the transporter's authority shall continue until compliance is achieved and related penalty paid.

[52 FR 5393, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987, as amended at 53 FR 17364, May 16, 1988]

### § 3163.3 Criminal penalties.

Any person who commits an act for which a civil penalty is provided in § 3163.2(f) shall, upon conviction, be punished by a fine of not more than \$50,000, or by imprisonment for not more than 2 years, or both.

[70 FR 75954, Dec. 22, 2005]

### § 3163.4 Failure to pay.

If any person fails to pay an assessment or a civil penalty under § 3163.1 or § 3163.2 of this title after the order

## Bureau of Land Management, Interior

## § 3164.1

making the assessment or penalty becomes a final order, and if such person does not file a petition for judicial review in accordance with this subpart, or, after a court in an action brought under this subpart has entered a final judgment in favor of the Secretary, the court shall have jurisdiction to award the amount assessed plus interest from the date of the expiration of the 90-day period provided by § 3165.4(e) of this title. The Federal Oil and Gas Royalty Management Act requires that any judgment by the court shall include an order to pay.

[52 FR 5394, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987]

### § 3163.5 Assessments and civil penalties.

(a) Assessments made under § 3163.1 of this title are due upon issuance and shall be paid within 30 days of receipt of certified mail written notice or personal service, as directed by the authorized officer in the notice. Failure to pay assessed damages timely will be subject to late payment charges as prescribed under Title 30 CFR Group 202.

(b) Civil penalties under § 3163.2 of this title shall be paid within 30 days of completion of any final order of the Secretary or the final order of the Court.

(c) Payments made pursuant to this section shall not relieve the responsible party of compliance with the regulations in this part or from liability for waste or any other damage. A waiver of any particular assessment shall not be construed as precluding an assessment pursuant to § 3163.1 of this title for any other act of noncompliance occurring at the same time or at any other time. The amount of any civil penalty under § 3163.2 of this title, as finally determined, may be deducted

from any sums owing by the United States to the person charged.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983; 49 FR 37368, Sept. 21, 1984; 52 FR 5394, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987; 53 FR 17364, May 16, 1988]

### § 3163.6 Injunction and specific performance.

(a) In addition to any other remedy under this part or any mineral leasing law, the Attorney General of the United States or his designee may bring a civil action in a district court of the United States to:

(1) Restrain any violation of the Federal Oil and Gas Royalty and Management Act or any mineral leasing law of the United States; or

(2) Compel the taking of any action required by or under the Act or any mineral leasing law of the United States.

(b) A civil action described in paragraph (a) may be brought only in the United States district court of the judicial district wherein the act, omission or transaction constituting a violation under the Act or any other mineral leasing law occurred, or wherein the defendant is found or transacts business.

[49 FR 37368, Sept. 21, 1984]

## Subpart 3164—Special Provisions

### § 3164.1 Onshore Oil and Gas Orders.

(a) The Director is authorized to issue Onshore Oil and Gas Orders when necessary to implement and supplement the regulations in this part. All orders will be published in the FEDERAL REGISTER both for public comment and in final form.

(b) These Orders are binding on operating rights owners and operators, as appropriate, of Federal and restricted Indian oil and gas leases which have been, or may hereafter be, issued. The Onshore Oil and Gas Orders listed below are currently in effect:

Order No.	Subject	Effective date	FEDERAL REGISTER reference	Supersedes
1.	Approval of operations .....	May 7, 2007 .....	71 FR .....	NTL-6.
2.	Drilling .....	Dec. 19, 1988 .....	53 FR 46790 .....	None.

## § 3164.2

## 43 CFR Ch. II (10–1–08 Edition)

### § 3164.2 NTL's and other implementing procedures.

(a) The authorized officer is authorized to issue NTL's when necessary to implement the onshore oil and gas orders and the regulations in this part. All NTL's will be issued after notice and opportunity for comment.

(b) All NTL's issued prior to the promulgation of these regulations shall remain in effect until modified, superseded by an Onshore Oil and Gas Order, or otherwise terminated.

(c) A manual and other written instructions will be used to provide policy and procedures for internal guidance of the Bureau of Land Management.

### § 3164.3 Surface rights.

(a) Operators shall have the right of surface use only to the extent specifically granted by the lease. With respect to restricted Indian lands, additional surface rights may be exercised when granted by a written agreement with the Indian surface owner and approved by the Superintendent of the Indian agency having jurisdiction.

(b) Except for the National Forest System lands, the authorized officer is responsible for approving and supervising the surface use of all drilling, development, and production activities on the leasehold. This includes storage tanks and processing facilities, sales facilities, all pipelines upstream from such facilities, and other facilities to

aid production such as water disposal pits and lines, and gas or water injection lines.

(c) On National Forest System lands, the Forest Service shall regulate all surface disturbing activities in accordance with Forest Service regulations, including providing to the authorized officer appropriate approvals of such activities.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583–36586, Aug. 12, 1983, further amended at 53 FR 17364, May 16, 1988; 53 FR 22847, June 17, 1988]

### § 3164.4 Damages on restricted Indian lands.

Assessments for damages to lands, crops, buildings, and to other improvements on restricted Indian lands shall be made by the Superintendent and be payable in the manner prescribed by said official.

## Subpart 3165—Relief, Conflicts, and Appeals

### § 3165.1 Relief from operating and producing requirements.

(a) Applications for relief from either the operating or the producing requirements of a lease, or both, shall be filed with the authorized officer, and shall include a full statement of the circumstances that render such relief necessary.

(b) The authorized officer shall act on applications submitted for a suspension

## Bureau of Land Management, Interior

## § 3165.3

of operations or production, or both, filed pursuant to § 3103.4-4 of this title. The application for suspension shall be filed with the authorized officer prior to the expiration date of the lease; shall be executed by all operating rights owners or, in the case of a Federal unit approved under part 3180 of this title, by the unit operator on behalf of the committed tracts or by all operating rights owners of such tracts; and shall include a full statement of the circumstances that makes such relief necessary.

(c) If approved, a suspension of operations and production will be effective on the first of the month in which the completed application was filed or the date specified by the authorized officer. Suspensions will terminate when they are no longer justified in the interest of conservation, when such action is in the interest of the lessor, or as otherwise stated by the authorized officer in the approval letter.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17364, May 16, 1988; 61 FR 4752, Feb. 8, 1996]

### § 3165.1-1 Relief from royalty and rental requirements.

Applications for any modification authorized by law of the royalty or rental requirements of a lease for lands of the United States shall be filed in the office of the authorized officer having jurisdiction of the lands. (For other regulations relating to royalty and rental relief, and suspension of operations and production, see part 3103 of this title.)

[48 FR 36586, Aug. 12, 1983, as amended at 53 FR 17365, May 16, 1988]

### § 3165.2 Conflicts between regulations.

In the event of any conflict between the regulations in this part and the regulations in title 25 CFR concerning oil and gas operations on Federal and Indian leaseholds, the regulations in this part shall govern with respect to the obligations in the conduct of oil and gas operations, acts of noncompliance, and the jurisdiction and authority of the authorized officer.

[47 FR 47765, Oct. 27, 1982. Redesignated and amended at 48 FR 36583-36586, Aug. 12, 1983, further amended at 53 FR 17365, May 16, 1988]

### § 3165.3 Notice, State Director review and hearing on the record.

(a) *Notice.* Whenever an operating rights owner or operator, as appropriate, fails to comply with any provisions of the lease, the regulations in this part, applicable orders or notices, or any other appropriate orders of the authorized officer, written notice shall be given the appropriate party and the lessee(s) to remedy any defaults or violations. Written orders or a notice of violation, assessment, or proposed penalty shall be issued and served by personal service by an authorized officer or by certified mail. Service shall be deemed to occur when received or 7 business days after the date it is mailed, whichever is earlier. Any person may designate a representative to receive any notice of violation, assessment, or proposed penalty on his/her behalf. In the case of a major violation, the authorized officer shall make a good faith effort to contact such designated representative by telephone to be followed by a written notice. Receipt of notice shall be deemed to occur at the time of such verbal communication, and the time of notice and the name of the receiving party shall be confirmed in the file. If the good faith effort to contact the designated representative is unsuccessful, notice of the major violation may be given to any person conducting or supervising operations subject to the regulations in this part. In the case of a minor violation, written notice shall be provided as described above. A copy of all orders, notices, or instructions served on any contractor or field employee or designated representative shall also be mailed to the operator. Any notice involving a civil penalty shall be mailed to the operating rights owner.

(b) *State Director review.* Any adversely affected party that contests a notice of violation or assessment or an instruction, order, or decision of the authorized officer issued under the regulations in this part, may request an administrative review, before the State Director, either with or without oral presentation. Such request, including all supporting documentation, shall be filed in writing with the appropriate State Director within 20 business days of the date such notice of violation or

assessment or instruction, order, or decision was received or considered to have been received and shall be filed with the appropriate State Director. Upon request and showing of good cause, an extension for submitting supporting data may be granted by the State Director. Such review shall include all factors or circumstances relevant to the particular case. Any party who is adversely affected by the State Director's decision may appeal that decision to the Interior Board of Land Appeals as provided in § 3165.4 of this part.

(c) *Review of proposed penalties.* Any adversely affected party wishing to contest a notice of proposed penalty shall request an administrative review before the State Director under the procedures set out in paragraph (b) of this section. However, no civil penalty shall be assessed under this part until the party charged with the violation has been given the opportunity for a hearing on the record in accordance with section 109(e) of the Federal Oil and Gas Royalty Management Act. Therefore, any party adversely affected by the State Director's decision on the proposed penalty, may request a hearing on the record before an Administrative Law Judge or, in lieu of a hearing, may appeal that decision directly to the Interior Board of Land Appeals as provided in § 3165.4(b)(2) of this part. If such party elects to request a hearing on the record, such request shall be filed in the office of the State Director having jurisdiction over the lands covered by the lease within 30 days of receipt of the State Director's decision on the notice of proposed penalty. Where a hearing on the record is requested, the State Director shall refer the complete case file to the Office of Hearings and Appeals for a hearing before an Administrative Law Judge in accordance with part 4 of this title. A decision shall be issued following completion of the hearing and shall be served on the parties. Any party, including the United States, adversely affected by the decision of the Administrative Law Judge may appeal to the Interior Board of Land Appeals as provided in § 3163.4 of this title.

(d) *Action on request for State Director review. Action on request for administra-*

*tive review.* The State Director shall issue a final decision within 10 business days of the receipt of a complete request for administrative review or, where oral presentation has been made, within 10 business days thereafter. Such decision shall represent the final Bureau decision from which further review may be obtained as provided in paragraph (c) of this section for proposed penalties, and in § 3165.4 of this title for all decisions.

(e) *Effect of request for State Director review or for hearing on the record.* (1) Any request for review by the State Director under this section shall not result in a suspension of the requirement for compliance with the notice of violation or proposed penalty, or stop the daily accumulation of assessments or penalties, unless the State Director to whom the request is made so determines.

(2) Any request for a hearing on the record before an administrative law judge under this section shall not result in a suspension of the requirement for compliance with the decision, unless the administrative law judge so determines. Any request for hearing on the record shall stop the accumulation of additional daily penalties until such time as a final decision is rendered, except that within 10 days of receipt of a request for a hearing on the record, the State Director may, after review of such request, recommend that the Director reinstate the accumulation of daily civil penalties until the violation is abated. Within 45 days of the filing of the request for a hearing on the record, the Director may reinstate the accumulation of civil penalties if he/she determines that the public interest requires a reinstatement of the accumulation and that the violation is causing or threatening immediate, substantial and adverse impacts on public health and safety, the environment, production accountability, or royalty income. If the Director does not reinstate the daily accumulation within 45 days of the filing of the request for a hearing on the record, the suspension shall continue.

[52 FR 5394, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987, as amended at 53 FR 17365, May 16, 1988; 66 FR 1894, Jan. 10, 2001]

## Bureau of Land Management, Interior

## § 3165.4

### § 3165.4 Appeals.

(a) *Appeal of decision of State Director.* Any party adversely affected by the decision of the State Director after State Director review, under § 3165.3(b) of this title, of a notice of violation or assessment or of an instruction, order, or decision may appeal that decision to the Interior Board of Land Appeals pursuant to the regulations set out in part 4 of this title.

(b) *Appeal from decision on a proposed penalty after a hearing on the record.* (1) Any party adversely affected by the decision of an Administrative Law Judge on a proposed penalty after a hearing on the record under § 3165.3(c) of this title may appeal that decision to the Interior Board of Land Appeals pursuant to the regulations in part 4 of this title.

(2) In lieu of a hearing on the record under § 3165.3(c) of this title, any party adversely affected by the decision of the State Director on a proposed penalty may waive the opportunity for such a hearing on the record by appealing directly to the Interior Board of Land Appeals under part 4 of this title. However, if the right to a hearing on the record is waived, further appeal to the District Court under section 109(j) of the Federal Oil and Gas Royalty Management Act is precluded.

(c) *Effect of an appeal on an approval/decision by a State Director or Administrative Law Judge.* All decisions and approvals of a State Director or Administrative Law Judge under this part shall remain effective pending appeal unless the Interior Board of Land Appeals determines otherwise upon consideration of the standards stated in this paragraph. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of a State Director or Administrative Law Judge under this part. A petition for a stay of a decision or approval of a State Director or Administrative Law Judge shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards:

(1) The relative harm to the parties if the stay is granted or denied,

(2) The likelihood of the appellant's success on the merits,

(3) The likelihood of irreparable harm to the appellant or resources if the stay is not granted, and

(4) Whether the public interest favors granting the stay.

Nothing in this paragraph shall diminish the discretionary authority of a State Director or Administrative Law Judge to stay the effectiveness of a decision subject to appeal pursuant to paragraph (a) or (b) of this section upon a request by an adversely affected party or on the State Director's or Administrative Law Judge's own initiative. If a State Director or Administrative Law Judge denies such a request, the requester can petition for a stay of the denial decision by filing a petition with the Interior Board of Land Appeals that addresses the standards described above in this paragraph.

(d) *Effect of appeal on compliance requirements.* Except as provided in paragraph (d) of this section, any appeal filed pursuant to paragraphs (a) and (b) of this section shall not result in a suspension of the requirement for compliance with the order or decision from which the appeal is taken unless the Interior Board of Land Appeals determines that suspension of the requirements of the order or decision will not be detrimental to the interests of the lessor or upon submission and acceptance of a bond deemed adequate to indemnify the lessor from loss or damage.

(e) *Effect of appeal on assessments and penalties.* (1) Except as provided in paragraph (d)(3) of this section, an appeal filed pursuant to paragraph (a) of this section shall suspend the accumulation of additional daily assessments. However, the pendency of an appeal shall not bar the authorized officer from assessing civil penalties under § 3163.2 of this title in the event the operator has failed to abate the violation which resulted in the assessment. The Board of Land Appeals may issue appropriate orders to coordinate the pending appeal and the pending civil penalty proceeding.

(2) Except as provided in paragraph (d)(3) of this section, an appeal filed pursuant to paragraph (b) of this section shall suspend the accumulation of additional daily civil penalties.

(3) When an appeal is filed under paragraph (a) or (b) of this section, the State Director may, within 10 days of receipt of the notice of appeal, recommend that the Director reinstate the accumulation of assessments and daily civil penalties until such time as a final decision is rendered or until the violation is abated. The Director may, if he/she determines that the public interest requires it, reinstate such accumulation(s) upon a finding that the violation is causing or threatening immediate substantial and adverse impacts on public health and safety, the environment, production accountability, or royalty income. If the Director does not act on the recommendation to reinstate the accumulation(s) within 45 days of the filing of the notice of appeal, the suspension shall continue.

(4) When an appeal is filed under paragraph (a) of this section from a decision to require drainage protection, BLM's drainage determination will remain in effect during the appeal, notwithstanding the provisions of 43 CFR 4.21. Compensatory royalty and interest determined under 30 CFR Part 218 will continue to accrue throughout the appeal.

(f) *Judicial review.* Any person who is aggrieved by a final order of the Secretary under this section may seek review of such order in the United States District Court for the judicial district in which the alleged violation occurred. Because section 109 of the Federal Oil and Gas Royalty Management Act provides for judicial review of civil penalty determinations only where a person has requested a hearing on the record, a waiver of such hearing precludes further review by the district court. Review by the district court shall be on the administrative record only and not de novo. Such an action shall be barred unless filed within 90 days after issuance of final decision as provided in §4.21 of this title.

[52 FR 5395, Feb. 20, 1987; 52 FR 10225, Mar. 31, 1987, as amended at 53 FR 17365, May 16, 1988; 57 FR 9013, Mar. 13, 1992; 66 FR 1894, Jan. 10, 2001]

## **PART 3180—ONSHORE OIL AND GAS UNIT AGREEMENTS: UNPROVEN AREAS**

NOTE: Many existing unit agreements currently in effect specifically refer to the United States Geological Survey, USGS, Minerals Management Service, MMS, Supervisor, Conservation Manager, Deputy Conservation Manager, Minerals Manager and Deputy Minerals Manager in the body of the agreements, as well as references to 30 CFR part 221 or specific sections thereof. Those references shall now be read in the context of Secretarial Order 3087 and now mean either the Bureau of Land Management or Minerals Management Service, as appropriate.

### Subpart 3180—Onshore Oil and Gas Unit Agreements: General

#### § 3180.0-1 Purpose.

The regulations in this part prescribe the procedures to be followed and the requirements to be met by the owners of any right, title or interest in Federal oil and gas leases (see § 3160.0-5 of this title) and their representatives who wish to unite with each other, or jointly or separately with others, in collectively adopting and operating under a unit plan for the development of any oil or gas pool, field or like area, or any part thereof. All unit agreements on Federal leases are subject to the regulations contained in part 3160 of this title, Onshore Oil and Gas Operations. All unit operations on non-Federal lands included within Federal unit plans are subject to the reporting requirements of part 3160 of this title.

[48 FR 36587, Aug. 12, 1983]

#### § 3180.0-2 Policy.

Subject to the supervisory authority of the Secretary of the Interior, the administration of the regulations in this part shall be under the jurisdiction of the authorized officer. In the exercise of his/her discretion, the authorized officer shall be subject to the direction and supervisory authority of the Director, Bureau of Land Management, who may exercise the jurisdiction of the authorized officer.

[48 FR 36587, Aug. 12, 1983]

#### § 3180.0-3 Authority.

The Mineral Leasing Act, as amended and supplemented (30 U.S.C. 181, 189, 226(e) and 226(j)), and Order Number 3087, dated December 3, 1982, as amended on February 7, 1983 (48 FR 8983), under which the Secretary consolidated and transferred the onshore min-

erals management functions of the Department, except mineral revenue functions and the responsibility for leasing of restricted Indian lands, to the Bureau of Land Management.

[48 FR 36587, Aug. 12, 1983]

#### § 3180.0-5 Definitions.

The following terms, as used in this part or in any unit agreement approved under the regulations in this part, shall have the meanings here indicated unless otherwise defined in such unit agreement:

*Federal lease.* A lease issued under the Act of February 25, 1920, as amended (30 U.S.C. 181, *et seq.*); the Act of May 21, 1930 (30 U.S.C. 351-359); the Act of August 7, 1947 (30 U.S.C. 351, *et seq.*); or the Act of November 16, 1981 (Pub. L. 97-98, 95 Stat. 1070).

*Participating area.* That part of a unit area which is considered reasonably proven to be productive of unitized substances in paying quantities or which is necessary for unit operations and to which production is allocated in the manner prescribed in the unit agreement.

*Unit area.* The area described in an agreement as constituting the land logically subject to exploration and/or development under such agreement.

*Unitized land.* Those lands and formations within a unit area which are committed to an approved agreement or plan.

*Unitized substances.* Deposits of oil and gas contained in the unitized land which are recoverable in paying quantities by operation under and pursuant to an agreement.

*Working interest.* An interest held in unitized substances or in lands containing the same by virtue of a lease, operating agreement, fee title, or otherwise, under which, except as otherwise provided in the agreement, the owner of such interest is vested with the right to explore for, develop, and produce such substances. The rights delegated to the unit operator by the unit agreement are not regarded as a working interest.

[48 FR 26766, June 10, 1983. Redesignated and amended at 48 FR 36587, Aug. 12, 1983; 51 FR 34603, Sept. 30, 1986]

**Subpart 3181—Application for Unit Agreement**

**§ 3181.1 Preliminary consideration of unit agreement.**

The model unit agreement set forth in § 3186.1 of this title, is acceptable for use in unproven areas. Unique situations requiring special provisions should be clearly identified, since these and other special conditions may necessitate a modification of the model unit agreement set forth in § 3186.1 of this title. Any proposed special provisions or other modifications of the model agreement should be submitted for preliminary consideration so that any necessary revision may be prescribed prior to execution by the interested parties. Where Federal lands constitute less than 10 percent of the total unit area, a non-Federal unit agreement may be used. Upon submission of such an agreement, the authorized officer will take appropriate action to commit the Federal lands.

**§ 3181.2 Designation of unit area; depth of test well.**

An application for designation of an area as logically subject to development under a unit agreement and for determination of the depth of a test well may be filed by a proponent of such an agreement at the proper BLM office. Such application shall be accompanied by a map or diagram on a scale of not less than 2 inches to 1 mile, outlining the area sought to be designated under this section. The Federal, State, Indian and privately owned land should be indicated by distinctive symbols or colors. Federal and Indian oil and gas leases and lease applications should be identified by lease serial numbers. Geologic information, including the results of any geophysical surveys, and any other available information showing that unitization is necessary and advisable in the public interest should be furnished. All information submitted under this section is subject to part 2 of this title, which sets forth the rules of the Department of the Interior relating to public availability of information contained in Departmental records, as provided under this part at § 3100.4 of this chapter. These data will be considered by the

authorized officer and the applicant will be informed of the decision reached. The designation of an area, pursuant to an application filed under this section, shall not create an exclusive right to submit an agreement for such area, nor preclude the inclusion of such area or any party thereof in another unit area.

[48 FR 26766, June 10, 1983. Redesignated at 48 FR 36587, Aug. 12, 1983, and amended at 63 FR 52953, Oct. 1, 1998]

**§ 3181.3 Parties to unit agreement.**

The owners of any right, title, or interest in the oil and gas deposits to be unitized are regarded as proper parties to a proposed agreement. All such parties must be invited to join the agreement. If any party fails or refuses to join the agreement, the proponent of the agreement, at the time it is filed for approval, must submit evidence of reasonable effort made to obtain joinder of such party and, when requested, the reasons for such nonjoinders. The address of each signatory party to the agreement should be inserted below the signature. Each signature should be attested by at least one witness if not notarized. The signing parties may execute any number of counterparts of the agreement with the same force and effect as if all parties signed the same document, or may execute a ratification or consent in a separate instrument with like force and effect.

**§ 3181.4 Inclusion of non-Federal lands.**

(a) Where State-owned land is to be unitized with Federal lands, approval of the agreement by appropriate State officials must be obtained prior to its submission to the proper BLM office for final approval. When authorized by the laws of the State in which the unitized land is situated, appropriate provision may be made in the agreement, recognizing such laws to the extent that they are applicable to non-Federal unitized land.

(b) When Indian lands are included, modification of the unit agreement will be required where appropriate. Approval of an agreement containing Indian lands by the Bureau of Indian Affairs must be obtained prior to final approval by the authorized officer.

## Bureau of Land Management, Interior

## § 3183.4

### § 3181.5 Compensatory royalty payment for unleased Federal land.

The unit agreement submitted by the unit proponent for approval by the authorized officer shall provide for payment to the Federal Government of a 12½ percent royalty on production that would be attributable to unleased Federal lands in a PA of the unit if said lands were leased and committed to the unit agreement. The value of production subject to compensatory royalty payment shall be determined pursuant to 30 CFR part 206, provided that no additional royalty shall be due on any production subject to compensatory royalty under this provision.

[58 FR 58632, Nov. 2, 1993, as amended at 59 FR 16999, Apr. 11, 1994]

### Subpart 3182—Qualifications of Unit Operator

#### § 3182.1 Qualifications of unit operator.

A unit operator must qualify as to citizenship in the same manner as those holding interests in Federal oil and gas leases under the regulations at subpart 3102 of this title. The unit operator may be an owner of a working interest in the unit area or such other party as may be selected by the owners of working interests. The unit operator shall execute an acceptance of the duties and obligations imposed by the agreement. No designation of or change in a unit operator will become effective until approved by the authorized officer, and no such approval will be granted unless the successor unit operator is deemed qualified to fulfill the duties and obligations prescribed in the agreement.

### Subpart 3183—Filing and Approval of Documents

#### § 3183.1 Where to file papers.

All papers, instruments, documents, and proposals submitted under this part shall be filed in the proper BLM office.

[48 FR 26766, June 10, 1983. Redesignated at 48 FR 36587, Aug. 12, 1983, and amended at 51 FR 34603, Sept. 30, 1986]

#### § 3183.2 Designation of area.

An application for designation of a proposed unit area and determination of the required depth of test well(s) shall be filed in duplicate. A like number of counterparts should be filed of any geologic data and any other information submitted in support of such application.

#### § 3183.3 Executed agreements.

Where a duly executed agreement is submitted for final approval, a minimum of four signed counterparts should be filed. The number of counterparts to be filed for supplementing, modifying, or amending an existing agreement, including change of unit operator, designation of new unit operator, establishment or revision of a participating area, and termination shall be prescribed by the authorized officer.

#### § 3183.4 Approval of executed agreement.

(a) A unit agreement shall be approved by the authorized officer upon a determination that such agreement is necessary or advisable in the public interest and is for the purpose of more properly conserving natural resources. Such approval shall be incorporated in a Certification-Determination document appended to the agreement (see § 3186.1 of this part for an example), and the unit agreement shall not be deemed effective until the authorized officer has executed the Certification-Determination document. No such agreement shall be approved unless the parties signatory to the agreement hold sufficient interests in the unit area to provide reasonably effective control of operations.

(b) The public interest requirement of an approved unit agreement for unproven areas shall be satisfied only if the unit operator commences actual drilling operations and thereafter diligently prosecutes such operations in accordance with the terms of said agreement. If an application is received for voluntary termination of a unit agreement for an unproven area during its fixed term or such an agreement automatically expires at the end of its fixed term without the public interest requirement having been satisfied, the

## § 3183.5

approval of that agreement by the authorized officer and lease segregations and extensions under § 3107.3-2 of this title shall be invalid, and no Federal lease shall be eligible for extensions under § 3107.4 of this title.

(c) Any modification of an approved agreement shall require the prior approval of the authorized officer.

[53 FR 17365, May 16, 1988, as amended at 58 FR 58633, Nov. 2, 1993]

### § 3183.5 Participating area.

Two counterparts of a substantiating geologic report, including structure-contour map, cross sections, and pertinent data, shall accompany each application for approval of a participating area or revision thereof under an approved agreement.

[48 FR 26766, June 10, 1983. Redesignated at 48 FR 36587, Aug. 12, 1983, and further redesignated at 53 FR 17365, May 16, 1988]

### § 3183.6 Plan of development.

Three counterparts of all plans of development and operation shall be submitted for approval under an approved agreement.

[48 FR 26766, June 10, 1983. Redesignated at 48 FR 36587, Aug. 12, 1983, and further redesignated at 53 FR 17365, May 16, 1988]

### § 3183.7 Return of approved documents.

One approved counterpart of each instrument or document submitted for approval will be returned to the unit operator by the authorized officer or his representative, together with such additional counterparts as may have been furnished for that purpose.

[48 FR 26766, June 10, 1983. Redesignated at 48 FR 36587, Aug. 12, 1983, and amended at 51 FR 34603, Sept. 30, 1986. Further redesignated at 53 FR 17365, May 16, 1988]

## Subpart 3184 [Reserved]

## Subpart 3185—Appeals

### § 3185.1 Appeals.

Any party adversely affected by an instruction, order, or decision issued under the regulations in this part may request an administrative review before the State Director under § 3165.3 of this title. Any party adversely affected

## 43 CFR Ch. II (10-1-08 Edition)

by a decision of the State Director after State Director review may appeal that decision as provided in part 4 of this title.

[58 FR 58633, Nov. 2, 1993]

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE

Unit area \_\_\_\_\_  
County of \_\_\_\_\_  
State of \_\_\_\_\_  
No. \_\_\_\_\_

**Bureau of Land Management, Interior**

**§ 3186.1**

This agreement, entered into as of the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_ by and between the parties subscribing, ratifying, or consenting hereto, and herein referred to as the "parties hereto,"

WITNESSETH:

WHEREAS, the parties hereto are the owners of working, royalty, or other oil and gas interests in the unit area subject to this agreement; and

WHEREAS, the Mineral Leasing Act of February 25, 1920, 41 Stat. 437, as amended, 30 U.S.C. Sec. 181 *et seq.*, authorizes Federal lessees and their representatives to unite with each other, or jointly or separately with others, in collectively adopting and operating under a unit plan of development or operations of any oil and gas pool, field, or like area, or any part thereof for the purpose of more properly conserving the natural resources thereof whenever determined and certified by the Secretary of the Interior to be necessary or advisable in the public interest; and

WHEREAS, the parties hereto hold sufficient interests in the \_\_\_\_\_ Unit Area covering the land hereinafter described to give reasonably effective control of operations therein; and

WHEREAS, it is the purpose of the parties hereto to conserve natural resources, prevent waste, and secure other benefits obtainable through development and operation of the area subject to this agreement under the terms, conditions, and limitations herein set forth;

NOW, THEREFORE, in consideration of the premises and the promises herein contained, the parties hereto commit to this agreement their respective interests in the below-defined unit area, and agree severally among themselves as follows:

1. ENABLING ACT AND REGULATIONS. The Mineral Leasing Act of February 25, 1920, as amended, *supra*, and all valid pertinent regulations including operating and unit plan regulations, heretofore issued thereunder or valid, pertinent, and reasonable regulations hereafter issued thereunder are accepted and made a part of this agreement as to Federal lands, provided such regulations are not inconsistent with the terms of this agreement; and as to non-Federal lands, the oil and gas operating regulations in effect as of the effective date hereof governing drilling and producing operations, not inconsistent with the terms hereof or the laws of the State in which the non-Federal land is located, are hereby accepted and made a part of this agreement.

<sup>1</sup>Optional sections (in addition the penultimate paragraph of Section 9 is to be included only when more than one obligation well is required and paragraph (h) of section 18 is to be used only when applicable).

2. UNIT AREA. The area specified on the map attached hereto marked Exhibit A is hereby designated and recognized as constituting the unit area, containing \_\_\_\_\_ acres, more or less.

Exhibit A shows, in addition to the boundary of the unit area, the boundaries and identity of tracts and leases in said area to the extent known to the Unit Operator. Exhibit B attached hereto is a schedule showing to the extent known to the Unit Operator, the acreage, percentage, and kind of ownership of oil and gas interests in all lands in the unit area. However, nothing herein or in Exhibits A or B shall be construed as a representation by any party hereto as to the ownership of any interest other than such interest or interests as are shown in the Exhibits as owned by such party. Exhibits A and B shall be revised by the Unit Operator whenever changes in the unit area or in the ownership interests in the individual tracts render such revision necessary, or when requested by the Authorized Officer, hereinafter referred to as AO and not less than four copies of the revised Exhibits shall be filed with the proper BLM office.

The above-described unit area shall when practicable be expanded to include therein any additional lands or shall be contracted to exclude lands whenever such expansion or contraction is deemed to be necessary or advisable to conform with the purposes of this agreement. Such expansion or contraction shall be effected in the following manner:

(a) Unit Operator, on its own motion (after preliminary concurrence by the AO), or on demand of the AO, shall prepare a notice of proposed expansion or contraction describing the contemplated changes in the boundaries of the unit area, the reasons therefor, any plans for additional drilling, and the proposed effective date of the expansion or contraction, preferably the first day of a month subsequent to the date of notice.

(b) Said notice shall be delivered to the proper BLM office, and copies thereof mailed to the last known address of each working interest owner, lessee and lessor whose interests are affected, advising that 30 days will be allowed for submission to the Unit Operator of any objections.

(c) Upon expiration of the 30-day period provided in the preceding item (b) hereof, Unit Operator shall file with the AO evidence of mailing of the notice of expansion or contraction and a copy of any objections thereto which have been filed with Unit Operator, together with an application in triplicate, for approval of such expansion or contraction and with appropriate joinders.

(d) After due consideration of all pertinent information, the expansion or contraction shall, upon approval by the AO, become effective as of the date prescribed in the notice thereof or such other appropriate date.

(e) All legal subdivisions of lands (i.e., 40 acres by Government survey or its nearest lot or tract equivalent; in instances of irregular surveys, unusually large lots or tracts shall be considered in multiples of 40 acres or the nearest aliquot equivalent thereof), no parts of which are in or entitled to be in a participating area on or before the fifth anniversary of the effective date of the first initial participating area established under this unit agreement, shall be eliminated automatically from this agreement, effective as of said fifth anniversary, and such lands shall no longer be a part of the unit area and shall no longer be subject to this agreement, unless diligent drilling operations are in progress on unitized lands not entitled to participation on said fifth anniversary, in which event all such lands shall remain subject hereto for so long as such drilling operations are continued diligently, with not more than 90-days time elapsing between the completion of one such well and the commencement of the next such well. All legal subdivisions of lands not entitled to be in a participating area within 10 years after the effective date of the first initial participating area approved under this agreement shall be automatically eliminated from this agreement as of said tenth anniversary. The Unit Operator shall, within 90 days after the effective date of any elimination hereunder, describe the area so eliminated to the satisfaction of the AO and promptly notify all parties in interest. All lands reasonably proved productive of unitized substances in paying quantities by diligent drilling operations after the aforesaid 5-year period shall become participating in the same manner as during said first 5-year period. However, when such diligent drilling operations cease, all nonparticipating lands not then entitled to be in a participating area shall be automatically eliminated effective as the 91st day thereafter.

Any expansion of the unit area pursuant to this section which embraces lands theretofore eliminated pursuant to this subsection 2(e) shall not be considered automatic commitment or recommitment of such lands. If conditions warrant extension of the 10-year period specified in this subsection, a single extension of not to exceed 2 years may be accomplished by consent of the owners of 90 percent of the working interest in the current nonparticipating unitized lands and the owners of 60 percent of the basic royalty interests (exclusive of the basic royalty interests of the United States) in nonparticipating unitized lands with approval of the AO, provided such extension application is submitted not later than 60 days prior to the expiration of said 10-year period.

3. UNITIZED LAND AND UNITIZED SUBSTANCES. All land now or hereafter committed to this agreement shall constitute land referred to herein as "unitized land" or

"land subject to this agreement." All oil and gas in any and all formations of the unitized land are unitized under the terms of this agreement and herein are called "unitized substances."

4. UNIT OPERATOR. \_\_\_\_\_ is hereby designated as Unit Operator and by signature hereto as Unit Operator agrees and consents to accept the duties and obligations of Unit Operator for the discovery, development, and production of unitized substances as herein provided. Whenever reference is made herein to the Unit Operator, such reference means the Unit Operator acting in that capacity and not as an owner of interest in unitized substances, and the term "working interest owner" when used herein shall include or refer to Unit Operator as the owner of a working interest only when such an interest is owned by it.

5. RESIGNATION OR REMOVAL OF UNIT OPERATOR. Unit Operator shall have the right to resign at any time prior to the establishment of a participating area or areas hereunder, but such resignation shall not become effective so as to release Unit Operator from the duties and obligations of Unit Operator and terminate Unit Operator's rights as such for a period of 6 months after notice of intention to resign has been served by Unit Operator on all working interest owners and the AO and until all wells then drilled hereunder are placed in a satisfactory condition for suspension or abandonment, whichever is required by the AO, unless a new Unit Operator shall have been selected and approved and shall have taken over and assumed the duties and obligations of Unit Operator prior to the expiration of said period.

Unit Operator shall have the right to resign in like manner and subject to like limitations as above provided at any time after a participating area established hereunder is in existence, but in all instances of resignation or removal, until a successor Unit Operator is selected and approved as hereinafter provided, the working interest owners shall be jointly responsible for performance of the duties of Unit Operator, and shall not later than 30 days before such resignation or removal becomes effective appoint a common agent to represent them in any action to be taken hereunder.

The resignation of Unit Operator shall not release Unit Operator from any liability for any default by it hereunder occurring prior to the effective date of its resignation.

The Unit Operator may, upon default or failure in the performance of its duties or obligations hereunder, be subject to removal by the same percentage vote of the owners of working interests as herein provided for the selection of a new Unit Operator. Such removal shall be effective upon notice thereof to the AO.

The resignation or removal of Unit Operator under this agreement shall not terminate its right, title, or interest as the owner of working interest or other interest in unitized substances, but upon the resignation or removal of Unit Operator becoming effective, such Unit Operator shall deliver possession of all wells, equipment, materials, and appurtenances used in conducting the unit operations to the new duly qualified successor Unit Operator or to the common agent, if no such new Unit Operator is selected to be used for the purpose of conducting unit operations hereunder. Nothing herein shall be construed as authorizing removal of any material, equipment, or appurtenances needed for the preservation of any wells.

6. SUCCESSOR UNIT OPERATOR. Whenever the Unit Operator shall tender his or its resignation as Unit Operator or shall be removed as hereinabove provided, or a change of Unit Operator is negotiated by the working interest owners, the owners of the working interests according to their respective acreage interests in all unitized land shall, pursuant to the Approval of the Parties requirements of the unit operating agreement, select a successor Unit Operator. Such selection shall not become effective until:

(a) a Unit Operator so selected shall accept in writing the duties and responsibilities of Unit Operator, and

(b) the selection shall have been approved by the AO.

If no successor Unit Operator is selected and qualified as herein provided, the AO at his election may declare this unit agreement terminated.

7. ACCOUNTING PROVISIONS AND UNIT OPERATING AGREEMENT. If the Unit Operator is not the sole owner of working interests, costs and expenses incurred by Unit Operator in conducting unit operations hereunder shall be paid and apportioned among and borne by the owners of working interests, all in accordance with the agreement or agreements entered into by and between the Unit Operator and the owners of working interests, whether one or more, separately or collectively. Any agreement or agreements entered into between the working interest owners and the Unit Operator as provided in this section, whether one or more, are herein referred to as the "unit operating agreement." Such unit operating agreement shall also provide the manner in which the working interest owners shall be entitled to receive their respective proportionate and allocated share of the benefits accruing hereto in conformity with their underlying operating agreements, leases, or other independent contracts, and such other rights and obligations as between Unit Operator and the working interest owners as may be agreed upon by Unit Operator and the working interest owners; however, no such unit operating agreement shall be deemed either to

modify any of the terms and conditions of this unit agreement or to relieve the Unit Operator of any right or obligation established under this unit agreement, and in case of any inconsistency or conflict between this agreement and the unit operating agreement, this agreement shall govern. Two copies of any unit operating agreement executed pursuant to this section shall be filed in the proper BLM office prior to approval of this unit agreement.

8. RIGHTS AND OBLIGATIONS OF UNIT OPERATOR. Except as otherwise specifically provided herein, the exclusive right, privilege, and duty of exercising any and all rights of the parties hereto which are necessary or convenient for prospecting for, producing, storing, allocating, and distributing the unitized substances are hereby delegated to and shall be exercised by the Unit Operator as herein provided. Acceptable evidence of title to said rights shall be deposited with Unit Operator and, together with this agreement, shall constitute and define the rights, privileges, and obligations of Unit Operator. Nothing herein, however, shall be construed to transfer title to any land or to any lease or operating agreement, it being understood that under this agreement the Unit Operator, in its capacity as Unit Operator, shall exercise the rights of possession and use vested in the parties hereto only for the purposes herein specified.

9. DRILLING TO DISCOVERY. Within 6 months after the effective date hereof, the Unit Operator shall commence to drill an adequate test well at a location approved by the AO, unless on such effective date a well is being drilled in conformity with the terms hereof, and thereafter continue such drilling diligently until the \_\_\_\_\_ formation has been tested or until at a lesser depth unitized substances shall be discovered which can be produced in paying quantities (to wit: quantities sufficient to repay the costs of drilling, completing, and producing operations, with a reasonable profit) or the Unit Operator shall at any time establish to the satisfaction of the AO that further drilling of said well would be unwarranted or impracticable, provided, however, that Unit Operator shall not in any event be required to drill said well to a depth in excess of \_\_\_\_\_ feet. Until the discovery of unitized substances capable of being produced in paying quantities, the Unit Operator shall continue drilling one well at a time, allowing not more than 6 months between the completion of one well and the commencement of drilling operations for the next well, until a well capable of producing unitized substances in paying quantities is completed to the satisfaction of the AO or until it is reasonably proved that the unitized land is incapable of producing unitized substances in paying quantities in the formations drilled hereunder. Nothing in this section shall be

deemed to limit the right of the Unit Operator to resign as provided in Section 5, hereof, or as requiring Unit Operator to commence or continue any drilling during the period pending such resignation becoming effective in order to comply with the requirements of this section.

The AO may modify any of the drilling requirements of this section by granting reasonable extensions of time when, in his opinion, such action is warranted.

<sup>2</sup>9a. Multiple well requirements. Notwithstanding anything in this unit agreement to the contrary, except Section 25, UNAVOIDABLE DELAY, \_\_\_\_ wells shall be drilled with not more than 6-months time elapsing between the completion of the first well and commencement of drilling operations for the second well and with not more than 6-months time elapsing between completion of the second well and the commencement of drilling operations for the third well, . . . regardless of whether a discovery has been made in any well drilled under this provision. Both the initial well and the second well must be drilled in compliance with the above specified formation or depth requirements in order to meet the dictates of this section; and the second well must be located a minimum of \_\_\_\_ miles from the initial well in order to be accepted by the AO as the second unit test well, within the meaning of this section. The third test well shall be diligently drilled, at a location approved by the AO, to test the \_\_\_\_ formation or to a depth of \_\_\_\_ feet, whichever is the lesser, and must be located a minimum of \_\_\_\_ miles from both the initial and the second test wells. Nevertheless, in the event of the discovery of unitized substances in paying quantities by any well, this unit agreement shall not terminate for failure to complete the \_\_\_\_ well program, but the unit area shall be contracted automatically, effective the first day of the month following the default, to eliminate by subdivisions (as defined in Section 2(e) hereof) all lands not then entitled to be in a participating area.<sup>2</sup>

Until the establishment of a participating area, the failure to commence a well subsequent to the drilling of the initial obligation well, or in the case of multiple well requirements, if specified, subsequent to the drilling of those multiple wells, as provided for in this (these) section(s), within the time allowed including any extension of time granted by the AO, shall cause this agreement to terminate automatically. Upon failure to continue drilling diligently any well other than the obligation well(s) commenced hereunder, the AO may, after 15 days notice to the Unit Operator, declare this unit agreement terminated. Failure to commence drill-

ing the initial obligation well, or the first of multiple obligation wells, on time and to drill it diligently shall result in the unit agreement approval being declared invalid *ab initio* by the AO. In the case of multiple well requirements, failure to commence drilling the required multiple wells beyond the first well, and to drill them diligently, may result in the unit agreement approval being declared invalid *ab initio* by the AO;

10. PLAN OF FURTHER DEVELOPMENT AND OPERATION. Within 6 months after completion of a well capable of producing unitized substances in paying quantities, the Unit Operator shall submit for the approval of the AO an acceptable plan of development and operation for the unitized land which, when approved by the authorized officer, shall constitute the further drilling and development obligations of the Unit Operator under this agreement for the period specified therein. Thereafter, from time to time before the expiration of any existing plan, the Unit Operator shall submit for the approval of the AO a plan for an additional specified period for the development and operation of the unitized land. Subsequent plans should normally be filed on a calendar year basis not later than March 1 each year. Any proposed modification or addition to the existing plan should be filed as a supplement to the plan.

Any plan submitted pursuant to this section shall provide for the timely exploration of the unitized area, and for the diligent drilling necessary for determination of the area or areas capable of producing unitized substances in paying quantities in each and every productive formation. This plan shall be as complete and adequate as the AO may determine to be necessary for timely development and proper conservation of the oil and gas resources in the unitized area and shall:

- (a) Specify the number and locations of any wells to be drilled and the proposed order and time for such drilling; and
- (b) Provide a summary of operations and production for the previous year.

Plans shall be modified or supplemented when necessary to meet changed conditions or to protect the interests of all parties to this agreement. Reasonable diligence shall be exercised in complying with the obligations of the approved plan of development and operation. The AO is authorized to grant a reasonable extension of the 6-month period herein prescribed for submission of an initial plan of development and operation where such action is justified because of unusual conditions or circumstances.

After completion of a well capable of producing unitized substances in paying quantities, no further wells, except such as may be necessary to afford protection against operations not under this agreement and such as may be specifically approved by the AO,

<sup>2</sup>Provisions to be included only when a multiple well obligation is required.

shall be drilled except in accordance with an approved plan of development and operation.

11. PARTICIPATION AFTER DISCOVERY. Upon completion of a well capable of producing unitized substances in paying quantities, or as soon thereafter as required by the AO, the Unit Operator shall submit for approval by the AO, a schedule, based on subdivisions of the public-land survey or aliquot parts thereof, of all land then regarded as reasonably proved to be productive of unitized substances in paying quantities. These lands shall constitute a participating area on approval of the AO, effective as of the date of completion of such well or the effective date of this unit agreement, whichever is later. The acreages of both Federal and non-Federal lands shall be based upon appropriate computations from the courses and distances shown on the last approved public-land survey as of the effective date of each initial participating area. The schedule shall also set forth the percentage of unitized substances to be allocated, as provided in Section 12, to each committed tract in the participating area so established, and shall govern the allocation of production commencing with the effective date of the participating area. A different participating area shall be established for each separate pool or deposit of unitized substances or for any group thereof which is produced as a single pool or zone, and any two or more participating areas so established may be combined into one, on approval of the AO. When production from two or more participating areas is subsequently found to be from a common pool or deposit, the participating areas shall be combined into one, effective as of such appropriate date as may be approved or prescribed by the AO. The participating area or areas so established shall be revised from time to time, subject to the approval of the AO, to include additional lands then regarded as reasonably proved to be productive of unitized substances in paying quantities or which are necessary for unit operations, or to exclude lands then regarded as reasonably proved not to be productive of unitized substances in paying quantities, and the schedule of allocation percentages shall be revised accordingly. The effective date of any revision shall be the first of the month in which the knowledge or information is obtained on which such revision is predicated; provided, however, that a more appropriate effective date may be used if justified by Unit Operator and approved by the AO. No land shall be excluded from a participating area on account of depletion of its unitized substances, except that any participating area established under the provisions of this unit agreement shall terminate automatically whenever all completions in the formation on which the participating area is based are abandoned.

It is the intent of this section that a participating area shall represent the area known or reasonably proved to be productive of unitized substances in paying quantities or which are necessary for unit operations; but, regardless of any revision of the participating area, nothing herein contained shall be construed as requiring any retroactive adjustment for production obtained prior to the effective date of the revision of the participating area.

In the absence of agreement at any time between the Unit Operator and the AO as to the proper definition or redefinition of a participating area, or until a participating area has, or areas have, been established, the portion of all payments affected thereby shall, except royalty due the United States, be impounded in a manner mutually acceptable to the owners of committed working interests. Royalties due the United States shall be determined by the AO and the amount thereof shall be deposited, as directed by the AO, until a participating area is finally approved and then adjusted in accordance with a determination of the sum due as Federal royalty on the basis of such approved participating area.

Whenever it is determined, subject to the approval of the AO, that a well drilled under this agreement is not capable of production of unitized substances in paying quantities and inclusion in a participating area of the land on which it is situated is unwarranted, production from such well shall, for the purposes of settlement among all parties other than working interest owners, be allocated to the land on which the well is located, unless such land is already within the participating area established for the pool or deposit from which such production is obtained. Settlement for working interest benefits from such a nonpaying unit well shall be made as provided in the unit operating agreement.

12. ALLOCATION OF PRODUCTION. All unitized substances produced from a participating area established under this agreement, except any part thereof used in conformity with good operating practices within the unitized area for drilling, operating, and other production or development purposes, or for repressuring or recycling in accordance with a plan of development and operations that has been approved by the AO, or unavoidably lost, shall be deemed to be produced equally on an acreage basis from the several tracts of unitized land and unleased Federal land, if any, included in the participating area established for such production. Each such tract shall have allocated to it such percentage of said production as the number of acres of such tract included in said participating area bears to the total acres of unitized land and unleased Federal land, if any, included in said participating area. There shall be allocated to the working

interest owner(s) of each tract of unitized land in said participating area, in addition, such percentage of the production attributable to the unleased Federal land within the participating area as the number of acres of such unitized tract included in said participating area bears to the total acres of unitized land in said participating area, for the payment of the compensatory royalty specified in section 17 of this agreement. Allocation of production hereunder for purposes other than for settlement of the royalty, overriding royalty, or payment out of production obligations of the respective working interest owners, including compensatory royalty obligations under section 17, shall be prescribed as set forth in the unit operating agreement or as otherwise mutually agreed by the affected parties. It is hereby agreed that production of unitized substances from a participating area shall be allocated as provided herein, regardless of whether any wells are drilled on any particular part or tract of the participating area. If any gas produced from one participating area is used for repressuring or recycling purposes in another participating area, the first gas withdrawn from the latter participating area for sale during the life of this agreement shall be considered to be the gas so transferred, until an amount equal to that transferred shall be so produced for sale and such gas shall be allocated to the participating area from which initially produced as such area was defined at the time that such transferred gas was finally produced and sold.

13. DEVELOPMENT OR OPERATION OF NONPARTICIPATING LAND OR FORMATIONS. Any operator may with the approval of the AO, at such party's sole risk, costs, and expense, drill a well on the unitized land to test any formation provided the well is outside any participating area established for that formation, unless within 90 days of receipt of notice from said party of his intention to drill the well, the Unit Operator elects and commences to drill the well in a like manner as other wells are drilled by the Unit Operator under this agreement.

If any well drilled under this section by a non-unit operator results in production of unitized substances in paying quantities such that the land upon which it is situated may properly be included in a participating area, such participating area shall be established or enlarged as provided in this agreement and the well shall thereafter be operated by the Unit Operator in accordance with the terms of this agreement and the unit operating agreement.

If any well drilled under this section by a non-unit operator that obtains production in quantities insufficient to justify the inclusion of the land upon which such well is situated in a participating area, such well may be operated and produced by the party drill-

ing the same, subject to the conservation requirements of this agreement. The royalties in amount or value of production from any such well shall be paid as specified in the underlying lease and agreements affected.

14. ROYALTY SETTLEMENT. The United States and any State and any royalty owner who is entitled to take in kind a share of the substances now unitized hereunder shall be hereafter be entitled to the right to take in kind its share of the unitized substances, and Unit Operator, or the non-unit operator in the case of the operation of a well by a non-unit operator as herein provided for in special cases, shall make deliveries of such royalty share taken in kind in conformity with the applicable contracts, laws, and regulations. Settlement for royalty interest not taken in kind shall be made by an operator responsible therefor under existing contracts, laws and regulations, or by the Unit Operator on or before the last day of each month for unitized substances produced during the preceding calendar month; provided, however, that nothing in this section shall operate to relieve the responsible parties of any land from their respective lease obligations for the payment of any royalties due under their leases.

If gas obtained from lands not subject to this agreement is introduced into any participating area hereunder, for use in repressuring, stimulation of production, or increasing ultimate recovery, in conformity with a plan of development and operation approved by the AO, a like amount of gas, after settlement as herein provided for any gas transferred from any other participating area and with appropriate deduction for loss from any cause, may be withdrawn from the formation into which the gas is introduced, royalty free as to dry gas, but not as to any products which may be extracted therefrom; provided that such withdrawal shall be at such time as may be provided in the approved plan of development and operation or as may otherwise be consented to by the AO as conforming to good petroleum engineering practice; and provided further, that such right of withdrawal shall terminate on the termination of this unit agreement.

Royalty due the United States shall be computed as provided in 30 CFR Group 200 and paid in value or delivered in kind as to all unitized substances on the basis of the amounts thereof allocated to unitized Federal land as provided in Section 12 at the rates specified in the respective Federal leases, or at such other rate or rates as may be authorized by law or regulation and approved by the AO; provided, that for leases on which the royalty rate depends on the daily average production per well, said average production shall be determined in accordance with the operating regulations as though each participating area were a single consolidated lease.

15. **RENTAL SETTLEMENT.** Rental or minimum royalties due on leases committed hereto shall be paid by the appropriate parties under existing contracts, laws, and regulations, provided that nothing herein contained shall operate to relieve the responsible parties of the land from their respective obligations for the payment of any rental or minimum royalty due under their leases. Rental or minimum royalty for lands of the United States subject to this agreement shall be paid at the rate specified in the respective leases from the United States unless such rental or minimum royalty is waived, suspended, or reduced by law or by approval of the Secretary or his duly authorized representative.

With respect to any lease on non-Federal land containing provisions which would terminate such lease unless drilling operations are commenced upon the land covered thereby within the time therein specified or rentals are paid for the privilege of deferring such drilling operations, the rentals required thereby shall, notwithstanding any other provision of this agreement, be deemed to accrue and become payable during the term thereof as extended by this agreement and until the required drilling operations are commenced upon the land covered thereby, or until some portion of such land is included within a participating area.

16. **CONSERVATION.** Operations hereunder and production of unitized substances shall be conducted to provide for the most economical and efficient recovery of said substances without waste, as defined by or pursuant to State or Federal law or regulation.

17. **DRAINAGE.** (a) The Unit Operator shall take such measures as the AO deems appropriate and adequate to prevent drainage of unitized substances from unitized land by wells on land not subject to this agreement, which shall include the drilling of protective wells and which may include the payment of a fair and reasonable compensatory royalty, as determined by the AO.

(b) Whenever a participating area approved under section 11 of this agreement contains unleased Federal lands, the value of 12½ percent of the production that would be allocated to such Federal lands under section 12 of this agreement, if such lands were leased, committed, and entitled to participation, shall be payable as compensatory royalties to the Federal Government. Parties to this agreement holding working interests in committed leases within the applicable participating area shall be responsible for such compensatory royalty payment on the volume of production reallocated from the unleased Federal lands to their unitized tracts under section 12. The value of such production subject to the payment of said royalties shall be determined pursuant to 30 CFR part 206. Payment of compensatory royalties on the production reallocated from unleased

Federal land to the committed tracts within the participating area shall fulfill the Federal royalty obligation for such production, and said production shall be subject to no further royalty assessment under section 14 of this agreement. Payment of compensatory royalties as provided herein shall accrue from the date the committed tracts in the participating area that includes unleased Federal lands receive a production allocation, and shall be due and payable monthly by the last day of the calendar month next following the calendar month of actual production. If leased Federal lands receiving a production allocation from the participating area become unleased, compensatory royalties shall accrue from the date the Federal lands become unleased. Payment due under this provision shall end when the unleased Federal tract is leased or when production of unitized substances ceases within the participating area and the participating area is terminated, whichever occurs first.

18. **LEASES AND CONTRACTS CONFORMED AND EXTENDED.** The terms, conditions, and provisions of all leases, subleases, and other contracts relating to exploration, drilling, development or operation for oil or gas on lands committed to this agreement are hereby expressly modified and amended to the extent necessary to make the same conform to the provisions hereof, but otherwise to remain in full force and effect; and the parties hereto hereby consent that the Secretary shall and by his approval hereof, or by the approval hereof by his duly authorized representative, does hereby establish, alter, change, or revoke the drilling, producing, rental, minimum royalty, and royalty requirements of Federal leases committed hereto and the regulations in respect thereto to conform said requirements to the provisions of this agreement, and, without limiting the generality of the foregoing, all leases, subleases, and contracts are particularly modified in accordance with the following:

(a) The development and operation of lands subject to this agreement under the terms hereof shall be deemed full performance of all obligations for development and operation with respect to each and every separately owned tract subject to this agreement, regardless of whether there is any development of any particular tract of this unit area.

(b) Drilling and producing operations performed hereunder upon any tract of unitized lands will be accepted and deemed to be performed upon and for the benefit of each and every tract of unitized land, and no lease shall be deemed to expire by reason of failure to drill or produce wells situated on the land therein embraced.

(c) Suspension of drilling or producing operations on all unitized lands pursuant to direction or consent of the AO shall be deemed

to constitute such suspension pursuant to such direction or consent as to each and every tract of unitized land. A suspension of drilling or producing operations limited to specified lands shall be applicable only to such lands.

(d) Each lease, sublease, or contract relating to the exploration, drilling, development, or operation for oil or gas of lands other than those of the United States committed to this agreement which, by its terms might expire prior to the termination of this agreement, is hereby extended beyond any such term so provided therein so that it shall be continued in full force and effect for and during the term of this agreement.

(e) Any Federal lease committed hereto shall continue in force beyond the term so provided therein or by law as to the land committed so long as such lease remains subject hereto, provided that production of unitized substances in paying quantities is established under this unit agreement prior to the expiration date of the term of such lease, or in the event actual drilling operations are commenced on unitized land, in accordance with provisions of this agreement, prior to the end of the primary term of such lease and are being diligently prosecuted at that time, such lease shall be extended for 2 years, and so long thereafter as oil or gas is produced in paying quantities in accordance with the provisions of the Mineral Leasing Act, as amended.

(f) Each sublease or contract relating to the operation and development of unitized substances from lands of the United States committed to this agreement, which by its terms would expire prior to the time at which the underlying lease, as extended by the immediately preceding paragraph, will expire is hereby extended beyond any such term so provided therein so that it shall be continued in full force and effect for and during the term of the underlying lease as such term is herein extended.

(g) The segregation of any Federal lease committed to this agreement is governed by the following provision in the fourth paragraph of sec. 17(m) of the Mineral Leasing Act, as amended by the Act of September 2, 1960 (74 Stat. 781–784) (30 U.S.C. 226(m)):

“Any [Federal] lease heretofore or hereafter committed to any such [unit] plan embracing lands that are in part within and in part outside of the area covered by any such plan shall be segregated into separate leases as to the lands committed and the lands not committed as of the effective date of unitization: *Provided, however,* That any such lease as to the nonunitized portion shall continue in force and effect for the term thereof but for not less than two years from the date of such segregation and so long thereafter as oil or gas is produced in paying quantities.”

If the public interest requirement is not satisfied, the segregation of a lease and/or ex-

tension of a lease pursuant to 43 CFR 3107.3–2 and 43 CFR 3107.4, respectively, shall not be effective.

<sup>3</sup>(h) Any lease, other than a Federal lease, having only a portion of its lands committed hereto shall be segregated as to the portion committed and the portion not committed, and the provisions of such lease shall apply separately to such segregated portions commencing as of the effective date hereof. In the event any such lease provides for a lump-sum rental payment, such payment shall be prorated between the portions so segregated in proportion to the acreage of the respective tracts.

19. CONVENANTS RUN WITH LAND. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the parties hereto and their successors in interest until this agreement terminates, and any grant, transfer or conveyance of interest in land or leases subject hereto shall be and hereby is conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, or other successor in interest. No assignment or transfer of any working interest, royalty, or other interest subject hereto shall be binding upon Unit Operator until the first day of the calendar month after Unit Operator is furnished with the original, photostatic, or certified copy of the instrument of transfer.

20. EFFECTIVE DATE AND TERM. This agreement shall become effective upon approval by the AO and shall automatically terminate 5 years from said effective date unless:

(a) Upon application by the Unit Operator such date of expiration is extended by the AO, or

(b) It is reasonably determined prior to the expiration of the fixed term or any extension thereof that the unitized land is incapable of production of unitized substances in paying quantities in the formations tested hereunder, and after notice of intention to terminate this agreement on such ground is given by the Unit Operator to all parties in interest at their last known addresses, this agreement is terminated with the approval of the AO, or

(c) A valuable discovery of unitized substances in paying quantities has been made or accepted on unitized land during said initial term or any extension thereof, in which event this agreement shall remain in effect for such term and so long thereafter as unitized substances can be produced in quantities sufficient to pay for the cost of producing same from wells on unitized land within any participating area established hereunder. Should production cease and diligent drilling

<sup>3</sup>Optional paragraph to be used only when applicable.

## Bureau of Land Management, Interior

## § 3186.1

or reworking operations to restore production or new production are not in progress within 60 days and production is not restored or should new production not be obtained in paying quantities on committed lands within this unit area, this agreement will automatically terminate effective the last day of the month in which the last unitized production occurred, or

(d) It is voluntarily terminated as provided in this agreement. Except as noted herein, this agreement may be terminated at any time prior to the discovery of unitized substances which can be produced in paying quantities by not less than 75 per centum, on an acreage basis, of the working interest owners signatory hereto, with the approval of the AO. The Unit Operator shall give notice of any such approval to all parties hereto. If the public interest requirement is not satisfied, the approval of this unit by the AO shall be invalid.

21. RATE OF PROSPECTING, DEVELOPMENT, AND PRODUCTION. The AO is hereby vested with authority to alter or modify from time to time, in his discretion, the quantity and rate of production under this agreement when such quantity and rate are not fixed pursuant to Federal or State law, or do not conform to any Statewide voluntary conservation or allocation program which is established, recognized, and generally adhered to by the majority of operators in such State. The above authority is hereby limited to alteration or modifications which are in the public interest. The public interest to be served and the purpose thereof, must be stated in the order of alteration or modification. Without regard to the foregoing, the AO is also hereby vested with authority to alter or modify from time to time, in his discretion, the rate of prospecting and development and the quantity and rate of production under this agreement when such alteration or modification is in the interest of attaining the conservation objectives stated in this agreement and is not in violation of any applicable Federal or State law.

Powers is the section vested in the AO shall only be exercised after notice to Unit Operator and opportunity for hearing to be held not less than 15 days from notice.

22. APPEARANCES. The Unit Operator shall, after notice to other parties affected, have the right to appear for and on behalf of any and all interests affected hereby before the Department of the Interior and to appeal from orders issued under the regulations of said Department, or to apply for relief from any of said regulations, or in any proceedings relative to operations before the Department, or any other legally constituted authority; provided, however, that any other interested party shall also have the right at its own expense to be heard in any such proceeding.

23. NOTICES. All notices, demands, or statements required hereunder to be given or rendered to the parties hereto shall be in writing and shall be personally delivered to the party or parties, or sent by postpaid registered or certified mail, to the last-known address of the party or parties.

24. NO WAIVER OF CERTAIN RIGHTS. Nothing contained in this agreement shall be construed as a waiver by any party hereto of the right to assert any legal or constitutional right or defense as to the validity or invalidity of any law of the State where the unitized lands are located, or of the United States, or regulations issued thereunder in any way affecting such party, or as a waiver by any such party of any right beyond his or its authority to waive.

25. UNAVOIDABLE DELAY. All obligations under this agreement requiring the Unit Operator to commence or continue drilling, or to operate on, or produce unitized substances from any of the lands covered by this agreement, shall be suspended while the Unit Operator, despite the exercise of due care and diligence, is prevented from complying with such obligations, in whole or in part, by strikes, acts of God, Federal, State, or municipal law or agencies, unavoidable accidents, uncontrollable delays in transportation, inability to obtain necessary materials or equipment in the open market, or other matters beyond the reasonable control of the Unit Operator, whether similar to matters herein enumerated or not.

26. NONDISCRIMINATION. In connection with the performance of work under this agreement, the Unit Operator agrees to comply with all the provisions of section 202 (1) to (7) inclusive, of Executive Order 11246 (30 FR 12319), as amended, which are hereby incorporated by reference in this agreement.

27. LOSS OF TITLE. In the event title to any tract of unitized land shall fail and the true owner cannot be induced to join in this unit agreement, such tract shall be automatically regarded as not committed hereto, and there shall be such readjustment of future costs and benefits as may be required on account of the loss of such title. In the event of a dispute as to title to any royalty, working interest, or other interests subject thereto, payment or delivery on account thereof may be withheld without liability for interest until the dispute is finally settled; provided, that, as to Federal lands or leases, no payments of funds due the United States shall be withheld, but such funds shall be deposited as directed by the AO, to be held as unearned money pending final settlement of the title dispute, and then applied as earned or returned in accordance with such final settlement.

Unit Operator as such is relieved from any responsibility for any defect or failure of any title hereunder.

28. **NONJOINDER AND SUBSEQUENT JOINDER.** If the owner of any substantial interest in a tract within the unit area fails or refuses to subscribe or consent to this agreement, the owner of the working interest in that tract may withdraw the tract from this agreement by written notice delivered to the proper BLM office and the Unit Operator prior to the approval of this agreement by the AO. Any oil or gas interests in lands within the unit area not committed hereto prior to final approval may thereafter be committed hereto by the owner or owners thereof subscribing or consenting to this agreement, and, if the interest is a working interest, by the owner of such interest also subscribing to the unit operating agreement. After operations are commenced hereunder, the right of subsequent joinder, as provided in this section, by a working interest owner is subject to such requirements or approval(s), if any, pertaining to such joinder, as may be provided for in the unit operating agreement. After final approval hereof, joinder by a nonworking interest owner must be consented to in writing by the working interest owner committed hereto and responsible for the payment of any benefits that may accrue hereunder in behalf of such nonworking interest. A nonworking interest may not be committed to this unit agreement unless the corresponding working interest is committed hereto. Joinder to the unit agreement by a working interest owner, at any time, must be accompanied by appropriate joinder to the unit operating agreement, in order for the interest to be regarded as committed to this agreement. Except as may otherwise herein be provided, subsequent joinders to this agreement shall be effective as of the date of the filing with the AO of duly executed counterparts of all or any papers necessary to establish effective commitment of any interest and/or tract to this agreement.

29. **COUNTERPARTS.** This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument in writing specifically referring hereto and shall be binding upon all those parties who have executed such a counterpart, ratification, or consent hereto with the same force and effect as if all such parties had signed the same document, and regardless of whether or not it is executed by all other parties owning or claiming an interest in the lands within the above-described unit area.

30. **SURRENDER.** Nothing in this agreement shall prohibit the exercise by any working interest owner of the right to surrender vested in such party by any lease, sublease, or operating agreement as to all or any part of the lands covered thereby, provided that each party who will or might acquire such working interest by such sur-

render or by forfeiture as hereafter set forth, is bound by the terms of this agreement.

If as a result of any such surrender, the working interest rights as to such lands become vested in any party other than the fee owner of the unitized substances, said party may forfeit such rights and further benefits from operations hereunder as to said land to the party next in the chain of title who shall be and become the owner of such working interest.

If as the result of any such surrender or forfeiture working interest rights become vested in the fee owner of the unitized substances, such owner may:

(a) Accept those working interest rights subject to this agreement and the unit operating agreement; or

(b) Lease the portion of such land as is included in a participating area established hereunder subject to this agreement and the unit operating agreement; or

(c) Provide for the independent operation of any part of such land that is not then included within a participating area established hereunder.

If the fee owner of the unitized substances does not accept the working interest rights subject to this agreement and the unit operating agreement or lease such lands as above provided within 6 months after the surrendered or forfeited, working interest rights become vested in the fee owner; the benefits and obligations of operations accruing to such lands under this agreement and the unit operating agreement shall be shared by the remaining owners of unitized working interests in accordance with their respective working interest ownerships, and such owners of working interests shall compensate the fee owner of unitized substances in such lands by paying sums equal to the rentals, minimum royalties, and royalties applicable to such lands under the lease in effect when the lands were unitized.

An appropriate accounting and settlement shall be made for all benefits accruing to or payments and expenditures made or incurred on behalf of such surrendered or forfeited working interests subsequent to the date of surrender or forfeiture, and payment of any moneys found to be owing by such an accounting shall be made as between the parties within 30 days.

The exercise of any right vested in a working interest owner to reassign such working interest to the party from whom obtained shall be subject to the same conditions as set forth in this section in regard to the exercise of a right to surrender.

<sup>4</sup>Optional sections and subsection. (Agreements submitted for final approval should not identify section or provision as "optional.")

## Bureau of Land Management, Interior

## § 3186.1

<sup>431</sup>. TAXES. The working interest owners shall render and pay for their account and the account of the royalty owners all valid taxes on or measured by the unitized substances in and under or that may be produced, gathered and sold from the land covered by this agreement after its effective date, or upon the proceeds derived therefrom. The working interest owners on each tract shall and may charge the proper proportion of said taxes to royalty owners having interests in said tract, and may currently retain and deduct a sufficient amount of the unitized substances or derivative products, or net proceeds thereof, from the allocated share of each royalty owner to secure reimbursement for the taxes so paid. No such taxes shall be charged to the United States or the State of \_\_\_\_ or to any lessor who has a contract with his lessee which requires the lessee to pay such taxes.

<sup>432</sup>. NO PARTNERSHIP. It is expressly agreed that the relation of the parties hereto is that of independent contractors and nothing contained in this agreement, expressed or implied, nor any operations conducted hereunder, shall create or be deemed to have created a partnership or association between the parties hereto or any of them.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed and have set opposite their respective names the date of execution.

Unit Operator

\_\_\_\_\_  
Working Interest Owners

\_\_\_\_\_  
Other Interest Owners

### *General Guidelines*

1. Executed agreement to be legally complete.
2. Agreement submitted for approval must contain Exhibit A and B in accordance with models shown in §§3186.1-1 and 3186.1-2 of this title.
3. Consents should be identified (in pencil) by tract numbers as listed in Exhibit B and assembled in that order as far as practical. Unit agreements submitted for approval shall include a list of the overriding royalty interest owners who have executed ratifications of the unit agreement. Subsequent joinders by overriding royalty interest owners shall be submitted in the same manner, except each must include or be accompanied by a statement that the corresponding working interest owner has consented in writing to such joinder. Original ratifications of overriding royalty owners will be kept on file by the Unit Operator or his designated agent.

4. All leases held by option should be noted on Exhibit B with an explanation as to the type of option, i.e., whether for operating rights only, for full leasehold record title, or for certain interests to be earned by performance. In all instances, optionee committing such interests is expected to exercise option promptly.

5. All owners of oil and gas interests must be invited to join the unit agreement, and statement to that effect must accompany executed agreement, together with summary of results of such invitations. A written reason for all interest owners who have not joined shall be furnished by the unit operator.

6. In the event fish and wildlife lands are included, add the following as a separate section:

"Wildlife Stipulation. Nothing in this unit agreement shall modify the special Federal lease stipulations applicable to lands under the jurisdiction of the United States Fish and Wildlife Service."

7. In the event National Forest System lands are included within the unit area, add the following as a separate section:

"Forest Land Stipulation. Notwithstanding any other terms and conditions contained in this agreement, all of the stipulations and conditions of the individual leases between the United States and its lessees or their successors or assigns embracing lands within the unit area included for the protection of lands or functions under the jurisdiction of the Secretary of Agriculture shall remain in full force and effect the same as though this agreement had not been entered into, and no modification thereof is authorized except with the prior consent in writing of the Regional Forester, United States Forest Service, \_\_\_\_.

."

8. In the event National Forest System lands within the Jackson Hole Area of Wyoming are included within the unit area, additional "special" stipulations may be required to be included in the unit agreement by the U.S. Forest Service, including the Jackson Hole Special Stipulation.

9. In the event reclamation lands are included, add the following as a new separate section:

"Reclamation Lands. Nothing in this agreement shall modify the special, Federal lease stipulations applicable to lands under the jurisdiction of the Bureau of Reclamation."

10. In the event a powersite is embraced in the proposed unit area, the following section should be added:

"Powersite. Nothing in this agreement shall modify the special, Federal lease stipulations applicable to lands under the jurisdiction of the Federal Energy Regulatory Commission."

## § 3186.1

11. In the event special surface stipulations have been attached to any of the Federal oil and gas leases to be included, add the following as a separate section:

"Special surface stipulations. Nothing in this agreement shall modify the special Federal lease stipulations attached to the individual Federal oil leases."

12. In the event State lands are included in the proposed unit area, add the appropriate State Lands Section as separate section. (See § 3181.4(a) of this title).

13. In the event restricted Indian lands are involved, consult the AO regarding appropriate requirements under § 3181.4(b) of this title.

### CERTIFICATION—DETERMINATION

Pursuant to the authority vested in the Secretary of the Interior, under the Act approved February 25, 1920, 41 Stat. 437, as amended, 30 U.S.C. sec. 181, *et seq.*, and delegated to (the appropriate Name and Title of the authorized officer, BLM) under the authority of 43 CFR part 3180, I do hereby:

A. Approve the attached agreement for the development and operation of the \_\_\_\_\_, Unit

## 43 CFR Ch. II (10–1–08 Edition)

Area, State of \_\_\_\_\_. This approval shall be invalid *ab initio* if the public interest requirement under § 3183.4(b) of this title is not met.

B. Certify and determine that the unit plan of development and operation contemplated in the attached agreement is necessary and advisable in the public interest for the purpose of more properly conserving the natural resources.

C. Certify and determine that the drilling, producing, rental, minimum royalty, and royalty requirements of all Federal leases committed to said agreement are hereby established altered, changed, or revoked to conform with the terms and conditions of this agreement.

**Bureau of Land Management, Interior**

**§ 3186.3**

**§ 3186.2 Model collective bond.**

**COLLECTIVE CORPORATE SURETY BOND**

Know all men by these presents. That we, \_\_\_\_\_ (Name of unit operator), signing as Principal, for and on behalf of the record owners of unitized substances now or hereafter covered by the unit agreement for the \_\_\_\_\_ (Name of unit), approved \_\_\_\_\_ (Date) \_\_\_\_\_ (Name and address of Surety), as Surety are jointly and severally held and firmly bound unto the United States of America in the sum of \_\_\_\_\_ (Amount of bond) Dollars, lawful money of the United States, for the use and benefit of and to be paid to the United States and any entryman or patentee of any portion of the unitized land here-to-fore entered or patented with the reservation of the oil or gas deposits to the United States, for which payment, well and truly to be made, we bind ourselves, and each of us, and each of our heirs, executors, administrators, successors, and assigns by these presents.

The condition of the foregoing obligation is such, that, whereas the Secretary of the Interior on \_\_\_\_\_ (Date) approved under the provisions of the Act of February 25, 1920, 41 Stat. 437, 30 U.S.C. secs. 181 *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, a unit agreement for the development and operation of the \_\_\_\_\_ (Name of unit and State); and

Whereas said Principal and record owners of unitized substances, pursuant to said unit agreement, have entered into certain covenants and agreements as set forth therein, under which operations are to be conducted; and

Whereas said Principal as Unit Operator has assumed the duties and obligations of the respective owners of unitized substances as defined in said unit agreement; and

Whereas said Principal and Surety agree to remain bound in the full amount of the bond for failure to comply with the terms of the unit agreement, and the payment of rentals, minimum royalties, and royalties due under the Federal leases committed to said unit agreement; and

Whereas the Surety hereby waives any right of notice of and agrees that this bond may remain in force and effect notwithstanding;

(a) Any additions to or change in the ownership of the unitized substances herein described;

(b) Any suspension of the drilling or producing requirements or waiver, suspension, or reduction of rental or minimum royalty payments or reduction of royalties pursuant to applicable laws or regulations thereunder; and

Whereas said Principal and Surety agree to the payment of compensatory royalty under the regulations of the Interior Department in lieu of drilling necessary offset wells in the event of drainage; and

Whereas nothing herein contained shall preclude the United States (from requiring an additional bond at any time when deemed necessary);

Now, therefore, if the said Principal shall faithfully comply with all of the provisions of the above-identified unit agreement and with the terms of the leases committed thereto, then the above obligation is to be of no effect; otherwise to remain in full force and virtue.

**§ 3186.3 Model for designation of successor unit operator by working interest owners.**

Designation of successor Unit Operator  
\_\_\_\_\_ Unit Area, County of \_\_\_\_\_, State of \_\_\_\_\_, No. \_\_\_\_\_.

This indenture, dated as of the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, by and between \_\_\_\_\_, hereinafter designated as "First Party," and the owners of unitized working interests, hereinafter designated as "Second Parties,"

Witnesseth: Whereas under the provisions of the Act of February 25, 1920, 41 Stat. 437, 30 U.S.C. secs. 181, *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, the Secretary of the Interior, on the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, approved a unit agreement \_\_\_\_\_ Unit Area, wherein \_\_\_\_\_ is designated as Unit Operator, and

Whereas said \_\_\_\_\_ has resigned as such Operator<sup>1</sup> and the designation of a successor Unit Operator is now required pursuant to the terms thereof; and

Whereas the First Party has been and hereby is designated by Second Parties as Unit Operator, and said First Party desires to assume all the rights, duties, and obligations of Unit Operator under the said unit agreement;

Now, therefore, in consideration of the premises hereinbefore set forth and the

<sup>1</sup>Where the designation of a successor Unit Operator is required for any reason other than resignation, such reason shall be substituted for the one stated.

#### § 3186.4

#### 43 CFR Ch. II (10–1–08 Edition)

promises hereinafter stated, the First Party hereby covenants and agrees to fulfill the duties and assume the obligations of Unit Operator under and pursuant to all the terms of the \_\_\_\_\_ unit agreement, and the Second Parties covenant and agree that, effective upon approval of this indenture by the (Name and Title of authorized officer, BLM) First Party shall be granted the exclusive right and privilege of exercising any and all rights and privileges as Unit Operator, pursuant to the terms and conditions of said unit agreement; said Unit agreement being hereby incorporated herein by reference and made a part hereof as fully and effectively as though said unit agreement were expressly set forth in this instrument.

In witness whereof, the parties hereto have executed this instrument as of the date hereinabove set forth.

#### § 3186.4 Model for change in unit operator by assignment.

Change in Unit Operator \_\_\_\_\_ Unit Area, County of \_\_\_\_\_, State of \_\_\_\_\_, No. \_\_\_\_\_. This indenture, dated as of the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, by and between \_\_\_\_\_ hereinafter designated as "First Party," and \_\_\_\_\_ hereinafter designated as "Second Party."

Witnesseth: Whereas under the provisions of the Act of February 25, 1920, 41 Stat. 437 30 U.S.C. secs. 181, *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, the Department of the Interior, on the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, approved a unit agreement for the \_\_\_\_\_ Unit Area, wherein the First Party is designated as Unit Operator; and

Whereas the First Party desires to transfer, assign, release, and quitclaim, and the Second Party desires to assume all the rights, duties and obligations of Unit Operator under the unit agreement; and

Whereas for sufficient and valuable consideration, the receipt whereof is hereby acknowledged, the First Party has transferred, conveyed, and assigned all his/its rights under certain operating agreements involving lands within the area set forth in said unit agreement unto the Second Party;

Now, therefore, in consideration of the premises hereinbefore set forth, the First Party does hereby transfer, assign, release, and quitclaim unto Second Party all of First Party's rights, duties, and obligations as Unit Operator under said unit agreement; and

Second Party hereby accepts this assignment and hereby covenants and agrees to fulfill the duties and assume the obligations of Unit Operator under and pursuant to all the terms of said unit agreement to the full extent set forth in this assignment, effective upon approval of this indenture by the (Name and Title of authorized officer, BLM); said unit agreement being hereby incorporated herein by reference and made a part hereof as fully and effectively as though said unit agreement were expressly set forth in this instrument.

In witness whereof, the parties hereto have executed this instrument as of the date hereinabove set forth.

## Subpart 3190—Delegation of Authority, Cooperative Agreements and Contracts for Oil and Gas Inspections: General

### § 3190.0-1 Purpose.

The purpose of the part is to provide procedures for approval, implementation and administration of delegations of authority, cooperative agreements and contracts for inspection, enforcement and investigative activities related to oil and gas production operations on Federal and Indian lands under the provisions of the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*).

### § 3190.0-3 Authority.

The Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*).

### § 3190.0-4 Objective.

The objective of this part is to assure that delegations of authority, cooperative agreements and contracts as provided for under the Federal Oil and Gas Royalty Management Act are carried out in accordance with the provisions of the Act and this title.

### § 3190.0-5 Definitions.

As used in this part, the term:

(a) *Inspection* means the examination of oil and gas lease sites, records or motor vehicle documentation by an authorized representative of the Secretary of the Interior to determine if there is compliance with applicable regulations, Onshore Oil and Gas orders, approvals, Notices to Lessees and Operators, approvals, other written orders, the mineral leasing laws, and the Federal Oil and Gas Royalty Management Act.

(b) *Investigation* means any inquiry into any action by or on behalf of a lessee or operator of a Federal or Indian lease, or transporter of oil from such lease.

(c) *Contractor* means any individual, corporation, association, partnership, consortium or joint venture who has contracted to carry out activities under this part.

(d) *Enforcement* means action taken by an authorized representative of the Secretary in order to obtain compliance with applicable regulations, On-shore Oil and Gas Orders, Notices to Lessees and Operators, approvals, other written orders, the mineral leasing laws, and the Federal Oil and Gas Royalty Management Act.

(e) *Indian lands* means any lands or interests in lands of an Indian tribe or an Indian allottee held in trust by the United States or which is subject to Federal restriction against alienation, including mineral resources and mineral estates reserved to an Indian tribe or Indian allottee in the conveyance of a surface or nonmineral estate, except that such term does not include any lands subject to the provisions of section 3 of the Act of June 28, 1906 (34 Stat. 539).

(f) *Proprietary data* means information obtained from a lessee that constitutes trade secrets, or commercial or financial information that is privileged or confidential, or other information that may be withheld under the Freedom of Information Act (5 U.S.C. 552(b)).

**§ 3190.0-7 Cross references.**

- (a) 25 CFR 211.18; 212.24; 213.34.
- (b) 30 CFR part 229.
- (c) 43 CFR part 3160.

**§ 3190.1 Proprietary data.**

With regard to any data or information obtained by a State, Indian tribe or individual, whether under a delegation of authority, cooperative agreement or contract, the following applies:

(a) Proprietary data shall be made available to a State or Indian tribe pursuant to a cooperative agreement under the provisions of 30 U.S.C. 1732 if such State or Indian tribe:

(1) Consents in writing to restrict the dissemination of such information to such persons directly involved in an investigation under 30 U.S.C. 1732 who need the information to conduct the investigation;

(2) Agrees in writing to accept liability for wrongful disclosure;

(3) In the case of a State, the State demonstrates that such information is essential to the conduct of an inves-

tigation or to litigation under 30 U.S.C. 1734; and

(4) In the case of an Indian tribe, the tribe demonstrates that such information is essential to the conduct of an audit or investigation and waives sovereign immunity by express consent for wrongful disclosure.

(b)(1) Any person or State that obtains proprietary data pursuant to a delegation of authority, cooperative agreement or contract under this part is subject to the same provisions of law with respect to the disclosure of such information as would apply to any officer or employee of the United States.

(2) Disclosure of proprietary data obtained pursuant to a delegation of authority, cooperative agreement, or contract under this part may not be compelled under State law.

**§ 3190.2 Recordkeeping, funding and audit.**

**§ 3190.2-1 Recordkeeping.**

(a) Records and accounts relating to activities under delegations of authority, cooperative agreements or contracts shall be identified in the delegation, cooperative agreement or contract.

(b) All records and other materials relating to a delegation of authority, cooperative agreement or contract shall be maintained by the State, Indian Tribe or contractor for a period of 6 years from the date they are generated or such other period as may be specified in the delegation, cooperative agreement or contract.

**§ 3190.2-2 Funding.**

(a) States and Tribes shall provide adequate funding for administration and execution of activities carried out under a delegation or cooperative agreement.

(b) Reimbursement for allowable costs incurred by a State, Indian tribe or contractor as a result of activities carried out under a delegation of authority, cooperative agreement or contract shall be as negotiated, with the following limitations:

(1) Up to 100 percent for a delegation of authority; or

(2) Up to 100 percent for a cooperative agreement.

## Bureau of Land Management, Interior

§ 3191.1-3

(c) Funding shall be subject to the availability of funds.

(d) States, Indian tribes or contractors shall maintain financial records relating to the funds received and expended under a delegation of authority, cooperative agreement or contract as specified in the delegation of authority, cooperative agreement or contract.

(e) Reimbursement shall be at least quarterly and only shall be made upon submission of an invoice or request for reimbursement to the authorized officer.

[52 FR 27182, July 17, 1987, as amended at 62 FR 49586, Sept. 22, 1997]

### § 3190.2-3 Audit.

In maintaining financial records relating to the funds received and expended under a delegation of authority, cooperative agreement, or contract, States, Indian tribes and contractors shall comply with generally accepted accounting principles and audit requirements established by the Department of the Interior and Bureau of Land Management.

### § 3190.3 Sharing of civil penalties.

Fifty percent of any civil penalty collected by the United States as a result of activities carried out by a State under a delegation of authority or a State or Indian tribe under a cooperative agreement shall be payable to that State or Indian tribe upon receipt by the United States. Such amount shall be deducted from compensation due to the State or Indian tribe by the United States under the delegation of authority or cooperative agreement.

### § 3190.4 Availability of information.

Information in the possession of the Bureau of Land Management that is necessary to carry out activities authorized by delegations of authority, cooperative agreements, or contracts entered into under this part will be provided by the BLM to the States and Indian tribes party to such agreements. Release of proprietary data shall be subject to the provisions of § 3190.1 of this part.

[56 FR 2998, Jan. 25, 1991]

## Subpart 3191—Delegation of Authority

### § 3191.1 Petition for delegation.

#### § 3191.1-1 Petition.

The Governor or other authorized official of any eligible State may request in writing that the Director delegate all or part of his/her authority and responsibility for inspection, enforcement and investigation on oil and gas leases on Federal lands within the State and on Indian lands within the State where the affected Indian tribe or Indian allottee has given written permission for such inspection, enforcement and investigation. Requests by a State for delegation of other activities may be granted by the Director with the approval of the Secretary.

#### § 3191.1-2 Eligibility.

Any State with producing oil or gas leases on Federal or Indian lands may request a delegation of authority.

#### § 3191.1-3 Action upon petition.

Upon request for a delegation of authority, the Director shall determine if:

(a) The State has proposed an acceptable plan for carrying out the delegated activities and will provide adequate resources to achieve the purposes of 30 U.S.C. 1735. This plan shall, at a minimum:

(1) Identify specific authorities and responsibilities for which the State is requesting a delegation of authority and whether it is applicable to Federal lands only or includes Indian lands;

(2) Provide evidence of written permission of the affected Indian tribe(s) or allottee(s) for such lands;

(3) Include specifics for carrying out the delegated activities;

(4) Indicate the inspector resources for carrying out the delegated activities and documentation of inspector qualifications;

(5) Describe the proposed record keeping for funding purposes;

(6) Detail the frequency and method of payment; and

(7) Include copies of any non-Federal forms that are to be used.

#### § 3191.1-4

(b) The State has demonstrated that it will effectively and faithfully administer the rules and regulations of the Department of the Interior in accordance with the provisions of 30 U.S.C. 1735.

(c) The delegation will be carried out in coordination with activities retained by the Bureau so that such delegation will not create an unreasonable burden on any lessee.

#### § 3191.1-4 Public hearing on petition.

Prior to the granting of any delegation of authority, the notice of proposed delegation shall be published in the FEDERAL REGISTER. The FEDERAL REGISTER notice shall provide an opportunity for a public hearing in the affected State.

#### § 3191.2 Terms of delegation.

(a) Delegations shall be continuing, contingent upon available funding, providing that there is an annual finding by the Director that the provisions of the delegation and the mineral leasing laws are still being carried out and that the requirements of § 3191.1-3 (a), (b) and (c) of this title are still in effect.

(b) Authority delegated to a State under this subpart shall not be redelegated.

(c) The State regulatory authority shall maintain sufficient qualified, personnel to comply with the terms and purpose of the delegation.

(d) Inspection identification cards shall be issued by the authorized officer to all certified State inspectors for the purpose of identifying the bearer as an authorized representative of the Secretary. Identification cards remain the property of the United States.

(e) The delegation shall provide for coordination with designated offices of the Bureau of Land Management, the Minerals Management Service, and, where appropriate, the Bureau of Indian Affairs, Forest Service, and other surface management agencies.

(f) The delegation shall provide for annual program review.

(g) The delegation shall provide for annual budget and program reporting in conjunction with the Federal Budget process.

#### 43 CFR Ch. II (10-1-08 Edition)

(h) The Director reserves the right to make inspections on Federal and Indian leases inspected by a State under this subpart for the purpose of evaluating the manner in which the delegation is being carried out.

(i) The Director reserves the right to act independently to carry out his/her responsibilities under the law.

#### § 3191.3 Termination and reinstatement.

##### § 3191.3-1 Termination.

(a) The delegation may be terminated by mutual written consent at any time.

(b) The Director may revoke a delegation if it is determined that the State has failed to meet the minimum standards for complying with the delegated authority.

(c) Prior to any action to revoke a delegation, the Director shall notify the State in writing of the deficiencies in the program leading to such revocation.

(d) Upon notification of intent to revoke a delegation, the State shall have 30 days to respond with a plan to correct the cited deficiencies. If the Director determines that the plan of correction is acceptable, the Director shall then approve the plan and specify the timeframe within which the cited deficiencies shall be corrected.

(e) In the event the Director makes a determination to revoke a delegation of authority, the State shall be provided an opportunity for a hearing prior to final action.

##### § 3191.3-2 Reinstatement.

Terminated delegations of authority may be reinstated as set out below:

(a) For a delegation terminated by mutual consent under § 3191.3-1(a) of this title, the State shall apply for reinstatement by filing a petition with the Director, who shall determine whether such reinstatement should be granted.

(b) For a delegation of authority revoked by the Director, the State shall file a petition requesting reinstatement. In applying for reinstatement, the State shall provide written evidence that it has remedied all defects for which the delegation was revoked

## Bureau of Land Management, Interior

## § 3192.2

and that it is fully capable of resuming the activities carried out under the delegation. Upon receipt of the petition, the following actions shall be taken:

(1) The authorized officer, after review of the petition, may recommend approval of the reinstatement but shall provide proof that the deficiencies have been corrected and that the State is fully capable of carrying out the delegation.

(2) The Director shall review the petition and the recommendation of the authorized officer and may approve the reinstatement of a delegation upon a determination that the findings of the authorized officer are acceptable.

### § 3191.4 Standards of delegation.

(a) The Director shall establish minimum standards to be used by a State in carrying out activities established in the delegation.

(b) The delegation shall identify functions, if any, that are to be carried out jointly.

(c) A delegation shall be made in accordance with the requirements of this section.

(d) Copies of delegations shall be on file in the Washington Office of the Bureau and shall be available for public inspection.

### § 3191.5 Delegation for Indian lands.

#### § 3191.5-1 Indian lands included in delegation.

(a) No activity under a delegation made under this subpart may be carried out on Indian lands without the written permission of the affected Indian tribe or allottee.

(b) A State requesting a delegation involving Indian lands shall provide, as evidence of permission, a written agreement signed by an appropriate official(s) of the Indian tribe for tribal lands, or by the individual allottee(s) or their representative(s) for allotted lands. The agreement shall at a minimum specify the type and extent of activities to be carried out by the State under the agreement, and provisions for State access to carry out the specified activities.

(c) Delegations covering Indian lands shall be separate from delegations covering Federal lands.

#### § 3191.5-2 Indian lands withdrawn from delegation.

(a) When an Indian tribe or allottee withdraws permission for a State to conduct inspection and related activities on its lands, the Indian tribe or allottee shall provide written notice of its withdrawal of permission to the State.

(b) Immediately upon receipt of a notice of withdrawal of permission, the State shall provide written notification of said notice to the authorized officer, who immediately shall take all necessary action to provide for inspection and enforcement activities on the affected Indian lands.

(c) No later than 120 days after receipt of a notice of withdrawal of permission draw from an Indian tribe or allottee, the delegation on the lands covered by the notice shall terminate.

(d) Upon termination of a delegation covering Indian lands, appropriate changes in funding shall be made by the authorized officer.

## Subpart 3192—Cooperative Agreements

SOURCE: 62 FR 49586, Sept. 22, 1997, unless otherwise noted.

### § 3192.1 What is a cooperative agreement?

(a) A cooperative agreement is a contract between the Bureau of Land Management (BLM) and a Tribe or State to conduct inspection, investigation, or enforcement activities on producing Indian Tribal or allotted oil and gas leases.

(b) BLM will enter into a cooperative agreement with a State to inspect oil and gas leases on Indian lands only with the permission of the Tribe with jurisdiction over the lands.

### § 3192.2 Who may apply for a cooperative agreement with BLM to conduct oil and gas inspections?

(a) The Tribal chairperson, or other authorized official, of a Tribe with producing oil or gas leases, or agreements under the Indian Mineral Development Act of 1982 (25 U.S.C. 2101 *et seq.*), may apply for a cooperative agreement with BLM for Indian lands under the Tribe's jurisdiction.

### § 3192.3

(b) Tribes may join together to apply for a multi-tribe cooperative agreement.

(c) The Governor of a State having a Tribal resolution from the Tribe with jurisdiction over the Indian lands, permitting the Governor to enter into a cooperative agreement, may apply for a cooperative agreement with BLM.

#### **§ 3192.3 What must a Tribe or State include in its application for a cooperative agreement?**

(a) To apply for a cooperative agreement you must complete—

(1) Standard Form 424, Application for Federal Assistance;

(2) Standard Form 424A, Budget Information—Non-Construction Programs; and

(3) Standard Form 424B, Assurances—Non-Construction Programs.

(b) You must describe the type and extent of oil and gas inspection, enforcement, and investigative activities proposed under the agreement and the period of time the proposed agreement will be in effect (See section 11 of Standard Form 424).

(c) You may include allotted lands under an agreement with the written consent of all allottees or their heirs. BLM will ask the Bureau of Indian Affairs (BIA) to verify that the Tribe or State has obtained all of the necessary signatures to commit 100 percent of each individual tract of allotted lands to the agreement.

#### **§ 3192.4 What is the term of a cooperative agreement?**

Cooperative agreements can be in effect for a period from 1 to 5 years from the effective date of the agreement, as set out in the agreement.

#### **§ 3192.5 How do I modify a cooperative agreement?**

You may modify a cooperative agreement by having all parties to the agreement consent to the change in writing. If the agreement is with a State, and the modification would affect the duration or scope of the agreement, then the State must obtain the written consent of the affected Tribe and/or allottee or heir.

### 43 CFR Ch. II (10–1–08 Edition)

#### **§ 3192.6 How will BLM evaluate my request for proprietary data?**

BLM will evaluate Tribal or State requests for proprietary data on a case-by-case basis according to the requirements of § 3190.1 of this part.

#### **§ 3192.7 What must I do with Federal assistance I receive?**

You must use Federal assistance that you receive only for costs incurred which are directly related to the activities carried out under the cooperative agreement.

#### **§ 3192.8 May I subcontract activities in the agreement?**

You must obtain BLM's written approval before you subcontract any activities in the agreement with the exception of financial audits of program funds that are required by the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*).

#### **§ 3192.9 What terms must a cooperative agreement contain?**

The cooperative agreement must—

(a) State its purpose, objective, and authority;

(b) Define terms used in the agreement;

(c) Describe the Indian lands covered;

(d) Describe the roles and responsibilities of BLM and the Tribe or State;

(e) Describe the activities the Tribe or State will carry out;

(f) Define the minimum performance standards to evaluate Tribal or State performance;

(g) Include provisions to—

(1) Protect proprietary data, as provided in § 3190.1 of this part;

(2) Prevent conflict of interest, as provided in § 3192.14(d);

(3) Share civil penalties, as provided in § 3192.11; and

(4) Terminate the agreement;

(h) List BLM and Tribal or State contacts;

(i) Avoid duplication of effort between BLM and the Tribe or State when conducting inspections;

(j) List schedules for—

(1) Inspection activities;

(2) Training of Tribal or State inspectors;

(3) Periodic reviews and meetings;

(k) Specify the limit on the dollar amount of Federal funding;

## Bureau of Land Management, Interior

## § 3192.15

(l) Describe procedures for Tribes or States to request payment reimbursement;

(m) Describe allowable costs subject to reimbursement; and

(n) Describe plans for BLM oversight of the cooperative agreement.

### § 3192.10 What costs will BLM pay?

(a) BLM will pay expenses allowed under part 12, subpart A, Administrative and Audit Requirements and Cost Principles for Assistance Programs, of this title.

(b) BLM will fund the agreements up to 100 percent of allowable costs.

(c) Funding is subject to the availability of BLM funds.

(d) Funding for cooperative agreements is subject to the shared civil penalties requirement of § 3192.11.

### § 3192.11 How are civil penalties shared?

(a) Civil penalties that the Federal Government collects resulting from an activity carried out by a Tribe or State under a cooperative agreement are shared equally between the inspecting Tribe or State and BLM.

(b) BLM must deduct the amount of the civil penalty paid to the Tribe or State from the funding paid to the Tribe or State for the cooperative agreement.

### § 3192.12 What activities may Tribes or States perform under cooperative agreements?

Activities carried out under the cooperative agreement must be in accordance with the policies of the appropriate BLM State or field office and as specified in the agreement, and may include—

(a) Inspecting Tribal or allotted oil and gas leases for compliance with BLM regulations;

(b) Issuing initial Notices of Incidents of Non-Compliance, Form 3160-9, and Notices to Shut Down Operations, Form 3160-12;

(c) Conducting investigations; or

(d) Conducting oil transporter inspections.

### § 3192.13 What responsibilities must BLM keep?

(a) Under cooperative agreements, BLM continues to—

(1) Issue Notices of Incidents of Non-compliance that impose monetary assessments and penalties;

(2) Collect assessments and penalties;

(3) Calculate and distribute shared civil penalties;

(4) Train and certify Tribal or State inspectors;

(5) Issue and regulate inspector identification cards; and

(6) Identify leases to be inspected, taking into account the priorities of the Tribe. Priorities for allotted lands will be established through consultation with the BIA office with jurisdiction over the lands in the agreement.

(b) If BLM enters into a cooperative agreement, that agreement does not affect BLM's right to enter lease sites to conduct inspections, enforcement, investigations or other activities necessary to supervise lease operations.

### § 3192.14 What are the requirements for Tribal or State inspectors?

(a) Tribal or State inspectors must be certified by BLM before they conduct independent inspections on Indian oil and gas leases.

(b) The standards for certifying Tribal or State inspectors must be the same as the standards BLM uses for certifying BLM inspectors.

(c) Tribal and State inspectors must satisfactorily complete on-the-job and classroom training in order to qualify for certification.

(d) Tribal or State inspectors must not—

(1) Inspect the operations of companies in which they, a member of their immediate family, or their immediate supervisor, have a direct financial interest; or

(2) Use for personal gain, or gain by another person, information he or she acquires as a result of his or her participating in the cooperative agreement.

### § 3192.15 May cooperative agreements be terminated?

(a) Cooperative agreements may be terminated at any time if all parties agree to the termination in writing.

## § 3192.16

(b) BLM may terminate an agreement without Tribal or State agreement if the—

(1) Tribe or State fails to carry out the terms of the agreement; or

(2) Agreement is no longer needed.

(c) A Tribe may unilaterally terminate an agreement after notifying BLM. For a unilateral termination, the agreement terminates 60 days after the Tribe notifies BLM.

## § 3192.16 How will I know if BLM intends to terminate my agreement?

(a) If BLM intends to terminate your agreement because you did not carry out the terms of the agreement, BLM must send you a notice that lists the reason(s) why BLM intends to terminate the agreement.

(b) Within 30 days after receiving the notice, you must send BLM a plan to correct the problem(s) BLM listed in the notice. BLM has 30 days to approve or disapprove the plan, in writing.

(c) If BLM approves the plan, you have 30 days after you receive notice of the approval to correct the problem(s).

(d) If you have not corrected the problem within 30 days, BLM will send you a second written termination notice that will give you another opportunity to correct the problem.

(e) If the problem is not corrected within 60 days after you receive the second notice, BLM will terminate the agreement.

## § 3192.17 Can BLM reinstate cooperative agreements that have been terminated?

(a) If your cooperative agreement was terminated by consent, you may request that BLM reinstate the agreement at any time.

(b) If BLM terminated an agreement because you did not carry out the terms of the agreement, you must prove that you have corrected the problem(s) and are able to carry out the terms of the agreement.

(c) For any reinstatement request BLM will decide whether or not your cooperative agreement may be reinstated and, if so, whether you must make any changes to the agreement before it can be reinstated.

## 43 CFR Ch. II (10–1–08 Edition)

## § 3192.18 Can I appeal a BLM decision?

Any party adversely affected by a BLM decision made under this subpart may appeal the decision in accordance with parts 4 and 1840 of this title.

## PART 3195—HELIUM CONTRACTS

3195.34 What happens to my Helium Distribution Contracts?

3195.35 What happens if I have an outstanding obligation to purchase refined helium under a Helium Distribution Contract?

3195.36 What happens if there is a shortage of helium?

## Bureau of Land Management, Interior

## §3195.13

3195.37 Under what circumstances can BLM terminate me as an authorized Federal helium supplier?

AUTHORITY: 50 U.S.C. 167a.

SOURCE: 63 FR 40178, July 28, 1998, unless otherwise noted.

### GENERAL INFORMATION

#### §3195.10 What is the purpose of these regulations?

The purpose of these regulations is to establish procedures governing the sale of helium to Federal agencies with major helium requirements. In order to sell a major helium requirement to a Federal agency, a Federal helium supplier must be under contract with BLM to purchase from BLM an amount of crude helium equivalent to the amount of refined helium it has supplied to the Federal agency.

#### §3195.11 What terms do I need to know to understand this subpart?

To understand this subpart you need to know that:

*BLM* means the Bureau of Land Management, Helium Operations, United States Department of the Interior, Amarillo, TX 79101.

*Buyer* means anyone who is purchasing refined helium for a Federal agency or Federal agency contractor.

*Crude helium* means a helium-gas mixture containing no more than ninety-nine (99) percent helium by volume.

*Federal agency* means any department, independent establishment, commission, administration, foundation, authority, board, or bureau of the United States, or any corporation owned, controlled, or in which the United States has a proprietary interest, as these terms are used in 5 U.S.C. 101-105; 5 U.S.C. 551(1); or in 18 U.S.C. 6, but does not include Federal agency contractors.

*Federal helium supplier* means a private helium merchant who has an In-Kind Crude Helium Sales Contract with an effective date of January 1, 1998, or later, with BLM, and who has helium available for sale to:

- (1) Federal agencies; or
- (2) Private helium purchasers for use in Federal Government contracts.

*Helium* means the element helium regardless of its physical state.

*Helium use location* means the location where the major helium requirement will be used.

*Like (equivalent) amount of crude helium* means the amount of crude helium measured at a pressure of 14.65 pounds per square inch absolute (psia) and a temperature of 60 degrees Fahrenheit (F), and rounded up to the nearest thousand (1,000) cubic feet, that is equivalent to a specified amount of refined helium measured at 14.7 psia and 70 degrees Fahrenheit.

*Major helium requirement* means an estimated refined helium requirement greater than 200,000 standard cubic feet (scf) of gaseous helium or 7510 liters of liquid helium delivered to a helium use location per year.

*Standard cubic foot (SCF)* means the volume of gaseous helium occupying one cubic foot at a pressure of 14.7 psia and a temperature of 70 degrees Fahrenheit. One liter of liquid helium is equivalent to 26.63 scf of gaseous helium. One U.S. gallon of liquid helium is equivalent to 100.8 scf of gaseous helium. One pound of liquid helium is equivalent to 96.72 scf of gaseous helium. If BLM approves, you may use appropriate gaseous equivalents of volumes of helium mixtures different from these figures.

#### §3195.12 What is an In-Kind Crude Helium Sales Contract?

It is a written contract between BLM and a Federal helium supplier requiring that whenever a supplier sells a major helium requirement to a Federal agency or its contractors, the supplier must purchase a like amount of crude helium from BLM.

#### §3195.13 If I am a Federal helium supplier or buyer, what reports must I submit to BLM?

In accordance with the In-Kind Crude Helium Sales Contract:

(a) Federal helium suppliers and buyers must report the total itemized quarterly deliveries of major helium requirements within 45 calendar days after the end of the previous quarter (see §§3195.26 and 3195.33).

(b) Federal helium suppliers must report the annual cumulative helium delivery report by November 15 of each year (see §3195.33).

## **§ 3195.14**

### **§ 3195.14 How should I submit reports?**

You must submit reports by:

- (a) Mail;
- (b) Fax;
- (c) E-mail; or
- (d) Any other method to which you and BLM agree.

#### **FEDERAL AGENCY REQUIREMENTS**

### **§ 3195.20 Who must purchase major helium requirements from Federal helium suppliers?**

- (a) The Department of Defense;
- (b) The National Aeronautics and Space Administration;
- (c) The Department of Energy;
- (d) Any other Federal agency; and
- (e) Federal agency contractors.

### **§ 3195.21 When must I use an authorized Federal helium supplier?**

You must use an authorized Federal helium supplier for any major helium requirement.

### **§ 3195.22 When must my contractors or subcontractors use an authorized Federal helium supplier?**

An authorized Federal helium supplier must be used whenever the contractor or subcontractor uses a major helium requirement in performance of a Federal contract.

### **§ 3195.23 How do I get a list of authorized Federal helium suppliers?**

You must request the list from BLM in writing.

### **§ 3195.24 What must I do before contacting a non-Federal helium supplier for my helium needs?**

You must make an initial determination about the annual helium demand for each helium use location for the expected life of the purchase order/contract. If the annual helium demand for a helium use location is a major helium requirement, it must be supplied by a Federal helium supplier.

### **§ 3195.25 What information must be in my purchase order/contract for a major helium requirement?**

A purchase order/contract must state each helium use location and whether the anticipated demand exceeds the amount defined as a major helium requirement at each helium use location.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 3195.26 What information must I report to BLM?**

In accordance with the In-Kind Crude Helium Sales Contract, within 45 days of the end of each quarter, you must report to BLM (see § 3195.13) the following:

- (a) The name of the company from which you purchased a major helium requirement;
- (b) The amount of helium you purchased and the date it was delivered; and
- (c) The helium use location.

### **§ 3195.27 What do I do if my helium requirement becomes a major helium requirement after the initial determination has been made?**

As soon as you determine that your forecasted demand of helium for a particular helium use location will become a major helium requirement, you must purchase your helium (for that helium use location) from an authorized Federal helium supplier for the remainder of the purchase order/contract as a major helium requirement.

#### **FEDERAL HELIUM SUPPLIER REQUIREMENTS**

### **§ 3195.30 How do I apply to become a Federal helium supplier?**

In order to become a Federal helium supplier,

(a) You must be a private helium merchant and demonstrate to BLM in writing that you have:

- (1) Adequate financial resources to pay for BLM helium and helium related services;
- (2) Adequate facilities and equipment to meet delivery schedules and quality standards required by Federal helium buyers; and
- (3) A satisfactory record of performance in the distribution of helium or other compressed gases.

(b) You must fill out and execute BLM's In-Kind Crude Helium Sales Contract and submit it to BLM for approval.

### **§ 3195.31 What are the general terms of an In-Kind Crude Helium Sales Contract?**

A BLM helium In-Kind Crude Helium Sales Contract requires you to:

## Bureau of Land Management, Interior

## §3195.37

(a) Deliver helium to a Federal agency specified helium use location;

(b) Purchase crude helium from BLM equivalent to the amount of refined helium you sold to Federal agencies;

(c) Report to BLM the amount of refined helium you sold to Federal agencies; and

(d) Maintain records for inspection and audit by BLM in accordance with 30 U.S.C. 17.13(b).

### §3195.32 Where can I find a list of Federal agencies that use helium?

You must request from BLM in writing the list of Federal agencies that have purchased a major helium requirement during the past year.

### §3195.33 What information must I report to BLM?

(a) In accordance with the In-Kind Crude Helium Sales Contract, within 45 days of the end of each quarter, you must report to BLM (see §3195.13) the following:

(1) The name of the Federal agency to which you supplied helium;

(2) The amount of helium you delivered and the date you delivered it; and

(3) The helium use location.

(b) In accordance with the In-Kind Crude Helium Sales Contract, by November 15 of each year, you must report to BLM (see §3195.13) the following:

(1) The name of the Federal agency to which you supplied helium; and

(2) The cumulative amount of helium delivered during the previous fiscal year for each Federal agency.

### §3195.34 What happens to my Helium Distribution Contracts?

Helium Distribution Contracts between BLM and a helium distributor have been terminated. You must execute an In-Kind Crude Helium Sales Contract before you sell a major helium requirement to a Federal agency.

### §3195.35 What happens if I have an outstanding obligation to purchase refined helium under a Helium Distribution Contract?

If you were obligated to buy refined helium under a Helium Distribution Contract, your In-Kind Crude Helium Sales Contract requires you to buy an

equivalent amount of crude helium in lieu of that obligation.

### §3195.36 What happens if there is a shortage of helium?

If there is a shortage of helium (either company specific or industry wide) which would cause you to defer helium shipments to a buyer, you must, in accordance with your In-Kind Crude Helium Sales Contract, give the United States priority over non-government requirements.

### §3195.37 Under what circumstances can BLM terminate me as an authorized Federal helium supplier?

BLM has the authority to terminate you as an authorized Federal helium supplier for:

(a) Nonpayment for a like amount of crude helium;

(b) Not reporting helium deliveries according to your In-Kind Crude Helium Sales Contract and these regulations;

(c) Not taking delivery of a purchase of a like amount of crude helium not covered by a valid helium storage contract; or

(d) Any other breach of contract or violation of these regulations.

## Group 3200—Geothermal Resources Leasing

NOTE: The collections of information contained in parts 3200, 3210, 3220, 3240, 3250, and 3260 of Group 3200 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance numbers 1004-0034, 1004-0074, 1004.0132, and 1004-0160. The information will be used to maintain an orderly program for leasing, development, and production of Federal geothermal resources. Responses are required to obtain benefits in accordance with the Geothermal Steam Act of 1970, as amended.

Public reporting burden for this information is estimated to average 1.6 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Division of Information Resources Management, Bureau of Land Management, 1800 C Street, NW., Premier Building, Room 208, Washington DC 20240; and the Paperwork

3204.12 How may I acquire a noncompetitive lease for lands subject to a mining claim?

3204.13 How will BLM process noncompetitive lease applications pending on August 8, 2005?

3204.14 May I amend my application for a noncompetitive lease?

3204.15 May I withdraw my application for a noncompetitive lease?

**Subpart 3205—Direct Use Leasing**

3205.6 When may BLM issue a direct use lease to an applicant?

3205.7 How much acreage should I apply for in a direct use lease?

3205.10 How do I obtain a direct use lease?

3205.12 How will BLM respond to direct use lease applications on lands managed by another agency?

3205.13 May I withdraw my application for a direct use lease?

3205.14 May I amend my application for a direct use lease?

3205.15 How will I know whether my direct use lease will be issued?

**Subpart 3206—Lease Issuance**

3206.10 What must I do for BLM to issue a lease?

3206.11 What must BLM do before issuing a lease?

3206.12 What are the minimum and maximum lease sizes?

3206.13 What is the maximum acreage I may hold?

3206.14 How does BLM compute acreage holdings?

3206.15 How will BLM charge acreage holdings if the United States owns only a fractional interest in the geothermal resources in a lease?

3206.16 Is there any acreage which is not chargeable?

3206.17 What will BLM do if my holdings exceed the maximum acreage limits?

3206.18 When will BLM issue my lease?

**Subpart 3207—Lease Terms and Extensions**

3207.5 What terms (time periods) apply to my lease?

3207.10 What is the primary term of my lease?

3207.11 What work am I required to perform during the first 10 years of my lease for

## Bureau of Land Management, Interior

## Pt. 3200

BLM to grant the initial extension of the primary term of my lease?

- 3207.12 What work am I required to perform each year for BLM to continue the initial and additional extensions of the primary term of my lease?
- 3207.13 Must I comply with the requirements of §§3207.11 and 3207.12 when my lease overlies a mining claim?
- 3207.14 How do I qualify for a drilling extension?
- 3207.15 How do I qualify for a production extension?
- 3207.16 When may my lease be renewed?
- 3207.17 How is the term of my lease affected by commitment to a unit?
- 3207.18 Can my lease be extended if it is eliminated from a unit?

### Subpart 3210—Additional Lease Information

- 3210.10 When does lease segregation occur?
- 3210.11 Does a lease segregated from an agreement or plan receive any benefits from unitization of the committed portion of the original lease?
- 3210.12 May I consolidate leases?
- 3210.13 Who may lease or locate other minerals on the same lands as my geothermal lease?
- 3210.14 May BLM readjust the terms and conditions in my lease?
- 3210.15 What if I appeal BLM's decision to readjust my lease terms?
- 3210.16 How must I prevent drainage of geothermal resources from my lease?
- 3210.17 What will BLM do if I do not protect my lease from drainage?

### Subpart 3211—Filing and Processing Fees, Rent, Direct Use Fees, and Royalties

- 3211.10 What are the processing and filing fees for leases?
- 3211.11 What are the annual lease rental rates?
- 3211.12 How and where do I pay my rent?
- 3211.13 When is my annual rental payment due?
- 3211.14 Will I always pay rent on my lease?
- 3211.15 How do I credit rent towards royalty?
- 3211.16 Can I credit rent towards direct use fees?
- 3211.17 What is the royalty rate on geothermal resources produced from or attributable to my lease that are used for commercial generation of electricity?
- 3211.18 What is the royalty rate on geothermal resources produced from or attributable to my lease that are used directly for purposes other than commercial generation of electricity?
- 3211.19 What is the royalty rate on byproducts derived from geothermal resources

produced from or attributable to my lease?

- 3211.20 How do I credit advanced royalty towards royalty?
- 3211.21 When do I owe minimum royalty?

### Subpart 3212—Lease Suspensions, Cessation of Production, Royalty Rate Reductions, and Energy Policy Act Royalty Rate Conversions

- 3212.10 What is the difference between a suspension of operations and production and a suspension of operations?
- 3212.11 How do I obtain a suspension of operations or a suspension of operations and production on my lease?
- 3212.12 How long does a suspension of operations or a suspension of operations and production last?
- 3212.13 How does a suspension affect my lease term and obligations?
- 3212.14 What happens when the suspension ends?
- 3212.15 Will my lease remain in full force and effect if I cease production and I do not have an approved suspension?
- 3212.16 Can I apply to BLM to reduce, suspend, or waive the royalty or rental of my lease?
- 3212.17 What information must I submit when I request that BLM suspend, reduce, or waive my royalty or rental?
- 3212.18 What are the production incentives for leases?
- 3212.19 How do I apply for a production incentive?
- 3212.20 How will BLM review my request for a production incentive?
- 3212.21 What criteria establish a qualified expansion project for the purpose of obtaining a production incentive?
- 3212.22 What criteria establish a new facility for the purpose of obtaining a production incentive?
- 3212.23 How will the production incentive apply to a qualified expansion project?
- 3212.24 How will the production incentive apply to a new facility?
- 3212.25 Can I convert the royalty rate terms of my lease in effect before August 8, 2005, to the terms of the Geothermal Steam Act, as amended by the Energy Policy Act of 2005?
- 3212.26 How do I submit a request to modify the royalty rate terms of my lease to the applicable terms prescribed in the Energy Policy Act of 2005?
- 3212.27 How will BLM or MMS review my request to modify the lease royalty rate terms?

### Subpart 3213—Relinquishment, Termination, and Cancellation

- 3213.10 Who may relinquish a lease?
- 3213.11 What must I do to relinquish a lease?

**Pt. 3200**

- 3213.12 May BLM accept a partial relinquishment if it will reduce my lease to less than 640 acres?
- 3213.13 When does relinquishment take effect?
- 3213.14 Will BLM terminate my lease if I do not pay my rent on time?
- 3213.15 How will BLM notify me if it terminates my lease?
- 3213.16 May BLM cancel my lease?
- 3213.17 May BLM terminate my lease for reasons other than non-payment of rentals?
- 3213.18 When is a termination effective?
- 3213.19 What can I do if BLM notifies me that my lease is being terminated because of a violation of the law, regulations, or lease terms?

**Subpart 3214—Personal and Surety Bonds**

- 3214.10 Who must post a geothermal bond?
- 3214.11 Who must my bond cover?
- 3214.12 What activities must my bond cover?
- 3214.13 What is the minimum dollar amount required for a bond?
- 3214.14 May BLM increase the bond amount above the minimum?
- 3214.15 What kind of financial guarantee will BLM accept to back my bond?
- 3214.16 Is there a special bond form I must use?
- 3214.17 Where must I submit my bond?
- 3214.18 Who will BLM hold liable under the lease and what are they liable for?
- 3214.19 What are my bonding requirements when a lease interest is transferred to me?
- 3214.20 How do I modify my bond?
- 3214.21 What must I do if I want to use a certificate of deposit to back my bond?
- 3214.22 What must I do if I want to use a letter of credit to back my bond?

**Subpart 3215—Bond Release, Termination, and Collection**

- 3215.10 When may BLM collect against my bond?
- 3215.11 Must I replace my bond after BLM collects against it?
- 3215.12 What will BLM do if I do not restore the face amount or file a new bond?
- 3215.13 Will BLM terminate or release my bond?
- 3215.14 When BLM releases my bond, does that end my responsibilities?

**Subpart 3216—Transfers**

- 3216.10 What types of lease interests may I transfer?
- 3216.11 Where must I file a transfer request?
- 3216.12 When does a transferee take responsibility for lease obligations?
- 3216.13 What are my responsibilities after I transfer my interest?

**43 CFR Ch. II (10–1–08 Edition)**

- 3216.14 What filing fees and forms does a transfer require?
- 3216.15 When must I file my transfer request?
- 3216.16 Must I file separate transfer requests for each lease?
- 3216.17 Where must I file estate transfers, corporate mergers, and name changes?
- 3216.18 How do I describe the lands in my lease transfer?
- 3216.19 May I transfer record title interest for less than 640 acres?
- 3216.20 When does a transfer segregate a lease?
- 3216.21 When is my transfer effective?
- 3216.22 Does BLM approve all transfer requests?

**Subpart 3217—Cooperative Agreements**

- 3217.10 What are unit agreements?
- 3217.11 What are communitization agreements?
- 3217.12 What does BLM need to approve my communitization agreement?
- 3217.13 When does my communitization agreement go into effect?
- 3217.14 When will BLM approve my drilling or development contract?
- 3217.15 What does BLM need to approve my drilling or development contract?

**Subpart 3250—Exploration Operations—General**

- 3250.10 When do the exploration operations regulations apply?
- 3250.11 May I conduct exploration operations on my lease, someone else's lease, or unleased land?
- 3250.12 What general standards apply to exploration operations?
- 3250.13 What additional BLM orders or instructions govern exploration?
- 3250.14 What types of operations may I propose in my application to conduct exploration?

**Subpart 3251—Exploration Operations: Getting BLM Approval**

- 3251.10 Do I need a permit before I start exploration operations?
- 3251.11 What information is in a complete Notice of Intent to Conduct Geothermal Resource Exploration Operations application?
- 3251.12 What action will BLM take on my Notice of Intent to Conduct Geothermal Resource Exploration Operations?
- 3251.13 Once I have an approved Notice of Intent, how can I change my exploration operations?
- 3251.14 Do I need a bond for conducting exploration operations?
- 3251.15 When will BLM release my bond?

## Bureau of Land Management, Interior

## Pt. 3200

### Subpart 3252—Conducting Exploration Operations

- 3252.10 What operational standards apply to my exploration operations?
- 3252.11 What environmental requirements must I meet when conducting exploration operations?
- 3252.12 How deep may I drill a temperature gradient well?
- 3252.13 How long may I collect information from my temperature gradient well?
- 3252.14 How must I complete a temperature gradient well?
- 3252.15 When must I abandon a temperature gradient well?
- 3252.16 How must I abandon a temperature gradient well?

### Subpart 3253—Reports: Exploration Operations

- 3253.10 Must I share with BLM the data I collect through exploration operations?
- 3253.11 Must I notify BLM when I have completed my exploration operations?

### Subpart 3254—Inspection, Enforcement, and Noncompliance for Exploration Operations

- 3254.10 May BLM inspect my exploration operations?
- 3254.11 What will BLM do if my exploration operations are not in compliance with my permit, other BLM approvals or orders, or the regulations in this part?

### Subpart 3255—Confidential, Proprietary Information

- 3255.10 Will BLM disclose information I submit under these regulations?
- 3255.11 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?
- 3255.12 How long will information I give BLM remain confidential or proprietary?
- 3255.13 How will BLM treat Indian information submitted under the Indian Mineral Development Act?
- 3255.14 How will BLM administer information concerning other Indian minerals?
- 3255.15 When will BLM consult with Indian mineral owners when information concerning their minerals is the subject of a FOIA request?

### Subpart 3256—Exploration Operations Relief and Appeals

- 3256.10 How do I request a variance from BLM requirements that apply to my exploration operations?
- 3256.11 How may I appeal a BLM decision regarding my exploration operations?

### Subpart 3260—Geothermal Drilling Operations—General

- 3260.10 What types of geothermal drilling operations are covered by these regulations?
- 3260.11 What general standards apply to my drilling operations?
- 3260.12 What other orders or instructions may BLM issue?

### Subpart 3261—Drilling Operations: Getting a Permit

- 3261.10 How do I get approval to begin well pad construction?
- 3261.11 How do I apply for approval for drilling operations and well pad construction?
- 3261.12 What is an operations plan?
- 3261.13 What is a drilling program and how do I apply for drilling program approval?
- 3261.14 When must I give BLM my operations plan?
- 3261.15 Must I give BLM my drilling permit application, drilling program, and operations plan at the same time?
- 3261.16 Can my operations plan, drilling permit, and drilling program apply to more than one well?
- 3261.17 How do I amend my operations plan or drilling permit?
- 3261.18 Do I need to file a bond with BLM before I build a well pad or drill a well?
- 3261.19 When will BLM release my bond?
- 3261.20 How will BLM review applications submitted under this subpart and notify me of its decision?
- 3261.21 How do I get approval to change an approved drilling operation?
- 3261.22 How do I get approval for subsequent well operations?

### Subpart 3262—Conducting Drilling Operations

- 3262.10 What operational requirements must I meet when drilling a well?
- 3262.11 What environmental requirements must I meet when drilling a well?
- 3262.12 Must I post a sign at every well?
- 3262.13 May BLM require me to follow a well spacing program?
- 3262.14 May BLM require me to take samples or perform tests and surveys?

### Subpart 3263—Well Abandonment

- 3263.10 May I abandon a well without BLM's approval?
- 3263.11 What information must I give to BLM to approve my Sundry Notice for abandoning a well?
- 3263.12 How will BLM review my Sundry Notice to abandon my well and notify me of their decision?
- 3263.13 What must I do to restore the site?

**Pt. 3200**

- 3263.14 May BLM require me to abandon a well?  
3263.15 May I abandon a producible well?

**Subpart 3264—Reports—Drilling Operations**

- 3264.10 What must I submit to BLM after I complete a well?  
3264.11 What must I submit to BLM after I finish subsequent well operations?  
3264.12 What must I submit to BLM after I abandon a well?  
3264.13 What drilling and operational records must I maintain for each well?  
3264.14 How do I notify BLM of accidents occurring on my lease?

**Subpart 3265—Inspection, Enforcement, and Noncompliance for Drilling Operations**

- 3265.10 What part of my drilling operations may BLM inspect?  
3265.11 What records must I keep available for inspection?  
3265.12 What will BLM do if my operations do not comply with my permit and applicable regulations?

**Subpart 3266—Confidential, Proprietary Information**

- 3266.10 Will BLM disclose information I submit under these regulations?  
3266.11 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?  
3266.12 How long will information I give BLM remain confidential or proprietary?

**Subpart 3267—Geothermal Drilling Operations Relief and Appeals**

- 3267.10 How do I request a variance from any BLM requirements that apply to my drilling operations?  
3267.11 How may I appeal a BLM decision regarding my drilling operations?

**Subpart 3270—Utilization of Geothermal Resources—General**

- 3270.10 What types of geothermal operations are governed by these utilization regulations?  
3270.11 What general standards apply to my utilization operations?  
3270.12 What other orders or instructions may BLM issue?

**Subpart 3271—Utilization Operations: Getting a Permit**

- 3271.10 What do I need to start preparing a site and building and testing a utilization facility on Federal land leased for geothermal resources?  
3271.11 Who may apply for a permit to build a utilization facility?

**43 CFR Ch. II (10–1–08 Edition)**

- 3271.12 What do I need to start preliminary site investigations that may disturb the surface?  
3271.13 How do I obtain approval to build pipelines and facilities connecting the well field to utilization facilities not located on Federal lands leased for geothermal resources?  
3271.14 What do I need to do to start building and testing a utilization facility if it is not located on Federal lands leased for geothermal resources?  
3271.15 How do I get a permit to begin commercial operations?

**Subpart 3272—Utilization Plan and Facility Construction Permit**

- 3272.10 What must I submit to BLM in my utilization plan?  
3272.11 How do I describe the proposed utilization facility?  
3272.12 What environmental protection measures must I include in my utilization plan?  
3272.13 How will BLM review my utilization plan and notify me of its decision?  
3272.14 How do I get a permit to build or test my facility?

**Subpart 3273—How To Apply for a Site License**

- 3273.10 When do I need a site license for a utilization facility?  
3273.11 When is a site license unnecessary?  
3273.12 How will BLM review my site license application?  
3273.13 What lands are not available for geothermal site licenses?  
3273.14 What area does a site license cover?  
3273.15 What must I include in my site license application?  
3273.16 What is the annual rent for a site license?  
3273.17 When may BLM reassess the annual rent for my site license?  
3273.18 What facility operators must pay the annual site license rent?  
3273.19 What are the bonding requirements for a site license?  
3273.20 When will BLM release my bond?  
3273.21 What are my obligations under the site license?  
3273.22 How long will my site license remain in effect?  
3273.23 May I renew my site license?  
3273.24 When may BLM terminate my site license?  
3273.25 When may I relinquish my site license?  
3273.26 When may I assign or transfer my site license?

## Bureau of Land Management, Interior

## § 3200.1

### Subpart 3274—Applying for and Obtaining a Commercial Use Permit

- 3274.10 Do I need a commercial use permit to start commercial operations?
- 3274.11 What must I give BLM to approve my commercial use permit application?
- 3274.12 How will BLM review my commercial use permit application?
- 3274.13 May I get a permit even if I cannot currently demonstrate I can operate within required standards?

### Subpart 3275—Conducting Utilization Operations

- 3275.10 How do I change my operations if I have an approved facility construction or commercial use permit?
- 3275.11 What are a facility operator's obligations?
- 3275.12 What environmental and safety requirements apply to facility operations?
- 3275.13 How must the facility operator measure the geothermal resources?
- 3275.14 What aspects of my geothermal operations must I measure?
- 3275.15 How accurately must I measure my production and utilization?
- 3275.16 What standards apply to installing and maintaining meters?
- 3275.17 What must I do if I find an error in a meter?
- 3275.18 May BLM require me to test for by-products associated with geothermal resource production?
- 3275.19 How do I apply to commingle production?
- 3275.20 What will BLM do if I waste geothermal resources?
- 3275.21 May BLM order me to drill and produce wells on my lease?

### Subpart 3276—Reports: Utilization Operations

- 3276.10 What are the reporting requirements for facility and lease operations involving Federal geothermal resources?
- 3276.11 What information must I include for each well in the monthly report of well operations?
- 3276.12 What information must I give BLM in the monthly report for facility operations?
- 3276.13 What additional information must I give BLM in the monthly report for flash and dry steam facilities?
- 3276.14 What information must I give BLM in the monthly report for direct use facilities?
- 3276.15 How must I notify BLM of accidents occurring at my utilization facility?

### Subpart 3277—Inspections, Enforcement, and Noncompliance

- 3277.10 When will BLM inspect my operations?
- 3277.11 What records must I keep available for inspection?
- 3277.12 What will BLM do if I do not comply with all BLM requirements pertaining to utilization operations?

### Subpart 3278—Confidential, Proprietary Information

- 3278.10 When will BLM disclose information I submit under these regulations?
- 3278.11 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?
- 3278.12 How long will information I give BLM remain confidential or proprietary?

### Subpart 3279—Utilization Relief and Appeals

- 3279.10 When may I request a variance from BLM requirements pertaining to utilization operations?
- 3279.11 How may I appeal a BLM decision regarding my utilization operations?

AUTHORITY: 30 U.S.C. 1001–1028; 43 U.S.C. 1701 *et seq.*; and Pub. L. 109–58.

SOURCE: 72 FR 24400, May 2, 2007, unless otherwise noted.

## Subpart 3200—Geothermal Resource Leasing

### § 3200.1 Definitions.

For purposes of this part and part 3280:

*Acquired lands* means lands or mineral estates that the United States obtained by deed through purchase, gift, condemnation or other legal process.

*Act* means the Geothermal Steam Act of 1970, as amended (30 U.S.C. 1001 *et seq.*).

*Additional extension* means the period of years added to the primary term of a lease beyond the first 10 years and subsequent 5-year initial extension of a geothermal lease. The additional extension may not exceed 5 years.

*Byproducts* are minerals (exclusive of oil, hydrocarbon gas, and helium), found in solution or in association with geothermal steam, that no person would extract and produce by themselves because they are worth less than

75 percent of the value of the geothermal steam or because extraction and production would be too difficult.

*Casual use* means activities that ordinarily lead to no significant disturbance of Federal lands, resources, or improvements.

*Commercial operation* means delivering Federal geothermal resources, or electricity or other benefits derived from those resources, for sale. This term also includes delivering resources to the utilization point, if you are utilizing Federal geothermal resources for your own benefit and not selling energy to another entity.

*Commercial production* means production of geothermal resources when the economic benefits from the production are greater than the cost of production.

*Commercial production or generation of electricity* means generation of electricity that is sold or is subject to sale, including the electricity or energy that is reasonably required to produce the resource used in production of electricity for sale or to convert the resource into electrical energy for sale.

*Commercial quantities* means either:

(1) For production from a lease, a sufficient volume (in terms of flow and temperature) of the resource to provide a reasonable return after you meet all costs of production; or

(2) For production from a unit, a sufficient volume (in terms of flow and temperature) of the resource to provide a reasonable return after you meet all costs of drilling and production.

*Commercial use permit* means BLM authorization for commercially operating a utilization facility and/or utilizing Federal geothermal resources.

*Development or drilling contract* means a BLM-approved agreement between one or more lessees and one or more entities that makes resource exploration more efficient and protects the public interest.

*Direct use* means utilization of geothermal resources for commercial, residential, agricultural, public facilities, or other energy needs other than the commercial production or generation of electricity. Direct use may occur under either a regular geothermal lease or a direct use lease.

*Direct use lease* means a lease issued noncompetitively in an area BLM designates as available exclusively for:

(1) Direct use of geothermal resources, without sale; and

(2) Purposes other than commercial generation of electricity.

*Exploration operations* means any activity relating to the search for evidence of geothermal resources, where you are physically present on the land and your activities may cause damage to those lands. Exploration operations include, but are not limited to, geophysical operations, drilling temperature gradient wells, drilling holes used for explosive charges for seismic exploration, core drilling or any other drilling method, provided the well is not used for geothermal resource production. It also includes related construction of roads and trails, and cross-country transit by vehicles over public land. Exploration operations do not include the direct testing of geothermal resources or the production or utilization of geothermal resources.

*Facility construction permit* means BLM permission to build and test a utilization facility.

*Facility operator* means the person receiving BLM authorization to site, construct, test, and/or operate a utilization facility. A facility operator may be a lessee, a unit operator, or a third party.

*Geothermal drilling permit* means BLM written permission to drill for and test Federal geothermal resources.

*Geothermal exploration permit* means BLM written permission to conduct only geothermal exploration operations and associated surface disturbance activities under an approved Notice of Intent to Conduct Geothermal Resource Exploration Operations, and includes any necessary conditions BLM imposes.

*Geothermal resources operational order* means a formal, numbered order, issued by BLM, that implements or enforces the regulations in this part.

*Geothermal steam and associated geothermal resources* means:

(1) All products of geothermal processes, including indigenous steam, hot water, and hot brines;

(2) Steam and other gases, hot water, and hot brines resulting from water,

## Bureau of Land Management, Interior

## § 3200.1

gas, or other fluids artificially introduced into geothermal formations;

(3) Heat or other associated energy found in geothermal formations; and

(4) Any byproducts.

*Gross proceeds* means gross proceeds as defined by the Minerals Management Service at 30 CFR 206.351.

*Initial extension* means a period of years, no longer than 5 years, added to the primary term of a geothermal lease beyond the first 10 years of the lease, provided certain lease obligations are met.

*Interest* means ownership in a lease of all or a portion of the record title or operating rights.

*Known geothermal resource area (KGRA)* means an area where BLM determines that persons knowledgeable in geothermal development would spend money to develop geothermal resources.

*Lessee* means a person holding record title interest in a geothermal lease issued by BLM.

*MMS* means the Minerals Management Service of the Department of the Interior.

*Notice to Lessees (NTL)* means a written notice issued by BLM that implements the regulations in this part, part 3280, or geothermal resource operational orders, and provides more specific instructions on geothermal issues within a state, district, or field office. Notices to Lessees may be obtained by contacting the BLM State Office that issued the NTL.

*Operating rights (working interest)* means any interest held in a lease with the right to explore for, develop, and produce leased substances.

*Operating rights owner* means a person who holds operating rights in a lease. A lessee is an operating rights owner if the lessee did not transfer all of its operating rights. An operator may or may not own operating rights.

*Operations plan, or plan of operations* means a plan which fully describes the location of proposed drill pad, access roads and other facilities related to the drilling and testing of Federal geothermal resources, and includes measures for environmental and other resources protection and mitigation.

*Operator* means any person who has taken responsibility in writing for the operations conducted on leased lands.

*Person* means an individual, firm, corporation, association, partnership, trust, municipality, consortium, or joint venture.

*Primary term* means the first 10 years of a lease, not including any periods of suspension.

*Produced or utilized in commercial quantities* means the completion of a well that:

(1) Produces geothermal resources in commercial quantities; or

(2) Is capable of producing geothermal resources in commercial quantities so long as BLM determines that diligent efforts are being made toward the utilization of the geothermal resource.

*Public lands* means the same as defined in 43 U.S.C. 1702(e).

*Record title* means legal ownership of a geothermal lease established in BLM's records.

*Relinquishment* means the lessee's voluntary action to end the lease in whole or in part.

*Secretary* means the Secretary of the Interior or the Secretary's delegate.

*Site license* means BLM's written authorization to site a utilization facility on leased Federal lands.

*Stipulation* means additional conditions BLM attaches to a lease or permit.

*Sublease* means the lessee's conveyance of its interests in a lease to an operating rights owner. A sublessee is responsible for complying with all terms, conditions, and stipulations of the lease.

*Subsequent well operations* are those operations done to a well after it has been drilled. Examples of subsequent well operations include: cleaning the well out, surveying it, performing well tests, chemical stimulation, running a liner or another casing string, repairing existing casing, or converting the well from a producer to an injector or vice versa.

*Sundry notice* is your written request to perform work not covered by another type of permit, or to change operations in your previously approved permit.

### § 3200.3

*Surface management agency* means any Federal agency, other than BLM, that is responsible for managing the surface overlying Federally-owned minerals.

*Temperature gradient well* means a well authorized under a geothermal exploration permit drilled in order to obtain information on the change in temperature over the depth of the well.

*Transfer* means any conveyance of an interest in a lease by assignment, sublease, or otherwise.

*Unit agreement* means an agreement to explore for, produce and utilize separately-owned interests in geothermal resources as a single consolidated unit. A unit agreement defines how costs and benefits will be allocated among the holders of interest in the unit area.

*Unit area* means all tracts committed to an approved unit agreement.

*Unit operator* means the person who has stated in writing to BLM that the interest owners of the committed leases have designated it as operator of the unit area.

*Unitized substances* means geothermal resources recovered from lands committed to a unit agreement.

*Utilization Plan or plan of utilization* means a plan which fully describes the utilization facility, including measures for environmental protection and mitigation.

*Waste* means:

(1) Physical waste, including refuse; or

(2) Improper use or unnecessary dissipation of geothermal resources through inefficient drilling, production, transmission, or utilization.

### § 3200.3 Changes in agency duties.

There are many leases and agreements currently in effect, and that will remain in effect, involving Federal geothermal resources leases that specifically refer to the United States Geological Survey, USGS, Minerals Management Service, MMS, or Conservation Division. These leases and agreements may also specifically refer to various officers such as Supervisor, Conservation Manager, Deputy Conservation Manager, Minerals Manager, and Deputy Minerals Manager. Those references must now be read to mean either the Bureau of Land Management

### 43 CFR Ch. II (10–1–08 Edition)

or the Minerals Management Service, as appropriate. In addition, many leases and agreements specifically refer to 30 CFR part 270 or a specific section of that part. Effective December 3, 1982, references in such leases and agreements to 30 CFR part 270 should be read as references to this part 3200, which is the successor regulation to 30 CFR part 270.

### § 3200.4 What requirements must I comply with when taking any actions or conducting any operations under this part?

When you are taking any actions or conducting any operations under this part, you must comply with:

- (a) The Act and the regulations of this part;
- (b) Geothermal resource operational orders;
- (c) Notices to lessees;
- (d) Lease terms and stipulations;
- (e) Approved plans and permits;
- (f) Conditions of approval;
- (g) Verbal orders from BLM that will be confirmed in writing;
- (h) Other instructions from BLM; and
- (i) Any other applicable laws and regulations.

### § 3200.5 What are my rights of appeal?

(a) If you are adversely affected by a BLM decision under this part, you may appeal that decision under parts 4 and 1840 of this title.

(b) All BLM decisions or approvals under this part are immediately effective and remain in effect while appeals are pending unless a stay is granted in accordance with § 4.21(b) of this title.

### § 3200.6 What types of geothermal leases will BLM issue?

BLM will issue two types of geothermal leases:

(a) Geothermal leases (competitively issued under subpart 3203 or non-competitively issued under subpart 3204) which may be used for any type of geothermal use, such as commercial generation of electricity or direct use of the resource.

(b) Direct use leases (issued under subpart 3205).

**§ 3200.7 What regulations apply to geothermal leases issued before August 8, 2005?**

(a) *General applicability.* (1) Leases issued before August 8, 2005, are subject to this part and part 3280, except that such leases are subject to the BLM regulations in effect on August 8, 2005 (43 CFR parts 3200 and 3280 (2004)), with regard to regulatory provisions relating to royalties, minimum royalties, rentals, primary term and lease extensions, diligence and annual work requirements, and renewals.

(2) The lessee of a lease issued before August 8, 2005, may elect to be subject to all of the regulations in this part and part 3280, without regard to the exceptions in paragraph (a)(1) of this section. Such an election must occur no later than December 1, 2008. Any such election as it pertains to lease terms relating to royalty rates must be made under the royalty rate conversion provisions of subpart 3212. A lessee must obtain a royalty conversion under subpart 3212 to make an election under this paragraph effective.

(b) *Royalty rate conversion and production incentives.* The lessee of a lease issued before August 8, 2005, may:

(1) Choose to convert lease terms relating to royalty rates under subpart 3212; or

(2) If it does not convert lease terms relating to royalty rates, apply for a production incentive under subpart 3212 (if eligible under that subpart).

(c) *Two year extension.* The lessee of a lease issued before August 8, 2005, may apply to extend a lease that was within 2 years of the end of its term on August 8, 2005, for up to 2 years to allow achievement of production under the lease or to allow the lease to be included in a producing unit.

**§ 3200.8 What regulations apply to leases issued in response to applications pending on August 8, 2005?**

(a) Any leases issued in response to applications that were pending on August 8, 2005, are subject to this part and part 3280, except that such leases are subject to the BLM regulations in effect on August 8, 2005 (43 CFR parts 3200 and 3280 (2004)), with regard to regulatory provisions relating to royalties, minimum royalties, rentals, pri-

mary term and lease extensions, diligence and annual work requirements, and renewals.

(b)(1) The lessee of a lease issued pursuant to an application that was pending on August 8, 2005, may elect to be subject to all of the regulations in this part and part 3280, without regard to the exceptions in paragraph (a) of this section.

(2) For leases issued on or after August 8, 2005, and before June 1, 2007, an election under paragraph (b)(1) of this section must occur no later than December 1, 2008.

(3) For leases issued on or after June 1, 2007, the lease applicant must make its election under paragraph (b)(1) of this section and notify BLM before the lease is issued.

**Subpart 3201—Available Lands****§ 3201.10 What lands are available for geothermal leasing?**

(a) BLM may issue leases on:

(1) Lands administered by the Department of the Interior, including public and acquired lands not withdrawn from such use;

(2) Lands administered by the Department of Agriculture with its concurrence;

(3) Lands conveyed by the United States where the geothermal resources were reserved to the United States; and

(4) Lands subject to Section 24 of the Federal Power Act, as amended (16 U.S.C. 818), with the concurrence of the Secretary of Energy.

(b) If your activities under your lease or permit might adversely affect a significant thermal feature of a National Park System unit, BLM will include stipulations to protect this thermal feature in your lease or permit. These stipulations will be added, if necessary, when your lease or permit is issued, extended, renewed or modified.

**§ 3201.11 What lands are not available for geothermal leasing?**

BLM will not issue leases for:

(a) Lands where the Secretary has determined that issuing the lease would cause unnecessary or undue degradation of public lands and resources;

## § 3202.10

(b) Lands contained within a unit of the National Park System, or otherwise administered by the National Park Service;

(c) Lands within a National Recreation Area;

(d) Lands where the Secretary determines after notice and comment that geothermal operations, including exploration, development or utilization of lands, are reasonably likely to result in a significant adverse effect on a significant thermal feature within a unit of the National Park System;

(e) Fish hatcheries or wildlife management areas administered by the Secretary;

(f) Indian trust or restricted lands within or outside the boundaries of Indian reservations;

(g) The Island Park Geothermal Area; and

(h) Lands where Section 43 of the Mineral Leasing Act (30 U.S.C. 226-3) prohibits geothermal leasing, including:

(1) Wilderness areas or wilderness study areas administered by BLM or other surface management agencies;

(2) Lands designated by Congress as wilderness study areas, except where the statute designating the study area specifically allows leasing to continue; and

(3) Lands within areas allocated for wilderness or further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document 96-119), unless such lands are allocated to uses other than wilderness by a land and resource management plan or are released to uses other than wilderness by an Act of Congress.

### Subpart 3202—Lessee Qualifications

#### § 3202.10 Who may hold a geothermal lease?

You may hold a geothermal lease if you are:

(a) A United States citizen who is at least 18 years old;

(b) An association of United States citizens, including a partnership;

(c) A corporation organized under the laws of the United States, any state or the District of Columbia; or

(d) A domestic governmental unit.

## 43 CFR Ch. II (10-1-08 Edition)

#### § 3202.11 Must I prove I am qualified to hold a lease when filing an application to lease?

You do not need to submit proof that you are qualified to hold a lease under § 3202.10 at the time you submit an application to lease, but BLM may ask you in writing for information about your qualifications at any time. You must submit the additional information to BLM within 30 days after you receive the request.

#### § 3202.12 Are other persons allowed to act on my behalf to file an application to lease?

Another person may act on your behalf to file an application to lease. The person acting for you must be qualified to hold a lease under § 3202.10, and must do the following:

(a) Sign the application;

(b) State his or her title;

(c) Identify you as the person he or she is acting for; and

(d) Provide written proof of his or her qualifications and authority to take such action, if BLM requests it.

#### § 3202.13 What happens if the applicant dies before the lease is issued?

If the applicant dies before the lease is issued, BLM will issue the lease to either the administrator or executor of the estate or the heirs. If the heirs are minors, BLM will issue the lease to either a legal guardian or trustee, provided that the legal guardian or trustee is qualified to hold a lease under § 3202.10.

### Subpart 3203—Competitive Leasing

#### § 3203.5 What is the general process for obtaining a geothermal lease?

(a) The competitive geothermal leasing process consists of the following steps:

(1)(i) Entities interested in geothermal development nominate lands by submitting to BLM descriptions of lands they seek to be included in a lease sale; or

(ii) BLM may include land in a competitive lease sale on its own initiative.

## Bureau of Land Management, Interior

## § 3203.14

(2) BLM provides notice of the parcels to be offered, and the time, location, and process for participating in the lease sale.

(3) BLM holds the lease sale and offers leases to the successful bidder.

(b) BLM will issue geothermal leases to the highest responsible qualified bidder after a competitive leasing process, except for situations where non-competitive leasing is allowed under subparts 3204 and 3205, which include:

(1) Lease applications pending on August 8, 2005;

(2) Lands for which no bid was received in a competitive lease sale;

(3) Direct use lease applications for which no competitive interest exists; and

(4) Lands subject to mining claims.

### § 3203.10 How are lands included in a competitive sale?

(a) A qualified company or individual may nominate lands for competitive sale by submitting an applicable BLM nomination form.

(b) A nomination is a description of lands that you seek to be included in one lease. Each nomination may not exceed 5,120 acres, unless the area to be leased includes an irregular subdivision. Your nomination must provide a description of the lands nominated by legal land description.

(1) For lands surveyed under the public land rectangular survey system, describe the lands to the nearest aliquot part within the legal subdivision, section, township, and range;

(2) For unsurveyed lands, describe the lands by metes and bounds, giving courses and distances, and tie this information to an official corner of the public land surveys, or to a prominent topographic feature;

(3) For approved protracted surveys, include an entire section, township, and range. Do not divide protracted sections into aliquot parts;

(4) For unsurveyed lands in Louisiana and Alaska that have water boundaries, discuss the description with BLM before submission; and

(5) For fractional interest lands, identify the United States mineral ownership by percentage.

(c) You may submit more than one nomination, as long as each nomination

separately satisfies the requirements of paragraph (b) of this section and includes the filing fee specified in § 3203.12.

(d) BLM may reconfigure lands to be included in each parcel offered for sale.

(e) BLM may include land in a lease sale on its own initiative.

### § 3203.11 Under what circumstances may parcels be offered as a block for competitive sale?

(a) As part of your nomination, you may request that lands be offered as a block at competitive sale by:

(1) Specifying that the lands requested will be associated with a project or unit; and

(2) Including information to support your request. BLM may require that you provide additional information.

(b) BLM may offer parcels as a block in response to a request under paragraph (a) of this section or on its own initiative. BLM will offer parcels as a block only if information is available to BLM indicating that a geothermal resource that could be produced as one unit can reasonably be expected to underlie such parcels.

### § 3203.12 What fees must I pay to nominate lands?

Submit with your nomination a filing fee for nominations of lands as found in the fee schedule in § 3000.12 of this chapter.

### § 3203.13 How often will BLM hold a competitive lease sale?

BLM will hold a competitive lease sale at least once every 2 years for lands available for leasing in a state that has nominations pending. A sale may include lands in more than one state. BLM may hold a competitive lease sale in a state that has no nominations pending.

### § 3203.14 How will BLM provide notice of a competitive lease sale?

(a) The lands available for competitive lease sale under this subpart will be described in a Notice of Competitive Geothermal Lease Sale, which will include:

(1) The lease sale format and procedures;

### **§ 3203.15**

(2) The time, date, and place of the lease sale; and

(3) Stipulations applicable to each parcel.

(b) At least 45 days before conducting a competitive lease sale, BLM will post the Notice in the BLM office having jurisdiction over the lands to be offered, and make it available for posting to surface managing agencies having jurisdiction over any of the included lands.

(c) BLM may take other measures of notification for the competitive sale such as:

(1) Issuing news releases;

(2) Notifying interested parties of the lease sale;

(3) Publishing notice in the newspaper; or

(4) Posting the list of parcels on the Internet.

### **§ 3203.15 How does BLM conduct a competitive lease sale?**

(a) BLM will offer parcels for competitive bidding as specified in the sale notice.

(b) The winning bid will be the highest bid by a qualified bidder.

(c) You may not withdraw a bid. Your bid constitutes a legally binding commitment by you.

(d) BLM will reject all bids and re-offer a parcel if:

(1) BLM determines that the high bidder is not qualified; or

(2) The high bidder fails to make all payments required under § 3203.17.

### **§ 3203.17 How must I make payments if I am the successful bidder?**

(a) You must make payments by personal check, cashier's check, certified check, bank draft, or money order payable to the "Department of the Interior—Bureau of Land Management" or by other means deemed acceptable by BLM.

(b) By the close of official business hours on the day of the sale or such other time as BLM may specify, you must submit for each parcel:

(1) Twenty percent of the bid;

(2) The total amount of the first year's rental; and

(3) The processing fee for competitive lease applications found in the fee schedule in § 3000.12 of this chapter.

### **43 CFR Ch. II (10–1–08 Edition)**

(c) Within 15 calendar days after the last day of the sale, you must submit the balance of the bid to the BLM office conducting the sale.

(d) If you fail to make all payments required under this section, or fail to meet the qualifications in § 3202.10, BLM will revoke acceptance of your bid and keep all money that has been submitted.

### **§ 3203.18 What happens to parcels that receive no bids at a competitive lease sale?**

Lands offered at a competitive lease sale that receive no bids will be available for leasing in accordance with subpart 3204.

## **Subpart 3204—Noncompetitive Leasing Other Than Direct Use Leases**

### **§ 3204.5 How can I obtain a noncompetitive lease?**

(a) Lands offered at a competitive lease sale that receive no bids will be available for noncompetitive leasing for a 2-year period beginning the first business day following the sale.

(b) You may obtain a noncompetitive lease for lands available exclusively for direct use of geothermal resources, under subpart 3205.

(c) The holder of a mining claim may obtain a noncompetitive lease for lands subject to the mining claim under § 3204.12.

(d) If your lease application was pending on August 8, 2005, you may obtain a noncompetitive lease under the leasing process in effect on that date, unless you notify BLM in writing that you elect for the lease application to be subject to the competitive leasing process specified in this subpart. If you elect for your lease application to be subject to the competitive leasing process in this subpart, your application will be considered a nomination for future competitive lease offerings for the lands in your application. An election made under this paragraph is not the same as an election made under § 3200.8.

## Bureau of Land Management, Interior

## § 3204.15

### **§ 3204.10 What payment must I submit with my noncompetitive lease application?**

Submit the processing fee for noncompetitive lease applications found in the fee schedule in § 3000.12 of this chapter for each lease application, and an advance rent in the amount of \$1 per acre (or fraction of an acre). BLM will refund the advance rent if we reject the lease application or if you withdraw the lease application before BLM accepts it. If the advance rental payment you send is less than 90 percent of the correct amount, BLM will reject the lease application.

### **§ 3204.11 How may I acquire a noncompetitive lease for lands that were not sold at a competitive lease sale?**

(a) For a 2-year period following a competitive lease sale, you may file a noncompetitive lease application for lands on which no bids were received, on a form available from BLM. Submit 2 executed copies of the applicable form to BLM. At least one form must have an original signature. We will accept only exact copies of the form on one 2-sided page.

(1) For 30 days after the competitive geothermal lease sale, noncompetitive applications will be accepted only for parcels as configured in the Notice of Competitive Geothermal Lease Sale.

(2) Subsequent to the 30-day period specified in paragraph (a)(1) of this section, you may file a noncompetitive application for any available lands covered by the competitive lease sale.

(b)(1) All applications for a particular parcel under this section will be considered simultaneously filed if received in the proper BLM office any time during the first business day following the competitive lease sale. You may submit only one application per parcel. An application will not be available for public inspection the day it is filed. BLM will randomly select an application among those accepted on the first business day to receive a lease offer.

(2) Subsequent to the first business day following the competitive lease sale, the first qualified applicant to submit an application will be offered the lease. If BLM receives simultaneous applications as to date and time

for overlapping lands, BLM will randomly select one to receive a lease offer.

### **§ 3204.12 How may I acquire a noncompetitive lease for lands subject to a mining claim?**

If you hold a mining claim for which you have a current approved plan of operations, you may file a noncompetitive lease application for lands within the mining claim, on a form available from BLM. Submit two (2) executed copies of the applicable form to BLM, together with documentation of mining claim ownership and the current approved plan of operations for the mine. At least one form must have an original signature. We will accept only exact copies of the form on one 2-sided page.

### **§ 3204.13 How will BLM process noncompetitive lease applications pending on August 8, 2005?**

Noncompetitive lease applications pending on August 8, 2005, will be processed under policies and procedures existing on that date unless the applicant notifies BLM in writing that it elects for the lease application to be subject to the competitive leasing process specified in this subpart, in which case the application will be considered a nomination for future competitive lease offerings for the lands in the application.

### **§ 3204.14 May I amend my application for a noncompetitive lease?**

You may amend your application for a noncompetitive lease at any time before we issue the lease, provided your amended application meets the requirements in this subpart and does not add lands not included in the original application. To add lands, you must file a new application.

### **§ 3204.15 May I withdraw my application for a noncompetitive lease?**

During the 30-day period after the competitive lease sale, BLM will only accept a withdrawal of the entire application. Following that 30-day period, you may withdraw your noncompetitive lease application in whole or in part at any time before BLM issues the lease. If a partial withdrawal causes

## § 3205.6

your lease application to contain less than the minimum acreage required under § 3206.12, BLM will reject the application.

### Subpart 3205—Direct Use Leasing

#### § 3205.6 When may BLM issue a direct use lease to an applicant?

(a) BLM may issue a direct use lease to an applicant if the following conditions are satisfied:

(1) The lands included in the lease application are open for geothermal leasing;

(2) BLM determines that the lands are appropriate for exclusive direct use operations, without sale, for purposes other than commercial generation of electricity;

(3) The acreage covered by the lease application is not greater than the quantity of acreage that is reasonably necessary for the proposed use;

(4) BLM has published a notice of the land proposed for a direct use lease for 90 days before issuing the lease;

(5) During the 90-day period beginning on the date of publication, BLM did not receive any nomination to include the lands in the next competitive lease sale following that period for which the lands would be eligible;

(6) BLM determines there is no competitive interest in the resource; and

(7) The applicant is the first qualified applicant.

(b) If BLM determines that the land for which an applicant has applied under this subpart is open for geothermal leasing and is appropriate only for exclusive direct use operations, but determines that there is competitive interest in the resource, it will include the land in a competitive lease sale with lease stipulations limiting operations to exclusive direct use.

#### § 3205.7 How much acreage should I apply for in a direct use lease?

You should apply for only the amount of acreage that is necessary for your intended operation. A direct use lease may not cover more than the quantity of acreage that BLM determines is reasonably necessary for the proposed use. In no case may a direct use lease exceed 5,120 acres, unless the

## 43 CFR Ch. II (10–1–08 Edition)

area to be leased includes an irregular subdivision.

#### § 3205.10 How do I obtain a direct use lease?

(a) You may file an application for a direct use lease for any lands on which BLM manages the geothermal resources, on a form available from BLM. You may not sell the geothermal resource and you may not use it for the commercial generation of electricity.

(b) In your application, you must also provide information that will allow BLM to determine how much acreage is reasonably necessary for your proposed use, including:

(1) A description of all anticipated structures, facilities, wells, and pipelines including their size, location, function, and associated surface disturbance;

(2) A description of the utilization process;

(3) A description and analysis of anticipated reservoir production, injection, and characteristics to the extent required by BLM; and

(4) Any additional information or data that we may require.

(c) Submit with your application the nonrefundable processing fee for non-competitive lease applications found in the fee schedule in § 3000.12 of this chapter for each direct use lease application.

#### § 3205.12 How will BLM respond to direct use lease applications on lands managed by another agency?

BLM will respond to a direct use lease application on lands managed by another surface management agency by forwarding the application to that agency for its review. If that agency consents to lease issuance and recommends that the lands are appropriate for direct use operations, without sale, for purposes other than commercial generation of electricity, BLM will consider that consent and recommendation in determining whether to issue the lease. BLM may not issue a lease without the consent of the surface management agency.

## Bureau of Land Management, Interior

## § 3206.14

### § 3205.13 May I withdraw my application for a direct use lease?

You may withdraw your application for a direct use lease any time before issuance of a lease.

### § 3205.14 May I amend my application for a direct use lease?

You may amend your application for a direct use lease at any time before we issue the lease, provided your amended application meets the requirements in this subpart and does not add lands. To add lands, you must file a new application.

### § 3205.15 How will I know whether my direct use lease will be issued?

(a) If BLM decides to issue you a direct use lease, it will do so in accordance with this subpart and subpart 3206.

(b) If BLM decides to deny your application for a direct use lease, it will advise you of its decision in writing.

## Subpart 3206—Lease Issuance

### § 3206.10 What must I do for BLM to issue a lease?

Before BLM issues any lease, you must:

- (a) Accept all lease stipulations;
- (b) Make all required payments to BLM;
- (c) Sign a unit joinder or waiver, if applicable; and
- (d) Comply with the maximum limit on acreage holdings (see §§ 3206.12 and 3206.16).

### § 3206.11 What must BLM do before issuing a lease?

For all leases, BLM must:

- (a) Determine that the land is available; and
- (b) Determine that your lease development will not have a significant adverse impact on any significant thermal feature within any of the following units of the National Park System:
  - (1) Mount Rainier National Park;
  - (2) Crater Lake National Park;
  - (3) Yellowstone National Park;
  - (4) John D. Rockefeller, Jr. Memorial Parkway;
  - (5) Bering Land Bridge National Preserve;

(6) Gates of the Arctic National Park and Preserve;

(7) Katmai National Park;

(8) Aniakchak National Monument and Preserve;

(9) Wrangell-St. Elias National Park and Preserve;

(10) Lake Clark National Park and Preserve;

(11) Hot Springs National Park;

(12) Big Bend National Park (including that portion of the Rio Grande National Wild Scenic River within the boundaries of Big Bend National Park);

(13) Lassen Volcanic National Park;

(14) Hawaii Volcanoes National Park;

(15) Haleakala National Park;

(16) Lake Mead National Recreation Area; and

(17) Any other significant thermal features within National Park System units that the Secretary may add to the list of these features, in accordance with 30 U.S.C. 1026(a)(3).

### § 3206.12 What are the minimum and maximum lease sizes?

Other than for direct use leases (the size for which is addressed in § 3205.7), the smallest lease we will issue is 640 acres, or all lands available for leasing in the section, whichever is less. The largest lease we will issue is 5,120 acres, unless the area to be leased includes an irregular subdivision. A lease must embrace a reasonably compact area.

### § 3206.13 What is the maximum acreage I may hold?

You may not directly or indirectly hold more than 51,200 acres in any one state.

### § 3206.14 How does BLM compute acreage holdings?

BLM computes acreage holdings as follows:

(a) If you own an undivided lease interest, your acreage holdings include the total lease acreage:

(b) If you own stock in a corporation or a beneficial interest in an association which holds a geothermal lease, your acreage holdings will include your proportionate part of the corporation's or association's share of the total lease acreage. This paragraph applies only if you own more than 10 percent of the

## § 3206.15

corporate stock or a beneficial interest in the association; and

(c) If you own a lease interest, you will be charged with the proportionate share of the total lease acreage based on your share of the lease ownership. You will not be charged twice for the same acreage where you own both record title and operating rights for the lease. For example, if you own 50 percent record title interest in a 640 acre lease and 25 percent operating rights, you are charged with 320 acres.

### **§ 3206.15 How will BLM charge acreage holdings if the United States owns only a fractional interest in the geothermal resources in a lease?**

Where the United States owns only a fractional interest in the geothermal resources of the lands in a lease, BLM will only charge you with the part owned by the United States as acreage holdings. For example, if you own 100 percent of record title in a 100 acre lease, and the United States owns 50 percent of the mineral estate, you are charged with 50 acres.

### **§ 3206.16 Is there any acreage which is not chargeable?**

BLM does not count leased acreage included in any approved unit agreement, drilling contract, or development contract as part of your total state acreage holdings.

### **§ 3206.17 What will BLM do if my holdings exceed the maximum acreage limits?**

BLM will notify you in writing if your acreage holdings exceed the limit in § 3206.13. You have 90 days from the date you receive the notice to reduce your holdings to within the limit. If you do not comply, BLM will cancel your leases, beginning with the lease most recently issued, until your holdings are within the limit.

### **§ 3206.18 When will BLM issue my lease?**

BLM issues your lease the day we sign it. Your lease goes into effect the first day of the next month after the issuance date.

## 43 CFR Ch. II (10–1–08 Edition)

### **Subpart 3207—Lease Terms and Extensions**

#### **§ 3207.5 What terms (time periods) apply to my lease?**

Your lease may include a number of different time periods. Not every time period applies to every lease. These periods include:

- (a) A primary term consisting of:
  - (1) Ten years;
  - (2) An initial extension of the primary term for up to 5 years;
  - (3) An additional extension of the primary term for up to 5 years;
- (b) A drilling extension of 5 years under § 3207.14;
- (c) A production extension of up to 35 years; and
- (d) A renewal period of up to 55 years.

#### **§ 3207.10 What is the primary term of my lease?**

- (a) Leases have a primary term of 10 years.
- (b) BLM will extend the primary term for 5 years if:
  - (1) By the end of the 10th year of the primary term in paragraph (a), you have satisfied the requirements in § 3207.11; and
  - (2) At the end of each year after the 10th year of the lease, you have satisfied the requirements in § 3207.12(a) or (d) for that year.
- (c) BLM will extend the primary term for 5 additional years if:
  - (1) You satisfied the requirements of § 3207.12(b) or (d); and
  - (2) At the end of each year of the second 5-year extension you satisfy the requirements in § 3207.12(c) or (d) for that year.
- (d) If you do not satisfy the annual requirements during the initial or additional extension of your primary term, your lease terminates or expires.

#### **§ 3207.11 What work am I required to perform during the first 10 years of my lease for BLM to grant the initial extension of the primary term of my lease?**

- (a) By the end of the 10th year, you must expend a minimum of \$40 per acre in development activities that provide additional geologic or reservoir information, such as:

## Bureau of Land Management, Interior

## § 3207.12

(1) Geologic investigation and analysis;

(2) Drilling temperature gradient wells;

(3) Core drilling;

(4) Geochemical or geophysical surveys;

(5) Drilling production or injection wells;

(6) Reservoir testing; or

(7) Other activities approved by BLM.

(b) In lieu of the work requirement in paragraph (a) of this section, you may:

(1) Make a payment to BLM equivalent to the required work expenditure such that the total of the payment and the value of the work you perform equals \$40 per acre (or fraction thereof) of land included in your lease; or

(2) Submit documentation to BLM that you have produced or utilized geothermal resources in commercial quantities.

(c) Prior to the end of the 10th year of the primary term, you must submit detailed information to BLM demonstrating that you have complied with paragraph (a) or (b) of this section. Describe the activities by type, location, date(s) conducted, and the dollar amount spent on those operations. Include all geologic information obtained from your activities in your report. Submit additional information that BLM requires to determine compliance within the timeframe that we specify. We must approve the type of work done and the expenditures claimed in your report before we can credit them toward your requirements.

(d) If you do not perform development activities, make payments, or document production or utilization as required by this section, your lease will expire at the end of the 10-year primary term.

(e) If you complied with paragraph (c) of this section, but BLM has not determined by the end of the 10th year whether you have complied with the requirements of paragraph (a) or (b) of this section, upon request we will suspend your lease effective immediately before its expiration in order to determine your compliance. If we determine that you have complied, we will lift the suspension and grant the first 5-year extension of the primary term effective on the first day of the month following

our determination of compliance. If we determine that you have not complied, we will terminate the suspension and your lease will expire upon the date of the termination of the suspension.

(f) Every 3 calendar years the dollar amount of the work requirements and the amount to be paid in lieu of such work required by this section will automatically be updated. The update will be based on the change in the Implicit Price Deflator-Gross Domestic Product for those 3 years.

### **§ 3207.12 What work am I required to perform each year for BLM to continue the initial and additional extensions of the primary term of my lease?**

(a) To continue the initial extension of the primary term of your lease, in each of lease years 11, 12, 13, and 14, you must expend a minimum of \$15 per acre (or fraction thereof) per year in development activities that establish a geothermal potential or confirm the existence of producible geothermal resources. Such activities include, but are not limited to:

(1) Geologic investigation and analysis;

(2) Drilling temperature gradient wells;

(3) Core drilling;

(4) Geochemical or geophysical surveys;

(5) Drilling production or injection wells;

(6) Reservoir testing; or

(7) Other activities approved by BLM.

(b) For BLM to grant the additional extension of the primary term of your lease, in year 15 you must expend a minimum of \$15 per acre (or fraction thereof) in development activities that provide additional geologic or reservoir information, such as those described in paragraph (a) of this section.

(c) To continue the additional extension of the primary term of your lease, in each of lease years 16, 17, 18, and 19, you must expend a minimum of \$25 per acre (or fraction thereof) per year in development activities that provide additional geologic or reservoir information, such as those described in paragraph (a) of this section.

(d) In lieu of the work requirements in paragraphs (a), (b), and (c) of this section, you may:

### § 3207.13

(1) Submit documentation to BLM that you have produced or utilized geothermal resources in commercial quantities; or

(2) Make a payment to BLM equivalent to the required annual work expenditure such that the total of the payment and the value of the work you perform equals \$15 or \$25 per acre per year of land included in your lease, as applicable. BLM may limit the number of years that it will accept such payments if it determines that further payments in lieu of the work requirements would impair achievement of diligent development of the geothermal resources.

(e) Under paragraph (a) or paragraph (b) of this section, if you expend an amount greater than the amount specified, you may apply any payment in excess of the specified amount to any subsequent year within the applicable 5-year extension of the primary term. An excess payment during the first 5-year extension period may not be applied to any year within the second 5-year extension period.

(f) You must submit information to BLM showing that you have complied with the applicable requirements in this section no later than:

(1) 60 days after the end of years 11, 12, 13, and 14;

(2) 60 days before the end of year 15; and

(3) 60 days after the end of years 16, 17, 18, and 19.

(g) In your submission, describe your activities by type, location, date(s) conducted, and the dollar amount spent on those operations. Include all geologic information obtained from your activities in your report. We must approve the type of work done and the expenditures claimed in your report before we can credit them toward your requirements. We will notify you if you have not met the requirements.

(h) If you do not comply with the requirements of this section in any year of a 5-year extension of the primary term, BLM will terminate your lease at the end of that year unless you qualify for a drilling extension under § 3207.13.

(i) Every three calendar years the dollar amount of the work requirements and the amount to be paid in lieu of such work required by this sec-

### 43 CFR Ch. II (10–1–08 Edition)

tion will automatically be updated. The update will be based on the change in the Implicit Price Deflator-Gross Domestic Product for those three years.

#### **§ 3207.13 Must I comply with the requirements of §§ 3207.11 and 3207.12 when my lease overlies a mining claim?**

(a) BLM will exempt you from complying with the requirements of §§ 3207.11 and 3207.12 when you demonstrate to BLM that:

(1) The mining claim has a plan of operations approved by the appropriate Federal land management agency; and

(2) Your development of the geothermal resource on the lease would interfere with the mining operations.

(b) The exemption provided under paragraph (a) of this section expires upon termination of the mining operations.

#### **§ 3207.14 How do I qualify for a drilling extension?**

(a) BLM will extend your lease for 5 years under a drilling extension if at the end of the 10th year or any subsequent year of the initial or additional extension of the primary term you:

(1) Have not met the requirements that you must satisfy for BLM to grant or to continue the initial or additional extensions of your primary lease term under § 3207.12, or your lease is in its 20th year;

(2) Commenced drilling a well before the end of such year for the purposes of testing or producing a geothermal reservoir; and

(3) Are diligently drilling to a target that BLM determines is adequate, based on the local geology and type of development you propose.

(b) The drilling extension is effective on the first day following the expiration or termination of the primary term.

(c) At the end of your drilling extension, your lease will expire unless you qualify for a production extension under § 3207.15.

## Bureau of Land Management, Interior

## § 3207.18

### § 3207.15 How do I qualify for a production extension?

(a) BLM will grant a production extension of up to 35 years, if you are producing or utilizing geothermal resources in commercial quantities.

(b) Before granting a production extension, BLM must determine that you:

(1) Have a well that is actually producing geothermal resources in commercial quantities; or

(2)(i) Have completed a well that is capable of producing geothermal resources in commercial quantities; and

(ii) Are making diligent efforts toward utilization of the resource.

(c) To qualify for a production extension under paragraph (b)(2) of this section, unless BLM specifies otherwise you must demonstrate on an annual basis that you are making diligent efforts toward utilization of the resource.

(d) BLM will make the determinations required under paragraphs (b)(1) and (b)(2)(i) of this section based on the information you provide under subparts 3264 and 3276 and any other information that BLM may require you to submit.

(e) For BLM to make the determination required under paragraph (b)(2)(ii) of this section, you must provide BLM with information, such as:

(1) Actions you have taken to identify and define the geothermal resource on your lease;

(2) Actions you have taken to negotiate marketing arrangements, sales contracts, drilling agreements, or financing for electrical generation and transmission projects;

(3) Current economic factors and conditions that would affect the decision of a prudent operator to produce or utilize geothermal resources in commercial quantities on your lease; and

(4) Other actions you have taken, such as obtaining permits, conducting environmental studies, and meeting permit requirements.

(f) Your production extension will begin on the first day of the month following the end of the primary term (including the initial and additional extensions) or the drilling extension.

(g) Your production extension will continue for up to 35 years as long as

the geothermal resource is being produced or utilized in commercial quantities. If you fail to produce or utilize geothermal resources in commercial quantities, BLM will terminate your lease unless you meet the conditions set forth in § 3212.15 or § 3213.19.

### § 3207.16 When may my lease be renewed?

You have a preferential right to renew your lease for a second term of up to 55 years, under such terms and conditions as BLM deems appropriate, if at the end of the production extension you are producing or utilizing geothermal resources in commercial quantities and the lands are not needed for any other purpose. The renewal term will continue for up to 55 years if you produce or utilize geothermal resources in commercial quantities and satisfy other terms and conditions BLM imposes.

### § 3207.17 How is the term of my lease affected by commitment to a unit?

(a) If your lease is committed to a unit agreement and its term would expire before the unit term would, BLM may extend your lease to match the term of the unit. We will do this if unit development has been diligently pursued while your lease is committed to the unit.

(b) To extend the term of a lease committed to a unit, the unit operator must send BLM a request for lease extension at least 60 days before the lease expires showing that unit development has been diligently pursued. BLM may require additional information.

(c) Within 30 days after receiving your complete extension request, BLM will notify the unit operator whether we approve.

### § 3207.18 Can my lease be extended if it is eliminated from a unit?

If your lease is eliminated from a unit under § 3283.6, it is eligible for an extension if it meets the requirements for such extension.

**Subpart 3210—Additional Lease Information**

**§ 3210.10 When does lease segregation occur?**

(a) Lease segregation occurs when:

(1) A portion of a lease is committed to a unit agreement while other portions are not committed; or

(2) Only a portion of a lease remains in a participating area when the unit contracts. The portions of the lease outside the participating area are eliminated from the unit agreement and segregated as of the effective date of the unit contraction.

(b) BLM will assign the original lease serial number to the portion within the agreement. BLM will give the lease portion outside the agreement a new serial number, and the same lease terms as the original lease.

**§ 3210.11 Does a lease segregated from an agreement or plan receive any benefits from unitization of the committed portion of the original lease?**

The new segregated lease stands alone and does not receive any of the benefits provided to the portion committed to the unit. We will not give you an extension for the eliminated portion of the lease based on status of the lands committed to the unit, including production in commercial quantities or the existence of a producible well.

**§ 3210.12 May I consolidate leases?**

BLM may approve your consolidation of two or more adjacent leases that have the same ownership and same lease terms, including expiration dates, if the combined leases do not exceed the size limitations in § 3206.12. We may consolidate leases that have different stipulations if all other lease terms are the same. You must include the processing fee for lease consolidations found in the fee schedule in § 3000.12 of this chapter with your request to consolidate leases.

**§ 3210.13 Who may lease or locate other minerals on the same lands as my geothermal lease?**

Anyone may lease or locate other minerals on the same lands as your

geothermal lease. The United States reserves the ownership of and the right to extract helium, oil, and hydrocarbon gas from all geothermal steam and associated geothermal resources. In addition, BLM allows mineral leasing or location on the same lands that are leased for geothermal resources, provided that operations under the mineral leasing or mining laws do not unreasonably interfere with or endanger your geothermal operations.

**§ 3210.14 May BLM readjust the terms and conditions in my lease?**

(a)(1) Except for rentals and royalties (readjustments of which are addressed in paragraph (b) of this section, BLM may readjust the terms and conditions of your lease 10 years after you begin production of geothermal resources from your lease, and at not less than 10-year intervals thereafter, under the procedures of paragraphs (c), (d), and (e) of this section.

(2) If another Federal agency manages the lands' surface, we will ask that agency to review the related terms and conditions and propose any readjustments. Once BLM and the surface managing agency reach agreement and the surface managing agency approves the proposed readjustment, we will follow the procedures in paragraphs (c), (d), and (e) of this section.

(b) BLM may readjust your lease rentals and royalties at not less than 20-year intervals beginning 35 years after we determine that your lease is producing geothermal resources in commercial quantities. BLM will not increase your rentals or royalties by more than 50 percent over the rental or royalties you paid before the readjustment.

(c) BLM will give you a written proposal to readjust the rentals, royalties, or other terms and conditions of your lease. You will have 30 days after you receive the proposal to file with BLM an objection in writing to the proposed new terms and conditions.

(d) If you do not object in writing or relinquish your lease, you will conclusively be deemed to have agreed to the proposed new terms and conditions. BLM will issue a written decision setting the date that the new terms and conditions become effective as part of

your lease. This decision will be in full force and effect under its own terms, and you are not authorized to appeal the BLM decision to the Office of Hearings and Appeals.

(e)(1) If you file a timely objection in writing, BLM may issue a written decision making the readjusted terms and conditions effective no sooner than 90 days after we receive your objections, unless we reach an agreement with you as to the readjusted terms and conditions of your lease that makes them effective sooner.

(2) If BLM does not reach an agreement with you by 60 days after we receive your objections, then either the lessee or BLM may terminate your lease, upon giving the other party 30 days' notice in writing. A termination under this paragraph does not affect your obligations that accrued under the lease when it was in effect, including those specified in § 3200.4.

**§ 3210.15 What if I appeal BLM's decision to readjust my lease terms?**

If you appeal BLM's decision under § 3210.14(e)(1) to readjust the rentals, royalties, or other terms and conditions of your lease, the decision is effective during the appeal. If you win your appeal and we must change our decision, you will receive a refund or credit for any overpaid rents or royalties.

**§ 3210.16 How must I prevent drainage of geothermal resources from my lease?**

You must prevent the drainage of geothermal resources from your lease by diligently drilling and producing wells that protect the Federal geothermal resource from loss caused by production from other properties.

**§ 3210.17 What will BLM do if I do not protect my lease from drainage?**

BLM will determine the amount of geothermal resources drained from your lease. MMS will bill you for a compensatory royalty based on our findings. This royalty will equal the amount you would have paid for producing those resources. All interest owners in a lease are jointly and severally liable for drainage protection and any compensatory royalties.

**Subpart 3211—Filing and Processing Fees, Rent, Direct Use Fees, and Royalties**

**§ 3211.10 What are the processing and filing fees for leases?**

(a) Processing or filing fees are required for the following actions:

- (1) Nomination of lands for competitive leasing;
- (2) Competitive lease application;
- (3) Noncompetitive lease application (including application for direct use leases);
- (4) Assignment and transfer of record title or operating right;
- (5) Name change, corporate merger, or transfer to heir/devisee;
- (6) Lease consolidation;
- (7) Lease reinstatement;
- (8) Site license application; and
- (9) Assignment or transfer of site license.

(b) The amounts of these fees can be found in § 3000.12 of this chapter.

[72 FR 24400, May 2, 2007, as amended at 72 FR 50887, Sept. 5, 2007]

**§ 3211.11 What are the annual lease rental rates?**

(a) BLM calculates annual rent based on the amount of acreage covered by your lease. To determine lease acreage for this section, round up any partial acreage up to the next whole acre. For example, the annual rent on a 2,456.39 acre lease is calculated based on 2,457 acres.

(b) For leases issued on or after August 8, 2005 (other than leases issued in response to applications that were pending on that date for which no election is made under § 3200.8(b)(1)), and for leases issued before August 8, 2005, for which an election is made under § 3200.7(a)(2), the rental rate is as follows:

(1) If you obtained your lease through a competitive lease sale, then your annual rent is \$2 per acre for the first year, and \$3 per acre for the second through tenth year;

(2) If you obtained your lease noncompetitively, then your annual rent is \$1 per acre for the first 10 years; and

(3) After the tenth year, your annual rent will be \$5 per acre, regardless of whether you obtained your lease

## § 3211.12

through a competitive lease sale or noncompetitively.

(c) For leases issued before August 8, 2005, for which no election is made under § 3200.7(a)(2), and for leases issued in response to applications pending on that date for which no election is made under § 3200.8(b)(1), the rental rate is the rate prescribed in the regulations in effect on August 8, 2005 (43 CFR 3211.10 (2004)).

(d) For leases in which the United States owns only a fractional interest in the geothermal resources, BLM will prorate the rents established in paragraphs (a), (b), and (c) of this section, based on the fractional interest owned by the United States. For example, if the United States owns 50 percent of the geothermal resources in a 640 acre lease, you pay rent based on 320 acres.

### **§ 3211.12 How and where do I pay my rent?**

(a) *First year.* Pay BLM the first year's rent in advance. You may use a personal check, cashier's check, or money order made payable to the Department of the Interior—Bureau of Land Management. You may also make payments by credit card or electronic funds transfer with our prior approval.

(b) *Subsequent years.* For all subsequent years, make your rental payments to MMS. See MMS regulations at 30 CFR part 218.

### **§ 3211.13 When is my annual rental payment due?**

Your rent is always due in advance. MMS must receive your annual rental payment by the anniversary date of the lease each year. See the MMS regulations at 30 CFR part 218, which explain when MMS considers a payment as received. If less than a full year remains on a lease, you must still pay a full year's rent by the anniversary date of the lease. For example, the rent on a 2,000-acre lease for the 11th year, would be \$10,000 (\$5 per acre), due prior to the 10th anniversary of the lease.

### **§ 3211.14 Will I always pay rent on my lease?**

(a) For leases issued on or after August 8, 2005 (other than leases issued in response to applications that were pending on that date for which no elec-

## 43 CFR Ch. II (10–1–08 Edition)

tion is made under § 3200.8(b)(1)), and for leases issued before August 8, 2005, for which an election is made under § 3200.7(a)(2), you must always pay rental, whether you are in a unit or outside of a unit, whether your lease is in production or not, and whether royalties or direct use fees apply to your production.

(b) For leases issued before August 8, 2005, for which no election is made under § 3200.7(a)(2), and for leases issued in response to applications pending on that date for which no election is made under § 3200.8(b)(1), you must pay rent for all the lands in your lease until:

(1) Your lease achieves production in commercial quantities, at which time you pay royalties; or

(2) Lands in your lease are within the participating area of a unit agreement or cooperative plan, at which time you pay rent for lands outside the participating area and pay royalties for lands within the participating area.

### **§ 3211.15 How do I credit rent towards royalty?**

You may credit rental towards royalty under MMS regulations at 30 CFR 218.303.

### **§ 3211.16 Can I credit rent towards direct use fees?**

No. You may not credit rental towards direct use fees. See MMS regulations at 30 CFR 218.304.

### **§ 3211.17 What is the royalty rate on geothermal resources produced from or attributable to my lease that are used for commercial generation of electricity?**

(a) For leases issued on or after August 8, 2005 (other than leases issued in response to applications that were pending on that date for which the lessee does not make an election under § 3200.8(b)(1)), the royalty rate is the rate prescribed in this paragraph.

(1) If you or your affiliate sell(s) electricity generated by use of geothermal resources produced from or attributed to your lease, then:

(i) For the first 10 years of production, the royalty rate is 1.75 percent;

(ii) After the first 10 years of production, the royalty rate is 3.5 percent; and

(iii) You must apply the rate established under this paragraph to the gross proceeds derived from the sale of electricity under applicable MMS rules at 30 CFR part 206, subpart H.

(2) If you or your affiliate sell(s) geothermal resources produced from or attributed to your lease at arm's length to a purchaser who uses those resources to generate electricity, then the royalty rate is 10 percent. You must apply that rate to the gross proceeds derived from the arm's-length sale of the geothermal resources under applicable MMS rules at 30 CFR part 206, subpart H.

(b) For leases issued before August 8, 2005, whose royalty terms are modified to the terms prescribed in the Energy Policy Act of 2005 under §3212.25, BLM will establish royalty rates under paragraphs (b)(1) and (b)(2) of this section.

(1) For leases that, prior to submitting a request to modify the royalty rate terms of the lease under section 3212.26, produced geothermal resources for the commercial generation of electricity, or to which geothermal resource production for the commercial generation of electricity was attributed:

(i) If you or your affiliate uses geothermal resources produced from or attributed to your lease to generate and sell electricity, BLM will establish a rate on a case-by-case basis that it expects will yield total royalty payments over the life of the lease equivalent to those that would have been paid under the royalty rate in effect for the lease before August 5, 2005. The rate is not limited to the range of rates specified in 30 U.S.C. 1004(a)(1). You must apply the rate that BLM establishes to the gross proceeds derived from the sale of electricity under applicable MMS rules at 30 CFR part 206, subpart H.

(ii) If you or your affiliate sells geothermal resources produced from or attributed to your lease at arm's length to a purchaser who uses those resources to generate electricity, the royalty rate is the rate specified in the lease instrument. You must apply that rate to the gross proceeds derived from the arm's-length sale of the geothermal resources under applicable MMS rules at 30 CFR part 206, subpart H.

(2) For leases that, prior to submitting a request to modify the royalty rate terms of the lease under section 3212.26, did not produce geothermal resources for the commercial generation of electricity, and to which geothermal resource production for the commercial generation of electricity was not attributed, BLM will establish royalty rates equal to those set forth in paragraph (a)(1) or (a)(2) of this section, whichever is applicable.

(c) For leases issued before August 8, 2005, whose royalty terms are not modified to the terms prescribed in the Energy Policy Act of 2005 under §3212.25, and for leases issued in response to applications pending on that date for which the lessee does not make an election under §3200.8(b)(1), the royalty rate is the rate prescribed in the lease instrument.

**§3211.18 What is the royalty rate on geothermal resources produced from or attributable to my lease that are used directly for purposes other than commercial generation of electricity?**

(a) For leases issued on or after August 8, 2005 (other than leases issued in response to applications that were pending on that date for which the lessee does not make an election under §3200.8(b)), and for leases issued before August 8, 2005, whose royalty terms are modified to the terms prescribed in the Energy Policy Act of 2005 under §3212.25:

(1) If you or your affiliate use(s) the geothermal resources directly and do(es) not sell those resources at arm's length, no royalty rate applies. Instead, you must pay direct use fees according to a schedule published by MMS under MMS regulations at 30 CFR 206.356.

(2) If you or your affiliate sell(s) the geothermal resources at arm's length to a purchaser who uses the resources for purposes other than commercial generation of electricity, your royalty rate is 10 percent. You must apply that royalty rate to the gross proceeds derived from the arm's-length sale under applicable MMS regulations at 30 CFR part 206, subpart H.

(3) If you are a lessee and you are a state, tribal, or local government, no royalty rate applies. Instead you must

## § 3211.19

pay a nominal fee established under MMS rules at 30 CFR 206.366.

(b) For leases issued before August 8, 2005, whose royalty terms are not modified to the terms prescribed in the Energy Policy Act of 2005 under § 3212.25, and for leases issued in response to applications pending on that date for which the lessee does not make an election under § 3200.8(b), the royalty rate is the rate prescribed in the lease instrument.

(c) For purposes of this section, direct use of geothermal resources includes generation of electricity that is not sold commercially and that is used solely for the operation of a facility unrelated to commercial electrical generation.

### **§ 3211.19 What is the royalty rate on byproducts derived from geothermal resources produced from or attributable to my lease?**

(a) For leases issued on or after August 8, 2005 (other than leases issued in response to applications that were pending on that date for which no election is made under § 3200.8(b)(1)), and for leases issued before August 8, 2005, for which an election is made under § 3200.7(a)(2):

(1) The royalty rate for byproducts derived from geothermal resource production that are identified in Section 1 of the Mineral Leasing Act (MLA), as amended (30 U.S.C. 181), is the royalty rate that is prescribed in the MLA or in the regulations implementing the MLA for production of that mineral under a lease issued under the MLA; and

(2) For a byproduct that is not identified in 30 U.S.C. 181, no royalty is due.

(b) For leases issued before August 8, 2005, for which no election is made under § 3200.7(a)(2), and for leases issued in response to applications pending on that date for which no election is made under § 3200.8(b)(1), the royalty on all byproducts is the rate prescribed in the lease instrument, or if none is prescribed in the lease instrument, the rate prescribed in 43 CFR 3211.10(b) (2004).

## 43 CFR Ch. II (10–1–08 Edition)

### **§ 3211.20 How do I credit advanced royalty towards royalty?**

You may credit advanced royalty toward royalty under MMS regulations at 30 CFR 218.305(c).

### **§ 3211.21 When do I owe minimum royalty?**

(a) You do not owe minimum royalties for:

(1) Leases issued on or after August 8, 2005 (other than for leases issued in response to applications that were pending on that date for which no election is made under § 3200.8(b)(1)); and

(2) Leases issued before August 8, 2005, for which an election is made under § 3200.7(a)(2).

(b) For leases issued before August 8, 2005, for which no election is made under § 3200.7(a)(2), and for leases issued in response to applications pending on that date for which no election is made under § 3200.8(b)(1), you owe minimum royalty of \$2.00 per acre (to be paid to MMS) when:

(1) You have not begun actual production following the BLM's determination that you have a well capable of commercial production; or

(2) The value of actual production is so low that royalty you would pay under the scheduled rate is less than \$2.00 per acre (this applies to situations of no production, as long as the lease remains in effect).

## **Subpart 3212—Lease Suspensions, Cessation of Production, Royalty Rate Reductions, and Energy Policy Act Royalty Rate Conversions**

### **§ 3212.10 What is the difference between a suspension of operations and production and a suspension of operations?**

(a) A suspension of operations and production is a temporary relief from production obligations which you may request from BLM. Under this paragraph you must cease all operations on your lease.

(b) A suspension of operations is when BLM orders you, to stop production temporarily in the interest of conservation.

**§ 3212.11 How do I obtain a suspension of operations or a suspension of operations and production on my lease?**

(a) If you are the operator, you may request in writing that BLM suspend your operations and production for a producing lease. Your request must fully describe why you need the suspension. BLM will determine if your suspension is justified and, if so, will approve it.
